DEAR SENATOR KENNEDY: When the Simpson/Mazzoli bill (S. 2222) to reform U.S. immigration policy reaches the floor of the Senate this month, it is expected that an amendment with major negative implications for international refugee protection will be offered by Senator WALTER D. HUDDLESTON of Kentucky. The anticipated amendment would include refugees who may be resettled in the United States along with all other immigrants to the United States under a single numerical limitation.

Traditionally immigrant and refugee admissions procedures have been separated because their underlying bases have been recognized as distinct. The concept of a single ceiling is seductively simple, but its implications hold serious threats. The combined approach to admissions has been considered and rejected by the Select Commission on Immigration and Refugee Policy and all other responsible authorities who have studied the matter in recent years.

This letter does not concern any particular level of refugee admissions, but rather the way the United States makes its decisions regarding admissions. The U.S. Committee for Refugees, with its programs historically focused on international refugee concerns, feels that the impact of the Huddleston amendment will so affect U.S. refugee resettlement policy that the protection of refugees overseas is threatened.

Of course, resettlement has clear immigration impact which must be acknowledged directly and dealt with constructively. But the purposes, implications, and international outcomes of the two admissions processes are completely distinct. Whereas general immigration largely relates to family reunion, the rescue and resettlement of refugees is a human rights effort. Its base is ideological, seeking to uphold certain humanitarian principles and valuing the right of individuals to be free from persecution based on particular inherited or chosen distinctions.

Refugee resettlement has been kept separate from other immigration processes because of this intimate relationship with foreign policy and humanitarian concerns.

When the Refugee Act of 1980 was enacted, Congress chose to include what USCR believes is a sound procedure for determining the number of refugees to be admitted to the U.S. each year. To the extent there have been problems regarding refugee admissions in the 27 months since the "consultation" procedure was enacted, they are not attributable to the letter or intent of the law.

Senator HUDDLESTON seeks to change the existing refugee admissions framework, notwithstanding the fact that refugee admissions ceilings and actual admissions themselves have declined steadily since 1980. We believe his interest is to limit total admissions. There are serious questions about this objective; but even if the end were justified, the proposed approach is not. If a single numerical ceiling for immigrant and refugee admissions becomes law, USCR feels there would be four major unacceptable results:

1. Enactment would significantly limit the flexibility needed by the President to re-

spond promptly to foreign policy matters in which refugees are a factor.

2. This restricted ability to negotiate and respond would seriously undercut U.S. leadership in humanitarian, human rights, and related foreign policy areas.

3. A single numerical ceiling would be divisive domestically. Limited and undifferentiated numbers would pit those seeking to respond to refugee needs against nationality groups and those seeking to reunify families. Congress must be responsive to both groups, but through separate processes.

4. USCR believes enactment of a single numerical ceiling would send a chilling message to the world. The important principles of refugee protection are under assault in many areas. In some cases the actions and inaction of our government have directly contributed to this troubling phenomenon. Enactment now of such a restrictive amendment would further compromise the remaining moral leverage the United States has with the rest of the world in matters of refugee protection. In specific situations, such as that of Cambodians in Thailand, first asylum is so fragile that this enactment could cause the provision of haven there to be lost.

As citizens we all daily face the task of responding to many issues. So, of course, do Members of Congress. With respect to the particular issue of a single numerical limitation on refugee and immigrant admissions, we believe many members of the Senate do not have a clear understanding of the potential results as set forth in this letter. You may wish to consider contacting them promptly to share your own thoughts.

Sincerely,

ROGER P. WINTER,
Director.

NATIONAL ASSOCIATION OF
EVANGELICALS,
Washington, D.C., August 5, 1982.

Hon. EDWARD M. KENNEDY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR KENNEDY: The National Association of Evangelicals and its subsidiary World Relief Corporation are deeply concerned about Senator Huddleston's amendment to the Simpson-Mazzoli Immigration Reform and Control Act of 1982, S. 2222. We are strongly opposed to the recommendation that refugees and asylees be considered along with immigrants under a single numerical limitation. We urge you to be among those who oppose this amendment.

If adopted, this amendment would have several unacceptable results: (1) it would seriously undermine the ability of the United States to respond adequately to humanitarian and human rights concerns around the world; (2) it would be domestically divisive in that those responding to refugee needs would be competing with nationality groups and those seeking to reunify families; (3) acceptance of this amendment would send a chilling message to the international community and thus threaten important principles of refugee protection already under assault in many areas.

The National Association of Evangelicals through its humanitarian relief agency, World Relief Corporation, has resettled over 32,000 refugee immigrants and entrants since 1979. This has been made possible through the generous efforts of a concerned and involved constituency representing 42 denominations and millions of Americans.

We believe that your opposition to the Huddleston amendment will best enable the

United States to respond with justice and compassion.

Faithfully yours,
ROBERT P. DUGAN, JR.,
Director.

Mr. KENNEDY. In conclusion, Mr. President, I think the American people are concerned by what is in reality and also, I say, in appearance, an open border of this Nation. But the Huddleston amendment will not address these issues.

There is no question that there are as many as 1 million undocumented aliens who come into the United States every year. The Huddleston amendment will not deal with that problem.

It is true that we did accept tens of thousands of individuals who came from Cuba in recent times as a result, I think, of a misuse of Executive power. But the Huddleston amendment will not deal with that issue.

It is true that the Haitians have come here and landed on the shores of Florida and caused concern. But the Huddleston amendment will not deal with that issue.

So, although I think all of us are concerned about how we as a country are going to be able to deal with these rather fundamental and basic questions I dare say the Huddleston amendment does not help. It simply pits refugees against the reunification of family members, and this is not an attractive or compelling alternative. Yet, that is the choice he requires us to make.

Mr. President, I join with my colleagues here this afternoon and hope that we will reject the Huddleston amendment. If we do, I shall certainly work with not only the chairman of the subcommittee, but with the Senator from Kentucky, to consider how this Nation is going to be able to deal with the long-term problems, of refugees and immigrants.

As I stated earlier this morning, some 9 or 10 hours ago, this bill is basically a very measured bill at best. We are going to have to deal further with the flow of people into this Nation. I know the Senator from Kentucky understands that. I know he has worked long and hard on it and it is going to take the best efforts of all of us in Congress and also at the executive level in the conduct of American foreign policy to try to deal with that. I pledge to the Senator from Kentucky my willingness to try to deal with it, but I feel this amendment falls short of that objective.

Mr. SIMPSON. Mr. President, I believe the Senator from Florida would like—

Mr. CHILES. Mr. President, I would like to ask unanimous consent for 5 minutes. I have been waiting all through this debate to get some time on this amendment.

Mr. SIMPSON. Even though the Senator from Florida is on the oppos-

ing side of the issue, whatever remaining time I have I yield to him for that purpose.

The PRESIDING OFFICER. The Senator has 14 seconds.

Mr. CHILES. I ask unanimous consent for 5 minutes, Mr. President.

The PRESIDING OFFICER. Is there objection?

Mr. KENNEDY. The only point is, Mr. President, I would ask that there be 5 minutes available to the other side if that request is granted.

The PRESIDING OFFICER. Is there objection?

Mr. SIMPSON. Reserving the right to object, let it be expressed that with this 5 minutes, there be an additional 5 minutes for the opposing side.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. CHILES. Mr. President, I have been listening with interest to the debate. I heard the statement of the distinguished Senator from Missouri. I heard him say we should not pit these two proud groups of people against each other, the refugees and those people who are seeking to come in as immigrants.

Who represents the proud people in my State? Who keeps them from being pitted against each other when they are deluged with people who have been coming in because we have not had an immigration policy in this country?

Some have said refugees do not belong in this bill. I thought half of this bill covered illegal aliens, and trying to deal with them. We looked at what to do about amnesty for some who were already here, we are trying to do something about work certification, we are trying to do something about speeding up the determination of whether a person is entitled to political asylum or not. I thought the other half of the bill dealt with legal immigration. Now, if refugees do not intend to become immigrants, if they do not intend to become citizens in this country, then they do not belong in this bill. But if refugees are going to become citizens, if they are going to become permanent residents, where else should they be but in this bill?

We are talking about an annual cap on immigration. For the first time, we are talking about trying to put an annual ceiling in place. If the number in that ceiling is wrong because we have refugees in it, then we should increase the number. But we are also talking about doing something to protect the proud people who live in this country, the proud people who have jobs and families. Those are people who have come as refugees, or come as immigrants, as we all have, but who have worked their way through that system and maybe had to wait for years to be here. Perhaps, for those

people, we ought to be considering refugees and immigrants together.

We are going to just fool ourselves. We are going to say we will put a cap on but we are not really doing anything about refugees within that cap. What happens if there is an uprising in Poland and we decide we are going to allow some Poles to come into this country? I would be for that if they are fleeing communism. I would also be for saying there is a limit to what this country can assimilate in a year.

We ought to look at that. We ought to determine what that number we can assimilate is. If we make a special exception, we ought to do it. But we should not have a policy that says that the cap we set does not count. We ought to let in all the other people who are able to come and perhaps let these others come in, too. But should we not say at some stage: "Look, if we are going to allow these Poles to come in, we may have to take a look at the other people we are allowing to come in?" We may have to say that some will have to wait for another year.

It is interesting to hear the Senator from Minnesota talk, and I know how strongly he feels about this. But he may be speaking in the abstract when he says that there are no problems of immigration in this country, that we can take these scores of thousands who come in and look at them only as so many per thousand. Tell that to somebody in my State.

Tell that to somebody in my State. Tell them that there is no problem, when 6 of Florida's cities are among the top 10 in the Nation in terms of crime rates, and when Miami has become the murder capital of the world. To Florida, immigration is not abstract because we have been deluged by refugees; we have been deluged by immigrants.

What we in Florida are saying is that we want to do our share. Every day we come up here, and we try to get some money to see that we pay back the State and local government for their costs. Every day we fight all the way through Congress, and we fight the administration. The administration cut pay-back for immigrant costs from 36 months to 18, and we are fighting every day. Our hospitals are full. We do not know what to do. Our school system got 6,500 new pupils in 1 year and we got \$600 a pupil. That did not pay for the teachers, let alone the special bilingual classes, let alone the construction costs for those pupils. And now that money has been cut off too. We lost that now. And then we say having a single immigration cap is just an abstract problem; that we will cover this somewhere else; we say that we do not have to put refugees in the same bill.

As far as I am concerned, if we are really talking about doing something, if we are saying that we are going to

establish a policy for this country in regard to immigration, if we are going to have something to say about who comes in, then we have to have the Huddleston amendment. We have to have a total cap.

Mr. TSONGAS. Mr. President, I rise to speak in opposition to the amendment offered by my distinguished colleague, Mr. HUDDLESTON. It would lump refugees and other immigrants in the same category, thereby limiting their total immigration to 425,000 persons a year.

The proposed amendment would frustrate one of the central aims of the Nation's immigration policy. The tradition of the United States as a haven for refugees runs deep in our history, from the earliest landings of the Pilgrims in the 17th century to the arrival of Indochinese war victims in the past decade. The tradition of the United States as a haven for those fleeing persecution and hardship is fundamental to this Nation's identity.

This amendment puts that long and hallowed tradition in jeopardy. It would, for example, force refugees to compete with brothers and sisters of U.S. citizens desiring to immigrate. If this Nation is to remain true to its historic ideals, such a crimp on the immigration of refugees is intolerable.

Refugees are sometimes portrayed as a burden, exacerbating unemployment and straining the demand for scarce Federal funds. In fact, the vast majority of refugees have become hard-working and tax-paying Americans. The same kind of people that this amendment would unduly restrict from our shores have contributed importantly into building the United States into the great Nation it is.

If the proposed amendment passes, it would be a signal to the rest of the world that the United States has lost sight of one of its most cherished ideals.

Mr. President, I urge my colleagues to vote against this amendment and keep that ideal alive. Also, I ask that an article by Lawrence Fuchs, the former Executive Director of the Select Commission on Immigration and Refugee Policy, which appeared in the Washington Post on Friday, August 6, 1982, be placed in the RECORD.

The article follows:

[From the Washington Post, Aug. 6, 1982]

IMMIGRATION AND FEAR

(By Lawrence H. Fuchs)

The debate on immigration legislation is heating up in a climate of fear engendered by economic malaise, concern over Haitian immigrants, anger at Fidel Castro for pushing 125,000 Cubans on the United States in 1980 and the repeated—but factually wrong—assertion that the United States is now accepting more immigrants than at any time in its history and more than the rest of the world put together.

Fear is a major factor behind an amendment introduced by Sen. Walter Huddleston

(Ky.) that would lump refugees together with other immigrants under an overall world ceiling of 425,000 for all legal admissions to the United States.

The Select Commission on Immigration and Refugee Policy studied this and other immigration matters for two years. Finding that legally admitted immigrants and refugees contribute to the well-being of the United States in many ways (the creation of jobs, productivity, the strengthening of our Social Security base), it urged the Congress to distinguish between illegal and legal immigration and to differentiate further between lawfully admitted immigrants and refugees.

Should refugees be included in the cap? The answer of the 16-member bipartisan commission, which included eight members of Congress, was an emphatic and unanimous no. Rather, it endorsed the Refugee Act of 1980, which provides for a normal flow of 50,000 refugees annually and a process by which the president can increase that number in consultation with Congress.

The commission followed the principle of separating refugees from immigrants because to lump them together would be bad public policy.

First, it would compromise the United States morally, taking us back to the situation we faced in 1938, when we refused to admit orphan refugee children fleeing persecution and facing death because they came outside of the quotas set for immigrants.

Second, it is unwise to make refugees compete with close relative of U.S. citizens and resident aliens for scarce visas. If it became important for the United States to rescue refugees in any given year, the immigration of relatives of U.S. citizens and resident aliens would be delayed, causing tremendous resentment.

Third, refugee policy is often related to foreign policy, and the president needs flexibility with respect to refugee policy that is not required concerning immigrants. A sudden flare-up in Poland, another rebellion in Hungary, or comparable developments elsewhere might require the president to act quickly.

Finally, it would not work for long. Precisely because of the pressures of foreign policy, Congress, under stimulation from the White House, would violate its own cap, as it did repeatedly through special legislation before the passage of the Refugee Act of 1980.

Advocates of the Huddleston amendment repeatedly exaggerate the number of illegal entrants to the United States, asserting, contrary to the careful work of the Select Commission, that 500,000 of them come into this country each year to stay. That number simply has no basis in fact.

The restrictionists also repeatedly use the number of persons admitted to this country in 1980 to support their charge that there are now more immigrants coming to the United States than ever before. That year was extraordinary because of the admission of 135,000 Cubans and Haitians as "special entrants" who were not admitted as immigrants under our normal, lawful admissions procedure and because we admitted the largest number of refugees in our history, 233,000, far above the average of 50,000 between 1960 and 1980. Nineteen-eighty was not the largest year of immigration in U.S. history. That was 1907, one of six years in which more than 1 million were lawfully admitted to the United States.

The severe restrictionists frequently assert that the United States accepts more immigrants and refugees than the rest of the world put together. Evidently, they do not count the refugees in Somalia or Pakistan. Tiny Somalia, with a miserable per capita gross national product of \$130 has accepted more than 1.5 million refugees from Ethiopia—one for every 2.4 of its own population.

To permit the fear and confusion that underlies the Huddleston amendment to prevail in the Senate debate would constitute not just a concession to mean-spiritedness but also to irrationality.

Mr. HATFIELD. Mr. President, I am pleased to have this opportunity to speak on behalf of the many Senators who oppose this amendment offered by my distinguished colleague from Kentucky which would place refugees under the overall cap on legal admissions to the United States.

I understand Senator HUDDLESTON'S motivation for placing refugees under the 425,000 ceiling. He is concerned with the total number of entrants to the United States each year, and he wants to have refugees included with asylees and general and special immigrants to the United States. I share with him the concern that our domestic resources are dwindling and our resource needs are growing, and that our country's infrastructures cannot withstand an unregulated flow of immigrants. That is why I have supported the 425,000 cap. I think it strikes a fair balance between the interests of family reunification, which is primarily why we accept immigrants to the United States, and the awareness of the limitations on our country's ability to assimilate newcomers into our economy and our society.

But there is a fatal flaw in the logic of the Huddleston amendment. The amendment totally ignores the distinction that is drawn between why America accepts refugees and why America accepts general immigrants. There are two separate policies involved here. As I mentioned, America has traditionally accepted immigrants for the purposes of family reunification and "special" immigrants for particular job opportunities. That is why we have preference categories and an unlimited acceptance of "immediate family members."

However, when you talk about "refugees," you are not talking about family reunification any more. We met 17 months ago and passed the Refugee Act of 1980. Section 101 of that act states that it is the "historic policy of the United States to respond to the urgent needs of persons subject to persecution in their homelands." This historic policy is why America stretched out its arms to the refugees from Hungary in October of 1956, the refugees fleeing Castro in 1961, the Vietnamese refugees in 1975 and subsequent years, and to the other refugees who have found America as a shelter from persecution.

This historic policy is the cornerstone of our commitment to human rights and to the individual's inalienable right to be free from the grips of tyranny and political persecution. This commitment is what distinguishes the United States from the other world powers and is what gives us moral leverage in negotiating international disputes. It is important, therefore, for all of us in this Chamber to keep in mind that there are two separate policies involved with respect to general immigration and to refugees. The issue is not what happens to these foreigners once they are settled in the United States—that is the argument being offered by the proponents of this amendment. The issue is why we admit refugees to this country. People who are fleeing from a well-founded fear of persecution are not coming to the United States for family reunification purposes. And the decisions to admit these refugees involve very delicate and volatile international considerations that comprise our Nation's foreign policy.

The Senate and the President understand that the United States cannot become a haven for the world's 12 to 16 million refugees. That is why we passed the Refugee Act of 1980 that requires the President to submit to appropriate consultation whenever the President feels that it will be necessary to accept more than 50,000 refugees in a fiscal year because of humanitarian or national interests considerations.

I have seen literature being circulated by the proponents of this amendment which points to 1980 when 808,000 people were admitted to the United States. Conspicuously absent from their analysis of refugee and immigration issues are two crucial considerations. First, since 1980, the number of refugees has steadily dropped, from 159,000 in 1981, to this year's 75,000 figure. Second, the 808,000 number was inflated by the influx of Cuban and Haitian entrants. I say "entrants" because that is the title the Carter administration gave them. I want to emphasize that these Cubans and Haitians were not refugees but merely applicants for asylum, and without proof of a well-founded fear of persecution, they could not be considered refugees.

My point is that if this amendment is a response to the problems encountered with the stream of immigrants from Haiti and Cuba in 1980, or if it is designed to prevent similar occurrences, then this amendment is not necessary. Senator SIMPSON and others have instituted in S. 2222 various provisions which will address and prevent those types of occurrences. There are summary exclusion provisions, asylum procedure changes, and penalties for transporting an illegal alien to this country which, with the

other initiatives in S. 2222, will bring order to the admissions process. All the Huddleston amendment would do is abridge the President's powers to respond to international crises which involve refugees. This is precisely why the administration vehemently opposes this amendment. And while I disagree with numerous elements of the administration's refugee policy, I join with them in their opposition to an amendment which would restrict America's ability to negotiate and respond to international matters with human rights overtones.

There is another serious flaw in the amendment offered by my colleague from Kentucky which I feel should be considered by the Members of the Senate. What the amendment will do, quite simply, is put the interests of those seeking to immigrate for family reunification purposes against those seeking to immigrate to flee political persecution. This type of confrontation is unhealthy and unwise. Refugees admitted in year 1 would be deducted from the immigration visas granted in year 2. In effect, a year which sees a large number of refugees would mean that those individuals in the reunification preference categories would be out in the cold the following year. Unmarried adult sons and daughters of U.S. citizens, as well as spouses and unmarried sons and daughters of permanent residents, would be displaced because of the number of refugees admitted in the previous year. This is not what S. 2222 wants to happen. We don't want the interests of those coming in for family reunification purposes to be in direct conflict with those seeking refugee status.

To be blunt about this, the amendment being considered by the Senate at this time is a backdoor approach to cutting family reunification visas. The present total of aliens issued immigrant visas or adjusting their status to lawful permanent residents, excluding refugees, is approximately 425,000. The Simpson-Mazzoli bill is designed so that there is no reduction in the current level of legal immigration to this country. This 425,000 is a figure which has survived the scrutiny of committee after committee after committee.

What Senator Huddleston's amendment would do is to cut that number to a figure well below 425,000. In effect, the amendment is saying, "We only want 425,000 foreigners per year admitted to the United States, and whatever number we don't use for refugees and immediate family members, we'll apply to whoever else is in the pool." This flies in the face of our history and heritage as a country. The Huddleston amendment from year 2 on will cause nothing but chaos in this country. And it will send out a bleak

message to the international community on the future of America's role in refugee protection and on human rights issues.

If proponents of this amendment really wish to allow the President the flexibility to deal with the refugee matters, then they should be upfront about what this amendment will do. This amendment will drastically reduce the number of visas available for family reunification. The proponents of this legislation have clouded the issue by muddying the waters with the inclusion of refugees in the admitting pool. The Huddleston amendment will reduce nonrefugee admissions by a number anywhere from 90,000 to several hundred thousand, depending on the number of refugee admissions. The tension between refugee admissions and family reunifications is built into this amendment, and this tension will breed tremendous adverse consequences.

I think the United States should have control of its borders. We do have tough economic problems that are exacerbated by the flow of illegal aliens. That is why S. 2222 is so badly needed. We must rid our country of illegal immigration practices, and we must bring order to legal immigration. We will have a proper forum to address refugee issues when the Senate takes up the reauthorization of the Refugee Act. The challenge before this body is to bring order to legal immigration and to put an end to illegal immigration. We can do these things without crippling our country's commitment to humanitarian principles and to reunifying families. But we must not impair the President's powers in the area of foreign policy, and we must not blunt our country's duty to allow for an orderly reunion of family members. I am of the opinion that this amendment will do precisely that, and for that reason, I oppose this amendment.

The PRESIDING OFFICER. The time yielded the Senator has expired. The Senator from Wyoming.

Mr. SIMPSON. Mr. President, I yield back the remainder of my time to go to the rollcall vote.

The PRESIDING OFFICER. The yeas and nays have not yet been ordered.

Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll.

Mr. MATTINGLY (after having voted in the affirmative). On this vote I have a live pair with the Senator from Oregon (Mr. HATFIELD). If he were present and voting, he would vote "nay." If I were permitted to vote, I would vote "aye." I therefore withdraw my vote.

Mr. STEVENS. I announce that the Senator from Oregon (Mr. HATFIELD) is necessarily absent.

The result was announced—yeas 35, nays 63, as follows:

[Rollcall Vote No. 317 Leg.]

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Mattingly, for.

NOT VOTING—1

Hatfield

So Mr. HUDDLESTON's amendment (UP No. 1227) was rejected.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. KENNEDY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UNANIMOUS-CONSENT REQUEST

Mr. BAKER. Mr. President, if I could have the attention of the Senate, I have an important matter I wish to present in the form of a unanimous-consent agreement.

Mr. President, for some time now we have been struggling with the idea that in order to make the August 20 recess it was necessary to dispatch our responsibilities in respect to a list of items which included the supplemental appropriation bill, this immigration bill, and other matters.

The last major item other than conference reports that is on that list of must items is the debt limit. It has now been reported from the Finance Committee, and it is the intention of the leadership to ask the Senate to proceed to the consideration of the debt limit on Monday.

All Senators will perhaps remember that for a period of time now extend-

ing over the past almost 18 months I have indicated that we are going to have a debate on abortion when the parties principally involved in that matter could decide when they wanted to have that debate and choose the vehicle which would carry that debate.

The most recent development in that situation has been by general process of elimination or by osmosis. The debt limit was chosen as the vehicle for that debate and that will be indeed the vehicle for the abortion debate.

So it will be a difficult debate. It is a sensitive issue, one which divides the Senate and the country, but it deserves our attention and our careful thought.

Mr. President, it is not treating lightly that subject to say it does not require us to debate the issue forever.

I would hope that the Senate could agree voluntarily and by unanimous consent to an arrangement that would limit to a generous amount of time that period of time in which we will debate the abortion issue in connection with or contemporaneous with the debt limit.

Mr. President, I have discussed this matter at length with the principal parties involved in the debate on this side of the aisle, and they, I think, are in general agreement. I have discussed this matter with the minority leader and Members on that side of the aisle.

I shall now present a unanimous-consent agreement which represents my best efforts and I believe the synthesis of the best thought that we can put together on how we might go about having a full-fledged, thorough debate on this sensitive issue within a reasonable timeframe.

Mr. President, I put the request at this time.

Mr. President, I ask unanimous consent that, when the Senate turns to the consideration of House Joint Resolution 520, a joint resolution to provide for a temporary increase in the public debt limit, an amendment by the Senator from North Carolina (Mr. HELMS) incorporating only those provisions of S. 2148, Calendar Order No. 478, page 1, line 1, through page 5, line 21, shall be in order; that there shall be 8 hours of debate equally divided on the Helms amendment; and that no amendment to the Helms amendment shall be in order.

Mr. President, I further ask unanimous consent that, following the final disposition of the Helms amendment, the Senate set aside House Joint Resolution 520 and turn immediately to the consideration of Senate Joint Resolution 110, Calendar Order No. 658, a joint resolution to amend the Constitution to establish legislative authority in Congress and the States with respect to abortion; that there shall be 8 hours of debate on such joint resolu-

tion equally divided; and that no amendment shall be in order to such joint resolution.

Mr. President, I further ask unanimous consent that, following final disposition of Senate Joint Resolution 110, the Senate immediately resume consideration of House Joint Resolution 520. When the Helms amendment dealing with abortion and Senate Joint Resolution 110 are disposed of, I further ask unanimous consent that no other matter or measure dealing with abortion shall be in order for the remainder of the second session of the 97th Congress, save those which will make or maintain present law which is as follows: None of the funds provided by this act shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term; provided, however, that the several States are and shall remain free not to fund abortions to the extent that they in their full discretion deem appropriate.

Mr. President, before the Chair puts the request, the essence of this request is that on the debt limit there will be two measures debated relating to abortion, the Helms amendment to the debt limit, and after the disposition of that measure, the Senate will proceed to the consideration of the Hatch constitutional amendment dealing with abortion. After the final disposition of that measure, we will resume consideration of the debt limit.

This proposed order does not put any limitation on the length of time we can debate the debt limit nor does it limit amendments to the debt limit except as they may relate to abortion.

Mr. President, this order also provides that after we have had our debate on abortion, on the Hatch amendment to the Constitution, and the Helms amendment in the nature of statutory language, that is the last we are going to debate abortion this session of Congress.

That is a tall order, Mr. President, but I think it is an orderly arrangement for the discharge of the Senate's responsibility to address an important and sensitive issue but to do so within a reasonable timeframe and to dispatch those questions in a methodical and orderly way as the people of this country want us to do.

I put the request.

Mr. GOLDWATER. Mr. President, reserving the right to object, what are we going to do with the Garn legislation on abortion?

Mr. BAKER. Mr. President, my understanding is that the Senator from Utah (Mr. GARN) is not going to offer that legislation. If this agreement were granted it would not be in order. But the Senator from Utah has indicated, I believe I am correct in saying this, if this order is granted he would not propose to offer it on this debt limit in any event.

Mr. GARN. If the majority leader would yield, Mr. President, that is the case. I have been the sponsor of two constitutional amendments for several years. But I am in agreement with this orderly disposal. It would preclude me from offering them this year, but certainly not in the new 98th Congress.

Mr. GOLDWATER. It seems to me that 8 hours are rather pushy on a constitutional amendment, especially one that has this country so divided. I want to do all I can to expedite matters, but I will be doggoned if I do not believe that is awfully fast work, especially when we have not done much all year. [Laughter.]

Mr. BAKER. The principal accomplishment of this Congress is that we have not so far contracted legislative indigestion, in my judgment.

Mr. GOLDWATER. Well, we have contracted diarrhea, which is not good. [Laughter.] I withhold my objection.

Mr. HUMPHREY. Mr. President, reserving the right to object, I have to agree with the Senator from Arizona about the brevity of the time. But in any case it strikes me that there might be a good deal of competition for that time. Apparently it is agreeable to the principal parties. I just want to be sure, I want to be assured, that the Senator from New Hampshire will be able to speak his mind fully on this issue. I do not want to be selfish, but I would like to be assured that I would have at least 30 minutes in this agreement, because I do believe that the 8-hour restriction—

Mr. BAKER. Mr. President, I assure the Senator from New Hampshire that if this order is entered into, to the extent that I have control of the time I will be glad to provide that 30 minutes; to the extent that the chairman of the Judiciary Committee will have control I will urge him to do the same. I believe there is no question but that the Senator will receive his time.

Mr. HUMPHREY. To the extent that the Senator controls time, I would like unequivocal assurance to be included as being a part of this unanimous-consent agreement, if necessary, that I may have 30 minutes.

Mr. BAKER. Mr. President, I wish to amend my request so that control of the time would be in the usual form.

Now, Mr. President, will the Chair state how the time will be controlled in the usual form.

The PRESIDING OFFICER. By the majority and minority leaders or their designees.

Mr. BAKER. I thank the Chair. Mr. President, I wish to assure the Senator I will designate 30 minutes to him.

Mr. HUMPHREY. Very well. I thank the majority leader.

Mr. METZENBAUM. Mr. President, reserving the right to object, and I do not now intend to object, but with re-

spect to the position of the proposal relating to existing law, it is my understanding that that is referred to as the Hyde amendment, and it is my understanding it is part of the appropriations bill and not a part of the authorizing legislation. Am I correct in my understanding it will continue to be a part of the appropriation legislation and not become part of the permanent law?

Mr. BAKER. Yes, that is my interpretation.

Mr. METZENBAUM. I thank the Senator.

Mr. CHILES. Mr. President, reserving the right to object, I wonder whether the majority leader would explain under the time agreement, under both the Hatch and Helms bills, are they open to amendment or would amendments be in order?

Mr. BAKER. Mr. President, they would not be under the form of this agreement.

Mr. CHILES. Well, I listened to the majority leader and he said we were going to have full debate on this subject and the subjects were important and they were entitled to full debate. Can we really have that if there are no amendments that are in order?

Mr. BAKER. Of course there is a great deal of debate flexibility in offering amendments but, on the other hand, there is no requirement in my view at least that a Member must offer an amendment in order to make his views known. I think the net effect of the prohibition against amendments is to either increase or decrease the particular likelihood that a particular measure will be adopted. I think, on the other hand, if we were to open the way for amendments it is virtually certain, I think it is certain, we would have no agreement at all. I think this is the best that can be done. I think it is a reasonable arrangement, and I think it will give Senators a generous opportunity to express their views on the subject.

Mr. CHILES. Well, I think there are certainly some of us here who feel that how we would vote on one or both of these bills would certainly be influenced by whether or not we could offer amendments and whether or not those amendments could be adopted. Of course, we have unanimous-consent agreements all the time in which we provide some time for amendments, we provide a procedure where we can have amendments, and I am a little concerned about when we are talking about having a full debate on this very, very important subject, yet there cannot be any amendments.

I agree with the majority leader that these are subjects that ought to come up. I certainly do not want to keep them from coming up but, at the same time, it just seems to me that some of us, if we cannot have any amend-

ments, we are certainly going to be foreclosed from being able to work our will on this legislation.

Mr. BAKER. Mr. President, I hope the Senator will not object. I think it is remarkable that the parties, the Members who are as divided as they are on these issues, are this close to agreement, the principals are. I refer to principals only in a descriptive sense, those who have been most prominent in this debate on this side of the aisle that I am aware of.

We have, on the one hand, Senators PACKWOOD and HELMS. You have Senator HATCH, Senator HATFIELD and, believe me, it is no small feat to arrive at a place where they are agreeable to this arrangement, and essential to this arrangement is we know precisely what we are dealing with and what we are dealing with are two measures that are spelled out in exact detail, exact words. The language by reference is identified in this request, and if we must deal with other uncertain and unknown amendments I can tell the Senator that the thing will not go and we will be in what seems like an endless debate on this subject.

Mr. PACKWOOD. Mr. President, will the majority leader yield?

Mr. BAKER. Yes, I yield.

Mr. PACKWOOD. Let me say to my good friend from Florida that I initially had some of the same misgivings he does, but I realized what the situation is going to be if we cannot proceed as stated by the majority leader. I will be very candid, I do not think the constitutional amendment is going to pass the House if it passes here, and whatever rights are reserved by the Senator from Utah as to introducing his amendment next year will depend on the outcome of the elections, and there would be some of us here who would be happy to put it off and not have any vote on the subject, those satisfied with the Supreme Court decision. Others want to vote and want to change it.

The only way we are going to have a relatively limited debate on a subject—and let us be serious, that we all are very familiar with—is if this particular agreement could be reached, and I can assure the Senator from Florida if it cannot be reached then what we are going to be faced with are not 2 votes but probably 20 on the subject of abortion, and the Senator will have ample opportunity for amendments and ample opportunity to vote on all kinds of amendments all during September.

I do not mean that as a threat. I just think realistically that is what is going to happen, and I think this was the best that could be fashioned, and it will give everybody who wants to vote an opportunity to vote on this subject. I have gone around with Senator HELMS and Senator HATFIELD on this, and this is as much as we could do.

Mr. CHILES. I assure the Senator—

The PRESIDING OFFICER. Does the Senator continue to reserve his right?

Mr. CHILES. I do.

On the constitutional amendment, on the Hatch amendment, I understand there was an amendment offered in committee that has been talked about widely as to whether the rights would be just for the States as opposed to the States and/or the Federal Government. That is an area which is persuasive to the Senator from Florida, that this should be a question reserved to the States.

Now, under the unanimous-consent agreement with no amendments that question will never be presented to the Senate because it will just be a vote as to whether you will take the provision as it is written, and you will never be able to express yourself on the other provision, and it seems to me that that is an amendment that is fairly close in the committee, there has been a lot of talk about that amendment. It is an amendment that happens to be persuasive with me. And yet, under the unanimous-consent agreement, I would not have an opportunity to vote for that amendment.

Mr. BUMPERS. Will the Senator yield while he still reserves the right to object?

Mr. CHILES. Yes.

Mr. BUMPERS. Mr. President, I would submit that I could not think of a better reason to vote against both proposals. I am not going to object. I am not even going to reserve the right to object, Mr. President.

But here is an amendment which has not been reported from anyplace. The Hatch amendment has been reported out of the Judiciary Committee. We debated the constitutional amendment on the balanced budget for roughly 10 days here. I was on the losing side of that, but we did have some very good debate; not as much as I would like and some of it was not as high level, but at least there was a lot of thoughtful consideration that went to that.

But, by the same token, here you have a constitutional amendment that you are going to be limited to 8 hours on and you cannot even debate it. I would like to ask any Senator how you are going to respond to your constituents who say, "You agreed to the agreement on the amendment and you had to vote yes or no and you could not even offer an amendment to perfect it even though you would have liked to and possibly voted for it after that."

I would suggest to the Senator that he not object on that ground.

Mr. CHILES. Mr. President, the Senator from Florida is not afraid to express himself and is not afraid to vote on any question, but he would like to

be able to state what his views would be and not be put in a position where, by virtue of the unanimous-consent agreement, he is not able to state those views.

Mr. BAKER. Mr. President, I understand what the Senator is saying, but I must say again that we worked on this for days now. There are good arguments on both sides, and one was expressed eloquently by the Senator from Arkansas that at least you are dealing with a certain quantity instead of an uncertain quantity.

Mr. CHILES. Is the majority leader saying that if the Senator from Florida requested the Hatch amendment be open to amendment that there would be no unanimous-consent agreement?

Mr. BAKER. Yes, Mr. President, I am expressing the view that if that were to occur I think there would be an objection. There may be an objection anyway. But what I am saying is this is the best way I know how to do it.

Mr. HUMPHREY. Mr. President, reserving the right to object, let me ask the majority leader: Is the Hatch amendment going to be considered as business separate from the debt limit?

Mr. BAKER. Yes, that is correct. The constitutional amendment cannot be added as an amendment to the debt limit. So this proposed unanimous-consent agreement provides that after we dispose of the Helms amendment we would temporarily set aside the debt limit and proceed to consider the Hatch constitutional amendment, free-standing, and after the disposition of the Hatch constitutional amendment, we would return to the consideration of the debt limit bill.

Mr. HUMPHREY. I thank the majority leader.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, as Members can probably tell, the issues dealt with, as sensitive as they are in the unanimous-consent request, have not yet been fully resolved. I think there is still a chance we could get an agreement, but so that Members may try to work out their differences on one remaining section of it, I withdraw the request at this time.

The PRESIDING OFFICER. The request is withdrawn.

ORDER OF PROCEDURE

Mr. HEFLIN. Mr. President, will the majority leader give us what the schedule will be tonight?

Mr. BAKER. Mr. President, what I want to do now is to put us on the conference report on the war risks. To do that, there is a 1-hour time limitation on that conference report.

After that conference report is finished or during the time we are in a position to do so, I will put the request once more.

The PRESIDING OFFICER. Will the majority leader send the time agreement to the desk?

Mr. BAKER. Mr. President, I understand the managers on both sides have agreed to this, and I will now state it for the consideration of the Senate.

TIME LIMITATION AGREEMENT, CONFERENCE
REPORT ON H.R. 5930

Mr. President, I ask unanimous consent that when the Senate turns to the consideration of the conference report on H.R. 5930, that there be a time limitation of 1 hour to be equally divided and controlled in the usual form.

The PRESIDING OFFICER. Is there objection?

Mr. DeCONCINI. Mr. President, reserving the right to object, I would like to ask the majority leader if he would consider having the vote on the conference report on tomorrow.

Mr. BAKER. Mr. President, I will be happy to consider that, but I wonder if the Senator from Arizona will consult with the principals, Senator CANNON, Senator PACKWOOD, and Senator KASSEBAUM. If it is agreeable with them, it is fine with me.

Mr. President, I would like to go on with this and if the Senator wishes to object, of course, he may, but a conference report is privileged.

Mr. DeCONCINI. Could I pose that question, if any principal would object?

Mrs. KASSEBAUM. Will the majority leader yield?

Mr. BAKER. I yield.

Mrs. KASSEBAUM. I could not agree to that because I have some who are supporting my position who have stayed tonight purposely and who will be leaving town tomorrow. I feel because they have made such an effort to stay, I am not agreeable to changing the time. I feel we ought to proceed.

The PRESIDING OFFICER. Is there objection?

Mr. DeCONCINI. I withdraw my objection. I find it very difficult to stay late in the evening when we do not have votes, as we did last night. It seems to me if we are going to spend the time away from our families, or whatever we may have planned for the evening time, it ought to be when we have votes and not to sit around here and wait for 2 or 3 hours and then

decide to have a voice vote on the subject matter.

That is why it seemed to me if there was a possibility of having it tomorrow, it would make more sense.

The PRESIDING OFFICER. Is there objection?

Mr. BUMPERS. Mr. President, will the majority leader restate the request?

Mr. BAKER. The request is when the Senate turns to the consideration of the war risks conference report, there be a time limitation of 1 hour equally divided.

Mr. METZENBAUM. Does that include amendments? Is it 1 hour including amendments?

Mr. BAKER. Mr. President, I will amend the request. One hour on the conference report—Mr. President, is there no item in disagreement?

The PRESIDING OFFICER. That is correct.

Mr. BAKER. No amendment would be in order in any event.

The PRESIDING OFFICER. Is there objection to the time limitation request of the majority leader? The Chair hears none, and it is so ordered.

Mr. SARBANES. Mr. President, will the majority leader let us know what the proposed program is for tomorrow?

Mr. BAKER. Yes.

ORDERS FOR FRIDAY

ORDER FOR RECESS UNTIL 9 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that, when the Senate completes its business today, it stand in recess until the hour of 9 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR REDUCTION IN LEADERSHIP TIME

Mr. BAKER. Mr. President, after consulting with the minority leader, I believe this is agreeable. I ask unanimous consent that the time allocated to the two leaders under the standing order for tomorrow only be reduced to 2 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF SENATOR NUNN
ON TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that, after the recognition of the two leaders, the Senator from Georgia (Mr. NUNN) be recognized on a special order for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO RESUME CONSIDERATION OF S. 2222
ON TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that at 9:30 a.m., the Senate resume consideration of S. 2222, the Immigration Reform and Control Act of 1982.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER DESIGNATING PERIOD FOR THE TRANSACTION
OF ROUTINE MORNING BUSINESS ON TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that any time remaining after the execution of the special order be allocated to the transaction of routine morning business, in which Senators may speak for 1 minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, it is not anticipated that the Senate would be asked to remain late tomorrow. I would expect we would be here until the middle of the afternoon, which is the reason for the early convening.

I would hope, Mr. President, that we could reach third reading on the immigration bill tomorrow. It is possible that it would be desired, or may be necessary, to put off a vote on final passage until Monday or Tuesday. But I hope we can complete all amendments to the immigration bill on tomorrow.

AVIATION INSURANCE EXTENSION—CONFERENCE REPORT

Mr. BAKER. Mr. President, I submit a report of the committee of conference on H.R. 5930 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 5930) to extend the aviation insurance program for 5 years, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD August 10, 1982.)

Mr. BAKER. Mr. President, I understand that the managers of the conference report have agreed that the control of the time for proponents will be with the Senator from Oregon and the time in opposition will be with the Senator from Kansas. For my part, Mr. President, I designate the Senator from Oregon to manage and control the time for proponents.

Mr. ROBERT C. BYRD. Mr. President, inasmuch as I have half the time, after conferring with the distinguished Senator from Nevada (Mr. CANNON), I designate control of my half of the time to Senator KASSEBAUM.

Mrs. KASSEBAUM. Mr. President, I am sorry; I was conversing and I did

not hear the Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, as I understand, the Senator is opposed to the conference report?

Mrs. KASSEBAUM. That is correct.

Mr. ROBERT C. BYRD. In order that there might be 30 minutes allotted to the opposition, I said that after conferring with Mr. CANNON, it was agreeable for me to yield the time that is under my control for the opposition to the distinguished Senator from Kansas.

Mrs. KASSEBAUM. I appreciate that very much, Mr. President. I thank the Democratic leader.

(Mr. HAYAKAWA assumed the chair.)

Mr. PACKWOOD. Mr. President, do I understand correctly that the other 30 minutes on behalf of the conference report is designated to me and under my control?

The PRESIDING OFFICER. The Senator is correct.

Mr. PACKWOOD. Mr. President, the matters that we consider here tonight are relatively simple and easy to understand. This is the issue of labor protection: What are you going to do for employees in an industry that was regulated by the Federal Government, although it was private industry, when the Federal Government changes the rules and those employees are left in a lurch and, perhaps, dismissed? It is not a new subject to the Congress; it is not a new subject to this country.

The historic forerunner of labor protection was in the railroads. The Interstate Commerce Commission, before it would ever approve mergers, acquisition, or transfers between railroads, would always impose some kind of labor protection. I want to emphasize that this was on private industry.

The railroads were privately owned in those days when labor protection was started; they were mostly making a profit. But because they were regulated by the Government and because there were certain things they could and could not do and there were certain things the Government, even though this was private enterprise, said "thou shall and thou shall not," when we were going to change the rules, we said, we are going to make sure employees shall not be injured.

We started applying the same concept in the airline industry in 1950, in the United Airlines-Capital Airlines merger, and we called it the United-Capital provisions. We have done that ever since 1950, bearing in mind again these are private industries, but regulated by the Government.

We changed the rule slightly in 1972, in the Allegheny-Mohawk merger and we called them the Allegheny-Mohawk provisions. The Civil Aeronautics Board, in every case of acquisition or a merger, would put them

into effect so the employees would not be injured.

We even more dramatically put them into effect specifically in legislation in 1973 in the Conrail bill, in which we granted the most extraordinary labor protection terms that Congress has ever granted. We said that if you had 5 years or more of service working for Conrail, you could receive your full salary from the time you were terminated until you were 65.

Then came the Airline Deregulation Act of 1978. This is most important. As all of us are aware, much legislation around here is the result of compromise, compromise between the principal parties concerned—I mean directly, immediately, concerned—the airlines and the employees.

In that Airline Deregulation Act, in order to bring the parties together and to get some cooperation for moving us toward deregulation, Congress made a promise. We said if the Airline Deregulation Act were passed, the administration would issue within 6 months regulations guaranteeing higher protection. Unfortunately, the last administration, President's Carter's administration, did not get around to issuing those regulations until the very last hour of the administration, and as soon as this administration came in, they repealed the labor protection orders that the Carter administration had put forth and they have never issued any regulation since.

So the quid pro quo, the promise of this Congress that employees who lost their jobs because we were moving from regulation to deregulation, the promise that we made that they would be protected, has not been fulfilled. Those employees in that industry affected justifiably feel that they perhaps have been betrayed, because it was one of the agreements that brought them along to support the Airline Deregulation Act.

Then we come to 1979, the Milwaukee Railroad bill. In that bill, Congress—again, a private industry but regulated by the Government and we are moving toward deregulation in the railroad industry. In the Milwaukee Railroad bill, we provided that if you had 3 years of service, you were to receive 3 years of retirement at 80 percent of your salary—3 years, you got 3 years' retirement at 80 percent of your salary.

In the present bill that we are considering, if you worked 3 years in the airline industry, you would get a year-and-a-half of benefits at 60 percent of your salary—not nearly as generous as we treated the employees of the Milwaukee Railroad.

Then in 1980, the Rock Island Railroad bill was introduced by my distinguished colleague from Kansas (Mrs. KASSEBAUM) to take care of the Rock Island situation and the employees of the Rock Island Line. That bill, as we

addressed it on the floor of the Senate, had labor protection provisions in it. If I may quote my distinguished colleague from Kansas, as she was talking on the floor about this bill:

Another important aspect of this issue is jobs; 4,000 employees of the Rock Island stand to be dislocated as a result of the Rock Island's demise. The labor protection provisions we adopted in the Milwaukee Railroad Restructuring Act will be applicable to the lines purchased under the provisions of this proposal, to provide them with assistance.

Then, she said:

Regarding the labor protection—this was a difficult issue to deal with—one of the major concerns was about the employees on the lines that would be purchased—that there would be a possibility of wildcat strikes, and that is one of the things we were hoping to deal with in this legislation.

That is perfectly understandable. We supported it, the bulk of Congress did, the Senator from Kansas did. It was a private industry, previously regulated, and we were saying that if, because of any actions we take, the employees are going to be jeopardized we were going to help them tide over.

We come to the A.T. & T. breakup, the bill that passed the Senate not long ago, S. 898. In that bill, Congress provided—and it passed the Senate overwhelmingly, only four or five votes in opposition—that because, as we moved from a regulated to a deregulated climate in the communications industry, employees were adversely affected, if you had worked for A.T. & T. for what was called the probationary period—6 to 12 months depending upon your occupation—and you lost your job because we were moving toward deregulation you got 7 years full salary. We voted for that. The Senator from Kansas voted for it.

Now, we come to the present war risk bill in which we have agreed to try to give labor protection to those employees who will lose their jobs because of mergers or acquisitions or route changes, and I might say give them protections not nearly as great as we have given to employees of other regulated industries and giving it to them because we promised it in 1978 when we deregulated the airlines, or started toward the gradual deregulation, and we have not performed.

Now, the Senator from Kansas will raise one point that is not on the substance of these provisions but is on the procedure. She will say that we went beyond the bounds of the conference. The bill as it passed the House, the war risk bill, had no labor provisions in it. As it passed the Senate, it was discretionary. It said we will leave it up to the Civil Aeronautics Board until 1985 and then the discretionary authority to impose labor protection provisions will terminate. We went to

conference and we put in some mandatory provisions.

Now, interestingly, I think the Senator from Kansas will argue that the mandatory provisions are beyond the scope of the conference because there was nothing in the House bill and only discretionary provisions for the CAB in the Senate bill.

But the Senator from Kansas herself in very able efforts at negotiating this attempted prior to the meeting of the conference to bring the parties together and to get them to agree. She offered some labor protection provisions which were mandatory for 5 years as far as acquisitions and mergers were concerned—mandatory. But they were not acceptable to the conferees and instead we put in other provisions.

I raise that point only to say that if the Senator from Kansas raises the arguments that these mandatory provisions are beyond the scope of the conference, indeed, she was prepared and did offer mandatory provisions—5 years, the same length that ours are. I hope, therefore, she would not raise the argument. But if she does I want it to be fairly understood that she, too, was willing to go beyond the discretionary provisions in the Senate bill had her proposed compromise been accepted.

Mr. CANNON. Mr. President, will the Senator yield me some time?

Mr. PACKWOOD. I would be happy to yield as much time as the Senator from Nevada needs.

Mr. CANNON. Mr. President, I do not think I have ever seen an issue where the prospective results of a legislative provision were blown further out of proportion. We are not talking about something new or untried here; we are talking about the codification of protections which have been part of every airline merger or acquisition in recent history. The opposition can talk about how this authority has been permissive all they want, but the fact is these provisions have been included in every single case where a merger or acquisition has been finalized by the CAB. And to further demonstrate how preposterous some of the charges in the press have been recently, in the last 4 years of mergers or acquisitions handled by the Board, the airlines involved requested that these provisions be imposed. How can these provisions be so monstrous and debilitating to an airline when for the last 4 years under deregulation, every airline to come before the Board for a merger or acquisition has asked the Board to make these LPP's a condition of their combination?

I ask my colleagues not to be swayed by misrepresentations in the press. The key issue here is the fact that we are putting the unions on notice. The benefits section of this amendment is only effective for the next 5 years, so

if labor wants to retain these benefits in the future they will have to negotiate in the collective bargaining process to keep them beyond 5 years. But it is only fair to give employees that transition time before taking away something they have always had in the past, just as we gave the airlines time to transition to deregulation.

Finally, I want to note that this provision does not remove the collective bargaining process from 408 type cases even for the next 5 years. A key clause in this amendment says that any negotiated settlement for LPP's different from those imposed by statute shall take precedence and be controlling. So if a failing carrier can only be acquired if the employees will agree to give up all or part of these benefits, that can and probably will occur as part of the bargaining process.

This amendment is fair to employees and imposes nothing new on management. I urge my colleagues to support the conference report.

Mrs. KASSEBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mrs. KASSEBAUM. Mr. President, at the close of debate I intend to raise a point of order against consideration of this conference report, 97-722. I will rely upon rule XXVIII of the Standing Rules of the Senate.

I would like to respond to my distinguished chairman, the Senator from Oregon, and say that this is not just a question of labor protection. I am glad he raised the Rock Island case because it shows indeed that in principle I am supportive of labor protective provisions, but we had lengthy and extensive hearings on the Rock Island case and it was debated on the floor of the Senate. It was also dealing with a railroad that had gone bankrupt and was being dismembered. It was a question of how best to provide protection for the employees.

Mr. President, as chairman of the Aviation Subcommittee, I cannot agree with my fellow conferees in their decision to include the extensive new substantive law governing labor-management relations in the airline industry. The amendment is beyond the scope of the conference. True, I did try and arrive at some compromise before we reached this particular situation that would be agreeable to both ALPA and the airlines. This was unsuccessful. But the scope of the conference report goes beyond even the suggestions that were made for compromise.

No one has indicated why the amendment is so important that the normal legislative route, based upon reasoned review by the subcommittee, must be totally abandoned and open debate of the issue avoided.

At the most fundamental level this amendment is a major step backward

in the deregulation process. While the industry which lived for 40 years in the hothouse of public utility regulation is now being thrust into a highly competitive environment, the committee is seeking to mandate a rigid form of labor protection provisions that were discretionary under regulation.

No other unregulated industry has ever been subject by legislative fiat to labor provisions of this magnitude. The provisions could subject virtually any transaction between two airlines to labor protection provisions. At a minimum every intercarrier transaction even indirectly affecting an airline route will require the airline to argue the labor issue at the Department of Transportation. Beyond this fundamental policy issue most of the provisions go well beyond prior precedent.

For example, LPP's will be imposed automatically on any transaction involving 20 percent of the aircraft or other property owned by the seller or lessor. This automatic trigger fails to take into account the scale of the transferor carrier's operations. A small carrier could be subject to the provisions if it sells one aircraft.

Section 408(b)(2)(C) governing the application of these provisions to any transaction that directly or indirectly affects a route is so broad that it could be applied to any transaction. The standard for the CAB to apply in imposing the LPP's in these cases is to prevent labor unrest which could "impair the continued stability and efficiency of the carriers involved." The CAB has stated that this is a new and much broader test than used in the past and was taken out of context from a single Board decision. In addition, the Government has no business deciding when to protect deregulated industries from their own decisions. They should know what is in their own best interest and can settle any labor dispute arising from the transaction.

The only argument my fellow Conferees could offer for this dramatic expansion of the role of the Federal Government into the affairs of the private sector is that they seek only to assure that what the CAB did as a matter of discretion to help employees of a regulated industry in some intercarrier transactions should be required as a matter of right to virtually all such transactions in an unregulated industry. I simply fail to see the logic or merit to this approach when it has not been thoroughly explored and debated in hearings.

Indeed the provisions go well beyond prior Board practice. Under the amendment, anytime there is a route transfer which DOT finds should be subject to LPP's, the full Allegheny-Mohawk provisions including seniority integration provisions must apply.

Although the CAB has applied LPP's to some route transactions, it has never applied the seniority integration provisions to those transactions. Under the proposed amendment, even if there is no transfer of equipment, pilots and flight crews will be forced to transfer. This is not only a potential problem for the airlines but can have serious negative effects on the work force of the acquiring carrier. For example, if this provision had been in effect when Braniff leased its South American route to Eastern the crew integration process would have resulted in substantial bumping and furloughs of Eastern crews. It was for this reason that Eastern's employees—including pilots—objected to the application of the LPP's.

Concerns have been raised that labor needs, and is entitled to, a transition since LPP's were imposed in the past. I am sympathetic to this concern. And the original Senate amendment—which passed by unanimous consent only 6 weeks ago—did just that by preserving the status quo for up to 2 more years while the Aviation Subcommittee held hearings to determine what additional protections might be necessary. I might add that the question of a transaction is not a new issue. Specifically, 3 years ago in the Pan American National Merger Case 79-12-163, the CAB stated clearly and succinctly that the historic rationale for applying LPP's was inconsistent with deregulation. The Board stated then that it would not impose LPP's routinely and that labor and management should rely on the collective bargaining process to take care of these situations. This provision may only delay the inclusion of the issue in the collective bargaining process.

Let us look at some of the other serious problems raised by this hastily drafted and unreviewed legislation. Section (b)(1)(2) would impose LPP's, to take effect in the future, if a large aircraft operator enters into a transaction with a commuter and the latter subsequently purchases an aircraft over 60 seats. The LPP's would take effect even if the commuter operated the large aircraft on a route that was not even linked to the qualifying carriers route system.

We already are seeing that many trunk carriers are entering into various arrangements with commuters. U.S. Air, Delta, Eastern, Pan Am, and United all have various joint ventures with commuters which involve or may involve exercise of control. The LPP trigger could deter these commuter carriers from purchasing large aircraft unless they were willing to jeopardize their relationship with the qualifying air carrier. This provision has serious anticompetitive implications that have not even been addressed in any hearing.

Under this bill, jurisdiction to impose LPP's is transferred to the Department of Transportation on January 1, 1983. Agency review of antitrust issues related to mergers and acquisitions is abolished but the CAB retains jurisdiction over the public convenience and necessity determinations of the certificate transfer under section 401 of the act and over approval of the underlying intercarrier agreements to which this section applies under section 412 of the act. So as of the first of next year virtually every single intercarrier transaction will be reviewed by three separate Federal agencies—looking at the same facts. The CAB will decide if the transaction is within the public interest under section 401, and not anticompetitive under section 412; the Justice Department will decide whether to seek to enjoin the transaction for antitrust reasons; and the Department of Transportation—for the first time in its history—will be holding evidentiary hearings to decide whether LPP's should be imposed. The bill totally emasculates the legislative scheme as set forth in the Federal Aviation Act without any review or direction from the congressional committees with aviation jurisdiction. Moreover, the total multiagency process could take months and cost parties a fortune in legal fees. How such a three-ring circus can benefit anyone is a question that, under the course of action chosen by the conference, will remain unanswered.

Section (d) of the amendment creates a new basis for Federal questions of jurisdiction over airline labor protective provisions in U.S. district courts without regard to the amount in controversy. A large transaction could result in hundreds of actions being filed all over the country adding new burdens for the district courts. In addition, because jurisdiction for review of the substance of these transactions will be in the Court of Appeals the judicial process will become completely fragmented. As far as I am aware, this provision has not been reviewed by the judiciary committees of either House.

Full application of the Allegheny Mohawk labor provisions can be very costly to the airlines. The provisions are actually derived from LPP's created for railroad mergers in the 1930's and 1940's. The provisions were applied to the airlines in 1950 and have remained virtually unchanged since 1960. These provisions provide, among other things, that:

Workers reassigned to lower paying jobs will receive up to 100 percent of their previous salary for up to 4 years.

Workers who lose their jobs are eligible for a lump sum payment of 1 year's salary if they have worked for the airlines for 5 years or they may elect 60 percent of their average monthly compensation for up to 5

years for a worker with 15 years seniority. Based on the average salary scale in the industry, a pilot with 12 years seniority could receive over \$185,000 in payment under the LPP's. A senior pilot might receive as much as \$450,000 over 5 years.

Prior to deregulation these costs were passed on to consumers. It was a price that we the travelling public paid to preserve the public utility character of the industry. Today, we are being asked to impose these public utility costs on a highly competitive industry without any serious public review of the possible benefit or detriment of the policy.

It was because of the obvious complexity of these issues that I initially proposed the amendment that was contained in the Senate bill which merely retained jurisdiction over domestic mergers at the CAB until 1985. I stated that the subcommittee intended to hold hearings on these issues this year.

Mr. President, I do intend to hold hearings if, indeed, my point of order is upheld by the Chair. I understand that in that event the matter would be recommitted to conference, and I hope at that point there would be consideration of the original Senate-passed request.

I hate to see this become a pro or con labor issue. It is not that. But I think we should be seriously concerned about a conference report that comes back to us, that has not been debated or passed on the floor of either body.

If the point of order is upheld, I do intend to go forward with hearings.

The conference committee has voted to proceed with a nongermane amendment. The conferees have no idea what the impact of the bill will be on the industry, why it is needed, and, most significantly, why it must be approved with such urgency that the normal legislative process should be completely ignored. Because there are no satisfactory answers to any of these questions, I cannot support the conference report. Mr. President, I raise a point of order under rule 28 that the conferees have exceeded their authority by including new matter not committed to them by either House.

I yield 5 minutes to the Senator from Arkansas.

Mr. BOSCHWITZ. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER. The time has not expired on the conference report. A point of order is not in order.

Mr. BOSCHWITZ. Mr. President, I should like to ask a question of the Senator from Oregon with respect to Braniff Airlines, which had a large base in our State and has gone bankrupt.

How does that apply to Braniff? Do its employees of any type receive moneys from Braniff or somebody else?

Mr. PACKWOOD. It does not apply to bankruptcies. If Braniff were not in bankruptcy and transferred some of its lines to other carriers, it would apply; but it does not apply to a pure and simple bankruptcy.

Mr. BOSCHWITZ. Would not this provision prevent somebody from buying up Braniff? Suppose somebody decides to look at some of the Braniff routes and decides to create a new carrier?

Mr. PACKWOOD. Will the Senator repeat the question?

Mr. BOSCHWITZ. Suppose somebody saw some Braniff route they liked and decided to hire some Braniff employees for a new airline. Would there be any way for it to apply to Braniff employees?

Mr. PACKWOOD. Yes, it could apply to Braniff employees, if we are talking about mergers, acquisitions, and route transfers. But if Braniff goes belly-up, out of business, gone, there is no protection.

Mr. GLENN. Mr. President, will the Senator yield for a question along that line?

Mr. PACKWOOD. Whose time are we on?

Mrs. KASSEBAUM. I should like it to be on the time of the Senator from Oregon.

Mr. GLENN. If someone wanted to buy 20 percent of Braniff rolling stock or flying equipment—

The PRESIDING OFFICER. The Chair states to the Senator from Ohio—

Mr. PACKWOOD. Mr. President, I yield to the Senator for a question.

Mr. GLENN. If someone comes along and wants to buy over 20 percent of Braniff's airplanes, would they not also have to assume the liability for all these wages for the next 5 years, potentially up to 5 years, for the Braniff employees? Would this not tend to prevent someone from even purchasing any Braniff equipment?

Mr. PACKWOOD. This provides that the labor protection provisions would be superseded by any collective bargaining agreement that is agreed to.

If I were a Braniff employee and a company wanted to buy over 20 percent of the defunct Braniff, or if I were the unions representing those employees, I would quickly negotiate an agreement that might abrogate my labor protection rights or limit them, or do anything to get me back in the sky, rather than be in a situation where I am bankrupt and dependent solely on unemployment compensation. There is no guarantee that a union would do that.

The Senator's point is well taken, that these provisions could be im-

posed; and if that would deter anybody from buying a piece of Braniff, it would not be to the benefit of the employees.

Mr. GLENN. If I were considering buying something like that, why would I not go abroad and buy airplanes, rather than buying Braniff stock?

Mr. PACKWOOD. I am not quite sure I follow the Senator. You go abroad and bring here airplanes that you are going to hire people to fly?

Mr. GLENN. Yes. I would not buy Braniff, because I would have to take on a lot of unnecessary baggage, which I would not have to do if I went to Great Britain, for example, and bought planes.

Mr. PACKWOOD. What we are doing in these provisions, although they are less than we have imposed on other industries, is simply applying by statute roughly the same thing that the Civil Aeronautics Board has been applying since it started its Allegheny-Mohawk provisions in 1982.

The reason we are putting it in statute is that I feel the employees were betrayed when we did not follow up on the 1978 Airline Deregulation Act and issued regulations that would have guaranteed employee protection. Had we done that, we would not be in this situation today. Had the unions known we were not going to do it, I do not think we would have had any airline deregulation at all. So I can understand why they are now hesitant to trust to the good faith and discretion of the Government, if we adopt the position of the Senator from Kansas, that the Civil Aeronautics Board will voluntarily, and in its wisdom, apply the same standards that they have applied in the past.

Mr. GLENN. I thank the Senator. The PRESIDING OFFICER. Who yields time?

Mrs. KASSEBAUM. Mr. President, I yield 5 minutes to the Senator from Arkansas.

Mr. BUMPERS. I thank the Senator from Kansas.

Mr. President, I want to discuss two elements of this.

First, when I came to the Senate just 7½ years ago it occurs to me that the Senate was much more inclined to live with the rules of the Senate in a rather strict way than they are now, but I have seen in 7½ years not just a denigration but an absolute ignoring of some of the basic rules of the Senate.

It has gotten to where it is common for us to appeal the ruling of the Chair and vote against the Chair. When the Chair rules that an amendment is nongermane, we all know it is nongermane, but we vote on the substance of it rather than the procedure. We routinely—maybe this has always been done, but it has gotten to where it is just routine to legislate on appro-

priations and if someone challenges we appeal the ruling and we vote according to the substance of the legislation, not the fact that we know it is legislation on appropriations. And just 2 days ago we had a brouhaha on this floor about an appropriation with no authorization and it prevailed and it seems to me that this is just going on apace.

The Senator from Kansas has raised a very valid point. We are debating a provision that may have merit. I do not think it has merit, but I do not know. But there is one thing for sure: It was never debated in this body. It was never debated in the House of Representatives. It was not in the Senate bill. It was not in the House bill. And when the two committees went to conference it was just put in right out of the sky.

It is not that the Allegheny-Mohawk regulations have not been there before. They were, but to just say we are going to incorporate that into this bill and take it back into the conference report is dead wrong. It is a gross violation of the rules of this body, and the Senator from Kansas has correctly raised a point.

So far as the merits are concerned, I voted for airline deregulation. I said turn them loose, let them compete. I voted for trucking deregulation. And it has been tough on the airlines. It is tough to go in and buy a ticket anymore without being accosted about my vote on that.

Braniff is gone. Five more airlines are on the endangered species list.

Can we in good conscience, on the one hand, deregulate the airlines and on the other come back and say a matter which should always be left to collective bargaining is now in the hands of the Senate or Congress? We are going to tell the airlines that in the future if they merge they must pay these pilots or these machinists or whatever, 60 percent of their salary for 5 years.

The point has been made by the distinguished ranking minority member on that committee, "We are serving notice on labor that this only applies for 5 years and you have to get your own thing going by collective bargaining, then, if you want to keep these benefits."

What is sacred about 5 years? Why not 1? Why not 3? Why 5?

This is a fit subject for collective bargaining. We cannot in good conscience have it both ways.

Talk about Conrail and Rock Island. Every one of those have very serious distinctions. How about Tyco and Morton Norwich? They merged last week. What are we doing for them?

How about all the other mergers that are taking place in this country every day? What are we doing for them? Why the airlines?

It compounds the felony because we just deregulated the airlines and then come back and tell them how to run their business.

Mr. President, yesterday afternoon I was driving down Constitution Avenue. I saw on the Justice Building—I had never seen it before. On the Justice Building it says "A free nation can survive only by the supremacy of law."

And as a lawyer, one supremely dedicated to the Constitution as well as the laws of the country, I thought, what a magnificent statement that is. But I got to thinking: There is something that is inherent in that and it is supremacy of good laws. We have to make sure that we pass good laws. No one wants bad laws to be the supreme law of the land. This is bad law and it is bad precedent.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. BUMPERS. If the Senator will yield me 30 additional seconds, I want to say it is bad precedent, one that will come home to haunt us. We should be willing at some point, as every legislative body must if it is going to be viable and effective, live by our own rules, and I hope Senators will vote to sustain the point of order of the Senator from Kansas.

Mrs. KASSEBAUM. I thank the Senator from Arkansas, and I yield 5 minutes to the Senator from New Hampshire.

Mr. RUDMAN. I thank the Senator from Kansas.

Mr. President, I always enjoy listening to the chairman of the Commerce Committee who is one of the more artful debaters on this floor. Tonight the distinguished chairman has attempted, I think, to make a silk purse out of a sow's ear, but I do not think he has quite succeeded.

I think this is an outrage that we are asked to vote on this issue here tonight. I do not know what the implications of this issue are. I do not know what the economic impact is.

The Senator from Nevada wants to tell us that we are following a precedent for 20 years. I submit to this Senate that that is why we have elections every 2 years because some of us wish to change the precedents. I agree with very little that has happened around here for the last 20 years including whatever precedent is being cited.

There are only three issues involved here tonight.

The first issue is most of us do not know what we are voting on. Normally, we do this at 4 o'clock in the morning. We are about 6 hours early or 7 hours early tonight.

Second, I believe that before we give special treatment in the statutory form to the employees of the airline industry we should rather carefully look at a lot of other industries, for ex-

ample, the defense industries. Maybe we will cut the defense budget \$40 billion in 1986. Then I expect that that is Government action and we should do something about their executives and their employees.

And I submit to you, Mr. President, that if this goes through and the major American airlines find themselves in difficulty financially, they will come back to us to help them with a subsidy to pay the amount of money that will be accrued under this obligation.

Finally, let us just make something very clear here. The airlines will not pay this. The American people will pay it. They will pay it on their airline tickets. They will pay it through taxes. They will pay it.

The Senator from Ohio stated it exactly correctly. Under the Braniff transaction if Braniff should move under the bankruptcy laws under a chapter 11 reorganization this will apply and add that cost.

We have a lot of airline pilots living in New Hampshire and I have heard from many of them. The fact of the matter is we should give it a full hearing, exhaust it before the committee, have a report here and vote on something we know about instead of voting in the dark with the lights on.

I thank the Chair.

Mrs. KASSEBAUM. I thank the Senator from New Hampshire.

I yield 5 minutes to the Senator from Oklahoma.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. NICKLES. Mr. president, I thank the Senator from Kansas, and I compliment her for bringing this to the attention of the Senate.

I certainly concur with her, that this is certainly outside the legislative realm that should be considered, and I think her point of order is well taken and should be well taken.

I hope that we as Senators will support her for that reason if none other, but we also could support her and should support her on the substance of the issue.

I think of special interest legislation, this is certainly it. Talk about interfering with collective-bargaining process, talk about believing in free enterprise. What this is saying is let the Federal Government mandate collective bargaining. Let the Federal Government give the labor protections.

That is ridiculous.

Let us not mandate. This is an interference in the collective-bargaining process.

If the airline companies want to negotiate this with the airline unions, that is fine. Let them negotiate. Let us not mandate that they have to provide this.

When Senators look at this special interest legislation, I hope they will look at what some of these labor provi-

sions are that are in this. They are unbelievable.

Do Senators realize that if a person works more than 1 year or less than 2 he gets 6 months of payments at 60 percent of his salary, and I hope most Senators are aware of some of the provisions.

They say, yes, that the commercial airlines will pay compensation for furloughing employees up to 60 percent of their salary anywhere from 6 months up to 5 years, reparation of wages loss if an employee is transferred to a lower paying job. They have moving allowances. They merge seniority lists and they also provide for binding arbitration.

Some of the provisions in here are unbelievable.

I start looking at the provisions that say, yes, if a person works 3 years and less than 5, it provides for 18 months of compensation at 60 percent of pay or if they had 15 years they would receive 60 months or 5 years of compensation at 60 percent.

Mr. President, we are not talking about necessarily low-paid individuals. Looking at some of the averages, the average for the Airline Pilots Association pilots, the 21 top companies, the average compensation is \$96,000. So their 60 percent is equal to \$57,000 that they would receive for 5 years, if they had 15 years of service, \$57,000. Unbelievable.

That breaks down to \$1,100 a week, and the unemployment compensation in my State for an unemployed worker is \$129 a week. These people would be receiving \$1,100 a week.

Unemployment compensation nationally, unemployment compensation, is \$115 a week. Do you know what the pilots, the top paid pilots, of a 747 receive? One hundred and sixty thousand dollars a year, and we have some that make that much, and they would receive \$96,000 for 5 years. Unbelievable. Special interest legislation? I should guess so.

And to address Senator GLENN's statement about Braniff, I talked to the Braniff people today, and I will read a short part of the letter, Mr. President. I ask unanimous consent that this letter be printed in the RECORD. This is from Mr. Putnam, who is chairman, president, and chief executive officer of Braniff International.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

BRANIFF INTERNATIONAL,
Dallas-Fort Worth Regional Airport, Tex.

This is in response to the amendment to H.R. 5930 being proposed as labor protective provisions for the airline industry. The well publicized financial problems of the airline industry have been underscored by our own filing under Chapter 11 of the Federal Bankruptcy Statutes in May 1982. The proposed legislation, if enacted, would raise serious and perhaps insurmountable obstacles

in our path and make it far far more difficult for us ever to recognize and emerge from Chapter 11. If the issues dealt with under the proposed legislation are valid at all, they should properly be dealt with as part of the collective bargaining process and not as a special bill to serve special interests. The larger concern is that this legislation transcends Braniff and its current problems and has a quite serious implication for capital investment and traditional capital sources for the airline industry. Lenders to the industry normally look to the value of the underlying assets to reduce their risk to acceptable levels. This legislation, however, would significantly undermine the value of those assets by placing artificial constraints on an airline's ability to dispose of aircraft or to restructure its operation. We believe the public interest would be ill served by further hindering the restructuring efforts of a seriously troubled industry.

HOWARD D. PUTNAM,

Chairman, President and Chief Executive Officer.

Mr. NICKLES. Senator Glenn, Mr. Putnam's letter states:

The proposed legislation—

He is talking about this particular provision—

if enacted, would raise serious and perhaps insurmountable obstacles in our path and make it far more difficult for us to reorganize and emerge from chapter 11. If the issues dealt with under the proposed legislation are valid at all, they should properly be dealt with as part of the collective bargaining process and not as a special bill to serve special interests.

This legislation, however, would significantly undermine the value of those assets by placing artificial constraints on an airline's ability to dispose of aircraft or to restructure its operation. We believe the public interest would be ill-served by further hindering the restructuring efforts of a seriously troubled industry.

I might add, as to a conversation I had today with Mr. Sam Coats, vice president of Braniff, he said if this legislation was passed, "We would probably have to forget about Braniff being able to restructure, being able to sell parts of its rolling stock", and there really would not be protection of their employees but a hindrance of their employees getting back into the marketplace. These pilots would not be able to jump back into those planes and go up in the skies because nobody would be able to buy those planes.

Mr. President, in a very short time, this body will be asked to approve the work of a Senate-House conference committee on H.R. 5930, the war risk insurance extension bill. Unfortunately, the conference committee adopted an amendment to this bill which not only violates the norms of proper legislative procedure but which also set an extremely dangerous precedent for the future. If the Senate chooses to approve the work of the conference committee in this particular instance, I very strongly believe that we will be making a serious error.

The amendment that is in question here would codify and make mandatory certain "labor protective provi-

sions," known as the Allegheny-Mohawk protective provisions, for the commercial airline industry. These provisions had been discretionary and were sometimes used in mergers and acquisitions in the regulated airlines industry by the Civil Aeronautics Board between 1972 and the adoption of airline deregulation legislation in 1979.

The conference committee amendment would require commercial airlines to pay compensation for furloughed employees at up to 60 percent of salary for 6 months to 5 years; repatriation of wage loss if an employee is transferred to a lower paying job; moving allowances; merged seniority lists; and binding arbitration.

This amendment would require huge payments by commercial airlines to employees who are furloughed as a result of a merger, acquisition or even the sale of assets such as excess planes in their fleet. The Office of Management and Budget recently assessed the impact of these provisions as follows:

These provisions are expensive. In severance payments alone, assuming average airline salaries, they could provide \$190,000 to pilots, \$75,000 to maintenance personnel, \$63,000 to ticket takers, and \$57,000 to cabin attendants, over a period of 5 years. Similar provisions in effect for the Pan Am/Trans World route swap of 1975, cost Pan Am approximately \$4.5 million because 130 employees were severed. These are direct costs, excluding litigation, arbitration, and administration.

In addition, the proposed amendment is so broad that it may apply to transactions as minor as sale of aircraft. If so, the cost of severed employees alone, for 747 aircraft, could exceed \$6 million over a 5-year period.

The airlines are currently in poor financial shape—industry losses for 1981 were \$400 million. Braniff has gone bankrupt and several other large airlines are in serious financial difficulty. Federal imposition of labor protection payments at this time, particularly payments tied to mergers and acquisitions, could prevent airlines from taking sensible steps to restructure themselves in order to compete better in today's market. In short, the Federal Government would be limiting the ability of airlines to compete successfully.

Mr. President, I fully agree with these comments which were made by the Director of the Office of Management and Budget in a July 13 letter to Senator Packwood.

As Mr. Stockman noted, Braniff has gone bankrupt. The Braniff bankruptcy is of special interest to me because Braniff was a major air carrier in my State of Oklahoma. Mr. Howard D. Putnam, CEO of Braniff, has expressed strong concerns with the labor protective provisions. His statement is already in the record.

In addition, the adoption of this amendment would set a very dangerous precedent in the field of labor-management relations. The issues involved here should be considered not by the Congress but by labor and management in contract negotiations. For

us here to intervene at this particular time is both premature and unnecessary. If labor protection provisions are mandated by Congress for airline employees, we will be opening a Pandora's box in which employees in other fields—the automobile industry, the oil industry, steel, railroads, electric utilities, the merchant marine—will also be justified in seeking relief from the Congress and not through the negotiating process with management. Such a precedent not only undermines the collective bargaining process but it also grievously threatens the very heart of America's free enterprise system.

Finally, Mr. President, this amendment adopted by the conference committee makes a mockery of the legislative process. The backers of this amendment have chosen to avoid public discussion and debate on this issue by seeking to adopt a rider in conference that has not been considered by the appropriate legislative committees. In the Senate, no hearings have been held on this very far-reaching amendment. The Aviation Subcommittee heard only five paragraphs of testimony on this issue a year ago. There have been no other hearings held in either Chamber. To adopt a nongermane amendment, as the conference committee would have this body do, is the very height of foolishness. This amendment should be referred to the appropriate legislative committees so that the necessary groundwork that needs to be done by way of hearings and serious reflection can be accomplished before the entire Senate votes on this issue.

Mr. President, what we have here is at its core the mischief of factions. James Madison discussed this entire question in *Federalist No. 10*. Madison warned that democratic government is seriously threatened and undermined when a minority seeks to obtain and protect its interests at the expense of the national interest. In the amendment we are considering today, a small minority of 33,000 airline pilots are seeking to obtain legislation that will benefit them greatly. I myself very strongly believe that the national interest will be adversely affected if this amendment is approved. Mr. President, I urge the Members of this body to reject this amendment and to stand up and be counted as defenders of the national interest. The time has come for the Members of this body to demonstrate to the Nation that the Senate is a body where the interests of the country as a whole and not the interests of a narrow special interest group are the interests that shape and affect and determine the decisions we make and the votes we cast.

Mr. THURMOND. Mr. President, I rise today in opposition to the labor protection provisions contained in the

conference report to H.R. 5930, the war risk insurance bill.

Under these provisions, airlines engaging in a merger, acquisition or sale of as little as 20 percent of their assets would be required to pay demoted employees the difference in their salaries for up to 4 years, and furloughed employees up to 60 percent of their salaries for 5 years. Moreover, these provisions would virtually require the appropriate regulatory agency to impose equivalent sanctions in the event of a mere transfer of routes.

Mr. President, these provisions appear to me to be special interest legislation at its very worst. While I would oppose mandating such labor protection provisions in almost any industry, I believe they are particularly inappropriate for the airline industry.

Airline employees are among the most highly paid workers in our Nation. In 1981, the average annual compensation for pilots approached \$100,000. The average annual compensation industrywide exceeded \$35,000. Yet these are the workers who will be accorded protections virtually unknown in any other industry, if we enact these provisions.

To make matters worse, these provisions were adopted by the conferees on this bill without hearings in either House of Congress as to their necessity or probable impact on the industry. The airline industry is already reeling from ever-increasing fuel costs, decreased ridership, and flight cutbacks in profitable routes resulting from the illegal PATCO strike. Merger or acquisition may in many cases prove to be the only salvation from bankruptcy. These provisions, however, could very well have the effect of extinguishing this last ray of hope, leaving employees in even worse shape than they would have been without them.

Another matter that concerns me greatly as chairman of the Judiciary Committee is that the conference amendment provides Federal question jurisdiction over any controversy arising out of the application of these ill-conceived provisions. Federal courts are now straining under unbearable caseloads attributable in large measure to the expansive grants of Federal jurisdiction Congress has made over the past decade. This amendment can do nothing else but increase this caseload, and without any inquiry even as to the propriety of Federal jurisdiction in these matters, much less as to its necessity.

Mr. President, the labor protection provisions included in this bill are matters at which we should look long and hard—not adopt without any inquiry or inspection. I call on my colleagues to sustain the ruling of the Chair.

LABOR PROTECTION AND COLLECTIVE BARGAINING

Mr. HATCH. Mr. President, in this country's long history of collective

bargaining between labor and management, the legitimate areas and subject matters for such bargaining have been well defined. Understandably, parties on both sides of the table in industrial relations seek to avoid Government intrusion into areas better left to contract negotiators.

Airline employees are among the world's most highly compensated. In 1981, the average compensation for employees was \$36,900—66 percent higher than the U.S. industry average. This is the result of collective bargaining and labor contracts in which the unions have negotiated higher wages. Congress should not intercede into the collective bargaining process and impose—by Federal law—labor protective provisions.

This sound policy of keeping the Government on the sidelines in labor-management negotiations was ignored when so-called labor protection provisions were attached to an otherwise noncontroversial bill extending airline war risk insurance. The provisions would apply in the case of airline mergers, acquisitions, and in the sale of as little as one-fifth of an airline's planes or other assets.

The provisions include compensation for furloughed employees of up to 60 percent of salary for a period ranging from 6 months to 5 years. They also include reparation of wage loss if an employee is transferred to a lower paying job, moving allowances, merged seniority lists, and binding arbitration.

These are matters that go to the very core of collective bargaining. They are not matters that should be settled by Congress. Certainly, these are not matters that should be decided without congressional hearings.

These are costly provisions, particularly for an airline industry that suffered a record operating loss of \$420 million last year, and where losses continue in 1982 at an unprecedented level.

The Director of the Office of Management and Budget, David A. Stockman, has stated that "the administration is strongly opposed" to the provisions. Such opposition should be examined. Mr. Stockman and others should be heard. Here, we have another reason why the provisions should not have been slipped through in conference without a hearing.

We must prevent a reckless and costly action. We have the opportunity to see to it that this important subject is aired at an appropriate hearing or, better still, settled at the collective bargaining table where it belongs. Congress should stand clear of the negotiating table.

Mr. TOWER. Mr. President, I wish to include at the appropriate place in the RECORD a copy of Mr. Howard D. Putnam's statement made in regard to H.R. 5930, the war risk insurance conference report. In his position as presi-

dent and chief executive officer of Braniff International, Mr. Putnam strongly opposes inclusion of the labor protective provision (LPP) in H.R. 5930.

As you know, Braniff Airlines has sought protection under chapter 11 of the bankruptcy laws. Braniff is currently trying to reorganize so that they may resume service, even if on an extremely limited basis. Mr. Putnam points out that enactment of the labor protective provision included in H.R. 5930 would be severely detrimental to Braniff's attempts at reorganization. I concur with Mr. Putnam's assessment of the LPP. Not only will the LPP further cloud the hopes of the 9,000-plus unemployed Braniff workers, the LPP raises many unanswered questions with far-reaching implications the Congress must fully understand before enacting into law.

Enactment of H.R. 5930 with the LPP amendment would inadvertently prevent Braniff Airlines from regrouping and putting together a new organization which would bring many of the Braniff unemployed back into the work force. A vote in favor of H.R. 5930, as it is now written, is a vote against Braniff. The effect of passage would effectively close Braniff's doors interminably. I urge my colleagues to oppose this provision in consideration of the conference report.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

BRANIFF INTERNATIONAL,
DALLAS-FORT WORTH
REGIONAL AIRPORT,
August 10, 1982.

This is in response to the amendment to H.R. 5930 being proposed as labor protective provisions for the airline industry. The well publicized financial problems of the airline industry have been underscored by our own filing under Chapter 11 of the Federal Bankruptcy Statutes in May 1982. The proposed legislation, if enacted, would raise serious and perhaps insurmountable obstacles in our path and make it far more difficult for us ever to reorganize and emerge from Chapter 11.

If the issues dealt with under the proposed legislation are valid at all, they should properly be dealt with as part of the collective bargaining process and not as a special bill to serve special interests. The larger concern is that this legislation transcends Braniff and its current problems and has a quite serious implication for capital investment and traditional capital sources for the airline industry. Lenders to the industry normally look to the value of the underlying assets to reduce their risk to acceptable levels.

This legislation, however, would significantly undermine the value of those assets by placing artificial constraints on an airline's ability to dispose of aircraft or to restructure its operation. We believe the public interest would be ill served by fur-

ther hindering the restructuring efforts of a seriously troubled industry.

HOWARD D. PUTNAM,
Chairman, President and Chief
Executive Officer.

Mrs. KASSEBAUM. I yield 1 minute to the Senator from Florida.

Mrs. HAWKINS. Mr. President, I rise in opposition to the report of the conference committee as being a clearly nongermane amendment to the War Risk Insurance Act.

As I listened to the arguments—and there are many—I am sure we are just reaching the tip of the iceberg. I am convinced that there are many more arguments that could be made on many sides of this controversy, but I am mostly convinced that the proper place for these arguments is in committee not in conference and not on the Senate floor tonight.

We all have the right to know and to share in the knowledge that will be gained from those hearings, and we need to know these things.

The possible effects of this legislation on the airline industry are so far-reaching that it is hard to describe the impact it would have on the rest of the deregulation of this industry.

You need a thorough understanding, and I think one of the things we learned tonight is that really airlines are not deregulated; they have just been meddled with. I am asking my colleagues to support Senator KASSEBAUM's point of order.

The PRESIDING OFFICER. Who yields time?

Mr. PACKWOOD. How much time is left, Mr. President.

The PRESIDING OFFICER. The Senator from Oregon has 14 minutes and 38 seconds. The Senator from Kansas has 3 minutes and 56 seconds.

Mr. PACKWOOD. Mr. President, let me put some things in perspective, if I might. First, the arguments of the 747 pilots and the \$160,000 a year, that is an attempt to prove a generalization from a specific. Let us talk about the average salary of the people who are involved. Airline pilots are well paid, but they are in terms of numbers of the three principal collective-bargaining groups the least in terms of size. The other two that are involved are the Teamsters with roughly 35,000 members, and the Machinists with 60,000. The Teamsters make about \$22,000 a year on the average, and the Machinists \$21,000 to \$22,000. We are not talking about people making \$150,000 or \$160,000 a year. These are average Americans making average salaries who are going to lose their jobs possibly because of actions taken by this Congress.

We promised them in 1978 when they helped us to get deregulation that they would be taken care of, and we reneged on the promise. No wonder they do not believe us, we reneged. Now they want something written in

law, something the bureaucrats cannot renege on.

Let us talk about hearings. The distinguished chairman of the Aviation Subcommittee had hearings on sunset legislation for the CAB, and testimony was received on the issue of labor protection from the airline pilots, the Association of Flight Attendants, the International Association of Machinists & Aerospace Workers, the Transport Workers Union of America, the Brotherhood of Railway & Airline Clerks, and the flight engineers. Hearings were held on July 15 and 16, 1981, on sunset of the CAB, and the same unions testified as to labor protection. It is not an unknown issue.

Let us take also the issue that goes beyond the scope of Congress, and the Senator from Kansas can correct me if I am wrong. Her argument is that the House had nothing, the Senate allowed an extension of the discretionary authority of the CAB to impose these provisions, provisions they have imposed for years, and the conference, she says, went beyond that and added some mandatory provisions.

I have said before that the Senator from Kansas herself offered mandatory provisions. The conference did not accept them. She did not formally offer them in conference, but attempted to negotiate them between the parties. I will not read from this document which is a letter to the airline pilots saying that "we would work it out." It was a 5-year mandatory protection plan clearly beyond the scope of the conference. If her point is to be taken, and I bring this up only to say her point is not really that we have gone beyond the procedures, because I do not think she would have raised an objection had we adopted her substance. Her objection is to the policy we adopted, not the procedures we followed.

Let us talk once more about what this Congress has done. I missed my junior colleague from New Hampshire, Senator RUDMAN. He said, "I do not care what happened 20 years ago. I am here to change them." He was one of the ones who voted last year—and I know he always knows what he is doing when he votes—for the A.T. & T. settlement, the language here which would have guaranteed 7 years of labor protection.

What we are doing for the people in the airline industry is something they deserve to have done that we reneged on. It is comparatively modest in relation to what we have done for other industries. The only industries we do it for, we do not do it for General Motors, we do not do it for nonregulated industries.

The only industries we have ever done it for were railroads, airlines, communications, industries that are regulated, and because they are regulated certain obligations are placed

upon them, and then as we try to move to deregulate them we say:

Because you have been in a unique situation and because for years the relation between your unions and the Government has been controlled by the Government in many areas, as you gradually move toward deregulation we are going to put some phase-out provisions in.

Let us cut it all the way and let us understand why we got here. The airline industry went for all the marbles and they lost. We were trying to negotiate a 2-year earlier sunset of the Civil Aeronautics Board, 1983 instead of 1985. We came very close to getting the agreement. One of the agreements we wanted in terminating regulation sooner was statutory protection for the workers involved because they had been cheated by the 1978 act, cheated. We could not quite swing it, and I will give great credit to Paul Ignatius of the ATA. He did the best he could to make this arrangement come off whereby we would have terminated regulation 2 years earlier. But his association split. He could not hold them together. There are a number of airlines that support the conference report, but his association split. It happens every now and then.

And a majority of them stated:

The heck with it. We'll go 2 more years, phase out the CAB in 1985, and we won't have any labor protection at all. We are going to gamble all or nothing that Congress will not, by statute, impose labor protection.

And, my fellow Senators, they gambled all or nothing, and they lost, because they would not compromise and they would not bargain. Now that they have lost, they are making a last ditch effort to save themselves by objecting on a procedural motion to something that they, themselves, the airlines, were prepared to accept. They were prepared to accept the offer of the Senator from Kansas.

Well, first, we have cheated the employees for too long. Second the big boys played in a big-stakes game, and they lost. Now they do not want to pay their debt.

All I am asking this Senate to do is to fulfill a promise we made 4 years ago when when we deregulated the industry and treat these employees decently. Not as generously as we treated A.T. & T.'s employees, not as generously as we have treated other employees under the Conrail settlement, but to treat them decently. It is the least we can do.

The PRESIDING OFFICER. Who yields time?

Mr. CANNON. Will the Senator yield me 2 minutes?

Mr. PACKWOOD. I am happy to yield to the Senator from Nevada.

Mr. CANNON. Mr. President, I understand the parliamentary situation to be that if all the time is used and the Chair rules and an appeal of the

ruling of the Chair is taken that there would be no time for debate. Is that correct?

The PRESIDING OFFICER. When there is unanimous consent agreement on a matter, a subsidiary motion which is not provided for in the agreement is decided without debate.

Mr. CANNON. I thank the Chair. Therefore, I will make an assumption here that the Chair may make an unfavorable ruling in this case in which an appeal would, undoubtedly, be taken.

I just wish to briefly say that if the Chair should make such a ruling in favor of the point of order, it would be both wrong and inconsistent with past rulings on the scope of the conference. The Senate amended the law as it pertains to the administration of section 408 of the Federal Aviation Act. In conference, the House came in and insisted upon further amendment directly related to section 408 and its administration. And further still, the changes adopted by the conference simply continue in law the existing reality that LPP's are imposed or requested in major 408 cases.

Therefore, in the event that the Chair should rule in favor of the point of order, I would certainly urge my colleagues to vote for the appeal because the Chair would then, indeed, be in error on its ruling.

I thank the Senator for yielding.

The PRESIDING OFFICER. Who yields time?

Mrs. KASSEBAUM. Mr. President, I yield 1 minute to the Senator from Arizona.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. GOLDWATER. Mr. President, 1 minute is not very long.

I have listened to the Senator from Oregon pontificate on the bad things that the airlines have done to their employees. Well, the airlines pay \$36,900 a year compared to \$22,200 for the rest of the U.S. industry.

But this is not the dangerous thing, Mr. President. Suppose they did cheat them. We are cheating the people of the United States when we try to conduct legislation the way we have conducted this one—no hearings, no debate.

The first I heard about it was when I came down one morning and somebody said, "Oh, they have raised airline employees' salaries. They made it possible for an airline pilot to pick up \$450,000 for not working for 5 years." I thought, by golly, I wish I could get a job like that.

The question is not whether we have done wrong or right by these employees. The question is whether we are following the rules of the Senate. And, Mr. President, we are not. I think it is a terrible, disgraceful thing for this body to accept what has been done under the hidden cloak of the labor

unions who have won a great point here.

How long is it going to be, let me ask you, before the same trick is used on the truckers, the people who drive this vehicle, the people who work there, the postmen?

"MANDATORY FEATHERBEDDING" IS A NIGHTMARE

It is not every day in the week, of course, that my views and that of the Washington Post coincide. Far from it.

But the editors of the Post were squarely on the mark when they warned against what they called a "Shakedown Flight" and said:

With all the signs of a typical Washington fast shuffle, moves are underway on Capitol Hill to saddle the airline industry with some mandatory featherbedding disguised as labor protection.

This jet speed featherbedding forebodes a nightmare for American industry.

What other group of American employees could receive up to \$450,000 if furloughed from their jobs?

That astonishing figure is what could be paid to the highest paid airline pilots who are furloughed. They could receive \$90,000 a year for 5 years, and that multiplies in 5 years to \$450,000. No wonder, then, that the pilots want to keep this hidden in the legislative clouds with no hearings.

If Congress endorses this featherbedding for some of the highest paid workers in the Nation, then obviously the doors will be flung wide open for costly and inflationary benefits to millions of other workers.

Is there a fundamental difference between the merger or other business transactions among two airlines than between any other businesses?

If we believe that the Government should keep its hands off the bargaining table; if we believe in the competition of the free marketplace; if we believe that featherbedding imposes drastic economic penalties which the Nation cannot afford, then we will agree—at least this once—with the Washington Post, when it concludes:

Before the airlines were deregulated, the Civil Aeronautics Board could make a case for insisting that jobs be protected in mergers and swaps, since airlines were benefiting from government-protected franchises. But today there is no case whatever for legalized shakedowns of financially shaky airlines.

I ask unanimous consent that the editorial from the Washington Post, an editorial from the New York Times, and a document showing compensation of U.S. airline employees be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post]

CONGRESS ON A SHAKEDOWN FLIGHT

With all the signs of a typical Washington fast shuffle, moves are under way on Capitol Hill to saddle the airline industry with

some mandatory featherbedding disguised as labor protection. House and Senate conferees are trying to slip into an otherwise noncontroversial bill a provision by which airlines would have to make costly payments to pilots and other employees affected by any mergers or possibly even sales of assets, including aircraft.

The proposal, which has undergone no hearings, would—among other things—guarantee furloughed employees 60 percent of their salaries for up to five years; and it would compensate for up to four years any employee for any wage loss suffered through transfer to a lower-paying job. This could mean that the highest-paid furloughed pilots would be entitled to demand \$90,000 a year for five years—whether their airlines could afford it or not. Isn't this the sort of thing better left to collective bargaining?

Of course—unless you're a member of the Air Line Pilots Association, which would much rather put the payments into law than bargain for them. This organization's president is the labor representative on the executive committee of the Republican National Committee. There, as in the White House, ALPA is remembered with gratitude for its support of President Reagan's decision to fire striking air traffic controllers last year. ALPA is just as fondly remembered on Capitol Hill, where the group has dropped more than \$425,000 in campaign contributions on carefully selected targets—namely, more than 200 representatives and senators, including key members of the congressional conference committee considering the provision.

Officially, the administration is on record against the measure. OMB director David Stockman has so argued, labeling the proposed amendment "unacceptable" and "an intrusion by the federal government into private collective bargaining negotiations." He points out that such provisions would be especially damaging for the airlines in serious financial difficulty—and could prevent them from taking "sensible steps to restructure" and compete.

Before the airlines were deregulated, the Civil Aeronautics Board could make a case for insisting that jobs be protected in mergers and swaps, since airlines were benefiting from government-protected franchises. But today there is no case whatever for legalized shakedowns of financially shaky airlines. The conferees should reject any such proposal.

[From the New York Times, Friday, July 16, 1982]

FROZEN IN THE COCKPIT?

Feudalism is an economic system long dead—except in the psyche of the airline unions. They want to attach airline workers to their planes and check-in counters, the way medieval serfs were tied to their land.

Under proposed legislation, airlines would have to guarantee equivalent jobs (or severance payments as high as \$190,000) to any employee affected by merger, sale or lease of facilities. The airlines argue, correctly, that Government should not impose rigid labor protection rules on their now-deregulated industry. If employees are more eager to win such costly protection than, say, higher wages, let them bargain for it.

Before the industry was deregulated in 1978, the Civil Aeronautics Board insisted that jobs be protected in mergers and route swaps. Where equivalent work was not avail-

able, workers could get 60 percent of their wages for five years.

Such broad Government protection for airline labor was only fair, the board argued, because airline management was benefiting from valuable Government-protected franchises.

But now the franchises are gone, and so is the regulators' rationale for "labor protection provisions." That is why the pilots and airline machinists' unions are pressing Congress for a law to accomplish the same thing.

Such legislation would make little sense even in good times. To adjust to market conditions, airlines need the flexibility to buy, sell and merge facilities. They could, if they wished, barter that flexibility for lower wages or reduced fringe benefits. But as Wallace Hendricks, a University of Illinois labor economist, points out, no airline union has valued protection provisions highly enough to pay the necessary price.

In any case, these are not good times. A half-dozen airlines are already in trouble; others will probably need to dump routes, merge facilities or lease out aircraft. No airline can afford to pay labor protection costs that might run as high as \$6 million for the sale of a single jumbo jet.

No hearings have been held on this labor protection provision. Neither the House nor the Senate voted to put such a provision in its version of an aviation insurance bill. Supporters will simply tack it on in conference committee next week, provided that influential conference members do not object. That, in effect, leaves it up to the senior uncommitted conferee, James Howard of New Jersey.

Representative Howard, chairman of the House Transportation Committee, is known both for his affection for organized labor and his practical commitment to airline deregulation. May his mind win out over his heart.

U.S. SCHEDULED AIRLINE INDUSTRY COMPENSATION PER EMPLOYEE, 1981

U.S. Airlines: \$36,900.

U.S. industries: \$22,200.

In 1981 the average compensation for 312,000 airline employees was 66 percent higher than the U.S. industry average. Annual airline compensation increases averaged 10.7 percent over the last five years.

COMPENSATION OF U.S. AIRLINE EMPLOYEES, 1981

	Total work force	Work force excluding pilots	Pilots (including copilots and flight engineers)
Compensation (including fringes, i.e., social security, unemploy- ment, insurance, and pension)....	\$36,900	\$29,755	\$96,309
Wages (excluding fringes).....	27,581	22,014	73,998

Airline employees are among the world's most highly compensated. This is the result of collective bargaining and labor contracts in which the unions have negotiated higher wages. Congress should not intercede into the collective bargaining process and impose—by federal law—labor protective provisions (LPPs).

Mrs. KASSEBAUM. I thank the Senator.

I yield 1 minute to the Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, I want to say, first, the issue of salary

levels is not relative to this discussion. I hope that we could avoid the politics and end our debate in this Chamber.

As the Senator from Kansas has pointed out, the labor protection provision goes well beyond the previous practice under the circumstances. I say to my colleagues, as a former airline pilot, I have been a particular target of the parties involved in this dispute and the feelings run very high on both sides and there are good arguments on both sides. I think in fairness to all of the parties, we owe open and complete hearings to this subject.

Second, the Senator from Kansas is absolutely right. Unusual procedure has been resorted to in this case. Our usual procedures have been short circuited. I urge my colleagues to support the efforts of the Senator from Kansas out of fairness. Let us have full and open hearings on this issue so that, first of all, we deal fairly with the parties but, second, so we all fully understand the fine points of the issue at hand here.

I thank the Chair.

Mr. PACKWOOD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. PACKWOOD. Many airlines lease the majority of the planes they operate. Many small airlines own only a small percentage of the planes they operate. The airline business is very seasonal. It has been sometimes necessary in the past and undoubtedly will be necessary in the future for some of these small carriers to sell a small number of aircraft due to these off seasons.

The sale of a very few aircraft could constitute more than 20 percent of the planes owned and therefore would be a qualifying transaction.

Sections (6)(A) & (B) of this legislation are intended to cover merger or merger-type situations where one qualifying air carrier takes over a substantial portion of the property or operations of another qualifying air carrier. The legislation is not intended to cover a situation where a small air carrier sells or leases a small number of planes strictly out of economic necessity.

Section (b)(1)(A) provides that the lease of a substantial portion of the properties of a carrier is a qualifying transaction. It should be made clear that this means the leasing of owned aircraft and not the subleasing of leased aircraft.

Mr. President, I yield 3 minutes to the Senator from Massachusetts.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I rise because I originally introduced airline deregulation legislation with the Senator from Nevada, Senator Cannon. I do have a memory of both the history of the hearings and also of the dialog and the discussion.

We went to extraordinary lengths, Mr. President, to accommodate the airlines in this country. The issue was: Is there an area of public policy that we can get the Federal Government out in order so we can release the forces of competition? One area which was suggested was the airline industry. So we fashioned and shaped a piece of legislation.

The airlines came to us and said, "Oh, no. Leave the Federal Government in. If you insist on deregulation we only want a certain number of routes opened to competition each year. So the Senate and the Congress of the United States said, "All right. In order to make some progress, we will do that."

Then the small towns said, "Look, you have to look out after us." The fact was that during the previous 10-year period, one-third of all of the small communities in the Nation lost air service.

So he said, "OK. For the small communities, we will assure comparable service." And we looked out after the small communities.

Then the airline employees said, "All right. If this is going to be done in the interest of competition and to provide more service for the consumers, we ought to have some degree of protection."

And we adopted an amendment offered by the Senator from Missouri, Senator DANFORTH, and others. We thought at that time we made some adjustment for the airlines, we made some adjustment for the small communities, and we made some adjustment for the employees. Well, the fact remains that we did make adjustments for the airlines and for the small communities, but not one thing has been done for the employees. Two successive administrations have failed to carry out the policy we adopted. And now, to make matters worse the protection employees have been able to rely on for 30 years will be eliminated unless we adopt this conference report.

As one who is very much involved in the fashioning and shaping of the legislation, listening to this discussion and debate, participating in the amendments that were put forward, I think that the Senator from Oregon is exactly right and we have a responsibility to those employees.

The PRESIDING OFFICER. The Senator's time has expired.

Mrs. KASSEBAUM. Mr. President, how much time remains in the debate?

The PRESIDING OFFICER. One minute 47 seconds.

Mrs. KASSEBAUM. Mr. President, I would like to offer my concluding remarks at this time.

I certainly agree with the Senator from Oregon that there should be protection for the airline employees

which was guaranteed to them under the deregulation act. But the enforcement of that is up to the administration that is in office and which bears that responsibility. We certainly do agree with that.

As I say, it is not just a question of the labor protection provisions, but how we address them in a legislative framework.

Mr. PACKWOOD. Mr. President, I am prepared to yield back the remainder of my time if the Senator from Kansas is prepared to yield back the remainder of hers.

Mrs. KASSEBAUM. Mr. President, I am prepared to yield back the few seconds remaining.

Mr. PACKWOOD. Mr. President, I yield back my remaining time.

Mrs. KASSEBAUM. Mr. President, I raise a point of order under rule XVIII that the conferees have exceeded their authority by including new matter not committed to them by either House.

The PRESIDING OFFICER. Rule XXVIII states:

Conferees shall not insert in the report matter not committed to them by either House, nor shall they strike from the bill matter agreed to by both Houses. If new matter is inserted in the report, or if matter which was agreed to by both Houses is stricken from the bill, a point of order may be made against the report.

New matter has been inserted. The point of order is valid.

Mr. PACKWOOD. Mr. President, I take appeal from the decision of the Chair and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is, Shall the decision of the Chair stand as the judgment of the Senate. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.
Mr. HUMPHREY (When his name was called). Present.

Mr. RANDOLPH. Mr. President, a point of order. The Senate is not in order.

The PRESIDING OFFICER (Mr. WALLOP). The Senate will be in order.
Mr. RANDOLPH. Mr. President, I renew my point of order.

The PRESIDING OFFICER. In the opinion of the Chair, the Senate is in order. The clerk will resume the call of the roll.

The legislative clerk resumed the call of the roll.

Mr. RANDOLPH. Mr. President, the Senate is not in order. I do not like to say what I am saying, but let us have order when votes are being taken.

The PRESIDING OFFICER. The Senate is not in order. The Senate will be in order.

The rollcall may proceed.

The legislative clerk resumed the call of the roll.

Mr. RANDOLPH. Mr. President, it apparently does no good. I am grateful for your giving me no—

Mr. STEVENS. Mr. President, a point of order. A vote is in progress.

Mr. RANDOLPH. I can make a point of order during a vote. There is nothing that keeps me from doing that. The point of order is that the Senate has not been in order.

The PRESIDING OFFICER. The point of order is well taken. The Senate will be in order.

The rollcall may continue.

The legislative clerk resumed and concluded the call of the roll.

Mr. STEVENS. I announce that the Senator from Oregon (Mr. HATFIELD) and the Senator from Idaho (Mr. SYMMS) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 59, nays 38, as follows:

(Rollcall Vote No. 318 Leg.)

YEAS—59

Abdnor	Goldwater	Murkowski
Armstrong	Gorton	Nickles
Baker	Grassley	Nunn

ANSWERED "PRESENT"—1

Humphrey

NOT VOTING—2

Hatfield Symms

So, the ruling of the Chair was sustained as the judgment of the Senate.

The PRESIDING OFFICER. The conference report is recommitted.

Mr. BAKER. Mr. President, there will be no more rollcall votes tonight.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business to extend not past 10 p.m. in which Senators may speak.

AUGUST 15, 1982, DESIGNATED AS WILL ROGERS AND WILEY POST DAY

Mr. MURKOWSKI. Mr. President, I send a joint resolution to the desk on behalf of myself, Mr. STEVENS, Mr. BOREN, and Mr. NICKLES, and ask for its immediate consideration. I might state that this request has been cleared with the minority leader.

The PRESIDING OFFICER. The clerk will state the joint resolution by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 230) to authorize and request the President to designate August 15, 1982, as "Will Rogers and Wiley Post Day."

The PRESIDING OFFICER. The joint resolution will be deemed to have been read once by title and once at length, and, without objection, the Senate will proceed to its consideration.

The Senate proceeded to consider the resolution.

Mr. MURKOWSKI. Mr. President, today I am introducing for passage a joint resolution requesting the President to designate Sunday, August 15, 1982, as "Will Rogers and Wiley Post Day." On August 15, 1935, Mr. Rogers and Mr. Post were killed in an airplane crash 24 kilometers south of Point Barrow, Alaska. Both aviators were in the process of flying to Siberia.

Wiley Post was the first aviator to complete a solo flight around the world. On June 23, 1931, Mr. Post took off in his plane, the "Winnie May" from New York City, and circumvented the Earth in the record time of 8 days, 15 hours, 51 minutes, returning to New York on July 1. His course traversed the British Isles and the Soviet Union, and is described in "Around the World in Eighty Days." Mr. Post repeated the flight in 1933, bettering his record by approximately 21 hours. He later performed historic experiments with stratospheric flights and made substantial breakthroughs with new equipment designed for that purpose. It is significant to report that Mr. Post made these achievements without the benefit of one eye, since he lost his left eye in 1926 in an oil-field accident.

Mr. President, Will Rogers is a well-known name in the homes and hearts of Americans, and has been recognized as the foremost American humorist of his day. He had the God-given faculty of making people laugh and think at the same time. He was, in a sense, an institution—possibly the greatest debunker of stuffed shirts and fanciful ideas in our history. He thrived in the developing years of our country the days when families would gather around the radio to hear his thoughts. In a few words, transmitted over the air, Will Rogers could say more and

say it better than most of the would-be statesmen could say in hours.

His wit was much revered and respected and discriminated against no one. He poked fun at Presidents, heads of state, Members of Congress—at everything and at everybody when he saw fit. However, he was able to make the victims of his wit like his barbs, simply because they were harmless. He had the ability to make people look at themselves and chuckle in a very healthy and natural fashion.

Born in 1879, in Oklahoma, Mr. Rogers might very well have been the most popular American of his day. Rogers twirled his lariat through much of the civilized and noncivilized world, with the portions of the world that he could not reach personally, being contacted by his motion pictures. He was the most enthusiastic air traveler covering 500,000 air miles before his death.

He shared his life openly and liberally, and I truly believe that "he never met a man he didn't like."

Mr. President, August 15, 1982, marks the 47th anniversary of the death of these two pioneers. I am pleased by the opportunity to present to the Senate a joint resolution making this anniversary their day.

Mr. STEVENS. Mr. President, it is with great pleasure that I join with my colleague from Alaska in sponsoring this resolution which asks the President to declare August 15, 1982 "Will Rogers and Wiley Post Day."

There will be ceremonies in Barrow on the 15th dedicating a monument to the two famous men. The monument is notable beyond being 27,000 pounds in that it is a joint project of the Will Rogers Lions Club of Claremore, Okla. and the Lions Club of Barrow.

It will be 47 years on August 15 since Wiley Post and Will Rogers died in an airplane accident on their way to Barrow to visit friends prior to flying on to Siberia. They had come from Fairbanks in interior Alaska where they had refueled and visited with friends.

Wiley Post and Will Rogers added immeasurably to the advancement of aviation in our country. Alaska, because of its dependence on air travel, was able to grow toward statehood through advances made due to the work of Wiley Post in aeronautics and Will Rogers' popularization of flying as a way to travel—particularly in Alaska.

As my colleagues probably know, Alaska has not been called the "flyingest" State in the Union for no reason. Ever since Carl Ben Eielson introduced airmail to Alaska's interior in the midtwenties we Alaskans have not been able to get enough of flying. The Federal Aviation Administration estimates, for example, that 1 out of every 39 Alaskans is a licensed pilot. That is six times as many pilots per capita as

compared to the rest of the United States.

The trip to Alaska in 1935 which ended so tragically near Barrow had not been Wiley Post's first. He had stopped in Alaska during his round-the-world flights in 1931 and 1933, the 1933 trip being a solo trip. The round-the-world flights brought positive attention to Alaska and its strategic location—both commercial and military.

North Slope Borough Mayor Eugene Brower has already declared the 15th Wiley Post/Will Rogers Day. It is only fitting that the U.S. Congress call on the President to do the same because these men belonged not only to Alaska, Oklahoma and Texas, but to the United States, if not the world. I urge my colleagues to join with us in recognizing these two great Americans by declaring August 15 Will Rogers and Wiley Post Day.

The joint resolution was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution (Senate Joint Resolution 230) with its preamble, follows:

S.J. RES. 230

Whereas the courageous and pioneering spirit of America's aviators and the service provided by that spirit, deserve to be properly commemorated and recognized;

Whereas Wiley Post and Will Rogers have been acknowledged as pioneer aviators in America;

Whereas Wiley Post was the first aviator to complete a solo flight around the world;

Whereas Wiley Post upon completion of that record flight continued to make substantial contributions to the development of American aviation;

Whereas Will Rogers was considered to be the most enthusiastic air traveler of his day, completing some 500,000 air miles by 1935;

Whereas Will Rogers contributed greatly to the development of the United States through his pioneering spirit;

Whereas Will Rogers and Wiley Post embarked on August 15, 1935, on a projected trip to Siberia;

Whereas Will Rogers and Wiley Post met with their death as their plane crashed on August 15, 1935, 24 kilometers south of Point Barrow, Alaska;

Whereas it is appropriate to honor the patriotism and sacrifice of all those individuals who honorably served the development of their country in times of peace as well as war;

Whereas August 15, 1982, marks the 47th anniversary of the death of Will Rogers and Wiley Post.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to designate August 15, 1982, as "Will Rogers and Wiley Post's Day", and to call upon Federal, State, and local government agencies and the people of the United States to observe such day with appropriate programs, ceremonies, and activities.

THE NEW RECORD UNEMPLOYMENT RATE

Mr. PELL. Mr. President, the Nation's new unemployment rate of 9.8 percent, announced Friday by the Department of Labor, marks the greatest economic tragedy that this country has experienced since the Great Depression.

More than 1 American in every 10 is out of work today. More than 10,790,000 workers throughout the country are now unemployed, and more than 1 million more are not counted because they have given up looking for work. In Rhode Island, the statistics are equally upsetting: 9.3 percent of the labor force, amounting to 44,700 workers, is counted as unemployed. The jewelry, machinery, and construction industries, in particular, have contributed the most to the unemployed workers who walk the streets and wait in line in Rhode Island.

If the size of the average American household is 2.7 members, we can estimate that more than 20,000,000 American family members, and more than 90,000 Rhode Island family members, are faced with unemployment, frustration, uncertainty, and disillusionment with their country's economic and political systems. These facts constitute a national tragedy, and it is a tragedy that the administration can no longer ignore.

I have stated before that unemployment is the most serious problem facing our country today, and that our highest priority as a nation should be to get our citizens back to work. The new record in the unemployment rate that we have set today makes our responsibility even more urgent than it has been.

It is not the fault of these workers or their families that national economic policies have resulted in such a deep and prolonged recession. It is time that we recognize that it is the economic policies of the administration that have caused hardship, unemployment, and bankruptcy throughout the Nation.

The monthly release of unemployment rates for the Nation and for Rhode Island have become the grimmest and most angering events in the public consciousness. Each month we are newly reminded that the economic policy of this administration is no policy at all, and that it in fact is nothing more than a senseless and brutal destruction of every responsibility that a government owes its people in favor of a military budget which grows ceaselessly and without reason. I share the grief and desolation which every unemployed worker feels. Congress must act to bring down the high jobless rate and restore economic growth.

CLEARING THE RECORD

Mr. PELL. Mr. President, one of the most unfortunate and anguishing human dramas occurs when an individual's reputation is needlessly damaged by a criminal prosecution. These instances are rare—a tribute to our judicial system—but when they do occur, the initial damage to personal reputation is never totally removed by an ultimate acquittal and exoneration. The headlines of indictments and criminal prosecution are front page news; acquittals are lucky to be found buried in the back pages.

Such is the story of Wharton Shober, a former president of the Hahnemann Medical College. He and his family suffered greatly as a result of his encounter with the criminal justice system, notwithstanding his eventual acquittal. I would like to share his experience with my colleagues. I ask unanimous consent the Mr. Shober's article in the February 22 Princeton Alumni Weekly, entitled "Absence of Redress" be printed in full in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Princeton Alumni Weekly, Feb. 22, 1982]

ABSENCE OF REDRESS

(By Wharton Shober)

On November 2, 1978, the Philadelphia newspaper headlines trumpeted: Ex-college President Indicted for Bribery and Mail Fraud Faces 107 Years Imprisonment. In shock, my 78-year-old father (Princeton '23), who was then recovering from a heart attack, telephoned the news to my home abroad. So began an ordeal for me and my family that lasted until June 28, 1980, when the charges against me were thrown out of court for lack of evidence. Indeed, the federal judge presiding indicated that the government had no case and never should have indicted me when he said: "If a crime has been committed here, it has been committed by the government prosecutor against defendant Shober."

It is still not over. The lurid headlines which marked the proceedings for 20 months remain a ghastly memory. My wife, teenage children, and other relatives will carry the scars for the rest of their lives. During my indictment and trial someone regularly sent photocopies of the newspaper articles to every potential customer of the overseas-based hospital management company I had helped found in early 1978. Obviously I was unable to take any aggressive business posture, and although my employers believed in my innocence, the company I headed effectively lost 20 months of business expansion. The personal financial results of the indictment were catastrophic: By the time I was acquitted, lawyers bills had taken my life's savings and placed me \$600,000 in debt.

THE HAHNEMANN STORY

The story began in late 1970 when the presidential search committee for Hahnemann Medical College & Hospital of Philadelphia asked me if I would be willing to be a candidate. I was available, having recently sold my interest in an international communications company which I had founded and

led for 13 years. At first, however, I wisely said no. Why in the world would anyone want responsibility for an insolvent, near-bankrupt medical school and hospital surrounded on three sides by innercity ghetto, with a campus composed of a decaying 50-year-old hospital and 75-year-old college buildings so run-down that they should have been carried on the books at their land value only? Hahnemann revenues were \$33 million, the true annual loss on operations exceeded \$1 million, there was no endowment, and there was an immediate danger of forced liquidation or bankruptcy.

A few months later, a loved one of mine almost died in a small community hospital. She probably would not have been in danger if her local physician had kept up with modern medicine and treated her accordingly. Upon investigation, I found there was no system, at that time, requiring physicians to "keep up." Yet, with medical knowledge doubling every 10 years, no physician could remain current unless he had continuing medical education. This was a major factor in my decision to see if Hahnemann could not be saved, put on a positive road, and encouraged to develop a system whereby physicians would embrace continuing education.

FINANCIAL TURNAROUND

I took up my duties as president and chief executive officer on August 30, 1971, and plunged into what would be the most interesting and challenging period of my life. When I resigned six years later, Hahnemann had a modern campus and hospital valued at \$165 million, revenues of \$120 million, and a positive cash flow. This had been achieved by reorganizing Hahnemann as an aggressive nonprofit private-enterprise institution built around individual profit centers. In addition, we gave a new emphasis to fund raising, encouraged the acquisition of government and private health care contracts, and developed an incentive system for clinical faculty, whereby they shared in profits they generated from patient care.

Profit-sharing encouraged the clinical faculty to visit community hospitals and organize seminars on their specialties for doctors all over the state. This resulted in the local doctors referring patients with complex diseases to our teaching hospital. Within 18 months we had a waiting list of referral patients for elective procedures. Soon our affiliate "feeder" network expanded from three to 61 hospitals. Meanwhile, I turned to the deplorable physical state of the campus. We financed Hahnemann's first student housing—one 16-story apartment building and a second 22-story building—by a federal grant, community fund raising, and a tax-exempt bond issue. We set up a college of health sciences, a cancer institute, a heart institute, and a state-wide physician continuing education system. In late June 1977, I resigned and was made president emeritus.

How did my activities on behalf of Hahnemann result in a criminal indictment and trial? One of the major government contracts we secured was to finance the Hahnemann Health Medical System, which was created to provide continuing education for physicians at community hospitals. This system was first introduced in Wilkes-Barre and Luzerne County, and it was an immediate success. So much so that Congressman Dan Flood, who represented this area in Washington, inserted a line item in a large appropriation bill for \$14.5 million to help Hahnemann build its new \$65-million hospital. When Flood, a man whose contributions

to American medicine are enormous, came up for re-election, I asked some friends to contribute to his campaign. They did, 17 persons, giving a total of \$10,000. Unknown to me, Flood was under investigation by the FBI at the time. Three years later he was indicted by a federal grand jury and eventually pleaded guilty to a misdemeanor and was fined one dollar. He was not indicted for anything in connection with Hahnemann.

LEGAL BLACKMAIL

In January 1978, Assistant U.S. Attorney Alan Lieberman summoned me to his Philadelphia office and told me that the \$10,000 my friends gave to Flood's re-election campaign made me guilty of bribery. He also said I was guilty of 17 counts of mail fraud. Each count carried five years in the slammer. This was a potential of 85 years plus 22 years for charges relating to "bribery of a public official." After attempting to terrify me (he succeeded), he then offered me immunity from prosecution if I would testify against Flood whom, he said, "the government wanted to get." He promised that if I refused, he would indict me, prosecute me, and send me to prison. I told him that he had absolutely no basis for these charges, that his only motive could be the headlines a college president's indictment would generate for him, that his threats put him in the same category as the late Senator McCarthy, and that his attempted blackmail made him a disgrace to the legal profession and to his oath of office.

Eleven months later I learned of my indictment from my father's telephone call. He had learned of it by reading the newspapers, which without exception assumed I was guilty. They embellished the negative half-truths leaked to them by the Assistant U.S. Attorney's Office until my acquittal 20 months later. One particularly onerous front-page article was entitled "Blue Blood, Black Mark" and traced the "previously" honorable tradition of my family from revolutionary times to the present "black mark." My indictment had to do only with my fund raising for Dan Flood. I was not accused of taking one cent or of having made any personal gains.

By the time of the trial, Assistant U.S. Attorney Lieberman had moved on to a cushy job in private practice, and his successors Frank Shermann and Jean Dimerjian prosecuted me. During the trial's seven-week duration all of the prosecution witnesses—even those granted immunity by the government in return for their testimony against me—attested to my innocence. The federal judge, E. Max Troutman, did not require my lawyer, Richard Sprague, to present a defense to the jury. We called no defense witnesses. We did not put on a defense of any kind. I was acquitted of all charges by the judge. The case didn't go to the jury. This was the first time Judge Troutman had thrown a government case out of court after hearing only the prosecution in his 12 years on the bench.

Before and during the trial Federal Prosecutors Shermann and Dimerjian offered me several "deals" if I would plead guilty to a misdemeanor. My wife and children, who stayed with me in the courtroom each day of the seven-week trial, supported me in my decision to refuse their offers. My defense attorney told me that Shermann and Dimerjian were surprised that I wouldn't accept their offer—after all, they reasoned, my downside risk was 107 years in jail. The prosecutors obviously believed that the guilt or innocence of the accused was immaterial.

The game of law was more important than the justice which they had sworn to uphold and defend.

The FBI investigation and the trial cost the taxpayers an estimated \$10 million. It cost me my life's savings and left me \$600,000 in debt. The cost in terms of my family's suffering could not be measured in dollars.

America's present criminal justice system, which permits an unprincipled federal prosecutor to secure an indictment from a grand jury that can hear only the evidence the prosecutor presents, is not fair and should be changed. The wrongfully accused should be given some means of redress to his accuser or to the government. Whether this ever comes to pass or not, I can tell you that a prosecutor's power, when leveled by a rogue against a single innocent individual, is awesome.

Imperfect as our legal system is, I nevertheless believe it to be one of the best in the world. If this had happened in a totalitarian country, I would surely have been convicted and imprisoned. In America, I lost only my money and my reputation, not my life.

Mr. PELL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HEFLIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

A TRIBUTE TO MRS. MARGUERITE HILDRETH HUEY

Mr. HEFLIN. Mr. President, just a few short weeks ago, I stood here to pay tribute to the Centennial Celebration of the city of Enterprise, Ala.

Today, I am saddened to rise to say a few words about an outstanding citizen of Enterprise who recently passed away, Mrs. Marguerite Hildreth Huey. Mrs. Huey was a beautiful, very gracious lady, a true southern lady. She will be sorely missed by all who knew her.

Mrs. Huey was a lifelong citizen of Enterprise, being the daughter of the town's first postman. After college, she was an elementary school teacher. When she married, she turned her time and energies toward being a dedicated housewife, mother, and civic leader. Following the death of her husband, she was called on to serve as city librarian, which she did for some 10 years.

Mrs. Huey loved her town of Enterprise, and she loved doing everything she could to help it prosper. She was active in her church, in school, and in civic organizations.

In the weeks before her death, she was as interested in Enterprise's centennial celebration as anyone else in town. She kept up with the plans and the progress, and only regretted not being able to be a more active help.

Mrs. Huey is a fine example of why cities and States are great. Enterprise,

Ala., and her countless friends will miss her.

Mr. President, I ask unanimous consent that an editorial from the Enterprise Ledger be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Enterprise Ledger, June 27, 1982]

A TRUE SOUTHERN LADY

This week, a very gracious lady of Enterprise was laid to rest. Enterprise will miss her. She brought to the city a love and refinement that was distinctive and stood out wherever she went. She was a true Southern lady in every sense of the word.

Mrs. Marguerite Hildreth Huey loved Enterprise. In her final days, she was as interested in the upcoming Centennial celebration as any member of the Centennial Committee. She wanted to know the very latest activities being planned. A few short weeks ago, it is reported that she wrote that she felt so privileged to have lived in the most wonderful town of the greatest country in the world during the most dramatic century of its history.

The daughter of Enterprise's first postman, (Hildreth) the Encoala of her graduating class contained the notation that she "is one who makes the day brighter with her smile." Her even disposition belied the proverbial thoughts associated with a "red head."

After working her way through Howard College, she returned to Enterprise to teach the sixth grade at City School (College Street Elementary School) for five years. Upon her marriage, she resigned and took up her duties as housewife and civic leader.

She changed her church upon her marriage and became as active in her new church as she had been in her old one. She served as president, among numerous other offices in the Womens Society of Christian Service and was also an honorary member of the Board of Stewards.

She served as president of one of the earliest Band Parents organizations at the high school and was also instrumental in reactivating the high school PTA. She served as chairman of the Mothers' March on Polio, and served for 29 years as a member of the Coffee County Board of Pensions and Security.

An active member of the Plerian Club, she served that organization on a number of occasions as president. She was constantly called on for her knowledge of parliamentary law.

Following the death of her husband, Mrs. Huey took over the duties of city librarian as the library moved to quarters in the City Recreation Center. For 10 years, she worked and expanded the library until it was bursting at the seams as new quarters became needed.

She was a master at handwriting and many a person in Enterprise or from Enterprise proudly possesses diplomas, certificates, inscribed Bibles, and guest registers which were prepared by her.

She was always a patriotic American—one who shamelessly displayed her emotions over the Flag, "The Star Spangled Banner," and "God Bless America." She was proud of the knowledge that her forefathers fought in the Revolution and played a prominent role in colonial Virginia.

She was a great mother, a splendid grandmother and great-grandmother. She loved her family like she did her city and her church.

And as she realized that her death was imminent, she accepted her fate with never a complaint. She was always concerned for others.

Mrs. Huey left a legacy of service, loyalty and gentility that will be long remembered by those she has come in contact with. We will miss her greatly.

A MAN OF PEACE, SHERIFF THOMAS E. GILMORE

Mr. HEFLIN. Mr. President, I rise today, out of admiration and respect, to pay tribute to a truly great Alabamian, Sheriff Thomas Gilmore of Greene County, Ala.

I do admit, however, that I am somewhat saddened to speak about Sheriff Gilmore in this context, for he has recently announced his decision to not seek reelection. In January, when he steps down after a dozen years of service, Alabama will lose one of the most capable, and well-known sheriffs in the State's history.

Thomas Earle Gilmore first ran for sheriff in 1966, and lost by a very small margin. In 1970, he ran again, and was elected—becoming the first black sheriff in Greene County history. He has been reelected ever since, and his decision to not seek the office again this year came as a great surprise to many citizens of that area.

In his 12 years in office, Tom Gilmore has done an outstanding job as sheriff, all the while advancing a non-violent philosophy of law enforcement. When he first took over as sheriff in 1971, he, as do most law enforcement officers, carried a gun. However, since he felt he could, and should, enforce the law nonviolently, the gun was soon put aside. Sheriff Gilmore went on to serve almost all of his 12 years in office in this nonviolent fashion. His dedication to his work is illustrated by his continued service despite a legal quirk under which his salary is at least some \$10,000 below all other sheriffs in Alabama.

Greene County, and all of Alabama, are certainly going to miss his talents in the field of law enforcement. Luckily, however, he will continue to be a benefit to those around him, as he plans to become involved in community-service work with the poor. An ordained minister, he also plans to continue as pastor of the Eastern Star Baptist Church in Demopolis.

Sheriff Gilmore has often said, "I'd like to have it said of me that I was a man of peace." Today, Mr. President, I say with all honesty that no truer words could be spoken. Thomas Gilmore was, and is, a man of peace, a man who for 12 years enforced the law with a badge and not a gun, a man of whom his country and State are rightfully proud.

I ask unanimous consent that an article from the Birmingham News and an editorial from the Tuscaloosa News

about Sheriff Gilmore be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Birmingham News, July 15, 1982]

**SHERIFF GILMORE, "A MAN OF PEACE," TO
TAKE OFF HIS BADGE
(By Frank Sikora)**

EUTAW.—He is probably Alabama's most famous, most underpaid sheriff. A man of the cloth, he wore a badge, but not a gun.

But Sheriff Thomas Earle Gilmore, 41, will step down come January, after a dozen years on the job.

He was the first black sheriff in Greene County history. His decision not to seek reelection has been one of the shockers in this campaign year.

"But it's been something I've been thinking about for some time," he said. "You'll never break away from something if you're afraid to get off the iceberg."

He has no plans, he says, except to pastor his church in Demopolis, Eastern Star Baptist, with a congregation of 300.

"I'm also thinking about doing community-service work," he said. "I want to work with the poor."

Greene County, always rated high in the area of poverty, should be a challenging arena, he said.

In the early 1960s Gilmore, who was born and reared in Forkland, went to California. But he came back in 1965 to take part in and eventually lead civil-rights demonstrations in his home county.

He was arrested with others and once was rapped on the head by then-Sheriff Bill Lee's walking stick.

"Facing the police lines," he said, "got me to thinking about running for sheriff."

He ran in 1966 and lost in a challenged election. But in 1970, it was a different story as he and other blacks swept the slate.

Whites were dubious of his ability in law enforcement, but within a short time he began to win approval. Former Eutaw Mayor William Tuck one day acknowledged: "I have to admit that Tom Gilmore there is doing a good job as sheriff. He's been fair."

Of his own career, Gilmore said:

"I'd like to have it said of me that I was a man of peace. That's what I was striving for. If it can be said of my stay in office that 'peace prevailed,' then I can ask no more."

When he took over the job in 1971, he toted a pistol. But he soon put it aside, he said.

"I wanted to respect the non-violent philosophy of Dr. Martin Luther King," he said. "I felt I could enforce the law non-violently. And I think I did."

"I was conscious of the police-community relations problems across the nation and I wanted to make some steps to make it better. I still feel there oughta be a non-violent unit in every police department."

In 1973, while he was helping residents flee the rising Tombigbee River, Gilmore was shot in the shoulder. He was alone at the time and thought he had been ambushed.

It turned out to be a stray bullet fired by a young man shooting at cans.

He also at times faced guns while making an arrest.

"But I was fortunate to come out without getting hurt and come out on the winning end."

His biggest disappointment, he said, was his inability to solve the shooting of a 5-

year-old girl who was wounded in the face by nightriders who fired into her home.

"I really tried," he said. "But it was one of those cases, it seems, where people wouldn't make the effort to do a bang-up investigation."

The girl recovered, but the case still weighs on his mind, he said.

Gilmore has been the state's lowest-paid sheriff, by law. Because Greene is a poor county, its sheriff through the years has had trouble collecting enough fees to earn a respectable living. In the late 1950s, the Legislature passed an act setting a salary of \$7,500.

In the 1970s, however, sheriffs went off the fee system and salaries are now \$22,000 and up, depending on size. But Greene was not included, because it would take a Constitutional amendment to change it.

The county did allow Gilmore about \$4,800 in expenses, bringing his total to \$12,300 a year, still far below his peers.

[From the Tuscaloosa News, July 4, 1982]

GILMORE WON RESPECT

With some justification, Thomas Gilmore could be called a leader in the movement for civil rights in Alabama. But one suspects the amiable Greene County sheriff would rather be known as a good, God-fearing man who won the respect and admiration of both races with his evenhanded enforcement of the law.

Gilmore, today one of the best-known black elected officials in the United States, announced Friday he is stepping down from the sheriff's post to which he was first elected in 1970.

For Gilmore, it will mark the end of a career in law enforcement. His retirement also caps a rather remarkable personal achievement.

When Gilmore was elected in 1970, there were doubts about his ability to function effectively as chief law enforcement officer in a rural, impoverished Alabama county. There were pressures and obstacles from many sides and citizens of both races were apprehensive for the future.

But Gilmore's performance in office silenced the doubters. He dispensed justice fairly, operating unarmored in often difficult situations, and he compiled a record of sound law enforcement.

His career was spotlighted in the 1979 televised movie titled "This Man Stands Alone." While there may have been times when Gilmore felt alienated and isolated in his job, nothing could be further from the truth today.

"I have tried to project this county in a real positive light," he said in announcing his retirement plans. The courage and quiet dignity he exhibited in performance of his duty went a long way toward accomplishing that goal. He retires with the admiration and friendship of residents of both races.

ANN FROEHLKE

Mr. STEVENS. Mr. President, today marks the last day of service for the U.S. Senate of Ann Froehlke. We will miss her.

Ann has worked on Capitol Hill since 1977 where she first worked for me as the assistant minority leader. Always the hard worker, Ann was dedicated, loyal, and totally selfless. In an arena where quid pro quo is the norm and success is often at the ex-

pense of others, Ann was more than willing to give without expecting anything in return. Where others put themselves ahead of their peers, Ann always deferred praise and worked without expectation of constant reward.

Ann's reputation gained her a position on the staff of the Vice President after the election in 1980. Although I depended upon her heavily, I was proud of the opportunity that was presented to her. Since 1980, Ann has served Vice President GEORGE BUSH with distinction. One has only to spend but a little time in the Vice President's office in order to appreciate the professionalism and patience it takes to provide direction to the scores of Senators, visitors, departmental liaisons, and staff members that depend upon her daily.

I wish Ann the very best. I will miss her and I know her friends and colleagues will feel a deep void with her absence. She has added something very special to all of our lives, and we wish her well in her future pursuits.

DUDLEY DIGGES MORGAN

Mr. STEVENS. Mr. President, I would like to take a moment to give recognition to a young man who recently left the service of the Republican cloakroom. I make reference to Dudley Digges Morgan.

Digges served with distinction in the Republican cloakroom for over 3 years. His leadership, professionalism, and congeniality were always appreciated and respected. His absence will be and is noticed.

The loss of Digges in the Republican cloakroom is the gain of the Department of Commerce where Digges will serve as a member of the congressional affairs team. Those Senators who know him, trust and respect his judgment; I must say it is well earned.

In the days ahead, I look forward to working with Digges in his new capacity at the Commerce Department. He will be an asset wherever he goes throughout his career.

**TERRORIST ATTACK KILLS TWO
ILLINOISANS IN PARIS, FRANCE**

Mr. PERCY. Mr. President, on Monday, August 9, terrorists attacked a Jewish neighborhood in Paris, France, and six people were killed. Two Illinoisans were among those killed and two Illinoisans were also wounded in this mindless criminal act. I have called upon the French Government to urgently take steps to insure that these acts cease and that those responsible will be apprehended and brought to trial swiftly. All of us are grieved by the attack and horrified that anti-Jewish terrorism has struck

yet again. Let us comfort all who mourn this tragedy.

There is a moving tribute to Ann Van Zanten, one of the six killed in the attack, published in the Chicago Sun-Times on August 11. Ann Van Zanten, age 30, was born in St. Louis. She was a historian of architecture at the University of Illinois at Chicago Circle. Those who knew her have said that she was one of Chicago's "most energetic, effective cultural resources," writes William Marton, who wrote the appreciation of Ann Van Zanten. I ask unanimous consent that the article from the Sun-Times be included in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. PERCY. Also killed was Grace Cutler, age 66, of Skokie, Ill. Olga Traficante, who worked with her at the law firm of Adamowski-Newey-Adamowski, said of Grace Cutler: "She was such an extraordinary woman, beautiful inside and out." I ask unanimous consent also that an article from the Chicago Tribune about Grace Cutler be included in the RECORD at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

EXHIBIT 1

[From the Chicago Sun-Times, Aug. 11, 1982]

ANN VAN ZANTEN—LOSS OF A CULTURAL ASSET (By William Marlin)

CHICAGO.—Paris, which is often romanticized as a city of light, was of great interest to Ann Van Zanten, an architectural historian, who was killed Monday in a terrorist attack on Goldenberg's restaurant, a popular Jewish establishment in the ancient Marais quarter near Notre Dame Cathedral.

Her husband, David Van Zanten, a history professor at Northwestern University in Evanston, Ill., and an architectural scholar, was slightly wounded.

Recently named curator of the Chicago Historical Society's fine collection of architectural drawings and records, Ann Van Zanten was born in St. Louis in 1952. She had been preparing for an exhibit on the pioneering Chicago architect Louis Sullivan that was scheduled to open at the St. Louis Art Museum in 1984.

She graduated with honors from Brandeis University in 1972 and earned a doctorate at Harvard in 1980. Her dissertation was on Cesar Daly, an Irish-French architectural journalist, and his influence publication, *Revue de l'Architecture Generale*.

In a very short time, it became clear to the students and stewards of Chicago's architectural heritage that Ann Van Zanten would become one of the city's most energetic, effective cultural resources. In addition to teaching at the University of Illinois at Chicago Circle and serving on the education committee of the Chicago Architecture Foundation, she was recently elected president of the Chicago chapter of the Society of Architectural Historians. Her grace and openness made her a sought-after spokesman for the city's past.

Still on view at the Historical Society is an exhibition for which she shared curator duties with Sally Chappel, a historian. The exhibition is on the work of the two architects—John Lloyd Wright, a son of Frank Lloyd Wright, and Barry Byrne. Upon hearing of the Paris attack, Elizabeth Ingraham, Wright's daughter, a Colorado-based educator and architect, said: "Ann was a sensitive, intelligent young historian. Her fine depiction and critique of my father's work will stand as a tribute to her promising talents. Her death is one more example of how the wanton fires of violent times put a shadow on the future."

That Ann Van Zanten nourished an emotional as well as intellectual affinity for both Paris and Chicago is pointed up by her writings about the Paris-based Ecole des Beaux Arts in connection with an exhibition at New York's Museum of Modern Art three years ago. In her interpretation of the Ecole, she was dealing with an institution where the consciousness of history was sent out in the building world like a beacon.

She knew that Louis Sullivan spent time there, learning at least enough about history to make a good deal of it himself; she knew that Chicago's affable titan, Daniel Burnham, saw sufficient promise in a young designer named Frank Lloyd Wright to offer to pay his way to the Ecole.

Kevin Harrington, assistant professor of architectural history at Illinois Institute of Technology, reflected: "When a friend is killed by insane violence, our protective insulation to such conflict is ripped away. We must really face the terror and horror of savage murder, and we also mourn the death of one whom we are not prepared or willing to lose."

"Ann Lorenz Van Zanten was a thoughtful, reflective scholar whose work so early in her career promised important contributions in the future. We have been robbed on that possibility. Scholars seek to expand our knowledge because they believe it will enrich our lives. Ann was interested in communicating what she learned to a wider public, and Chicago's architectural sophistication provided a wide audience of professional and amateur interest."

SKOKIE WOMAN'S DEATH IN PARIS STUNS FRIENDS (By Thomas Hardy)

Olga Traficante's first thought was that Jo Goldenberg's restaurant would be the last place her friend Grace Cutler would dine during her Paris vacation.

"When I saw that horrible scene on TV, I thought of Grace and told my husband she'd never go to a restaurant like that because there are so many wonderful Jewish restaurants in Skokie," where Cutler lived, Traficante said.

Tragically, the landmark Jewish restaurant was exactly where Cutler was eating lunch when terrorists tossed a hand grenade into the restaurant and then began firing at the screaming occupants with machine guns, killing 6 persons and injuring 22.

Cutler, 66, a longtime widow, was among those killed. Her companion, Eva Shure, 65, a Chicago teacher and a member of Cutler's bridge club, was injured in the attack, which was aimed at Paris' Jewish community.

Also killed was Ann VanZanten, 30, of Evanston, conservator of architecture for the Chicago Historical Society. Her husband, David VanZanten, 35, head of the art histo-

ry department at Northwestern University, was injured.

News of the Paris attack stunned Cutler's colleagues at the LaSalle Street law firm of Adamowski-Newey-Adamowski, where she had worked for 16 years as a legal secretary and office manager.

She left the firm July 1 because the partnership began to disband after Benjamin Adamowski, a former Cook County state's attorney who ran against Richard J. Daley for mayor in 1963, died in March and his son, Robert, moved to California.

Traficante, who also worked at the Adamowski firm, said she and Cutler "became immediate friends and wonderful colleagues" when Cutler joined the fledgling firm in 1966.

"She was such an extraordinary woman, beautiful inside and out, and she was a whiz of a secretary," Traficante said.

"She was delighted to be going on a one-week trip to Europe. She loved the theater, ballet and cultural things, and her friends were teachers and the like who had similar interests."

Cutler grew up in Chicago, attended Tuley High School and was a longtime resident of the Rogers Park neighborhood before moving to her Skokie condominium about six years ago, friends said.

"She was an excellent and hard-working employee," said Robert Adamowski. "Over the years, hers became more of a family situation than an employer-employee relationship."

Adamowski said Cutler's husband was killed in a car crash when her younger son, Howard, now a Chicago pharmacist, was 2 years old.

SINAI SUPPORT AND FIELD MISSIONS

Mr. PERCY. Mr. President, the U.S. Sinai Support and Field Missions have been a bright spot in the Middle East since they were established, first to operate a tactical early warning system and later to oversee adherence to the Egypt-Israel Peace Treaty articles.

The mission phased out its operations this spring, giving over many of its duties to the newly organized Multinational Force and Observers. But the accomplishments of the personnel and the effectiveness of both the Field and Support Mission should not go unnoticed here at home.

The highly technical operations was established in one of the world's most desolate and harsh environments. Inspection of military installations in the 15,000 square-mile area of the Sinai was conducted by field mission personnel and operation of a tactical early warning system in the Sinai was part of this effort from 1976 until early 1980.

The U.S. commitment to assisting in attaining peace in this troubled area of the world is demonstrated in the work of the people involved in the Sinai Support Mission. In an area where the political climate can be as volatile as the natural forces, the missions' objectives were undertaken with a sensitivity that insured its success.

The prime Government contractor—E-Systems of Dallas, Tex.—has achieved its charge with remarkable efficiency, bringing in the contract with cost underruns that have resulted in considerable savings to the U.S. Government.

In his transmittal letter to the President, Sinai Support Mission's Director Frank Maestroni noted, "The private American contractors who have worked with the mission since its inception in 1976 have responded rapidly and efficiently to the many varied challenges that have arisen over the last 6 years."

The skill with which the E-Systems project was handled continued through the phaseout operation, as the contractor ended activities prior to the completion date, without detriment to the operation or the morale of staff.

The success of the Field and Support Missions is a tribute to the private and public sectors, working together to insure the sanctity of the Middle East Peace Accords. We owe a word of thanks to our country's professional men and women and the American corporations, such as E-Systems, who offered their efforts and expertise to this mission of peace in the Middle East.

Mr. President, I ask unanimous consent that a statement by the President of the United States, commending the Sinai Support and Field Missions, be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, July 14, 1982.

A unique American peacekeeping operation in the harsh and isolated desert environment of the Sinai Peninsula ended on April 25, 1982, when Israel completed its withdrawal from the Sinai in accordance with the terms of the 1979 Egyptian-Israeli Peace Treaty. On that day, the Sinai Support Mission and its overseas arm, the Sinai Field Mission, concluded six years of keeping the peace between Egypt and Israel. As the Sinai Support Mission closes out this operation, I want to pay tribute to the many dedicated men and women who, during this critical period, served with distinction either with SSM here in Washington or with SFM in the Sinai.

"The orange men and women," as the Sinai Field Mission staff were called because of the international orange color of their clothing and their helicopters, played a crucial role in maintaining the peace in that area, first under the Second Sinai Disengagement Agreement of 1975 and then under the 1979 Peace Treaty. Initially, they operated an electronic early warning system guarding the approaches to the strategic Giddi and Mitla Passes. When the Israeli troops withdrew further east of these passes under the terms of the Peace Treaty, SFM was assigned a new role, the verification of Egyptian and Israeli compliance with the force and armament limitations specified in the Treaty for controlled areas in the western Sinai. The verifications involved on-site inspections of units and facilities scattered

over a 15,000 square mile area of the Sinai. During this period, SFM personnel earned the respect and confidence of both the Egyptians and the Israelis because of their expertise, professionalism, and impartiality.

In addition to these most important contributions to keeping the peace, the Sinai Support Mission rendered noteworthy assistance in the creation of its successor organization, the Multinational Force and Observers, which assumed Sinai peacekeeping responsibilities on April 25, 1982. The speed with which the MFO was created and made operational would have been hard to achieve without the expertise and cooperation of the Sinai Support Mission.

To all those who served in the Sinai Support and Field Missions, let me say, congratulations for a job well done. You have set a high standard for peacekeeping operations and made an important contribution on behalf of the United States to the cause of peace in the Middle East.

RONALD REAGAN.

HENRY FONDA—ONE OF THE MOST AUTHENTIC AMERICANS

Mr. KENNEDY. Mr. President, today is a time to mourn the passing of Henry Fonda, who was one of the most authentic Americans of all time. From "Young Mr. Lincoln" to "Mr. Roberts" to "On Golden Pond," he gave us extraordinary gifts of performance which reflect some of the greatest and most decent qualities of our country. In the characters he portrayed he helped to show us the essence of our national character.

For me, his presence brought the joy of friendship, and his loss is a deeply personal one. He was anything but a fair weather friend. In the hardest days of the 1980 campaign, Henry Fonda was always there, always ready to speak his mind, to offer his hand and his help. They say he died of heart failure, but I know this: All his life his great and generous heart never faltered or failed his friends. He was truly a man to share a hope with, the most caring and committed of allies to have, who made the happy times happier and the more difficult times more bearable.

The entire Kennedy family, which loved his movies long before we had the privilege of knowing him, joins me in expressing our sympathy to his wife Shirlee, his son Peter, his daughters Jane and Amy, his son-in-law Tom Hayden, and his grandchildren. We shall remember him, and we shall miss him now and always.

SOUTH BOSTON'S CHAMPIONSHIP SEASON

Mr. KENNEDY. Mr. President, for the first time in Babe Ruth baseball, a team from the city of Boston will be playing in the finals for the national championship. Last weekend, the South Boston team in the Babe Ruth League won the New England regional title and qualified for the 13-year-old

Babe Ruth world series that begins this weekend in Frederick, Md.

I take this opportunity to congratulate all the players on the team, their manager, and their coaches for the outstanding record they have compiled so far. The roster is Southies' newest honor roll:

1B Dominic Sulfar;
3B Keith Callow;
SS Dan Suplee;
1B Robert McGarrell;
OF Greg Yanovitch;
2B Edward Yalmokas;
OF Mike Burke;
3B John Gwynn;
SS Steve McKenna;
2B Tony Galvin;
OF Matt Mullen;
2B Mike Turner;
OF Paul Joseph;
OF Paul Walsh;
C Mike Doyle;
Manager George Feeley;
Coach Mal Hornsby; and
Coach Jim Greene.

I also congratulate the parents and families of the team, who have been such wonderful and supportive fans. All of Boston will be rooting for the team in the coming days. But win or lose, their sportsmanship, commitment, and come-from-behind tradition have already proved that they know how to play the game.

I ask unanimous consent that articles on the team from today's Boston Globe and South Boston Tribune may be printed at this point in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Boston Globe Aug. 12, 1982]

IN SOUTHIE, A REASON TO CHEER
(By Will McDonough)

In some ways, the scene is so familiar. The school bus carrying the youngsters stops at Columbia Circle on the edge of South Boston and waits for an escort.

Then it moves slowly up the Strandway, passing Carson Beach, McNary Field and the G Street hill, all of which had been pictured in the papers and on television in a bad light in recent years.

But instead of standing there staring grimly or hurling objects at the bus, the locals are jumping for joy, running out of their houses, leaping from the barstools at the L Street Tap or Flanagan's Lighthouse and dancing delightedly on the sidewalks.

"I think, more than anything else, this has brought Southie closer together than anything in a long time," says George Feeley, head coach of the South Boston 13-year-old Babe Ruth All-Star team, which heads to Frederick, Md., today to play for the national championship.

"In the past couple of weeks, everyone has put busing and Proposition 2½ and all of the other problems people have to deal with over here aside, and just gone crazy cheering for these kids. We in the town call them the Second Coming of the Bad News Bears."

Last Friday night in Cranston, R.I., the South Boston team characteristically refused to surrender and captured the New England championship by beating the home club in the finale.

"We had more people from Southie in Cranston watching the game and giving our kids standing ovations at the end of every inning than they had people from Cranston," says Feeley. What happened was that after being confronted by controversy for so long, the people of South Boston found something that could unite them in happiness, the way it was in the old days when they derived great pleasure from their high school teams . . . teams that vanished with busing, desegregation and Judge W. Arthur Garrity.

In this group of 15 youngsters, they rediscovered what they felt their community had always represented. Grit. The ability to bounce back. The courage to hang together in the face of heavy odds and still manage somehow to win.

This is a team that, due to 2½ and other budget cuts, played its regular-season games on a field that looks shabby compared to the others it visited in winning 13 of 15 playoff games.

"The managers in the league have to maintain the field because the city won't," Feeley says. Feeley and his fellow coaches, such as Jim Greene and Mel Hornsby, work on the fields on Saturday mornings. They keep the equipment in their cars because the city doesn't provide a place to store it.

During the playoffs, the Southie kids rode to the sites of the games in cars. "One night I had nine kids and the equipment in my two-door Chevy Nova," says Feeley. "We had to play some games at 5 o'clock, and the parents wouldn't be home from work yet, so we had to go around bumming rides from people on the street, and they came across for us."

Other teams in the playoffs drove to the games in air-conditioned buses, and their uniforms matched from head to toe. The Southie kids had caps and shirts that matched—the rest was mixed.

"We didn't look pretty but we got the job done," says Feeley. "Of the 13 games we won, we won eight of them by one run. In almost every game we played, we were behind. This team loved to play from behind. We didn't know what to do if we had the lead. Four times we were behind by four runs in the late innings and we came back to win." In its third game of the local regional, Southie fell behind by four to West Roxbury in the last inning, and elimination seemed imminent. Thinking the game was gone, but not telling the kids, Feeley put in five subs, and they came up with five runs in their last at-bat to keep the team alive.

Now Southie has become the first team from the City of Boston ever to qualify for a national final in baseball. That's a remarkable achievement, considering that, for the most part, baseball is dying within the city due to lack of money.

As a bonus, these kids have received honors that people from Southie don't expect and really don't know whether they want. "We were honored by Mayor White with a proclamation," says Feeley. "We accepted, and the kids were happy, even though the mayor isn't that popular. Then Tuesday night, I'm sitting at home and the phone rings. My wife answers it, and the voice on the other end says Senator Kennedy wants to talk with me."

"I think someone is pulling my leg," continues Feeley, "but when I get on, it is him. He is very nice. He says his house is not that far from Frederick, Md., and if we get a chance when we are at the nationals to bring all the kids over for a swim in the pool."

Because of his stand on the busing issue, Ted Kennedy is not big in Southie. But the parents, in a quick poll, voted to accept his offer.

The feeling is that these kids aren't old enough to truly understand the ramifications of busing or Proposition 2½. They have never flown in a plane before, and the prospect of being airborne intimidates some of them. Many of them have never worn a suit coat and tie before, which is why they have been scrambling around to cousins and neighbors, trying to acquire a wardrobe.

These kids are throwbacks in sneakers and T-shirts who preferred swimming at L Street to practicing. They didn't care if the other guys came in the air-conditioned buses, wore nicer uniforms and went through fancy drills in the warmups.

Southie hit a paltry .235 in the finals. Its best pitcher came down with a sore arm. It never played a home game. And still it won 13 times, with a different kid getting the winning hit in every triumph.

"We would like to do well in the finals," says Feeley, "but it is not the most important thing. These kids are going down there to have fun and enjoy themselves. We want it that way. Most of them have enrolled in Catholic schools. None will go to the high school. As far as most people are concerned over here, there is no high school. So this is probably the last time they will ever play together. We want them to remember how much fun it was—for them and for of us."

[From the South Boston Tribune, Aug. 12, 1982]

GOOD LUCK BABE RUTH ALL STARS

BABE RUTH ALL STARS ADVANCE TO WORLD SERIES

The South Boston Babe Ruth League's Thirteen Year Old All Stars are for real. This past Friday evening the rookies defeated Cranston, Rhode Island 6-3, to take the Babe Ruth New England Championship. The kids will leave from Logan Airport this afternoon for Frederick, Maryland to represent New England in the Babe Ruth World Series. This is the first time a team from the City of Boston will have a chance to win the World Championship.

Other teams that will take part are Frederick, Maryland; Brooklyn, New York; Nashville, Tennessee; Glendale, California; Appleton, Wisconsin; Pine Bluff, Arkansas; Idaho Falls, Idaho; Jefferson, Missouri; and Southie. The local team will play its first game Sunday afternoon at 3:00 p.m. against Idaho Falls, Idaho. All of the games will be played at McCurdy Stadium in Frederick. This is a double elimination tournament.

In order to make it to the finals the kids defeated Cranston, R.I. 10-7; Portland, Maine 10-7 in ten innings and then met undefeated East Haven, Connecticut. East Haven was holding a 1-0 lead when Matt Mullen walked, Greg Yunovitch singled, Ed Yalmokas and Mike Doyle walked and Dom Sulfaro singled to make it 3-1. Dom Sulfaro led off the sixth with a single, was sacrificed to second by Callow and scored on a ground ball by Mike Burke to make it 4-1. East Haven scored a run in the sixth and two more in the seventh with two outs to tie the game. Mike Doyle led off the eighth with a walk, stole second and third and scored on a ground ball for a 5-4 lead. Pitcher Dan Suplee got the final three outs of the game, striking out the last two for the win.

On Friday night, the Southie team, needing just one more win for the championship, took on Cranston who had won the losers bracket defeating Manchester, New Hamp-

shire; Blackstone Valley, Rhode Island; Westfield, Ma.; and East Haven. Cranston took an early 4-0 lead after just two innings, but the locals scored single runs in the third, fourth, fifth, and sixth innings to tie it up. In the top of the seventh the Southie defense fell apart allowing Cranston to score four runs. The local lads answered with two of their own but fell short and lost 8-6. Hitting for Southie were Ed Yalmokas, Dom Sulfaro, Keith Callow, and Dan Suplee.

One half hour later both teams returned to the field for the final game. Mike Doyle's single in the first inning was the big hit as Southie took a 2-0 lead. Cranston answered with one of its own but hits from Steve McKenna, Greg Yanovitch, and Keith Callow scored four more runs for a 6-1 lead. Cranston came back with a run in the third and fourth innings but relief ace Dan Suplee gave up just two more hits over the last five innings as the Southie nine took the Championship game 6-3. The Southie kids have now won the Suffolk County-Norfolk County East District Championship, the Eastern Mass. State Championship and the New England Regional Championship and who knows what might happen in the World Series.

Members of the team include: Tony Galvin, Mike Doyle, Dan Suplee, Paul Walsh, Keith Callow, Matt Mullen, Steve McKenna, Greg Yanovitch, John Gwynn, Mike Burke, Dom Sulfaro, Mike Turner, Paul Joseph, Ed Yalmokas, Bob McGarrell, Coaches Jim Greene, Mel Hornsby and George Feeley. The members of the team would like to extend their gratitude to the following people; Sam Moran for the use of the lights to prepare for the night games, the family of Bob McGarrell for the use of their facilities for the party Sunday, to the crazy Southie fans who were "Voluntarily" bused to Cranston to watch the games, to the kids from Old Harbor for the banner, the Boston Fire Dept. for their reception upon returning from Cranston, and of course the parents.

ANNIVERSARY OF THE BERLIN WALL—THE COMMITMENT ENDURES

Mr. GLENN, Mr. President, 21 years ago today the Berlin wall was quickly erected by East Germany. The city of West Berlin had all previous ties to the West severed in a matter of days. Because of the West's steadfast commitment to keeping West Berlin free regardless of cost, West Berlin today remains an island of democracy in a sea of suppression.

Despite the difficulties of doing so, West Berlin freely accepts any citizen from any country of the world. The Soviet-dominated Government of East Berlin continues to pose difficulties for anyone desiring to enter or leave its borders.

The Berlin wall represents a very important symbol in East-West relations. For as long as the symbolism of East Berlin and West Berlin is alive, so too will the realities of division endure. As long as there is an East Berlin and a West Berlin, there can be no real world unity.

Nowhere else in the world do democracy and tyranny thrive so near to one another. Nowhere else in the world is it more clear how far East and West have to go to achieve peace and understanding.

Just as bridges must be built between West Berlin and East Berlin, so must bridges be built between the United States and the Soviet Union. With nation states growing ever closer in interactions and dependencies, the choice is to either foster this evolution or discourage it. The lessons from history are that the costs of isolationism and indifference are too great.

But that choice, Mr. President, is not ours to make. Those moves away from isolation and indifference to human hopes must come from the Soviet Union, for it is they who have built walls to keep their people in, and to foster even greater distrust in an era that demands more openness, sincerity, and honesty in world dealings.

On this anniversary of the Berlin wall, let us renew the commitment of the United States to tearing down those barriers that exist between East and West. Let us reaffirm our intent to pursue world peace and understanding through more contact, not less.

If we truly live in an enlightened time, then may we mutually respect the right of persons to freely determine their own destiny—without walls of political repression.

SKILLED LABOR CRISIS VIII— INTERNATIONAL HIGH-TECH COMPETITION AND ENGINEERING SHORTAGES

Mr. BENTSEN. Mr. President, this is the eighth in a series of speeches I am devoting to the widening gap in our Nation between labor skills being demanded by employers and those skills possessed by men, women, and youths. My previous speech in this series—delivered last December—focused on the generic issue of robotics. It noted that as many as 1 million assembly line jobs could be permanently lost to the wave of robots expected to flood our factory floors during this decade. Other estimates run even higher.

The impact of automation and unemployment is a recurring theme, with its roots stretching back to Ned Ludd in 18th century Leicester. Those historians among us will recall the most pronounced manifestation of that theme when upward of 1,000 early textile mills were damaged by rampaging English workmen, justifiably fearful of skill obsolescence and technological unemployment. These Luddites gave vent to a frustration and fear that has been little recognized and certainly not addressed in the public policy of our Nation. That omission is curious because many of our ancestors were motivated to courageously join this great American adventure in the 18th,

19th, and 20th centuries because their agrarian skills did not match those demanded by firms in their homeland increasingly relying on steam and water to power assembly lines.

The robotics revolution is the tip of what may become the most pronounced economic issue of this decade: Rising technological unemployment side by side with labor shortages. For, while robotics and automation generally destroy jobs, they create new ones, as well. Indeed, the history of economic growth here and abroad is one of job and skill obsolescence matched eventually by the creation of even more, higher paying jobs as the emerging technology is harnessed to yield new consumer goods and services.

Training for these new jobs outside the classroom has historically been provided by the private sector and represents a substantial portion of the \$30 billion or more spent on skill development by that sector. In light of the Nation's virtually nonexistent public mechanism for retraining experienced workers with obsolete skills, every Member of this body should hope that this historical pattern repeats itself in the case of the robotic and electronic revolution sweeping through our plants, factories, and banks. For that revolution is certainly going to cost us millions of current jobs.

I, for one, Mr. President, am not totally satisfied to leave the creation of millions of new jobs for these displaced men and women to the occasionally slow workings of the market process alone. We must reinforce that process with positive efforts to retrain experienced displaced workers, and thereby avoid compounding the human tragedies of unemployment with the loss of scarce and valuable labor talent and skills needed to fully utilize our economic resources.

I will return, Mr. President, to the theme of updating experienced worker skills in my next speech. You will recall, however, that I introduced legislation—S. 2476, the Skilled Labor Training Act—on May 4, designed to deal with this major problem.

In my speech today, I look at the flip side of the unemployment-and-skill-shortage coin in reviewing the shortage of engineers—key factors in the emerging electronic and computer technologies. Those shortages are opportunities, of course, opportunities to minimize or even prevent substantial technological unemployment if displaced workers can acquire the technical skills increasingly in short supply.

In several of my earlier speeches in this series, I explored some areas, such as computer occupations, where these opportunities exist. And, I believe our Nation is best served by a national labor policy designed to exploit these opportunities and encourage the re-

training of displaced workers, as the Japanese and German Governments do, in short-handed skills.

But retraining is just part of the answer to our skilled labor shortage. Another aspect is to insure that our schools and colleges are providing the type skills to youths which will be in demand. It is far from clear that this elementary objective is being met today. It is unequivocally not being met in the area of engineering education.

HIGH-TECHNOLOGY COMPETITION

In my last speech, I mentioned the confluence of currents which will result in an unprecedented surge of Japanese high-technology goods this decade to world markets. The uniquely labor—and knowledge—intensive character of high-tech goods is particularly suited to the Japanese national resource mix. And the chronic and persistent need for that nation, poor in natural resources, to achieve balance-of-payment surpluses provides more than sufficient incentive for a sharp and robust national focus there on the export of high-tech goods. That focus will only sharpen in the future because such goods represent the most striking worldwide potential growth market—the clearest target for any nation seeking to maximize opportunities for real income growth through exports.

American firms face major and serious competition at home and abroad in dealing with the relentless Japanese drive to export. Fully one-half of our radios and recording equipment now comes from Japan; 25 percent of our autos, cameras, and TV's come from there.

Even more alarming for American firms and their workers dependent on exports are two other fundamental factors at work in the Western Pacific littoral.

Japanese firms long ago shook off the image of clever imitators. In industry after industry, they have applied the fruits of intensive and original innovation and R. & D. to become world leaders and carve out new markets. This innovative surge is reflected in the fact that domestic patent applications in Japan exceeded domestic applications in the United States as early as 1968. Domestic Japanese applications doubled in the following decade, even while applications here and in West Germany—the other leading technical R. & D. nation—stagnated. And, from 1966 to 1976, Japanese patent applications filed in the United States soared 600 percent, while applications from British firms, by way of comparison, actually slumped 40 percent.

During the 1970's, the terms of technology trade in Japan were sharply reversed: Technology imports rose slightly less than 11 percent, while ex-

ports jumped an astounding 140 percent. Companies on the first Tokyo Stock Exchange, in numbers reported by Dr. Gene Gregory of Tokyo's Sophia University, earned some \$425 million from technology process exports over that period, versus \$350 million they paid abroad for technology process imports. The short of it, Mr. President, is that we will be facing even higher quality and innovative high-technology exports from Japan as this decade unfolds.

The second phenomena posing dangers for the U.S. competitive position worldwide in the technology goods is the feverish activity in Hong Kong, Singapore, South Korea, and Taiwan to capture export markets. Many electronic firms in these nations are on the verge of moving from the initiator to the innovator stage themselves in a pattern destined to threaten Japanese ascendancy in many electronic commodity markets. That competition will spill over and exacerbate the diminished American potency in high-technology commodities. I do not suppose we need to concern ourselves with the importation of Korean autos, but when Japanese aluminum firms begin shutting capacity under a flood of cheaper Korean products, can electronic products be far behind? The danger is very real that American firms will soon be facing Japanese-quality products produced in nations like Korea and Taiwan by both native and Japanese-owned firms using labor paid one-fifth what Japanese workers earn and only one-tenth what U.S. workers earn.

In not too many years, we may be fondly gazing back at the early 1980's when only the Japanese offered us competition in the rich world market for 64K RAM systems, biotech monitoring devices and other high-tech goods.

AN IMPROVED COMPETITIVE BASE

I have no doubt that we are capable of gearing up to compete well with any foreign producer of high-technology hardware. To match that capability with deed is something else. It will require a notable shift in the way corporations utilize labor with technical knowledge and skills. Engineers must be brought into the mainstream of corporate policy decisions. Those decisions should become more driven by the technical avenues of new products opened up by engineers, rather than solely by efforts to squeeze technical advances to fit the mold of existing products and markets. In addition, American firms must pay more attention to longer term research and marketing factors capable of influencing their economic health well into the future, and not be blinded by the next quarter's earnings per share.

The public sector has a role to play in promoting American competitiveness in high technology, as well. That

role has both a macroeconomic and a microeconomic character. The present blend of tight money and excessive deficits has resulted in a recession and a halting recovery which will feature rising Government spending, not rising investment. That pattern must be reversed. A national economic policy featuring lower interest rates must be pursued in order to facilitate the flow of affordable resources into those sectors like electronics where the jobs of tomorrow will be created. The failure of Washington to deliver on its promise of lower interest rates and to create an environment conducive to greater investment threatens not only future unemployment, but the loss of what competitive edge our high-tech firms have today in world markets.

At the microeconomic level, I believe that public policy here—as it does in Japan and Germany—should be designed to reduce roadblocks and widen bottlenecks which unduly limit the ability of domestic firms to innovate and maintain a fair competitive situation. Perhaps the most glaring example of such a bottleneck currently is in electrical engineering education. Such education is one of the cornerstones of America's hopes for rising productivity and the preservation of our market shares around the world in the high-tech products of the future. Yet, as a nation, we are not providing a sufficiently large cadre of trained engineers to meet the demands of the labor market.

Typically, any such situation should be short lived. Rising wages would attract ambitious students to engineering curriculums and the market shortage would eventually be resolved. And, up to a point, that is precisely what has happened. The surge in demand for electrical engineers has indeed pushed wages up notably. College students are flocking to engineering courses.

ENGINEERING SHORTAGES

But there the textbook description of a labor market in operation ceases. Our engineering schools have become a bottleneck because they cannot enlarge enrollments to meet this surging demand. They cannot compete with the wage offers of private industry for aspiring young professors or increasingly even for senior ones. And therein lies the difficulty. Aspiring would-be engineers are not able to find spaces at our engineering schools and colleges, and we are consequently producing far fewer engineers than we should because we do not have the faculty to train them.

An international comparison is useful here. Japan—a nation with one-half the population of our own country—graduated 18,700 electrical engineers at the bachelor-degree level in 1980 versus only 14,600 here. They also awarded 7,000 more engineering

degrees of all types in 1980 than we did.

As a consequence of this education bottleneck, various industry groups, including the American Electronics Association, are projecting enormous gaps between demand and supply in engineering. For example, an AEA member survey identified an annual demand for 50,000 new electrical engineers by 1985—over three times the number we now graduate yearly. Including computer experts and other skilled professional occupations, those firms expect to be creating a total of 113,000 new jobs annually by then. The National Science Foundation recently forecasted a 47-percent shortage of industrial engineers, as well, in this decade.

The inability of colleges and universities to compete successfully for faculty with private industry is even more pronounced in the computer area. Some computer science faculties are only half filled. The identical problem exists in mathematics, as well, where industry is reaching even into high schools and elementary schools for mathematicians.

The heart of the problem in each case is that professionals holding graduate degrees cannot be recruited by schools to meet the surging demand of students for classroom slots. Over 10 percent of all authorized and funded faculty positions in engineering are vacant now. In Texas alone, according to a 1981 report to its commission on higher education, the 10 public and 5 private engineering schools had a total engineering faculty shortage of 130 slots. Nationally, some 2,000 faculty slots sit empty. And those 2,000 empty engineering faculty positions could swell to 7,000 by 1990 through retirements and the further loss of teachers to private enterprise.

These engineering faculty vacancies are widespread. A partial listing includes:

- University of Colorado: 15 vacant slots out of 157 positions.
- Iowa State: 24 vacant out of 275.
- University of Minnesota: 20 vacant out of 174.
- Oregon State: 9 vacant out of 88.
- Penn State: 30 vacant out of 248.
- University of Rhode Island: 12 vacant out of 71.
- University of Wyoming: 8 vacant out of 75.

The dangers posed by these faculty shortages and the lid they place on our supply of engineers can scarcely be exaggerated. Yet, these dangers will multiply because the pipeline of new prospective engineering faculty members is leaking badly. The same forces moving to limit the movement to education from private industry are at work on prospective graduate students, as well.

DECLINING GRADUATE STUDENT POOL

The national pool of graduate degree engineers, especially Ph. D.'s, are the source of replenishment for dwindling faculties. But American bachelor degree engineers are not continuing on to graduate school in search of Ph. D.'s. The decline is dramatic. In 1971, some 2,900 Ph. D.'s in engineering were awarded to U.S. nationals compared to only 1,800 in 1980—a 30-percent decline. In fact, we are awarding fewer new engineering Ph. D.'s to American citizens than at any time since 1964. Let me hasten to note, Mr. President, that our engineering graduate schools are not empty. For example, in 1980, about 1,000 Ph. D.'s were awarded to foreign nationals in addition to the 1,800 awarded U.S. citizens. Most of these foreign students promptly return home, however, and they take graduate slots which would sit vacant otherwise, unwanted by U.S. students.

In addition, the share of new Ph. D. students going into teaching is dwindling. For example, one-half of Stanford's engineering Ph. D.'s went into teaching in 1971; only 24 percent did so in 1980. The brain drain from graduate engineering programs is at least matched by the drain of prospective faculty from computer science graduate programs. In Texas, for example, 256 Ph. D. degrees in computer science were awarded in 1975 while only 200 were awarded in 1980. That 200 represents only one-third the number needed to fill computer science faculty positions. Even so, only one-half of these new Ph. D.'s entered teaching, producing only one-sixth the number of teachers needed for college computer science courses.

EQUIPMENT SHORTAGES

Engineering schools are having a difficult time dealing with the tidal wave of would-be engineers for reasons other than shrinking faculty. Foremost among these other limiting variables is the inadequate number and dismal condition of equipment used in the science classroom. Because of rapidly evolving technology, equipment becomes obsolete in about 7 years now, and the pace is accelerating. Yet, few engineering schools are blessed even with an adequate quantity of equipment for use in labs and classrooms much less with up-to-date equipment. As Federal support for research eased in the 1970's, engineering schools diverted funds from equipment purchase to subsidize graduate students and research assistants. The result, as the Engineering Education News reported in June, is that the average piece of engineering teaching equipment in use today is about 20 years old.

A similar survey last year by the Association of American Universities found that university research equipment is twice as old as that used in industry. The Wall Street Journal sur-

veyed our engineering schools this spring and termed the state of teaching equipment there a national disgrace, with most of it actually predating the computer era. Schools face enormous hurdles in merely stocking existing classrooms with contemporary equipment, much less in meeting the burgeoning demand for new undergraduate slots—a demand suppressed for the moment by limited faculty.

The magnitude of the equipment shortage can be gaged in several ways. For example, a recent National Science Foundation survey found that equipment needs are so pervasive in engineering schools that only one-fifth of their existing equipment will be replaced by engineering researchers over the next 5 years.

The Texas Society of Professional Engineers estimated recently that just nine public engineering schools in Texas had a critical need for \$36 million to modernize campus engineering equipment. And, a total of \$98 million was projected to be needed to replace hardware because of technical obsolescence at these institutions. That projection confirms similar estimates made in October 1981 by Prof. R. H. Page, dean of engineering at Texas A&M University. Dean Page projected that equipment replacement costs statewide would total \$88 million comparable to \$17,400 for each of the engineering bachelor degrees awarded in 1980-81.

The American Electronics Association gathered data this past June from a number of engineering schools on equipment needs while surveying faculty shortages. This survey found that these amounts were needed merely to update existing equipment:

University of Colorado: \$4 million.
University of Idaho: \$2 million
Iowa State University: \$5.1 million over the next 5 years.
University of Kansas: \$1.5 million.
University of Minnesota: \$2.75 million.
Oregon State University: \$750,000.
Portland State: \$1.35 million.
University of Rhode Island: \$1 million.
University of Wyoming: \$3.3 million.

It will be a major task for these schools to meet their equipment needs. And, to expand equipment in order to digest additional students poses simply unsurmountable hurdles for these schools, which typically have annual equipment acquisition budgets of \$40,000 to \$50,000. For example, to meet increased student demand just for undergraduate mechanical and electrical engineering and for computer courses, the Iowa State engineering school estimates it alone would need \$22.1 million in new equipment.

Nationally, the National Science Foundation's Deputy Director, Donald Langenberg, projected that engineering equipment replacement costs exceed \$1 billion now and could be as much as \$4 billion. Indeed, so critical

is the problem that the NSF intends to boost funding to universities for engineering equipment by 23.5 percent in fiscal year 1983, while its overall budget will rise at the far smaller rate of 7.7 percent. Independent and more detailed calculations by Dean Page confirm the \$1 billion figure.

REMEDIES

It would be convenient for Congress to focus just on engineering in designing public policy to deal with our critical skills shortages. But, the problem is far broader and more pervasive than that. And, I will be reviewing broader policy prescriptions in my next speech. Yet, the pivotal role of engineering technologies in productivity growth, in the future competitiveness of American products here and abroad, and in the creation of new domestic employment opportunities generates a special sense of urgency. That urgency is redoubled by the reality that the faculty shortage in engineering will require years to ameliorate.

What are the options for widening the bottleneck in engineering education? In crafting an answer, it is instructive to recall that Japan experiences an excess demand for bachelor degree engineers, just as we do. And that excess demand is resolved in a uniquely Japanese fashion. Universities and firms there do not compete for graduate students and employees by bidding wages up. Instead, Japanese firms implicitly collude to hold all beginning wages low—at \$7,800 this year, for example. Japanese universities do not face the chore of having to compete in the marketplace for graduate students and faculty by outbidding private firms.

Policy prescriptions for the engineering shortage in the near term here must involve devices to enlarge engineering education opportunities by encouraging graduate degree engineers in private enterprise to teach part time and full time on a sabbatical basis. Such a system would act to stretch out the existing fixed supply of qualified engineers to meet some faculty requirements. And, a variety of specific tax and other devices can be designed to encourage such sharing, including tax credits for employers of those engineers who go on sabbatical to teach as proposed in my legislation, S. 2474, the Scientific Research and Education Act.

Longer term solutions to the engineering shortage must involve more enduring steps to assure a greater flow of graduate students, and to make engineering teaching a more rewarding profession. Encouraging grants by the private sector to supplement graduate student and faculty salaries, as proposed in that same bill, is one relatively cost-effective option.

A similar private-sector role exists, I believe, in ameliorating our billion-

dollar engineering equipment shortage. For example, I introduced S. 2475, the Scientific and Technical Equipment Act on May 4, which would expand the charitable tax deduction provision to include engineering teaching equipment donated to vocational secondary schools, and postsecondary colleges and universities.

Many other options exist, Mr. President, including all sorts of Federal subsidies and grant programs. A word of caution here though. I am convinced that the current budget crisis and the \$100 billion plus deficits stretching out years ahead preclude a massive new Federal initiative in this area. Yet, the urgency to address our engineering shortage is real, and cannot be ignored. Therefore, I favor and certainly encourage my colleagues here, Mr. President, to consider steps to mobilize private-sector resources to fill the engineering gap. Such steps would certainly yield results more cost-effectively than would Federal handouts, and would yield prompt results, as well.

In any case, it is important that the debate on our engineering shortage be joined now by Congress. It is the tip of the critical skills shortage, and a tip that must be dealt with now.

Mr. President, in my next speech in this series, I will review what I consider the most promising broad-based remedy outside the classroom for our critical skills shortage.

HOUSE VOTE ON THE NUCLEAR FREEZE

Mr. KENNEDY. Mr. President, last week the House of Representatives voted by the narrowest of margins against a nuclear freeze resolution based on the initiative which Senator MARK HATFIELD and I, and Representatives CONTE, MARKEY, and BINGHAM cosponsored in the Congress last March. All those who champion the freeze should be greatly encouraged by the 204-202 House vote. In the short span of 5 months, the leaders of this country have been awakened to the nationwide call for an end to the nuclear arms race.

The nuclear freeze movement came into existence only 2 years ago. From town hall meetings and city hall councils to this summer's nuclear freeze rally in New York, millions of people have already said no to the arms race and yes to a nuclear freeze. In November of this year, fully one quarter of the people will vote on nuclear freeze initiatives on their ballots; it will be an issue in States, the localities, and in every congressional race as well. They will remember those in Congress who are heeding their call for a mutual and verifiable nuclear weapons freeze as the first step toward reversing the nuclear arms race—and those who are not.

On August 11, the Boston Globe published an editorial describing the success represented by the House vote. In demonstrating such extraordinary support for the freeze, Members of the House are demanding an end to the nuclear arms race and a change in the attitude of the Reagan administration. As the Globe points out, the freeze movement is "telling the administration it had better be serious in its pursuit of an arms control agreement." I ask unanimous consent that the full text of this editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

KEEPING ARMS TALKS HONEST

Only in the narrowest sense could last week's rejection of the nuclear freeze petition by the U.S. House of Representatives be seen as a defeat for the arms control movement.

In the larger context, the preceding debate and the razor-thin margin show what remarkable progress has been made by freeze organizers in the past six months.

The House voted 204-202 for a substitute resolution backing the Reagan Administration's START approach to strategic arms talks in Geneva with the Soviet Union. But the central message is that three months before Election Day 1982 there is enormous nationwide interest in arms control—and widespread skepticism about the Administration's sincerity and effectiveness in pursuing that aim through START.

It would be mistake to view support for the freeze as an endorsement of any particular tactical strategy in the arms talks. What it is, in the view of many freeze proponents, is a vehicle to keep the Administration honest on arms control.

At a New Hampshire town meeting last winter, one supporter summed the freeze message in simple terms that still apply: "I support our government and I hate communism as much as anyone," he said. "I just want the government to work on this. I'm not able to sit down with the Russian leaders. All this vote is, is to ask our leaders to sit down with them and talk hard."

The freeze campaign began in a limited way two years ago, but as late as this past February its organizers were counting on a slow-and-steady effort that might take several years to reach national political prominence. Then suddenly the idea caught on.

Under normal circumstances, the fact that Geneva talks are under way could have been expected to deflate the movement, but that has not happened. Instead it is gaining force.

The Republicans paid a great compliment to the freeze movement last week. They sliced their victory as thin as they could, mustering an accordion-like majority so as to expose the minimum number of Republicans to the possibility of voter retribution in the fall.

The only New England legislator to vote against the freeze was David Emery who will challenge Senator George Mitchell for his seat this fall.

By placing arms control on the election agenda, the freeze is sending a message from the grass roots to two audiences.

It is telling the Administration it had better be serious in its pursuit of an arms control agreement. And it is telling legislators they had better do their homework on

national security or else face a grilling on the campaign trail by an aroused electorate.

As Harry Truman once explained about mules, before they'll do what you want, you first have to get their attention.

However Congress voted last week, the freeze is doing that.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Marks, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 10:47 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House disagrees to the amendment of the Senate to the bill (H.R. 6955) to provide for reconciliation pursuant to the first concurrent resolution on the budget for fiscal year 1983 (S. Con. Res. 92, Ninety-seventh Congress); agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints the following as managers of the conference on the part of the House: From the Committee on the Budget, for consideration of the entire House bill and Senate amendment: Mr. JONES of Oklahoma, Mr. PANETTA, Mr. GEPHARDT, Mr. LATTI, and Mr. FRENZEL, and as additional conferees from the Committee on the Budget, solely for consideration of title I of the House bill and title I of the Senate amendment: Mr. ASPIN, Mr. DONNELLY, and Mrs. MARTIN of Illinois. From the Committee on Agriculture, solely for consideration of title I of the House bill and title I of the Senate amendment: Mr. DE LA GARZA, Mr. FOLEY, Mr. BOWEN, Mr. RICHMOND, Mr. HARKIN, Mr. WAMPLER, Mr. FINDLEY (on all matters except as listed below), Mr. HAGEDORN (on all matters except as listed below), Mr. COLEMAN (in lieu of Mr. HAGEDORN) on sections 160-186 of the House bill and sections 101-150 of the Senate amendment, and Mr. THOMAS (in lieu of Mr. FINDLEY) on sections 101-130 of the House bill and section 151 of the Senate amendment. From the Committee on Foreign Affairs, solely for consideration of section 130 of the House bill and that portion of section

101 of the House bill which adds subparagraphs 201(d)(8)(D)(iii)-(v) to the Agricultural Act of 1949, as amended by the Agriculture and Food Act of 1981, and section 154 of the Senate amendment: Mr. ZABLOCKI, Mr. HAMILTON, Mr. BINGHAM, Mr. BROOMFIELD, and Mr. LAGOMARSINO. From the Committee on Banking, Finance and Urban Affairs, solely for consideration of title II of the House bill and title III of the Senate amendment: Mr. ST GERMAIN, Mr. GONZALEZ, Mr. ANNUNZIO, Mr. STANTON of Ohio, and Mr. WYLIE. From the Committee on Energy and Commerce, solely for consideration of sections 402 and 403 of the Senate amendment: Mr. DINGELL, Mr. WIRTH, Mr. FLORIO, Mr. BROYHILL, and Mr. LENT. From the Committee on Public Works and Transportation, solely for consideration of section 403 of the Senate amendment: Mr. ANDERSON, Mr. RAHALL, Mr. EDGAR, Mr. CLAUSEN, and Mr. SHUSTER. From the Committee on Post Office and Civil Service, solely for consideration of title III of the House bill and sections 601-604 and 606-610 of the Senate amendment: Mr. FORD of Michigan, Mr. UDALL, Mr. CLAY, Mr. DERWINSKI, and Mr. TAYLOR. From the Committee on Government Operations, solely for consideration of sections 605 and 611 of the Senate amendment: Mr. BROOKS, Mr. JOHN L. BURTON, Mr. EVANS of Indiana, Mr. HORTON, and Mr. WALKER. From the Committee on Veterans' Affairs, solely for consideration of title IV of the House bill and sections 701-706 and 708 of the Senate amendment: Mr. MONTGOMERY, Mr. APPLIGATE, Mr. LEATH of Texas, Mr. HAMMERSCHMIDT, and Mr. WYLIE.

The message also announced that the Speaker has signed the following enrolled bill:

S. 1193. An act to authorize appropriations for fiscal years 1982 and 1983 for the Department of State, the International Communication Agency, and the Board for International Broadcasting, and for other purposes.

The enrolled bill was subsequently signed by the President pro tempore (Mr. THURMOND).

At 1:05 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the Speaker has signed the following enrolled joint resolution:

H.J. Res. 541. Joint resolution concerning the successful completion of the test flight phase of the Space Shuttle program.

The enrolled joint resolution was subsequently signed by the President pro tempore (Mr. THURMOND).

At 5:06 p.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the House disagrees to the amendments of the Senate to the bill (H.R. 6863) making supplemental appropriations

for the fiscal year ending September 30, 1982, and for other purposes; agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon; and appoints Mr. WHITTEN, Mr. BOLAND, Mr. NATCHER, Mr. SMITH of Iowa, Mr. ADDABBO, Mr. LONG of Maryland, Mr. YATES, Mr. ROYBAL, Mr. BEVILL, Mr. BENJAMIN, Mr. DIXON, Mr. FAZIO, Mr. CONTE, Mr. McDADE, Mr. EDWARDS of Oklahoma, Mr. MYERS, Mr. MILLER of Ohio, Mr. COUGHLIN, Mr. KEMP, and Mr. O'BRIEN as managers of the conference on the part of the House.

The message also announced that pursuant to the provisions of title 22, United States Code, section 276a-1, as amended by Public Law 95-45, the Speaker appoints as members of the delegation to attend the conference of the Interparliamentary Union to be held in Rome, Italy, September 14-22, 1982, the following Members on the part of the House: Mr. PEPPER, chairman, Mr. DERWINSKI, vice chairman, Mr. FOUNTAIN, Mr. PICKLE, Mr. DE LA GARZA, Mr. BOWEN, Mrs. BOGGS, Mr. WASHINGTON, Mr. BROOMFIELD, Mr. McCLOREY, Mr. STANTON, and Mr. BUTLER.

The message further announced that the House has passed the following bill, without amendment:

S. 2073. An act to repeal outdated size and weight limitations now imposed on the U.S. Postal Service.

The message also announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 5427. An act to provide for the broadcasting of accurate information to the people of Cuba, and for other purposes.

HOUSE BILLS REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 5427. An act to provide for the broadcasting of accurate information to the people of Cuba, and for other purposes; to the Committee on Foreign Relations.

H.R. 6128. An act to revise, codify, and enact, without substantive change certain general and public permanent laws, related to money and finance, as title 31, United States Code, "Money and Finance"; to the Committee on the Judiciary.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, August 12, 1982, he had presented to the President of the United States the following enrolled bill:

S. 1193. An act to authorize appropriations for fiscal years 1982 and 1983 for the Department of State, the International Communication Agency, and the Board for International Broadcasting, and for other purposes.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-4061. A communication from the Navy transmitting, pursuant to law, a publication entitled "Register of Commissioned and Warrant Officers of the United States Navy and Reserve Officers on Active Duty"; to the Committee on Armed Services.

EC-4062. A communication from the Acting Director of the Defense Security Assistance Agency transmitting, pursuant to law, a report on a foreign military sale to Turkey; to the Committee on Armed Services.

EC-4063. A communication from the General Counsel of the Federal Emergency Management Agency transmitting a draft of proposed legislation entitled "National Flood Insurance Act Amendments of 1982"; to the Committee on Banking, Housing, and Urban Affairs.

EC-4064. A communication from the Chairman of the Federal Home Loan Bank Board transmitting, pursuant to law, the annual report of the Depository Institutions Deregulation Committee for April 1, 1981, to March 31, 1982; to the Committee on Banking, Housing, and Urban Affairs.

EC-4065. A communication from the Chairman of the Nuclear Regulatory Commission transmitting, pursuant to law, a report on the non-disclosure of safeguards information by the Commission for the quarter ending June 30, 1982; to the Committee on Environment and Public Works.

EC-4066. A communication from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of an act of the Council D.C. ACT 4-238; to the Committee on Governmental Affairs.

EC-4067. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Updating Interest Rates Charged on Outstanding Civil Service Retirement Contributions Would Save Millions"; to the Committee on Governmental Affairs.

EC-4068. A communication from the General Counsel of the Occupational Safety and Health Review Commission transmitting, pursuant to law, a report on a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC-4069. A communication from the Secretary of the Aviation Hall of Fame, Inc. transmitting, pursuant to law, the Audit Report for calendar 1981 and a current list of officers and trustees; to the Committee on the Judiciary.

EC-4070. A communication from the Director of the Office of Management and Budget transmitting, pursuant to law, the cumulative report on rescissions and deferrals as of August 1, 1982; jointly, pursuant to the order of January 30, 1975, to the Committee on Appropriations, the Committee on the Budget, the Committee on Agriculture, Nutrition, and Forestry, the Committee on Commerce, Science, and Transportation, the Committee on Armed Services, the Committee on Labor and Human Resources, the Committee on Energy and Natural Resources, the Committee on Banking, Housing, and Urban Affairs, the Committee on the Judiciary, the Committee on Governmental Affairs, the Committee on

Environment and Public Works, the Committee on Veterans' Affairs, the Committee on Foreign Relations, the Committee on Finance, the Select Committee on Indian Affairs, and the Committee on Small Business.

EC-4071. A communication from the Principal Deputy Assistant Secretary of Defense (Comptroller) transmitting, pursuant to law, a report on the value of property, supplies, and commodities provided by the Berlin Magistrate, and under the German Offset Agreement for the quarter April 1 through June 30, 1982; to the Committee on Armed Services.

EC-4072. A communication from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting, pursuant to law, reports on studies with respect to converting certain functions at certain installations to contractor performance; to the Committee on Armed Services.

EC-4073. A communication from the Commissioner of Social Security, transmitting, pursuant to law, a report on a new matching program under the Privacy Act; to the Committee on the Governmental Affairs.

EC-4074. A communication from the Director of the Federal Emergency Management Agency, transmitting, pursuant to law, a report on a new Privacy Act system of records; to the Committee on the Governmental Affairs.

EC-4075. A communication from the Secretary of Education, transmitting, pursuant to law, final regulations for strengthening Research Library Resources Program; to the Committee on Labor and Human Resources.

EC-4076. A communication from the Director of ACTION, transmitting, pursuant to law, a copy of the final notice entitled "Young Volunteers in ACTION (YVA) Guidelines"; to the Committee on Labor and Human Resources.

EC-4077. A communication from the Director of the Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a required supplemental summary of the fiscal year 1983 budget; pursuant to the order of January 30, 1975, referred jointly to the Committee on the Budget and the Committee on Appropriations.

EC-4078. A communication from the President of the Federal Financing Bank, transmitting, pursuant to law, notice that the annual report of the Federal Financing Bank will be included in the appendix to the budget; to the Committee on Banking, Housing, and Urban Affairs.

EC-4079. A communication from the Deputy Secretary of Energy, transmitting, pursuant to law, notice of a delay in the submission of the Public Utility Regulatory Policy Act Annual Report; to the Committee on Energy and Natural Resources.

EC-4080. A communication from the Secretary of Agriculture, transmitting, pursuant to law, the annual report on Horse Protection for fiscal year 1981; to the Committee on Environment and Public Works.

EC-4081. A communication from the Secretary of Labor, transmitting, pursuant to law, the annual report on the administration of the responsibilities of the Department under the Employee Retirement Income Security Act (ERISA); to the Committee on Labor and Human Resources.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. DOLE, from the Committee on Finance:

Mary Ann Cohen, of California, to be a Judge of the United States Tax Court for a term expiring fifteen years after she takes office; and

Lapsley Walker Hamblen, Jr., of Virginia, to be a Judge of the United States Tax Court for a term expiring fifteen years after he takes office.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. GORTON (for himself, Mr. JACKSON, Mr. HATFIELD, Mr. BAUCUS, Mr. GARN and Mr. INOUE):

S. 2829. A bill granting the consent of Congress to the northwest interstate compact on low-level radioactive waste management; to the Committee on the Judiciary.

By Mr. PRESSLER:

S. 2830. A bill to provide primarily for the reduction of soil blowing; and to control snow deposition and conserve moisture; to protect crops, orchards, and livestock; to provide food and cover for wildlife; to conserve energy, to increase the natural beauty of the landscape; and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. HATFIELD:

S. 2831. A bill for the relief of Beatriz Sandoval; to the Committee on the Judiciary.

By Mr. HATFIELD:

S. 2832. A bill for the relief of Seyed Ebrahim Seyedrezaei and Zohreh Hakim-Davar; to the Committee on the Judiciary.

By Mr. HATFIELD:

S. 2833. A bill to designate Lincoln's Birthday as a legal public holiday and to provide that, for purposes of pay and leave, Federal Employees may select either Lincoln's Birthday or Washington's Birthday as a legal public holiday; to the Committee on the Judiciary.

By Mr. CHILES:

S. 2834. To amend title 10 of the United States Code to allow the Secretary concerned to take into consideration various factors in determining the amount of space in military medical facilities programed for retired members, their dependents and dependents of deceased members of the uniformed services; to the Committee on Armed Services.

By Mr. MURKOWSKI (for himself, Mr. STEVENS, Mr. BOREN and Mr. NICKLES):

S.J. Res. 230. A joint resolution to authorize and request the President to designate August 15, 1982 as "Will Rogers and Wiley Post day"; considered and passed.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTION

By Mr. GORTON (for himself, Mr. JACKSON, Mr. HATFIELD, Mr. BAUCUS, Mr. GARN, and Mr. INOUE):

S. 2829. A bill granting the consent of Congress to the Northwest Interstate Compact on Low-Level Radioactive Waste Management; to the Committee on the Judiciary.

INTERSTATE COMPACT ON LOW-LEVEL RADIOACTIVE WASTE MANAGEMENT

Mr. GORTON. Mr. President, the bill I am introducing today on my behalf and on behalf of Mr. JACKSON, Mr. HATFIELD, Mr. BAUCUS, Mr. GARN, and Mr. INOUE is a bill granting the consent of the Congress to the Northwest Interstate Compact on Low-Level Radioactive Waste Management. In 1980, the 96th Congress passed the Low-Level Radioactive Waste Policy Act, Public Law 96-573. In that law, Congress declared the policy of the Federal Government that each State be responsible for providing for the availability of capacity for the disposal of low-level radioactive waste generated within its borders. This capacity may exist either within or outside the State. The Congress also declared that low-level radioactive waste can be most safely and efficiently managed on a regional basis. Pursuant to this declared policy, Congress authorized States to enter into interstate compacts in order to provide for the establishment and operation of regional disposal facilities for low-level radioactive waste.

The bill which I now introduce is the compact which has been developed pursuant to the authority granted by Public Law 96-573 to develop regional compacts. It is the compact of the following States: Washington, Oregon, Idaho, Montana, Utah, Wyoming, Hawaii, and Alaska. It has been adopted by the legislative action of the States of Washington, Oregon, Idaho, and Utah. Legislative approval is pending in Hawaii. Executive order adopted in Montana anticipates legislative ratification in Montana.

Interstate compacts entered pursuant to the Low Level Radioactive Waste Policy Act of 1980 are required by that law to be consented to by the Congress. I introduce this bill in order to obtain that consent.

The issue of radioactive waste disposal is significant for persons residing in the State of Washington. This is so because of the existence of a large low-level radioactive waste disposal facility at the Hanford Nuclear Reservation near Richland, Wash.

Several years ago, the voters of the State of Washington passed Initiative 383. The purposes of that initiative were to cause Federal-State cooperation in the siting of low-level radioactive waste repositories, considering the interest of those residing close to those repositories, a recognition of the environmental and public health implications of radioactive waste disposal, and a Federal commitment to addressing the transportation of radioactive waste problem with regional responsibility for regionally generated radioactive waste.

The initiative was passed by a majority of over 73 percent of the State's electorate. Going under the banner

"Don't Waste Washington," the proponents argued that the State of Washington should not be responsible to all the other States in the Nation to provide a waste disposal facility for all their low-level radioactive waste. The initiative did not provide for, nor did its proponents advocate, a total exclusion of deposits of out-of-State nuclear waste within the State. Rather, the initiative asserted that management of low-level radioactive waste was safest and most efficient on a regional basis, a policy which is wholly consistent with the statement of Federal policy in Public Law 96-573.

I introduce this bill today at the request of Gov. John Spellman, Governor of the State of Washington. I do so because I feel that prompt congressional approval of this and other low-level radioactive waste interstate compacts is desirable. I am aware that other States and other regions are at this time at more developmental stages of establishing compacts than is the State of Washington or the Northwest region. I am also aware that informed action on the Northwest Interstate Compact on low-level radioactive waste management requires some knowledge of the extent to which this compact will interrelate with others, so as to accomplish some national efficiency and fairness in national low-level waste management policy. Nevertheless, introduction of this bill at this time serves to inform and speed development of other regional compacts and Congress consideration of them, rather than the contrary.

The bill which I introduce today does differ in one respect from that which I was requested to introduce by Governor Spellman. It is a change which I believe is essential to national acceptance of this compact. The Northwest Compact, as ratified by the several States, provides that party States must refuse to accept for disposal any low-level radioactive waste generated outside of the region, except as may be allowed by the Northwest Compact Committee, after July 1, 1983. Such a restriction is authorized by the Low Level Radioactive Waste Policy Act, Public Law 96-573, but may only become effective after January 1, 1986. Rather than propose congressional consent to the proposed effectiveness date of the exclusionary provision, section 3 of the bill I now offer ratifies the January 1, 1986, effectiveness date of Public Law 96-573.

Mr. President, this is an important issue for the citizens of the Northwest region of our country, and indeed for the entire country. I encourage the most prompt consideration of this bill.

Mr. President, I ask unanimous consent that a copy of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2829

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the consent of Congress is hereby given to the states of Alaska, Hawaii, Idaho, Montana, Oregon, Utah, Washington, and Wyoming to enter into the Northwest Interstate Compact on Low-level Radioactive Waste Management, and to each and every part and article thereof. Such compact reads substantially as follows:

"NORTHWEST INTERSTATE COMPACT ON LOW-LEVEL RADIOACTIVE WASTE MANAGEMENT"

"ARTICLE I—Policy and Purpose

"The party states recognize that low-level radioactive wastes are generated by essential activities and services that benefit the citizens of the states. It is further recognized that the protection of the health and safety of the citizens of the party states and the most economical management of low-level radioactive wastes can be accomplished through cooperation of the states in minimizing the amount of handling and transportation required to dispose of such wastes and through the cooperation of the states in providing facilities that serve the region. It is the policy of the party states to undertake the necessary cooperation to protect the health and safety of the citizens of the party states and to provide for the most economical management of low-level radioactive wastes on a continuing basis. It is the purpose of this compact to provide the means for such a cooperative effort among the party states so that the protection of the citizens of the states and the maintenance of the viability of the states' economies will be enhanced while sharing the responsibilities of radioactive low-level waste management.

"ARTICLE II—Definitions

"As used in this compact:

"(1) 'Facility' means any site, location, structure, or property used or to be used for the storage, treatment, or disposal of low-level waste, excluding federal waste facilities;

"(2) 'Low-level waste' means waste material which contains radioactive nuclides emitting primarily beta or gamma radiation, or both, in concentrations or quantities which exceed applicable federal or state standards for unrestricted release. Low-level waste does not include waste containing more than ten (10) nanocuries of transuranic contaminants per gram of material, nor spent reactor fuel, nor material classified as either high-level waste or waste which is unsuited for disposal by near-surface burial under any applicable federal regulation;

"(3) 'Generator' means any person, partnership, association, corporation, or any other entity whatsoever which, as a part of its activities, produces low-level radioactive waste;

"(4) 'Host state' means a state in which a facility is located.

"ARTICLE III—REGULATORY PRACTICES

"Each party state hereby agrees to adopt practices which will require low-level waste shipments originating within its borders and destined for a facility within another party state to conform to the applicable packaging and transportation requirements and regulations of the host state. Such practices shall include:

"(1) Maintaining an inventory of all generators within the state that have shipped or expect to ship low-level waste to facilities in another party state;

"(2) Periodic unannounced inspection of the premises of such generators and the waste management activities thereon;

"(3) Authorization of the containers in which such waste may be shipped, and a requirement that generators use only that type of container authorized by the state;

"(4) Assurance that inspections of the carriers which transport such waste are conducted by proper authorities, and appropriate enforcement action taken for violations;

"(5) After receiving notification from a host state that a generator within the party state is in violation of applicable packaging or transportation standards, the party state will take appropriate action to assure that such violations do not recur. Such action may include inspection of every individual low-level waste shipment by that generator.

"Each party state may impose fees upon generators and shippers to recover the cost of the inspections and other practices under this article. Nothing in this article shall be construed to limit any party state's authority to impose additional or more stringent standards on generators or carriers than those required under this article.

"ARTICLE IV—Regional Facilities

"(1) Facilities located in any party state, other than facilities established or maintained by individual low-level waste generators for the management of their own low-level waste, shall accept low-level waste generated in any party state if such waste has been packaged and transported according to applicable laws and regulations.

"(2) No facility located in any party state may accept low-level waste generated outside of the region comprised of the party states, except as provided in article V.

"(3) Until such time as paragraph (2) of article IV takes effect, facilities located in any party state may accept low-level waste generated outside of any of the party states only if such waste is accompanied by a certificate of compliance issued by an official of the state in which such waste shipment originated. Such certificate shall be in such form as may be required by the host state, and shall contain at least the following:

"(A) The generator's name and address;

"(B) A description of the contents of the low-level waste container;

"(C) A statement that the low-level waste being shipped has been inspected by the official who issued the certificate or by his agent or by a representative of the United States Nuclear Regulatory Commission, and found to have been packaged in compliance with applicable Federal regulations and such additional requirements as may be imposed by the host state;

"(D) A binding agreement by the state of origin to reimburse any party state for any liability or expense incurred as a result of an accidental release of such waste during shipment or after such waste reaches the facility.

"(4) Each party state shall cooperate with the other party states in determining the appropriate site of any facility that might be required within the region comprised of the party states, in order to maximize public health and safety while minimizing the use of any one (1) party state as the host of such facilities on a permanent basis. Each party state further agrees that decisions regarding low-level waste management facilities in their region will be reached through a good faith process which takes into account the burdens borne by each of the party states as well as the benefits each has received.

"(5) The party states recognize that the issue of hazardous chemical waste management is similar in many respects to that of low-level waste management. Therefore, in consideration of the State of Washington allowing access to its low-level waste disposal facility by generators in other party states, party states such as Oregon and Idaho which host hazardous chemical waste disposal facilities will allow access to such facilities by generators within other party states. Nothing in this compact shall be construed to prevent any party state from limiting the nature and type of hazardous chemical or low-level wastes to be accepted at facilities within its borders or from ordering the closure of such facilities, so long as such action by a host state is applied equally to all generators within the region comprised of the party states.

"(6) Any host state may establish a schedule of fees and requirements related to its facility, to assure that closure, perpetual care, and maintenance and contingency requirements are met, including adequate bonding.

"ARTICLE V—Northwest Low-Level Waste Compact Committee

"The governor of each party state shall designate one (1) official of that state as the person responsible for administration of this compact. The officials so designated shall together comprise the northwest low-level waste compact committee. The committee shall meet as required to consider matters arising under this compact. The parties shall inform the committee of existing regulations concerning low-level waste management in their states, and shall afford all parties a reasonable opportunity to review and comment upon any proposed modifications in such regulations. Notwithstanding any provision of article IV to the contrary, the committee may enter into arrangements with states, provinces, individual generators, or regional compact entities outside the region comprised of the party states for access to facilities on such terms and conditions as the committee may deem appropriate. However, it shall require a two-thirds (2/3) vote of all such members, including the affirmative vote of the member of any party state in which a facility affected by such arrangement is located, for the committee to enter into such arrangement.

ARTICLE VI—Eligible Parties and Effective Date

"(1) Each of the following states is eligible to become a party to this compact: Alaska, Hawaii, Idaho, Montana, Oregon, Utah, Washington, and Wyoming. As to any eligible party, this compact shall become effective upon enactment into law by that party, but it shall not become initially effective until enacted into law by two (2) states. Any party state may withdraw from this compact by enacting a statute repealing its approval.

"(2) After the compact has initially taken effect pursuant to paragraph (1) of this article, any eligible party state may become a party to this compact by the execution of an executive order by the governor of the state. Any state which becomes a party in this manner shall cease to be a party upon the final adjournment of the next general or regular session of its legislature or July 1, 1983, whichever occurs first, unless the compact has by then been enacted as a statute by that state.

"(3) Paragraph (2) of article IV of this compact shall take effect on July 1, 1983, if consent is given by Congress. As provided in

public law 96-573, Congress may withdraw its consent to the compact after every five (5) year period.

"ARTICLE VII—Severability

"If any provision of this compact, or its application to any person or circumstance, is held to be invalid, all other provisions of this compact, and the application of all of its provisions to all other persons and circumstances, shall remain valid; and to this end the provisions of this compact are severable."

Sec. 2. Congress finds that the compact consented to herein is in furtherance of the policy contained in section 4 (a) (1) of the Low-level Radioactive Waste Policy Act of 1980 and with the intent of Section 274 (b) of the Atomic Energy Act of 1954. In order that this compact may be given full effect, the Nuclear Regulatory Commission is authorized and directed to require licensees subject to its jurisdiction under the Atomic Energy Act of 1954 to comply with the provisions of this compact. The Commission shall consult and cooperate with the states which are parties to this compact in carrying out this section.

Sec. 3. The Consent of Congress granted pursuant to this act is limited by the following conditions:

a) Notwithstanding the provisions of Article V and Article VI, Paragraph (3) of the Northwest Interstate Compact on Low-Level Radioactive Waste Management, Article IV, paragraph (2) of that compact shall not take effect until January 1, 1986.

b) The right of Congress to alter, amend, or repeal this Act is hereby expressly reserved.

LOW-LEVEL RADIOACTIVE WASTE COMPACT

● Mr. HATFIELD. Mr. President, I am honored today in joining with my distinguished colleagues from the States of Washington, Montana, Utah, and Hawaii in cosponsoring the Northwest Interstate Compact on low-level radioactive waste management.

This legislation is very important to my State and to the other States that have either joined in the compact or are in the process of doing so. Public Law 96-573, passed by Congress in 1980, authorized States to organize in interstate compacts for the purpose of managing low-level radioactive wastes. The northwest region, including Oregon, Idaho, Washington, Utah, Montana, Wyoming, Alaska, and Hawaii, has formed the first such compact and has sent it to the Congress for ratification. The compact has been ratified by State legislatures in Oregon, Washington, Utah, and Idaho, and by executive order in the State of Montana.

Many schools and hospitals in Oregon produce low-level radioactive wastes that must be disposed. Oregon's only nuclear power generating facility, Trojan, located at Ranier, Ore., also produces quantities of low-level radioactive wastes that require special disposal. This compact, if ratified by Congress, will allow States, such as mine, to reach agreements on disposal of these wastes. In Oregon's case, an agreement to accept chemical wastes at the Arlington, Ore., site, from other States in exchange for the

acceptance of low-level radioactive wastes in other sites will be the result of passage of this important legislation.

Mr. President, it is my hope that the Senate can expeditiously move to consider this matter.●

● Mr. JACKSON. Mr. President, I join in the cosponsorship of this bill with Senator GORTON and others to approve the Northwest Interstate Compact on low-level radioactive waste management because the low-level radioactive waste disposal problem is in need of early resolution. I believe the problem must be dealt with by the States on a regional basis.

This was my position in 1979 when the comprehensive nuclear waste management bill, S. 685, was introduced with a title dealing with low-level radioactive waste. That title was inserted in the bill at my initiation because of my concern about finding a solution to the low-level radioactive waste management problem. In S. 2189, the later version of S. 685 which passed the Senate as the Comprehensive Nuclear Waste Policy Act, we provided in title VI for the development of a low-level radioactive waste disposal policy. When the House and the Senate were not able to arrive at a consensus on all facets of nuclear waste disposal in the waning days of the 96th Congress, we were able to provide, nevertheless, a clear policy for the disposal of low-level radioactive waste.

The Low-Level Radioactive Waste Policy Act, Public Law 96-573, made it national policy that the States were to assume the responsibility for disposal of low-level radioactive waste. To aid the States in this matter, the Congress proposed that regional interstate compacts be developed for disposal of the low-level radioactive waste from within the region and to deal with the disposal of any low-level waste shipped to a disposal site within the region from States not included in the regional compact.

States in the various regions of the country have moved to varying degrees toward establishment of regional affiliations for dealing with the low-level radioactive waste problem. The States of the Northwest which include Washington, Oregon, Idaho, Utah, Montana, Wyoming, Alaska, and Hawaii are the first to develop a formal compact which has been ratified by a number of the State legislatures and approved in other cases by executive order by the Governor. The Southeast States have also developed a compact which is in the process of being ratified by State legislatures, but it has not as yet been formally submitted to the Congress for its approval. It appears at this time that each State will be able to affiliate itself with one group of States in some region of the country for achieving

disposal of low-level radioactive waste generated within its borders. This regional approach is necessary because few States generate sufficient low-level waste to justify on an environmental or economic basis the opening of a separate site within each State for a disposal facility. At the present time, about six regionally located sites will meet the requirements of the Nation for disposal of low-level radioactive waste.

The Congress will have to review the Northwest Interstate Compact as to whether it is consistent with the provisions of Public Law 96-573, and may wish to compare this compact with regional compacts from other parts of the country to insure that a reasonable uniform approach is being achieved and that no State ends up being excluded from one of the regional compacts. Hopefully, we can achieve enactment of a law ratifying the regional compacts at an early date that no one State feels that it is becoming a regional disposal site for the low-level radioactive wastes from areas of the country far removed from its borders.

The State of Washington has cooperated in dealing with the current national problem in an exemplary fashion. It is time that we begin to develop regional disposal sites in other areas of the country so that the problems of low-level radioactive waste disposal of States far removed from the borders of the State of Washington are not visited upon it beyond the earliest possible time for other regions to solve their own low-level radioactive waste disposal problems.●

By Mr. PRESSLER:

S. 2830. A bill to provide primarily for the reduction of soil blowing; and to control snow deposition and conserve moisture; to protect crops, orchards, and livestock; to provide food and cover for wildlife; to conserve energy; to increase the natural beauty of the landscape; and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

SHELTERBELT ACT

Mr. PRESSLER. Mr. President, today I am introducing the Shelterbelt Act which I originally proposed in the House of Representatives and as an amendment to the 1981 farm bill. The amendment was included in the Senate version of the farm bill, but unfortunately, the provision was deleted in the conference committee.

The Shelterbelt Act would promote the preservation, restoration, improvement, and establishment of shelterbelts to reduce wind erosion and provide numerous additional benefits. Shelterbelts also provide protection for livestock, crops, and wildlife, as well as conserve energy. Many of our Nation's current shelterbelts were established under the planting programs of the 1930's and need to be restored

or replaced. For example, in South Dakota, three-fourths of our shelterbelts were planted between 1930 and 1965; only 10 percent were planted between 1965 and 1975. Also, many of the shelterbelts established during the 1930's have been destroyed, due to the economic pressure on farmers to farm all available land. It is important that the present shelterbelts be maintained and the destroyed shelterbelts be replaced.

The Shelterbelt Act of 1982 would provide farmers with assistance to establish and maintain shelterbelts. The establishment of shelterbelts is essential to preserving our Nation's agricultural productivity. Topsoil losses due to wind erosion in recent years have dramatically increased. If this trend is permitted to continue, the productivity of American farm land will decrease. A recent USDA study on soil erosion estimated that if current erosion rates continue, corn and soybean yields could be reduced by as much as 30 percent in the next 50 years as soil fertility declines. A loss of productive topsoil will reduce yields, increase consumer food prices and reduce the available grain for export.

With the current depressed farm economy, farmers cannot afford to take land out of production and invest to establish shelterbelts without some assistance. Farm income is at the lowest level since the 1930's, and farmers cannot afford to borrow money at the current high interest rates to plant trees. Shelterbelts are a long-term investment—it takes many years for the trees to reach maturity and provide protection for the topsoil. The shelterbelts must also be replaced and maintained if wind erosion is to be controlled. If farmers are to control wind erosion, they must be given some assistance to establish shelterbelts. This legislation would aid farmers in establishing shelterbelts.

This legislation would authorize the Secretary of Agriculture to enter into agreements with landowners and operators to establish and maintain shelterbelts in cooperation with the soil and water conservation district under the regulations prescribed by the Secretary. The agreement would be for a period of 5 years, in which, in return for establishing a shelterbelt and maintaining it within the prescribed regulations, the Secretary of Agriculture shall make an annual payment to the landowner or operator and bear such costs of establishing and maintaining shelterbelts as the Secretary determines appropriate.

Mr. President, I urge my colleagues to join me in supporting the Shelterbelt Act.

By Mr. HATFIELD:

S. 2833. A bill to designate Lincoln's Birthday as a legal public holiday and

to provide that, for purposes of pay and leave, Federal employees may select either Lincoln's Birthday or Washington's Birthday as a legal public holiday; to the Committee on the Judiciary.

LEGISLATION RELATING TO PUBLIC HOLIDAYS

● Mr. HATFIELD. Mr. President, a source of continuing wonder and awe that I feel for my country is its having been blessed with extraordinary men and women to lead it through formative times and times of crisis. Men like George Washington, Thomas Jefferson, Alexander Hamilton, the Adams, Benjamin Franklin, and others, from the vantage point of the 20th century, have the appearance of being far larger than life. I sometimes find it difficult to picture them in the midst of the ordinary routine of daily life. They seem to have been individuals that lived, in some sense, at a higher plane of existence—with higher motives than those that motivate us, higher thoughts than those that clog our minds, and grander, more courageous deeds than those to which we even have the opportunity to aspire.

The man that stands above them all in my own mind is Abraham Lincoln. His wisdom, endurance, and sense of perspective never fail to amaze me as I read about his life. Is there anyone who has visited the monument in which his life is memorialized, the Lincoln Memorial, who has not felt the thrill of touching greatness when reading the Gettysburg Address or President Lincoln's Second Inaugural Address.

I say all this simply to bring the attention of the Senate to the obvious: Abraham Lincoln is a gigantic figure in American history. For this reason, today I am introducing a bill to provide for the celebration of President Lincoln's birth each year. This legislation would permit Federal employees to select either Lincoln's Birthday or President Washington's Birthday as a legal public holiday.

At present, we celebrate a President's Day on a date in February that changes each year. Since that date rarely falls on either of the former Presidents' birthdays, the significance of the celebrations have been diminished. The bill I am introducing would rectify that situation without adding any costs to the Federal budget. The same number of leave hours available to Federal employees in honor of the Presidents would be maintained, but those hours of leave would be divided between two different dates each year. I have hopes that such an arrangement would actually be of benefit to the Federal work force because of the fact that Federal offices would not be completely closed on those two days, while Federal employees would have a greater choice of days in which to take paid leave.

I am pleased to recognize the efforts of the distinguished Representative of the 12th District of Illinois in the House of Representatives, Hon. PAUL FINDLEY, who has introduced a companion measure, H.R. 6667, in the other body. The 12th district, which currently is privileged to be represented by Congressman FINDLEY, was also privileged to be represented by Congressman Abraham Lincoln in the 19th century. The bill we have introduced into our respective Chambers is a fitting tribute to one of America's greatest heroes.

I ask unanimous consent that the text of the bill be printed following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2833

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 6103(a) of title 5, United States Code, is amended by inserting "Lincoln's Birthday, February 12."

after

"New Year's Day, January 1."

(b) Section 6103 of title 5, United States Code, is amended by adding at the end the following new subsection:

"(d) For the purpose of statutes relating to pay and leave of employees—

"(1) each employee in each year may select either Washington's Birthday, the third Monday in February, or Lincoln's Birthday, February 12, as a legal public holiday; and

"(2) the day not selected under paragraph (1) shall not be considered to be a legal public holiday with respect to such employee in such year."

SEC. 2. This Act shall take effect January 1, 1983.●

By Mr. CHILES:

S. 2834. A bill to amend title 10 of the United States Code to allow the Secretary concerned to take into consideration various factors in determining the amount of space in military medical facilities programed for retired members, their dependents and dependents of deceased members of the uniformed services; to the Committee on Armed Services.

LEGISLATION ON SIZING MILITARY MEDICAL FACILITIES

● Mr. CHILES. Mr. President, over the past several years, the ability of our military hospital system to meet its obligations to serve the needs of eligible patients, has been reduced. I rise to offer legislation which will relieve this situation and right a wrong we have done to our retired military personnel.

Today, we in some parts of this country we face critical facility and personnel shortages, which have had the effect of driving up CHAMPUS costs as patients are forced to go outside for necessary medical services.

The General Accounting Office has reviewed this situation and completed

a study titled "Legislation on Sizing Military Medical Facilities Needed To Correct Improper Practices, Save Money, and Resolve Policy Conflicts." This report recommends that the criteria for planning the size of new military hospitals and clinics should be based on commonsense considerations of first, cost effectiveness; second, staff availability; third, realistic workload projections; and fourth, teaching and training requirements.

It is hard to believe, but today, only teaching and training requirements are considered. Law and regulation do not permit considerations of workload, or heaven forbid, cost effectiveness.

Two studies have been done to assess the cost of direct medical care by the military compared to the use of civilian facilities. The studies looked at the projected life-cycle costs over a 20-year period. The analyses showed that it is considerably less costly to the Federal Government to provide services in its own facilities rather than providing care through local civilian providers under CHAMPUS.

Mr. President, CHAMPUS costs are going through the roof. In an attempt to gain control of CHAMPUS, guidelines were issued to require "nonavailability" statements before inpatient care could be sought in civilian hospitals by beneficiaries living within 40 miles of a military hospital. This has not resulted in significant savings because no additional resources have been programed in the military's direct care system for additional workloads. Today, the CHAMPUS budget exceeds a billion dollars yearly, and will continue to rise, unless something sensible is done.

The major problem seems to be that the military is unable to consider projected workload for other than active duty personnel and their dependents. This despite the Defense Department's obligation to retired personnel and their dependents, who are becoming a large and fast growing segment of the population, and who are now being poorly served.

It is no wonder that the General Accounting Office recommends:

DOD should have the flexibility to add space in its plans for new or replacement medical facilities to treat retirees and dependents of retired and deceased members.

Mr. President, the House Armed Services Subcommittees on Military Installations, and Facilities and on Military Personnel and Compensation recently held hearings. The Acting Assistant Secretary of Defense for Health Affairs, Dr. John F. Beary III, testified that "efforts to provide cost effective medical care to the retirees and their dependents" could be hampered without remedial legislation. The Surgeon General of the Air Force, Lt. Gen. Paul W. Myers, testified that—

If medical treatment facilities were sized to provide care for the eligible beneficiary

population, the overall cost to the Government and to the beneficiary would be less.

The Surgeon General of the Navy, Vice Adm. J. William Cox, testified that he "fully endorsed a change in the sizing policy that would make military health care systems more cost effective." And the Deputy Surgeon General of the Army, Maj. Gen. Quinn H. Becker testified that—

We feel that inclusion of factors which will address mobilization capacity and care to retired and their dependents is appropriate and will result in adequately sized, cost-effective facilities that will respond positively to all aspects of the Army's medical mission.

Mr. President, the legislation I am introducing today will give the Defense Department the flexibility to size its facilities based on what is cost effective to the Federal Government. It will also recognize our obligation to treat our retired military personnel, their dependents, and the dependents of deceased military personnel with the same respect and care given to active duty personnel. We can do no more.

Mr. President, I ask unanimous consent that the bill be placed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2834

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1087 of title 10 of the United States Code is amended by striking out the second sentence and inserting in lieu thereof the following:

The amount of space so programed shall be limited to that amount determined by the Secretary concerned to be either (1) necessary to support teaching and training requirements in uniformed services facilities or (2) most cost effective to the federal government based on the results of a complete life-cycle cost analysis which considers all reasonable and available medical care treatment alternatives. Space so programed shall be further limited based on the best available projections of expected inpatient and outpatient workloads and based on the number of physicians and other medical personnel which the Secretary concerned determines can and will be made available to staff the facility.●

ADDITIONAL COSPONSORS

S. 1256

At the request of Mr. EXON, the name of the Senator from Mississippi (Mr. COCHRAN) was added as a cosponsor of S. 1256, a bill to regulate interstate commerce by protecting the rights of consumers, dealers, and end-users.

S. 2222

At the request of Mr. THURMOND, his name was added as a cosponsor of S. 2222, a bill to revise and reform the Immigration and Nationality Act, and for other purposes.

At the request of Mr. SIMPSON, the name of the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of S. 2222, *supra*.

S. 2585

At the request of Mr. CRANSTON, the names of the Senator from Wisconsin (Mr. KASTEN), the Senator from Indiana (Mr. LUGAR), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Alaska (Mr. MURKOWSKI), and the Senator from Georgia (Mr. MARTINGLY) were added as cosponsors of S. 2585, a bill to provide that the Armed Forces shall pay benefits to surviving spouses and dependent children of certain members of the Armed Forces who die from service-connected disabilities in the amounts that would have been provided under the Social Security Act for amendments made by the Omnibus Budget Reconciliation Act of 1981.

S. 2631

At the request of Mr. KASTEN, the name of the Senator from South Dakota (Mr. PRESSLER) was added as a cosponsor of S. 2631, a bill to regulate interstate commerce by providing for a uniform product liability law, and for other purposes.

S. 2648

At the request of Mr. PELL, the names of the Senator from Massachusetts (Mr. KENNEDY), the Senator from Michigan (Mr. RIEGLE), and the Senator from Maryland (Mr. SARBANES) were added as cosponsors of S. 2648, a bill to provide for the continuation of the national diffusion network.

S. 2676

At the request of Mr. DODD, the names of the Senator from North Carolina (Mr. HELMS), and the Senator from Ohio (Mr. METZENBAUM) were added as cosponsors of S. 2676, a bill to establish a national hostel system plan, and for other purposes.

S. 2702

At the request of Mr. ANDREWS, the name of the Senator from South Dakota (Mr. PRESSLER) was added as a cosponsor of S. 2702, a bill to amend section 8(a) of the Small Business Act to treat businesses owned by Indian tribes as socially and economically disadvantaged small business concerns.

S. 2806

At the request of Mr. HATFIELD, the names of the Senator from South Dakota (Mr. ABDNOR), the Senator from Utah (Mr. GARN), and the Senator from West Virginia (Mr. RANDOLPH) were added as cosponsors of S. 2806, a bill to restrict Federal funding of abortions.

S. 2807

At the request of Mr. ROBERT C. BYRD, the names of the Senator from Louisiana (Mr. LONG), and the Senator from Nebraska (Mr. EXON) were added as cosponsors of S. 2807, a bill to amend the Federal Reserve Act.

SENATE JOINT RESOLUTION 200

At the request of Mr. GLENN, the names of the Senator from Arizona (Mr. GOLDWATER), and the Senator from Maine (Mr. COHEN) were added as cosponsors of Senate Joint Resolution 200, a joint resolution to designate October 1982 as "National Car Care Month."

AMENDMENT NO. 2016

At the request of Mr. QUAYLE, the name of the Senator from Vermont (Mr. STAFFORD) was added as a cosponsor of amendment No. 2016 intended to be proposed to House Joint Resolution 520, a joint resolution to provide for a temporary increase in the public debt limit.

AMENDMENTS SUBMITTED FOR PRINTING

IMMIGRATION REFORM AND REVISION

AMENDMENT NO. 2021

(Ordered to be printed and to lie on the table.)

Mr. DOLE submitted an amendment intended to be proposed by him to the bill (S. 2222) to revise and reform the Immigration and Nationality Act, and for other purposes.

AMENDMENT NO. 2022

(Ordered to be printed and to lie on the table.)

Mr. TOWER (for himself and Mr. BENTSEN) submitted an amendment intended to be proposed by them to the bill S. 2222, *supra*.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BAKER. Mr. President. I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Thursday, August 12, at 10 a.m., to consider the nominations of Milton Masson and John Carter to be members of the Board of Directors of the U.S. Synthetic Fuels Corporation, and Oliver Richard to be a member of the Federal Energy Regulatory Commission.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON PUBLIC LANDS AND RESERVED WATER

Mr. BAKER. Mr. President. I ask unanimous consent that the Subcommittee on Public Lands and Reserved Water, of the Committee on Energy and Natural Resources, be authorized to meet during the session of the Senate on Thursday, August 12, at 2 p.m., to conduct a hearing to consider S. 2186 and S. 2710, bills dealing with Indiana wilderness.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SECURITY AND TERRORISM

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Subcommittee on Security and Terrorism, of the Committee on the Judiciary, be authorized to meet during the session of the Senate on Thursday, August 12, at 2 p.m., to consider the Levi guidelines.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON FORESTRY, WATER RESOURCES, AND ENVIRONMENT

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Subcommittee on Forestry, Water Resources, and Environment, of the Committee on Agriculture, Nutrition, and Forestry, be authorized to meet during the session of the Senate on Thursday, August 12, at 9:30 a.m., to consider S. 2805, a bill which would permit the Government to modify existing contracts for the sale of Federal timber.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

THE TAX CODE—FROM BIAS TO FAIRNESS

Mr. GRASSLEY. Mr. President, Dr. Paul Craig Roberts has written an article which I believe captures, in excellent perspective, the advantages of a flat-rate income tax, and the disadvantages of the present system. Dr. Roberts' article appeared in the Los Angeles Times last month, and today I ask that it be reprinted in the RECORD for the benefit of my colleagues.

Mr. President, this is one of several articles that I have put into the RECORD regarding tax reform. It is my hope that by the time hearings on the flat-rate tax are held this fall in the Finance Committee, my colleagues in the Senate will have had the benefit of a wide range of views and critiques on this issue.

At the same time, Mr. President, I again urge the Secretary of the Treasury, Donald Regan, and his able staff, to continue their study of the feasibility of low-rate, broad based alternative tax systems, in accordance with the bill I introduced, S. 2376, earlier this year.

It continues to be my belief that only thorough analysis and study, and a very broad understanding of the problems in the current tax system, can set us on our way toward desirable tax reform.

The article follows:

[From the Los Angeles Times, July 7, 1982]

IN BEHALF OF FAIRNESS, A FLAT-RATE TAX

(By Paul Craig Roberts)

Rarely do the left and the right agree on matters of taxation, but the recent spate of new bills introduced in Congress indicates a bipartisan convergence toward replacing the

existing income-tax structure with a flat-rate tax.

With support for the issue ranging from Sen. Bill Bradley of New Jersey on the Democratic left to Sen. Jesse Helms of North Carolina on the Republican right, there is wide room for agreement.

The current tax code is highly progressive and riddled with deductions and exemptions. The result is that some income is highly taxed and other income is not taxed at all. In fact, a large industry that is expert in shifting income from high-taxed to low-taxed areas has developed.

Even worse, under the current tax code it often pays for people in high brackets not to make profitable and productive investments that would increase both their taxable income and, through the higher employment that would result, the incomes of others. Instead, it pays for them to purchase tax shelters that lower the taxes on their existing income. There is something wrong with a tax system that lets people do better by minimizing their taxes than by maximizing their earnings. The rising rate of unemployment over the last decade is one of the costs of a tax system that encourages capital to move out of productive investments and into tax shelters.

A flat-rate tax would eliminate all deductions and exemptions, taxing all income at the same rate. And, since the tax base would be much larger, the tax rate would be much lower. A 13% flat-rate tax would raise the same revenues as the existing progressive income tax. Such a reasonable tax rate would encourage people to use their talents to maximize their taxable incomes rather than to avoid taxes.

Is a flat-rate tax fair? Definitely.

First, it treats all income the same, whereas the current tax system discriminates in favor of, and against, different sources of income. For example, there is nothing fair about taxing income from private pensions but not from Social Security pensions, or taxing income from saving accounts and investments at a higher rate than income from wages and salaries, or taxing wages from overtime higher than wages from a normal workweek. These are just a few of the many ways in which a progressive tax system discriminates against different sources of income.

Second, a flat-rate tax would treat all individuals and households the same, whereas the current tax system discriminates against individuals and households on the basis of marital status and the size of income. For example, the current tax system discriminates against married income-earners and against people who achieve financial success by requiring them to pay a disproportionate share of the tax burden. This is an anachronism at a time when all other forms of personal discrimination—race, sex and age—have been declared illegal.

Fairness is requiring a person or household with 10 times as much income to pay 10 times as much in taxes, which is what a flat rate tax does. No one has ever proved, nor can it be proved, that fairness is requiring a person with 10 times as much income to pay 20 times as much in taxes. The "ability to pay" argument in favor of soaking the rich does not claim that a progressive tax system is fair; it merely says that the rich can be treated unfairly because they are better able to afford it.

For most people, the gains and losses of the transition from the current tax system to a flat-rate system would balance out, leaving their average tax rate the same. For

example, homeowners would lose their mortgage-interest deduction but would be paying a comparable amount less in income taxes.

For the poor, who are already paying less than 13%, an income exclusion could be instituted to protect lower-income earners. The exclusion would introduce de facto progressivity into the system, and only taxpayers with above-median incomes would pay the full flat rate.

In addition to fairness, there are two important economic gains to be had from a flat-tax rate system:

All taxpayers would be allowed to keep a much larger percentage of all future income earned, whether from a raise or promotion, overtime or saving and investing.

Part of the tax burden would be shifted from currently taxed productive activities to activities that are now off the books in the underground economy. In addition, the tax burden would be shifted to capital that is currently employed in tax shelters, where it produces tax savings instead of taxable income. A low flat-rate tax would make shelters or off-the-books activities unprofitable and bring those activities and that capital back into the tax base.

That in itself would greatly improve the fairness of the tax system—for all of us.●

SEEING TOMORROW'S WORLD TODAY

● Mr. HATFIELD. Mr. President, last fall, I introduced S. 1771, the Global Resources, Environment, and Population Act of 1981, which is now pending before the Governmental Affairs Committee. Because I believe the current U.S. Government's global foresight capability—its ability to project and analyze long-range global resource, environment, and population trends—is grossly deficient, I am seeking through this legislation the establishment of an interagency Council on Global Resources, Environment, and Population to be chaired by the head of the President's Council on Environmental Quality.

Recently, in the July 29 issue of the *Christian Science Monitor*, Gov. Russell Peterson writes persuasively of the ever-more pressing need of the Federal Government to face up to its inadequate foresight capability. Dr. Peterson knows of what he speaks when he says that the "United States and its leaders are beset by crises which cannot be understood, much less resolved, without an adequate appreciation of their cause beyond our borders and their consequences beyond the next decade or even the next election." In addition to his career in private business, he has served as Governor of the State of Delaware, Chairman of the Council on Environmental Quality under Presidents Nixon and Ford, and Director of the Office of Technology Assessment. Today, he is president of the National Audubon Society and chairman of the Global Tomorrow Coalition.

Mr. President, I ask that the full text of Governor Peterson's article be printed in the *RECORD*.

The article follows:

[From the *Christian Science Monitor*, July 29, 1982]

SEEING TOMORROW'S WORLD TODAY

(By Russell W. Peterson)

In this day and age, it is inexcusable that the U.S. federal government does not have an organized and coordinated "foresight capability" to aid policymakers in understanding the global population, resource, and environmental trends that shape the world in which we exist.

The United States and its leaders are beset by crises which cannot be understood, much less resolved, without an appreciation of their causes beyond our borders and their consequences beyond the next decade or even the next election. Yet, if anything, since the "Global 2000 Report to the President" two years ago first documented the federal government's lack of foresight capability, the situation has deteriorated.

In its simplest terms, foresight capability is a matter of sound data, coordinated projections of global trends, analysis of their interactions, and informed policymaking. Based on the work of the 13 federal agencies and departments which went into the preparation of "Global 2000," the Council on Environmental Quality (CEQ) and the State Department concluded that "the executive agencies of the U.S. government are not now capable of presenting the President with internally consistent projections of world trends . . . for the next two decades."

Just what does this mean for U.S. policymaking? Misinformation and misperception.

For example, the health of the economy, at home and abroad, is currently the most politically pressing problem in the U.S. Yet at a time when our economic interdependence with other countries is greater than ever (the third world alone accounts for more than 25 percent of our overseas investment, more than 35 percent of our exports, and more than 45 percent of our imports), "Global 2000" found that the government's measure of worldwide economic health—GNP—is based on questionable assumptions. Among other things, federally used projections assumed major expansion in agricultural production as a result of stepped up fertilizer use. But they didn't consider possible changes in climate or explicit environmental impacts. They did assume unlimited water availability at constant real prices and no deterioration of the land resulting from urbanization.

I believe the government's lack of foresight capability exists at three levels—data analysis, projections coordination, and political commitment. And I am convinced that at every level we are witnessing serious setbacks. The quality of government data, particularly the already limited global data, is being undercut dramatically by budget reductions in federal resource agencies.

Efforts to ensure consistency of assumptions and data, which go into projections for different sectors, are almost impossible without clear coordination. The only existing mechanism for coordination, the Office of Management and Budget's Statistical Policy Branch, has been eliminated. Political commitment to calling attention to issues that look across jurisdictions and beyond elections is vital. But despite its theoretical potential, the administration's "Interagency Global Issues Working Group" chaired by CEQ has thus far failed to respond substantively to even the problems of technical coordination so basic to

providing useful foresight capability. I know of no instance in which the President personally has used his office to call attention to this problem.

Such setbacks are totally out of sync with growing public interest, both at home and abroad. Since the publication of "Global 2000," countries such as Japan, Canada and Mexico have begun their own Global 2000 inquiries. In the US, 56 separate organizations, including the National Audubon Society, the League of Women Voters, the Overseas Development Council, and the Planned Parenthood Federation of America, have joined together in the new Global Tomorrow Coalition to call attention precisely to the need for understanding global interdependence. Their initial action supported unanimously has been to call out for the creation in the Executive Office of the President of "an improved capacity to coordinate and analyze data collected by federal agencies and other pertinent sources on the long-term interactions of trends in population, resources, and environment—and their relationship to social and economic development."

Clearly, this is not a question of government "planning for the world." It is the question of whether the right hand of the government knows what the left is doing. That requires central coordination and communication, backed up by commitments to improve agency resources and educate officials on a regular basis. Congress has begun to explore the issue of foresight capability—reports on government computer projections are being prepared; House hearings have examined the problem conceptually; and three bills touch upon it legislatively.

In the Senate, S. 1771 includes among its requirements an interagency Council on Global Resources, Environment, and Population, to be chaired by CEQ and funded by the member departments. It would coordinate agencies' biennial production of long-term projections of global populations, resource, and environment trends; encourage their analysis, particularly in light of current policy; and report regularly to Congress on these efforts. The fact that this bill is authored by Sen. Mark Hatfield and co-sponsored by such senators as Charles Mathias, Slade Gorton, Alan Cranston, and Bill Bradley is proof of serious congressional concern about foresight capability.

The time for action is now. S. 1771 is pending before the Governmental Affairs Committee, chaired by Sen. William Roth whose experience with the problems and relations of federal, state and local governments should be helpful in focusing on the problems that permeate and plague the global community. The Governmental Affairs Committee should undertake during the summer the kind of critical debate this issue and this bill warrant.

Its goal should be Senate enactment of legislation on foresight capability in 1982, signaling to both the administration and the nation that we cannot afford even in an election year to lose sight of global population, resource, and environment trends and their impacts on social and economic factors.●

THE SUGAR LOAN PROGRAM

● Mr. INOUE. Mr. President, on Monday, August 9, Senator QUAYLE introduced an amendment, No. 2016, to the public debt limit bill, House Joint Resolution 520, which would reduce

the sugar loan program from 17 to 14 cents a pound.

Mr. President, never in the history of our Nation's agricultural programs has the Congress promised American farmers one support level when they planted a crop and then reduced it before they had a chance to harvest that crop. Not only does Senator QUAYLE seek to reduce the sugar price support level after American sugar farmers have planted their crops, he seeks to reduce the program by a whopping 18 percent.

Mr. President, less than 1 year ago the U.S. Senate voted against reducing the sugar support program from 18 cents to 16½ cents by a margin of two-to-one. Why the Senate should now cut the level agreed upon in conference from 17 cents to 14 cents defies understanding. To do so would clearly break faith with the American sugar producer. It would also benefit no one except for a few large corporations who want to buy sugar at what is currently a depressed price on the world market. As we all know, the so-called world market is a dumping ground for surplus sugar wherein the present price of 7 cents per pound is well below the actual cost of producing sugar.

In promoting his amendment, my colleague has seriously misstated the facts and misled other Senators. For example, Senator QUAYLE charges that the cost of the sugar program has "gotten completely out of line" and that it "has proven much more costly and inflationary than even its severest critics had anticipated." Nothing could be further from the truth. The sugar program has operated at no cost to the U.S. Government. Instead, it has provided the Treasury with several hundred million dollars in fees and duties levied on sugar imports.

The average price of raw sugar in New York, fee and duty paid, was 30.09 cents per pound in 1980 and 19.66 cents per pound in 1981. Using Senator QUAYLE's own assumption that a penny's change in the price of raw sugar makes a \$300 million difference in the cost to the consumer (which is not true), the American consumer should have saved \$3,129,000,000 on sugar and sugar-containing products last year as a result of the drop in the price of that commodity. This did not happen. In fact, the National Soft Drink Association's survey of sales in the soft drink industry, as reported in the Food Institute Weekly Digest of July 31, 1982, stated that the wholesale value of soft drinks rose some 13.2 percent (\$2,330,000,000) in 1981, on a volume increase of only 3.8 percent. We now find this \$20 billion soft drink industry, which recently came before this Congress to get a special exemption from the Antitrust Act for their bottlers, is back in an attempt to increase their profits even further at the expense of American

sugar growers and consumers. The actions of these industries and their supporters are shameful, as are their attempts to portray our hardworking and efficient domestic sugar industry as the beneficiary of an unwarranted windfall.

Senator QUAYLE asserts that the retail price of sugar in the United States is higher than any other country, except Japan and Denmark. This is also untrue, although I recognize that he may have based his statement on a source that was incorrect. The publication in question, *Foreign Agriculture* (December 1981), cited the retail price of sugar in Washington, D.C. at \$1.32 per kilogram when it was really half that amount. In the same vein, the city of New York's August 5 Department of Consumer Affairs Bulletin shows that the price of sugar in July is actually below last year's price for the same month.

Senator QUAYLE goes on to argue that the United States enjoys no comparative advantage in the production of sugar. He claims that cane sugar growers in a number of countries including Colombia, Peru, Kenya, and Australia, achieve much higher yields than those achieved in the continental United States. He further states that the yields in Peru and Colombia exceed those in Hawaii.

Mr. President, this just simply is not so. The July 1982 *Foreign Agricultural Circular*, published by the U.S. Department of Agriculture, summarizes sugar yields in metric tons per hectare. Perhaps this was his source. For the 1981-82 crop, it gives the following yields:

	Tons
Mexico	5.78
Hawaii (a 2-year crop)	23.68
U.S. Mainland	6.36
Argentina	6.35
Brazil	4.91
Colombia (13 to 18 months between harvest)	13.58
Ecuador	7.17
Peru (average crop 18½ months)	13
Venezuela	4.24
Costa Rica	5.11
Dominican Republic	5.64
Kenya (a 2-year crop)	11.5

From these figures we can see that Hawaiian growers produce more tons of sugar per acre per year and more tons of sugar per man-hour than any other place in the world. We produce as much sugar in Hawaii with 8,500 workers as they do in the Dominican Republic with 85,000 workers.

Regardless of what Senator QUAYLE says, the American sugar farmer is the same kind of farmer as the American corn, soybean, wheat and dairy farmer. He is the world's most productive farmer, certainly as measured in production per man-hour. I am certain that if our Government were to guarantee American sugar beet and sugar cane growers the same prices that gov-

ernments in Europe guarantee their farmers, the United States would be a major sugar exporter.

Mr. President, Senator QUAYLE says he sees no real reason why we should spend billions of dollars to protect an industry which has no real comparative advantage in world markets. I agree. But no one is asking that one dime be spent to protect an inefficient industry that is unable to compete in the world market. What is being asked is that the American sugar producer be given the same kind of protection that is given to producers in other countries—protection from dumping at ruinous prices during periods of excess production. Sugar, unlike other crops, is a commodity for which the demand is inelastic and for which consumption increases little even with a massive drop in price. The world sugar market, which is limited to less than one-fifth of the world's production, is a most volatile market for the most volatile of all commodities.

Mr. President, Senator QUAYLE berates the U.S. Government for its imposition of sugar quotas this past May, when the collapse of prices on the world market made such protection necessary. In imposing these quotas, the administration acted both within the law and our agreements under GATT. The U.S. Cane Sugar Refiners Association brought suit before the U.S. Court of International Trade in New York in an effort to halt the use of quotas to defend our sugar program. Judge Newman ruled in favor of the Government. The association then appealed the case to the Court of Patent and Customs Appeals in Washington, and again the court found that the President had acted within his authority and consistently with established trade practices. Now these same opponents of the domestic sugar industry are seeking to undo the price support program with the claim that a 14-cent level will permit the Government to uphold the program without imposing quotas. Authorities in the U.S. Department of Agriculture say that this is impossible given the current price of sugar being dumped on the international market.

Not content to denounce the sugar program with bogus numbers about consumer cost and false charges of inefficiency, certain Senators allege that the program hurts those developing countries that supply us with sugar. This too is false. Let me illustrate by way of a table that shows the premium which a foreign country receives for selling its sugar in the United States under the current price support program:

Price of raw sugar in New York, Aug. 10, 1982.....	\$22.61
Less CIF (freight and insurance).....	-1.50
Less Import fee (current).....	-1.42
Less Duty	-2.81

Less Price raw sugar world market, Aug. 10, 1982	-7.00
Premium from U.S. quota.....	\$9.88
¹ Cents per pound.	

The foreign producer now receives a price in New York which is more than double the price abroad. The Dominican Republic, which has 17.6 percent of the import quota established by the USDA, will earn almost \$200 a ton next year. Using today's prices, that will mean \$115 million in additional income, thanks to the quota program.

I challenge anyone to find a single ambassador from a sugar-exporting country who would publicly opt to sell the United States unlimited quantities of sugar at the current world price as opposed to selling us the amount set under the current quota system at the much higher price established by the U.S. price-support program.

Senator QUAYLE quotes the European Economic Community's concerns in defense of his amendment. The EEC is, in fact, a major source of the trade problem which we have had to address through the sugar price support program. Up until 1975, the EEC was a net importer of sugar. Then, because of its subsidies which guaranteed the European producer between 27 and 30 cents a pound for sugar, European sugar beet production expanded rapidly. Last year, the EEC became a primary source of the surplus sugar dumped on the world market. Moreover, the EEC has refused to join the International Sugar Agreement, of which the United States is a member. The ISA's goal is to maintain world sugar prices between 13 and 23 cents a pound, but it has been unsuccessful largely because of the EEC's lack of cooperation. In response to Senator QUAYLE's arguments about trade, I would say that sugar quotas are no more a violation of our trade philosophy than are quotas on textiles, cheese, peanuts, beef, steel, automobiles, or a host of other commodities.

Mr. President, the Mid-Atlantic and Northeastern States have historically been dependent on imported sugar which is refined along the eastern seaboard—sometimes in foreign-owned plants. It is thus understandable why editorials from this region, which have been extensively reproduced by Senator QUAYLE, often support these refiners of foreign cane and the big industrial users who buy sugar abroad. However, I find it difficult to comprehend why anyone from the other regions of our country which depend on our domestic sugar industry would support the Quayle amendment.

Mr. President, I wish to enclose a number of news stories, editorials, and articles on this subject which will further enlighten and illustrate the need to support American sugar producers. I ask that they be printed in the RECORD immediately following my remarks.

Mr. President, I urge my colleagues to join with me in voting down Senator QUAYLE's ill-timed, ill-conceived, and illogical amendment.

The material follows:

[From the Christian Science Monitor, Aug. 4, 1982]

THE SWEETER SIDE OF SUGAR QUOTAS

(By Thomas O. Enders)

Our recent imposition of quotas on US sugar imports was an action taken only as a measure of last resort in defense of the domestic support program passed by the Congress last fall.

Quotas were forced upon us by the declining world price for sugar. The situation was further aggravated by unusually low US demand for sugar in 1982, due in part to higher than average imports last year. We expect that our demand for imported sugar will revert to a more normal level in 1983. At that time we would expect country quota levels to reflect more fully traditional levels of sugar exports to the US.

Secondly, there will be some positive impact on exporters' revenues derived from the imposition of quotas. Because the US support program will no longer have to be protected solely by duties and fees, imported sugar will get a price closer to the internal US price than it had. The higher price will help to offset the reduced quantities allowed into the US market.

Export earnings will, therefore, be higher for many, if not all, foreign suppliers than under the fee-based system.

Finally, the US action is not an isolated incident but part of a pattern of worldwide and deeply rooted imbalances in the international sugar economy—imbalances which have had serious results for both developing-country and US producers.

US sugar policy has been aimed at addressing some of the fundamental conditions which account for these imbalances. We have been working to make the International Sugar Agreement function effectively, so as to dampen the violent supply and price fluctuations which have long characterized the so-called "free" sugar market. The cooperation of the European Community in those efforts was crucial to their success.

I regret that we were unable to persuade the community to reduce or end its subsidy of sugar exports nor to cooperate effectively with the sugar agreement. However, we will continue to work with the community and with other major sugar producers to try to devise a workable international system for sugar.

[From the Arkansas Gazette, July 25, 1982]

PROGRAM STABILIZES SUGAR PRICES; ULTIMATE WINNER U.S. CONSUMER

(By Leland DuVall)

Arkansas farmers do not grow sugar beets. They concentrate on soybeans, rice, cotton, wheat, corn and a variety of specialty crops. Therefore, it might seem that people in the state would have little or no interest in the kind of "sugar program" the Agriculture Department might offer.

The whole system under which commodities are produced and marketed in this country is interrelated—economically and politically—and farmers may be able to use the "sugar model" to help them understand such factors as how we got a farm program in the first place, the effects of government market intervention, and the reaction of the

nonfarm population to the production-marketing system.

The "sugar title" of the Agriculture and Food Act of 1981 commanded special treatment, which removes it from the mainstream of farm legislation. President Reagan needed the votes of a few members of Congress to get approval for his "larger" program. He "struck a deal" with a few lawmakers who represented sugar growing districts and promised price supports for the crop in return for their vote.

Under the present sugar program, the price is supported at 17 cents a pound. Given the other factor that go into wholesale markets, this was expected to mean that sugar would reach the market at a price of about 20 cents a pound. Actually, the "delivered" price of raw cane sugar at New York is about 22 cents a pound, refined beet sugar at Chicago is about 27 cents a pound, the price of refined cane sugar at New York is 33 cents, and the world price of raw sugar is 7.5 cents a pound. Quotas limit our sugar imports.

No special understanding of markets is needed to see that the United States offers an attractive premium over the world price. If sugar moved freely, imports would hit the trade centers in such volume that the price would come down to meet the slightly strengthened world price. Raw sugar might be available at 10 cents a pound, instead of 22 cents. Those who argue the government has no business tinkering with the market make the case that the support program is adding 12 cents a pound to the "cost" of sugar at the retail level at a time when people are concerned about inflation.

Since per capita consumption of sugar in the United States is about 80 pounds, an analyst might be tempted to multiply that amount by the 12 cents that is supposed to be the premium extracted because of the sugar program to determine how much the law adds to the cost-of-living. That works out to \$9.60 a year per person in a higher cost for all food and drinks that contain sugar.

Nothing is that simple. Different people consume different quantities. Retail prices seldom come down just because the ingredients are cheaper. Once in place, the higher prices remain because consumers have become accustomed to the prices and volume would not be increased significantly by price cutting.

This tendency of retail prices for consumer goods to be highly sensitive to rising prices of raw materials and to ignore collapses in the market is the basis for arguments in favor of a "stabilized" commodity price. In the case of sugar, and of many other commodities the role of the United States is that of the balancer.

1. This country is the world's major wheat producer and the supplier of grain where shortages develop. Large subsidies are offered in the European Common Market and in many other growing regions with the argument that the users do not want to rely exclusively on imports. The price of wheat grown in the European Community may be twice the price received by American farmers. Without import limits, the Europeans argue, United States would bury their farmers, force them out of business, and monopolize the market. Therefore, the amount of wheat brought in this country is determined by a formula designed to hold imports to the amount needed to assure adequate supplies—after their own wheat is marketed. Purchase in this country is at the lowest available price, but the resale to the mills is at the European premium price.

The same situation applies to many other commodities grown in abundance in this country and purchased around the world.

2. In the case of sugar, the roles are reversed. The United States currently produces about 55 percent of the sugar consumed in this country and imports the remaining 45 percent. Sugar is grown in at least 100 countries and all of them expect to export their surpluses. On balance, about 80 percent of the world sugar supply is consumed in the country where it is grown.

The average cost of producing sugar (world basis) has been estimated at about 19 cents a pound. Farmers in the United States apparently just about match that level or they may be a little ahead of the game. Obviously, they could not hope to stay in business by meeting head on the price at which the other producing countries are willing to sell their "surplus," or the amount left over after they have taken care of domestic needs. The simple truth is that the major sugar producing countries are prepared to sell their surplus at the price that will move the product.

This leaves American sugar farmers in position to be whip-sawed between their production costs and the price at the ports for the "surplus" of other producing countries or, under current conditions, 7.5 to 10 cents a pound. Maybe next year or the year after, other sugar-producing countries would experience crop failures as they did prior to 1974 when the price soared to 65 cents a pound. In the absence of a "Sugar program," we might be able to buy raw sugar this year at 10 cents a pound or less.

If that happened, sugar production in the United States would be abandoned by reason of wholesale bankruptcy and we would depend entirely on foreign supplies. Remember that each producing country with excess capacity takes care of its own needs first then exports the "surplus" at the price needed to move the commodity. This summer, it is 7.5 to 10 cents; next year and the year after, there might be a smaller supply and a larger demand, with the United States bidding for virtually all its supply. The result could be "1974 with an adjustment for inflation." Maybe we need all the stability we can get in the commodity markets.

[From the Star-Bulletin & Advertiser, Dec. 13, 1981]

AMERICAN SUGAR NEEDS SUPPORT TO COMPETE

(By Dr. Thomas K. Hitch)

The United States has not had an affirmative sugar policy since 1974 when the 1934 Sugar Act expired. Our sugar policy from 1934 to 1974 (40 years) was to have sugar prices stabilized in the American market by assigning marketing quotas, based on U.S. requirements, to domestic and foreign producers so that prices found a level that would be fair to both the American consumer and the American sugar producer.

Since 1974—with no sugar policy—the price of raw sugar in the American market has been on a roller coaster—as high as 65 cents in 1974, as low as 9 cents in 1976, as high as 44 cents in 1980 and now at about 16 cents.

The U.S. beet and cane sugar producers cannot remain in business on a permanent basis with this kind of wildly fluctuating price level—with two of the last eight years being boom years ('74 and '80), one being barely profitable (1975), and the over five being deeply depressed years with tremendous losses.

Even during these years the American consumer has not benefited, because while there have been more years of cheap sugar than of dear sugar, the price of sugar in the years when there was a world sugar shortage rose to such astronomical heights that it probably hurt the consumer more in those years than he has helped in the cheap years. Also, when very high sugar prices push the price of candies, ice cream, soft drinks, and baked goods up they tend to stay up after the price of sugar falls so that the American consumer to a certain extent lives with high sweetening prices even when sugar becomes cheap again.

To understand the world sugar market, one has to realize that some 80 percent of the sugar produced in the world has a guaranteed home at a guaranteed price; that prices in these countries do not fluctuate up and down with world under- and over-production; and that the so-called "world price" for sugar is set by demand and supply forces that affect only that 18 percent of the world's sugar production that is uncommitted—and therefore very cheap when world production is surplus and very dear when world production is short.

To put it another way, all the major sugar exporting countries of the world have a government guaranteed set price for sugar consumed in that country with the price set at a level that will make it profitable to grow sugar in such large quantities that it is a major export item. This is true for Cuba, Brazil, Australia, Philippines, South Africa, Argentina, India, Mexico, and the EEC as well as the rest of the smaller sugar exporting countries.

Take the EEC. Through its Common Agricultural Policy (CAP) European growers are not only guaranteed 27 cents a pound, but are encouraged to produce excess sugar for export, and in the last decade the EEC has become a major exporter of subsidized sugar in contrast to having traditionally been a net importer of sugar. European sugar is now being sold in large quantities in the U.S. market when the price for raws is about 15 cents after paying shipping and insurance, while the price in Europe is 27 cents.

This situation is demonstrated by the fact that when the "world sugar market" price skyrocketed from about 10 cents a pound in 1973 to 65 cents a pound in 1974, there was no change in the domestic price of refined sugar in the countries that produced 60 percent of the world's export sugar and only a modest change upward in the other exporting countries—while the price in the U.S. more than doubled. The same thing happened when "world" sugar prices fell.

Furthermore, most of the world's sugar importing countries are buffered against fluctuations in this small but highly volatile world market—buffered generally by long-term agreements with sugar exporting countries to provide them with a normal supply at a normal price. This is shown by the fact that in that same period of rapid price rise (1973-1974) the countries that consumed 22 percent of all world sugar imports had no change in the domestic price of sugar, those accounting for 12 percent of world imports only a 1 to 15 percent rise, and with only a handful of countries (with the U.S. being far and away the major one) suffering from the full inflation of prices.

The so-called world sugar market, being only a small fraction of world sugar production, is a market where in periods of world sugar shortage the buyer pays exorbitant prices and where in periods of world surplus

all homeless sugar is dumped. If the U.S. does not adopt a constructive sugar policy it will ultimately lose its domestic sugar industry—which will be a considerable economic loss since among agricultural products sugar ranks tenth in terms of acreage, fifth in terms of tonnage, and sixth or seventh in terms of dollars to the farmer.

The U.S. sugar industry will not be killed by cheap foreign sugar that is produced more efficiently than ours: it will be killed by foreign sugar that is dumped into our market at either a loss to the producer or at a profit that is provided by subsidies from the government of origin. U.S. sugar production is probably among the most efficient in the world—just like our production of wheat, corn, rice, soy beans, and many other agricultural products. But it cannot live on a 12 cents, or 15 cents, or even 17 cents per pound price—a price which incidentally is about the same as good top soil at your corner garden shop. In short, if the U.S. were to require that foreign sugar not be allowed to be sold in the American market at a lesser price than it is sold for in the country of origin, the U.S. sugar industry would be profitable and have a long and successful life.

Furthermore, if we lost our domestic sugar industry, the nation and its consumers would have to live with the roller coaster of the "world" sugar market, and could even find itself facing an OPEC-like foreign sugar cartel since the top 13 sugar exporting nations ship about 80 percent of the sugar entering world trade—numbers much like those in the oil cartel.

Finally, if the U.S. lost its domestic sugar industry it would face catastrophe in the event of war or major shipping interruptions. Let us remember that in such times, sugar has always been about the first commodity to be rationed, that Napoleon developed the beet sugar industry when the British blockade stopped the flow of essential foreign sugar to Europe; and that all the countries of the world that protect their domestic sugar industries do so primarily because of these strategic considerations.

Let's get an affirmative U.S. sugar policy before it is too late.

[From the New York Times, July 18, 1982]

IS THE U.S. SUGAR SUBSIDY TOO SWEET?

(Washington) It is in another tangle over imports. This time it's the sugar growers insisting on continued protection against lower-priced imports. Otherwise they say, the domestic industry will not survive. The companies that use sugar the most disagree.

(Last December, President Reagan signed legislation that set a price support level of 17 cents a pound on raw sugar. With existing import duties and fees, the new support price was expected to keep domestic sugar prices at about 20 cents a pound.

(But a world sugar glut since then has overwhelmed the effort, threatening to drive prices below 20 cents. To avoid the possibility of a costly stockpiling operation, the President in May set import quotas on sugar for the first time since 1974. In response, Senator Paul E. Tsongas, Democrat of Massachusetts, and Dan Quayle, Republican of Indiana, proposed legislation that would reduce sugar price supports to 14 cents. The Senate will soon tackle this issue.

(The question, examined below, is whether protection for the industry is justified. Daniel K. Inouye, the Democratic Senator from Hawaii, the largest sugar-producing state, argues one side. Nicholas Kominus,

president of the United States Cane Sugar Refiners Association, tackles the other.)

NO, IT OFFSETS DUMPING

(By Daniel K. Inouye)

To understand the need for a sugar program, one must first know something about the "world sugar market," where the United States buys 45 percent of its sugar.

Sugar is the most tightly controlled commodity in the world. Over 100 countries produce sugar, 80 percent of which is consumed locally or sold to others under long-term contracts. The other 20 percent is released on the world market, with one-fifth coming to this country.

The "free" sugar market is a residual market, where countries, most with strict import controls and subsidy programs for their own sugar industries, dump their surpluses—often at a loss. Slight variations in world production can therefore cause tremendous fluctuations in the volume of sugar available on the free market, where only a fraction of the world's sugar is sold.

Since the consumption of sugar changes only very gradually, its price on the world market fluctuates wildly. This is why we saw raw sugar prices go from 65 cents a pound in 1974 to between 7 and 10 cents in 1976-78, then to 42 cents in late 1980 and finally back to 7 cents in June of this year.

If the United States were an inefficient, high-cost producer, an argument could be made that we should buy our sugar more cheaply abroad and concentrate on producing corn, wheat, cotton and soybeans. However, we are not a high-cost sugar producer. The average cost of production worldwide is more than 19 cents a pound, only slightly below the average cost in the United States. We are a lower-cost producer than the Common Market, which is now a leading sugar exporter thanks to its subsidy program and which pays its producers far more than the United States and then dumps the surplus abroad.

In Hawaii, where three-fourths of the available cropland is planted in sugar, the domestic industry produces more sugar per acre and more sugar per man-hour than any other place in the world. We are highly efficient, but no one can afford to grow sugar at the current world price of 9 cents per pound. The world's lowest-cost producer, South Africa, expects to lose \$156 million on its sugar exports this year. Meanwhile, our Hawaiian industry, which lost \$83.5 million on a comparable volume in 1981, expects to lose more than \$25 million this year.

Opponents of the present sugar price support program charge that it is unduly generous to the domestic industry. In fact, it is inadequate to meet the industry's needs, as can be seen from what is happening to sugar producers across the country. An example is the sugar beet industry, whose acreage has declined almost 15 percent since the enactment of the sugar program last December. In Hawaii, the sugar cane industry has announced similar reductions over the next few years. The Louisiana industry has reduced its production by 10 percent. Only the more efficient producers in an already efficient industry are able to stay in business.

Opponents of the sugar program are apt to compare the difference between the world price and the price that domestic users pay for sugar and conclude that this represents the program's cost to the consumer. However, the cost of shipping, refining of raw sugar and marketing, which are not functions of the world price, are con-

stantly ignored. Yet, these factors account for most of the price differential.

It is important to note that most of the average American's annual consumption of sugar (80 pounds) is consumed as a sweetener in commercially prepared food and soft drinks. The value of sugar constitutes a very small portion of the price of these products. While increases in sugar prices are frequently used to explain increases in the price of soft drinks, candy, or baked goods, those prices do not come down when the price of sugar drops.

Moreover, consumers pay more for sugar in the mid-Atlantic and Northeastern states, which rely heavily on imported sugar, than elsewhere in our nation, where much of our domestic sugar is produced. This has been true for decades, yet one would expect the opposite if one accepted the argument that the sugar program unfairly prevents customers from buying cheap world market sugar.

Ultimately the consumer must pay a price that reflects the average cost of producing a commodity. Allowing foreign producers, who dump their sugar on the world market at a loss, to drive efficient American producers out of business would only increase the cost of sugar to the American consumer in the long run.

Our domestic sugar program is once again under attack in Congress and some sectors of the press. Should these attacks—prompted largely by the importers and users of what is, for the time being, cheap sugar—be successful, then we will soon witness the rapid decline of our domestic sugar industry. We will also see, as the Department of Agriculture has warned, "an increase in sugar prices of several hundred percent" as domestic sugar disappears and we become totally dependent on the world market.

The United States needs to protect its domestic sugar industry from unfair competition abroad. The current price support program does this in a modest way by providing a floor under which the price of domestically produced sugar cannot fall. Indeed, the sugar loan level of 17 cents a pound mandated by the 1981 Farm Bill is the lowest for any commodity program.

Both our American producers and our consumers need the protection of the sugar program. Failure to provide this protection will mean another domestic industry down the drain with all its attendant misery and costs.

YES, IT COSTS TOO MUCH

(By Nicholas Kominus)

H. L. Mencken may have had the sugar producer in mind when in an essay entitled "The Husbandman" he wrote: "When the going is good for him he robs the rest of us up to the extreme limit of our endurance; when the going is bad he comes bawling for help out of the public till."

In 1980, when the world price of sugar shot up, the nation's sugar producers did not hesitate to increase their own prices. As a result, they enjoyed record profits. But, as much as the producers enjoy riding the world market up, they hate riding it down. So last year they came to Washington, lobbying for help. Unfortunately, they got help—much help. The sugar program that emerged is dreadful.

The producers got the program, in part, by resorting to scare tactics. They argued that the program was needed to protect consumers from a so-called "sugar OPEC." This was nonsense. Sugar, unlike petroleum, is

produced in practically every nation of the world, and substitutes are available. At the time, some were impressed by the argument. But the recent drop in the world price of sugar from 44 to 8 cents a pound has put the "sugar OPEC" argument to rest.

Meanwhile, consumers are stuck with a program that is artificially forcing up the price of sugar, and thereby contributing to the disturbing reappearance of inflation. As the price of sugar goes up, it inflates the price of many processed foods and beverages.

When President Reagan implemented the current sugar price support program, he said, "I personally regret the necessity for signing these proclamations. The sugar program enacted by Congress to protect higher-cost domestic producers will result in higher costs for all American sugar consumers."

The program is, indeed, forcing American consumers to pay more for sugar than consumers in most of the other nations of the world.

Today, the price of raw sugar on the world market is around 8 cents a pound, a result of overproduction in the United States and other parts of the world. Despite producer attempts to discredit it, the world sugar market is not a dumping ground. It is a viable and important market, which accounts for as large a percent of total sugar trade as do the world markets for wheat, feed grains and soybeans.

The United States price, which is forced up by import quotas, duties and fees, is around 22 cents, or nearly three times higher than the world price. By artificially maintaining the United States price that high the program is costing consumers an estimated \$3 billion a year in higher sweetener costs.

That price tag becomes even more significant when it is measured against the small number of sugar producers. There are, in fact, fewer than 14,000 sugar producers. Thus, the cost of the \$3 billion program is an astounding \$215,000 per producer.

By comparison, the annual cost of the dairy program, in which 324,000 producers participate, is estimated to be \$11,250 per producer. The wheat program, in which 879,000 producers participate, is estimated to cost \$475 per producer. It is also interesting to note that the school lunch program costs \$113 a year per child, and that the food stamp program costs \$622 per participant.

The sugar producers enjoy these lopsided Government benefits without any strings attached. Unlike the other crop programs, they can produce all they want. In addition, huge sugar producers get to "play" with the taxpayers' money. Under the program, they can offer sugar to the Government as collateral for loans and these loans are expected to total around \$1 billion in the coming crop year. Producers can reinvest the loan money in money markets, as some have in the past, reaping windfalls from the spread between the low interest rates charged by the Government and the currently high market rates. Moreover, if producers decide to default, they pay no interest.

The sugar program is also proving to be a total embarrassment to the Reagan Administration, which has been forced to impose restrictive import quotas in order to avoid the possibility of the Government having to buy domestically produced sugar. The quotas have been a cause of no small irritation in the developing sugar nations, most of which are in the Caribbean and Latin America. And the quotas have all but deci-

mated the Administration's Caribbean Basin initiative.

More important, the quota problem transcends the sugar trade. It could have a serious impact upon our foreign trade generally. Sugar quotas will, as special trade representative William E. Brock said, "make it more difficult" to argue against trade barriers in the European Economic Community and Japan. As long as the quotas remain in force, every nation we have a trade problem with will gleefully point to them as an example of our transgressions.

It is ludicrous to jeopardize our \$42 billion agricultural export trade to overprotect a minor industry. The sugar beet and cane crops are produced on less than 1 percent of the nation's farms, and they account for less than 1 percent of crop acreage.

Ironically, the sugar program is pricing sugar out of the sweetener market. High sugar price supports are permitting the corn sweeteners to capture more of sugar's traditional markets. As a result, some sugar refineries and factories are closing.

In recent months, all Government programs have been re-examined, and Government benefits to millions of Americans have been reduced. Sugar and its producers should be no exception.

[From the Honolulu Star-Bulletin, July 28, 1982]

FALSE SUGAR COMPARISONS

(By Eiler C. Rounholt)

In printing the pro and con articles on the sugar program, pitting Sen. Daniel K. Inouye against Nick Kominus, president of the U.S. Cane Sugar Refiners' Association, which had appeared in the New York Times, you performed a distinct public service.

It provides some insight into what we are confronted with here in trying to defend our domestic sugar industry. Inouye's remarks added significantly to an understanding of the problem. I fear Kominus served merely to confuse.

I was particularly disturbed at Kominus tactics in comparing the cost of the sugar program per producer with the cost of the dairy and wheat program per producer. Had the same standard of comparison been used for each, the result is zero cost per producer for the sugar program. Let me explain.

Kominus used the estimated cost to the government per producer of the dairy and wheat programs. In the case of sugar, he used an estimated cost to the consumer. Moreover, he used a cost estimate which includes the cost of all sweeteners; alternative sweeteners constitute some 40 percent of U.S. sweetener consumption. Although the estimated cost included all sweeteners, he divided that cost by the number of sugar producers; excluding the many hundreds of thousands of corn producers who get 40 percent of the benefit of our domestic sweetener program from the denominator.

I do not know what consumer cost can be ascribed to the dairy and wheat programs. We do know that Americans consume more dollars worth of dairy products and of wheat than they do sugar. We have no world dump price standard against which we can measure dairy or wheat and estimate consumer costs.

Kominus' compilation contains a further unwarranted assumption that the consumer benefits from low sugar prices. In the price he pays for sugar-containing products. Almost three-fourths of our sugar consumption is in that form and the record clearly shows that a drop in the price of raw sugar

is not translated into a drop in consumer prices.

The price of raw sugar on the New York market fell by 70 percent from October 1980 to October 1981. Meantime the price of 14 major sugar-containing products increased by an average of 8.4 percent. The average American buys some 20 pounds of sugar a year for home consumption. The price which he pays for that sugar may increase slightly as a result of the sugar program but that is a small price to pay for the increased stability and for maintaining the domestic production of more than half of our sugar needs.

As the Department of Agriculture has testified, the price of sugar would increase several hundred percent on the world market without the U.S. production.

Kominus' artful attack on the sugar program also criticizes sugar processors for making money by placing sugar under loan to the government. In 1978 some processors did invest low interest loan funds in higher interest money market instruments at a profit. These loan funds replaced funds processors already had paid to growers, the principal beneficiaries of the program. As the Commodity Credit Corp. now charges the government's cost of borrowing to the recipient of the loan (the rate is currently 13.5 percent) this opportunity for gain no longer exists. Kominus, well aware of that fact, sought once again to deceive.

The sugar program is essential to the survival of our domestic industry and to the welfare of the hundred thousand Americans directly employed in the production of sugar. It is a program which operates at no cost to the government, a program which assures a sufficient supply of sugar at reasonable and more stable prices.

It is a program which provides significant economic benefit to the many less developed countries which have duty-free access to our market under the Generalized System of Preferences. It is a program which provides significant economic benefit to our traditional suppliers of foreign sugar by assuring them of their historic share of the higher price U.S. market in periods of sharply depressed prices on the world market.

[From the Honolulu Star-Bulletin, July 20, 1982]

THE BATTLE OVER SUGAR PRICES

Since we have regularly contended the sugar industry must do more to tell its story to the media in Washington and New York, it was a pleasure to see U.S. Sen. Daniel K. Inouye's byline over a story on sugar in the Sunday New York Times.

Inouye argued effectively, we thought, that the world sugar market is a mercurial dumping grounds where prices fluctuate wildly. And that to protect the U.S. market from such unreasonable swings is a rational national policy.

His article appears in the adjoining columns. We trust many readers will find it persuasive.

But the Times pitted Inouye's arguments against those of the president of the United States Cane Sugar Refiners Association.

These also are reprinted in the adjoining columns and they contain some figures that have Hawaii sugar growers suspecting unfair comparisons.

Nicholas Kominus claims the sugar program is adding \$3 billion a year to the U.S. sweetener bill and benefiting 14,000 sugar producers at the rate of \$215,000 per pro-

ducer versus a mere \$475 in help for each of 870,000 wheat producers.

The basis for Kominus' figures is not yet known here but they are seen as sharply overstated.

In any event, the sugar debate is on again and it is going to be a tough one for the domestic sugar industry. Some sense of it may be gained from the adjoining articles.

We'll be back with more when the Hawaii industry has its answer to the figures being tossed against it.

[Letter: On Price Supports]

THE SUGAR INDUSTRY HAS TAKEN ITS LUMPS
To the Editor: Your May 19 editorial claiming that Congress is adopting "Too Sweet a Deal for Sugar Growers" reflects a lack of understanding about the sugar industry.

The editorial contends that "Sugar producers . . . have never fully appreciated the virtues of the free market." But since 1974, producers and consumers have been victimized by the wild price swings of the so-called free market.

Domestic sugar producers have operated without the benefit of Federal legislative protection since 1974, and fully understand the devastating impact of the so-called free market. Twice during those past seven years world production has been low, and the prices paid by consumers have been extremely high.

Those low supplies and high prices undoubtedly benefited producers. But each boom has been followed by an equally sharp bust. The busts have driven thousands of sugar producers out of business, and have forced the closure of eight of Colorado's 11 sugar-processing facilities.

Because we have no Federal sugar legislation today, there is no mechanism in existence to provide for domestic supply stability.

Americans consume 14 percent of the world's sugar, and we import an average of 40 percent of our supply each year. This heavy dependence on imports, coupled with the lack of a domestic sugar program, places the American farmers and consumer at the mercy of the world market. Our costly petroleum experience should have taught us to avoid this situation.

In adopting a sugar program as part of the 1981 Farm Bill, the House and Senate Agriculture Committees are seeking to free domestic producers and consumers from booms and busts.

The 19.6-cents-per-pound support level being considered by the committees is hardly a "rich price support program," as your editorial claims. The average cost of production for sugar cane is 23 cents a pound, and beet growers must spend an average of 24 cents a pound to produce their commodity. The levels being considered by the House and Senate Agriculture Committees fall far short of the cost of production, let alone any profitable level.

You also estimate a Federal expenditure of close to \$1 billion for this proposed sugar program. But the costs of sugar programs have historically been balanced by the income produced by the tariffs on imported sugar. In fact, most of those tariffs produced a net profit for the U.S. Treasury.

The proposed sugar program will not only provide supply and price stability for our domestic consumers; it will probably generate income for the Treasury. That type of program deserves the full support of everyone including *The Times*.

JOHN STENCEL, President,
Rocky Mountain Farmers Union,
DENVER, May 20, 1981.

[From the Honolulu Star-Bulletin, June 29, 1982]

AN UPHILL BATTLE FOR SUGAR GROWERS

The American sugar growers have a terrible public relations problem on the U.S. East Coast.

The press there, including the Wall Street Journal and New York Times, is extremely hostile to federal programs to protect sugar, taking a consumer viewpoint in favor of a free market.

What these publications fail to acknowledge is that the world sugar market is not a free market. It is a dumping ground that responds violently to relatively small surpluses or shortages.

In 1974 these prices soared to more than 40 cents a pound because of shortages. Currently they are down around 6.5 cents or about one-third the production cost in Hawaii, which is close to the world average in production costs.

The "world market" handles less than 20 percent of the sugar produced in the world. That is what explains its high volatility in reaction to dumping of surpluses from protected markets or shortages in them.

It seems to us totally unfair to throw an important domestic industry to the wolves of this market as the Easterners would like to do. If U.S. consumers fully understood the situation they wouldn't want to be on that price roller coaster either.

[From the Hawaii Tribune-Herald, June 14, 1982]

SUGAR NO LONGER SO SWEET IN HAWAII

(By Gordon Sakamoto)

HONOLULU.—Hawaii produces 20 percent of the sugar used in the United States, but the "dumping" of foreign sugar is upsetting the delicate economic balance in the islands.

The Hawaiian sugar industry accounts for eight percent of the state's revenue and eight percent of its jobs.

The dramatic slide in the world price of sugar, temporarily slowed by the recent imposition of emergency import quotas by President Reagan, has made growers—among them some of the biggest corporations in Hawaii—reconsider their century-long affiliation with sugar.

In 1981, sugar production resulted in a staggering \$83.5 million loss to the Hawaii industry, despite strenuous efforts by all parties, including the union, to reduce costs. The outlook for 1982 is discouraging. There will be another loss in the millions of dollars, according to economists.

In cost-cutting moves this year, three major plantations went on a two-week enforced shutdown that put half of the industry's 8,400 employees off the payroll. Another shutdown is planned for the fall. Executives also took hefty pay cuts, the sugar workers' union, the International Longshoremen's and Warehousemen's Union, agreed to defer half of a 10 percent contract wage increase. The companies looked also to other means of trimming losses.

Additionally, the Hawaii Sugar Planters Association, which represents the industry, asked the Hawaii Legislature for a \$50 million "Sugar Stabilization Fund." The request was not granted, but the industry won some tax relief and other financial benefits.

The arithmetic for the Hawaii sugar industry is simple: It costs 21 to 22 cents to produce a pound of raw sugar in the state. The federal government, under the 1981 Farm Act, will subsidize sugar up to 19.08 cents a pound. But the world price, because of the huge infusion of foreign sugar, has dropped to as low as 8.02 cents a pound.

The import quota has helped ease the difference, but not to a point where the industry can turn a profit.

Given that picture, some of the major growers have given a clear indication they will not absorb further losses.

Amfac already has announced it will phase out the 12,000-acre Puna Sugar Co. on the island of Hawaii by the end of 1984. It will mean the layoff of 500 sugar workers.

Since the Puna announcement, Amfac also has cut back sugar acreage at another plantation. A second company has made a similar move.

The cuts mean acreage in sugar cane will be reduced to the 200,000-acre level, down from the high of 242,476 acres in 1968.

Of additional concern to Hawaii sugar growers is President Reagan's Caribbean Basin Initiative, which could further add to the industry's woes. As it now stand, the initiative will allow duty-free imports, among them sugar, from Caribbean nations into the United States.

Henry A. Walker, president of Amfac, was blunt in sounding a warning.

At the company's stockholders' meeting, he said "Never again must Amfac be plagued to the extent it has been by sugar's cyclical swings. Never again can we risk the existence of this company now, otherwise, on the verge of joining the front ranks of American corporations. We cannot and will not, let sugar get in the way."

But he also made it clear it is not the wish of Amfac to pull out of sugar in Hawaii.

"There are times when we feel we should get out of sugar. But we have long-term leases, commitments to our employees, long-term benefits, pension programs, obligations to our communities. We simply do not want to walk out of the communities if there is an alternative."

Tommy Trask, regional director of the ILWU, agreed that the industry needs union support.

In accepting the wage increase deferral, he said, "We wanted to indicate to the general public this and that we are prepared to help the industry. We recognize their plight. We are concerned about the whole sugar scene and we're nervous about what we see happening."

"But we have to look at it in bittersweet fashion. The vast majority of the work force will retain their jobs. Survival is the key to this whole thing."

A bank economist offered additional numbers that would result were sugar to go out of business in Hawaii.

"Massive unemployment would develop in Hawaii with an accompanying recession if the sugar industry were to fold," he said.

"There are about 9,500 sugar workers on whom a total 30,000 jobs depend."

"If sugar went down entirely, the statewide unemployment rate, which presently is five percent, would become 13 percent, and welfare costs would go up 17 percent from the present \$250 million to \$300 million."

Especially hurt would be the economy on Kauai, where 96 percent of the cropland is in sugar cane. On the island of Hawaii, it's 82 percent of 91,000 acres, on Maui 47,000 and Oahu 32,000 acres.

The employment rates would be 20 percent on Kauai, 16 percent on Hawaii and 14 percent on Maui.

Between 1934 and 1974, regulation of the sugar industry in the United States took the form of several legislative acts. However, in 1974, legislation to extend the Sugar Act was defeated. Since then, the U.S. has been

the only major producing nation without a national sugar policy.

As a result, the domestic industry has been at the mercy of fluctuating world prices that characterize the market for the small part of the world's sugar that is not regulated. Unfortunately, the world market for sugar has low prices more often than high.

Hawaii's sugar industry has experienced both extremes in the last decade, from the very good profits of 1974 and 1980 to the major losses of 1981 and lesser losses in between.

Since 1974, the Department of Agriculture has operated under "permanent authority" of the Agriculture Adjustment Act of 1949, which authorized the Secretary of Agriculture to support prices of selected non-basic commodities. Cane sugar and sugar beets were covered by the act.

Sugar prices have been on a roller coaster, with high prices in 1974 and extremely low prices in 1976 and the first half of 1982.

The U.S. spot price for sugar rose to a peak of 65 cents per pound for one day in November 1974. Two years later, it was down to 8.9 cents per pound, and earlier this year 8.02 cents a pound.

According to Robert Hughes, president of HSPA, when the Sugar Act was terminated in 1974, the consumer was subjected to the vagaries of the world market.

"Beginning in 1975, when we were dependent on the world market, we were subjected to these volatile prices," he said. "We had never suffered such losses before. A company cannot tolerate or stand to take such losses for very long. And that's why it threatens the entire sugar industry in Hawaii since it is the third largest contributor to the state economy and sugar is the largest agricultural export commodity in the state."

The most recent problems began after the 1980 shortage.

"That reaction caused a tremendous increase throughout the world—roughly eight million tons worth," said Hughes. "That's eight million tons on top of the yearly average of 87 million tons."

"Suddenly, the world went from a shortage to surplus in a very short time. Until the surplus is eroded through the reduction of production, world prices are going to be on the low side."

Hughes said reaction already has begun in some areas.

"In the United States, preliminary planting of beet sugar will be down by about 11 percent. Also, the European Economic Community has indicated it is going to exercise some restraints in the planting of beet sugar."

Hawaii's sugar cane growers cannot match the flexibility of beet sugar growers on the U.S. Mainland and Europe.

When sugar prices go up, beet sugar growers increase acreage. When prices sag, farmers switch to economic crops such as cotton, wheat, corn and soybeans.

In Hawaii, said a University of Hawaii agriculture professor, "We know of no crop—or combination of crops—that can entirely replace sugar. And we know of no agricultural activity that is as compatible with tourism as large-scale cultivation of sugar."

[From the New York Times, June 1, 1982]
A WAY OF LIFE IN HAWAII IS THREATENED BY SQUEEZE IN THE SUGAR INDUSTRY

(By Robert Lindsey)

KEAAU, HAWAII, May 26.—For three generations, members of the Tony Cawagas'

family have turned the green stands of cane that blanket the hills and valleys around here for as far as anyone can see into sugar for a world beyond the Hawaiian Islands that they never saw.

Just as he followed his father and his grandfather to the sugar mill, Mr. Cawagas expected that one day his son, too, would be there.

Now, at the age of 38 years, he is looking for a job and says that he has little hope of finding one.

The Puna sugar mill at Keaau is closing and, with it, a way of life is ending.

LONG A DOMINANT CROP

For most of the last 150 years the economy of the Hawaiian Islands has been rooted in agriculture, predominantly sugar cane and pineapple.

Dense stands of tall sugar cane are as ubiquitous as fields of corn are in Nebraska. Successive waves of Chinese, Portuguese, Japanese, Filipinos and, most recently, Koreans have come to work the fields.

For generations, families have lived and died on the great sugar plantations that covered much of the islands with a green mantle that swept from ocean's edge to mountain peaks.

But now, under assault from other countries that produce sugar more cheaply, the Hawaiian sugar industry is receding, causing a painful transition for the islands' economy and jarring the lives of people who have known no other life but the plantation.

Growers here say that last year they lost more than \$80 million on sugar production. This year, despite a much criticized decision by the Reagan Administration to impose import quotas on sugar that are raising consumer prices while increasing the growers' income, the growers say that they still expect heavy losses.

HIGHEST PAID IN WORLD

The 7,000 or so workers in the Hawaiian sugar industry are the highest paid agricultural workers in the world, the growers say.

Mr. Cawagas earns about \$20,000 a year, including fringe benefits, a wage that does not guarantee affluence in a state where the cost of living ranks among the highest in the nation. But he says he understands enough about world trade to know that Hawaii is pricing itself out of the sugar market.

"We can't compete with the other countries," he said. Cheaper labor costs account largely for the price advantage of sugar produced in the Philippine Islands, Thailand, Latin America and elsewhere.

None of the major growers have predicted that the Hawaiian sugar industry is doomed, but representatives of the state government, labor and industry agree that it is in serious trouble even with the controversial new import quotas.

"Our membership has got to realize these are changing times," Thomas Trask, regional director of the International Longshoremen's and Warehousemen's Union, which represents sugar workers, said recently. The union says it is working with growers in an effort to increase workers' productivity. "The survival of these plantations, and jobs, has to be uppermost in the minds of the membership," Mr. Trask said.

Here on the island of Hawaii, Amfac Inc., the state's largest sugar producer, and one of its oldest, which is aggressively diversifying into nonagricultural pursuits, announced earlier this year that it would close its 16,000-acre Puna Sugar Company plantation and mill when the last of its cane was har-

vested two years from now. Almost 150 of its 479 employees are already gone.

Last week, Amfac announced that it would reduce operations at one of its four remaining plantations on the island of Oahu, by 20 percent.

"We still don't know if we can save Oahu Sugar Company," said Robert Rostron, a company executive, "but we believe we have a workable plan that gives us a fighting chance." Amfac and other major landowners in the state say they are continuing to study the possibility of still further curtailments in sugar production.

To a large extent, the problems plaguing Hawaii's sugar industry are similar to those being experienced by the automobile industry and others hurt by cheap foreign imports. But in Keaau and surrounding communities, the townspeople see the closing of the plantation as the passing of an era.

Noboru Shimauku, 60, who took a job at the plantation store when he was graduated from high school and has worked at the mill since then, said that the cane fields and mill were so much a part of his life and that of the community that he never imagined life without them. "It was always here," he said. "It's like a dream that you never expect to have."

NO PLANTATION FOR THEM

"I worry most about the middle-aged people," said Carmelito Arkangel, industrial relations director of the plantation, an employee since 1938. "Most of their working careers has been with the plantation. Now there is no plantation to go to."

The Puna plantation opened in 1899 and has been virtually the only economic resource in this community, which is about nine miles south of Hilo.

The company store is gone now, as are most of the small houses that for decades employees rented from the plantation, but Keaau is still very much a company town. Its employees support the local shops and churches, and everyone in town is wondering what will happen when the mill finally closes. On an island with an unemployment rate of 9 percent, 50 percent higher than the state average, prospects are not good for finding more work.

"When I was young, my father told me, 'As long as the smokestack is standing you'll have a job,'" and Hiroshi Kawazoe, the plant manager, who has been an employee since 1947.

"We had peaks and valleys before, but lately there were more valleys and they got longer and longer," he continued. "And now the smokestack will be coming down. It's going to be very hard on the economy when you take 16,000 acres out of production. There's no other crop that can replace it."

OVERCAME EARLIER TROUBLES

The plantation and the surrounding community have had troubles before, but they weathered them.

In the early 1950's, when bulldozers and trucks were introduced to mechanize much of the hand labor of the past, the community was hit hard by layoffs of hundreds of workers, and there have been periodic slumps when sugar prices were depressed.

Because of variations in climate, terrain, age and other factors, the cost of producing sugar varies widely among Hawaii's 14 sugar plantations, and the Puna plantation is one of the least efficient. Amfac officials say that the cost of producing a pound of sugar here last year was 23 cents, as against an average of 19.3 cents in the state. Even with the recent price increase resulting from the

Reagan Administration's import restrictions, Puna is still not economically viable, the company says.

Amfac, in a kind of voluntary land reform program, has agreed to give each of the laid-off workers five acres of plantation property, as well as to donate \$2 million to an employee trust for roads and other development costs. State and zoning officials have not yet approved the unusual land subdivision, and there is considerable skepticism that five acres will be adequate for anyone to make a living as a farmer. Still, some employees say they will try to farm the land.

Zacarias Bermudez, 58, said he would give it a try and, if it did not work out, he would return to the Philippine Islands, from which he embarked for Puna 14 years ago.

[From the Wall Street Journal, Aug. 5, 1982]

COCA-COLA CO. PROFIT ROSE 10 PERCENT IN 2ND QUARTER—OVERSEAS SALES GAINS HELPED, BUT STRENGTH OF DOLLAR LIMITED GROWTH OF NET

ATLANTA.—Coca-Cola Co. said net income for the second quarter increased slightly more than 10 percent and revenue declined 2 percent.

Overseas sales gains helped the profit increase, according to Sam Ayoub, chief financial officer. But the company said the strength of the dollar against weakened foreign currencies limited Coke's earnings growth to 10 percent instead of 15 percent.

"When margins improve overseas, it affects everything because that's 63 percent of our business," Mr. Ayoub said.

Analysts said the results were in line with their expectations for the soft drink giant.

In the second quarter Coke earned \$139.8 million, or \$1.13 a share, compared with year-earlier profit from continuing operations of \$127 million, or \$1.03 per share. In the 1981 period, a gain of \$1.9 million from discontinued operations made net \$129 million, or \$1.04 a share. Revenue fell to \$1.57 billion from \$1.6 billion.

For the first half, Coke earned \$247.4 million, or \$2 a share, up 10 percent from profit from continuing operations of \$224.6 million, or \$1.82 a share. In the 1981 period, a gain of \$4.3 million from discontinued operations made net \$229 million, or \$1.85 a share. Revenue fell 3.7 percent to \$2.84 billion from \$2.95 billion.

Last June, in a move partly intended to lessen its dependence on foreign operations, Coke acquired Columbia Pictures Industries Inc.

"We want to increase our activities in the U.S. That's why we acquired Columbia. Our target is for Columbia to grow at 20%, our wine business to grow faster, so eventually, the U.S. business will be a larger chunk of total profit," Mr. Ayoub said.

Coke noted that Columbia's earnings won't be consolidated into its operations until the third quarter.

The company also said that its adoption of a change in the method of accounting for foreign-currency translation had "aided" its results for the 1982 second quarter and six months.

"If 1981 results had been restated for (the accounting change), their earnings gain would have been more on the order of 7% to 8%," said Emanuel Goldman, an analyst with Sanford C. Bernstein & Co. He added, however, that Coke's earnings "would have been 5% higher if the U.S. dollar hadn't been so strong. Coke is one of the many companies that has been hurt by the strength of the dollar."

Nonetheless, analysts said the soft-drink giant is weathering economic storms both here and abroad fairly well.

In the U.S., Coke said soft drink case sales increased 3% to 4% during the first half. Presumably that growth rate is better than some of its competitors, because Coke said it continued to gain in U.S. market share.

In overseas markets, Coke said soft-drink sales increased 4% overall during the first half, with Western Europe, Canada, Japan and Mexico showing sales increases between 5% and 12%. Only Brazil and Argentina failed to post increases, the company said.

In other business areas, Coke said juice unit sales increased during the quarter and first half, while coffee unit sales increased during the second quarter but declined for the six months.

Coke also said its wine business had a sales increase of 11% in the quarter while the rest of the industry generally experienced flat sales.

[From the New York Times, July 29, 1982]

GENERAL FOODS

General Foods said that an improving worldwide coffee business and higher margins on several convenience foods helped it raise profits for its first fiscal quarter of 1983 to \$61.5 million, or \$1.24 a share, from \$49.3 million, or 99 cents a share, in the period last year. Sales remained flat at \$2.07 billion.

James L. Ferguson, chairman of the White Plains-based company, said that besides coffee, General Foods was pleased with the performance of certain packaged food lines, especially Jell-O brand Pudding Pops, a new product that one analyst predicted would bring annual sales of \$125 million.

Liquidation of inventories by many grocery stores because of high interest rates helped cause flat sales, Mr. Ferguson said.

NABISCO BRANDS

Nabisco Brands, based in New York, said second-quarter profits increased to \$70.5 million, or \$1.11 a share, from \$52.3 million, or 83 cents a share, in the period last year. The report included nontax-deductible expenses of \$9.3 million, or 15 cents a share, for the July 1981 merger of Nabisco Inc. and Standard Brands.

Sales increased by 7.8 percent, to \$1.52 billion, from \$1.41 billion the previous year.

"This was a case of a very strong showing in their core business, cookies and crackers," said Alan S. Greditor, food analyst for Drexel Burnham Lambert. Nabisco is trying to expand this core and divest itself of unrelated divisions.

For the first half of the year, Nabisco Brands' profits rose 18.8 percent, to \$129.7 million, or \$2.04 a share, from \$109.2 million, or \$1.73 a share, in the period last year. Revenues increased by 4.3 percent, to \$2.92 billion, from \$2.80 billion in 1981.

[From the Food Institute's Weekly Digest, July 31, 1982]

HIGHLIGHTS OF NSDA'S SOFT DRINK SURVEY—1981

Soft drink sales grew at a 3.8% rate, while value rose 13.2% to \$20 billion at the whole-sale level, according to the results of the National Soft Drink Association's Sales Survey of the Soft Drink Industry—1981. A total of 3.9 billion cases of soft drinks of all types were sold, and per capita consumption increased to 412.3 12-ounce unit equivalents.

Regular soft drinks accounted for 85% of the market, and diet drinks the remaining

15%. Categorized by flavor, cola represented 63% of the regular market, lemon lime 10.4%, pepper-type 5.4%, and orange 4.9% of sales. In the diet market, cola held a 65.3% share, lemon-lime 13.3%, and other flavors 21.4%.

Soft drink sales through food stores represented 59.4% of 1981 sales, while vending machines represented 16.4% of sales and other retail outlets 24.2%. Soft drinks packaged in cans accounted for 36% of the market, refillable glass 29%, plastic 19.9% and one-way glass 15.1% of the market. While sales in cans continued to decline from 1980's 37.2% share, the amount of soft drinks sold in plastic containers continued to increase from 1980's 17.9% share of the container market.

CASTRO SAYS CUBA WILL NOT REDUCE SUGAR OUTPUT DESPITE LOW WORLD PRICES

HAVANA.—Cuban president Fidel Castro said his country will not cut sugar production, despite low world sugar prices. "Sugar is the principal staple of our commerce with Socialist nations, at good prices, and we are protected by clauses in our agreements with them against the increase in the price of imported products we receive from them," he said in a nationwide address. Cuba's 151 mills produced 8.2 million tons raw sugar from the 1982 harvest ended in June, the second highest ever for Cuba.

But, he said, with world sugar prices around seven cents a pound and the ever-increasing price of imports from developed nations, it now takes two and a half tons of Cuban raw sugar to buy what one ton bought in 1970. "We have difficulties and our difficulties in coming years could be even greater," he said. They are due to the low price of sugar and other exports, "the pressure of imperialism" to limit credit, high interest rates on the financial market, the high price of imports and the difficulty in finding markets, he said.

The Soviet Union is expected to buy over three million tons of raw sugar from Cuba in 1982. Other communist states, including China, will buy one million tons. Past indicators suggest the Soviet Union will pay at least three to four times the world market price for Cuban sugar, western diplomats said.

"When one considers that Cuba receives its petroleum and many industrial products for about half the world price from the Soviet Union, and receives its military hardware virtually free of charge, it becomes clear just how much the viability of the Cuban economy owes to this aid," one diplomat said.

[From Sugar y Azucar, July 1982]

BRAZIL SUGAR EXPORTS A PROBLEM

At the moment, sugar represents the main commodity for export for Brazil, but presents the biggest problems from the point of view of price in the international market, principally because of the record harvests which have been obtained by competing producer countries and the recuperation of production of countries such as Cuba and India. Brazilian export specialists say the situation worsened when the Common Market decided to reduce the volume of beet sugar that should be used for the formation of stocks (2.0 million tons) and, consequently, increase its exportable surplus by 5.0 million tons.

Planters in Pernambuco and Alagoas, the main northeastern sugar cane production

states, will not have their debts (U.S. \$201 million) absorbed by the Institute of Sugar and Alcohol (I.A.A.), as has been hoped. The I.A.A. has absorbed the debts of planters in the state of Rio de Janeiro since these farmers were penalized by a delay in irrigation projects. Northeastern planters have large debts with foreign institutions and they had proposed that the I.A.A. receive in exchange for assuming these debts an equivalent quantity of export-type demerara and/or refined sugar.

[From Reuters, July 26, 1982]

PHILIPPINES TO MAINTAIN SUGAR LIQUIDATION PRICES

MANILA.—The Philippine Sugar Commission announced it is maintaining the liquidation prices of export and domestic sugar at 168 pesos and 165 pesos per picul, respectively, for crop year 1982-1983 despite the depressed market price of sugar. It said the move implements the directive of President Ferdinand Marcos for the Commission to encourage the expansion of sugar production and improve income of sugar farmers, planters and millers.

It was also designed to enable sugar producers to overcome the present softness of the world sugar price which is eight cents per pound or the equivalent of about 80 pesos per picul, the commission said. Commission chairman Roberto Benedicto said that the maintenance of the present sugar liquidation prices above the prevailing world market price is made possible by the government's protective pricing policy, under which the Philippines entered into long-term contracts for the export of sugar at an average price of 23.5 U.S. cents per pound or 271.90 pesos per picul.

[From Reuters, July 16, 1982]

BRAZIL IN DEFICIT \$680,000,000 BECAUSE OF LOW WORLD SUGAR PRICES WHICH ARE LESS THAN HALF THEIR COSTS TO PRODUCE—GOVERNMENT ATTEMPTING TO FINANCE LOSSES

BRASILIA.—Brazil announced a series of measures aimed at wiping out a 680 million dollar public spending deficit brought on by a fall in world sugar prices.

"The depression of international sugar prices, now at a level equivalent to less than half our internal production and transport costs... has put enormous pressure on government finances," ministers said in a statement.

Industry and commerce ministry officials said the authorities faced a deficit in the sugar sector of 120 billion cruzeiros.

They are forced to make a number of decisions to fill the gap. A presidential decree last night introduced an additional contribution on the producer price of sugar of up to 20 percent.

Government officials said other measures included a 35 percent rise in the consumer price of white sugar to 86 cruzeiros per kg, a 5.6 percent increase in the pump price of petrol and a 5.4 percent increase for alcohol.

The fall in world sugar prices could cut Brazil's export earnings from the commodity this year to 750 million dollars from 1.1 billion last year, the officials said in Brasilia.

The additional contribution provided for under the presidential decree will initially be set at 10 percent but can be raised to 20 percent in accordance with the financing needs for the sugar sector, the officials said.

The government also plans to rearrange some agricultural and agro/industrial pro-

grams, saving 15 billion cruzeiros, and the treasury will cover another 30 billion cruzeiros by issuing new money, they said.

The remainder of the deficit will be funded equally by the additional contribution and price increase for white sugar.

Producer prices for sugar, alcohol and cane will also go up between 22 and 24 percent but these are regular adjustments made to keep up with inflation, the officials said.

Industry and commerce ministry officials denied rumors that sugar and alcohol institute (IAA) president Hugo De Almeida may resign following the latest package of measures.

The officials said the latest moves had not changed the functions of the institute to plan and execute domestic policy and export sugar.

The only change is that the running of a fund financing sugar policy would be transferred to the central bank which would open a "sugar account" in the same way as it already has a "coffee account."

Almeida had been concerned, however by recent criticisms by Sao Paulo factory owners of government sugar policy, published in several newspapers, the officials added.

[From Reuters, July 14, 1982]

BARBADOS GOVERNMENT ANNOUNCES \$10,000,000 LOAN FOR ITS SUGAR INDUSTRY WILL ALSO GIVE PRICE SUPPORTS

BRIDGETOWN.—Barbados has announced a 10 million dollar soft loan and a new price support mechanism for its ailing sugar industry.

Prime Minister Tom Adams told parliament the government is offering the loan to Barbados sugar factories LTD, which owns the country's six sugar factories. This will be coupled with a 1982 support price of about 46.25 cents a kilo.

He said "without a strong and viable export agriculture Barbados will stagnate economically for many years to come. The earnings of the Barbados sugar industry abroad correspond almost exactly with the available cash foreign reserves of Barbados and have done so for many years."

Falling production, unseasonal weather, an alarming number of illegal cane fires and low export prices have hit the industry hard.

Export earnings fell from a 1980 high of 54.7 million dollars, when production reached 135,000 tons, to 25.7 million last year as it fell to 96,000, a figure expected to be repeated this year.

Some of the mainly private plantation owners have said, because of heavy losses suffered last year and this year, they cannot guarantee to produce a 1983 crop. Sugar industry officials said they need 25 million dollars to prepare for next year's harvest. Adams said the loan conditions will be announced later.

[From the Honolulu Advertiser, July 15, 1982]

PHILIPPINES LIKE U.S. SUGAR QUOTAS (By Fernando Del Mundo)

MANILA.—President Reagan's imposition of import quotas on sugar could be a "saving grace" for the Philippines—not only helping its economy but also putting a lid on a potential "social volcano."

Analysts say Reagan's move could provide the Philippines a market for its sugar with a guaranteed price. They say it may prove a "saving grace" for a country that depends

on sugar as its major dollar earner amidst a slump in the world sugar markets.

With other traditional exports, such as coconut and copper, battered by the recession in the west, the nation's economy has been foundering.

The outlawed Communist party of the Philippines has taken advantage, stoking peasant discontent. It has gained adherents and the party's military wing, the 5,000-strong New People's Army (NPA), is growing.

Guerrillas regularly come down from the hills to collect "taxes" from peasants and warn sugar planters to pay workers just wages or face "NPA justice."

Recently, Communist guerrillas assassinated a town mayor and four of his aides in the "sugar bowl" island of Negros. The attack came after the mayor was set free despite charges that he murdered seven farmhands and was responsible for the disappearance of eight others.

In Calatrava town, also in Negros, authorities are looking into the murders of 23 people, allegedly committed by a vigilante group led by a former national police officer.

Activist priests and nuns say the Philippines could become the "Cuba of the Far East." They say the revolt could erupt in Negros, where the disparity between rich and poor is more pronounced than anywhere in this largely Roman Catholic country.

A study commissioned by the Association of Major Religious Superiors called Negros a "social volcano." Says the study, "Unless something radical and immediate is done about this situation, there will be an explosion which will shake the entire nation."

Philippine officials scoff at such talk. "I've heard of this volcano in my youth," said a sugar planter. "I still have to see an eruption."

As for the nation's sugar market, the government of President Ferdinand Marcos has done a creditable job in easing the impact of the depressed sugar economy.

Since post-World War II years, all of the sugar the Philippines produced went to the U.S. until 1974 when the U.S. Sugar Act lapsed and import quotas were scrapped.

That forced the Philippines to sell on world markets, where prices have been erratic, from a high of 64 U.S. cents a pound in 1974 to about 6 cents a pound at present.

Last May, Reagan announced the U.S. was temporarily reviving import quotas to protect American farmers. Traditional U.S. sugar suppliers were given a fixed share with the Philippines getting 13.5 percent, the third largest after the Dominican Republic and Brazil.

Reagan's move further dampened sugar trade, hitting most Third World suppliers severely. However, it has had no impact on the Philippines.

In December 1979 when the price of raw sugar was 40 cents a pound, the Philippines sold 2 million metric tons at 23 cents a pound, spread over a four-year period. The contracts held despite market booms and busts.

Apparently the government, which tightly controls sugar trading, has learned its lesson. In 1974, it lost an estimated \$250 million by waiting for the price to go up from 64 cents. The market suddenly collapsed and sugar stored in warehouses and swimming pools rotted.

This year, the Philippines—one of the world's leading sugar suppliers—is expected to produce about 2.3 million metric tons of

the crop. Half for export and half for domestic use.

The volume allotted for export is split between long-term buyers and the open market. However, domestic consumption has gone up in recent years, forcing the government to renege on some of its contracts, with the U.S. again giving the Philippines quotas, the government's marketing problems appear solved.

"It's a long way away from 6 cents a pound to 20 cents a pound," one analyst said. "Reagan is not going to remove the quotas unless the American farmers are assured of profits."

[From the Honolulu Star-Bulletin, May 12, 1982]

PROTECTING DOMESTIC SUGAR PRODUCERS

Every time the issue of protecting domestic sugar producers comes up in Washington, the critics claim that the consumer is being cheated. Funny that we don't hear the same outcry against wheat or dairy price supports.

The domestic sugar industry, in particular the Hawaii sugar industry, is fighting for its life against a flood of subsidized foreign sugar that is being dumped on the American market at prices far below production costs.

The Reagan administration is no friend of agricultural subsidies, but it agreed last year to go along with price supports for sugar in exchange for Southern votes for the administration budget proposals. That sort of a deal is as old as politics, but you'd think it was totally unprecedented if you read comments like those of columnist William Safire on this page last Friday.

Now the administration is being further berated for imposing import quotas on sugar rather than pay millions of dollars in price supports. Besides the obvious financial consideration, this alternative has the advantage of discouraging foreign exporters and perhaps cutting back world production.

It has been widely accepted that agriculture requires special treatment from government to ensure its survival, even in countries that are otherwise committed to a policy of nonintervention in economic matters. To quote Claude Villain, agriculture director of the European Economic Community: "Obviously we could not allow the storms and tempests of international markets simply to destroy our agricultural economy."

Nowhere is that observation more apt than in Hawaii. Loss of the sugar industry would be nothing less than a disaster for Hawaii's economy, agricultural and otherwise.

If the domestic sugar industry were allowed to be destroyed by dumping of foreign sugar, American consumers would be entirely at the mercy of foreign suppliers and the notoriously volatile world market. It is by no means clear that they would get cheaper sugar over the long run that way.

We cannot endorse protection for domestic sugar at levels that permit large profits, but that is not at issue. We are talking about survival. The case for protection is strong.

[From the Washington Post, Aug. 11, 1982]

AMBER WAVES OF GRAIN BLIGHT TRADE AMITY WITH EUROPEAN ALLIES (By Ward Sinclair)

Chris Righton, a prosperous wheat farmer in England's central cereal belt, doesn't much like it, but some people think of him as a bogeyman taking food from the table of his American farmer friends.

Righton is a bit player in the drama of growing tension between the United States and the 10-member European Economic Community.

Most of the sources of that tension are well known: defense policy, the Soviet gas pipeline, steel subsidies. Less well known but equally central is agriculture.

Hounded by recession at home and sagging farm sales overseas, the Reagan administration, U.S. farm organizations and farm state members of Congress have begun a fierce attack on the agricultural policies of the European Economic Community, stirring concern on both sides of the Atlantic over the possibility of a farm trade war.

The U.S. complaint is that European governments are unfairly denying U.S. farmers sales they would otherwise have, partly through outright protectionism, partly through subsidies without which European farmers could not compete.

A basic goal of EEC policy is to promote domestic social stability by keeping farmers prosperous and by keeping them on their farms, even though they may not be efficient enough to be competitive with American farmers.

The EEC achieves its aim by keeping internal prices high and shielding its farmers from foreign competition through a complicated system of price supports, common pricing, minimum import prices, import duties and export subsidies.

Some U.S. products—notably corn gluten, soybeans, vegetable fats and oils—go into the EEC duty free, largely because they are unavailable domestically.

But many other U.S. products are subject to import duties that make them unattractive and to an EEC policy of buying first from member nations. The EEC policy has encouraged production and has led to surpluses of some commodities, which are moved into world markets.

"A major concern here," said one U.S. official, "is that these EEC policies will lead to a rewriting of world agricultural trade practices. Under their approach, Europe would be insulated from these changes. When the world has too much and other countries reduce production, the EEC members don't adjust because they are protected. It has happened with wheat, wheat flour, poultry and eggs, meat and sugar. The EEC is not responding."

Yet there is an opposite side to this story. Notwithstanding U.S. complaints, huge ironies run through the picture. For example:

As a whole, the EEC is the United States' most lucrative agricultural market. This country will sell \$9 billion worth of agricultural goods to EEC nations this year, yet in return buy only \$2 billion worth, much of it in the form of dairy products and wine.

While the administration criticizes EEC subsidies, the EEC points right back at U.S. farmers' government help: price support loans, direct income supplements, grain storage payments, marketing orders, export credits, low-interest operating and farm-purchase loans and other devices.

Subsidy, as such, may be in the eye of the beholder. An Organization for Economic Cooperation and Development study found that between 1976 and 1978 U.S. and European national governmental budget outlays for agriculture—that is, "subsidies"—were almost the same. Spending averaged 39.2 percent of agricultural value added in the EEC, 37.6 percent in the United States.

A new paper by the Department of Agriculture (USDA), following the line that the Europeans are plunging into new export

markets, reports that EEC shipments to the Soviet Union are up more than 200 percent since 1979. The report does not note that the United States cut its share of the Soviet market in a major way by imposing a partial grain embargo in 1980.

A frequent charge that EEC exports impinge on U.S. market runs into statistical trouble. In wheat, for example, EEC exports doubled between 1969 and 1981 to 14 million tons, but the EEC's share of the world market dropped from 16.6 to 14.9 percent.

U.S. exports, meanwhile, went from 16.5 million tons to 41.9 million tons, and the market share moved from 38.4 to 44.8 percent.

This is roughly where a Chris Righton comes in.

When an American wheat farmer sends a bushel of his grain to, say, the Soviet Union, he will get about \$2.50 for it. Because the United States dominates world wheat trade, the American price effectively becomes the world price.

But when Righton sends a bushel of his wheat to the Soviets, he will get about \$4.53 for it. Same type of wheat, same quality, same purchaser, perhaps even the same export trader. The difference is that EEC policy guarantees Righton a price for his grain by subsidizing his effort, and U.S. farm policy does not.

An argument put forth by EEC members is that the United States, instead of complaining about the subsidy, should take steps to force up world prices. That appeals to U.S. farmers, but the Reagan administration says such a move would intrude in free markets and price U.S. farmers out of world markets.

Farmer Righton, on a visit here this year, expressed a common EEC outlook: "I don't think we're as damaging to U.S. interests as we are made out to be. We in Europe are, after all, your very best customers. Your administration is putting a smokescreen over American farmers' eyes: By promising to discipline the EEC, they avoid having to do anything directly for farmers at home."

The whys and wherefores are in hot dispute, but the gloves, clearly, have been removed. Both here and in Europe there is concern that Agriculture Secretary John R. Block's threats will turn to more contention reminiscent of the painful "Chicken War" over curbs on U.S. poultry sales in the 1960's.

After Block told the House Agriculture Committee last winter that "we are going to do battle with the EEC wherever and whenever it is necessary," Chairman E. (Kika) de la Garza (D-Tex.) admonished him to cool it.

Don't pick a fight with America's best farm market, de la Garza warned. But the warnings continue to roll from the administration.

"We have only one alternative," Block said in a speech this summer. "That alternative is to deviate temporarily from our free-market stance and engage in costly short-run trade wars. If that is what it takes to achieve the principles of free markets, then we'll have to start looking more seriously in that direction."

As one approach, U.S. agricultural interests have taken complaints about unfair subsidy and competition to the General Agreement on Tariffs and Trade (GATT) over such issues as wheat flour, poultry, pasta, canned fruits and raisins, Mediterranean citrus policy.

More are likely to come as the United States presses its cases.

The Europeans, for their part, seem not cowed. Claude Villain, EEC director general for agriculture, recently told a Minnesota audience, "Europe is not going to abandon its agriculture. . . . It is important that you on this side of the Atlantic should realize this."

Edith Cresson, the French minister of agriculture, met with Block late last month and, according to sources, delivered the same message in an acrimonious encounter. European embassy agricultural attaches repeat the theme whenever meeting with Americans.

Block and other administration farm spokesmen have tempered their rhetoric somewhat since June, but the tensions remain. And on Capitol Hill there are moves to convert Block's talk into legislative remedies to boost U.S. farm exports with the same type of subsidies the secretary denounces.

Congress already has begun moving to implant a new system of export subsidies for American farmers. The Senate, for example, adopted in its budget reconciliation bill last week a provision allowing up to \$190 million in payment to farmers to meet "unfair competition" from abroad.

Sen. Jesse Helms (R-N.C.), Agriculture Committee chairman, was the chief sponsor of the subsidy proposal. "The EC has not stopped their unfair trade practices," Helms said. "It's time we gave them a dose of their own medicine."

The House version of the reconciliation bill contains no such provision, but Rep. Tom Hagedorn (R-Minn.), among others, is pushing legislation similar to the Helms approach. The House Agriculture and Foreign Affairs committees have scheduled a general hearing for today on the agricultural export issue.

The administration has not yet taken a formal position, but officials at USDA see these legislative approaches as ways of putting pressure on the European Economic Community to be more conciliatory in allowing U.S. products into their markets and in reducing its subsidies to farmers.

"We have had no export subsidies since 1974," one official said, "but if we did this, we would impress the Europeans. But it could lead to some serious give-and-take. . . . No one wants a trade war, but this is highly political."

Tony Bond, a British agricultural attache here, agreed, but from another perspective.

"If the United States retaliates, we could be back to the chicken wars," he said. "We couldn't complain if Congress approved export subsidies because we have them. We would say it's all very well, but it makes nonsense of the row you're supposed to be having with us." ●

A SALUTE TO EDWARD J. DERWINSKI

● Mr. DOMENICI. Mr. President, occasionally, those of us in public service are privileged enough to be remembered by a constituent whose loyalty goes beyond the boundaries of the voting booth at election time, and whose high regard for the efforts of his representatives leave the realm of the political and manifests itself in a more personal manner.

Recently, I received such a tribute by a newcomer to the State of New Mexico, Mr. Leopold Sobanski, in

honor of his Representative of many years, the Honorable EDWARD J. DERWINSKI of the Fourth Congressional District of Illinois, who, regrettably, will soon be leaving public office after many years of dedicated service.

Leopold Sobanski's salute to his former Congressman provides us with a model for the kind of excellence that all public servants should strive to achieve, and a welcome reminder that our efforts do not go unnoticed, nor is our job without the most heart warming of rewards.

Mr. President, I ask that Mr. Sobanski's tribute to Congressman DERWINSKI be printed in the RECORD for all of us to enjoy.

The tribute follows:

A SALUTE TO EDWARD J. DERWINSKI

Earnest was he in each action
Did his best to serve the land,
Warned against all foolish spending
A man trusted to the end.

Reaching out for good of nation
Dared he face his critics all,
Justice was idealism—

He obeyed its every call
Definite was he in opinion,
Ever kept an open mind,
Represented well his people

Placed his heart in task assigned.
Win or lose he cast his wisdom
In debate in Congress Hall
'Nd won trust of those around him,
Was admired by them all.

So his curtain now is lowered
King who wielded well his pen
Instrument he told his people
To use readily now and then.

Let us rise now, shout our tribute to Ed
Derwinski, Congressman.

JULY 29, 1982. ●

REGULATION OF PECANS

● Mr. HOLLINGS. Mr. President, I call attention to the very unwise action taking place at the U.S. Department of Agriculture regarding pecans. The Department has proposed regulations that greatly change how this crop is marketed. While the White House goes forward with efforts to limit Federal regulation and governmental involvement, I find it curious that the administration would press forward with an agricultural marketing order for pecans. The order would be a burden for small producers and shellers resulting in a price increase to consumers.

Mr. President, I ask that a cogent article by Mr. Edward H. Sims of the Editor's Copy Syndicate (Vol. 56, No. 32) be printed in the RECORD at the close of my remarks. Mr. Sims does an excellent job of presenting the case against the proposed pecan marketing order and I commend it to the Senate.

The article follows:

BLOCK AND PECANS

Most Americans may not know it but until recently pecans grew only in the U.S. southeast and southwest. They are a uniquely American nut and only in recent years have

the Israelis and others begun to grow pecans.

The best thing about the American pecan is that it's so tasty that every year for many years all nuts have been sold at high prices—without regulation, controls or supports from the federal government.

The pecan crop and industry, then, has been a model of the American free enterprise system. Growers could easily sell their nuts, at good prices; shellers could and did sell their shelled product at good prices.

This is exactly the kind of marketing system that best exemplifies the philosophy of Ronald Reagan and his administration. No controls, no regulation from Washington. Success and sellouts every year. (By contract, almonds and walnuts are subject to federal regulation; the government has storage warehouses full of both.)

Ironically, there is now an effort being made—by the Reagan Administration—to begin federal regulation of the pecan industry. Certain large growers, and others, believe they can make more money if the industry is regulated by a joint board in Washington. The consumer will, of course, pay if they make more money with higher prices.

A not very ingenious idea among growers is to tax shellers; in other words, to make them pay for the regulation program—which shellers don't want, naturally enough, to do.

When news of this regulatory attempt reached certain members of Congress they protested vigorously. But for some reason the move within the Department of Agriculture was so committed even warnings and protests from one or two top White House advisors, and key senators, went unheeded. Secretary of Agriculture John Block avoided telephone calls from protesting senators and congressmen until he had announced the effort would be continued with several department hearings.

Interestingly, the department had just finished asking for views from the industry; opposition to the idea of regulating the pecan industry ran over four to one against the new tax and control effort.

What, then, is behind this unReagan-like effort to increase the regulatory power of the federal government where not needed or justified? Who seeks control of the industry, a new tax and, almost certainly, higher prices to the consumer? ●

FISCAL YEAR 1982 DEFICIT AND OUTLAYS

● Mr. HOLLINGS. Mr. President, the Wednesday, August 4, edition of the Wall Street Journal carried an editorial entitled "Stealth in the Night." In it, the paper claimed the Congressional Budget Office's estimate of the fiscal year 1982 deficit is about \$140 billion and that fiscal year 1982 outlays are expected to run about \$30 billion over the OMB estimate of \$731 billion. Both these statements are false.

The Director of CBO, Dr. Alice Rivlin, testified before the Budget Committee on July 27. In her testimony, she stated that the fiscal year 1982 deficit would be in the range of \$109 to \$114 billion and that outlays were projected to be approximately \$734 billion.

Mr. President, I ask that a copy of a letter from Dr. Rivlin to the editor of the Wall Street Journal which points out the error be printed in the RECORD.

The letter follows:

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., August 5, 1982.

Mr. ROBERT BARTLEY,
Editor, the Wall Street Journal,
Washington, D.C.

DEAR MR. BARTLEY: In your editorial "Stealth in the Night" of August 4, 1982, you erroneously reported that the Congressional Budget Office would soon release a revised estimate of the fiscal year 1982 deficit at around \$140 billion. You indicated that this estimate would be based on a \$30 billion increase in expenditures above the \$731 billion estimated by the Office of Management and Budget in its mid-session review. These numbers are totally inaccurate.

In fact, I already released CBO's updated estimates for 1982 in testimony before the Senate Budget Committee on July 27, 1982. This testimony was summarized in your own newspaper (page 3 of your July 28th edition). I stated that outlays for 1982 would be approximately \$734 billion, very close to the \$731 billion estimated by OMB. I estimated 1982 revenues at between \$620 and \$625 billion, leaving a total 1982 deficit of between \$109 and \$114 billion—again, this is similar to the OMB estimate of \$109 billion.

The CBO has no intention of issuing a re-estimate of the Fiscal Year 1982 deficit next week. Moreover, since Fiscal Year 1982 is nearly over, it would not be possible for the estimates to change by the amounts indicated in your editorial.

Sincerely,

ALICE M. RIVLIN,
Director.●

JUDGE GREENE'S OPINION ON THE SETTLEMENT OF THE UNITED STATES AGAINST A.T. & T. ANTITRUST SUIT

● Mr. HOLLINGS. Mr. President, yesterday Judge Greene issued a truly historical opinion on the settlement presented by the Department of Justice and A.T. & T. to resolve the current antitrust litigation. In this opinion, Judge Greene states that the Government had presented sufficient evidence of antitrust violations by A.T. & T. in numerous areas of the telecommunications business. Further, the judge found that the heart of the proposed settlement—the divestiture of the local operations of A.T. & T.—was in the public interest. This finding coincides directly with this Senator's consistently held view that only through such divestiture could we have a genuinely competitive telecommunications industry.

Judge Greene also found that the settlement proposed by the parties had certain deficiencies and ordered a series of important modifications that I believe are in the public interest and that must be agreed to if the settlement is to be accepted. First, the judge helped insure the financial viability of the local telephone operations by al-

lowing these companies to market terminal equipment, to keep publishing the "Yellow Pages," and to enter new fields upon a showing that such entry would not impede competition. He also made sure these local companies would have a favorable debt/equity ratio. Second, the judge found that because of first amendment concerns, A.T. & T. should be prevented from becoming an "electronic publisher" over its own transmission facilities for at least 7 years.

Finally, the judge will continue close oversight of the implementation of the settlement. All of these modifications are certainly beneficial to the health of our national telecommunications and information system.

I am particularly glad to see that Judge Greene will maintain his tight control over this case. The A.T. & T. antitrust case is of tremendous historical import. It has required great skill, persistence, judgment, and professionalism by all involved. But the person who has truly risen not only to but above the task has been Judge Greene. Yesterday's masterful opinion by the judge again shows how fortunate we all are to have him on the bench and to have him in charge of this case. The public has greatly benefited from his impressive work, and I congratulate him.●

S. 2828—OLDER AMERICANS HOUSING DEMONSTRATION ACT OF 1982

● Mr. DODD. Mr. President, yesterday I introduced S. 2828, the Older Americans Housing Demonstration Act of 1982, and explained why we desperately need such legislation. I ask that the text of this bill be printed in the RECORD.

The text follows:

S. 2828

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Older Americans' Housing Demonstration Act of 1982".

STATEMENT OF FINDINGS AND PURPOSE

SEC. 2. (a) The Congress finds that—

- (1) older Americans face unique housing problems created by their often lower, fixed incomes and today's tight housing market;
- (2) many older Americans live in dwellings which have more space than they need, want, or can afford, and some wish to sell their large homes and move to smaller, more manageable units, but cannot;
- (3) other older Americans wish to remain living in their homes but find themselves "house rich" and "cash poor" and cannot unlock their home equity to help pay ever-spilling utility, tax, repair, and maintenance bills;
- (4) housing assistance programs now available do not address the special needs of these older Americans; and
- (5) programs should be designed and implemented so that those senior citizens who wish to remain in their homes can convert home equity into income through such means as deferring property taxes, and

those senior citizens who wish to sell their homes can buy or rent smaller units thereby making the large homes vacated available for younger, lower income families.

(b) It is the purpose of this Act to provide for a demonstration and evaluation of programs to meet the housing needs of older homeowners.

AUTHORIZATION OF DEMONSTRATION PROGRAM

SEC. 3. (a) The Secretary of Housing and Urban Development shall promptly initiate and carry out during the fiscal year beginning on October 1, 1982, a program for the development, demonstration, and evaluation of improved methods, concepts, and techniques which will assist older homeowners who (1) wish to sell their homes but are unable to purchase or rent a smaller unit without assistance, or (2) wish to stay in their homes but are unable to pay the utility, tax, repair, and maintenance costs.

(b) In selecting groups of homeowners and projects to receive assistance under this Act, the Secretary shall assure that a broad spectrum of senior citizens, localities, and project types is represented.

SCOPE OF DEMONSTRATION

SEC. 4. (a) The housing assistance methods, concepts, and techniques to be demonstrated under this Act shall include—

(1) in the case of older homeowners who wish to sell their houses, a demonstration of the advisability of (A) giving such homeowners priority under existing programs, and (B) revising regulations such as the asset test which may prevent such a priority from being given;

(2) a demonstration of the feasibility of implementing procedures to assure the availability of large homes which are vacated by older homeowners to nonelderly, lower income families receiving assistance under section 8 of the United States Housing Act of 1937; and

(3) a study and demonstration of ways for older homeowners who do not wish to relinquish residency to convert their home equity into income.

(b) In carrying out the provisions of this Act, the Secretary shall coordinate and jointly target resources with appropriate other agencies such as the Administration on Aging of the Department of Health and Human Services.

REPORTING REQUIREMENT

SEC. 5. (a) Not later than December 31, 1982, the Secretary shall transmit to the Congress proposed regulations to carry out the demonstration program authorized by this Act. The Secretary may not enter into any contracts or other obligations pursuant to this Act prior to the expiration of 30 days following the transmittal of the report required by this subsection.

(b) Not later than December 31, 1983, the Secretary shall transmit to the Congress a final report on the activities undertaken pursuant to this Act.

AUTHORIZATION

SEC. 6. Of the additional authority to enter into annual contributions contracts under section 5(c) of the United States Housing Act of 1937 for the fiscal year beginning on October 1, 1982, the Secretary may utilize up to \$10 million, to the extent approved in an appropriation Act, in that fiscal year to carry out the older Americans housing demonstration program authorized by this Act.●

THE HIGH COST OF DEFENDING AMERICA: IS THE PRICE OUT OF LINE?

● Mr. GOLDWATER. Mr. President, inflation has been the overriding problem of our economy and it has been reflected not only in the increased costs of weaponry for our military, but also in the increased costs of just plain day-to-day living. For example, we can look at an aircraft like the F-15 Eagle fighter and we see that in a matter of 6 years it has increased 137 percent in price.

Now, if we look at our new Senate Office Building, we will see that it has gone up well over 200 percent. Likewise, the Rayburn House Office Building, finished some time ago, had a cost increase greater than that being experienced by our weapons system. A commercial aircraft, the Boeing 747, has increased 137 percent in the same time. The jeep, with which all of us are acquainted, has increased 69 percent.

Yet, at the same time, a man's two-piece suit has gone up 121 percent, a sirloin steak 152 percent, bread 187 percent, a four-bedroom house 200 percent; so as we level our guns in this period of excitement when we are debating an unheard of tax increase, a period in which we continue to be afraid of tackling the items in the budget that can really be effectively cut, let us not aim all of our shots at the armed services and our weapons, because their increases do not begin to compare with just the plain ordinary costs of daily living. I ask to have printed in the RECORD a very effective article on this by Deborah Meyer, appearing in the Armed Forces Journal of August 1982.

The article follows:

[From the Armed Forces Journal, August 1982]

THE HIGH COST OF DEFENDING AMERICA: IS THE PRICE OUT OF LINE? (By Deborah G. Meyer)

Cost overruns are not simply a 20th century curse. Governments have been plagued by them for as long as governments and government projects have existed. It's an easily explained phenomenon, but not easily corrected. Poor estimating procedures; unrealistic inflation rates; stretched out procurement schedules; labor disputes; technical problems; budget perturbations; and elaboration of original requirements are but a few of the many factors that can wreak havoc on the best price estimates offered by the most well-intentioned bureaucrats.

INFLATION: HARD TO DESCRIBE, EASY TO RECOGNIZE

There is no way to deny the fact that the cost of weapons systems has increased dramatically over the past five, 10, 15, years; a \$2,200 ¼-ton jeep in 1967 now costs well over \$12,000. A look at other standard weapons in the table on page 42 will show that costs of other basic military essentials have also risen substantially.

But skyrocketing prices have affected every facet of American life over the past decade, not just weapons systems. You don't

get change back from your dollar at McDonald's anymore. Most couples can't afford to buy a home while they're still young, and little Johnny down the street is going to have to save every penny of his dollar-a-week allowance for a couple of years before he can afford to buy his first bicycle.

Rapid rises in energy costs, food prices, new home and car prices, and exorbitant mortgage interest rates have had basically the same effect on consumer prices that other factors have had on defense items. A comparison of the Consumer Price Index (see accompanying table) for new homes, new cars, and other relevant consumer items shows that the same general cost growth trend existed over the past decade in both the civilian and military sectors.

Prices and increases shown in tables and graphs throughout this article to illustrate similarities in consumer and military cost growth are not, of course, directly comparable. Many of the variables that affect cost growth in a weapons system (learning curves, technological improvements, production rates, etc.) would not affect, say, the cost of a loaf of bread. It is not the intention of this article to purify the data for those kinds of differences. It should be noted, however, that a number of factors can also perturb consumer prices, i.e., a poor grain crop may send the price of that loaf of bread through the ceiling, while other food stuffs remain fairly stable.

The great nemesis of all cost estimates, inflation, probably more than any other factor over the past decade and half, is responsible for the great variations in price from original cost estimates. As one analyst points out to AFJ, "I wonder how well General Motors would do if they were asked to predict what a Cadillac would cost in 1992?" According to an April 13, 1982, GAO study—"Defense Budget Increases: How Well Are They Planned and Spent?"—the defense budget grew by \$72 million in current dollars from 1980 to 1982 (\$41.4 billion in FY82 dollars) and of that amount, \$30.6 billion—or nearly 43 percent—was directly attributable to inflation.

DoD's inflation figures are much higher than the national average during the same time period, and part of that is due to the types of materials (strategic metals, for example) that are needed to build many of the weapons systems.

A comparison of similar types of hardware sold commercially over the past five years, compared with some of the weapons programs identified by the Services in accordance with the Nunn Amendment requirements (cost growth of over 15 percent), illustrates that even in the highly competitive commercial market, prices have still risen significantly.

COMPARING THE COST GROWTH OF MILITARY VERSUS COMMERCIAL HARDWARE

(Dollars in millions)

	1977	1982	Percent change
Weapons systems:			
F-14 Tomcat fighter	\$18.9	35.7	89
F-15 Eagle fighter	12.9	30.6	137
A-10 Thunderbolt	5.8	11.5	98
SSN-688 submarine	319.6	671.5	110
Trident missile	20.2	12.5	-38
Commercial items:			
Boeing 747	35	83	137
Ship (containership)	75	110	47
Jeep (commercial)	4,599	7,765	69
Calculators (printing)	129	145	-65
Lawnmowers (riding)	775	1,100	42

¹ Dollars.

Sources: Military data from Merrill Lynch "Aerospace Defense 1982 Review." All other data obtained from private commercial sources.

DOD: CLOSELY WATCHED BY BIG BROTHER, BUT WHAT ABOUT EVERYONE ELSE?

When an Administration deems it necessary to make drastic cuts in social programs, the clamor of the perennial guns vs. butter debate is expected to get louder; when that Administration couples those cuts with increased defense spending the hue and cry is deafening.

As a result, the Department of Defense is now more closely scrutinized, in terms of how it spends this country's money, than any other Federal agency or department. Congress, while still a staunch supporter of a strong defense, feels a tremendous responsibility to the American public to ensure that what money does go into DoD's coffers is wisely spent.

That is not to say, of course, that DoD had a blank check from Administrations past and the blessings of Congress for whatever it wanted. In 1969, the Selected Acquisition Reporting (SAR) system was established, requiring the armed Services to provide quarterly updates on the progress of certain selected defense programs, including data on cost and performance. The SAR system became a legal requirement in 1976 under the DoD Authorization Act.

More recently, in an amendment to the FY82 Defense Authorization Bill, Sen. Sam Nunn (D-GA), in what has been hailed as one of the most important pieces of legislation in some time, introduced a requirement for the individual Services to report in addition to the SARs on any program under their purview that has increased in cost more than 15 percent in a given time period. When a particular system does exceed those cost levels, no additional funds may be obligated until the Service can justify the increase.

Although DoD and now NASA are required to report periodically to Congress on the status of selected major acquisitions, there is no standardized reporting system for any of the other Federal agencies or departments. Many show significantly higher cost overruns in their budget than does DoD, according to an April GAO report to Congress on the "Status of Major Acquisitions as of September 30, 1981: Better Reporting Essential to Cost Growth." Its data showed that 18% of the Federal government's 22 departments or agencies showed cost overruns greater than DoD's, in spite of the fact that most had fewer programs underway, and for the most part of much shorter duration. A comparison of randomly selected civilian programs which are fairly comparable in terms of length, shows that DoD actually fares better than average in terms of annual cost growth on a percentage basis.

Legislation has been proposed recently by Rep. Toby A. Roth (R-WI) to put the same onus of responsibility on all Federal agencies to report on selected programs in the same manner as DoD and NASA. Jack Borsting, Assistant Secretary of Defense Comptroller, has represented DoD at those hearings and, along with the GAO, supports the need for such a system.

A common example of how difficult it may be for the government to estimate the cost of any long-term project is the cost of government buildings. The Rayburn House Office Building for example, was originally budgeted for \$81-million; it ultimately cost taxpayers \$125-million. The Phillip A. Hart Building, now one year old, increased in cost

from \$47.9-million to \$137.7-million. Other examples are the Library of Congress' James Madison Building (from \$75.0-million to \$130.7-million) and the House of Representatives' Annex #2 (from \$15.0-million to \$25.5-million).

COST GROWTH COMPARISONS: MILITARY VERSUS NON-MILITARY GOVERNMENT PROGRAMS¹

[As of Sept. 30, 1981]

Program (year baseline estimate was made)	Agency/Department	Placement change from baseline estimate	Percent annual change (average)
Next generation radar (1981)	Commerce	104	104
Gas demonstration plant (1979)	Energy	72	36
Irrigation project (CO) (1967)	Interior	494	35
Distribution of terminals (social security) (1979)	Health and Human Services	88	44
Frangible approach light towers (1975)	Federal Aviation Administration	256	43
Space transportation systems (1972)	NASA	92	10
Sequoyah nuclear plant (1969)	Tennessee Valley Authority	514	43
Washington rapid transit (1969)	Washington Metro Transit Authority	225	19
Average		231	42
F-15 fighter aircraft (1970)	Defense	109	11
Pershing II missile (1978)	Defense	14	5
M-1 tank (1976)	Defense	293	59
MLRS rocket system (1979)	Defense	15	8
AH-1P (scout helicopter) (1980)	Defense	51	51
AV-8B Harrier (1979)	Defense	0	0
F-18 Hornet (1975)	Defense	220	37
Average		100	24

¹ Cost changes for military items are not based on cost estimates provided in original justifications for authorization appropriations from Congress. GAO says, but from estimates developed after the major portion of RDT & E had been accomplished.

² Editor's Note: Pershing II costs have increased 57 percent since GAO did this study.

Source: General Accounting Office's Report to the Congress, April 22, 1982, "Status of Major Acquisitions as of Sept. 30, 1981: Better Reporting Essential to Controlling Cost Growth."

HOW FEDERAL AGENCIES COMPARE IN ESTIMATING COSTS

[Projects with cost growth of more than 50 percent from baseline estimates]

Department or agency	Number of projects	Average cost growth in percent
Architect of Capitol	2	68
Appalachian Regional Commission	1	1,014
Corps of Engineers	130	51
Department of Commerce	8	53
Department of Defense	147	82
Department of Interior	33	152
NASA	14	54
Tennessee Valley Authority	10	264
Veterans Administration	12	74
Washington Metropolitan Area Transit Authority	2	220
Total	359	203

Source: General Accounting Office's Report to the Congress, Apr. 22, 1982, "Status of Major Acquisitions as of Sept. 30, 1981: Better Reporting Essential to Controlling Cost Growth."

ECONOMIC TROUBLES OVERSEAS

The U.S. of course, isn't the only place suffering from high prices. Continued inflation, low economic growth, and still rising unemployment have plagued Europe in much the same way, with similar effects on European prices. As a result, European weapons systems are no bargain. The British Ministry of Defense will not release figures on the unit cost of individual weapons systems to the press, and the French Embassy was unwilling to supply AFJ with those figures either. However, we were able

to obtain some comparable per unit figures on German systems. Comparing the costs of the German Leopard I and II with the US M-60 and M-1 tanks, US tanks may be a relative bargain. The Torando aircraft, roughly similar to an F-5E but configured with a swing wing, is also more expensive.

HOW WEAPONS COST HAVE INCREASED OVERSEAS:¹

[Costs per unit, in millions of dollars]

System	Cost at IOC	Cost today	Percent change
Leopard I (German)	\$0.6	\$1.3	116
Leopard II (German)	1.6	2.0	25
Torpedo (multi-national)	27.5	36.7	33

¹ Figures are approximate. Due to fluctuations in currency, inflation factors, pricing structure, etc., precise figures are not obtainable. Rate of exchange based on 2.45 deutsch marks. (Information obtained from German Liaison Office.)

VICTIM OF "HONEST" INFLATION FACTORS?

The Reagan Administration and the Pentagon fully realize that in a nation beset by economic woes, huge cost overruns in even the most important government programs are not acceptable. As a result, they are making every effort to ensure that poor management and unrealistic projections on the basis of low inflation rates are not the cause of increased costs in DOD. Much ado was made in February of the Administration's "honest" inflation factors (Mar AFJ) and how those factors will make per unit cost for weapons over the next several years seem much higher. Whether or not these more realistic numbers will make a difference in future weapons systems costs remains to be seen.

HOW INFLATION AFFECTS OUR LIVES: REMEMBER 1967?

Item	1967	1982	Percent change
Brooks Brothers 2-piece suit	\$145	\$320	121
Sirloin steak	1.14	2.87	152
Pepperidge Farm bread	.31	.89	187
4-bedroom house	39,000	120,000	208
Olds station wagon	4,807	11,849	149
Rolax men's watch	800	7,950	884
Machinegun	500	2,400	380
M-60 tank	198,000	1,200,000	506
1/4-ton jeep	2,218	12,549	466

Sources: Consumer prices from Forbes, Apr. 26, 1982. Military prices supplied by DOD.

● **Mr. SARBANES.** Mr. President, this year marks the 60th anniversary of the founding of the American Hellenic Educational & Progressive Association (AHEPA), an outstanding organization which for most of this century has provided a multitude of services to Greek Americans and has made many contributions to that great mosaic which is American pluralism.

Since 1922, when this organization was founded in Atlanta, Ga., its membership has grown to such an extent there are now AHEPA chapters throughout our Nation. AHEPA's membership continues to grow and includes a host of prominent Greek Americans and others, including many Members of the Congress of the United States.

The order of AHEPA, as its name indicates, was founded to assist Greek immigrants in adjusting to their new home and Nation. It has not, however, been limited to this effort. The nota-

ble achievements of AHEPA and its members over the past 60 years are ones in which we can all truly take pride. AHEPA has provided relief for victims of natural disasters both in this country and in Greece; built a dormitory for the residents of St. Basil's Academy in Garrison, N.Y.; promoted research and screening for Cooley's anemia; established an outstanding scholarship program which allows many young people to continue their education. In addition, AHEPA has undertaken many other projects to benefit Hellenic College and the Holy Cross Orthodox School of Theology, as well as the Greek Orthodox Church in this country as a whole.

Among AHEPA's main functions is the promotion of good citizenship, loyalty to this great Nation, and close and cordial relations between Greek Americans and Greece. AHEPA's have a special pride in both their country of origin, Greece, and their country of choice, the United States. Unquestionably AHEPA carries forward the enduring Greek principle of responsible participation in government and society.

The AHEPA family, which includes the auxiliary organizations of the Daughters of Penelope, Maids of Athena, and Sons of Pericles, has helped its members, their families, and friends to develop a keen sense of civic responsibility and patriotism, a love of family and church, and a devotion to democratic practices and ideals, all reflected in their concern for their fellow men and women and a dedication to a just society. AHEPA has expressed the finest precepts of Hellenism, formulated by the brilliant philosophers and lawgivers of ancient Greece, and vibrant today in the democratic ideals and institutions of the United States.

The AHEPA has succeeded in combining the best traditions of both the United States and Greece whose histories have been marked by a dedication to human justice and freedom. I know that my colleagues join me in wishing the Order of AHEPA continued success and good fortune in their efforts to carry on the finest traditions of both the Greek and American peoples. ●

THE MOREHOUSE SCHOOL OF MEDICINE

● **Mr. MATTINGLY.** Mr. President, I rise today to pay tribute to an institution in my State of Georgia and our capital city of Atlanta—Morehouse School of Medicine. Morehouse is the first predominantly black medical institution to be established in the United States in this century and one of only three in the Nation.

This school, which was established in 1975 with the mission of training

family-care physicians to serve inner city and rural areas of the country, observed a significant milestone on July 21 with the dedication of its \$6.5 million Basic Medical Sciences Building. This is the school's first permanent facility and was built with Federal and private funds.

The keynote speaker at the dedication ceremonies in Atlanta was the distinguished Vice President of the United States, the Honorable GEORGE BUSH.

My colleague, Senator NUNN, and I, being members of the Board of Trustees of Morehouse School of Medicine, had planned to be in Atlanta for the dedication. We were prevented from doing so at the last minute because of the Senate consideration of the tax bill on that date. I was particularly disappointed because I had been accorded the high honor of introducing the Vice President.

Mr. President, I take this opportunity to commend and congratulate those individuals and organizations who have worked tirelessly to bring this new medical school into being. I ask to have printed in the RECORD at this point the prepared remarks of the Vice President.

The material referred to follows:

REMARKS OF VICE PRESIDENT GEORGE BUSH

Thank you very much ladies and gentlemen. I am very pleased to be here today with many outstanding educators—wonderful men and women who have dedicated themselves to helping people from all walks of life, people of all colors and political persuasions and especially our nation's poor.

I feel most comfortable and at home here. Certainly, I don't feel like William Allen White did in 1928. White was attending a Democratic convention as a reporter. Senator James Reed was scheduled to open the proceedings. As he stood at the rostrum, Reed looked around and found there were no ministers present to open the proceedings with a prayer, but he did notice White, a Republican, seated in the press gallery. So he said, "Gentlemen, since there are no ministers present, I shall call on my good friend, William Allen White, to open the convention with prayer."

White, boiling mad, strode to the podium and said, "Ladies and gentlemen, you will have to excuse me. You see, I am a little out of my element, and the fact is, I prefer the Lord does not know that I am here."

Well, ladies and gentlemen, I feel very much in my element here, and I am very glad that the Lord does know I am here.

I not only want the Lord to know, but the American people to know how important it is that we have gathered to dedicate the New Basic Medical Science Building of Morehouse School of Medicine. It is difficult for me to express my admiration and appreciation to you who have devoted your lives to the advancement of medicine in order that all men and women may lead healthier, longer and more productive lives.

Morehouse School of Medicine is the first and only predominantly black medical school to be established in the United States in the 20th Century. This is not a particularly impressive record for our country, in fact it is a tragic record, considering the burdens of our needy in today's society. But

no one can deny that the faculty and students of Morehouse are deserving of our praise and warrant our continued support for what they have done to advance the health care of our most needy citizens.

I read in your brochure that the mission of the Morehouse School of Medicine is "to train more minority students as primary care physicians by preparing them to appreciate the health needs of underserved populations and to understand the role of primary care physicians in meeting those needs." It is a simple declaration of purpose. It is also one that, in its subtlety, underscores all you have done and all strive to do.

Today as we consider the problems of the present and the burdens of the future, it is glaringly apparent that additional schools of medicine, such as this great institution, are needed throughout the United States.

In 1985, Morehouse School of Medicine will award its first, four year, medical degree. In order to assist in this endeavor, President Reagan, last September 15th, reinforced his belief that Morehouse and other historically black colleges and universities must be treated uniquely.

In an Executive Order, the President mandated that the Secretary of Education supervise the development of a Federal program designed to achieve a significant increase in the participation by historically black colleges and universities in federally sponsored programs. "This program seeks to identify, reduce, and eliminate barriers which may have unfairly resulted in reduced participation, and reduced benefits from, federally sponsored programs." The President added that: "This program will also seek to involve private sector institutions in strengthening historically black colleges." On a personal note, it is a source of pride that I have been asked by the President to actively participate in the development of black colleges and universities—an endeavor in which I am deeply involved and deeply committed.

It is in this spirit that Morehouse School of Medicine will receive \$2.6 million from the Department of Education.

The President has also taken action to save Meharry Medical College in Nashville, Tennessee from closing. We are absolutely determined that this prestigious institution, founded more than 100 years ago, which has educated more than 40 percent of all black physicians in the United States, will survive and maintain its stature as one of the great schools of medicine in this country.

We in the Administration strongly share your opinion that our black colleges and universities are a national treasure. We are determined not only to see them survive, but to see them grow and to see them prosper. We hope you join with us in making schools such as Morehouse, Howard, Tuskegee and others shining examples not only for generations to come, but as inspirations to men and women of our generation—those who are dedicated to seeking excellence for our society.

I am hopeful that we together will also inspire state and local governments along with the private sector, to involve themselves more actively in the affairs of this and other great black institutions and in the goals that we seek.

All of us have a responsibility to carry out what de Tocqueville saw as the uniqueness of the American people—and that is the propensity of one American helping another. We are, in a vitally important way, doing precisely that through institutions such as Morehouse School of Medicine.

To the students of this and other institutions, we must, as Mary McLeod Bethune wrote, leave, "a responsibility to our young people." It was in her Last Will and Testament in which she said, "The world around us really belongs to youth for youth will take over its future management. Our brethren must never lose their zeal for building a better world. They must not be discouraged from aspiring toward greatness, for they are to be the leaders of tomorrow. Nor must they forget that the masses of our people are still underprivileged, ill-housed, impoverished and victimized by discrimination. We have a powerful potential in our youth and we must have the courage to change old ideas and practices so that we may direct the power toward good ends."

Those beautiful words do not mask, but underscore the difficult challenge that Mary McLeod Bethune left to us. But we must pursue this challenge in our daily lives if we are to make America the land of liberty, justice, equality and opportunity for coming generations.

It will be through education that new opportunities for our nation's less fortunate will be provided. It will be through education that justice is furthered and bigotry scorched from the consciousness of people and by which true equality no longer is a dream, but a reality.

The responsibility educators and educational institutions face is enormous. But the achievement of great goals and the pursuit of high ideals are at best difficult. Together we accept these responsibilities, these challenges. And, in the face of all the burdens that make us weary, we must remember the words of Cicero and be inspired and comforted by them: "Courage is that virtue which champions the cause of right."

Congratulations to Dr. Sullivan, the faculty and the students of Morehouse. This is a great day for all of you. It's an honor for me to be part of this ceremony which commences a new era for this great institution.●

SENIOR EMPLOYMENT PROGRAM FUNDING

● Mr. BAUCUS. Mr. President, I am very pleased that both the Senate and the House of Representatives have included \$210.6 million for the senior community services employment program (SCSEP) in the supplemental appropriations bill, H.R. 6863. This funding will allow the program to continue operation beyond September 30.

The Senate has repeatedly affirmed its support for this successful program, most recently by passing Senate Resolution 340. This resolution, introduced by the distinguished Democratic leader, expresses the sense of the Senate that no action should be taken to terminate or otherwise weaken this program, which is authorized under title V of the Older Americans Act.

Title V programs have proven to be productive and cost-effective all over the country. Older Americans have found useful and satisfying jobs that have helped keep them active, involved, and self-supporting.

Mr. President, I fail to understand why President Reagan has proposed to eliminate this program. Thousands of hardworking older Americans are able

to share their experience and skills with others in their communities through title V programs. If SCSEP were terminated, these low-income senior citizens would be forced to rely instead on increased public assistance, such as food stamps and welfare.

While I believe that we must reduce Federal spending to get the budget deficit down to acceptable levels, I think it is shortsighted to pick the best, most cost-effective programs to make spending cuts.

Mr. President, I continue to be impressed by the achievements of the Green Thumb program in Montana, which operates under SCSEP. I would like to share with my colleagues some reports and profiles from that program, and I ask that they be printed in the RECORD.

The material follows:

WORKER PROFILE

Richard "Dick" Klang is a worker who was selected to go to work as a bus driver for the Shelby Senior Center. During the course of his Green Thumb physical, the doctor discovered that he had an aneurism and would not okay him to go to work. Area Supervisor, Dale Munyon, talked to the doctor to see if Dick would ever be able to go to work; the doctor would not give details but did say that in his experience, complete recovery for someone Dick's age was somewhat unusual, but he didn't rule it out completely.

After the diagnosis of the aneurism, Dick spent about a month in a Great Falls hospital and was then transferred to Spokane for surgery. In about another month, he was released from the Spokane hospital and returned to the Shelby area to continue his recuperation. This is an instance where the physical required by Green Thumb probably saved this man's life as he had no idea he was in any danger.

The bus driving job was still open as the Center Director thought all along that Dick would recover and that he would be able to work for them. As it turned out, she was correct and he is driving for the Center. After Dick was released by his doctor to return to work, he started slowly and is now up to completing a day's work, regardless of the number of hours that might be required. Some of his assignments consist of driving to Great Falls and he handles the trip well.

When this project was first discussed with Center Director, Elsie Robbins, it was agreed that she would place Dick on their payroll after a 90 day period (which will be up shortly). This is one of our better Centers as far as hiring Green Thumb workers is concerned as they have hired one worker as a cook and were instrumental in the hiring of another Green Thumb worker for the Senior Center in Kevin, Montana.

Dick is a very active, young-looking 77 and is well thought of by the people he works for and with. He praises Green Thumb for the opportunity to get back into the flow of life. He had the idea that he was of little use to anyone until his involvement with Green Thumb showed him that he was still important to his community.

PROJECT PROFILE

When the Department of Natural Resources and Conservation (DNRC) Forestry Division, at Missoula, Montana asked for

Green Thumb help, we had no idea of the many projects the workers would be involved in. The Forestry Division has a field approximately 10 acres in size of Ponderosa pine seedlings. Green Thumb workers fertilize, hoe, weed and prepare seedlings for transplanting throughout Montana. They also cull and tie bundles of willow and cottonwood seedlings for transplantation to the countryside as windbreaks. The DNRC buys Fir, Spruce, Tamarack, Ponderosa, and Lodgepole cones; the workers then thresh, sort, and weigh the seeds and start new trees.

Buildings and nurseries on the ground needed repair for office and storage space. The workers have painted, paneled, repaired ceilings, roofs, and floors, hung doors, insulated, and installed storm windows. Elsewhere on the grounds, the workers have repaired fence, rototilled pathways, and built a bridge over a drain ditch.

One of the most important "crews" in the State of Montana are the Smokejumpers and the Missoula Fire Coordination Center is known throughout the Northwest for its excellence. Green Thumb workers painted the Smokejumpers' dormitories and caulked windows. They have repaired fire fighting equipment and built new storage compartments.

Regina Munroe, 61, is a seamstress performing valuable support work for the Fire Coordination Center. She repairs sleeping bags, patches tents, and sews canvas covers for axes, shovels, and canteens. Periodically, she makes huge canvas "cardholders" that are designed to show when a fire fighter goes out and returns from a fire. The card holder is hung on a tree at the campsite.

Other Green Thumb workers involved in the projects are Charles Hackman, 62, John Lizotte, 61, George Kulju, 67, and Jack Sharman, 65.

The supervisors of these projects have nothing but praise for all of the Green Thumb workers.

WORKER PROFILE

In the autumn of 1903 a baby girl was born to the Lester family near Poplar, Montana on the Fort Peck Indian Reservation. They named the tiny papoose, Sarah. She grew up in the country. Her father provided for his family by raising vegetables, poultry, horses and from an occasional job cutting hay. The rest of the time he spent trying to collect wood for the winter. Fortunately, Sarah was able to enter school at age 10. She attended the Presbyterian Mission school in Wolf Point from 1913 to 1921.

In 1922, Sarah married Theodore Taylor Crowe. Her husband worked for farmers in the spring and fall. They had eight children, 7 boys and 1 daughter. Since then four of her children have died but she has gained 13 grandchildren and 14 great-grandchildren.

From 1938 to 1940, Sarah worked for the WPA in a sewing room. She made Khaki pants and shirts and baby blankets. In July of 1946, Theodore died from a liver ailment. She was left to raise 5 children alone. Sarah went to work wherever she could find it. She picked up maid work, washed dishes, and did work as a kitchen helper.

As Sarah neared retirement age, she applied for Social Security but was told she couldn't draw it because she didn't have enough steady work to build up her account. She received Supplemental Security Income until she went to work for Green Thumb. Sarah has worked for Green Thumb since 1979. She will finally have

enough paid into Social Security by 1983 to qualify for her own benefits. Her only other income is a \$75 monthly Veterans benefit she receives because one son was killed in Korea.

Sarah has worked for the past three years teaching others Indian handicrafts. She now works in the Tribal Cultural Center at Poplar where she will represent Sioux history through artifacts made and displayed at the center.

PROJECT PROFILE

The rural community of Geyser, Montana is located just off Highway 200, halfway between Great Falls and Lewistown. Older folks in Geyser and from the nearby community of Raynesford gather weekly at the school for a pot-luck style dinner and business meeting. It was at such a gathering on April 19, 1982 that Toni Austad and Dale Munyon met with the group to show the Green Thumb film and talk about the program.

While there, Dale and Toni learned that the Seniors were building a center in Geyser; that materials were available but there were no funds to hire anyone to do the work that would complete the center. Within a few weeks, Dale had completed a project intake with center representatives and begun a search for eligible workers. Unfortunately, he ran into considerable difficulty as the people he interviewed from the area were all above Green Thumb income guidelines.

The problem was solved by transferring a Great Falls worker to Geyser. Henry Clinton, who had previously requested a transfer, moved his home (a converted school bus) right next to the center. Henry, age 58, will be joined by another Great Falls worker, Robert Braun, age 61, who will share living quarters and expenses.

To date, work on the center has consisted of installing energy-saving windows and doors. Electrical wiring has been strung and pipes for plumbing placed in position—actual hook-ups will be done by local professionals. The balance of work to be completed will be installing insulation, partitions, and trim for doors and windows. The interior will also be sheetrocked, taped, and painted. In addition, a solar panel, donated by a Geyser resident, will be installed.

Members of the center are pleased with the progress made so far. In fact, one resident will be hiring Henry after the project is completed to remodel a bunkhouse.

[From the Circle Banner, Apr. 22, 1982]

DISPATCHERS PROVIDED BY GREEN THUMB

When a Circle or McCone County citizen is in an emergency situation or otherwise urgently needs assistance, they immediately think of the telephone number, 485-3405, and who answers? Often it is one of two Green Thumb employees Verna Wilhelm or Frank Vejtas, who are dispatchers at the sheriff's office and relay messages that are called in. Actually they are the liaison between the private citizen and the police, sheriff and the ambulance and are trained to relay messages.

McCone County has been benefitting from these two people, who are provided by Green Thumb, Inc. Sponsored by the National Farmers Union, the program is funded under Title V of the Older Americans Act. They hire people 55 and over, with limited income to work in local communities. Green Thumb employees work about 20 hours a week and do needed services that

otherwise would not be affordable by local communities.

Wilhelm has been a dispatcher here for two years and says, "It's a challenge and really interesting." When first taking the job it made her a bit apprehensive. There is a squawking two-way radio, a special line to the hospital, the ambulance and the log book. Every call is written into the log book, recording the message and time for a reference.

"The job is important and there's satisfaction in it, when it's done right," Wilhelm said. She lives in Circle now after farming and ranching near here for many years with her late husband. Now that it's spring she spends more time on the farm to help her son with the calving.

Summing it all up, Vejtasas says, a dispatcher is the central point for emergency calls—any emergency, fire, police, crime calls. "We receive the calls, then contact the proper authorities," Vejtasas remarked. "We have direct contact with other towns in the area too, like Glendive, Wolf Point, Richey and Jordan. Every call is logged."

A Circle native, Vejtasas entered the Army Air Corps after high school. Following that he was in the photographic business for ten years in Salt Lake City. The next 20 years Vejtasas was in the construction business in Denver, building homes.

Retiring now in his home town, he finds the dispatcher's job both interesting and feels he is providing a valuable service.

So Wilhelm and Vejtasas are among 250 Montana Green Thumb workers who demonstrate the assets of hiring older people. Green Thumb has discovered that older workers are more reliable and miss work less time for all reasons than younger people.

Presently, with President Reagan's budget slashes, the Green Thumb rates precariously on the verge of being abolished in September, unless it is reinstated. For this area the contact person for Green Thumb is Byron Erickson. Employers or applicants may contact him at 1105 E. Montana, Livingston, MT 59047 or call 222-7879 for information.●

S. 2784—THE MAJOR LEAGUE SPORTS COMMUNITY PROTECTION ACT OF 1982

● Mr. QUAYLE. Mr. President, I have been visited of late by a veritable parade of corporate executives whose missions have been to inform me of the possibility or probability of a plant closing in one or another Indiana city. Fort Wayne, Ind., waits anxiously for International Harvester to make a decision on whether or not to maintain its operations in that city. The strain on the city's economic and emotional stability is tremendous.

Oakland, Calif., faces the same dilemma as the courts ponder the Raiders' contemplated move to Los Angeles. Oakland will be left with \$1.5 million in unfunded annual indebtedness for their stadium without a professional team. It is interesting to note that the Raiders were the third most profitable league team last year, but the recent California court ruling will eliminate any need for loyalty on the part of the Raiders' owners, or for that matter, any NFL owner, to the city that has made them so successful.

The Major League Sports Community Protection Act of 1982, S. 2784, offers a city a sense of security relative to the investment that it must make in any major league team. S. 2784 clarifies the intent of Congress that the antitrust laws not apply to league decisions disallowing teams from abandoning a profitable location for the purposes of enhanced revenues. It also provides a similar antitrust exemption for any plan for sharing revenues among league teams, so that teams in smaller communities can be assured of economic strength and stability.

Baseball has enjoyed an antitrust exemption since 1922. This bill would provide an element of consistency in congressional policy toward all major league sports. The exemption will serve the interests of the entire league and the participating communities. Equally important is the protection provided the local taxpayers who have a proprietary interest in the success of their local sports facility.

We must approach any antitrust exemption with extreme caution. Antitrust law is a mainstay of our free enterprise system. However, the Supreme Court itself has urged the Congress to address the unique problem presented by sports and antitrust. Current litigation involving the Oakland Raiders has produced a clear conflict between Federal and State law. The Congress can clarify this conflict through passage of this legislation. Hearings have been held on the issue of sports and antitrust on nine different occasions since 1951. It is clear to me that the issue continues to surface, but has yet to be resolved.

There are many cities around the country that are very anxious to have an NFL franchise. A major league sports team provides an economic boost to cities—a happy note in these difficult times. Indianapolis, Ind., is one of those cities that has an eye on an expansion team. I fear that the NFL's thoughts of expansion will be fleeting dreams in the absence of a narrower antitrust definition for league sports. I, and many of my colleagues, want our home States to have the opportunity to compete for expansion teams. Those of you who already have teams want to keep them.

As I watch the industry exodus to the South, I am frightened by the implications for the economic stability of our Nation. I see its impact on individual communities in Indiana every day. My sympathies are with Lionel Wilson, mayor of the city of Oakland, as are the sympathies of at least 27 mayors who have signed a resolution in support of this legislation. I feel the same sense of remorse as I watch the pursuit of individual gain at the expense of so many.

A team that is an asset to a community and a community that is an asset

to a team should stick together. This type of cooperative community spirit is the essence of all team sports—and the essence of this legislation. Mr. President, I ask unanimous consent that I be added as a cosponsor of S. 2784 and I urge my colleagues to support this important step toward the stabilization and overall enhancement of team sports in the United States.●

JOSEPH MATLUK—OLDEST MEMBER OF UKRAINIAN AMERICAN VETERANS

● Mr. SPECTER. Mr. President, I am pleased to congratulate Joseph Matluk, a resident of Pennsylvania, who will be celebrating his 87th birthday on August 22. This occasion will be used to honor Mr. Matluk as the oldest veteran member of the Ukrainian American Veterans.

Mr. Matluk was born on August 22, 1895, in Western Ukraine and emigrated to the United States at the age of 18. He enlisted in the U.S. Army in 1917 and was assigned to Company B, 306th Sanitary Unit Ambulance Field Hospital in Columbia, S.C. He served until 1918 and received an honorable discharge.

Mr. Matluk is distinguished not only as the oldest member of the UAV, but also as one of the founders of the organization. The Ukrainian American Veterans was founded in Philadelphia in 1948. The group is composed of men and women of Ukrainian descent who have served in the Armed Forces of the United States. Although the UAV was not organized until after World War II, its membership includes veterans from World War I, World War II, the Korean conflict, and the Vietnam era. Mr. Matluk continues to be active in the UAV at Post No. 4 in Philadelphia.

The United States owes a great debt to all our veterans, but it is particularly heartening to learn of immigrants who, having spent only a few short years in this country, willingly enlisted in our Armed Forces when we needed them. My father was one of these people who after arriving from Russia in 1911, fought in World War I as a member of the U.S. Army. I have always been proud of my father's act of patriotism and Mr. Matluk and his family can be justifiably proud of his role in World War I and in the founding of the Ukrainian American Veterans.●

S. 1095: JUST WHAT DOES IT DO?

● Mr. ABDNOR. Mr. President, I believe it has been most unfortunate that Senate floor action on S. 1095 has been stalled for more than a year. Much of this failure, I believe, can be traced to a variety of misunderstand-

ings over this bill—both its scope and its intent.

This is a sound bill, one that has received wide support. The Southern Governors' Association met earlier this year. During the course of that session, the Southern Governors' Association adopted a resolution supporting the approach that was reported by the Committee on Environment and Public Works in S. 1095.

To help my colleagues understand what S. 1095 does—and does not do—I ask that a copy of the Southern Governors' Association resolution, together with a copy of key portions of the report by the Committee on Environment and Public Works, be printed at the conclusion of my remarks in the RECORD.

The material that is printed in the RECORD does not include information on what is in title III of S. 1095. As my colleagues know, the Senate has passed S. 2494. That important legislation, authorizing a water resources research program, extracts language that is essentially identical to title III of S. 1095. S. 2494 does not replace language in title I, II, or IV of S. 1095.

Therefore, whenever S. 1095 is considered by the Senate, I intend to move to delete title III. The remaining portions of S. 1095 should be addressed by the Senate. I would hope the Senate will be able to move forward on this bill before this year is over.

The material follows:

SOUTHERN GOVERNORS' ASSOCIATION—WATER POLICY IN THE SOUTH

The continued availability of water for all uses is an issue of major concern to the state government leaders of the South; and while some areas of the South are enjoying economic development and population growth in excess of the national average, this growth brings with it far greater demands on finite water supplies.

As major energy facilities and energy production in general require large amounts of water, a severe water shortage could hinder domestic energy production and impede progress toward energy independence. A lack of water in the South has national implications since the Southern States comprise the energy-producing region of the country. If existing energy production capacity is threatened by the current water shortage, the potential for expanded energy production capacity eventually will become non-existent.

Despite substantial investment, use of much of the nation's water remains restricted due to contamination, and water problems have begun to loom as a possible threat to the traditional mobility of American population and economic activity. This has been caused, in part, by the relegation of water programs to the academic and technical realm, which has resulted in inattention at the executive level to the major policy issues raised by water problems. Critical state resource decisions therefore are made at the program management level.

Unless the Administration, Congress, the states, and interest groups unite behind a comprehensive national water resource management strategy, critical decisions on

national water supplies and quality more than likely will be made through confrontational politics, with the prospects of long-term solutions dim.

Water policy in the South must be developed in such a way as to recognize the need for some uniformity in the management approach taken by each state. The need to insure adequate supplies of water for each sector, including energy production, must be a cornerstone of regional water policy.

Congress is currently considering legislation for a National Water Resources Research and Planning Act, which would establish a five-member National Board for Water Policy to replace the Water Resources Council. A five-member state advisory board would also be established to issue policy recommendations to the national board. Development of a sound basis for analysis will help to ensure that the Southern Governors are properly represented on the state advisory board, if legislation is enacted, and that water policies equitable to the South are considered. In addition, during 1982, Congress will review and reauthorize the Clean Water Act. The Southern Region should develop and have available sound information to input to this process.

The Southern Governors' Association, through its Lead Governor for Energy and Environment, should develop specific positions on these issues and communicate those positions to the Congress, or other appropriate body, to ensure that the unique needs of the South are considered in the development of national water policy.

GENERAL STATEMENT—BACKGROUND

The Federal Government spends several billion dollars a year for the construction of traditional water resources projects—dams, levees, sewage treatment plants, and harbor channels. Much of this work is undertaken with little participation by the affected states, and without the incentive to utilize scientific advances, which might dramatically improve the effectiveness of the project, or lead to less costly and more efficient alternatives.

This bill seeks to consolidate several existing programs into a less costly, more competitive approach that stresses continued assistance to various state water resources planning and research programs, and improve coordination among Federal agencies.

In recent years, members of Congress, officials of the Administration, and other levels of government, and members of the public have expressed a need for greater attention to our national water resources program. As a focus for an effective national water policy, it was argued that a more independent organization was needed. Existing organizations, for a variety of reasons to be discussed later, proved ineffective.

At the same time, many argued that it was essential to encourage greater state participation in the development and administration of our water resources.

Despite these concerns, the Administration's budget proposes to rescind \$5,000,000 in fiscal year 1981 funds for the Water Resources Council (WRC) and \$11,800,000 for the Office of Water Research and Technology (OWRT), a branch of the Department of the Interior. The budget then recommended the abolition of both of these offices by not providing any fiscal year 1982 funds. The Water Resources Council is the only inter-agency group empowered to oversee a coordinated national water policy. The Office of Water Research and Technology, a combination of earlier programs, funds the 54

state water research institutes, as well as other important water research programs.

In place of the WRC, the budget document announced the creation of an Office of Water Policy within the Department of the Interior. As the vast majority of the dollars spent on water resources work is appropriated to departments other than Interior, there is concern that such a change would produce a lack of independence which would be detrimental to water resources. Further, there is concern over the cutoff of funds, especially for the state planning agencies, funded by WRC, and the state water research institutes, funded by OWRT.

While the amounts of money are modest in the overall perspective on the Federal budget, these funds are often critical to the effective operation of these state-oriented organizations.

The Committee voted, in its March 15 recommendation to the Budget Committee, to transfer \$40,000,000 from the Corps of Engineers construction general account to finance a reduced level of WRC and OWRT activity in fiscal year 1982.

Subsequently, the Subcommittee on Water Resources scheduled hearings to discuss these issues. Following those hearings, S. 1095 was introduced. The legislation was designed to address three issues: the need for a more independent organization to address issues relating to national water policy, the role of the Federal Government in assisting state and regional planning, and the need for a program of federally-assisted water research. This bill was amended and reported by the Subcommittee on Water Resources on May 8. It was further amended and ordered reported by the Committee on Environment and Public Works on May 13.

PREVIOUS LEGISLATION AND EXISTING PRACTICE

This bill is drafted as a substitute for the Water Resources Planning Act. That Act (Public Law 89-80) established the Water Resources Council (WRC), and charged it with the responsibility to develop standards by which water projects are designed and constructed, and to coordinate Federal water resources policy.

The WRC has never functioned effectively. Its large membership proved unwieldy. As one hearing witness noted, meetings were usually attended by assistants to assistants to assistants. The WRC could not act unless there was unanimity among its members. Finally, under the preceding Administration, the WRC was charged with the responsibility for undertaking independent project review. Whether independent project review was valuable or not, the WRC gradually grew less effective.

The Water Resources Planning Act also provides planning assistance to state water resources agencies (title III), and to river basin commissions (title II). In many States, these funds are a valuable supplement to state resources and are used effectively for planning activities.

This bill also repeals Public Law 95-467, which covered various aspects of the Federal water research program. Public Law 95-467, coordinating earlier Acts of Congress, provided money to the water research institutes, established at each land grant college. In addition, OWRT has provided grants on a competitive basis to individuals and organizations to study specific problems, and to construct demonstration desalination plants.

SPECIFIC PROVISIONS—TITLE I

The bill establishes a National Board for Water Policy. Members of the Board include four Cabinet-level officers, and a chairman appointed by the President, with the advice and consent of the Senate. The bill also creates a State Advisory Committee, to react to issues before the Board and bring additional matters to the attention of the Board. The Chairman of this State Committee will serve as a non-voting participant at all Board meetings.

The Board will have a broad mandate to address the water resources needs of this nation, and to encourage improved coordination among agencies.

The Board's establishment will in no way affect Congressional action this year on major water resources legislation. The Board, however, will be expected to undertake an assessment of the success of such changes in law later this year, as well as analyze future needs for further changes in law to meet more effectively our national goals.

It is important to note that this Board will provide advice not only to the President, but also to the Congress. While the Board is obviously an agency of the Executive Branch, the reporting requirement should enable the Congress and the Executive Branch to work together more effectively than before toward development of a sound water resources program for our nation.

This Title also establishes an Office of Water Programs which will administer the programs described in subsequent titles of this bill. The Office may also advise the Secretary of Interior on policy matters relating to the programs within the Department of the Interior.

TITLE II

With respect to State and regional planning and water resources research, this bill generally continues the existing Federal commitment, although at a reduced funding level, during fiscal year 1982 and fiscal year 1983, while evolving toward a more competitive approach beginning in fiscal year 1984.

In title II, the bill proposes a major change in the State planning assistance program, as it is now operated. Following a two-year transition period, the State water program grants will be come competitive. Not all States will automatically receive such grants. States may submit plans to the new Office of Water Programs for 50-50 financing of the State water program. The Office will examine these, then fund them selectively according to criteria it will develop. The Committee anticipates that probably half the States and river basin commissions will qualify under this competitive approach for Federal support.

The system of competitive State planning grants will not adversely affect the smaller States. In fact, it is intended that the program grants will be evaluated and administered by the new Office of Water Programs in a manner that assures equal access by large and small States, and provides regional equity.

The Office will be expected to reject a State application that simply seeks funding for the salaries of State personnel to continue past programs. Rather, the Federal assistance will be focused on those States developing or implementing a State-wide plan for the management of its waters, and on States that have an integrated quality-quantity approach to water problems. The basis, however, must be an overall program to better address the State's needs.

TITLE IV

The bill continues a Federal relationship with the river basin commissions, but in a manner that should make them more effective. Rather than perpetuate the present law that separately funds the River Basin Commissions, this bill places these commissions, together with the States, under one funding umbrella. Thus, the Office of Water Programs should be able to better assess the program needs for a state and its region.

The reasons the basin commission concept failed in the past, are numerous. The reasons are all grounded in the law, not the theory. The chairman was a Federal agent, and the commissions were often treated as simply another Federal agency, rather than a regional organization designed to benefit the State. The commissions were never expected to assess, in any realistic manner, the priorities for the basin. When a commission prepared a report, it went to the Water Resources Council, but was never used or submitted to Congress.

This bill seeks to overcome each of those problems, by reducing the Federal presence on each commission, directing certain new responsibilities on a commission's planning, and establishing a procedure for a submission of basin studies, and recommendations to the Congress. If the legislation as implemented fails to achieve these improvements, then the commissions cannot expect to be funded beginning in fiscal year 1984, when the competitive program grants begin. The river basin concept remains a sound one. It deserves two additional years to see if can be made to work under a stronger law.●

ORDER FOR RECESS UNTIL 10 A.M., AND PRIOR PROVISIONS ADVANCED 1 HOUR

Mr. BAKER. Mr. President, I indicated that the Senate would convene at 9 a.m., and I am advised now by the managers of the immigration bill that they wish to change that to 10 a.m.

I ask unanimous consent that the convening hour be changed to 10 a.m., and the other arrangements provided for earlier in the evening be advanced by 1 hour.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROPOSED INTRODUCTION OF CRIME BILL

Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, I send to the desk a bill and ask that it be read.

The PRESIDING OFFICER. Is there objection to the introduction of the bill?

Mr. BIDEN. Yes, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, an objection is heard to the introduction of the bill on this day which, of course, is the prerogative of any Senator.

May I inquire of the Chair, is it not true that on the next legislative day the Senator from South Carolina would have the absolute right to introduce the bill?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. I thank the Chair.

Mr. President, not now but after conferring with the minority leader, it will be the intention of the leadership to adjourn the Senate and create a new legislative day so that the Senator from South Carolina may introduce this bill as a matter of right.

Mr. President, does any other Senator now seek recognition?

Mr. President, will the Chair inquire if there is further morning business?

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

RECESS UNTIL TOMORROW AT 10 A.M.

Mr. BAKER. Mr. President, I move that the Senate now stand in recess, pursuant to the order previously entered, until 10 a.m. tomorrow.

The motion was agreed to and, at 9:46 p.m., the Senate recessed until tomorrow, August 13, 1982, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate, August 12, 1982:

INTERNATIONAL COMMUNICATION AGENCY

W. Scott Thompson, of Massachusetts, to be an Associate Director of the International Communication Agency, vice Robert John Hughes.

U.S. ARMS CONTROL AND DISARMAMENT AGENCY

Robert B. Hotz, of Maryland, to be a Member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency, vice Margaret Bush Wilson, resigned.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be general

Lt. Gen. Roscoe Robinson, Jr., xxx-xx-xxxx
xxx-... U.S. Army.

IN THE AIR FORCE

The following-named officers for promotion as a Reserve of the Air Force, under the appropriate provisions of chapter 35 and 837, title 10, United States Code.

LINE OF THE AIR FORCE

Major to lieutenant colonel

EXTENSIONS OF REMARKS

FREEDOM FOR MYKOLA
HORBAL

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. GILMAN. Mr. Speaker, the Soviet Union, along with the United States and 33 other nations, signed the Final Act of the Helsinki Conference on Security and Cooperation in Europe in 1975. The Soviets agreed to respect the human rights and fundamental freedoms of their citizens. Also by reference to the Universal Declaration of Human Rights, they also agreed to guarantee the fundamental right to emigrate. However, not only have the Soviets not kept their agreement, but they have singled out members of the Helsinki Watch Groups for particular harassment.

The Ukrainian Helsinki Group was founded in 1976, a year after the Moscow Group, to monitor the Soviet Government's compliance with the human rights clauses of the Helsinki Accords. The Helsinki Group demands that the Government respect such fundamental rights of the individual as freedom of religion, expression, and movement. It also calls for the Government to support the Ukrainians' right to self-determination, the signatories to the Helsinki Final Act having agreed to "respect the equal rights of peoples and their right to self-determination."

Mykola Horbal, a Ukrainian poet and a member of the Ukrainian Helsinki Group, has been unjustly imprisoned in the Soviet Union because of his application for emigration to the United States and his participation in the Helsinki Group. Mr. Horbal, who is married and has one son, was arrested by the Soviets in 1970 for circulating a poem he had written. That arrest occurred shortly after he had received his affidavit to emigrate to the United States. Mr. Horbal was sentenced to 5 years in a labor camp and 2 years in internal exile. He was subsequently released in 1977, the year in which he joined the Ukrainian Helsinki Group. He was arrested again in 1979, on a fabricated charge of rape, and was then sentenced to 5 years in prison.

Many of us are concerned about Mr. Horbal's unjust imprisonment but also about his physical and mental health. Reports smuggled out of the Ukraine reveal that he has been physically mistreated and is so depressed psychologically that he has even contemplated

suicide. For these reasons, I have written to Ambassador Dobrynin expressing my concern about Mr. Horbal's situation and asking the Ambassador to secure Mykola Horbal's release, and to permit him to exercise his right to emigrate from the Soviet Union, if he so chooses. I have also written to the American Ambassador to the Soviet Union, Hon. Arthur A. Hartman, and asked him to pursue with the Soviet authorities the release of Mr. Horbal.

In a recent interview with Mr. Horbal, he stated that he was very interested in the effect that the Helsinki Accords could have on improving the human rights of citizens in totalitarian countries. He regretted the fact that the European nations were not more united in their efforts to fight for the freedom of the individual. But he did express faith in the United States, referring to it as the "country which has provided a safe haven for millions of the world's poor and deprived."

On July 27, the House Foreign Affairs' Subcommittee on Human Rights and International Organizations held a hearing on the status of the Pente-costals who have been living in the U.S. Embassy in Moscow since 1978. Witnesses at that hearing reminded us that persistent focus by Members of Congress on human rights violations in the Soviet Union is extremely important. Only by frequently and consistently speaking out on these issues can we help courageous individuals, such as Mykola Horbal, secure their freedom. ●

THE IMMIGRATION REFORM
AND CONTROL ACT OF 1982

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. MAZZOLI. Mr. Speaker, the Immigration Reform and Control Act of 1982 (H.R. 6514) has a Senate counterpart, S. 2222, which is sponsored by Senator ALAN K. SIMPSON, chairman of the Senate Subcommittee on Immigration and Refugee Policy.

Senator SIMPSON is one of the most knowledgeable people in the country about immigration and refugee matters. As a member of the Select Commission on Immigration and Refugee Policy and as chairman of the Senate Immigration Subcommittee, he has studied all aspects of the immigration matter from every possible perspective.

Senator SIMPSON has come to the same conclusion as I have about the best method of controlling illegal immigration to this country—penalties against employers who knowingly hire undocumented workers. There simply is no other workable alternative. Undocumented workers come here to get jobs. That is the lure, that is the magnet.

We have to end that lure, turn off that magnet, by making it illegal for employers knowingly to hire those who do not have permission to be in this country.

In his usual straightforward and sensible fashion, AL SIMPSON made the strongest case possible for penalties against employers who knowingly hire undocumented aliens in the New York Times earlier this week.

He made the point, which has become obvious to all those who have studied the immigration issue in great detail, that our immigration reform bill contains a simple straightforward employer sanctions provision which protects both employers and employees.

In the early 1970's, under the leadership of Chairman PETER W. RODINO, JR., the House of Representatives twice passed employer sanctions bills. Unfortunately, both times the Senate took no action.

This year, under Senator SIMPSON's strong leadership, the Senate seems determined to push ahead. Yesterday's Washington Post also endorses the Simpson/Mazzoli bill, especially the employer sanctions provisions. As the Post points out, employer sanctions is the right way to go.

For the benefit of my colleagues, I am including a copy of Senator SIMPSON's article from the New York Times of August 10, 1982, and the editorial from the Washington Post about the Simpson/Mazzoli bill.

The articles follow:

[From the New York Times, Aug. 10, 1982]

ILLEGAL ALIENS

(By Senator ALAN K. SIMPSON)

WASHINGTON.—All objective, comprehensive studies of the problem of illegal immigration, including those by the Ford, Carter and Reagan Administrations, and by the Select Commission on Immigration and Refugee Policy, have concluded that adequate enforcement of immigration laws cannot be achieved without greatly reducing the incentive represented by the temptation of employment in the United States.

For this reason, section 101 of the proposed Immigration Reform and Control Act of 1982 is the single provision most urgently needed to assist in reducing illegal immigration. This section would make unlawful the knowing hiring or illegal aliens and would

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

provide a system that enables employers to verify that job applicants are American citizens or legal aliens. Section 101 and the bill's other provisions are strongly supported by the Administration, by an impact of illegal immigration, we must consider long-term effects. Moreover, even a totally selfish person does not act solely to achieve economic goals; adverse noneconomic impacts can often make an economic benefit unpalatable. Thus, consideration of the effects of illegal immigration on our population, of potential social and political changes and of historical immigration objectives must be part of the decision-making process.

The Chamber argues that any secure verification system would be "too expensive." As evidence, it has published some extraordinarily high cost estimates. More objective sources present less-alarming figures: \$100 million to \$300 million per year. Certainly, these are not small numbers, but inadequate enforcement also involves major costs. The number of illegal aliens in this country in 1978 has been estimated at 3.5 million to six million. Even if those estimates are used and it is assumed that only 2 percent hold jobs that unemployed Americans would take, then the cost in public assistance and unemployment benefits to the jobless is \$490 million to \$840 million. The actual number of people displaced from jobs is probably substantially higher. The number of illegal aliens is estimated to have increased by 500,000 per year. This calculation does not even consider the other, less easily quantifiable costs of illegal immigration.

The Chamber states that the verification procedure would be "too burdensome" for employers. Actually, the procedure would be optional for those with three or fewer employees. Larger employers would be required simply to examine in good faith a United States passport or two other documents—say, a driver's license, birth certificate, Social Security card—complete and sign a short form and have that form signed by the employee. The employer would not be responsible for the authenticity of the documents, only for their reasonably appearing genuine. Without this system, the two key goals of section 101 could not both be achieved: screening illegal aliens out of the workforce and avoiding discrimination against citizens and legal aliens who look or sound "foreign" to employers.

The most disappointing part of the Chamber's argument is the assertion that individuals, including businessmen, have no obligation to assist the Government in enforcing our laws. That view is certainly not consistent with our tradition of responsible citizenship and limited government.

Does the Chamber feel that businesses' legal obligation to withhold income and Social Security taxes is also unreasonable? There is no practical alternative. Moreover, a legitimate businessman ought not knowingly hire illegal aliens and thereby provide the major incentive for violating one of the most fundamental laws of a sovereign nation—the one controlling its borders.

Fortunately, most businessmen do not share the Chamber's view. Other business groups support the bill—the National Association of Manufacturers, for example. Many local Chambers of Commerce, including those in Texas and California, where there are great numbers of illegal immigrants, have acknowledged the need for such reform.

The sponsors are attempting to protect America from uncontrolled immigration for the sake of their children and grandchildren,

while keeping at bay the specter of meanness, nativism and racism. Fortunately, a sizable majority of Americans are willing to hark to an appeal to rise above any special interest they may have in order to obtain workable immigration reform. It is puzzling why the United States Chamber of Commerce is not.

[From the Washington Post, Aug. 11, 1982]

LAW AND THE ILLEGALS

The Senate is about to begin consideration of the Simpson-Mazzoli bill, a comprehensive revision of our immigration laws. The proposal is the result of years of study, extensive hearings and wise compromise on some of the more controversial aspects of this problem. One of the most important provisions is designed to control illegal immigration by penalizing employers who hire undocumented workers. Such a sanction, sponsors of the bill believe, is the only way to control borders, since most illegal immigrants come here specifically to work.

The Select Commission on Immigration and Refugee Policies, created by Congress in 1979, estimated that between 4 million and 9 million undocumented workers are now in this country, but former labor secretary Ray Marshall, who was a member of that commission, admits that the estimate is a result of a compromise among a widely varying set of guesses as to the actual number. Officials simply don't know how many illegal aliens are here, but they do know that unemployment in this country is now at 9.8 percent, and that every job held by an illegal alien is one not available to an American citizen.

Many employers oppose any change in the present law-enforcement system since they prefer to pay very low wages to workers who cannot avail themselves of their rights. Mr. Marshall and many labor leaders believe that the only way to preserve these jobs and improve wages and working conditions in some industries is to eliminate that option for employers. He is right.

Another controversial question concerns refugees. Under the provisions of the Simpson-Mazzoli bill, 425,000 new immigrants would be allowed to enter the United States each year. This ceiling does not include refugees who, under existing law, may be admitted in any number on the authority of the president as long as he notifies Congress of his intentions. Such flexibility is needed to deal with emergency situations where quick action must be taken for humanitarian reasons.

It was assumed that under the provisions of the law, about 50,000 refugees a year would enter the country, but for a variety of reasons—the continuing needs of Indochinese refugees, the Cuban boat lift—that figure has been much higher in recent years. Sen. Walter Huddleston (D-Ky.) would apply the 425,000 ceiling to immigrants and refugees combined. He would continue the president's flexible power to meet emergency situations by allowing large numbers of refugees in during any given year, but would then subtract numbers over the ceiling from the following year's quotas.

Those supporting the Huddleston position believe that Americans are suffering from "compassion fatigue," that we are already doing more than our share to accept the homeless and the persecuted of the world and that, for purposes of our own long-range economic planning, we must have a firm and fixed number of new admissions to the country. To disagree with this position

is not to accuse its proponents of mean-spiritedness.

The United States has accepted on a permanent basis large numbers of refugees in recent years, and it has not always been easy. And we should take care that the total numbers do not regularly substantially exceed the original expectations of Congress. Nevertheless, the Huddleston amendment should be rejected because it will inevitably curtail this country's ability to accept its share of the world's refugees. In stark political terms, if refugees have to compete for quota numbers with the brothers and sisters of American citizens, there is no doubt who will be admitted.

This nation was founded as a haven. That quality is part of our national character, and there will always be room here for those who come without connections and without special skills simply because they must come here to survive. The Huddleston amendment severely restricts that tradition when a prudent application of existing law ought to be enough. The Simpson-Mazzoli bill should be passed without the Huddleston limitation, and the House should concur. ●

DR. H. M. S. RICHARDS

HON. CARLOS J. MOORHEAD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. MOORHEAD. Mr. Speaker, on August 29, there will be a special celebration and festival of thanksgiving to honor Dr. H. M. S. Richards on his 88th birthday.

The son and grandson of preachers, Dr. Richards is the founder and speaker-emeritus of the Voice of Prophecy radio broadcasts. He is a pioneer radio evangelist who first conceived of radio ministry in 1920 but it was not until 10 years later that KNX radio began daily broadcasts of his "Family Worship" program.

In 1937, the program received a new name, "The Voice of Prophecy," and wider distribution over the Don Lee Broadcasting System. Five years later, the program went nationwide when it was picked up by the 89 stations of the Mutual Broadcasting System.

Today, the VOP program is carried by the NBC and intermountain radio networks and hundreds of independent stations in the United States and Canada. Across North America, some 750 stations air the program either Sunday or daily, and overseas, another 1,100 stations carry programs that bear the same name or are closely affiliated with the Voice of Prophecy.

In 1967 and 1970, Dr. Richards was recognized by his fellow broadcasters of the National Religious Broadcasters organization with the honor citation for his dedication and steadfastness to humanity and Christianity.

Simply put, Dr. Richards is an uncommon man of wisdom and compassion. In his dealings and teachings with people, he has always sought to

bring them together, not to divide them; he has always stressed their vast commonality, not their differences; he has always appealed to their desire for union, not discord.

He is a man of special insight and grace who rises above the banal and mundane, yet never belittles those who cannot. He does not become embroiled in the small and unimportant. He shuts out no man by closing his mind to that man's ideas or beliefs.

Mr. Speaker, it is a pleasure for me to play a small part in honoring a great man.●

BUFFALO EVENING NEWS CALLS PROPOSED BALANCED BUDGET AMENDMENT A SHAM

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. LaFALCE. Mr. Speaker, the Buffalo Evening News published last week a thoughtful editorial that labels the proposed balanced budget amendment what it really is—a sham. This editorial is required reading.

The editorial subjected the amendment passed by the Senate last week to the scrutiny that is required as we approach consideration of this matter. It raised very serious questions that all of us must consider if we are to treat this issue responsibly. Amending the Constitution is something that is not done lightly, especially when there are such serious policy and practical questions about the amendment.

Let me highlight the editorial's key points:

More than a loophole, the proposed amendment borders on sham. If it were a commercial product, it might be hauled into court for violation of truth-in-advertising statutes.

While we don't doubt the sincerity of many amendment supporters, they have chosen a tool both ineffective and inappropriate. The Constitution is no place for complex codes of economic policy, however, precise or porous. There is, moreover, a fatal contradiction in the approach. The tougher the amendment, the greater its destructive impact on the economy could be; yet the more special exemptions and escape hatches that are included, the less it can pretend to really fulfill its intent.

The hard fact is that the disease of irresponsible budgeting is not so instantly cured. This amendment is a placebo, not the sturdy medicine of steady, disciplined budgeting decisions by men and women elected to do that job each year. The House, where the amendment is now headed, ought to bury this illusion in the reality of defeat.

Following is the full text of the editorial that appeared in the Buffalo Evening News of August 7, 1982:

HOUSE SHOULD REJECT BALANCED-BUDGET SHAM

The balanced-budget amendment to the U.S. Constitution approved 69 to 31 by the

Senate offers the wrong answer to the genuine ills of irresponsible budgeting in Washington.

More loophole than law, the proposed amendment borders on sham. If it were a commercial product, it might be hauled into court for violation of truth-in-advertising statutes.

This is not to contend that its proponents don't voice the legitimate worries of millions of their constituents.

The nation has not seen a balanced federal budget since 1969. It has had only one in the last 23 years. Regrettably, balanced budgets have become a curiosity, a virtually extinct species. Further, federal spending, which consumed just under 20 percent of the nation's total goods and services in 1964, is expected to consume more than 24 percent this year. So the lack of discipline in Washington on fiscal policies is mercilessly evident, the danger of this inexorable spending spiral incontestably real.

But what an irony! Some of the same politicians who for years have demonstrated an inability or unwillingness to bring spending and taxation into rough balance, now want to order this goal with the snap of a constitutional finger. They would insert into the Constitution a standard they themselves have repeatedly breached.

But even this proposed prohibition is riddled with escape hatches, as if the proponents doubt their ability or desire to put the principle into practice. The proposed amendment does call for Congress, prior to each budget year, to adopt "a statement of receipts and outlays for that year in which total outlays are no greater than total receipts."

But this would not apply, as it should not, in wartime. It would not apply whenever 60 percent of the membership of each house of Congress agreed to violate it. Still another exception adds: "Total receipts shall include all receipts of the United States except those derived from borrowing and total outlays shall include all outlays . . . except those for repayment of debt principal."

Concerning the latter exemption, it is worth noting that billions of dollars each year are involved in debt repayment. Other billions are placed in "off-budget" programs. Unlike states and cities, the federal government does not now write separate capital budgets for road, building and other similar projects. But with receipts from borrowing exempted, Washington presumably could circumvent the proposed balanced-budget mandate by the simple expedient of creating multi-billion dollar capital budgets.

While we don't doubt the sincerity of many amendment supporters, they have chosen a tool both ineffective and, worse, inappropriate. The Constitution is no place for complex codes of economic policy, however precise or porous. There is, moreover, a fatal contradiction in the approach. The tougher the amendment, the greater its destructive impact on the economy could be; yet the more special exemptions and escape hatches that are included, the less it can pretend to really fulfill its intent.

The hard fact is that the disease of irresponsible budgeting in Washington is not so instantly cured. This amendment is a placebo, not the sturdy medicine of steady, disciplined budgeting decisions by men and women elected to do that job each year. The House, where the amendment is now headed, ought to bury this illusion in the reality of defeat.●

THIS IS HOW IT USED TO BE

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. RUDD. Mr. Speaker, a constituent of mine, Mr. Robert F. Flowers of Scottsdale, Ariz., has brought to my attention some very thought-provoking reminders of then and now. Let me share these reminders with my colleagues.

I commend this short piece of wisdom to all of my colleagues:

THIS IS HOW IT USED TO BE

Do you remember when:

Attending college was a privilege rather than a right?

A farmer could plant what he wished?

Taxes were a nuisance rather than a burden?

The Supreme Court protected society rather than the criminals?

The aged were cared for by their children?

Foreign officials visited the White House without asking for money?

We entered a war to win it?

A life sentence didn't mean "parole in 10 years"?

Our flag was respected—at home and abroad?

America conducted her foreign affairs without consulting the U.N.?

A father went on welfare only out of desperation, and got off it as soon as possible?

Charity was a virtue instead of big business?

We could laugh at jokes about the Irish, Negroes, Italians, Jews, or Polacks without being considered bigots?

The doctor's first question was, "Where does it hurt?" instead of "Do you have insurance?"

U. S. Grant was the name of a president rather than a federal handout?

Giving aid to the enemy was treason? (Now it is called foreign aid.)

We had prayers in our schools? (Now we have sex education.)

The churches preached religion instead of politics?

You were safe on the streets and in your home?

The news media presented the truth rather than false propaganda?

The motion pictures were wholesome family entertainment instead of violence and sex?

A policeman was a human being instead of a fascist pig?

The three R's were reading, writing and arithmetic instead of robbery, rape and riot?

The Supreme Court consisted of judges instead of political hacks?

A radical had to have a soap box to reach 40 people? Now the news media provides him with a microphone to reach 40 million.

The country was run by Americans instead of a group of aliens?

This was a Christian nation?

—AUTHOR UNKNOWN●

PERSONAL EXPLANATION

HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. CLINGER. Mr. Speaker, on August 10, 1982, I was absent from the floor of the House for a vote. Had I been present, I would have voted in the following fashion:

Rollcall No. 259: H.R. 5427, Radio Marti, the House by a recorded vote of 78 ayes to 284 noes with 1 voting "present," rejected an amendment that sought to authorize the Board for International Broadcasting to prepare material for voluntary broadcasting by commercial radio stations, "no."●

GEORGE ALEXANDER

HON. JACK BRINKLEY

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. BRINKLEY. Mr. Speaker, too often our public servants are taken to task because of real or imagined inadequacies such as a late social security check or lost mail. Therefore, it is my particular pleasure to present kudos to George Alexander, staff assistant for manufactured housing of the Veterans' Administration's Loan Guaranty Service.

During my tenure in the House of Representatives, I have known few Federal employees more dedicated than George to his fellow man. His diligence in trying to provide alternative housing to this Nation's veterans at a reasonable price has provided him with a nationally recognized reputation as one of the most knowledgeable men in the manufactured housing industry.

George's experience with the manufactured housing industry has grown with the development of the mobile home. He has seen firsthand the growth of small box-like trailers we knew decades ago to the establishment of standards which have created prefabricated factory-built houses comparable to site-built homes, but at a much lower price.

A native and resident of Canton, Ga., before joining the VA, George spent 17 years in this native State representing a major appliance manufacturer. It was during this period that his love for the industry was nurtured. In tribute to his assistance to manufactured housing, he was twice elected president of the Georgia Manufactured Housing Association, and twice elected president of the Southeast Manufactured Housing Institute. His leadership was further recognized in his home State when he was named to the Georgia Manufactured Housing Association's Hall of Fame.

The recognition of his talents grew as he was asked to join public service 8 years ago by the Veterans' Administration. As staff assistant for manufactured housing, his input into new regulations and laws has assisted many veterans in acquiring affordable housing not previously available. As former chairman of the Subcommittee on Housing of the House Committee on Veterans' Affairs, I will be forever indebted to George for his assistance with Public Law 95-476, the Veterans' Housing Benefits Act of 1978. This law put manufactured housing on a standard formula with conventional housing, and enabled many veterans with marginal incomes to become homeowners. VA guaranteed home loans for conventional housing have faltered in the last few years, but VA guaranteed home loans for manufactured housing have continued to rise. This is in no small part due to the efforts of George Alexander.

George Alexander has always given of himself, not only in the area of alternative housing, but in civic affairs as well. He is a deacon of the First Baptist Church in Clarendon, Va., a member of the Lions Club, a Mason, and a member of the Veterans of Foreign Wars—having once served as post commander in his hometown of Canton, Ga. He is a veteran of service in the Pacific theatre during world War II, and was honorably discharged with the rank of first lieutenant. He and his dear wife, Patricia, are the proud parents of three children, George, Ada, and Anne Marie.

Mr. Speaker, today, in recognition of his lifelong dedication to manufactured housing and to his fellow man, George is being given the highest national honor in the manufactured housing industry. Today, during the 28th annual Midwest Manufactured Housing and Recreational Vehicle Show in South Bend, Ind., George will be named to the Recreational Vehicle/Manufactured Housing Hall of Fame. He will join a select group of individuals who have been so honored. The naming of George Alexander to the RV/MH Hall of Fame brings great credit to him and to the Veterans' Administration.

I am proud to call George Alexander my friend because he is an uncommon man given to uncommon deeds.●

SONGS OF LABOR

HON. WENDELL BAILEY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. BAILEY of Missouri. Mr. Speaker, this Labor Day, September 6, 1982, will celebrate the 100th anniversary of the first Labor Day. In honor

of this occasion Mr. Rudy Grother, librarian at the Whittier Elementary School in Sedalia, Mo., submitted the following poem written by John Greenleaf Whittier, who died 90 years ago on September 7, 1892:

SONGS OF LABOR

Haply from them the toiler, bent
Above his forge or plough, may gain
A manlier spirit of content,
And feel that life is wisest spent
Where the strong working hand makes
Strong the working brain.●

PAUL HEKLER HONORED

HON. CARLOS J. MOORHEAD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. MOORHEAD. Mr. Speaker, Mr. Paul Hekler will be honored by his many friends, associates, and well-wishers at a retirement dinner on August 18 in Burbank, Calif.

After 11½ years as executive director of the Burbank Chamber of Commerce, Mr. Hekler is putting the cap on a distinguished career.

Much of that career was spent with the Burbank Chamber, where as executive director he was responsible for a growth in membership from 500 members to 760 members. During that period, the chamber's revenues also increased from \$41,000 to \$175,000.

He was the principal reason for the 1975 accreditation of the Burbank Chamber by the U.S. Chamber of Commerce, a distinction that only 370 of the Nation's 5,000 chambers enjoy.

In 1972, he was presented with the William E. Hammond Memorial Award as the outstanding first year chamber executive in California. In 1978, he became the president of the Southern California Association of Chamber Executives. He was a director in the California Chamber Executives Association, a member for the American Chamber Executives Association and a class adviser for training chamber managers.

Mr. Hekler has long been active in other community affairs. He held positions of leadership in the Disabled American Veterans Charities, the Burbank Rotary Club, the Burbank Community Hospital, Toastmasters, Sertoma, and the Lions Club. He was a director with Friends of the Airport.

Mr. Speaker, Mr. Hekler has given a great deal to his community and his neighbors. I am grateful for his contributions and I wish him a long and fruitful retirement.●

AN EDITOR'S THOUGHTS ON
LEBANON

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. BEREUTER. Mr. Speaker, the world's attention continues to be riveted on the tragic events occurring in Lebanon.

The Lincoln, Nebr., Star recently editorialized on the issue of how the United States should respond to the continued violence and Mr. Begin's apparent arrogance. As we ponder this critical life and death matter, I urge my colleagues to at least consider the Star's point of view and have inserted the full text in the RECORD.

[From the Lincoln Star, Aug. 5, 1982]

LET HIM GO IT ALONE

As Menachem Begin's army strengthens its diabolic grip on West Beirut, crushing the Palestinian resistance and innocent civilians alike, a couple more observations are appropriate:

Many Israelis, worried about their worsening image in the world, are adopting a kill-the-messenger mentality. They apparently are blaming television—which shows daily the raids on Beirut—for adverse world opinion, instead of their government's war policy. They and Israel's friends should not forget, however, that the unblinking camera recorded the aftermaths of the 1972 Munich atrocity and others committed by the PLO. The violent acts themselves, and the one-sided media treatment long afforded the subject, combined to picture the entire, complex Palestinian problem as one dimensional—that dimension being Palestinian terrorism. The cameras now bring another dimension to the problem.

Begin says, in response to the possibility the U.S. will impose sanctions against Israel if the violence in Lebanon doesn't stop, that his people "do not kneel but to God." He said he'll resist the sanctions. Very well, let him continue the war and answer to the God he says he is communing with. But American citizens ought not to have to pay for the slaughter. Not with another round of ammunition or another dollar of aid.●

RESEARCH AND DEVELOPMENT:
TO PRUNE, PROMOTE, AND
PRESERVE

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. FUQUA. Mr. Speaker, a number of my colleagues and I have been increasingly concerned about maintaining the health of our Nation's overall science and technology base. Limited Federal budgets have curtailed real growth in long-term investments in research and development. This has created some apprehension about our future economic competitiveness in this highly technological world. Obviously new relations between govern-

ment, industry, and the university research community need to be explored.

Dr. Edward E. David, Jr., president of Exxon Research and Engineering Corp., in a recent Science editorial made a number of thoughtful comments. Noting increases in industrial-university cooperation, he stated:

Even so, we must remember that R. & D. does not prosper through funding alone; there are values to preserve. Essential are the integrity of the scientific research process, the freedom of academic opinion and expression, and the dominance of excellence. These and other necessities will be harder to preserve in this era as new techniques and relationships are brought into play.

Attached is the entire text of Dr. David's article as it appeared in the August 13, 1982, issue of Science magazine.

TO PRUNE, PROMOTE, AND PRESERVE

In times of austerity and turbulence, it is essential to prune, yet to promote new growth and, above all, to preserve values for tomorrow. These are such times. The United States still supports the most extensive and the most successful scientific enterprise in history. But low investment, high interest rates, and demands for instant gratification have combined over the past decade to erode long-term commitments. Thus, while the 1970's were marked by a striving in the science community to recreate the conditions of the golden age following World War II, when the federal-academic research axis reigned supreme, few believe it is practical today.

Science is indeed an endless frontier, but federal science budgets most decidedly are not. There is lip service to the Bushian ethic in Washington, but at the core there is skepticism of research and development as autonomous functions. Autonomy is giving way in industry, government, and academia alike to a closer integration with the innovation system. A symptom of this trend is the rapid growth of industrial funding for academic research—one of the only growth segments of university and college support.

Regardless of how this trend may be perceived, there is little doubt that we are entering a new era in the funding and performance of R. & D. in the United States. And, as befits a new era, new initiatives are emerging. Much of academia is showing verve and ingenuity in meeting such critical problems as uncompetitive faculty salaries, a paucity of U.S. graduate students, inadequate research funds, and antiquated laboratories. In fields such as microelectronics, robotics, microbiology, and catalysis, industry-university research consortia are achieving prominence. University and industry groups have banded together to support common goals in organizations such as the Council for Chemical Research and efforts such as the National Engineering Action Conference, held on 7 April (Science, 30 April 1982, page 456).

To procure vitally needed instruments and facilities, Colorado State University has used debt financing. George Olson, Vice President for Research at Colorado State, has pioneered this technique successfully for more than 10 years. Similarly, there is thinking that mechanisms for setting up limited partnerships to finance development projects might be applied to financing academic research as well.

Despite these vigorous responses, it is possible that not all needs will be met. Even so, we must remember that R. & D. does not prosper through funding alone; there are values to preserve. Essential are the integrity of the scientific research process, the freedom of academic opinion and expression, and the dominance of excellence. These and other necessities will be harder to preserve in this era as new techniques and relationships are brought into play.

Less well recognized is the need to preserve the privilege of decision in R. & D. activities. In order to tap the creativity of people, it is necessary to give them a certain freedom of action and leeway to follow their ideas. Otherwise, society cannot take advantage of their talents. On the other hand, the funder, whether it be a corporation, government agency, or limited partnership, must set a framework for evaluating technical activities in relation to its own purposes.

Balancing the influence of the performer and that of the funder is a delicate matter and a prime test of R. & D. leadership. Today the balance is tipping again toward the funder and away from those who tend the base of knowledge and technique. A priority for scientists and engineers is preservation of the balance, and this will be achieved most effectively through persuasion. Those in industry must recognize that their institutions cannot micromanage academic or industrial fundamental research. Even if that were possible, it would negate much of the value to be found in first-class research. This point must be stressed; funders of research will, first and foremost, be buying human talents. It is those talents which will create a better future.—Edward E. David, Jr., President, Exxon Research and Engineering Company, Florham Park, New Jersey 07932.●

II. ISRAEL, FRIEND OR ENEMY?

HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. McCLOSKEY. Mr. Speaker, yesterday, I commented upon the need to reconsider our longstanding "special relationship" with Israel.

Today, after 34 years of solid support and friendship for Israel, the United States has suddenly come face to face with an unpleasant possibility: Israel has become a liability to U.S. interests and policies abroad, and may rapidly be becoming a potential enemy.

It was only 3 years ago, in August 1979, that Presidential candidate Ronald Reagan spoke of Israel as "perhaps the only strategic asset in the area (the Middle East) that the United States can really rely on."

In September 1978, Israel had joined with the United States in the Camp David accords, subscribing to U.N. Resolution 242 "in all of its parts," and thereby laying the basis, at least so we thought at the time, for the eventual creation of a Palestinian homeland on the West Bank and Gaza.

Secretary of State Cyrus Vance stated to the U.N. General Assembly on September 29, 1978:

We believe that the Palestinian people must be assured that they and their descendants can live with dignity and freedom and have the opportunity for economic fulfillment and political expression.

In 4 short years, however, the government of Menachem Begin has made it clear that it has renounced both its acceptance of Resolution 242 in 1967 and its agreement at Camp David in 1978.

Begin has made it crystal clear that he intends to annex both the West Bank (Judea and Samaria) and Gaza. He has referred to both as part of the historic "Eretz Israel" (land of Israel).

In April 1982, Israel Defense Minister Ariel Sharon said the Sinai withdrawal was Israel's final territorial concession.

In Sinai, at Yamit, we have reached the limits of our concessions. . . . We shall turn to increasing and consolidating our settlements on the Golan Heights, in Judea, Samaria and the Gaza District.

When asked about annexation of the West Bank, Begin has responded: "How can we annex what is already ours?"

The enormity of Begin's change of position from that taken at Camp David can be compared to Hitler's change of position after Munich.

Resolution 242, the foundation for Camp David, is clear:

The establishment of a just and lasting peace in the Middle East which should include the application of both the following principles:

(i) Withdrawal of Israeli armed forces from territories occupied in the recent conflict;

(ii) Termination of all claims or states of belligerency and respect for and acknowledgment of the sovereignty, territorial integrity and political independence of every State in the area and their right to live in peace within secure and recognized boundaries free from threats or acts of force.

In essence, Israel agreed at the United Nations in 1967, and reaffirmed at Camp David in 1978, to withdraw its military forces from the Golan Heights, West Bank, and Gaza (the occupied territories) at such time as Israel was accorded the right to live within secure and recognized boundaries, recognized as a nation, and free from threats or acts of force.

It has been firm U.S. policy to secure these rights for Israel since 1967. We have given Israel more than \$20 billion in aid to achieve these rights. This year one-fifth of U.S. foreign aid, \$2.2 billion, goes to Israel, a nation of 3.5 million people.

But Resolution 242 cuts both ways. It imposes duties on Israel as well as conveying rights.

The Begin government has now demanded the rights but renounced the accompanying duties. His administration has just published a map of the

West Bank showing 40 percent of the lands set aside for Jewish settlements, 50 percent for agriculture, and only 10 percent for the existing Arab population of more than 700,000 people. Israel is rushing to expand and increase its existing settlements, a process which the United States has said violates the Camp David accords.

These are not Israel's only defiant breaches of solemn agreements with the United States.

In 1952, Israel agreed to limit its use of U.S. supplied arms to defensive purposes.

After we gave the fearsome CBU, or cluster bomb, to Israel in 1973, Israel executed a specific, secret agreement in December 1976 that cluster bombs would be used only in the defense of Israel against regular forces in a war of the intensity of 1967 or 1973, when Israel confronted two or more nations; they were not to be used in areas of civilian population.

I found cluster bombs in the streets of west Beirut and in the courtyard of an 800-bed Lebanese mental hospital on July 25. Two days later in Jerusalem, I asked Defense Minister Ariel Sharon why he had ordered use of cluster bombs in Beirut in violation of that agreement. He replied:

In wartime you look at agreements through different eyes.

Those are U.S. bombs and shells that have been savagely destroying a city of 600,000 civilians, block by block. Every Arab in the Islamic world knows that the United States has the power to cut off military aid to Israel when Israel violates its agreement with us.

In every Arab heart, as the Omani Ambassador told me a few weeks ago, there is the growing conviction that America, and Americans, are condoning the killing of the innocent Lebanese civilians of Beirut. A 12-year-old Lebanese boy said bitterly to Representative MARY ROSE OAKAR on the streets of west Beirut last week:

You Americans have killed my little sister.

The anger of 100 million Arabs is not a light burden. A friend of the United States, Egypt's President Hosni Mubarak, told our congressional group on July 28:

Unless the United States takes action soon, you will need armored divisions to defend your embassies.

Our Ambassador to Jordan told us the following day:

If we don't change our policies soon, a lot of us are going to be returning to Andrews Air Force Base in wooden caskets.

An Israel that cannot be trusted to honor agreements, an Israel that feels it proper to destroy a city of 600,000 civilians to wipe out 6,000 PLO soldiers, an Israel that subscribes to Resolution 242 in order to remove the Egyptian threat on its southern border in 1978, but then renounces its

agreement 4 years later to annex the West Bank and Gaza—that is not the Israel we have respected for more than 30 years.

There is no benefit in having a strong ally in the Middle East if that ally makes us the enemy of 100 million Arabs upon whom we are counting to stop the expansion of Soviet influence.

It is clearly a time to recognize Israel as a potential enemy of all that the United States seeks to achieve in the world, not just peace in the Middle East, but acceptance of the principle that the use of force does not justify an incredibly greater force in return.

There is one hope: Secretary of State George Shultz has expressed his desire to resolve the Palestinian issue. If America's Jewish community supports Shultz and voices its disagreement with Begin, perhaps we can get back on the track to a lasting peace in the Middle East.

As writer I. F. Stone put it recently:

If a Jewish state in Palestine, why not a Palestinian state too? Who better than we should understand Palestinian desperation and homelessness? Can we not open our hearts?●

JOB FOR VOCATIONAL EDUCATION STUDENTS

HON. CLINT ROBERTS

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. ROBERTS of South Dakota. Mr. Speaker, I am in strong support of vocational education programs throughout the Nation that teach our students valuable and marketable skills in today's economy. In South Dakota, vocational education has proven to be one of the best investments of our educational dollars as students receive practical training in areas such as agriculture, home economics, construction, electronics, auto mechanics, sheet metal, and many other trades. For the benefit of my colleagues, I am enclosing an excellent testimony on the employment statistics of students who have graduated from the Mitchell Vo-Tech School in Mitchell, S. Dak. I have visited this school several times and have seen the program firsthand. This editorial appeared in the July 27, 1982, edition of the Mitchell Daily Republic.

VO-TECH STUDENTS FINDING WORK

When bad economic conditions and high unemployment rates are making big headlines these days, it's inspiring to know that students graduating from the Vo-Tech are finding work. Assistant Director of the Mitchell Vo-Tech Dick Ziegler informed us last week that the average placement figure for students graduating in sheet metal, agricultural business, architectural drafting, building construction, air conditioning and heating and electrical construction and maintenance and cooking is 70 percent.

This 70 percent figure doesn't compare with the 93 percent placement figure in 1980 and the 85 percent figure in 1981, but is very good considering how high unemployment and youth unemployment rates are right now.

One reason Vo-Tech students are faring better in getting employment than young people overall is that their training gives them an advantage, Ziegler said. He said companies especially sheet metal companies, have come back to look for Vo-Tech graduates after hiring them in the past. Apparently, companies are much happier with employees who have Vo-Tech training than with those who have to be trained on the job.

Vo-Tech training is less expensive and more practical in some cases than college training. That's probably why the Mitchell Vo-Tech has seen more college graduates coming in its doors to seek training for second careers. And, colleges are wise to consider letting students transfer credits from Vo-Techs. This would allow students who don't have money for four years of college a new option and would be an advantage to colleges as well.

Ziegler said it was surprising to find that students graduating in drafting and construction are doing so well, with these areas down in general. We think this is a reflection of the excellent training these students are receiving at the Vo-Tech and their high motivation to find jobs.

Ziegler said students, aware of the economy, are preparing themselves for work through good study habits, class attendance and attitudes. He said they are carefully preparing resumes and begin looking for employment before they graduate. Some went out-of-state during Easter breaks to look, Ziegler said. We think the Vo-Tech is doing an excellent job of preparing students for the market and warning them ahead of time how to be prepared.

Students are more aware of needing saleable skills and parents are encouraging them to acquire these skills. Some are applying for Vo-Tech programs much earlier and families are sending several children to the Vo-Tech, Ziegler said.

It's good news, when all we hear these days is bad news about people finding work, that Mitchell Vo-Tech graduates are doing so well. Teachers and administrators at the Vo-Tech are making it a point to encourage and motivate their students in spite of the economy.●

PERSONAL EXPLANATION

HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. McGRATH. Mr. Speaker, on Thursday, August 5, I was absent for a series of votes on House Joint Resolution 521, the nuclear weapons freeze resolution. I was necessarily absent because of illness. Had I been present, I would have voted as follows:

Rollcall No. 249: On the Broomfield substitute, I would have voted "no."

Rollcall No. 250: On the motion to recommit, I would have voted "yea."

Rollcall No. 251: On final passage, I would have voted "yea."●

THE PRESIDENT'S BALANCING ACT

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. OTTINGER. Mr. Speaker, appearing in the New York Times recently was an editorial column by Tom Wicker on the subject of President Reagan's advocacy of the proposed balanced budget amendment.

Mr. Wicker concentrates on the President's continued efforts to force a military buildup in our country, at the same time he asks Americans to sacrifice everything to "help save our economy." The deficits caused by Mr. Reagan's military buildup are being covered by his supporting the balanced budget amendment. It is quite clear to me that he is trying to fool the American people.

I hope that, as the balanced budget amendment comes to the House, my colleagues will keep Wicker's arguments in mind.

[From the New York Times]

THE BIGGEST HOAX

(By Tom Wicker)

David Brinkley recently posed this question to his television audience: Has there ever been a bigger hoax in Washington than the so-called "balanced budget amendment" supported by the Reagan Administration?

After President Reagan's latest news conference, the answer clearly is "yes." The biggest hoax in memory is Mr. Reagan's effort to cover up his own unmatched performance as a deficit spender by plugging that illusory amendment. At best, it could have no effect on the budget for several years—and that not necessarily good—while the Reagan deficits are here, now, huge, growing and unnecessary.

The President said that these deficits "I don't think can be laid at an individual's door"—although he never hesitated to lay earlier deficits at Jimmy Carter's door. As for those projected during his Administration, there's one easily identifiable individual who proposed and pushed through Congress a three-year \$750 billion tax cut, who scheduled 7 percent annual increases in real military spending, and who supported a Federal Reserve monetary policy to slow inflation that also induced recession and now inhibits recovery.

These are the primary causes of the deficits now impending, and that individual is Ronald Reagan. If he's not responsible for those deficits, who is? The Democrats? Even if they still controlled Congress, they could have made all the spending cuts Mr. Reagan originally asked and still not have reduced the projected deficits significantly.

Just this week, the Congressional Budget Office—so far a more reliable prognosticator than the Reagan White House—estimated that the deficits in each of the next three years would range from \$140 billion to \$160 billion, even after approval of the proposed \$99 billion tax increase for the same years. Without a shred of evidence other than voodoo throbings, the White House pronounced this "too pessimistic."

Not according to chairman Paul Volcker of the Federal Reserve Board, who said the

C.B.O. projections "came as no surprise to us." He said there was "a lot more to be done"—both spending cuts and tax increases—to bring down the deficits and permit interest rates to decline and the economy to expand.

But what is Mr. Reagan doing? He is proposing to renege on (he calls it "flexibility") the budget agreement he had reached with Senate Republican leaders, in which they settled upon military spending of \$214 billion for 1983, \$243 billion for 1984 and \$279 billion for 1985—hardly small change. The President now says he will propose higher military spending for 1984 and 1985, because—as a Defense Department official put it—"Cap [Weinberger] wants everything he can get his hands on."

At his news conference, Mr. Reagan insisted he would nevertheless keep his 1984 and 1985 budget requests within the overall total agreed upon with the Senate. That means the military increases would have to be taken out of non-military spending, no doubt laying added burdens on the poor.

Even so, the President's decision to give Cap everything he wants damages the economic outlook for at least three reasons:

Depending on what non-military programs are cut, the shift to military spending would reduce consumer purchasing power, thus further hindering recovery.

Military spending contributes little to economic growth and is inflationary in that it makes a high demand on skilled manpower and scarce materials, driving up their costs.

By reneging on a major part of the budget agreement, Mr. Reagan is bound to have created doubts that he and/or Congress will stick to the rest of it.

Ironically, Mr. Reagan himself pointed to the importance of creating "the psychological effect that would indicate that the Government is really determined to . . . have some real fiscal integrity. . . ." But his actions on his own budgets are likely to speak louder than his words on a balanced budget amendment.

Besides, Chairman Pete Domenici of the Budget Committee said that increases in proposed military spending would be "unreasonable and unjustified." Yet Mr. Reagan continues to portray himself as the champion of reduced spending and balanced budgets, and his discredited economic "program" as the only proper way of "working our way back to prosperity."

Congress, of course, need not appropriate the additional military funds for 1984 and 1985, and it probably won't—particularly if the November election results can be read as a rebuke to the Reagan Administration.

That doesn't alter the fact—or its "psychological effect"—that while advocating a constitutional requirement for balanced budgets in the future, Mr. Reagan is willing to undercut the agreement with Congress by which he supposedly is trying to reach one now.●

KEN DAVIS TO RECEIVE NATIONAL ENGINEERING AWARD

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. FUQUA. Mr. Speaker, being chairman of the Science and Technology Committee has afforded me an op-

portunity to meet scientists and engineers and I have developed a deep respect for those in the engineering field who labor to give Americans a better life. Among those is one who stands above most of the others. He is W. Kenneth Davis, who has had a highly successful career starting with Standard Oil of California and continuing with the Atomic Energy Commission in its early days, then to the Bechtel Corp. and currently as Deputy Secretary of Energy.

Plaudits to him include the Arthur S. Fleming Award, the American Institute of Chemical Engineers' Professional Progress, and Robert E. Wilson Awards. He has also received the Atomic Industrial Forum's Oliver Townsend Award and was selected twice the UCLA regents' lecturer. He has been elected to the National Academies of Science and Engineering and served as vice president of the latter.

Ken has authored hundreds of technical papers and served on vital committees and boards too numerous to mention here, but all having a positive impact on our struggle to become energy self-sufficient.

Ken's success in his field and dedication to his country must be a role model to young men and women who choose engineering as their life's work.

Ken Davis is respected the world over as one of the most able engineers in his field. To underscore his superior performance over many years, the American Association of Engineering Societies has chosen him to receive its National Engineering Award. This prestigious award is certainly warranted and I would ask, Mr. Speaker, that all Members of the House join me in saluting a truly outstanding engineer and American, Ken Davis.●

PORTER ASSAILS SOVIET UNION DISINFORMATION PRACTICES

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. PORTER. Mr. Speaker, I rise to protest the Soviet Union's continued propaganda and disinformation blitz spreading confusion and erroneous media impressions about U.S. diplomatic practices. Recently, we have seen examples of blatant Soviet efforts to forge important diplomatic and State documents to hurt the United States and its allies and foster cynicism about American intentions.

At a time of heightened tension and of renewed warfare in key regions of the world, the Soviets continue to exacerbate differences and undermine peace efforts. The latest themes stressed in Soviet external propaganda devoted to attacking the United States are summarized in the July 30 Inter-

national Communication Agency's Soviet Propaganda Alert," which I insert in today's CONGRESSIONAL RECORD:

SUMMARY

In June and July, Soviet external propaganda stressed:

ARMS CONTROL AND PEACE MOVEMENTS

Soviet propaganda focused on alleged U.S. duplicity at the Geneva START talks. President Reagan's speech at the U.N. Special Session on Disarmament (SSOD) was seen as an attempt to hide Washington's bid for military superiority by portraying the U.S. as a "peace-maker." Peace demonstrations in the U.S. and Western Europe supposedly showed increasing worldwide realization that Washington, not Moscow, is the true threat to peace. A related major theme, following the space shuttle's latest flight, concerned U.S. military plans for space.

ISRAELI INVASION OF LEBANON

Soviets accused the U.S. of collusion with Israel in its move against the PLO in Lebanon. According to Soviet charges, the U.S. wants to impose a Camp David-type arrangement on Lebanon and neighboring territories, leading to "U.S. imperialist domination over all the area."

GAS PIPELINE SANCTIONS

Soviet propagandists decried the sanctions as economic warfare. They claimed that this new version of the Cold War would not damage the Soviet economy, which could resist such pressures. The sanctions allegedly undermine the Versailles economic summit agreements and are designed to increase U.S. economic control over its allies.

HAIG RESIGNATION

Alexander Haig's resignation became an opportunity for Soviets to highlight U.S. "problems" in international relations. The former Secretary of State was described as a scapegoat for the administration's foreign policy failures, not as resigning over policy or personal disagreements.

ESCALATION OF THE IDEOLOGICAL WAR

President Reagan's European visit was seen as launching a stepped-up anti-Soviet campaign. Soviet propagandists kept up their attacks on VOA and ICA, accusing the U.S. of increasing its psychological warfare against the USSR.

CHEMICAL AND BIOLOGICAL WARFARE

Soviet propaganda continued to emphasize alleged U.S. hypocrisy in condemning the USSR for the use of chemical and biological warfare (CBW). Soviets maintained their claim of innocence on all charges of CBW.●

HOUSE BINARY VOTE ANSWERS "HOW MUCH IS ENOUGH?"

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. ZABLOCKI. Mr. Speaker, last month the House of Representatives rejected the Reagan administration's plans to resume production of lethal chemical weapons, after a 13-year moratorium on such production. By a vote of 251 to 159, the House adopted my amendment to the fiscal year 1983 Defense authorization bill which deleted

the \$54 million requested for lethal binary chemical weapons production.

As our House and Senate colleagues take up this important issue in the Defense authorization bill conference this week, I would like to bring to their attention an article and editorial which appeared recently in the Salt Lake Tribune.

I regret that the photo accompanying the editorial cannot be included in the CONGRESSIONAL RECORD. What it shows so graphically and dramatically, over a headline which reads "How Much is Enough?", are storage containers of nerve agent stretching as far as the eye can see into the horizon.

My colleagues will recall that Tooele Army Depot in Utah, the site shown in the photograph, is a major storage location for the existing U.S. stockpile of lethal chemical weapons. According to the Tribune, "There is already enough nerve gas stored at Tooele Army Depot to theoretically kill every human on Earth, possibly several times over."

I commend the following article and editorial from the Salt Lake Tribune to the attention of my colleagues:

[From the Salt Lake Tribune, July 25, 1982]

HOUSE WISE IN KNOCKING DOWN APPEAL FOR MORE NERVE GAS

The Senate-passed authorization of \$56 million to start production of a new-generation nerve gas, ultimately a \$10 billion program, fortunately has been defeated by an overwhelming vote in the House. Hopefully the House view will prevail when this item is reviewed in a later conference between members of both houses on the overall Defense Authorization Bill.

There is already enough nerve gas stored at Tooele Army Depot to theoretically kill every human on earth, possibly several times over. The stock was examined several years ago by Salt Lake Tribune representatives, with permission of the TAD commander. One-ton drums of the liquid human insecticide were stacked on wooden platforms over an open area roughly two city blocks long and 60 yards wide. (They are shown in photograph at right, taken at that time. The drums have since been moved to inside storage.)

Just a tiny fraction of one drop of the liquid, contacting human skin or inhaled, can kill a person within minutes through paralysis of the central nervous system. And the U.S. military arsenal already has enough nuclear capacity to kill every Russian 10 times over.

The continued expenditure of billions of dollars for redundant weaponry, particularly the horror of nerve gas, is morally repugnant and fiscally insane.

How many times can you kill an enemy? What is rational about spending \$10 billion for a new batch of chemical weapons designed to destroy human beings when the same \$10 billion could relieve so much suffering and anxiety among America's growing army of poor?

Opponents in the House pointed out that renewed U.S. output of the gas would weaken NATO, whose European members have not requested deployment of the gas on their soil and reportedly fear being asked by Washington to do so. It was also noted

that, since soldiers wear gas masks and protective clothing, civilians would be the main victims, possibly dying by the millions.

The Pentagon considers chemical warfare capacity necessary in case the Russians initiate its use. The U.S. already has that capacity.

The GB gas at Tooele is not hazardous to handle, a depot spokesman said. But the military wanted second-generation weapons, consisting of two non-lethal chemicals that mix to form the deadly gas only after firing. Safety procedures in implementing use of the Tooele liquid presumably are well established and its use as a weapon still viable if the decision were made. That's enough.

Of all the weapons man has devised in his lemming-like penchant for self-destruction, none is more repugnant than the chemical and biological killers.

If Russia did use them in an invasion of Western Europe, the U.S. has the option of using its present stocks at Tooele and elsewhere. And if the Russians were desperate enough to risk world condemnation by resorting to chemical warfare in Europe, it would likely provoke retaliatory escalation of the conflict to nuclear. In which case chemicals would be superfluous.

[From the Salt Lake Tribune, July 20, 1982]
NERVE GAS PLAN FACES DEFEAT?

WASHINGTON.—A bipartisan House coalition predicted Monday it will successfully block President Reagan's proposal that the United States resume production of lethal nerve gas.

Reagan has urged Congress to approve \$56 million for so-called binary nerve gas next year as part of a program estimated to cost an ultimate total of \$10 billion.

The administration maintains the binaries—which consist of two non-lethal chemicals that mix to form deadly nerve gas only after firing—are safer to store than existing gas stocks and are needed to deter Soviet chemical warfare.

But congressional opponents of the Reagan plan told a press conference Monday that resuming U.S. production of nerve gas after a 13-year moratorium would seriously hurt relations with allies in NATO.

"The plan weakens NATO," said Foreign Relations Committee member Clement Zablocki, a Wisconsin Democrat, who is sponsoring an amendment to cut out funds for nerve gas production. He noted none of the governments of Western Europe have requested deployment of the gas on their soil.

Rep. Jim Leach of Iowa, one of 14 House Republicans working actively to block the program, said the prospect of being asked by Washington to deploy the new gas has led to considerable anguish in West European capitals.

Defense Secretary Caspar Weinberger has repeatedly told Congress no NATO government has been asked to accept new American nerve gas. Weinberger says it could be stored in the United States and rushed to the battlefield by air transport at the last moment.

However, opponents of the binary gas production say it could not possibly serve the Pentagon's stated goal of deterring Soviet chemical attacks unless the U.S. weapons were stored in Europe for ready access.

They charge that, because soldiers in any war would wear gas masks and protective clothing, civilians would be the chief victims of nerve gas and might die by the millions.

The Pentagon maintains, however, it is vital to have the capacity to wage chemical

war if the Soviets initiate it, thus forcing the Kremlin's troops into bulky protective gear that would slow their advance and disrupt their strategy of fast and relentless attack.●

PERSONAL EXPLANATION

HON. MICHAEL G. OXLEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. OXLEY. Mr. Speaker, on Wednesday, August 11, I was at the White House on official business and was unable to cast my vote on rollcall Nos. 258 and 259. Had I been present, I would have voted in this fashion: "no" on rollcall No. 258, and "no" on rollcall No. 259.●

GERM WARFARE SAFEGUARDS

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. LAGOMARSINO. Mr. Speaker, I would like to call to the attention of my colleagues two editorials that appeared in the July 31 edition of the Press-Courier of Oxnard, Calif., in my district.

The first editorial entitled "Germ Warfare Safeguards" describes the Soviet dedication to development of chemical warfare agents and the dangers faced by the United States by not having a comparable capability to serve as a deterrent.

The second editorial entitled "Free Trade Productive" is critical of a decision by the Mexican Government to phase out the free trade zone status of Baja, California.

GERM WARFARE SAFEGUARDS

The House voted its concept of righteousness recently when it refused, by a 251 to 159 margin, to appropriate \$54 million for the production of artillery shells containing nerve gas.

That would be fine if only the Soviets were motivated by a similar code of good behavior. But, of course, they are not.

The Soviets have systematically developed an immense chemical warfare capability. Their stocks of lethal chemical agents are estimated to total 350,000 tons—nearly nine times that maintained by the United States as a deterrent to chemical attacks on U.S. forces.

Every Soviet and Warsaw Pact military unit has specially trained chemical warfare personnel attached. Every one of the Soviet army's 170 divisions are trained and equipped for chemical warfare using such weapons as sarin and soman nerve gas, mustard blistering gas, and hydrogen cyanide blood agents.

Other components of the Soviet's chemical arsenal include phosgene choking gas, lewisite blistering agent, Adamsite vapor gas, and chloropicrin, a lethal liquid produced by combining chloroform with concentrated nitric acid.

Moreover, the Soviets have also developed a range of biological weapons, most notably the deadly mycotoxin known as "yellow rain."

In short, the Soviets take both chemical and biological warfare seriously and their armed forces train extensively to use it effectively. Any doubts about their willingness to use such loathsome weapons in violation of explicit arms control agreements and international treaties should have vanished with evidence of soman nerve gas victims in Afghanistan and yellow rain casualties in Laos and Cambodia.

What the Reagan administration wants is a minimal deterrent that could threaten the Soviets with retaliation in kind if chemical weapons are used against American troops. The last U.S. nerve gas shells were produced nearly 15 years ago; most date from the Korean War era.

Many of these munitions are deteriorating. Some actually leak, posing hazards to those who work around storage depots. The \$54 million would have begun production of a safer alternative—binary shells featuring inert chemicals that do not produce nerve gas until they are combined in flight.

Maintaining at least a minimal deterrent is the best way to ensure that Soviet chemical and biological weapons are never used against U.S. forces or their allies.

Unless the House can be persuaded to reverse itself, its vote will have increased the chance that Soviet chemical and biological weapons will someday be used against the West.

FREE TRADE PRODUCTIVE

The Mexican government indicates it will begin phasing out the 50-year-old free trade zone status of Baja California—and that's bad news for businessmen on both sides of the border.

The free trade zone has allowed Baja California residents to shop in the United States and return home with their purchases without paying normal duty.

The reason the free zone was established was that Baja California and its major city of Tijuana are nearly 2,000 miles from Mexico City and its manufacturing plants. The special importing arrangement was set up to allow Baja Californians to make their purchases only a few miles away. Americans have enjoyed shopping in Tijuana.

The Mexican government should go slow on such changes. Business on both sides of the border is slack because of the devaluation of the peso and a drop in tourism. Cutting back on free zone status will not help the economy along the border or in the Mexico City area.●

THE FOOD AND AGRICULTURE RECONCILIATION ACT—FISCAL YEAR 1983

HON. LARRY E. CRAIG

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. CRAIG. Mr. Chairman, in order to offset the growing Federal deficit, Congress is now contemplating a huge tax increase because it is unwilling to control wild Federal spending, especially in the entitlement programs such as food stamps. Contained within

H.R. 6892, the Food and Agriculture Act, are the reconciliation instructions to strengthen various commodity programs and to delineate the requirements for food stamps. I could not accept, however, the sections dealing specifically with the food stamp provisions. Thus, I was unable to vote in favor of this bill.

The growth of the food stamp program is staggering to the imagination. In 1965, the program spent \$35.6 million. The program in 1981 was over \$11.4 billion. For fiscal year 1983, this Congress is looking to spend \$12.4 billion of the taxpayers' hard-earned money. Just 7 years ago, the entire food stamp program operated nationwide at a cost of \$4.6 billion. Over the next 3 years, funding will be increased by \$4.6 billion. Congress is now increasing the funding of the program by the very amount it used to run on in 1975.

This legislation goes nowhere near far enough to reduce spending and tighten the administration of the program. I would not be concerned if all these tax dollars were being spent to assist those persons who are unable, through no fault of their own, to provide for their own subsistence.

Congress should keep in mind that there is a tempest brewing among many hard-working Americans and Idahoans who do not believe it is right that wages from their work go to support others who choose not to work, but to receive food stamps. I had introduced legislation, H.R. 6478, which would have helped bring this program under control and eliminate the voluntarily unemployed from the food stamp program. The essence of this legislation was contained in the supplemental views on food stamps in H.R. 6892.

I heartily endorsed the efforts of Congressman COLEMAN, ranking minority member on the Subcommittee on Domestic Marketing, Consumer Relations and Nutrition, in his attempts to reduce the abuses in the program. Specifically, I felt the need to include legislation to strengthen the provisions of error-rate reductions and sanctions, the thrifty food plan, the job search system, and the expedited service.

The committee bill contains a section that will require States to reduce their error rates to 5 percent by 1985. I supported the minority substitute, which would have saved an additional \$120 million; and would have required the States to repay all benefits issued in error by over 9 percent in 1983, 7 percent in 1984, and 5 percent in 1985 and succeeding years. These are reasonable goals for the States to achieve, and would require them to act more fiscally responsible. Obviously, however, this Congress does not think so. All it has to do is dip down into the

taxpayers' pockets and pull out more cash in order to cover its mistakes.

Another item of concern is the thrifty food plan. The minority substitute would have indexed food stamps. Currently, there are increases every October. With the indexes, this Congress could have saved \$430 million. The thrifty food plan, for a family of four, could have increased from \$233 per month to \$257 per month—only \$2 less each month than they would have received.

Since the Agriculture Committee and the House have agreed with the concept of having people look for jobs when they apply for food stamps, it follows that it should be the Secretary of Agriculture who determines how and when this law should be enforced. The House chose to adopt language which allows the State to decide whether or not they wished to employ the rule of requiring food stamp applicants to look for a job. Consequently, a total of \$32 million in savings was lost because this provision was adopted.

Further, I support legislation which would have tightened the rules governing emergency food stamp cases. Currently, people can come into the food stamp office, state they have no income and then receive food stamps within 2 or 3 days. No verification of income or assets is required. The General Accounting Office supported revisions in expedited service because of the volume of abuse. Congress needs to have language which requires verification of income and assets, and provides that the States process these applications as quickly as possible; but in not more than 7 days.

No one should be misled by these recommendations. I am all for protecting the truly needy of this country. But, to provide increased assistance to those who really need help, Congress must remove those people from the system who are fully capable of helping themselves. I believe the Government lacks compassion by encouraging able-bodied people to remain idle. Further, the Government is penalizing over 100 million American workers who are now supporting the food stamp program.●

LEGISLATION TO CONTINUE UNEMPLOYMENT BENEFITS

HON. LARRY J. HOPKINS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. HOPKINS. Mr. Speaker, today I want to alert my colleagues to an urgent problem which the people of Kentucky, as well as many others will soon face. The problem is that many States will soon lose their eligibility for extended unemployment benefits

which are currently available to their citizens.

The extended benefits program provides up to 13 additional weeks of benefits to unemployed workers who have exhausted their 26 weeks of regular benefits. The State and Federal governments equally share the cost of this program.

The reason Kentucky and many other States will trigger off and become ineligible for extended benefits is that they no longer meet the 120-percent criteria. This requirement states that the number of people in the State receiving unemployment benefits must be 120 percent of the average rate of the same period over the past 2 years. Many States are in danger of losing their benefits for a variety of reasons having to do with the individual employment makeup of the State and Federal eligibility criteria. However, the 120-percent requirement shows up repeatedly as a reason for a State's ineligibility.

Today I am introducing a bill which would temporarily waive the 120-percent criteria and allow States who desperately need these benefits to continue to receive them. My bill would also waive the current 13 week waiting period between extended benefit periods. With this waiver, a State could immediately start extended benefits once it triggered on.

Waiving the 120-percent criteria has been done a number of times before. The most recent time was in 1975. I believe this is a workable and reasonable approach to help our unemployed workers as soon as they need assistance. This method will continue the benefits currently available to workers in the most cost-effective way. As I stated earlier, States may lose their eligibility for a variety of reasons, but I believe this bill contains a provision that many States need and support.

Mr. Speaker, I am fortunate to represent central Kentucky—an area with one of the lowest unemployment rates in the State. However, that statistic is of little comfort to the individuals in the Sixth District who are currently on extended benefits after having been involuntarily laid off and who face losing this means of providing their families with basic necessities. I am introducing this bill on their behalf, and also on the behalf of the entire 17,421 people on extended benefits and 62,477 people drawing regular benefits in Kentucky who may need extended benefits after September.

I am introducing this bill with the hope that there will not be a need for the extension of the benefits for very long. However, at this time I think there is a need for these benefits. I urge my colleagues to support me in this effort to solve this problem now, while there is still time, rather than hurriedly react after it is too late.

The bill follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. WAIVER OF 120-PERCENT FACTOR.

(a) GENERAL RULE.—Effective with respect to compensation for weeks of unemployment beginning after the date of the enactment of this Act and before January 1, 1983, subsection (d) of section 203 of the Federal-State Extended Unemployment Compensation Act of 1970 shall be applied as if—

(1) paragraph (1) of such subsection did not contain subparagraph (A), and

(2) such subsection did not include the second sentence thereof.

(b) WAIVER OF REQUIRED 13-WEEK PERIOD BETWEEN EXTENDED BENEFIT PERIODS.—For purposes of determining whether an extended benefit period is in effect for weeks beginning after the date of the enactment of this Act, subsection (b)(1)(B) of section 203 of such Act shall not apply if the close of the prior extended benefit period referred to in such subsection was before the date of the enactment of this Act.●

SLAVE LABOR ON SOVIET'S GAS PIPELINE

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. DERWINSKI. Mr. Speaker, one of the major issues surrounding the Soviet Union's natural gas pipeline, is the use of slave labor. A recent report from Bonn, West Germany, confirms that the Soviet Union is using tens of thousands of human rights activists and political prisoners to complete the pipeline. This point needs to be made in lieu of the unfortunate way in which the bill, H.R. 6838, was raced from the Subcommittee on International Economic Policy and Trade directly for consideration by full Foreign Affairs Committee without full and due deliberation. It is my hope that the House will give thoughtful consideration of the damage that could be caused by the misdirected foreign policy impact of this bill which terminates certain export controls.

I wish to insert an article by Alice Siegert of the Chicago Tribune of July 21, which gives direct insight into the Soviet's need for our technology for the completion of the pipeline.

The article follows:

[From the Chicago Tribune, July 21, 1982]

SOVIET PROJECT CITED—LABOR FORCED ON PIPELINE, GROUP SAYS

(By Alice Siegert)

BONN.—A West German human rights organization claims that the Soviet Union is using tens of thousands of convicts and political prisoners to speed completion of the controversial pipeline that will pump natural gas from the gas fields in Siberia to Western Europe.

The International Society for Human Rights in Frankfurt said seven forced labor camps had been set up in the last two years on construction stretches along the 3,000-mile line.

Among prisoners forced to work on the pipeline project were human rights activists and citizens persecuted for their religious or political activities. They included Semyon Glusman, a psychiatrist who had exposed the application of psychiatry for political purposes in the Soviet Union, Lithuanian architect Julius Sasnauskas, Ukrainian writer Sinovi Krassivski, ethnic German human rights activist Juri Grimm and Baptist ministers Vladimir Marmus and Alexander Ussatyuk.

The rights organization said sticking to the pipeline deal seems scandalous in view of the conditions under which the prisoners have to work.

During the long Siberian winter, the organization said in a statement, the forced laborers are housed in railroad cars that offer no protection against the bitter cold.

"Earth-moving work machines are hardly used," the statement said. "Heavy loads must be carried by men. Work accidents are the rule. Women, whose job is to insulate the pipes with asbestos and glass wool suffer water blisters and boils on their hands."

"Protective gloves are issued only every six months. Convicts working with asbestos often suffer from exzema. Severe cases of atrophy of the lungs occur among prisoners forced to work continuously with glass wool."

The human rights group said that forced labor camps had been set up at Ust Izhim, Urengoy, Surgut, Tavda, Tyumen, Irbit and Lysva.

"These camps are right on the course of the planned pipeline," a spokesman said.

The disclosures were made just before Chancellor Helmut Schmidt flew to the United States where he will try to overcome objections by the Reagan administration to the pipeline deal.

Washington's embargo on vital components for the pipeline has exploded in a bitter conflict between the U.S. and the European Common Market. Though Schmidt's trip originally was intended as a private visit, the rift in trans-Atlantic relations has forced a change in plans.

He now will try to allay the irritations and at the same time seek a revision of the U.S. sanctions in his talks with Secretary of State George Schultz and other leading Republicans. Economics Minister Otto Lambsdorff already is in the U.S. to press the European case with Reagan administration officials, U.S. senators and congressmen.

Also on Tuesday the Common Market foreign ministers, meeting in Brussels, appealed to the U.S. to lift the export controls.

The Europeans deny that the anticipated natural gas supplies from Siberia will make them dependent on the Soviet Union. Moreover, they argue that the ban on U.S.-licensed technology violates their national sovereignty.

"For the first time in times of peace, the U.S. President has tried to seize control of non-U.S. territory," German business leader Otto Wolff von Amerongen said in an interview.

"American parent companies have been coerced no longer to make licenses available, existing contracts notwithstanding and despite the common practice of recent decades. That is a blow against international division of labor. . . ."●

JACK KEMP'S FINEST HOUR

HON. BUD SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. SHUSTER. Mr. Speaker, both publicly and privately, I have witnessed Congressman JACK KEMP's response to the vituperative, slanderous, cheap-shot attacks inflicted upon him for his opposition to the proposed tax hike. Rather than responding in kind to such vilification, his replies have been restrained, reasoned, and responsible.

For the architects of the \$99 billion tax increase to whisper that Republican opposition represents disloyalty is to expect Republicans to be disloyal to their basic principle of limited government.

For proponents of the increased tax bite to imply that U.S. Representatives have no right to speak out on a major tax issue is to ignore the U.S. Constitution, which clearly gives primacy to the U.S. House of Representatives on tax matters.

For a Republican administration to embrace a massive tax increase after promising to reduce taxes is, at best, to confuse the American people with its inconsistency, and, at worst, destroy their confidence in the integrity of this administration.

Rather than being disloyal to their party or its principles, JACK KEMP and the Republican Members of Congress who oppose this tax increase are the keepers of the flame that lights the principles of the GOP.

One need not agree with Congressman KEMP to respect the manner in which he is handling himself in this trying situation. He continues on the high road of principle, while some of his opponents apparently have chosen a different path.

In this incredible debate for the soul of the Republican Party, we are witnessing JACK KEMP's finest hour.●

HOUSING CRISIS IN MICHIGAN

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. FORD of Michigan. Mr. Speaker, we are in a housing crisis. In an article which appeared in the Macomb Daily on Saturday, July 24, staff writer Robert A. Selwa examined how it affects Wayne County. In my district, Dearborn Heights, Flat Rock, Inkster, and Taylor are among the municipalities which experienced actual net losses in housing stock.

Tight money and exorbitant interest rates are killing home construction

and home buying. President Reagan's veto of the housing bill stopped 250,000 homes from being built and 500,000 jobs from being created. That veto and other Reagan vetoes of bills to stimulate the economy and create jobs and alleviate human suffering explain the persistence of the Reagan recession.

I call this article to your attention, Mr. Speaker, so that my colleagues will have a full understanding of just how serious the situation is in my district and the surrounding areas.

REHABILITATION COULD SAVE THE HOUSING INDUSTRY

We are in a housing crisis. The housing situation is at its worst in metropolitan Detroit since the keeping of statistics on the subject began in the post-World War II era.

For the first time in the history of the region, there were more dwellings demolished than built last year.

The shrinking housing market reflects the economy, but the issue is deeper than that. The need remains, and is growing greater instead of lessening, for decent housing—the goal of the nation since the Great Depression and a goal toward which we were advancing until recently in metropolitan Detroit.

The latest housing report of the Southeast Michigan Council of Governments shows the grim picture.

A net loss of 1,309 housing units was registered the past year in the seven counties that make up metropolitan Detroit for SEMCOG: Macomb, Wayne, Oakland, Livingston, Monroe, St. Clair and Washtenaw.

Never before has that occurred.

Detroit led the way in net loss of dwellings, but some of the suburbs also had net losses, even in Macomb County with its previously ever-expanding bedroom communities.

If the family is a basic unit of society, the home is a basic structure of a block, a neighborhood, a city.

The United States Census of 1980 showed that in the past decade Detroit had a net loss of 58,696 housing units, the largest loss of housing for any city in American history.

The housing construction industry came to a virtual standstill in metropolitan Detroit three years ago. Destruction of houses continues in Detroit, and now some of the other municipalities are experiencing a diminishing housing stock as well.

SEMCOG shows the disastrous trend continues in Detroit. Slipping to sixth place in population nationally with the 1980 Census, Detroit—using \$5.1 million a year in federal block grant funds specifically for housing demolition—has a net loss of 3,459 housing units in 1980 and a net loss of 4,630 housing units in 1981. That's more than 8,089 dwellings as a net loss for this decade already.

While the suburban cities are nowhere near that crisis amount, small net losses are being experienced in many of them, such as Mount Clemens, New Haven, Roseville and Utica in Macomb County, Hazel Park, Keego Harbor, Lake Orion, Northville, Pleasant Ridge, Pontiac, Pontiac Township, Royal Oak Township and South Lyon in Oakland County, Dearborn Heights, Ecorse, Flat Rock, Hamtramck, Highland Park, Inkster, Lincoln Park, Melvindale, River Rouge and Taylor in Wayne County.

Even Grosse Pointe and Grosse Pointe Park had net losses in housing this past year.

During the National League of Cities convention in Detroit last year, Councilwoman Joan Specter of Philadelphia asked:

"How can you tear down homes when you have so many homeless people? In Detroit, they're leveled. To tear down a building in Philadelphia is sacrilege. I ask, what have you done with the people?"

If the argument is that the older cities of the Northeast-Midwest region are in trouble, take a look at the housing statistics for Philadelphia—a net gain this past decade of 11,406 dwellings in a city close in area and population to Detroit.

Look at New York—a net gain of 21,217 housing units.

Look at Boston—a gain of 8,996.

Or Milwaukee—a gain of 7,397.

Minneapolis had a housing gain of 1,645 units; Columbus, of 54,203 units, Toledo, of 13,259 units.

And, elsewhere in Michigan, Grand Rapids had a net gain of 1,682 housing units.

Our older cities and our older suburbs are capable of conserving and improving their housing stock.

Our older homes are our greatest urban natural resource.

The National Association of Realtors notes that the number of people in the prime home-buying age group of 20 to 39 years is increasing to 31 percent of the population during the 1980's. The association holds that a home is a symbol of a sound way of life.

Housing demolition is carried out with federal block grant funds using the Congressional statement of intent that the funds may be used to eliminate blight. This runs counter to two other specific Congressional statements of intent for the funds: to increase the supply of low and moderate income housing; and to conserve the existing housing stock.

Good, affordable homes are needed too much by people for federal funds to be going toward demolition.

As an intricate part of a total strategy of reviving the housing industry, measures need to be taken by Congress so as to assure that the funds intended to increase the supply of housing and conserve the existing housing stock will be used as intended.

A specific provision needs to be written into the law prohibiting the use of funds for housing demolition.

When the emphasis shifts, as intended, to housing rehabilitation, both the housing situation and the economy will be improved.

Jobs will be created in housing rehab and related fields, permanent jobs because of the skills developed. This kind of employment is particularly needed in an economy in which housing construction has virtually ended and the existing housing stock needs to be cared for.

This is the time to re-emphasize our national goal of a decent home for every American, and bring to the forefront the realization that our older homes are our greatest urban natural resource.■

RESOLUTION 242

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. ROSENTHAL. Mr. Speaker, I would like to introduce into the

RECORD a letter from a constituent that raises a point deserving wider attention.

As the dust begins to settle and immediate peace in Lebanon is, we all hope, close at hand, the point raised by my constituent's letter is one that we must not lose sight of: That for all the verbal manipulations of the PLO, they have still not repudiated their central aim—the liquidation of Israel.

Peace arbitrators from many countries have worked long hours to bring an end to the current crisis. Many points have been compromised but it must be remembered that, despite Arafat's deception efforts, the PLO has not accepted United Nations Resolution 242 which requires "acknowledgement of the sovereignty, territorial integrity, and political independence of every state in the area."

If the PLO were to acknowledge Israel's right to exist, it would be difficult to reconcile with the PLO charter, established in 1968, that states:

ARTICLE 15

The liberation of Palestine, from an Arab viewpoint, is a national duty and it attempts to repel the Zionist and imperialist aggression against the Arab homeland and aims at the elimination of Zionism in Palestine.

The world must recognize the PLO for what it stands for and not be fooled by protestations of peace. Arafat is still a wolf in sheep's clothing, trying to pull the wool over our eyes.

My constituent's letter follows:

KWELLER & DUBIN ASSOCIATES,
Hollis, N.Y., July 30, 1982.

HON. R. REAGAN,
White House, Washington, D.C.

DEAR MR. PRESIDENT: Your special envoy, Ambassador Philip Habib, has been seeking for some six weeks to bring a peaceful end to the occupation of Lebanon by the terrorist PLO. Mr. Habib has demonstrated extraordinary patience, but it is now clear that the PLO has been playing for time, that the terrorists have no wish to resolve the Beirut crisis peacefully but intend, rather, to so delay and lengthen the negotiations as to wear out the patience of our country and force the United States to recognize and negotiate with them.

I am confident that your Administration will not fall prey to such an effort. That confidence is based on your Administration's refusal to give credence to the false report that Yasir Arafat was ready to recognize Israel. All Americans may take comfort in your Administration's wise and prudent evaluation of the Arafat "breakthrough" as a mere propaganda device designed not to advance the cause of peaceful reconciliation among the parties to the conflict but to confound and confuse Americans of good will.

No mere mouthing of adherence to any UN resolution will qualify the PLO for a role in the Middle East negotiations. Rather, our country must make clear that the PLO must abandon its charter, which vows the destruction of Israel by military means, which calls the establishment of the Jewish state null and void and which seeks to purge the Jewish presence from the Holy

Land. Only then can the PLO claim the right to sit at the peace table.

I agree with you, the goals of American policy that you have spelled out so well: To restore a central government in Lebanon so that the Lebanese people will have control of their own country; to guarantee the northern border of Israel, so that there would no longer be a force in Lebanon that could, when it chose, create acts of terror across that border; and to get all the foreign forces—Syrians, Israelis and the PLO—out of Lebanon.

Israel shares these goals. So do the people of Lebanon, whose land and people was ravaged by years of PLO terrorism, as documented recently in the New York Times. That is why the Lebanese people, Moslem as well as Christian, welcomed the Israeli forces as Liberators. . . .

**DISTINGUISHED CONGRESSMAN
ADDRESSES UNIVERSITY OF
NORTH CAROLINA, CHAR-
LOTTE**

HON. STEPHEN L. NEAL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. NEAL. Mr. Speaker, our distinguished colleague from Illinois, the Honorable PAUL SIMON, visited my home State recently to deliver a commencement speech at the University of North Carolina at Charlotte. While he was there, Mr. SIMON was interviewed by Ed Williams, associate editor of the Charlotte Observer.

In this interview, Mr. SIMON made some thoughtful, provocative, and sensible observations about our Nation's problems and about the future of the Democratic Party. I would like to submit a copy of the interview for the RECORD at this time so that his colleagues may have the benefit of his comments. The article from the June 26, 1982, Charlotte Observer follows:

[From the Charlotte (N.C.) Observer, June 26, 1982]

DREAMING LIBERAL DREAMS AND PAYING FOR THEM

(NOTE.—Paul Simon, 53, has been a congressman from southern Illinois since 1974. He is a member of the House Budget Committee where, though known as a liberal, he is "not of the knee-jerk variety" and "does not necessarily push for higher spending," the Almanac of American Politics notes.)

(Simon is the author of a new book, "The Once and Future Democrats: Strategies for Change" (Continuum, \$12.95). When Simon was in Charlotte recently to speak at the UNCC graduation, Observer Associate Editor Ed Williams talked with him about the book and the Democrats. Here's part of that conversation.)

Q. What's the problem with the Democrats, and how do they solve it?

A. My assumption is you shouldn't win just because the other guy is doing a bad job. There are those who say the Democratic Party should not focus on any issues, we should simply let the Republicans foul up and we take over by default. I don't think the country moves in the direction we ought to go doing that.

There are three thrusts in the book. One is that we have to be the party of compassion. We have to stand up for those who face real problems in our society.

Second, we have to be a party that stresses productivity. At some point in our history—I think it can be pinpointed to the LBJ years—we continued to stress that everybody ought to get a piece of the pie, but we forgot that for that piece of the pie to grow the pie had to grow.

Third is the whole issue of quality—the quality of life, through culture, in education, in what we produce in our factories, everywhere.

Q. How does that make Democrats different from Republicans?

A. I think the one area where they have contributed is productivity, though I think they're so out of balance that the productivity contribution has been minimized. We're now at about 70% plant capacity. If you solve the society's capital formation problems, but you don't solve the distribution problems, you've failed. All the capital formation help you give to Chrysler, GM or anyone else isn't going to help if people can't buy cars. So you can't solve one problem while you're causing other problems.

I think the parties differ in the area of compassion. I don't think Reagan is a badly motivated man, but I don't think he understands what poor people face in Charlotte, or in Carbondale, Ill. His program reflects that.

In some instances, his party is on the popular side. In my district food stamps are unpopular, and it's the poorest district in Illinois. And yet, I think someone writing 50 years from now will regard food stamps as one of the finest things we have done. We have virtually eliminated severe malnutrition in this country through food stamps.

And in the area of quality, we're not doing anything at all. In fact, one of the basic problems with the Reagan budget was that it was put together without asking. How does this impact on the quality of life in our country?

Q. In the past, it has seemed to be that the Democrats were so overcome by either compassion or the desire to build up political capital that they created programs the nation couldn't pay for. How do you combine the qualities about Democrats that are attractive with more efficiency in running programs and a better grasp of economics?

A. We can run programs more efficiently, no question about it. We've made some mistakes in that area.

I think your assumption is wrong when you say we can't afford these programs, but correct when you said we have not budgeted properly. Democrats, along with Republicans, have not been balancing the budget. In percentage terms, the great growth in the budget is not social programs or defense, it's interest. Dave Stockman testified before the Budget Committee the other day that he thought by '85 or '86 we would be spending about 19% of the budget on interest. That is a reflection on Democrats and Republicans. The worst, ironically, of any president is Ronald Reagan, right now, in terms of the deficit.

But when you say we can't afford it, we have a smaller revenue base than any Western European country. It's interesting that a conservative columnist like George Will says we have to expand the revenue base of this country. The Reagan move to the \$750 billion tax cut over five years was extremely popular. It was also irresponsible, and I think the deficit figures we are seeing show

that. Reagan said when the tax bill passed, said in a speech, by fiscal '85 we'll have a \$7 billion surplus. Now, that same administration projects a \$233 billion deficit by fiscal '85.

Q. Public opinion polls consistently show that Americans believe in helping people who can't help themselves, but also think the programs by which we do it are wasteful, inefficient and in some cases corrupt. How should Democrats conduct those programs so as to do what Americans want to do but do it better?

A. Part of it is leadership that appeals to the best in us, not the worst. If you took a poll in my district, should we eliminate or cut back on foreign aid, it would be overwhelming in favor of doing so. But ask those same people, should we help starving people overseas, and they'd say yes. A party has to appeal in constructive ways.

I think the chapter in the book that is probably the most controversial is the one where I advocate that we guarantee everyone a job through the public sector if they can't get jobs in the private sector. I don't think it's enough to simply tell the stories about the welfare mother in Chicago, you know the anecdotes that Reagan repeats over and over again. He has repeated those anecdotes, yet we now have more people on AFDC than we've had at any time since the Depression. Somehow just repeating the anecdotes and condemning welfare doesn't get people off welfare.

We're not going to let people starve. We're either going to pay them for being productive or we'll pay them for being non-productive. And we have devised a system—our welfare-unemployment compensation system—where we pay people for being non-productive. We ought to have programs that pay people for planting trees, for teaching functionally illiterate people how to read and write, for doing a thousand and one things that could enrich our society, and will not cost any more.

Q. The real problem with the Democrats, Sen. Ernest Hollings said, is that a lot of people don't believe they will pay the bills.

A. That has to be dealt with. While there's a difference between conservatives and liberals, it should not be over whether we pay the bills. I would favor a higher level of government expenditures than my more conservative friends. But whichever program we favor, we ought to pay for it as we go along.

Q. What do you think will be the outcome of Reagan's programs?

A. The Reagan program is not working. It could have worked. What basically we had was a shift from spending for social programs to defense. If that had been the only change, it would have been a wash, and while I would not have agreed with that shift, no great economic damage would have been done. When he combined that with that tax cut, then real damage was done.

The theory was that our economy would take off. In fact, the stock market went down, the bond market went down, real interest rates are at an all-time high. It's because, I think, the financial markets think the Reagan program has real inflationary pressures built into it.

The one that concerns me, and that we're modifying a little, is in defense. Harry Truman asked for a tax increase at the beginning of the Korean war, and we had a lower inflation rate at the end of it than we had at the beginning. In the Vietnam period, from fiscal year '65 to '70, we had a defense increase of \$26.9 billion. I think

most people would agree that one reason for inflation today is that LBJ did not ask for a tax increase to fund it.

Now, from fiscal year '81 to '86 we're being asked for a \$197 billion defense increase—even with inflation, that's three or four times what LBJ did during the Vietnam period. And with it a tax cut. That scares the financial markets.

Q. Your vision of the Democratic Party is attractive to a lot of Democrats, but to a lot of other Democrats it seems wrong—a resurrection of a New Deal philosophy that doesn't fit today's realities. Are you trying to make the Democratic Party something it can't be?

A. I think there are enough things that appeal to conservatives that you can pull at least the bulk of them. The program I espouse is not going to appeal to Larry McDonald in Georgia, who is a regional vice president for the John Birch Society. FDR brought along the conservative Democrats, because he had things that appealed to them also. Conservative Democrats are interested in a balanced budget, one of the things I talk about in the book. Conservative Democrats are interested in restructuring the welfare program, in taking another look at unemployment compensation. I don't think conservative Democrats are necessarily opposed to doing more in the arts and humanities than we do. I think the right kind of leadership can pull it together.

There is a word you used that is important, and seems to have been forgotten: vision. A country has to dream dreams and have a vision. A nation is never on a plateau; it's either going uphill or its going downhill. I think we're going downhill now.

Instead of dreaming dreams and having a vision of where we ought to go and what we ought to do, we're now trying to defend the status quo. That's not good for a country. That's one of the most unfortunate things about the Reagan program.●

NICARAGUA RULERS SHOW FEW SIGNS OF DEMOCRACY

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. DERWINSKI. Mr. Speaker, I wish to direct the attention of the Members to an article in the July 18 Chicago Sun-Times which comments on the unfortunate events in Nicaragua. Patrick Oster, the Washington Bureau Chief of the Sun-Times, provides a fascinating and objective look at the tragic political situation in that land. The article follows:

[From the Sunday Sun-Times, July 18, 1982]

NICARAGUA RULERS SHOW FEW SIGNS OF DEMOCRACY

(By Patrick Oster)

MANAGUA.—As Nicaragua marks the third anniversary of the July 19, 1979, ouster of dictator Anastasio Somoza Debayle, there are signs that the democratic promise of the Sandinista-inspired revolution is finished.

Several of the moderate officials who once held high positions in the initial coalition government have fled the country, disillusioned by the increasingly Marxist ways of the radical left leadership that really runs this country of 2.7 million people.

Nicaragua is not yet totalitarian. But it is becoming increasingly difficult to argue it is pluralistic, non-aligned and has a mixed economy as the Sandinistas promised.

Today, political parties not aligned with the Sandinista National Liberation Front (FSLN), the Sandinista party, are banned from criticizing the government—as are private citizens—because of laws imposing a "state of emergency" March 15. The press is censored, too.

The emergency was declared because the threat of invasion from Honduras by counterrevolutionaries—mostly former national guardsmen of the Somoza regime.

The active armed forces have been built up to an unprecedented level of 22,000.

Critics charge that the counterrevolutionary activities are more nuisance than threat and are being used as an excuse to move Nicaragua to the left. The government, in turn, which accuses the Reagan administration of supporting counterrevolution, says it's not unreasonable to fear an invasion inspired by the United States, which has invaded Nicaragua 14 times.

Whatever the merits of the state of emergency, it's clear that even before it was declared the Sandinistas loved to monopolize political power.

Two non-Sandinista members of the junta quit in the spring of 1980 after the Sandinistas packed the Council of State to give themselves a majority.

Financial expert Arturo Cruz, who took one of the junta vacancies, also left when it became clear that the nine-member Directorate of the FSLN, not the junta, was running things.

The private sector still controls about half the economy. But increasingly, the government is nationalizing firms that are lucrative or key to the economy. Business owners complain they don't know where they stand.

The Sandinistas promised elections when they took over in 1979. But they have postponed them until 1985. Even then, FSLN officials have made it clear that the elections will be designed to strengthen Sandinista control, not jeopardize it.

Leaders of the only two free trade unions in Nicaragua have been beat up or threatened. Attempts to organize workers in factories or on farm cooperatives are viewed as counterrevolutionary.

Through impressive literacy and health campaigns, the Sandinistas have improved the lives of campesinos, who make up a majority of the population. But campesinos in private trade unions aren't being given land under reform programs like Sandinista union members.

Nicaragua joined the organization of non-aligned nations after 1979. But its pro-Soviet votes at the United Nations make its independent stand questionable.

There has been a close relationship with Cuba, whose Premier, Fidel Castro, helped unite the once-warring three factions of the FSLN. The CIA estimates there are about 6,000 Cubans in Nicaragua, 2,000 of whom are military advisers.

Members of the Sandinista Directorate have made numerous trips to Communist-bloc countries. But they have made many trips to Western Europe, Africa and Asia, too.

Most of these trips have been to seek aid for Nicaragua's ailing economy. The gross national product dropped 25 percent in 1979, putting the country back to its 1962 level. Slow growth since then has been complicated by damage caused by torrential rains in May.

The pressure to improve economic conditions, the cause of some dissension could force the Sandinistas to keep what pluralistic elements they have in order to please moderate governments helping them.

Likewise, they are feeling pressure from criticism from Eden Pastora, the famous Commander Zero, who left the country in disgust over its increasingly Marxist character.

Some hope this pressure will stop the drive left. But it seems a slim hope.●

SOUTH BOSTON 13-YEAR-OLD BABE RUTH ALL-STAR TEAM

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. MOAKLEY. Mr. Speaker, on Monday, August 16, South Boston's 13-year-old Babe Ruth All-Star Team will be in Washington, D.C. The team, which recently captured the New England championship for its league, will be competing for the national championship in Frederick, Md., under the leadership of Coach George W. Seeley, Jr., this weekend.

Mr. Speaker, these boys deserve special praise for the special happiness and pride they have given to the residents of South Boston. They have worked hard with what little resources given to them, combined with the dilemma of inevitable injuries, in order to produce a first-rate ball team.

Below is a list of the coaches and players of this magnificent team. The South Boston Babe Ruth All-Star Baseball Team will go to bat for the championship this Sunday. I hope all of my colleagues will join me in wishing these outstanding boys the best of luck in their endeavor.

Coaches: George Seeley, Jim Greene, and Mal Hornsby.

Players: Paul Walsh, Dominic Sulpharo, Keith Callow, Dan Suplee, Bob McGarrell, Mike Doyle, Greg Yanovitch, Edward Yamoullkas, Mike Burke, John Glynn, Steve McKenna, Tony Galvin, Matt Mullen, Mike Turner, and Paul Joseph.●

PROPOSED BALANCED BUDGET AMENDMENT

HON. LINDY (MRS. HALE) BOGGS

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mrs. BOGGS. Mr. Speaker, the Senate has now approved an amendment to the Constitution to require a balanced Federal budget. The focus of attention on this issue is shifting to the House of Representatives. Last week the Committee on the Judiciary completed a series of hearings on pro-

posals to write a balanced budget amendment into the Constitution.

While the House of Representatives is making progress in considering these balanced budget proposals, many questions still remain to be resolved about the effect of writing economic policy or theory into such a venerable document as our Constitution. The New Orleans Times-Picayune/States-Item newspaper in my congressional district has raised serious questions about this approach in recent editorials I would like to share the latest one with my colleagues.

The editorial follows:

[New Orleans Times-Picayune/States-Item
Aug. 9, 1982]

POLITICAL BALANCING ACT

In theory, everybody wants a balanced budget, regardless of whether he is a laborer trying to make sense of his checking account, a mogul heading a multinational conglomerate or a leader putting together a country's economic policy.

That much is easy to accept, and there's nothing wrong with this basic desire for fiscal security.

So what's wrong with a constitutional amendment to require a balanced federal budget? For starters, the Constitution is supposed to be an outline, full of broad, sweeping statements about the rights of people and their relationship to their government. The balanced-budget amendment before Congress, with its restrictions on the use of taxes and its complex conditions for allowing an unbalanced budget, is a verbal quagmire.

Ratification of such an amendment would set a precedent for littering of the Constitution with nit-picking amendments.

At this point, the congressional debate over the proposal is a waste of time. Besides taking up time that should be devoted to important matters, the debate does nothing more than let its backers say how much they oppose wasteful spending.

Since this is an election year, such congressional grandstanding is directed more toward the voters back home, and members doubtless are hoping their constituents will hear those statements and somehow disregard the fact that next year's unbalanced budget—the one threatening to strangle economic recovery aborning—is projected to carry a deficit of at least \$140 billion.

The proposed amendment carries about as much might as one requiring sunny days. What would happen, once the amendment were part of the Constitution, if Congress decided to pass an unbalanced budget? Would all 535 representatives and senators be thrown into jail? And what would have to be cut to balance the budget?

The amendment is silent on such matters. Instead, it is rife with procedures for unbalancing the budget—in wartime, for instance, or when Congress votes to create a deficit—along with a provision for raising the national debt and with a prohibition against using taxes to balance the budget.

All this is too unwieldy to be acceptable as anything but a political device to obfuscate the inability of the president and Congress to balance the budget at a time when it rarely needed balancing, or at least reducing, more. ●

TERRORISTS ARE NOT VICTIMS

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. LEHMAN. Mr. Speaker, with the very serious questions raised by the one-sided reporting about the Lebanon crisis, I would like to recommend that my colleagues read the "Viewpoint" article published in the July 18, 1982, Miami Herald. Rabbi Abraham Cooper of the Simon Wiesenthal Center in Los Angeles has written a thought-provoking piece reflecting on some of the ironies that have surfaced during the recent conflict in the Middle East.

The article follows:

[From the Miami Herald, July 18, 1982]

TERRORISTS, NOT VICTIMS

(By Rabbi Abraham Cooper)

ENTEBBE, July 4, 1976.—Six years ago, the world applauded the daring of Israel's military as it saved the hijacked passengers and crew of an Air France jumbo jet from under the nose of Idi Amin. Congratulations poured in; books, films, and articles followed. But though there have been many victories on the battlefield, Israel's image has continued to erode in the eyes of the world. There are profound ironies in the latest anti-Israel blasts.

Imagine the outpouring of adulation from U.S. public opinion had England announced that, as a result of the conflict with Argentina, it succeeded in foiling a Soviet sea missile and passed on the technological breakthrough to the President. Or if the Swedes had exhibited enough guts to confiscate the fully armed Soviet nuclear spy submarine beached last fall at Karlskrona. Yet Israel's smashing defeat of Soviet technology, military strategy, and hardware—and its immediate shipping of Soviet tanks and SAM-6 missile units to U.S. military experts—have barely raised a whisper outside the Pentagon.

Imagine the sense of satisfaction in the State Department if Angola were willing and able to expel the Cuban troops from Central Africa. Yet the resounding defeat of two major Soviet clients—the Syrians and the Palestine Liberation Organization (PLO)—evoke anger and frustration in Washington.

Why does Israel continue to lose on the public-opinion front in direct proportion to its military achievements? There are many theories, but I suggest that one central reason is America's traditional love of the underdog.

Clearly, in the last 15 years, despite the growth of OPEC's stranglehold over the West, Israel has shed the underdog image and has emerged, however reluctantly, as a regional power. Conversely, the Palestinian issue is now touted as the key to "a lasting peace" in the Middle East even though it played at best only a minor role in the major conflicts through the 1973 Yom Kippur War.

The PLO and its supporters successfully portray their cause not only as classic underdogs but indeed have utilized and perverted terminology often associated with Jewish suffering. By labeling Lebanon as their "Holocaust," by hurling charges of "systematic genocide," they manage to de-

flect public opinion from the fact that it is they, along with the Syrians, who destroyed the sovereign state of Lebanon, who slaughtered 60,000 Lebanese civilians, who displaced whole villages.

Why has Israel failed so miserably to get its point across effectively? An additional cause is the more-universal failure by Western institutions to perceive the true nature and threat of international terrorism.

By claiming eminent domain of their people's struggles and by labeling themselves the voice of the oppressed, international terrorists have in effect issued themselves blank checks to strike anybody, any institution, anywhere in the world.

Incredibly, the PLO chameleon has struck again. The unending arms caches cynically hidden in basements of apartment houses, schools, hospitals, and even mosques are overlooked as the very people who brought Lebanon to its knees coolly and automatically act the helpless victim. Suddenly, Arafat and his commanders are kissing babies in West Beirut, and the gullible media are there to record yet another public-relations ploy. These same "brave leaders" have proven their courage during the battle by staying in bunkers three stories underground while combatants and innocents alike are left to pay the consequences of their policies.

The time has come for our allies abroad and many people here to shed unjustified romantic visions of these terrorists.

If we want to help the peace process, let's mobilize behind the Camp David Accords, which bind Israel, Egypt, and any other Arab party ready to address legitimate Palestinian problems. But before there are any more Beirutis, it is time we learned to separate the firefighter from the arsonist. ●

THE GENTLEMAN FROM MISSISSIPPI, JOHN SHARP WILLIAMS

HON. G. V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. MONTGOMERY. Mr. Speaker, a copy of an article in the Saturday Evening Post, dated July 22, 1911, was recently brought to my attention. The subject of the column was John Sharp Williams, who served as both Congressman and Senator from my State of Mississippi. I want to share it with my colleagues.

[From the Saturday Evening Post, July 22, 1911]

WHO'S WHO AND WHY—THE GENTLEMAN FROM MISSISSIPPI

When John Sharp Williams stuck his head through the door of the Democratic cloakroom in the Senate the other day and took a calm and contemplative look around, with a corn-cob pipe in his teeth the while and little rings of smoke festooning themselves on the tattered remains of what was once his curly hair, and then dodged back to his chair in the cloakroom to continue his narrative, we all knew everything was all right.

For a time we had been a little uncertain about John Sharp. We had doubts whether he would run true to his old House form, or would be impressed with his dignity as a Senator and have his toga valet every

morning. However the fears were groundless. John Sharp wears his dignity as a Senator with the same nonchalance with which he wears the bow of his black tie around under his left ear and all is well.

You see, John Sharp has been away from our seething midst for quite a spell. They are wise in Mississippi; and they fixed it so their legislature meets but once in four years or six—or something like that. At any rate, their legislature does not get to pestering around every year as legislatures do in most states; and the result is that when they elect a Senator down there they elect him far enough in advance of the beginning of his term to give him ample time to appreciate what has been done for him, and to allow him a period of rest, reflection and resolve. Thus, though John Sharp was chosen in the Senate primaries on Aug. 1, 1907 and elected to the Senate on Jan. 23, 1908, he didn't begin to be Senator, the strict sense of being on the payroll until March 4, 1911.

Meantime John Sharp, after leaving the House of Representatives at the close of the Sixtieth Congress, lived on Cedar Grove Road in Benton, Miss. which is on Rural Free Delivery Route Number One, following the varied pursuits of a planter, which include the scholarly and reverent cultivation of a mint patch, the higher education of some hounds, calm contemplation with Epictetus, communion with Marcus Aurelius, occasional excursions with Empedocles, Horace, Seneca and others of the restful old boys, and the consumption of hot bread for breakfast. Two years of this agricultural labor and John Sharp came back to Washington, his hair a little grayer, his mustache a little scraggler, but his eyes just as bright and his mind just as clear and his trousers needing to be pressed just as much.

Still he said nothing. When the Senate finally decided to fix up its committees they put John Sharp on the Finance and Military Affairs among others, and he sat for hours in the reciprocity hearings held by Senator Penrose's bunch of loyal and loving friends of that great Administration measure—that is, as loyal as they are loving, both of which they are neither, as Coe I. Crawford would say—and listened to various delegations and deputations tell how reciprocity would hurt them on the one hand, and enrich them on the other; but he didn't sparkle a single spark on the floor of the Senate, where practically every other new Senator had increased the wonder as to how he got there by making a public address—and some of them seven or eight.

John Sharp said nary a word. Then on May 25, when Senator Root was pointing out how gravely the foundations of the Republic are threatened by the incendiary scheme of electing Senators by direct vote of the people—and his own foundations too, by the way—John Sharp climbed aboard of Mr. Root for a brief space. And just as he began to mount he explained it all. "Mr. President," he said, "I had not intended to open my mouth at this session of the Senate of the United States, but it seems to me it is necessary that my own position should be made clear on this question." Then he made it clear in about 500 words, not only to the Senate but to Senator Root. Making things clear is one of John Sharp's specialties. After that he retired to the cloakroom and his corn-cob pipe; and save for a question or two, he has said nothing up to the moment of writing.

Presently, however, we shall hope to see and hear John Sharp in action. What the Senate of the United States needs more at

the present time than any one thing is the presence of somebody who has a sense of humor. It takes itself so seriously these days that it creaks with dignity. Admitting that it is a great and solemn thing to be a Senator, it must be admitted that many solemn if not great things are Senators. Never a ray of sunshine penetrates that turbid assemblage. First Heyburn talks and then Bacon talks, and then Bacon talks and Heyburn follows; and even the bronze lady of the dome weeps dolorously every minute they are in session. So if John Sharp isn't scared of his surroundings and hasn't left that pretty wit of his down on the plantation, we shall live in palpitating anticipation that some day he will cut loose and give the presiding officer the chance to say, for the first time in this session: "The Senator will suspend while the chair informs the galleries that laughter and other evidences of approval and disapproval are forbidden by the rules of the Senate."

Not that John Sharp is a jokesmith or humorist, but that he has concealed about him ideas that can be clothed otherwise than in the usual ceremonial language that prevails and not lose any of their force or appositeness at that. When he was in the House it was a joy to hear him speak, especially when he was removing the hide of Gen. Grosvenor or ex-Uncle Joe Cannon or the melancholy John Dalzell. Heaven knows he has ample field for his hide-remover where he is now; and its advent will be hailed with loud cheers by all and sundry, and particularly by those unfortunates who make their living by observing what the Senators do and how they do it.

John Sharp doesn't seem a day older than when he was with us before. He isn't any more impressed apparently with the sacred traditions of the Senate than he was with the sacred traditions of the House. What he is doing, most likely is studying his associates in that select body—watching them work out—with an eye cocked to one side and a chew of tobacco in the right place, fixing them in his mind and getting them sized up, so he can tell where to begin when it seems necessary to let a little light into the scull of a benighted but dignified brother. Well, John Sharp is somewhat of a light-lever when he gets at it. He sure knows how.

He hasn't changed any. He is the same whimsical, delightful, brilliant chap he always was—absentminded, preoccupied and unimpressed by any but the essentials, careless, happy-go-lucky and smarter than a steel trap. Did you ever hear of the time when he was living down at the old hotel on the Avenue and was going to dine at the White House? His wife was not here at the time and John had to look out for himself in the way of sartorial embellishment. He began work on his toilet at half past six—the dinner was at eight—and he made heavy weather of it. From time to time he went to the room of his neighbor, Cooper of Texas, to consult about details.

"I suppose I've got to wear a high collar and one of the dabbled white ties?" he suggested to Cooper.

"Sure you have, John Sharp—and tie the tie yourself."

John Sharp went back and struggled with the tie. Finally he got it in shape.

"Shall I put on a black waistcoat or a white one?" he asked plaintively. "You know I don't bother my head about these things."

"Put on a white one, John Sharp," counseled friendly Cooper.

John Sharp went back to his room and fussed around some more. Then, complete and superb as he thought, he went in to have Cooper take a final look at him. He burst in and struck an attitude.

"Observe me Cooper," he shouted. "Observe the sartorial model from Yazoo, Mississippi! Take a look at the mold of fashion and the glass of form! How do I look, Cooper? How do I look?"

"Well, John Sharp," Cooper replied mildly, "I think you would look a little mite better if you went back to that room of yours and put on your pants!"

OLDER AMERICANS VOCATIONAL EDUCATION ACT

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. GOODLING. Mr. Speaker, I am pleased to cosponsor the Older Americans Vocational Education Act along with my colleague from Connecticut (Mr. RATCHFORD). I feel that it is important to raise the issue of skill training and age discrimination in the context of Education and Labor Committee's hearings on the reauthorization of the Vocational Education Act.

The bill proposes to establish a 3-year demonstration program to encourage the development of training and retraining efforts for workers age 55 or older. In addition, the bill would amend the current Vocational Education Act to provide for the inclusion of the older worker in State plans. This legislation embodies a crucial concept which has been overlooked in the past.

While I support this concept and endorse this legislation because it raises the issue of vocational training for older workers, I also have several concerns which I hope to address when the committee begins to markup the vocational education amendments.

Without a comprehensive look at the Vocational Education Act, I am concerned that by merely broadening the pool of eligible recipients, the vocational services might be seriously diluted.

In the present fiscal environment, it will be necessary to carefully craft the authorization to insure inclusion of the older worker without harming programs designed for youth and young adults.

In addition, I am concerned with the proposal to set up demonstration programs without an appropriate role for State boards of vocational education. If training centers for the elderly are ever to take root, State level involvement will be essential. This is another area which must be carefully examined in committee.

While I think these concerns are legitimate and ones that must be addressed in committee, I am positive that this bill will play a vital role in

placing the issue of vocational training for the older worker before the committee and ultimately before Congress. This is a concept that must be dealt with as the committee proceeds with its consideration of the Vocational Education Act. ●

SOVIET DAY OF SHAME

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● **Mr. DERWINSKI.** Mr. Speaker, just 14 years ago on the 21st of this month, the Soviet military forces crushed the reform-minded government of Alexander Dubcek of Czechoslovakia by invading that country and occupying it with military troops. With its recent invasion and occupation of Afghanistan and the continued suppression that exists in Poland and the other captive nations, the Soviet Union continues to pursue its quest for world domination.

On August 21, 1968, a day which has appropriately been called the Soviet Day of Shame, Russian troops dealt the devastating blow to the liberalization that was developing in that small country. Although a Soviet satellite for 21 years prior to the invasion, Czechoslovakia had tried to maintain a degree of self-government. This Soviet military occupation violated the sovereignty of Czechoslovakia and it clearly was a transgression of international law. This unprovoked aggression was a clear infraction of the United Nations Charter although this world body was ignored by the tyrants in the Kremlin.

Although the invasion of Czechoslovakia by the Soviet Army and forces of its satellite states squelched the independence of a sovereign state and denied its people the right of self-determination, it is important to note that there exists a strong yearning for freedom and a strong nationalistic spirit in the people of Czechoslovakia. Their opposition to Soviet domination has never ended. Although there is a certain tightening in the Government's policies toward the dissidents, more than 1,000 courageous Czechoslovak citizens, signed a petition to require the Government to adhere to the Helsinki Final Act. They demanded restoration of their fundamental civil and political rights in the manifesto, "charter 77." This was followed by "petition 78" which was developed for the practical purpose of supporting the signers of charter 77.

The signatories of these two human rights manifestos and their supporters have been consistently prosecuted by the Czechoslovak Communist government. Based on reports from Western

European publications, the Red regime is highly displeased with the charter 77 document, and is monitoring the actions of the nearly 1,000 signatories. To express an unpopular view in any Soviet-occupied country may lead to police reprisals and imprisonment. Reports have verified that such action is being used on those signers of the human rights manifestos. Despite the severe oppression, their numbers have been growing.

It is of paramount importance for us to encourage the brave people of Czechoslovakia in their ongoing struggle for their political, economic, and national rights. We must continue to dramatize and object to the heavy-handed reprisals which are a way of life under Communist regimes.

Therefore, I join with the millions of freedom loving people throughout the world in supporting the people of Czechoslovakia in their hopes and prayers for the withdrawal of Soviet troops. Someday they will regain the freedom that was once theirs. ●

INTRODUCTION OF THE OLDER AMERICANS VOCATIONAL EDUCATION ACT

HON. BILL RATCHFORD

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● **Mr. RATCHFORD.** Mr. Speaker, a remarkable phenomenon is unfolding that will have far-reaching implications for our society. The aging of the American population is no secret to any of us, yet at few levels of public policy formulation has this dramatic demographic shift been considered in a meaningful way.

It is estimated that by the year 2000, the number of persons age 55 or over will increase by 19 percent. As policymakers, we must begin to consider the implications of a population that will not only live longer, but an increasing proportion of which will want to work longer. Sadly, this trend will be accompanied by a sharp increase in the poverty rate—the worst being among older women and minorities. The pressures of inflation and the disproportionate cuts in Federal programs for the elderly have influenced the attitude of many older persons toward work. Recent surveys show that 74 percent of 55- to 64-year-old persons wanted to continue in some type of part-time work beyond retirement. A 1981 Lou Harris poll showed the figure to be as high as 79 percent.

However, many individuals over the age of 50 who have lost their jobs or who have never worked, are experiencing great difficulty in entering or reentering the work force. We know that many are forced into social security at

age 62 because they cannot find employment. Critical barriers to employment or reemployment of the older worker include obsolete job skills, lack of skills, individual attitudes, lack of job search skills, and employer discrimination in hiring older persons, particularly when training is involved.

Obsolete skills and the lack of skills are hardly the result of declining learning abilities. These problems are especially prevalent among the male population of older workers, displaced by plant closings or the influx of new technology. The lack of skills is most characteristic of older women entering the labor force for the first time after years of work in the home raising a family.

As a result of this dilemma, there has been a sharp increase in the number of older individuals taking educational courses to acquire job skills. According to a 1981 Lou Harris/NCOA survey, the number of people over the age of 40 seeking specific job skills has more than doubled in the past 7 years. Presently, and with few exceptions, programs funded through the Vocational Education Act have focused primarily on younger persons. Those focused on older persons are, for the most part, geared to preretirement counseling. Further, despite Federal mandates, funding required to broaden the scope and number of educational programs for the adult learner has been absent.

Federal job training programs that serve the older person are quite limited and primarily serve the low-income, chronically unemployed or hard to employ. Displaced homemaker programs do not assist persons over the age of 60, and the States by and large have failed to provide these services on their own. This is why I have introduced legislation today which would provide a greater focus on the older worker in vocational education programs, and provide for the establishment of a 3-year \$20 million demonstration program to encourage the development of training and retraining for the older worker.

Under this legislation, entitled "The Older Workers Vocational Education Act," model centers would be established to focus greater attention on the special vocational needs of the older worker, and to promote employment opportunities for them. Serving those age 55 and older, these model centers would provide training and retraining in the following areas: to update skills and prepare the older worker for new careers when technological advances have rendered their current skills obsolete; promote employment in areas of job potential in growth industries. The centers would also provide assistance for: later-life career changes, with special emphasis

on the older displaced homemaker; information counseling and support services to assist older persons in obtaining employment; encourage vocational education providers, including community colleges and technical schools, to offer more job training opportunities targeted and easily accessible to the older person. Finally the centers would also promote the training of paraprofessionals in gerontology and geriatrics, to help meet the increasing demand for such services.

Under my legislation, the Secretary of the Department of Education would be given broad authority for the design and conduct of the demonstration program. By placing a \$400,000 cap on the level of any one grant, I expect that some 50 to 70 grants could be funded each year throughout the Nation. Eligible recipients of grants under this program would include States, State or local education agencies, postsecondary and vocational training institutions, any business or labor organization, and a public agency, non-profit or for-profit organization. State sponsored model centers could readily tap other available resources at the State level and could be easily coordinated with other employment and training programs. In addition, the private sector has demonstrated its willingness and competence in conducting training and retraining programs.

It is my hope that the adoption of this legislation will provide a greater focus on the special needs of the older worker in vocational education. It is aimed at fostering the development of skills development and employment counseling programs that will assist the many older Americans who want to continue to work or reenter the work force. As with the promotion policies and procedures of many firms which discriminate against the older worker, so too is the case with training opportunities. For many firms, there are powerful economic and organizational forces that lead to the selection of younger workers for the most intensive and expensive forms of training—this despite the discovery by some firms that older workers are more committed to company objectives than younger workers, that they hold vast experience and are willing to learn new skills, and that they are reliable. One recent study reveals that many executives report that it was by sheer accident that they discovered the value of their retired workers when, in desperation, they called upon them for assistance in handling backlogs of work. The executives reported that it proved to be more economical to have their own experienced former employees handle the extra work on a part-time or temporary basis than to call in outsiders with no experience whatsoever.

The Grumman Corp. in New York has successfully used about 600 older workers over the past 10 years in positions ranging from skilled technicians and engineers to publications writers. Grumman executives found the older workers to be experienced, talented, and willing to get back to work. The Bankers Life & Casualty in Chicago is also serious about the use of older workers. Bankers recruits older workers from outside the company, and has established a temporary pool to provide full- and part-time jobs for its own retirees. At IBM, retirees hold a number of positions throughout the company and many work up to 120 hours per year. They are hired to run preretirement sessions and health education programs for other retirees, active employees, and the spouses of both; to be call dispatchers and switchboard operators, among other things. In the Greater Hartford, Conn., area, the Travelers Insurance Co. has formed a consortium with other insurance companies to provide training in computer processing for retirees. Monsanto has established a successful program which relocates middle-level executives to St. Louis for a year-long retraining program conducted at Washington University. General Electric re-trains middle-aged engineers at its Utica plant, and has found this practice to be more cost-effective than hiring younger college graduates. In responding to the adverse impact of foreign competition on its business, the International Silver Co. converted one of its plants and retrained many of its older employees as toolmakers.

The second careers program in Los Angeles helps mandatorily retired corporate executives find a way to remain active in either volunteer capacities or through full- and part-time work. They service many of the largest corporations in southern California by helping them fill their needs not only for permanent help, but also for vocational relief personnel, for experienced people needed temporarily on short-term projects, or for help in meeting a deadline. This program has met with tremendous success, and the staff has found the older worker to embody a unique combination of experience, skill, and maturity, making training and placement easy. The College Emeriti in San Diego, Calif., has operated a job development and job search and training program for those over 55 years of age for the past 5 years. Courses offered include training for apartment house management, court conservator, volunteer leadership, computer work, and office skills. Yet another example of a successful program in this area is the Grassmont Adult Career Center health education reentry program based in LaMesa, Calif. This program offers training to adults for a variety of health related

jobs such as medical clerk, nurse assistant, medical office management, medical transcription specialist, dental health assistant, psychiatric technician, and vocational nursing. It also offers reentry courses for nurses and licenses vocational nurses. About 900 students go through this program each year with as many as 60 percent over the age of 55. Many at the age of 70 or older have been enrolled, and job placement has been high.

These examples of both private and public sector sponsored employment and training programs demonstrate the possibilities for dramatically increasing the number of older workers that can remain in or reenter the work force. While these examples are quite impressive, the availability of such services has been severely limited to date. Relatively few private sector concerns have undertaken such bold initiatives, and the Federal and State governments have been remiss in their responsibilities toward the older worker. One recent study revealed that while many States provide consumer and life-coping programs to meet the psychological and social needs of the older person, few offer opportunities for the older person to gain the vocational skills necessary to reenter the labor force when they may lack the skills to do so, or who are unemployed due to a lack of competencies.

Additional evidence exists at the Federal level. Another recent study found that 270 programs concerned with adult education and training existed in 29 Cabinet-level departments and agencies, with Federal support estimated to be in excess of \$14 billion. However, only a small fraction of this money supported learning opportunities for adults beyond the traditional college age. It has also been found that academic institutions, because of a shortage of funds, have been unable to support such programs in the absence of any Federal mandates for lifelong learning.

Under my legislation, Mr. Speaker, the Vocational Education Act would be amended to provide a greater focus on the special training and employment needs of the older person, and to provide for this important new demonstration program, I hope these actions would pave the way for broad-scale efforts in the future to address a growing desire by an expanding aging population to remain active in the work force. It is also important to note that increased labor force participation by the older worker will not only help their economic status, but improve the general economy as well. In a noted Data Resources, Inc., study, it was found that increased older worker participation would yield an additional \$10 billion in revenues to the ailing social security trust funds by the year

2005, and would have a very positive effect on the overall economy.

The reasons for prompt enactment of this legislation, Mr. Speaker, are compelling and I call upon my colleagues in the House to join me today in cosponsoring the Older Americans Vocational Education Act.●

COUGHLIN POLL: A MAJORITY BACKS ECONOMIC PROGRAM OF ADMINISTRATION

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. COUGHLIN. Mr. Speaker, in keeping with past practice, I want to share with colleagues the results of my yearly mail questionnaire poll of the 13th Congressional District of Pennsylvania.

The response again was heavy with a total of 14,401 individual replies received before the July 15 deadline. In addition to the completed questionnaires, many constituents expressed additional views with comments on the survey pages and through separate letters.

Among the key results:

A majority of 59 percent express faith in President Reagan's economic program and believe we must continue with relatively minor modification. Thirty-two percent expressed no faith in the President's economic program.

When asked about raising taxes to lower the Federal deficit, 70 percent cited from a number of choices that they would raise excise taxes on tobacco, alcohol, and other so-called luxury items.

On controlling inflation, 52 percent believe the Federal Reserve's tight-money policy has brought down the rate of inflation and must be maintained for now despite high interest rates. A constitutional amendment to require a balanced budget was supported by 49 percent while 24 percent were undecided.

In foreign affairs, 61 percent favor an immediate freeze on nuclear weapons deployment regardless of comparative strengths of United States and Soviet missile forces, but a plurality of 48 percent opposes the United States initiating a unilateral freeze. A plurality of 44 percent opposes President Reagan's Caribbean Initiative to extend more economic aid to stabilize governments and economies in friendly nations in Central and South America while a majority of 56 percent opposes continued military aid to El Salvador.

In addition, I asked other questions involving ranking by choice, listing more than one choice of action, and "yes" and "no" questions.

A majority favor major cutbacks in funding for foreign aid including aid to Israel and Egypt, as well as some cutbacks in funding for the poor including welfare and food stamps. Aid to the elderly including social security benefits led the field for those calling for no cutbacks. This was followed by no cutbacks for health care including medicare and medicaid.

Respondents split almost evenly on whether the Environmental Protection Agency was basically doing a good job of protecting the quality of our land, air, and water resources. The actual percentage responses to these and other questions are detailed below.

The questionnaires were mailed to homes and postal boxes throughout the congressional district. Each questionnaire afforded space for two residents to respond. A message in the survey informed constituents that additional questionnaires were available from my district office.

The results were compiled by my staff and doublechecked for accuracy. To insure accurate results, responses were weighted by ZIP code.

I will mail a copy of the results to the White House.

QUESTIONNAIRE RESULTS—1982

1. The state of the economy concerns us as individuals and as a Nation.

A. Which statement best describes your views? (one only)

I have faith in the thrust of President Reagan's economic program and believe we must continue it with relatively minor modifications.....	59%
I have no faith in President Reagan's economic program and believe we must change it substantially.....	32%
Other (specify):.....	9%

B. Faced with a \$100 billion Federal deficit, how would you fund the following programs? (Totals more than 100 percent.)

	No cutback	An increase
Education (including student loans, grants).....	31%	10%
Mass transportation (including operating subsidies).....	31%	18%
Aid to poor (including welfare, food stamps).....	21%	6%
Health care (including medicare, medicaid).....	42%	9%
Aid to elderly (including social security benefits).....	52%	11%
Defense (including MX missile, B-1 bomber).....	25%	9%
Foreign aid (including aid to Israel, Egypt).....	12%	1%

	Some cutback	Major cutback
Education (including student loans, grants).....	30%	28%
Mass transportation (including operating subsidies).....	37%	14%
Aid to poor (including welfare, food stamps).....	50%	23%
Health care (including medicare, medicaid).....	38%	10%
Aid to elderly (including social security benefits).....	27%	9%
Defense (including MX missile, B-1 bomber).....	47%	18%
Foreign aid (including aid to Israel, Egypt).....	47%	18%

C. If you were to raise taxes to lower the Federal deficit, which, if any, of the following actions would you take? (One or more—totals more than 100%.)

Cancel the 10 percent income tax rate reduction for everyone scheduled for July 1, 1983.....	32%
Increase the Federal tax on gasoline by five cents a gallon.....	27%
Raise excise taxes on tobacco, alcohol and other so-called luxury items.....	70%
Modify the tax leasing rule to raise corporate taxes.....	47%
Place a temporary tax surcharge of four or five percent on incomes above \$40,000 a year.....	35%
Other (specify):.....	19%
D. Do you favor a Constitutional amendment to require a balanced budget and, at the same time, limit the amount taxes can be raised.	
Yes.....	49%
No.....	27%
Undecided.....	24%

2. Because of the way cost-of-living adjustments (COLA's) are calculated, Social Security and other Federal retirement payments have increased at a faster rate than real (adjusted for inflation) wages and salaries paid to workers.

A. Do you favor tying Social Security and other retirement COLA's to the increase in real wages and salaries paid to workers?

Yes.....	65%
No.....	19%
Undecided.....	16%

B. Are you currently receiving Social Security or other Federal retirement benefits?

Yes.....	23%
No.....	77%

3. The Federal Reserve has pursued a "tight money" policy to control inflation although it has kept interest rates high. Which statement would you support?

The "tight money" policy has brought down the rate of inflation and must be maintained for now.....	52%
The "tight money" policy has gone too far and control over the money supply must be loosened in order to bring interest rates down faster.	48%

4. U.S.-Soviet relations remain troubled, causing worldwide concern.

A. Regardless of comparative strengths of U.S. and Soviet missile forces, do you favor an immediate freeze on nuclear weapons deployments?

Yes.....	61%
No.....	29%
Undecided.....	10%

B. Should the U.S. initiate such a freeze unilaterally?

Yes.....	38%
No.....	48%
Undecided.....	14%

5. U.S. relations with Central and South American countries are becoming more important.

A. Do you support President Reagan's Caribbean initiative to extend more economic aid to stabilize governments and economies in friendly nations in that region?

Yes.....	39%
No.....	44%
Undecided.....	17%

B. With elections concluded and a new government installed in El Salvador, do you favor continued military aid to that country?

Yes.....	20%
No.....	56%
Undecided.....	24%

6. Considering the effect on the economy and jobs, do you believe the Environmental Protection Agency basically is doing a good job of protecting the quality of our land, air and water resources?

Yes..... 40%
No..... 42%
Undecided..... 18%

7. Given the increase in crime, would you favor spending as much as \$2 billion for additional prisons despite its impact on the deficit?

Yes..... 50%
No..... 37%
Undecided..... 13%

8. Should government-supported family planning clinics be required to inform parents or guardians when unmarried minors seek contraceptive prescriptions or devices?

Yes..... 34%
No..... 60%
Undecided..... 6%

Party preference of those responding

Republican..... 66%
Democrat..... 21%
Non-partisan..... 12%
Other..... 1%

Ages of those responding

18 to 21..... 1%
21 to 35..... 20%
35 to 50..... 23%
50 to 65..... 33%
65 and over..... 23%

**THIRD U.N. CONFERENCE ON
THE LAW OF THE SEA**

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● **Mr. GILMAN.** Mr. Speaker, I rise today to introduce a resolution expressing the sense of Congress concerning continuing U.S. participation with respect to a comprehensive law of the sea treaty. The sense of this resolution has been expressed in House Concurrent Resolutions 271 and House Concurrent Resolution 361 both introduced by the gentlewoman from Rhode Island (Mrs. SCHNEIDER,) earlier this year and of which I am a cosponsor.

The resolution I am introducing today updates these earlier resolutions by taking note of the President's decision of July 9 that the United States would not sign the Convention on the Law of the Sea. That convention was adopted by the Third U.N. Conference on the Law of the Sea last April 30, when 130 states abstained and 4 states opposed adoption. The United States, you will recall, called for the vote and opposed adoption because of the seabeds provisions, part XI, of the treaty.

Although the United States voted against and has decided not to sign the treaty, we have been informed that the Government plans to sign the final act of the conference. The final act is an instrument common to inter-

national treaty negotiations and it is common practice for participants in such negotiations to sign such an act, thereby certifying that they have participated in the negotiations. The U.S. decision to sign the final act thus certifies we have participated in the 10-year negotiating effort of the Third U.N. Conference on the Law of the Sea. However, this final act also enables the U.S. Government to participate as observers in the preparatory commission of the conference. That commission will be established 60 days after 50 states have signed the final act and consists of representatives of signatories of the final act. The commission will prepare draft rules of procedure for the assembly and the council of the first financial period of the authority, personnel for the secretariat of the authority, make recommendations on various matters such as the budget of the authority, and prepare draft rules, regulations, and procedures to enable the authority to begin its functions regarding seabed mining. The commission will exist until the first session of the assembly has met, at which time its property and records will be transferred to the authority.

It is important to note that members of the preparatory commission who sign the final act can participate fully in the deliberations as observers, but not in making decisions. Thus the United States can take part in deliberations but not in the voting on the various measures I have identified above. In order to vote, the member state must have signed the convention as well.

Based on the April 30 vote in which the conference adopted the convention and the fact that 137 coastal states of the world—the remainder are landlocked—perceive benefits in signing the treaty, there is a high probability that the preparatory commission will come into being within 2 or 3 months following the December 1982, signing ceremony.

The administration says it will sign the final act but not send an observer to the preparatory commission. We would only be able to observe, not vote, says the administration.

Such a posture is not only unbecoming to the U.S. Government, but would result in further isolating ourselves from deliberations on fundamentally important aspects of the LOS regime that most countries will sign and ratify. We owe it to ourselves not only to be fully informed on what happens at the preparatory commission, but by sending an observer to influence in the corridors the deliberations on the rules and regulations for seabed mining as well as the rules of procedure for the council and assembly. Mr. Speaker, it seems to me that our minimal responsibility as a world leader is to continue to participate in the continuing process of this treaty and par-

ticipate fully in the deliberations of the preparatory commission.

Accordingly, I urge our colleagues to support this resolution, the text of which I am inserting at this point in the RECORD.

H. CON. RES. 394

Whereas a comprehensive ocean law treaty is of strategic importance to the United States and to the protection of its foreign policy interests;

Whereas for more than ten years the United States has taken a leadership role in promoting a comprehensive treaty on the law of the sea;

Whereas the United States supported the resolution adopted by the United Nations in 1970 which endorsed, inter alia, the principle that the seabed and ocean floor and subsoil thereof beyond the limits of national jurisdiction are the common heritage of mankind;

Whereas the Third United Nations Conference on the Law of the Sea, representing more than one hundred and fifty countries, formulated a comprehensive treaty over an eight-year period;

Whereas the United States reviewed the draft treaty on the Law of the Sea and participated in the eleventh session of the Third United Nations Conference on the Law of the Sea in March and April of 1982;

Whereas on April 30, 1982, the Conference adopted the draft treaty, the Convention on the Law of the Sea, by an overwhelming majority despite the objection by the United States to certain provisions of the treaty;

Whereas the provisions of the treaty make vital and valuable revisions in and additions to the existing body of international law of the sea, including provisions governing fishing, marine scientific research, protection of the marine environment, and exploitation of offshore energy resources;

Whereas provisions of the treaty relating to military navigation and overflight are vital to the national security interests of the United States;

Whereas the treaty establishes a regime of uniform national boundaries that is vital to the efficient transportation of energy resources and other goods in international commerce;

Whereas the establishment of such a regime of uniform national boundaries would limit the steady seaward expansion by certain countries of their national boundaries;

Whereas the seabed contains an abundant supply of hard minerals such as nickel, copper, manganese, and cobalt, and it is in the national interest of the United States for these minerals to be available independently of the export policies of foreign countries;

Whereas, although the President on July 9, 1982, announced that the United States would not sign the Convention on the Law of the Sea at the official signing ceremony in December 1982, the President did state that the United States would sign the Final Act of the Conference on the Law of the Sea certifying the participation of the United States in the Conference; and

Whereas, since signing the Final Act of the Conference will entitle the United States to participate as an observer at the meetings of the Preparatory Commission of the Conference, which will formulate the rules and regulations for seabed mining, the United States will have an opportunity to influence those rules and regulations

through participation at those meetings: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress urges the President—

(1) to avoid taking any actions which could foreclose eventual United States participation in the Convention on the Law of the Sea;

(2) to conduct an evaluation of the objectives of the United States for ocean use and the relevant foreign policy interests of the United States with respect to the Convention, weighing the different alternatives available to the United States; and

(3) to designate a high level United States representative as an observer to the meetings of the Preparatory Commission of the Conference on the Law of the Sea that will formulate the rules and regulations for seabed mining, in order to demonstrate the continuing commitment of the United States to the multilateral process of formulating a law of the sea and to demonstrate the strategic importance to the United States of the Convention on the Law of the Sea.●

THE ROLE OF RELIGION AND THE CHURCH IN OUR NATIONAL LIFE

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. GOODLING. Mr. Speaker, I commend the attention of this body to the following sermon of Dr. Benjamin Griffin before the congregation of the Trinity United Church of Christ, York, Pa. on June 29, 1975, and again on July 4 of this year. As a matter of historical and religious significance, this sermon recounts the role of York in the American Revolution. However, of particular importance is the timely question of the role of religion and the church in our national life.

Mr. Speaker, this sermon was brought to my attention by Andrew T. Schumacher of York, Pa. I thank him for sharing this message with me and giving me the opportunity to share it with my colleagues in the House of Representatives.

The sermon follows:

[Sermon preached by the Rev. Dr. Benjamin Griffin before the Congregation of Trinity United Church of Christ, York, Pa.]

FOR GOD AND COUNTRY

"And you shall proclaim liberty throughout all your land." Lev. 15:10

Two hundred years ago Captain Michael Doudel, his officers, and sixty-eight riflemen marched as a body to the German Reformed Church to hear a patriotic sermon by Daniel Wagner, the pastor, who told them "to keep God before their eyes continually and they would be assured of his guidance and protection." At one o'clock that same Sunday afternoon this Company of York County Continental Army soldiers began their long march to General Washington in Cambridge, Massachusetts. They arrived in Massachusetts on July 25th and by July 30th they saw action at Bunker Hill.

One of the members of the York Committee, which prepared and no doubt helped finance Yankee Doudel's Company, was that sturdy patriot, Colonel Thomas Hartley, whose home stood on the very ground on which Trinity Church now stands. It was this same Colonel Hartley who in 1791 brought George Washington to worship in our German reformed Church.

I do not know why the York Company under Captain Doudel chose to come to the German Reformed Church of which Trinity Church is its direct descendant. Perhaps because it was situated on the way out of town, it was convenient. But there were other churches on what is now Market Street. I doubt if they came to our church because there were large numbers of Pennsylvania Germans in the Doudel Company; extant records reveal few German names. I suspect, although I have no way of knowing this with any certainty, that one of the reasons the riflemen came to our church on that historic Sunday was that the pastor and the congregation were known as firm supporters of the Revolution. I mention this guess because at the time of the Revolution not all citizens and not all churches backed the revolt against the King. Some historians estimate that less than half of the population of the American colonies actively supported the Revolution in 1775. There can be no doubt that Pastor Wagner and our church were strong supporters of the Revolutionary cause. York County joined the Revolution two hundred years ago this week. Trinity Church through its pastor gave its blessing and sent forth its prayers for this great adventure in liberty.

In the United Church of Christ we are the Church of the New England Congregationalists and the Pennsylvania German Reformed people. There was a direct relation in our parent denominations of religious convictions and political ideals. In the mid-eighteenth century there was a major religious revival called the Great Awakening. This gave rise to a new interest in education and in humanitarian causes. Some, especially the clergy, who were most influenced by this revival were also becoming more and more sure that they should resist authoritarian control from England. In this setting, John Wise, an early Congregational pastor, was probably the first to proclaim that taxation without representation was tyranny.

Pennsylvania German Reformed people were more and more touched by the political unrest in the colonies. They felt bound by conscience to fulfill obligations to the movement for independence. Members of those small Reformed congregations in Pennsylvania served in the war effort as soldiers and on town committees. Michael Schlatter, the great German Reformed founding missionary to our churches in this Commonwealth, and the founder of the German Reformed Church in York County, enlisted as a chaplain in the Continental Army. When the Constitution was adopted and George Washington became President in 1789, the Reformed ministers congratulated the new president for "the happy and peaceful establishment of the new government."

Today we too quickly assume that in 1775 it was an easy thing to support the Revolution and to enlist in the cause. Today we tend to glorify and romanticize the Revolution. Yet when Thomas Hartley and the other leading merchants and farmers of York County took the active lead in organizing and raising funds for the support of Michael Doudel's Company they were risk-

ing not only their economic fortunes but their lives as well. Some of those eager York County farmers who could "hit the nose at one hundred and fifty yards" did not come home again to this beautiful county. And, no doubt, there were good people in York churches, including the Reformed Church, who believed that Pastor Wagner should not have gotten himself involved in such a political cause as a revolt against the established government. In 1775 it was not at all clear and certain that the Revolution would succeed. Indeed, in 1775 many who were later to be strong patriots were not convinced that independence from the Crown was either necessary or desirable.

It is not enough today for us to recount and to remember the day when York joined the Revolution. Nor is it enough to be proud of the role Trinity Church and the German Reformed people played in the whole enterprise of the founding of our Republic. We need to ask, "what does the American Revolution mean today to us?" We need also to ask about the role of religion and the church in our national life. I hope that we can all admit that part of what it means to honor our tradition is to continue that tradition in our own time. Otherwise, all that we are doing today is taking a tourist trip back into the past.

George Washington believed that religion and morality are indispensable supports to the national welfare. Washington did not believe, as indeed, none of the Founding Fathers believed, that this meant blind support. Yet in a democratic republic the spiritual life of the people and their basic moral decency and trust are absolutely essential if the nation is to remain a nation of free men and women. Watergate symbolizes many things, but what it means, I think, more than anything else is what can happen when there is a corruption of basic morality—and by that I mean that some things are always right and some things are always wrong—and when there is a breaking of the trust between the elected government and, we, the people. Theodore White in his book about the fall of our former president, a book he calls *Breach of Faith*, argues that what finally happened was that the trust we, the people freely give to our chief magistrate was abused.

I am one of those who believes that Watergate was our greatest national crisis since the Civil War. Like the Civil War it was fundamentally a moral crisis. I know that it is easy in these days to be cynical about politicians and the courts. Yet one of the things we learned through Watergate is that there are politicians of both parties who still retain a deep moral consciousness and that the courts still have on their benches men of impeccable moral character with a firm loyalty to the rule of law. As this nation is about to begin the third century of its independence, we must rededicate ourselves to those moral virtues of honesty, fairness, and decency without which this nation cannot survive.

One of our national slogans is "One Nation Under God." I think we need to underline that word "under". The nation is not supreme and ultimate; God alone is. The nation deserves our support and our loyalty, but our ultimate and final trust and allegiance is to God alone. Our destiny and that of our nation depend not on guns and butter but upon the sovereign will and care of Almighty God. Our Judea-Christian tradition constantly reminds us that God is God not only of individuals but of nations as well. Religion has a responsibility of ever

keeping before us the ultimate sovereignty of God. Pastor Wagner two hundred years ago told the Doudel Company, "to keep God before your eyes continually and you will be assured of his guidance and protection." That is still good advice to us as individuals and as a nation as we today rededicate ourselves "to a reaffirmation of faith, democratic ideals and love of country."●

CONFIRMATION OF CONGRESSIONAL INTENT ON SECTION 213(b)(1)(c) of H.R. 4961

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. MATSUI. Mr. Speaker, section 213 of the Senate amendment to the Tax Equity and Fiscal Responsibility Act of 1982, H.R. 4961, prohibits the Internal Revenue Service from retroactively reclassifying a motor vehicle operating lease that includes a terminal rental adjustment or TRAC clause as other than a true lease. A question of legislative intent has arisen as to whether section 213 and its specific reference to commercial leases should be interpreted so as to carry a negative implication that a lease of a vehicle for the lessee's personal use necessarily requires that the lessor of such vehicle be subject to a different tax treatment than that provided by section 213 to a lessor of a vehicle used for commercial purposes.

To address this concern, I wrote Senator BENTSEN, the principal sponsor of this provision, and requested that he respond to a number of specific inquiries on the matter. The following correspondence details this exchange:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., August 2, 1982.

HON. LLOYD M. BENTSEN,
U.S. Senate,
Washington, D.C.

DEAR SENATOR BENTSEN: I am writing to you as the principal sponsor of the provisions contained in section 213 of the Senate Amendment to the "Tax Equity and Fiscal Responsibility Act of 1982," H.R. 4961, which would prevent the Internal Revenue Service from retroactively reclassifying a motor vehicle operating lease that includes a terminal rental adjustment or TRAC clause as other than a true lease.

As you are aware, the need for this remedial legislation arose when the IRS in May 1980 published a "technical advice memorandum" that took the position that the presence of a TRAC clause in the standard lease form which the motor vehicle leasing industry had used for over 30 years should cause such a lease transaction to be treated for federal income tax purposes as a conditional sale. Despite the fact that this position was a reversal of that which the IRS had generally followed on audit in years past, and despite the fact that the position was adopted without notice to the Congress or to the public and without the benefit of public hearings in which interested parties could state their views on the serious economic and tax issues connected with the

change of position, the IRS refused to exercise its discretion to apply the new position on a prospective basis only. Moreover, notwithstanding the April, 1981 decision of the United States Tax Court in the *Swift Dodge* case that the new position was wrong as a matter of law, the IRS has continued to apply the changed position retroactively in the audit of selected motor vehicle lessors.

I became aware of, and concerned about, this problem both because the taxpayer in the *Swift Dodge* case is headquartered in my Sacramento, California, district and because my broader constituency includes numerous commercial and consumer leasing interests throughout the state of California. I have followed closely efforts on the House side by my colleagues on the Ways and Means Committee directed at the problems caused by the 1980 IRS technical advice memorandum. In particular, I have been supportive of H.R. 6358 introduced this spring by Mr. Holland and cosponsored by Mr. Vander Jagt, which included the substance of the proposal you sought to include in a Senate approved tax bill. The purpose of this letter to you, the primary mover of the Senate version of this legislation, is to ask that you confirm my understanding and that of my constituents interested in this proposal of several provisions of section 213.

First, I am concerned as to the effect of the language in section 213(b)(1)(C) which limits the applicability of the protection provided by section 213 to motor vehicle operating leases under which the lessee uses the leased property in a trade or business or for the production of income. It is my understanding that this language was not intended by the Senate Committee on Finance to carry any negative implication that a lease of a vehicle for the lessee's personal use, or for both business and personal use, necessarily requires the lessor to be given a different tax treatment than where the vehicle is leased exclusively for the lessee's business use. I also understand that it was not the intent of the Finance Committee to change, or to imply any need for change, in existing law as reflected by the Tax Court's 1981 decision in the *Swift Dodge* case which rejects the notion that presence of a terminal rental adjustment clause in a lease for personal use prevents the lease from being respected as such for federal income tax purposes.

On a related issue, I understand that section 213 was not intended to create any negative inference that the effect of a TRAC clause in a motor vehicle operating lease should be different than the effect of such a clause in a lease for some other type of equipment. I also understand that the committee similarly did not intend that the rule of law set forth by the Tax Court in the *Swift Dodge* case concerning the effect of TRAC clauses generally should not be applicable to leases for equipment other than motor vehicles.

Second, I seek your confirmation of the Finance Committee's intent with regard to clause (ii) of section 213(b)(1)(A) of the Senate approved amendment to H.R. 4961. This provision appears to permit, but not require, publication by the Secretary of Treasury or his delegate of a regulation providing that a motor vehicle operating agreement which includes a TRAC clause is not a lease for federal tax purposes. It is my understanding that by approving this language, the Senate was neither authorizing nor anticipating any substantive change by Treasury regulation of existing law as confirmed by the *Swift Dodge* decision. To the con-

trary, I understand that you and other members of the Finance Committee intended to allow such a change to be effected only in the most extraordinary circumstances and, in any event, only after a thorough analysis has first been made and communicated to Congress by high-level Treasury and IRS officials as to why such a change might be warranted.

It is also my understanding that the language of this clause was chosen, with the protections of the Administrative Procedures Act in mind, so that it can be satisfied only by Treasury promulgation of a final, substantive rule or regulation prescribed in the future after publication of notice of the proposed rulemaking in the Federal Register showing the text of the proposed regulation, and after providing opportunity for public hearing at which any affected taxpayers or any other interested members of the public could personally appear to submit their comments or suggestions for revision of the proposed regulation.

In closing, I want to take this opportunity to express again my support and that of my constituents for your efforts and those of other members of the Finance Committee to provide a much needed and long overdue legislative solution on this issue which is of critical importance to numerous industries in my state and across the nation.

Very truly yours,

ROBERT T. MATSUI,
Member of Congress.

U.S. SENATE,

Washington, D.C., August 4, 1982.

HON. ROBERT T. MATSUI,
U.S. House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN MATSUI: I write in response to your letter of July 28, 1982, in which you raised several inquiries concerning section 213 of the Senate amendment to H.R. 4961 which provides that the presence of a terminal rental adjustment or TRAC clause in a qualified motor vehicle agreement shall not be taken into account in determining whether the agreement is a lease for federal tax purposes.

As you correctly noted, I together with Senator Armstrong and other members of the Senate Finance Committee, worked actively to include in the Committee-approved tax bill the substance of legislation we had drafted which was identical to H.R. 6358, introduced this spring by two of your distinguished colleagues on the House Committee on Ways and Means, Mr. Holland and Mr. Vander Jagt. Our proposal as well as the Holland bill, H.R. 6358, and earlier legislative efforts directed at solving the problems caused by the May 1980 IRS technical advice memorandum, would all have applied to any motor vehicle lease which included a TRAC clause without regard to how the vehicle was used by the lessee.

During the course of the Senate Finance Committee's markup proceedings, however, our proposal was modified to include the provisions in subparagraph (C) of section 213(b)(1) at the urging of Treasury Department and IRS officials present who were apparently concerned that estimates made on our proposal showing no appreciable revenue effect were based on assumptions that the property would be used only for business purposes by the lessee.

I can assure you that the Finance Committee accepted this modification because of its deep concern over revenue impacts generally, and not because the Committee intended that a different rule of law or tax

treatment should apply to lessors of non-business use motor vehicles or other types of equipment. As a matter of fact, I and a number of other members of the Finance Committee believe that a good case can be made that there would be no adverse revenue effect even if section 213 were to apply across the board to all leases with TRAC clauses, including those covering personal and dual use vehicles. I can also assure you that the Committee would view any negative inference that lessors under consumer leases should be subject to different substantive tax rules than lessors under commercial leases by virtue of section 213(b)(1)(C) as both bad law and bad tax policy.

The notion that the tax treatment of lessors under otherwise valid leases should depend on the actual use to which a lessee puts the leased property is contrary to both the theory and the result of *Swift Dodge* which rejects the notion that the presence of a TRAC clause in a lease for personal use prevents the lease from being treated as such for federal income tax purposes. Moreover, any requirement that a lessor substantiate his entitlement to the tax attributes associated with the leased property on the basis of how a lessee actually uses the property would create such hopelessly complex and costly administrative problems for both the IRS and lessor taxpayers as to defy resolution. I should also add that the Committee did not intend to create any negative inference that for federal tax purposes the effect of a TRAC clause in a motor vehicle lease should be different than the effect of such a clause in a lease for some other type of equipment.

With regard to your second inquiry, I can also confirm your understanding of the effect of the language in clause (ii) of section 213(b)(1)(A) of the Senate passed amendment to H.R. 4961. As I stated above, when my colleagues from Colorado and I initiated action on this provision in the Finance Committee, it was our intent to include in the Committee-reported bill the substance of legislation we had drafted which was identical to the Holland bill, H.R. 6358. In explanatory remarks accompanying H.R. 6358, Mr. Holland stated that he viewed his bill, in accordance with the theory and result of the Tax Court decision in *Swift Dodge*, as declaratory of existing law. (128 Cong. Rec. 9769 May 12, 1982.) Mr. Holland also stated that his bill was based on the premise neither Congress nor the Treasury Department would consider any changes to existing law unless the Department had previously conducted a major policy level study of the economic and tax issues bearing on the question whether there is sufficient reason to deny lessors the depreciation and investment tax credits otherwise allowed owner-lessors of depreciable business property.

In urging our colleagues on the Finance Committee to support our proposal, Mr. Armstrong and I made it clear that by including the provisions of section 213(b)(1)(A)(ii), the Senate Finance Committee would not be contemplating a change in existing law as confirmed by the Tax Court in *Swift Dodge*. We made it clear that we shared Mr. Holland's view that such a change could be effected by prospective Treasury Department regulations only in the most extraordinary circumstances. Indeed, I and others on the Committee assume that no court could find reasonable a Treasury regulation that was contrary to the *Swift Dodge* holding unless Treasury

had first come to Congress with a thorough study of the type described above.

In addition, the Committee also understood and intended that prior to promulgation of a final substantive rule in accordance with the protections provided by the Administrative Procedures Act, Treasury would first have to publish a notice of the proposed rulemaking in the Federal Register showing the text of the proposed regulation, and provide opportunity for public hearing at which affected taxpayers or other interested members of the public could personally appear to submit their comments or suggestions for revision of the proposed regulation.

Thus, the intent and understanding of the Committee with respect to section 213 was to provide a statutory rule of law that the presence of a terminal rental adjustment clause in a qualified motor vehicle operating lease shall not be taken into account in determining whether the agreement is a lease. The statutory rule is intended to, and will continue to, apply unless the Congress enacts a law (or Treasury publishes a regulation) which provides that any agreement with a terminal rental adjustment clause is not a lease.

The Committee clearly did not intend that Treasury exercise an unfettered discretion in publishing a regulation. In addition to the general statutory requirements of notice of proposed rulemaking (which includes notice of time, place, and nature of the public rulemaking proceedings, reference to legal authority, and the terms or substance of the proposed rule) and opportunity to participate in the rulemaking process, the statutory requirement that there be a basis and purpose for the regulation must be complied with. The general requirement of reasonableness in the exercise of delegated legislative power must be satisfied. Thus, if and when a regulation is proposed, it must be made known to the Congress and to the public at large why the regulation is proposed.

I hope this discussion serves to clarify both the understanding and intent of the Members of the Finance Committee who, without objection from any Committee member, approved the inclusion of section 213 in the Senate Amendment to H.R. 4961. I look forward to working with you and other members of the Ways and Means Committee who support this provision to secure its final enactment.

Sincerely,

LLOYD BENTSEN.

OUR HANDICAPPED CHILDREN

HON. CHARLES F. DOUGHERTY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. DOUGHERTY. Mr. Speaker, I am a cosponsor of House Resolution 558, expressing the sense of the House that regulations recently proposed by the Secretary of Education should not be permitted to take effect because of my very real concern that this action would seriously threaten the free, appropriate public education which Congress voted to insure for the millions of deserving handicapped children.

In 1977, Public Law 94-142 was enacted only after an extensive study of

the exclusion and neglect of handicapped children that resulted from the policies of the State and local school systems. It was then the intention of Congress that this law would, and I quote from the act itself, provide for "full educational opportunity to all handicapped children" and guarantee "specially designed instruction, at no cost to parents or guardians, to meet the unique needs of a handicapped child."

Unfortunately, it has become apparent that these intentions are being circumvented and even disregarded in the recent decisions of the Supreme Court and the Department of Education.

On June 28, the decision of Hendrick Hudson School Board against Rowley was read. This case was the first judicial interpretation of Public Law 94-142 and the majority opinion stated that "to require the furnishing of every special service necessary to maximize each handicapped child's potential is further than Congress intended to go."

This is, however, exactly where we intended to go. As was recognized in the dissenting opinion, in both the House and Senate reports, it was clearly stated that the act would "guarantee that handicapped children are provided equal educational opportunity" and that each child would be given "an educational plan that is tailored to achieve his or her maximum potential." Surely words such as these should not be misunderstood to mean anything less than opportunity commensurate with the education provided other children.

The second decision taken was the most direct and, by far, the most scathing. The Department of Education has proposed new regulations that could severely erode the law's provisions. If we allow this deregulation to be adopted, we would be allowing our intentions to be subverted and we would be giving tacit consent to the undermining of the program and all it has done for handicapped children.

The issue at hand is fast becoming fear. The fear of parents that their handicapped children will not be given the chance to learn and lead a normal life. The fear of professionals and educators that a return to the shameful practices of segregation, exclusion, and warehouse programs are imminent. The fear that the child will be forced away from the regular classroom—away from a regular way of life.

And, finally, this fear should be ours. For if we choose to let these new regulations pass and if we allow our intentions to be consciously subverted, then we will have failed. The threat posed is real and the potential harm is clear. A decade of work on behalf of all our handicapped children could

easily be destroyed by regressive changes.●

TRIBUTE TO ADDIE AND MATHEW BARNES

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. MILLER of California. Mr. Speaker, on August 23 my good friends, Addie and Mathew Barnes of Richmond, Calif., will be celebrating their 50th wedding anniversary. I would like to recognize this momentous occasion, and I know that my colleagues will join me in paying tribute to a wonderful couple whose family has contributed so much to our community. In their 50 years of marriage they have raised 8 children, and have been blessed with 16 grandchildren and 3 great grandchildren.

Mr. Speaker, I know you will join me in wishing this family many years of continued health and happiness.●

IT IS TIME WE BECOME AGGRESSIVE TRADERS

HON. RON MARLENEE

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. MARLENEE. Mr. Speaker, I would like to bring to my colleagues attention a recent article written by Pat Goggins, publisher of the Western Livestock Reporter, on Japanese lobbying efforts in the United States.

As I See It

(By Pat Goggins)

Like the old saying goes, "you've got to make hay when the sun shines."

You as a rancher are out there going day and night attempting to get that big crop of hay put away. It's true you're busy, you've hardly had time to think or read. But as you're sitting on that swather or baler and you're done reading this column do some thinking.

The Japanese are "making a lot of hay" here in the United States.

The Beef Industry Council of the United States is, at the present time, budgeting somewhere around \$7 million to educate and promote the beef product to several key areas of the United States consumers.

I hope this opens the eyes, not so much of the American consumer, but I hope it opens the eyes more so of the American producer and feeder. After all, it's the 'buck' that makes the world go around.

Do you realize that of the ten top agricultural banks in the United States, nine of them are in the West and Northwest, in California, Washington, Oregon, Idaho and Arizona.

That's the same area for the most part that the Japanese are looking at in a big way. Not only from the standpoint of wanting our products from those areas but more-so, they are buying land in this part of the country in a big way.

I just returned from a short jaunt to California and I couldn't believe how things have changed from the Oriental influx and in the business sector, Japan has a real foothold.

Let me give you a few facts that certainly opened my eyes and I think would be interesting to you.

In Washington, D.C. for instance, one of the strongest lobbies there is the Japanese Lobby. As late as 1977, only 17 foreign agents for Japan were registered with the Justice Department. Today there are 140.

Within the last five years, Japanese trading with the United States has increased from just over \$10 billion to \$37 billion.

Now get this. In this same period of time, the Japanese annual direct investment here in lobbying has risen from \$1.8 billion to more than \$6.5 billion.

While we are talking about approximately \$7 million promoting America's greatest product, beef, the Japanese are spending \$6.5 billion here to get our market and keep it. Yes, they have quietly become the largest, best funded foreign contingent in Washington.

You ask, who is representing them. Do they have Japanese people over here themselves?

Well, they do in the background, but the front boys, the boys that get the job done, the boys that do the arm twisting, the officials that get the job done with their buddies are all Americans and I might add, well paid Americans at that.

There are many law firms receiving fees in the six figure retainer bracket.

From Japanese fishing, electronics, auto, trade interests, what kind of people are they?

Well, let me point out a few you will recognize. I suppose one of the oddest figures I ran across on the whole list was former Idaho Senator, Frank Church, who was, just a short time ago, head of the Senate Foreign Relations Committee, the same committee that denounced U.S. businessmen for foreign payoffs. He chaired the investigation of Lockheed's businesses in Japan that toppled the government and led to congressional probes that tore apart the CIA in that country.

Of course, a man like Church offers an awful lot to these Japanese for a correct fee. He would call a former Senator friend or call a Senate secretary or talk with a reluctant bureaucrat, it's no doubt he'll get things done for past favors he conceded along the line. Church is now an agent of the Japan External Trade Organization and the Daiwa Steel.

Frank Church is with a firm called Whitman and Ransom, a law firm that brings in thousands annually for what the former Senator describes as routine legal work... passports, legal transactions, visas. But say, don't let anybody kid you, it's more than that for the long six figure price the Japanese are paying, they aren't looking for someone to look for a passport or visa.

They've got people like Robert Strauss, for Special Trade Representative and the Democratic National Chairman as one of their team here in America.

They have William Colby, former CIA director, and former Transportation Secretary Brock Adams. They've got former Reagan campaign manager John Sears and the current Democratic National Chairman, Charles Manett.

They are all there and doing business for the Japanese and they're putting their political contacts on the line for a fee.

So you see, we in the cow business, you and I have to buckle up, brace up and get with it if we're going to keep our outfit going. We cannot compete with these kind of figures with a \$6 to \$7 million budget.

If we could just get a dollar a head from everybody in the United States, pay back half of that to the people who will spay heifers, use the other \$15 to \$18 million and educate and promote you'd see the greatest industry in the history of the world here in an American livestock endeavor.

It's there to be had. It's up to you and me.

A quick look at some statistics makes it clear this lobbying has brought increased sales. Last year Japanese exports to the United States increased 23 percent while its U.S. imports increased only 2 percent, and we currently have an \$18 billion trade deficit with Japan.

We often think in terms of the problems this trade imbalance creates for U.S. producers, but there is also another problem area that needs to be addressed—the difficulties U.S. retail office machine dealers face when negotiating with Japanese suppliers. The following letter I received outlines what these problems involve:

DEAR MR. MARLENEE: I am the owner of a small, family-owned office machine dealership, selling a number of product lines. I, as well as my customers base, have over the past several years become totally dependent on foreign equipment. American office machine manufacturers have either gone out of business or sell mainly through their own sales forces, not through dealers.

Now, these Japanese companies plus a few European manufacturers are engaging in practices which are likely to bankrupt us. We, as small dealers, simply cannot force them to negotiate in good faith, much less treat us fairly and equitably. Most of the problems center around the following:

1. New products not adequately field-tested;
2. False product claims by the manufacturers, resulting in customer dissatisfaction with the equipment purchased;
3. Unfair quotas and dealer agreements presented to dealers on a take-it-or-leave-it basis;
4. Terminations and cancellations without cause;
5. Delays in supply and delivery of machines, replacement parts and supplies.

There is no doubt that the United States needs to be more aggressive to reduce our current trade deficit with the Japanese, but let us not forget the United States dealer of Japanese products in our efforts to end unfair Japanese trade practices.

SHIPPING ACT OF 1982

HON. F. JAMES SENSENBRENNER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 12, 1982

● Mr. SENSENBRENNER. Mr. Speaker, recently the House Judiciary Committee considered H.R. 4374, the Shipping Act of 1982. I voted against

this bill because I believe that granting antitrust immunity is counter-productive for the shipping industry and consumers. However, since the bill has been reported out of the Judiciary Committee, it has come to my attention that H.R. 4374 would have a serious effect on U.S. ports. I would like to make a part of this an analysis of the Shipping Act of 1982 as it affects American port cities.

ANALYSIS: POTENTIAL EFFECT OF THE "SHIPPING ACT OF 1982" ON AMERICAN PORT CITIES

(By Prof. George E. Garvey, Columbus School of Law, Catholic University of America, formerly Counsel, Committee on the Judiciary, U.S. House of Representatives and Jerome M. Zeifman, General Counsel, National Institute of Economics and Law, formerly General Counsel, Committee on the Judiciary, U.S. House of Representatives)

The proposed Shipping Act of 1982 (S. 1593 and H.R. 4374) contains several procedural and substantive changes to existing law that could adversely affect United States port cities. The most significant sections grant total immunity from the antitrust laws to ocean common carriers and allow them to: "allot ports or restrict or otherwise regulate the number and character of sailings between ports," and to "engage in exclusive, preferential, or cooperative working arrangements among themselves or with one or more marine terminal operators . . ."

BACKGROUND

There are significant restrictions under the existing Shipping Act of 1916 on activities among carriers and/or ports that discriminate against other port facilities. The most significant sections are:

1. Sec. 14b(4) prohibits the FMC from approving any dual-rate contract that requires "the contract shipper to divert shipment of goods from natural routings not served by the carrier or conference of carriers where direct carriage is available." A dual-rate contract provides lower rates to shippers that commit all or a portion of their traffic to the contract carrier or conference.

2. Sec. 15 requires the FMC to disapprove any agreement "that it finds to be unjustly discriminatory or unfair as between . . . ports."

3. Sec. 16 prohibits a carrier or other person from giving "any undue or unreasonable preference or advantage to any particular person, locality, or description of traffic in any respect whatsoever, or to subject any particular person, locality, or description of traffic to any undue or unreasonable prejudice or disadvantage . . ."

4. Sec. 17 states that "no common carrier by water in foreign commerce shall demand, charge or collect any rate, fare or charge which is unjustly discriminatory between shippers or ports. . ."

Further, the FMC has read the policies of related statutes, e.g., Sec. 8 of the Merchant Marine Act of 1920 and Sec. 205 of the 1936 Merchant Marine Act, into the "public interest" standard of Sec. 15.

The Federal Maritime Commission strictly scrutinizes any agreement that diverts traffic from a port that would be the natural routing for the goods. It will not, for example, approve conference agreements containing port equalization provisions (provisions to pay shippers the difference between the cost of transportation to a nearby port and that to a more distant port designated by

the carrier or conference) when adequate service is available at the more convenient port. See, *Port of New York Authority v. Federal Maritime Commission*, 429 F.2d 663 (5th Cir. 1970); *Pacific Far East Line v. United States*, 246 F.2d 711 (D.C. Cir. 1957). The FMC will generally find any carrier rate agreement that attracts cargo from an area "naturally tributary" to a port to some other port to be unjustly discriminatory.

Any agreement allocating or restricting the use of a port today must be filed with and approved by the FMC. The proponents of the restrictive agreement must establish that there are substantial transportation needs or important public benefits that justify the restriction. *Federal Maritime Commission v. Aktiebolaget Svenska Amerika Linien*, 390 U.S. 238 (1968). Further, the FMC must conduct an adequate investigation prior to approving any agreement discriminating against a port. *Marine Space Enclosures v. Federal Maritime Commission*, 420 F.2d 577 (D.C. Cir. 1969). As a result, an agreement diverting traffic from its natural port now comes to the Commission with a strong presumption of invalidity.

S. 1593, THE GORTON BILL

The Senate bill substantially dilutes the existing rights of less powerful terminal operators.

As noted earlier, sec. 14b presently prohibits the use of any dual-rate contract that requires a contract shipper to divert goods from their "natural routings." S. 1593 would prohibit agreements that deny contract shippers "the right to utilize competing services that involve loading to or from a vessel at a port or ports located beyond a carrier's or conference's geographic scope . . ." The Senate Report explains that this section guarantees a contract shipper "the right to use competing services of ports outside the geographic range served by the conference . . ." Senate Report, p. 33. The bill would not, however, require the conference to provide a vessel, and the use of a non-conference vessels would be a breach of the loyalty contract. The right to use any port is meaningless to a contract shipper without the right to utilize a non-contract carrier.

It is also noteworthy that the restriction on loyalty contracts relates only to ports beyond the "geographic range served by the conference." Implicitly, a conference may require contract shippers to use only one or more designated ports within the range it serves. This could mean, for example, that a conference serving the North Atlantic could require contract shippers to use the Ports of New York and Baltimore, or perhaps Montreal, to the exclusion of Ports in Boston or Hampton Roads.

The fundamental shift the legislation makes in favor of strong, "rationalized" shipping cartels is inherently unfavorable to ports. Under existing law, agreements that allocate or discriminate against ports are highly suspect. Under S. 1593, such agreements would enjoy a strong presumption of validity. Common carriers would, for example, be authorized to allot ports and restrict sailings between ports, Sec. 4(a)(5), and both carriers and marine terminal operators are likewise authorized to enter into "exclusive, preferential, or cooperative working arrangements." Sec. 4(a)(6) and 4(b)(3).

Section 12 of S. 1593 retains some of the restrictions of existing law. Among other things, common carriers may not unjustly discriminate against ports, Sec. 12(a)(6), or give undue preference to any particular person or locality, Sec. 12(d)(2). These re-

strictions, however, would have to be read as part of a regulatory scheme intended to promote full rationalization of shipping services, while explicitly rejecting the principles of antitrust law. In addition, the law would expressly authorize the allocation of ports and exclusive, preferential agreements between ports and carriers.

The Senate Report demonstrates that the proposed law would minimize the existing concern over agreements that divert traffic from its natural routings and with abuses of dominant economic power. It would not "prohibit carriers from treating shippers or ports differently when the transportation circumstances surrounding the services are not substantially similar," Senate Report, p. 40. Further, "rates, charges, and services should not be found to be unjustly discriminatory because they result in changes in transportation patterns," *id.* The parties to a contract allocating ports must now establish that there is some pressing justification for the agreement. S. 1593 would make such agreements presumptively valid and require an objecting port to establish that the agreement is not justified by different "transportation circumstances."

Finally, the remedies available to an injured port would be substantially reduced by S. 1593. A port injured by unreasonably discriminatory provisions of an unapproved agreement may presently have a statutory right to three times its damages under the Clayton Act. S. 1593 would eliminate that right and limit any recovery to reparations to be awarded at the discretion of the Federal Maritime Commission.

S. 1593 intentionally strengthens the power of shipping cartels to control all aspects of international ocean borne carriage. Consistent with this goal, it is unlikely that agreements diverting conference traffic through favored ports would be found "unjust" or "unreasonable" if they increase conference convenience or profitability.

H.R. 4374, THE BIAGGI BILL

The problems that the Senate Bill would create for ports would be greatly aggravated if the House Bill, H.R. 4374, were enacted.

Ports are presently able to obtain antitrust immunity under the 1916 Act for agreements approved by the FMC. H.R. 4374, however, may not exempt ports that enter into agreements with carriers. Section 3, for example, allows common carriers to enter into "exclusive, preferential, or cooperative working arrangements among themselves or with one or more marine terminal operators." A carrier acting under such agreement would immediately have antitrust immunity but the status of the marine terminal operator is not clear. This uncertainty is particularly pronounced in the Judiciary Committee amendment to H.R. 4374, which limits the application of the Act to "agreements among ocean carriers." The consequences for a port could be extremely grave. Marine terminal operators would be liable for acts of immunized carriers and potentially subject to criminal prosecution and treble damages.

The loyalty (dual-rate) contract provisions of H.R. 4374 would remove the protection currently afforded ports. The restriction against diverting traffic from its natural routing would be deleted and no similar provision created. Powerful conferences could use loyalty contracts to divert all traffic to favored ports.

Section 10 restricts certain unfair or discriminatory practices and prohibits undue or unreasonable preferences regarding par-

ticular persons or localities. Like S. 1593, however, the House Bill would require an interpretation that promotes the development of strong, profitable conferences.

If the carriers determined to operate through a "consortium" or "joint service" agreement, they could greatly increase their power under H.R. 4374. Unlike other groups acting in concert, consortia and joint services are free of the restraints of Sec. 10(c) of the Act. They would, therefore, not be prohibited from engaging in boycotts or predatory practices.

RIGHT OF INDEPENDENT ACTION

Representatives of port authorities have sought to have the proposed legislation protect the right of all conference members to act independently. See, Testimony of John M. Brady, Chairman, Traffic Board, North Atlantic Ports Association, Inc., before Senate Commerce Committee Sept. 24, 1981; Letter from J. Ron Brimston to Senator Gorton, Feb. 8, 1982. When carriers operate in two adjoining conferences, one allowing independent action and the other not, ports have experienced the diversion of traffic to terminal facilities in the range where independent action is allowed. To avoid this problem, the ports have sought an amendment that would ensure an absolute right of independent action on ten days notice.

Neither the House nor Senate Bills would provide the right of independent action sought by port authorities. Both bills would provide a limited right of independent action conditioned on the use of loyalty contracts and any combination designating itself a consortium or joint service would be totally free of the obligation to provide a right of independent action.

CONCLUSION

The Shipping Act of 1982 would, if enacted, substantially dilute the substantive and procedural protection that ports presently enjoy under the Shipping Act of 1916. Conferences would likely be able to exact substantial concessions from all ports, and smaller ports could be precluded from any meaningful participation in conference controlled traffic. The possibility that large volumes of ocean traffic could be channeled through several preferred ports would increase dramatically.

The primary purpose of existing law has been to protect less powerful carriers, shippers and ports from monopolistic abuses by foreign controlled shipping cartels. The primary goal of the proposed legislation would be to promote strong, a fully "rationalized" shipping cartels able to control all aspects of traffic from point of origin to final destination. This change would seriously jeopardize the ability of cities to develop and promote their port facilities without making unreasonable concessions to any conference that dominates the trade served by the port.●

TRIBUTE TO JONATHAN BINGHAM

HON. LAWRENCE J. DeNARDIS

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. DeNARDIS. Mr. Speaker, let me first thank the gentleman from New York, Mr. Addabbo, for conducting this special order on one of our most esteemed colleagues.

Mr. Speaker, I envy my senior colleagues. They have had the privilege of serving in the same body with JONATHAN BINGHAM longer than I. They have had him before them for years as a constant model of decency in politics, honesty in Government.

JACK BINGHAM has served in the U.S. House of Representatives for 18 years, I for 20 months. But in that time, my admiration for JACK has deepened immeasurably. Every day he demonstrates his devotion to the principle of respectful dissent and debate, which is the heart's core of democracy. He brings honor to the legislative process. He dignifies debate by his participation. He focuses attention always on the merits of the issues, not on personalities or politics. Although I greatly admire JACK's initiative in the nuclear arms freeze and his unflinching support of our ally Israel, I have often disagreed with him. Yet even in disagreement, I have rested assured that JACK BINGHAM would guide discussion with the high-mindedness that so becomes him and this Chamber.

My esteem for JACK actually began long before I entered Congress. And when I was elected in 1980, I eagerly awaited the privilege of having JACK BINGHAM as my colleague. You see, JACK was born in New Haven, Conn., which I now represent. The Bingham's remain a prominent and venerated family in that city. Hiram Bingham, JACK's father, served as Governor of Connecticut and then as U.S. Senator from Connecticut from 1924 to 1933. He was, in addition, a scholar, a professor at Harvard, Yale, and Princeton, an explorer, an aviator, a military man, a banker, and a man of letters. JACK inherited his father's gifted talents as well as his sense of duty, and has served New York and the United States as well as his father served his State and country.

And now we are assembled to bid farewell to our friend and colleague. When we look on it, we are really the ones who will lose by JACK's retirement. Whatever path he chooses next, there is no doubt that JACK will continue to serve the people of this country. But there will never be another JACK BINGHAM in this body again. I just want to offer him my gratitude and to wish him and his family Godspeed. I consider it a challenge to live up to JACK's standard of fairness and decency during my future years in Congress. I pray that all of us can.●

HON. JONATHAN BINGHAM

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. SCHUMER. Mr. Speaker, JACK BINGHAM has not only been a faithful and conscientious public servant to

the members of New York's 22d Congressional District but also a personable and respected colleague to his fellow Members in the House of Representatives. He has served the Bronx, our city, and our State with compassion and integrity. Over the years, JACK has displayed an uncanny ability, which I very much admire, to present an argument in such a calm and articulate fashion that it is accepted by even its most staunch opponents. When he was an aide to Adlai E. Stevenson at the United Nations in the early 1960's, JACK refined the subtle diplomacy for which he is well known.

Ever since he upset Charles Buckley, head of the Bronx Democratic organization, in 1964, JACK has proved that he is indeed worthy of the acclaim we are bestowing upon him. A respected reformer throughout his career, JACK presided over many of the changes the House has undertaken since Watergate. One of his greatest contributions to the reform movement occurred in 1974 when he proposed to the Democratic Steering Committee that all committee chairmen be voted upon separately, thus making them accountable for their committee's actions and effectively eliminating the antiquated and prejudicial seniority system. In addition, JACK has always given his utmost support to Israel and to the plight of Jews around the world. As a ranking member of the House Foreign Affairs Committee, he helped enact the Soviet-Jewish Refugee Assistance Act of 1972 which sent \$264 million to Israel in aid in the resettlement of Soviet Jews. JACK has consistently raised his voice in defense of Israel whenever the situation mandated it.

Furthermore, JACK has served as a watchdog for the public interest regarding nuclear energy. He has established himself as one of the prime authorities on the subject and his opinion is highly regarded. He successfully led a movement to abolish the pronuclear Joint Atomic Energy Commission in 1977, transferring most nuclear jurisdiction to the Interior. In 1976, his bill prohibiting private industry from beginning production of enriched uranium failed only when the Speaker, then Carl Albert, who rarely casts his vote except in cases of ties or close votes, voted against him. He authored the Nuclear Nonproliferation Act of 1978, banning the exportation of nuclear reactors and fuel to countries that refuse to submit their facilities to international inspection. Following the Three Mile Island accident, he fought for a mandatory 6-month moratorium on the issuance of construction permits for atomic powerplants.

JACK BINGHAM will be a hard man to replace in Congress. I do not know of many people who possess those inherent characteristics which make JACK so unique.●

HOUSE OF REPRESENTATIVES—Friday, August 13, 1982

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

O God, from whom all blessings flow, guard and guide Your people in all the paths of life and in all parts of our world. We pray for those who know the dangers of war and destruction and who face despair. Give to people everywhere the desire for peace and nurture within them the knowledge that all men and women are created in Your image and share in the unity of Your divine handiwork. May not our own interests—so easily seen—blind us from the goals and interests of others that together we may rejoice in joy and wonder and love of life, which are Your gifts to us. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. RAHALL. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Chair's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. RAHALL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 312, nays 28, answered "present" 1, not voting 93, as follows:

□ 1020

So the Journal was approved.
The result of the vote was announced as above recorded.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate recedes from its amendments to the bill (H.R. 2160) entitled "An Act To Amend the Potato Research and Promotion Act."

The message also announced that the Senate had passed without amendment bills and a joint resolution of the House of the following titles:

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

H.R. 4647. An act to award special congressional gold medals to Fred Waring, the widow of Joe Louis, and Louis L'Amour;

H.R. 6260. An act to authorize appropriations to the Patent and Trademark Office in the Department of Commerce, and for other purposes; and

H.J. Res. 516. Joint resolution to provide for the designation of April 17 to April 23, 1983, as "National Coin Week."

The message also announced that the Vice President and upon the recommendation of the majority leader, pursuant to section 276(a)(2) of title 22, United States Code, appointed Mr. STAFFORD (chairman) and Mr. GRASSLEY (vice chairman) to attend, on the part of the Senate, the Interparliamentary Union Conference, to be held in Rome, Italy, September 14-22, 1982.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. It is the intention of the Chair to adjourn the House at 3 o'clock this afternoon. We do have an appropriation bill and a couple of rules that we would like to complete. Therefore, we will forgo the 1-minute speeches this morning.

WAIVING CERTAIN POINTS OF ORDER AGAINST H.R. 6957, COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS ACT, 1983

Mr. ZEFERETTI. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 560 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. Res. 560

Resolution waiving certain points of order against the bill (H.R. 6957) making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1983, and for other purposes

Resolved, That upon the adoption of this resolution it shall be in order, clause 7, rule XXI to the contrary notwithstanding, to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6957) making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1983, and for other purposes. During the consideration of said bill, all points of order against the following provisions in said bill for failure to comply with the provisions of clause 2, rule XXI are hereby waived: beginning on page 3, line 1 through page 8, line 2; beginning on page 8, lines 14 through 20; beginning on page 9, line 1 through page 10, line 6; beginning on page 11, line 2 through page 12, line 4; beginning on page 14, lines 12 through 24; beginning on page 15, lines 6 through 13; beginning on page 15, line 20 through page 16, line 6; beginning on page 17, line 13 through page 24, line 17; beginning on page 26, lines 2 through 6; beginning on page 26, line 18 through page 27,

line 2; beginning on page 27, line 2 through the figure "\$449,815,000" on page 30, line 2; beginning on page 30, line 9 through page 33, line 10; beginning on page 34, lines 11 through 23; beginning on page 35, line 15 through page 37, line 18; and beginning on page 40, lines 10 through 23; and all points of order against the following provisions in said bill for failure to comply with the provisions of clause 6, rule XXI are hereby waived: beginning on page 3, line 6 through page 4, line 14; beginning on page 7, line 1 through page 8, line 2; and beginning on page 15, line 20 through page 16, line 6: *Provided*, That in any case where this resolution waives points of order against only a portion of a paragraph, a point of order against any other provision in such paragraph may be made only against such provision and not against the entire paragraph.

The SPEAKER. The gentleman from New York (Mr. ZEFERETTI) is recognized for 1 hour.

Mr. ZEFERETTI. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Mississippi (Mr. LOTT) pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 560 provides waivers of clause 2, rule XXI, and clause 6, rule XXI against certain provisions of House Resolution 6957, Departments of Commerce, Justice, State, the Judiciary, and related agencies appropriations bill for fiscal year 1983. These provisions are specified within the resolution.

Clause 2 of rule XXI prohibits unauthorized appropriations and legislation in an appropriation bill. H.R. 6957 includes various programs which have not yet completed the authorization process and without this waiver would be subject to a point of order.

Clause 6 of rule XXI prohibits reappropriations in an appropriations bill. The waiver is required due to three programs, the economic development assistance program, the National Oceanic and Atmospheric Administration, and the Small Business Administration. All three of these programs have unobligated funds remaining from fiscal year 1982 which the committee plans to use in fiscal year 1983.

Further, the rule provides that in any case where this resolution waives points of order against only a portion of a paragraph, a point of order against any other provision in such paragraph may be made only against such provision and not against the entire paragraph.

This proviso is necessary because the rule does not extend protection to a portion of the paragraph on page 30, lines 2 through 8, of the bill regarding contributions to international organizations. The specific language prohibits the use of funds appropriated by the act for payment of certain interest costs for loans incurred by international agencies. The chairman of the Committee on Foreign Affairs, Mr. ZABLOCKI, appeared before the Rules Committee asking that the waiver not

be granted because the language was legislative in nature.

The Rules Committee did not grant the waiver for the language in dispute but wanted to make sure that other provisions in the paragraph were protected.

Mr. Speaker, this measure appropriates \$9,069,567,000 for fiscal year 1983. This amount is a net increase of \$546,692,000, \$692,000 over fiscal year 1982 appropriations.

Under this measure \$193,450,000 will be appropriated for the Economic Development Administration. This has been a great program for the people of New York and I applaud the committee for showing wisdom and foresight in making this allocation of funds.

Further, as chairman of the Select Committee on Narcotics Abuse and Control, I was pleased to see a slight increase in the appropriations for the Drug Enforcement Administration and the FBI. I realize that presently we are under tight budget constraints, however, I hope the committee in the near future will consider even a larger increase in funds.

Mr. Speaker, this is a very straightforward and noncontroversial rule and I urge my colleagues to support its adoption.

□ 1030

Mr. LOTT. Mr. Speaker, I thank the gentleman for yielding the customary time, and I yield myself such time as I may consume.

Mr. Speaker, let me say right up front that I am urging my colleagues to vote against the previous question on this rule so that we can offer a substitute rule making in order two vital amendments relating to the Federal Trade Commission—one which would extend the legislative veto authority over FTC regulations beyond September 30, of this year; and the other of which would extend existing restrictions on the Commission's authority over agricultural cooperatives beyond September 30.

Mr. Speaker, having said that let me say that even if it were not for the bill's back door attempt to continue the FTC without the important restraints we placed on it in the 1980 FTC authorization, I would still oppose this rule because the bill is a budget buster. To quote from an administration policy statement of August 12,

The Administration is strongly opposed to the unwarranted and unrequested increases in annually funded discretionary programs in H.R. 6957. . . . The bill, as reported, represents an increase of \$633 million over the 302(b) allocation for discretionary programs consistent with the Budget Resolution and \$169 million over the Committee 302(b) allocation for annually funded discretionary programs.

Mr. Speaker, I hesitate to say this is the customary rule for appropriations

bills nowadays, but I am afraid that is getting to be the case. As my colleagues know, appropriations bills are privileged, and ordinarily do not need a special rule. But in recent years more and more appropriations bills have required special rules waiving points of order because the authorizations have not yet been enacted for many of the items contained in the appropriations bills. And clause 2 of rule XXI prohibits legislating in an appropriations bill or appropriations for matters not previously authorized by law.

In his letter to the Rules Committee of August 10 on this appropriations bill, Chairman WHITTEN listed some 28 matters in this bill for which authorizations have not yet been enacted. Most of those 28 authorization bills are in the works in one House or another at this time. On the Federal Trade Commission, an authorization was reported in the other body on May 28, but, according to the testimony of the gentleman from North Carolina (Mr. BROYHILL), before the Rules Committee, "No bill to reauthorize the FTC has been scheduled by the Energy and Commerce Committee to date," though a subcommittee has reported a straight 1-year authorization.

Mr. Speaker, I think my colleagues will appreciate the special case presented by the \$63.6 million appropriated for the FTC contained in the bill. The only reason we have an FTC today is because we finally forced the issue in late 1980 after closing down the agency, and we adopted the FTC improvements bill which placed new restrictions on the agency. Two of the most important provisions were the legislative veto over regulations, and restrictions on FTC interference with agricultural cooperatives and marketing orders. If the previous question is defeated on this rule, as I hope it will be, I intend to make those two amendments in order as printed in yesterday's RECORD by the gentleman from North Carolina (Mr. BROYHILL), and the gentleman from Georgia (Mr. LEVITAS). I would hasten to point out to my colleagues that it will still be in order under this rule to offer an amendment to strike all funding for the FTC as an alternative. I know there is concern about other provisions in that 1980 act that cannot be brought up at this time. Let me say that such matters would be in order as amendments to a continuing appropriations bill without needing special waivers. But, hopefully, by our action on this rule today, we will be sending a clear signal to the appropriate committee that it should move on bringing an authorization bill to the floor at the earliest practical date.

I would like to point out also for my own part that this is the first appropriations bill that has hit the floor this year, the first one. We clearly

have indications that it is over the budget.

Also it is the appropriation bill for State, Justice, Commerce, and other related agencies. For myself, I have a lot of questions about a lot of the funding for Justice and the State Department and a number of the things that they are doing.

Let me just read some of the funding that is included in this appropriation bill.

It, of course, includes the funding for the United Nations, the World Intellectual Property Organization, the World Health Organization, the Food and Agriculture Organization, the International Labor Organization, the World Meteorological Organization, Universal Postal Union, Inter-American Indian Institute, Inter-American Institute for Cooperation on Agriculture, International Office for Epizootics, and a whole long list of organizations that are included in this bill that is over the budget.

So I would hope that my colleagues would vote down the previous question so that I can offer the substitute rule and that you will listen very closely to the debate.

Let us try to cut back on the funding included in this appropriations bill.

Mr. Speaker, I yield 5 minutes to the gentleman from North Carolina (Mr. BROYHILL).

Mr. BROYHILL. Mr. Speaker, today the House is considering the Commerce, Justice, State, and related agencies appropriations bill appropriating moneys for these agencies for fiscal year 1983.

This bill includes appropriations for the Federal Trade Commission for 1983.

I am very troubled by the fact that this bill has reached the floor without an authorization bill in place. This rule waives any points of order that might be made with respect to the bill.

The Energy and Commerce Committee is the authorizing committee with respect to the Federal Trade Commission. Unfortunately, no reauthorization bill for the FTC has been scheduled for full committee markup. The only action that was taken occurred last May, when the subcommittee considered a committee print, not an introduced bill. The subcommittee considered a committee print which contained only a 1-year authorization for the continuation of funding for the FTC for another year.

Let me recount the legislative history so as to explain why I am concerned about this.

A little over 2 years ago, in the last Congress, we had quite a debate with respect to the various authorities and various regulatory activities that the FTC was taking at that time. We began to consider a number of amendments to counter those particular actions that were being taken.

When the FTC was reauthorized, there were several major changes that were made to the act at that time.

One of these changes was the inclusion of a provision which we call the legislative veto. It provided that any trade rule promulgated by the Federal Trade Commission would have to be submitted to the Congress. This gave the Congress a chance to review that rule before it went into effect. And if the Congress vetoed that trade rule, that rule would not go into effect.

There was another proposed restriction on the Commission's authorities that was extensively debated at that time, and that was with respect to agricultural co-ops. Many of you remember that the Federal Trade Commission had initiated several proceedings against agricultural co-ops. These proceedings were in violation of the Capper-Volstead Act, which is a Federal law under the jurisdiction of another committee that regulates agricultural co-ops.

So section 20 of Public Law 96-252 provided that the Federal Trade Commission would not have authority to use funds to conduct any study, investigation or prosecution of agricultural co-ops because of the provisions of the Capper-Volstead Act. Section 21 of that public law provided for a congressional review of trade regulation rules.

Now, the problem is that these two amendments, sections 20 and 21, were sunsetted in Public Law 96-252. These two sections of the Federal Trade Act expire on September 30, about 6 weeks from today if we do nothing.

Many of the Members recall there was very substantial support for these two provisions in the House of Representatives. Now, there is still substantial support for these two provisions in the House. I am not advocating any new amendments to the Federal Trade Act. All I am asking the House to do is that they defeat the previous question so that we may offer amendments so as to maintain the status quo.

We are advocating these amendments to do no more or no less than to maintain the law as it is today, to keep in the law the restriction on Commission authority relating to agricultural co-ops and to keep in the law the congressional review of any Federal Trade rules.

I might add that since the September 30 deadline is rapidly approaching, when these provisions will expire, the only choice we have is to act today.

The SPEAKER pro tempore (Mr. KILDEE). The time of the gentleman from North Carolina (Mr. BROYHILL) has expired.

Mr. LOTT. Mr. Speaker, I yield 3 additional minutes to the gentleman.

Mr. BROYHILL. The only choice that we have is to defeat the previous question because if the appropriation

goes through today, there is no incentive to bring an authorization bill forward. If we defeat the previous question, we can then adopt a rule that would allow full consideration of these amendments that would continue for 1 more year the legislative veto and the restrictions on the Commission's authority relating to agricultural co-ops and marketing orders.

I do not advocate, and I do not believe the Members advocate, allowing either of these amendments to expire on September 30, so I would urge the Members to support us in defeating the previous question so as to permit these amendments to continue the law as it is today, no more and no less.

I thank the gentleman for the courtesy of extending me extra time.

Mr. ZEFERETTI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, during consideration in the Rules Committee meeting yesterday, Congressman BROYHILL testified in regard to the two amendments he proposes to offer on the floor. One amendment would have prevented the FTC from conducting any study or investigation into the agricultural co-ops, and the other would have allowed the continuation of a legislative veto for FTC rules.

To offer these amendments would have required the waiver of clause 2, rule XXI, since these amendments obviously would constitute legislation in an appropriation measure.

It has been the practice of the Rules Committee to look very carefully at any request for this waiver, and the committee feels that a situation has to be of an emergency nature, or one where the waiver not being granted, would result in serious consequences.

The committee has heard testimony from several committee chairmen regarding what they believe to be the indiscriminate use of this waiver. That was the case yesterday on this very bill. In yesterday's hearings the Rules Committee felt Mr. BROYHILL's amendments were not of an emergency nature and should be properly discussed and acted on in consideration of the FTC authorization.

Further, Mr. Speaker, Mr. BROYHILL's amendment, on agricultural co-ops can be written to be a straight limitation, and would not have any problems being offered in the Committee of the Whole.

The second amendment, a legislative veto, is in violation of the rules of the House because it is again legislation on an appropriation bill, and is nongermane to the bill.

Mr. Speaker, I yield 6 minutes to the gentleman from Georgia (Mr. LEVITAS).

Mr. LEVITAS. Mr. Speaker, I am rising for purposes of asking the Members to defeat the previous question on this rule so that an amended rule can

be offered which would make it possible to offer two amendments, one dealing with the agricultural co-ops, and the other dealing with legislative veto with respect to the Federal Trade Commission.

Now, why do I make this request? The reason is very simple. What has been attempted by the rule as it is now presented is a back door attempt to repeal and undo what this very House did overwhelmingly just about 2½ years ago—and to do so not through the authorization process, but through the appropriations process.

Now, my good friend, the distinguished gentleman from New York, mentioned that these two amendments would constitute a violation of the rules of the House, and the gentleman is absolutely correct. They would. That is why we need to have a rule which would make them in order. But by the same token, what the Appropriations Committee has brought to the floor is an appropriation for the Federal Trade Commission which has not yet been authorized by the authorizing committee. And that is a violation of the rules of this House, and that is why the waivers exist in this rule this morning.

If it were not for the waiver in this rule, a point of order could be made against the FTC appropriation.

Now, it is not the fault of the Appropriations Committee. I want to make that very clear. It is not the fault of the Appropriations Committee. The authorizing committee has not yet reported out an authorization. And the Appropriations Committee is faced with the alternative of trying to bring some funding forward in violation of the rules of the House in seeking a waiver.

Well, all I am suggesting to you is that if that violation of the rules is to be condoned, then at least give the Members of this House an opportunity to maintain the position we took without this back door effort to strip out and undo what we did before.

The American people understand what this is about. There are many Members of this House, quite frankly, in light of the history of the Federal Trade Commission in recent years, who would like to see no funding for this agency. I do not share that view, but there is a need to focus on this problem. And if you remember, I suggest to my colleagues, several years ago, because of the same type of situation we are in today, the exact same type of situation, the FTC was not authorized and ultimately did not get funds appropriated because of this same type of fight. What we are seeing here is a minority of the Members of the House attempting to impose their will through the use of the rules of the House on the majority of the Members of this House. And not just a

narrow majority. An overwhelming, bipartisan majority.

What we are going to be dealing with in voting on this rule and the previous question is whether or not the Members of this House want to go on record as wanting to keep the legislative veto on the FTC, to let the American people, through their elected Representatives, decide whether these rules which have the effect of law be subject to consideration by the people they elect.

□ 1050

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Iowa, the chairman of the Appropriations Subcommittee.

Mr. SMITH of Iowa. Mr. Speaker, I think the gentleman has covered this but I do want to make clear that anything that results in legislation on the Appropriations Committee is not the fault of the subcommittee. We do not want to get into legislation on this appropriations bill. Sixty-seven percent of this bill has not been authorized and we would never have a bill if we do not go forward with some programs for which authorization has not been extended.

It is not our intention to get involved in the writing of legislative programs. Those are arguments for the legislative committee.

Mr. LEVITAS. I appreciate the statement of the chairman of the subcommittee. And that is precisely why I wanted to exculpate and exonerate the Appropriations Subcommittee for their role in this matter. The responsibility lies in the authorizing committee.

Mr. ZEFERETTI. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from New York.

Mr. ZEFERETTI. I thank the gentleman for yielding.

My distinguished friend from Georgia, there is no backdoor effort here to suppress any process. As the chairman has indicated, two-thirds of that bill has not been authorized. There is no backdoor effort here. This is a process that we follow under the recommendations of the Rules Committee, under the precedents and rulings of the House. It has been the practice of the Rules Committee to seldom allow legislation on an appropriations bill. This is not a practice that has been limited to just this bill or the FTC. It is a process that we follow in the Rules Committee often.

Mr. LEVITAS. Would the gentleman let me just comment on that.

First of all, as the gentleman knows, there have been occasions where legislation on appropriations bills has been made in order by rules. That is a fact. And I know the gentleman would

agree with it. But the gentleman, I am sure, also understands that the Federal Trade Commission is a special case, because this is not the first time this issue has come to the floor of this House.

We have had this exact same argument and this exact same dispute at least four times.

The SPEAKER pro tempore. The time of the gentleman from Georgia (Mr. LEVITAS) has expired.

Mr. LOTT. Mr. Speaker, I would like to yield the gentleman 3 additional minutes from my time so I can ask the gentleman some questions.

The SPEAKER pro tempore. The gentleman from Georgia (Mr. LEVITAS) is recognized for 3 additional minutes.

Mr. LOTT. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Mississippi.

Mr. LOTT. First of all, I would like to ask the gentleman from Georgia, how many cosponsors does the gentleman have on his legislative veto bill in the House at this time?

Mr. LEVITAS. As of the last time I checked there were about 253 Members of this House in both parties who have cosponsored this.

Mr. LOTT. Is it not a fact that this may be the only chance that we will have this year to vote on this very important legislative veto issue?

Mr. LEVITAS. Well, from the looks of things that may well be the case, I am sorry to say, because as the gentleman knows it is being pigeonholed at the present time. This is the only chance we will have to veto the issue. The American people are going to have a chance to veto this issue in November.

Mr. McCLODY. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Illinois.

Mr. McCLODY. I thank the gentleman for yielding.

I think the gentleman's position on this measure points up a deficiency in the present Congress.

The regulatory reform bill, which provides specifically for a legislative veto, has been languishing in the Rules Committee now for months and months. We have reported it out of the Judiciary Committee.

Mr. LEVITAS. In February.

Mr. McCLODY. And all we need to do is just have the Rules Committee grant us a rule and let us debate this substantive issue. Then the arguments that are being made that we are attempting to legislate on appropriations measures could not be advanced. We can legislate on the substantive subject that the gentleman is presenting in the regulatory reform measure and we should do it.

And it is a sorry reflection on this Congress that we are not taking up the regulatory reform bill, not only be-

cause of the issues that the gentleman raises but for a multiplicity of issues that are involved in the whole regulatory process.

Mr. LOTT. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Mississippi.

Mr. LOTT. I thank the gentleman for yielding.

Is the gentleman aware as a matter of fact in this rule and in this appropriations bill that there are some 28 instances, as I understand it, when points of order were waived against legislation on this appropriations bill?

Mr. LEVITAS. I understand there are a number of points of order waived in this bill. It seems to me that we are sort of picking and choosing. And the reason it seems to me to be so outrageous is this is not a new issue. This is exactly the same issue this House struggled with for 3½ years.

We reached a decision. We expressed our will. The law was signed. All that the gentleman from North Carolina (Mr. BROYHILL) and I seek to do is take two of those provisions which this House expressed itself on and continue them if the FTC is going to continue. That is all we are asking. I do not think that is unfair.

Mr. ZEPHERETTI. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from New York.

Mr. ZEPHERETTI. I thank the gentleman for yielding.

Does the gentleman realize his amendment is a nongermane amendment?

Mr. LEVITAS. Yes.

Mr. ZEPHERETTI. Does the gentleman realize we have never in the Rules Committee waived nongermaneness on an appropriations bill?

Mr. LEVITAS. I have seen nongermaneness waived on conference reports.

Mr. ZEPHERETTI. But not on appropriations bills. That is what I am talking about.

Again, as I indicated earlier the amendment of the gentleman from North Carolina (Mr. BROYHILL) could be handled as a straightforward limitation on an appropriation amendment, and we could act on that without any type of waiver.

Mr. LOTT. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. McCLODY).

(By unanimous consent, Mr. McCLODY was allowed to speak out of order.)

DISCHARGE PETITION ON BALANCED BUDGET CONSTITUTIONAL AMENDMENT

Mr. McCLODY. Mr. Speaker, my remarks are relevant to the subject that we discuss as far as the languishing in the Judiciary Committee of the regulatory reform measure is concerned.

Mr. Speaker, I do not believe I have ever before signed a discharge petition

to deprive a committee of the House of its authority over pending legislation. Certainly, I have never signed a petition to discharge my own committee—the Judiciary Committee—of its appropriate consideration of any measure pending before it. But the balanced budget constitutional amendment proposal has been delayed to the point that unless the committee is discharged from its further consideration the Members of the House will be deprived of the opportunity to debate and vote upon this all-important issue. Yesterday, I added my name to discharge petition No. 18 which if signed by 218 Members will have the effect of bringing the balanced budget proposal to the floor of the House for 10 hours of debate and for a vote.

Our colleague, BILLY LEE EVANS of Georgia, and I are urging Members on both sides of the aisle to sign this discharge petition today so that the proposal sponsored by 222 Members, of which ED JENKINS of Georgia and BARBER CONABLE of New York are the principal sponsors, may come to the floor. Unless 218 names are added to that petition today, this measure may well be dead for the 97th Congress. Indeed, the only reason I have signed the petition and the reason BILLY LEE EVANS and I are urging Members to sign the discharge petition is that the Judiciary Committee itself will frustrate our opportunity to consider this measure in this Congress. Whether you are for the amendment or not, I urge you to sign the discharge petition and to give every Member of this House the chance to express his or her views and to vote on this crucial issue.

Mr. ZEPHERETTI. Mr. Speaker, I yield 3 minutes to the gentleman from New Jersey (Mr. FLORIO).

Mr. FLORIO. Mr. Speaker, I rise in support of the previous question on the rule.

Mr. Speaker, the subcommittee that I chair has jurisdiction over the FTC. We have been working since early this year to develop a bipartisan consensus on the Energy and Commerce Committee regarding an FTC reauthorization bill.

I cannot expect the gentleman from Georgia to be aware of that, but I can expect the gentleman from North Carolina to be aware of it, because he has been a participant in the negotiations. There has been a full consensus, particularly on the two points that concern him, and there has been no dispute that those matters should go forward and will be contained in the authorization bill.

We have made substantial progress toward our objective and I believe we will shortly have a bipartisan bill for the consideration of our full Energy and Commerce Committee.

In these circumstances, I hope the House will agree with me that it would

be most disruptive and inappropriate for provisions dictating the conduct of the Commission's activities to be enacted through the appropriations process. The ordinary reasons for avoiding such a use of the appropriations process are compounded in this instance by the recent history of the FTC and the complex and controversial nature of some proposals that have been made with regard to some radical changes in the FTC's authorization authority that have been coming out of the other body.

As the Members of the House are undoubtedly aware, in 1980 we enacted the FTC Improvement Act to fine tune the procedures of the Commission to insure fair procedures and full deliberation without doing fundamental damage to the crucial role of the FTC in preserving free and fair competition.

This year, a number of groups have contended that there are additional changes which should be made in the Federal Trade Commission Act. Some of these proposals raise legitimate questions and entail only further fine tuning of the FTC Act. Others, however, would involve radical changes in the jurisdiction of the Commission, removing whole classes of people from the scrutiny of the FTC.

In developing the consensus bill that we hope shortly to introduce, we have attempted to accommodate legitimate concerns, without adopting radical measures that would damage businesses, balk hard-pressed consumers, and fuel inflation.

But the House is not faced today with the question of whether particular proposals reflect a fair accommodation of the arguments that have been raised regarding the FTC. I am confident that when those issues are considered through the appropriate deliberative procedures of the authorization process, we will arrive at an acceptable outcome.

Instead, what we are faced with today is whether we should attempt to resolve complex and controversial matters through the hasty approach of last minute floor amendments to an appropriations bill. That question answers itself.

Commendably, the Appropriations Committee resisted any temptation to add riders to its bill regarding the FTC. Yet without any prior deliberation, such riders are now offered on the floor.

A special word may be in order concerning efforts to add a legislative veto as a rider to the FTC appropriations bill. Members of the House may differ strongly on the merits of the legislative veto. Nevertheless, if there is support for such a measure it will emerge from the authorization process. And I have been prepared to accept a legislative veto as part of the compromise package we are very close to complet-

ing for consideration by the Energy and Commerce Committee.

But the legislative veto is a very sensitive item. It should not be hastily considered and adopted today without even a chance for Members to examine its terms. I submit that we owe the importance of this issue a much greater degree of deliberation.

In sum, I urge the House to follow the example of the Appropriations Committee and reject FTC riders to this bill. Subversion of the orderly procedures of the House will serve no one's purposes in the long run.

The SPEAKER pro tempore. The time of the gentleman from New Jersey has expired.

Mr. ZEFERETTI. Mr. Speaker, I yield 1 additional minute to the gentleman.

Mr. FLORIO. Mr. Speaker, I think this is particularly inappropriate because of the other body's concern and apparent support for radical changes.

I think it would be particularly unwise to have an appropriation conference committee dealing with authorizing measures with no members of the authorizing committee as conferees.

If the gentleman's apprehension is that we get to the end of this fiscal year and nothing has been done, which I fully expect not to be the case, there is always going to be an opportunity for a continuing resolution to be considered by this body, at which time there is the authority to go forward to deal with the problems that the gentleman from North Carolina and the gentleman from Georgia are concerned about, that is, the lapse of certain provisions of the authorizing legislation.

Mr. Chairman, I would suggest that this is a highly unusual approach that is being advocated by some here today and this House would be well served, and the Nation would be well served, by defeating that approach.

The SPEAKER pro tempore. The time of the gentleman from New Jersey has again expired.

Mr. ZEFERETTI. Mr. Speaker, I yield 1 additional minute to the gentleman.

Mr. LEE. Mr. Speaker, will the gentleman yield?

Mr. FLORIO. I would be happy to yield.

Mr. LEE. Mr. Speaker, the rightful concern that the gentleman expresses that a conference committee dealing with the appropriations matter with authorization elements are contained within, why not withdraw this appropriation proposal, go back to the authorizing committee, which we both serve on, and give the committee the opportunity to work its will?

Mr. FLORIO. Mr. Speaker, reclaiming my time, the gentleman certainly has his opportunity to advocate that and urge defeat of this appropriation,

if he thinks that is the appropriate way to go. That is in accordance with the normal rules of the House, approve it or do not approve it.

I may very well find myself in support of the gentleman's position. I have seen some amendments that are going to be offered with regard to cutting the FTC, cutting FTC funding for rules. If those things go forward, I may very well support the gentleman's efforts not to approve the appropriation; but I think that is totally different than the question we are faced with now as to whether we should give legislative sanction to authorizing on an appropriation bill.

Mr. LEE. I thank the gentleman.

Mr. LOTT. Mr. Speaker, I yield 2 minutes to the gentleman from North Carolina (Mr. BROYHILL).

Mr. BROYHILL. Mr. Speaker, I thank the gentleman for yielding.

I have asked for this time so that I could reply at least in part to the statement that has been made by the gentleman from New Jersey. The gentleman has stated that attempts have been made to work out a consensus in the authorizing committee on this bill.

I agree that perhaps the gentleman and I could work out some consensus on various parts of an FTC reauthorization bill. But there is absolutely no way, and I have told this to the gentleman, that I can make a deal with the gentleman that would prevent other Members from offering their amendments here on the floor and having the House work its will with respect to those amendments.

Whenever you bring up an FTC reauthorization bill, you are going to have some controversy on it because that particular agency is involved in a number of controversial issues. Members tend to react to these issues as they arise.

I might point out that as far as I know, there has been no consensus worked out with the gentleman from New Jersey with respect to the legislative veto or the agricultural cooperative amendments.

As I recall, when I offered those amendments in the subcommittee, the gentleman voted against them and voted the proxies that he had in his pocket, defeating our amendments on those particular items.

The issue, of course, has been raised here with respect to amendments to appropriation bills. I am reluctant to offer amendments to appropriation bills, but the reason that we see more and more Members coming to the floor and offering amendments to appropriation bills is in response to their inability to offer amendments on authorization bills.

This legislative veto issue is one that has been around for a long time. We have had to offer that amendment from time to time on a piecemeal

basis. We were fortunate enough to get it adopted in the last Congress to the FTC reauthorization bill.

The SPEAKER pro tempore. The time of the gentleman from North Carolina has expired.

Mr. LOTT. Mr. Speaker, I yield 2 additional minutes to the gentleman.

Mr. BROTHILL. Unfortunately, the conference committee sunsetted that particular section, section 21 of Public Law 96-252. It expires on September 30, 1982.

I would remind Members that the Federal Trade Commission, in contrast with other Federal agencies has very broad rulemaking powers. In effect, what we are saying is that the FTC has very broad lawmaking powers, because those rules have the force and effect of law.

We as a Congress have turned over to this independent agency the responsibility to make laws. It seems to me that we have some responsibility as elected representatives to oversee their work product.

I remind Members again that the legislative veto and the restrictions on FTC authority with respect to agricultural cooperatives expires on September 30. We are asking no more, no less, than the present law be extended for an additional year. We are not advocating any new amendments.

Mr. FLORIO. Mr. Speaker, will the gentleman yield for a question?

Mr. BROTHILL. I would be glad to yield.

Mr. FLORIO. Mr. Speaker, just to set the record straight with regard to my own thoughts and my own position on the legislative veto and the existing agricultural cooperatives, I have conveyed to the gentleman, I hope he understood, that I have no difficulty continuing those provisions on the authorization bill.

Mr. BROTHILL. I will reclaim my time. I would like to ask the gentleman why he voted against the amendments in the subcommittee.

Mr. FLORIO. The gentleman is fully aware of the fact that the bill that came out of the subcommittee was a straight authorization in terms of just the money.

The gentleman is certainly privy to our conversations that have indicated that that has not been the dispute in the negotiations. My apprehension about the gentleman's course of conduct now is not with regard to the legislative veto, not with regard to the agricultural cooperative exemption, which we agree on and want to improve with the concurrence of the gentleman. My apprehension is that we will go to conference on an appropriation bill, knowing the feeling in the other body with regard to the exemption for the professions.

The SPEAKER pro tempore. The time of the gentleman from North Carolina has expired.

Mr. ZEPERETTI. Mr. Speaker, I yield 1 additional minute to the gentleman.

Mr. FLORIO. Mr. Speaker, I will ask the gentleman to yield to me.

Mr. BROTHILL. I yield to the gentleman.

Mr. FLORIO. I am concerned that we are talking about a backdoor way to write into the authorization through the appropriation process an exemption from the FTC of the professions on a very controversial matter that the gentleman, I think shares my views about, but the gentleman is opening the door to have the appropriations conferees write into law that exemption, because it could not stand the heat of the normal legislative process.

Mr. BROTHILL. Mr. Speaker, if I may reclaim my time, this is the first that any other amendment has been mentioned that could be proposed in the authorizing committee. I am not proposing any amendment other than the ones that we have discussed here today.

Mr. FLORIO. Mr. Speaker, if the gentleman will yield further, I know he is not; but the gentleman is either inadvertently—I assume inadvertently—providing the mechanism when we go to conference, the other body has less stringent rules on germaneness, to get that provision into this bill and then we will change the authorizing legislation.

Mr. BROTHILL. The gentleman is raising an issue that has not been raised and is not the intent of this gentleman or the intent of the gentleman from Georgia.

Mr. ZEPERETTI. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. SCHEUER).

Mr. SCHEUER. Mr. Speaker, I rise here today, not to support or to oppose this amendment, but just to reflect on it.

I was chairman of the subcommittee that had jurisdiction over the FTC when for the first time in more than 3 years we actually got an authorization bill passed in this House. At that time I was in very close touch with the gentleman from North Carolina (Mr. BROTHILL) and the gentleman from Georgia (Mr. LEVITAS) on the question of the legislative veto. We worked closely with them in structuring a form of the legislative veto in the FTC bill.

I felt, somewhat reluctantly, that as a practical matter its time had come. We had not been able to get an FTC authorization bill through the House in 3 years without it. The House had expressed its will quite clearly on the matter; so as a matter of political pragmatism, I accepted the legislative veto and worked with the gentleman from Georgia and the gentleman from North Carolina to put in an acceptable form of the legislative veto.

This is perhaps a throwaway, but I would have to tell you that while as a matter of principle I agree with many, if not most of the things that the gentleman from Georgia has been saying about Congress reflecting the will of the American people and having some input into the work of the FTC and factoring in, cranking into their computer our feelings about some of their work, while that is very well and good as a matter of principle, as a matter of actual practice in the first exercise of the legislative veto process here, the result was violently and flagrantly anticonsumer and, in my opinion, grossly against the wishes of the American people.

□ 1110

The only example we have had so far of the legislative veto as a living, throbbing, human force in our work was the used-car amendment. I suggest to you that if we had put this very modest proposal to the American people in a national referendum, the purchasers of used cars, that great American public out there, would approve 95 to 5 the proposal that they would like to have a sticker on that car informing them as to whether the car had any known defects, letting them know whether that car had a warranty or not.

That was a very modest proposal. I cannot believe that that great American public that buys used cars would not have happily received that information.

Yet this Congress, in its infinite wisdom, chose to deprive them, chose to kill that FTC rule and deprive the used-car buying public of that very modest, basic information for them, the very basic knowledge that they needed to exercise in their choice.

The SPEAKER pro tempore. The time of the gentleman from New York (Mr. SCHEUER) has expired.

Mr. LOTT. Mr. Speaker, if I could just conclude, I would like to again urge my colleagues to vote "no" on the previous question so we can vote for the legislative veto for FTC regulations and on the amendment offered by the gentleman from North Carolina with regard to agricultural cooperatives, being covered by the FTC.

Mr. LEVITAS. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Georgia.

Mr. LEVITAS. Mr. Speaker, I appreciate the gentleman yielding to me.

The reason I do so, if I could get the attention of the gentleman from New Jersey, is to say that the reason that the timing of this is important is that, as the gentleman knows, the legislative veto provision expires on September 30.

We do not know at this point when, if at all, either a reauthorization or a

continuing resolution will be coming to the floor and passed through both Houses of Congress. The need to get this provision on legislative veto in this bill at this time is to make certain that if we do not have a continuing resolution or an authorization passed by September 30, this provision will not disappear.

It is only for that reason, and for that reason alone, that if there is going to be any reauthorization—any appropriation for the FTC—it should be accompanied by this provision so that it will not expire.

I would be perfectly willing to see all funds dropped from the FTC under the waiver provided for in the bill so you could have your authorization. But in the absence of that, it seems to me that we have got to have these provisions as amendments or else they will expire on September 30 without any assurance that they will be continued through any other process.

I thank the gentleman for yielding.

Mr. BROYHILL. Mr. Speaker, will the gentleman yield to me?

Mr. LOTT. I yield to the gentleman from North Carolina.

Mr. BROYHILL. I thank the gentleman for yielding.

Mr. Speaker, I want to echo the remarks that have just been made. It is not the intent of the gentleman from Georgia, nor my intent, to go beyond keeping what is presently in the law. We can still have an authorization bill that addresses any other issues that we might want to address or that other Members may want to bring up; but our concern is that these two provisions which are in present law may expire on September 30, and we have no other choice but to take this avenue, this legislative avenue, to try to continue those authorities, to continue the status quo.

Mr. FLORIO. Mr. Speaker, will the gentleman yield to me?

Mr. LOTT. I yield to the gentleman from New Jersey.

Mr. FLORIO. I thank the gentleman for yielding.

Mr. Speaker, I appreciate the gentleman's concern. I think it is ill-founded at this point. There is time to go forward with the authorization or the continuing resolution with the gentleman's amendatory language to insure the preservation of the matter that the gentleman is concerned about.

I am apprehensive, and I think with good justification, because it has been represented to me that the other body fully intends to attempt to put the professional exemption into the appropriation. We, then, by taking the action the gentleman advocates, would be sanctioning authorizing in an appropriation, and I am just concerned that the action that the gentleman advocates, in fact, provides for a professional exemption.

Mr. BROYHILL. Mr. Speaker, I would like to reclaim my time.

The SPEAKER pro tempore. The Chair announces that the gentleman from Mississippi (Mr. LOTT) controls the time.

Mr. LOTT. Mr. Speaker, I yield, for a final comment before we vote, to the gentleman from North Carolina (Mr. BROYHILL).

Mr. BROYHILL. I thank the gentleman for yielding.

Mr. Speaker, we are apprehensive because there has been inaction on an authorization bill, we have no part in anything that might be done by the other body, and I know that the gentleman from Iowa will certainly protect the rights of the House and the position taken by the House in any conference.

Mr. LOTT. Mr. Speaker, I have no further requests for time.

Mr. ZEFERETTI. Mr. Speaker, I would like to conclude by making just two points.

One, Mr. BROYHILL's amendment, the agricultural co-op amendment, can be rewritten to be a straight limitation amendment, and that would be in order. I think the gentleman from New Jersey, who is chairman of the authorization committee, has expressed a desire to work with the gentleman from North Carolina on the legislative veto issue.

Mr. BROYHILL. Mr. Speaker, will the gentleman yield?

Mr. ZEFERETTI. I yield to the gentleman from North Carolina.

Mr. BROYHILL. I thank the gentleman for yielding.

Mr. Speaker, we can offer an amendment like that. However, it would go somewhat beyond what present law is. Our position was that we wanted to maintain the status quo, the present law as it is; no more, no less. We will do that if necessary, but it would be better to do it this other way so as to maintain the law as is and not to go beyond it.

Mr. ZEFERETTI. Mr. Speaker, the objective of the agriculture co-op amendment can be achieved as a limitation, but on the other one, the legislative veto amendment, it is really in violation of the rules of the House. It is an authorization kind of responsibility, not appropriate as legislation on an appropriation bill as well as being nongermane.

I would suggest that my colleague support us and vote for the previous question.

Mr. Speaker, I move the previous question on the resolution.

The SPEAKER pro tempore. The question is on ordering the previous question.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. LOTT. Mr. Speaker, I object to the vote on the ground that a quorum

is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 144, nays 208, not voting 82, as follows:

□ 1130

Mr. LONG of Maryland and Mr. BEVILL changed their votes from "yea" to "nay."

Mr. OTTINGER, Mr. DONNELLY, Mrs. SCHNEIDER, and Mr. PEYSER changed their votes from "nay" to "yea."

So the previous question was not ordered.

The result of the vote was announced as above recorded.

AMENDMENT IN THE NATURE OF A SUBSTITUTE
OFFERED BY MR. LOTT

Mr. LOTT. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. LOTT:

Strike all after the resolving clause and insert in lieu thereof the following: "that upon the adoption of this resolution it shall be in order, clause 7, Rule XXI to the contrary notwithstanding, to move that the House resolve itself into the Committee of the Whole House on the State of the Union for consideration of the bill (H.R. 6957) making appropriations for the Departments of Commerce, Justice, State, the Judiciary, and related agencies for the fiscal year ending September 30, 1983, and for other purposes. During the consideration of said bill, all points of order against the following provisions in said bill for failure to comply with the provisions of clause 2, Rule XXI are hereby waived: beginning on page 3, line 1 through page 8, line 2; beginning on page 8, lines 14 through 20; beginning on page 9, line 1 through page 10, line 6; beginning on page 11, line 2 through page 12, line 4; beginning on page 14, lines 12 through 24; beginning on page 15, lines 6 through 13; beginning on page 15, line 20 through page 16, line 6; beginning on page 17, line 13 through page 24, line 17; beginning on page 26, lines 2 through 6; beginning on page 26, line 18 through page 27, line 2; beginning on page 27, line 2 through the figure "\$449,815,000" on page 30, line 2; beginning on page 30, line 9 through page 33, line 10; beginning on page 34, lines 11 through 23; beginning on page 35, line 15 through page 37, line 18; and beginning on page 40, lines 10 through 23; and all points of order against the following provisions in said bill for failure to comply with the provisions of clause 6, Rule XXI are hereby waived: beginning on page 3, line 6 through page 4, line 14; beginning on page 7, line 1 through page 8, line 2; and beginning on page 15, line 20 through page 16, line 6. *Provided*, That in any case where this resolution waives points of order against only a portion of a paragraph, a point of order against any other provision in such paragraph may be made only against such provision and not against the entire paragraph. It shall be in order to consider amendments to said bill printed in the Congressional Record of August 12, 1982, by and if offered by Representative Broyhill of North Carolina and Representative Levitas of Georgia, and all points of order against said amendments are hereby waived."

POINT OF ORDER

Mr. ZEPHERETTI. Mr. Speaker, I make a point of order against the amendment in the nature of a substitute.

The SPEAKER. The gentleman will state his point of order.

Mr. ZEPHERETTI. Mr. Speaker, I make a point of order that the amendment in the nature of a substitute offered by the gentleman from Mississippi (Mr. LOTT) is not germane to House Resolution 560, the rule providing for the consideration of H.R. 6957, the bill making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies.

□ 1140

Under the rules of the House and the precedents by which we are guided it is not in order to amend an order of business resolution or, as we commonly refer to it, a rule, to accomplish by indirect means that which may not be achieved by direct means.

In other words, it is not in order to amend a rule to allow the offering of an amendment to a bill or resolution which otherwise would not be germane.

Mr. Speaker, the Broyhill-Levitas amendment provides legislative veto over certain FTC regulations and would provide expedited procedures in the House and an accelerated discharge petition procedure.

Mr. Speaker, this amendment amends the rules of the House and is clearly within the jurisdiction of the Rules Committee and not germane to this bill.

The Chair has very clearly set out this principle. Most recently on May 29, 1980, the Chair sustained a point of order which was made against the offering of an amendment to House Resolution 682 providing for the consideration of H.R. 7428, the temporary extension of the debt limit.

In that instance an amendment to the rule was offered to allow an oil import fee amendment to be offered to the debt limit bill.

The amendment obviously was not germane to the bill and the Chair ruled that an amendment to the resolution making it in order also would not be germane.

The substitute amendment to the rule offered by the gentleman from Mississippi (Mr. LOTT) would make in order amendments to H.R. 6957 which are not germane to the bill and, therefore, clearly would not be germane to House Resolution 560.

The SPEAKER. The Chair recognizes the gentleman from Mississippi, (Mr. LOTT).

Mr. LOTT. Mr. Speaker, I would like to be heard in opposition to the point of order.

Mr. Speaker, for the life of me I do not quite understand why there is the continuing effort here to thwart the efforts to get a vote on the will of the House on this FTC issue.

The point of order has been made on this substitute rule saying it is not germane to the original rule.

The test of germaneness, though, is whether an amendment addresses the same purpose as that which seeks to amend the purpose of the House Resolution 560, and that purpose is to waive certain points of order against numerous provisions of the bill, H.R. 6957; namely, either legislative provision or unauthorized programs or agencies.

This substitute rule only makes one minimal change at the end of the rule which was read. It makes in order two amendments printed in yesterday's RECORD and waives all points of order against those amendments.

The purpose of this substitute is, therefore, the same as the purpose of the original rule, to waive points of

order against certain legislative provisions.

I do not think it will do any good to claim that this rule is nongermane because one of the amendments goes to the jurisdiction of another committee, since all of the legislative provisions go to the jurisdiction of a number of other legislative committees and that is the purpose of the rule originally offered and my substitute.

It is germane, Mr. Speaker, and I would urge that the Chair overrule the point of order that has been made by the gentleman from New York (Mr. ZEPERETTI).

The SPEAKER. Is there any other discussion on the point of order?

The Chair is ready to rule.

The gentleman from New York (Mr. ZEPERETTI) makes the point of order that the amendment offered by the gentleman from Mississippi (Mr. LOTT) to House Resolution 560 is not germane to that special order as reported from the Committee on Rules. Specifically, House Resolution 560 waives certain points of order against H.R. 6957, the Commerce, Justice, State, and Judiciary appropriation bill for fiscal 1983, because the report on that bill has not been available for 3 days and because certain provisions in that bill are unauthorized by law or contain changes in existing law in violation of clause 2, rule XXI. Nothing in that special order waives points of order against nongermane amendments which might be offered to the bill.

The precedents of the House on page 492 of the House Rules and Manual indicate that a resolution reported from the Committee on Rules providing for consideration of a bill relating to a certain subject may not be amended by an amendment which would permit the additional consideration of a nongermane amendment to the bill. In the opinion of the Chair, the amendment to be made in order not only constitutes legislation on an appropriation bill but would be nongermane if offered to H.R. 6957. Nothing in that general appropriation bill amends the rules of the House, and the amendment which would be made in order provides a privileged procedure for expedited review of FTC regulations, and constitutes a change in the rules of the House. The precedents indicate that such rules changes are not germane to a bill not containing rules changes. P. 506—House rules and Manual. Although the procedures contained in the amendment are the same as those currently contained in the FTC Improvement Act of 1980 with respect to congressional review, section 21 of that act ceases to be effective after September 30, 1982. The amendment would, therefore, constitute a change in law for fiscal 1983. The Chair rules that the amendment is not germane to House Resolution 560 and sustains the point of order.

Mr. LOTT. Mr. Speaker, in view of the ruling of the Chair, I have a substitute rule at the desk.

PREFERENTIAL MOTION OFFERED BY MR. ZEPERETTI

Mr. ZEPERETTI. Mr. Speaker, I offer a preferential motion.

PARLIAMENTARY INQUIRY

Mr. LOTT. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. LOTT. Mr. Speaker, should not the substitute rule be read first, before the preferential motion?

The SPEAKER. A preferential motion to refer takes precedence over the motion to amend, as ascertained by the Chair's inquiry "for what purpose did the gentleman rise?"

The Clerk will report the preferential motion.

The Clerk read as follows:

Mr. ZEPERETTI moves to refer House Resolution 560 to the Committee on Rules.

MOTION TO TABLE

Mr. LOTT. Mr. Speaker, I have a motion to table at the desk.

The SPEAKER. The Clerk will report the motion.

The Clerk read as follows:

Mr. LOTT moves to lay on the table the motion to refer.

The SPEAKER. The question is on the motion to lay on the table offered by the gentleman from Mississippi (Mr. LOTT).

The question was taken; and the Speaker announced that the yeas appeared to have it.

Mr. LOTT. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 173, nays 179, not voting 82, as follows:

Mr. JENKINS changed his vote from "yea" to "nay."

Mr. GILMAN changed his vote from "nay" to "yea."

So the motion to table was rejected.

The result of the vote was announced as above recorded.

PARLIAMENTARY INQUIRY

Mr. LOTT. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. LOTT. Mr. Speaker on the previous question would it be in order, if the previous question is defeated, to have a motion to recommit with instructions to the Rules Committee to report back a rule with the amendments in order that have been defeated here today on the FTC legislative veto and the agriculture cooperatives matters?

A motion to refer with instructions, Mr. Speaker, is what I am referring to.

If that is the case, Mr. Speaker, I would urge my colleagues to vote "no" on the previous question.

The SPEAKER. The Chair could not anticipate what the motion to instruct would be and consequently he cannot rule on such an inquiry until such time as he saw the motion.

Mr. LOTT. Mr. Speaker, if I could inquire further on a parliamentary inquiry, would instructions be in order if the previous question is defeated on the motion to refer back to the Rules Committee?

The SPEAKER. The Chair would advise the gentleman if a proper motion to recommit with instructions were offered, the answer is "Yes."

The Chair cannot rule that all such motions would be in order.

Mr. LOTT. Mr. Speaker, I would urge my colleagues to vote "no" on the previous question then so we can have instructions on the motion to refer to the Rules Committee.

Mr. ZEFERETTI. Mr. Speaker, I want to make sure my colleagues know we are going to vote "aye" on the previous question so we can continue the process.

Mr. Speaker, I move the previous question on the preferential motion.

The SPEAKER. The question is on ordering the previous question.

The question was taken; and the Speaker announced that the ayes appeared to have it.

RECORDED VOTE

Mr. LOTT. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—ayes 183, noes 170, not voting 81, as follows:

[Roll No. 279]

□ 1220

So the previous question was ordered.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the preferential motion offered by the gentleman from New York (Mr. ZEFERETTI).

The preferential motion was agreed to.

A motion to reconsider was laid on the table.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 6863, SUPPLEMENTAL APPROPRIATIONS, 1982

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill (H.R. 6863), making supplemental appropriations for the fiscal year ending September 30, 1982, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair would like to make the following statement:

One of the Members, a respected member of the Republican Party, thought that I denied him the opportunity on the vote previous to the last vote of having the ability to change his vote. He thought it was an extremely fast gavel.

Let me say to the Member, I want to apologize if such a thing happened. I did not see him. Even though the vote would be against my principles, or the vote would be against my philosophy, I would never deny a man the opportunity of voting in this well.

So the Member, if he feels that way, I apologize to him. I just did not see the gentleman.

APPOINTMENT OF CONFEREES ON S. 2036, JOB TRAINING PROGRAM

Mr. PERKINS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 2036) providing for State and local employment and training assistance, insist on the House amendments thereto, agree to a conference with the Senate, and ask that the Chair be authorized to appoint conferees on the part of the House.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

Mr. LOTT. Mr. Speaker, reserving the right to object, the gentleman from Kentucky is asking for a late filing?

The SPEAKER. The gentleman is asking for a conference committee.

Mr. LOTT. A conference committee? It is on the CETA bill?

The SPEAKER. The gentleman is correct.

Mr. LOTT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky (Mr. PERKINS)?

Mr. SOLOMON. Mr. Speaker, reserving the right to object, and I will not object, but I wanted to call to the

attention of the gentleman from Kentucky that I would be offering a motion to instruct the conferees as soon as the objection is cleared up.

Mr. PERKINS. Mr. Speaker, will the gentleman yield?

Mr. SOLOMON. I yield to the gentleman from Kentucky.

Mr. PERKINS. I thank the gentleman for yielding.

Mr. Speaker, let me state that I think his motion would be premature before we ever go to conference. I do not know just how the House conferees will feel, but he will have ample time in the future. We would like to get by without an instruction here and will try to resolve the gentleman's problem, if we are afforded that opportunity, before he instructs us.

Mr. SOLOMON. Further reserving the right to object, Mr. Speaker, the gentleman from Kentucky knows that this amendment passed by a voice vote in this House. A similar amendment passed, dealing with draft registration and student loans and grants, by an overwhelming majority, more than a 3-to-1 vote, and we have reason to believe that the Senate is going to accept this legislation, but there are those who are going to be appointed as conferees who are going to be opposing it.

I think it is a terribly important issue. Therefore, I would like to offer it now.

Mr. PERKINS. Mr. Speaker, if the gentleman wants to offer it, he has that right, but I think that he is jumping the gun. The conferees may want to accept this amendment, but I would like to discuss it with the conferees before he offers his motion to instruct us.

Mr. SOLOMON. Mr. Speaker, further reserving the right to object, is it the gentleman's opinion that I would have the opportunity to offer this motion at a later time?

Mr. PERKINS. If the gentleman will yield further, Mr. Speaker, absolutely, he will have that right.

Mr. SOLOMON. The gentleman can assure me of that?

Mr. PERKINS. Mr. Speaker, I can assure him of that. I can assure him of that. I have been instructed, with the conference going on for weeks and weeks and weeks—

PARLIAMENTARY INQUIRY

Mr. SOLOMON. Mr. Speaker, further reserving the right to object, if I may, while I am further objecting, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. SOLOMON. As I understand it, the rules would not allow me to offer this at a future time, which is why I am doing it now, unless the conference goes for more than 20 days.

The SPEAKER. If the House has a motion to recommit, the gentleman could offer it at that time or after 20 days.

Mr. SOLOMON. Mr. Speaker, I do not want to recommit. I think it is a terribly important piece of legislation. I think the amendment is terribly important and, therefore, I think everybody on this floor understands the issue, and with all due respect to the chairman, I would like to offer it at the appropriate time.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky (Mr. PERKINS)?

There was no objection.

MOTION TO INSTRUCT OFFERED BY MR. SOLOMON

Mr. SOLOMON. Mr. Speaker, I offer a motion to instruct conferees.

The Clerk read as follows:

Mr. SOLOMON, of New York, moves that the managers on the part of the House, at the conference on the disagreeing votes of the two Houses on the bill S. 2036, be instructed to agree to the following provision of the bill:

TITLE VI—ENFORCEMENT OF MILITARY SELECTIVE SERVICE ACT

ELIGIBILITY FOR PARTICIPATION AND ASSISTANCE

SEC. 601. The Secretary shall insure that each individual participating in any program established under this Act, or receiving any assistance or benefit under this Act, has not violated section 3 of the Military Selective Service Act (50 U.S.C. App. 453) by not presenting and submitting to registration as required pursuant to such section. The Director of the Selective Service System shall cooperate with the Secretary in carrying out this section.

The SPEAKER. Does the gentleman wish to debate the motion?

Mr. SOLOMON. Mr. Speaker, I would just like the time allocated in case other Members wish to debate. I do not intend to take more than 1 minute.

The SPEAKER. The gentleman from New York (Mr. SOLOMON) is recognized for 1 hour.

Mr. SOLOMON. I thank the Speaker.

Mr. Speaker, I will not use anywhere near that time. I just want to point out that this is the amendment which prohibits those who are in violation of the Draft Registration Act from participating or being eligible for the jobs training program.

This amendment passed by a voice vote in this House when the legislation passed; a similar amendment passed dealing with grants and loans to college students by an overwhelming vote, and unless there is requested time from that side of the aisle—is there, Mr. Chairman?

I yield to the gentleman from Kentucky.

Mr. PERKINS. Mr. Speaker, first let me state that during my tenure in the House there have been very few occasions that I have heard a motion to instruct conferees before the conferees are appointed.

The gentleman from California (Mr. HAWKINS) is not here today. He is

chairman of this subcommittee. He is not on the floor.

The gentleman from Illinois (Mr. ERLBORN) is not on the floor.

I think the conferees should have the right to go to conference, and if at a later date, if it is necessary that this motion be offered, the gentleman will have that right. But at this time I feel that it is untimely, unwise, and ties the hands of the conferees.

We have always tried to act fairly and to uphold what the House has done, and I would hope that this motion at this time would be voted down.

Mr. RHODES. Mr. Speaker, will the gentleman yield to me?

Mr. SOLOMON. I yield to the honorable gentleman from Arizona (Mr. RHODES) for purposes of debate only.

Mr. RHODES. I thank the gentleman for yielding.

Mr. Speaker, the thought occurs to me that before the motion to go to conference was brought to the floor, the ranking minority members of the Committee on Education and Labor and its subcommittee should have been notified and should have been given the opportunity to be on the floor.

□ 1230

I think the gentleman's motion is absolutely timely considering the fact that the matter was brought up. I suggest to my good friend from Kentucky that if indeed he feels that the presence of other Members is necessary before the debate on the gentleman's motion, that it might be good policy to withdraw his motion to go to conference until such time as they can be here.

Mr. SOLOMON. I thank the gentleman for his remarks. I would be most willing to withdraw the motion if the gentleman would withdraw his motion, and I would be glad to take it up later. I have been trying to get hold of Mr. HAWKINS and Mr. ERLBORN and others. They were not on the floor earlier.

Mr. PERKINS. Mr. Speaker, will the gentleman yield?

Mr. SOLOMON. I yield to the gentleman from Kentucky for debate purposes only.

Mr. PERKINS. Let me say in response to the Speaker that I have never made a motion of this type and then withdrawn it. I want the Speaker to rule. I certainly do not feel that I should withdraw the motion at this time. We want to go to conference. We want to do the right thing, and we certainly do not want to have our hands tied.

Mr. SOLOMON. If I may reclaim my time, Mr. Speaker, I know that there is a lot of pressure that many Members have to catch planes. We all know this issue. This motion is to instruct the conferees on the amendment that

overwhelmingly passed this House by a voice vote, and was passed on different legislation, on the student aid loan legislation, which simply prohibits anyone who is in violation of the Draft Registration Act from being eligible. It sets a requirement as we did in the other legislation, from being eligible to participate in this program.

Mr. PERKINS. Mr. Speaker, will the gentleman yield further?

Mr. SOLOMON. I yield to the gentleman for debate purposes only.

Mr. PERKINS. Let me state that I know the gentleman's amendment is very popular among all the Members of this Chamber. I think we are all aware of that. But, I cannot see any reason, unless it is for publicity purposes, for a motion of this type being made at this time. I would still hope that the gentleman would withdraw this motion and let the conferees go to conference.

Mr. SOLOMON. I have a great deal of respect for the chairman, but I will tell him, this matter is so important, and it is going to do a favor for these young men who are not aware that they have to register. I do not want to see them saddled with a felony conviction for the rest of their lives. We are doing them a favor by passing this legislation.

Mr. Speaker, I move the previous question on the motion to instruct.

The previous question was ordered.

The SPEAKER. The question is on the motion to instruct offered by the gentleman from New York (Mr. SOLOMON).

The motion was agreed to.

The SPEAKER. The Chair appoints the following conferees: Messrs. PERKINS, HAWKINS, FORD of Michigan, CLAY, BIAGGI, SIMON, WEISS, CORRADA, WASHINGTON, ERLBORN, JEFFORDS, and PETRI, Mrs. FENWICK and Mr. DENARDIS.

PERMISSION TO HAVE UNTIL NOON, MONDAY, AUGUST 16, 1982, TO FILE CONFERENCE REPORT ON H.R. 6955, OMNIBUS RECONCILIATION ACT OF 1982

Mr. JONES of Oklahoma. Mr. Speaker, I ask unanimous consent that the conferees on the bill (H.R. 6955) to provide for reconciliation pursuant to the first concurrent resolution on the budget for fiscal year 1983 (S. Con. Res. 92, 97th Cong.), have until noon on Monday, August 16, 1982, to file a conference report.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. LOTT asked and was given permission to address the House for 1 minute.)

Mr. LOTT. Mr. Speaker, I take this time for the purpose of receiving the legislative schedule for the balance of today and next week. I am pleased to yield to the distinguished majority leader.

Mr. WRIGHT. Mr. Speaker, I thank the gentleman for yielding.

This concludes the legislative business for the day and for the week. Members may expect confidently to catch their planes, if that is their desire.

I will ask unanimous consent that we come in at 10 o'clock on Tuesday.

On Monday, we will have 11 bills under suspension of the rules. They are as follows:

H.R. 6188, Platte River water resource studies;

H.R. 5536, feasibility studies, Central Platte Valley, Nebr.;

H.R. 6162, NTIA (National Telecommunications and Information Administration) authorizations, fiscal years 1983 and 1984;

H.R. 5008, Communications Technical Amendments Act of 1982;

H.R. 6954, National Security Act amendments re JCS;

H.R. 6222, adjust Federal Reserve requirements;

H.R. 6732, International Safe Container Act;

H.R. 1489, Puerto Rican passenger vessels;

H.R. 4828, surplus vessels for humanitarian purposes;

H.R. 5618, Organic Farming Act; and S. 1894, Indian tribe mineral resources.

We will have general debate only on the following two bills, on which the rules are already adopted:

H.R. 6323, EPA research authorization; and

H.R. 6324, NOAA (Oceans and Atmosphere) authorizations.

We will have no votes on Monday.

On Tuesday, we will ask to come in at 10 o'clock. We will have the Private Calendar, followed by any votes on whatever suspensions may have been required from the day before. Members should be aware that we may take the conference report on the budget reconciliation, the conference report on the 1982 Tax Act and/or the supplemental appropriations conference report sometime next week. We are not certain, but it is conceivable that we may have those.

Mr. LOTT. Mr. Speaker, I would like to get a clear understanding for the Members that are here as far as this schedule for the rest of the day. Did I understand the gentleman to indicate that there would not be any further business?

Mr. WRIGHT. The gentleman is correct.

Mr. LOTT. I thank the gentleman for that clarification, and I yield further to the gentleman.

Mr. WRIGHT. For the balance of the week we will consider the following bills:

H.R. 6956, HUD appropriations, fiscal year 1983;

H.R. 6957, State-Justice, appropriations, fiscal year 1983;

H.R. 6986, military construction appropriations, fiscal year 1983;

H.R. 6755, Central American Economic Revitalization Act of 1982; open rule, 1 hour;

H.R. 5540, Defense Production Act; open rule, 1½ hours;

H.R. 6323, EPA research authorization; complete consideration;

H.R. 6324, NOAA (oceans and atmosphere) authorization; complete consideration;

H.R. 5831, consolidated farm and rural development; open rule, 1 hour, rule already adopted; and

H.R. 6307, Resource Conservation and Recovery Reauthorization Act of 1982; open rule, 1 hour.

Adjournment times will be announced daily, and as we have already noted, Members may expect to be in late sessions. At the close of the week's business, the House will adjourn for its summer district work period, and will reconvene at noon on Wednesday, September 8, 1982. Conference reports may be brought up at any time, and any further program will be announced later.

ADJOURNMENT TO MONDAY, AUGUST 16, 1982

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at noon on Monday next.

The SPEAKER pro tempore (Mr. MURTHA). Is there objection to the request of the gentleman from Texas?

There was no objection.

HOUSE OF MEETING ON TUESDAY, AUGUST 17, 1982

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House meets on Tuesday, it meet at 10 a.m.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY ON WEDNESDAY NEXT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule, be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. WALKER. Mr. Speaker, reserving the right to object, I do so to ask the majority leader whether or not there is any chance of taking up the regulatory reform bill next week. I did not hear this mentioned as a part of the schedule, and that has been something which has been discussed on regular occasions. Is that at all contemplated?

Mr. WRIGHT. The gentleman is correct. It was not mentioned. It has been discussed on numerous occasions, and it is not contemplated for next week.

Mr. WALKER. If we do not take it up next week, of course the House would be going into recess, and there would be no chance of getting into that until sometime in September at the very earliest?

Mr. WRIGHT. The gentleman is correct also.

Mr. WALKER. That concerns me a great deal, because that is the one that has been around since February.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. LOTT. Mr. Speaker, I would like to reemphasize again that we will be coming in at 10 o'clock on Tuesday and the balance of the week. Members need to be aware of that, and it will include probably Friday.

Mr. WRIGHT. The gentleman is absolutely correct. We had initially scheduled the home district work period at the close of business on Thursday. We cannot be absolutely certain of that. We are attempting and hope to achieve that goal, but Members should expect to come in earlier and probably stay late on Tuesday, Wednesday, and Thursday.

Mr. LOTT. Does that include the possibility of a Friday session?

Mr. WRIGHT. That is exactly what I was trying to address. The possibility must always be held open. We hope to be able to conclude business on Thursday as planned in order that at the close of business on Thursday we may begin our home district work period, but it is conceivable, because of the urgency of some piece of legislation incapable of being completed on Thursday, that we might have a Friday session. I do not expect one. We do not plan one. Members, however, should be on notice that there will be long sessions beginning at 10 o'clock on Tuesday, Wednesday, and Thursday, and quite possibly going late on those 3 days.

No votes are planned on Monday.

Mr. LOTT. I thank the gentleman.

WITHDRAWAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 6467, PROFESSIONAL SPORTS STABILIZATION ACT OF 1982

Mr. MITCHELL of Maryland. Mr. Speaker, I respectfully ask unanimous consent that my name be withdrawn from cosponsorship of H.R. 6467, Professional Sports Stabilization Act of 1982, sponsored by Congressman Don Edwards.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

WITHDRAWAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 6529, THE JOBS AND BUSINESS OPPORTUNITIES FOR THE HANDICAPPED ACT OF 1982

Mr. MITCHELL of Maryland. Mr. Speaker, I respectfully ask unanimous consent that my name be withdrawn from cosponsorship of H.R. 6529, the Jobs and Business Opportunities for the Handicapped Act of 1982, sponsored by Congressman BARRY M. GOLDWATER, JR.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

TRIBUTE TO HENRY FONDA

(Mr. DAUB asked and was given permission to address the House for 1 minute.)

Mr. DAUB. Mr. Speaker, in 1925, at a small community playhouse in Omaha, Nebr., a young actor began a career that would span over five decades and win him the love and respect of the American people. That actor was Henry Fonda who passed away yesterday at the age of 77.

In both his personal life and the roles he played, Henry Fonda taught us life's lessons—lessons of moral strength and of justice, of caring and of courage.

We in Nebraska are particularly proud of our native son—and particularly grateful to Henry Fonda. Throughout his life he stayed in close touch with his family and friends in Omaha and gave his support to our local theater groups. His family has asked that memorial contributions be made to the Henry Fonda Memorial Wing of the Omaha Community Playhouse where his career began.

Our American heritage is rich because of the contributions of great men and women. Henry Fonda epitomized the American character and became an integral part of this heritage. We will always remember him, and because his unparalleled career is captured on over 80 films, generations of Americans after us will remember him as well. Henry Fonda is a part of America—and always will be.

□ 1240

A TRIBUTE TO THE LATE HENRY FONDA

(Mr. CLAUSEN asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. CLAUSEN. Mr. Speaker, I want to associate myself with the remarks that were just made by the gentleman

from Omaha, Nebr. (Mr. DAUB) in tribute to the deceased Henry Fonda.

Mr. Speaker, it is with great sadness that I join with my colleagues to mark the passing of an actor, who, like no one else before him, captured the spirit of America and the aspects of the American character that we prize the most—rugged individualism, courage, and steadfast adherence to one's principles no matter what the challenge. That actor was Henry Jaynes Fonda, who died at the age of 77 yesterday in Los Angeles, Calif.

From childhood, throughout my youth, and during my later years, I have witnessed this man's dedication to the work he so loved. Whatever the role he played, whether outlaw or hero, he played it with spirit, and yet with such studious care that the public tended to transfer the attributes of his roles to his personal character. Perhaps there is a message for all of us in this dedication of his—whatever we are called to do, let us strive to do it well.

Acting did not come easily to Henry Fonda—he was by nature shy and retiring, an essentially private man. Usually we think of actors as extroverts. It was the mother of another famous actor, Marlon Brando, who persuaded young Henry to try his hand at what was to become his life's work.

Born on May 16, 1905, in Grand Island, Nebr., Henry Fonda's acting career began in Omaha, where in 1925 he played in Philip Barry's "You and I" at the Omaha Community Playhouse. It ended, appropriately enough, with his capture of an Academy Award for best actor of the year for his role in "On Golden Pond," in which he starred with Katharine Hepburn. In the 56 years of his career, he made an indelible impression on the heart of the people of this country with his roles in such classic American films as "Drums Along the Mohawk" (1939), "The Grapes of Wrath" (1940), based on John Steinbeck's novel, "My Darling Clementine" (1946), "The Ox-Bow Incident" (1943), and "Fort Apache," among others. In 1978, the American Film Institute gave him its Life Achievement Award and in 1979 he was honored by the Kennedy Center in Washington.

Mr. Speaker, it is with great honor and respect that we mark the passing of Henry Jaynes Fonda. No words can fully express the emptiness we all feel and the void which he has left. Our prayers go out to his family, for we know what a loss they have suffered and pray that God will give them strength.

GOVERNING INTERNATIONAL FISHERY AGREEMENT BETWEEN THE UNITED STATES AND SPAIN—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. 97-227)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Merchant Marine and Fisheries and ordered to be printed:

(For message, see proceedings of the Senate of today, Friday, August 13, 1982.)

SOCIAL SECURITY: LET US SET THE RECORD STRAIGHT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. SMITH) is recognized for 10 minutes.

Mr. SMITH of New Jersey. Mr. Speaker, it is indeed unfortunate that the American people have been subjected to an overabundance of misinformation and political demagoguery about the program that directly affects the lives of more citizens than any other program—social security.

We have seen bumper stickers that politicize the issue, mailings by a congressional campaign committee that advocate sending money to a particular political party in order to save social security, a traveling political road show by a prominent Member of the House, and television commercials with charges and countercharges about who is really proposing to cut social security.

Mr. Speaker, it is a matter of record that I did not agree with the social security changes that were proposed by the Reagan administration last year. However, I was very distressed when I learned that the House leadership told Social Security Subcommittee Chairman JAKE PICKLE, a Member for whom I have great respect, to cease holding meetings on the social security issue. For several weeks, Chairman PICKLE had been working cooperatively to develop a bipartisan plan so that social security benefits would not be interrupted. The rug was pulled out from under the chairman and his subcommittee for what can only be described as political reasons.

We have also heard a great deal of self-righteous political rhetoric about the administration-backed budget which passed last year. It is interesting to note that those who attack that budget rarely, if ever, refer to the changes in social security benefits that were proposed on the other side of the aisle by the House Budget Committee. That budget package proposed to:

Phase out the minimum benefit after 1982; phase out college student

benefits after 1982; eliminate summer student benefits and COLA for student benefits; terminate parent's survivor benefits for those with children over 16; round benefits to the lower dime; to reimburse the Social Security Administration for documents; and to pay benefits only if eligible on the first of the month.

Another major provision that was included in the Budget Committee proposal—but not the administration-backed bill—would have delayed half of the 1982 cost-of-living adjustment from July 1982 to October 1982. If the committee's bill had passed, social security recipients would have received only half of the cost-of-living adjustment they actually received on July 1, 1982.

Mr. Speaker, it is also important to note that major social security benefit reductions that were enacted under the Carter administration in 1977 are just now taking effect. The Senate Finance Committee has calculated that the average beneficiary retiring this year at age 65 will realize a \$130 per month reduction in benefits, or more than a \$5,000 reduction over the next 3 years because of the Carter amendments.

The 1977 social security amendments also provided for a reduction in social security benefits to a dependent spouse by the amount of any Federal, State, or local civil service pension received by that spouse and established a 5-year period for implementing the benefit cuts. In addition, this 1977 legislation froze the level of the minimum benefit at the 1978 level.

Furthermore Mr. Speaker, my caseworkers and I have been hearing from a large number of my constituents who have had their social security disability benefits terminated as a result of eligibility reviews that were mandated by the Social Security Amendments of 1980. This legislation, I point out to my colleagues, was signed into law by former President Carter, a year before I took office.

Mr. Speaker, in order to alleviate the serious hardships that these people have been experiencing as a result of the Social Security Administration's abrupt termination of their disability benefits, I have cosponsored legislation that is designed to correct this serious problem. Mr. Speaker, I hope you will use your influence to see that this legislation is reported from committee in a manner that provides for an equitable appeal process. Furthermore, let us hope that this will be done at the earliest possible date.

Finally, Mr. Speaker, the bipartisan National Commission on Social Security Reform is currently meeting in an effort to reach a consensus on the best means to provide for the short-term and long-term solvency of the social security system. Let us put partisan

politics aside and make a sincere and concerted effort to do what is best for the American people while not cutting social security benefits.

THE PENDING RESOLUTION OF IMPEACHMENT OF THE CHAIRMAN OF THE FEDERAL RESERVE BOARD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 60 minutes.

Mr. GONZALEZ. Mr. Speaker, I rise to continue yesterday's presentation, and first I would point out that in today's RECORD, that is, yesterday's record of proceedings, I included for the first time the report that I had not been able to get. In fact, I did not even know it had been pursued and had been made available until fairly recently. I was finally able to get a copy of it, and it is included in today's RECORD, that is, in the record of the proceedings of August 12, specifically last night, when I continued my discussion on my pending resolution of impeachment of Paul Volcker, the Chairman of the Federal Reserve Board, and the two bills calling for a revision of the 1913 Federal Reserve Act in order to bring this powerful, runaway monopoly under the control of people. I would like to see control brought back to the people, at least as far as feasible, although, as I said last night, I think time is on us; it is just too late. I feel that there is no way we can reverse the course that seems to be inexorably leading us to national bankruptcy and economic prostration.

□ 1250

In this report, which the record has a complete copy to the report except for the appendixes to the report, that report has some of what the special counsel that was hired referred to as documentary supporting evidentiary facts to the course of their investigation.

I want to point out that in that report, to show you how self-serving these inquiries have been and how even in the guise of a report the Federal Reserve does not render an accounting to the Congress. I explained last night that before 1979, to be exact, when the Chairman of the Board was Mr. Arthur Burns, around about 1976 I became aware of what was apparent to me, a leak from the so-called Open Market Committee of the Federal Reserve, which, as I explained last night, it is not open, it is secret. Usually the actions and decisions made are so sensitive that they must be maintained in secret.

Once this anomaly known as the Open Market Committee was created in 1923 the control over the destiny of this country's economic, financial, fiscal, and monetary well-being and

policies left the people, left the Government, left the Presidency, left the Congress, and went to the hands of the bankers who now, as I said last night, have complete control of our destinies to the point where such grievous decisions as war or peace are being decided by these elements.

I became aware of the leak because of the sudden thrust of some financial decisions in New York and that looked to me as if they were made only on the basis of information that had been leaked out in time for one or two of these financial interests, these big banks like the Manufacturers Hanover Trust, to make a big killing; that is, a tremendous windfall of improper profit at the cost of the financial stability of the Nation's financial system.

So in this report, and I am now referring to the printed record today, the special counsel that was hired by the Federal Reserve Board after 1979 and after I finally got this matter before the attention of the proper committee, which I belong to, in 1976 when I first learned of that first leak I could not get anybody interested.

But I did raise speculation that caused the gentleman that was ostensibly responsible for the leak to find himself having to explain to some reporters, but who never printed the story, and then went back to his home place in Philadelphia and died. So that ended the matter. I could not do much.

But when the second leak was obvious, by then Mr. Paul Volcker had become Chairman of the Board. It was obvious to me that the same thing had happened.

This time I was able to get some interest and finally the special counsel's report indicates, and I am going to read from it in order to give you the history of it—incidentally, the special counsel was the lawyer from the law firm of Fulbright and Jaworski. In other words, only after pressure from the committee did the Board decide to get an outside counsel to get into the matter.

I am going to read now this history. The special counsel says in his introduction of this report on page 20792 of the CONGRESSIONAL RECORD for the House of August 12, and I quote:

On October 29, 1979, Vice Chairman Frederick H. Schultz and Governor J. Charles Partee of the Board testified before the Committee on Banking, Finance and Urban Affairs of the United States House of Representatives—

That is the one I belong to and have belonged to for 21 years almost, otherwise known as the House Banking Committee—

concerning these revisions.

This is what they called the leaks:

Members of the House Banking Committee expressed concern with the possibility that the underlying errors . . .

And these, again, are a description of the leaks—

had been the result of some plan or scheme or that the institutions involved, or persons connected with those institutions, had used their knowledge of the errors for financial gain. The chairman of the committee requested that the Board conduct an investigation to determine if any institution or individual had improperly profited from these errors. Vice Chairman Schultz stated that the Board would do so.

On November 6, 1979, the Board and the New York Fed engaged Alan B. Levenson of the law firm of Fulbright and Jaworski as special counsel to conduct an inquiry to determine whether any institution or individual, including Manufacturers . . .

Meaning Manufacturers Hanover Trust—

and persons connected with Manufacturers, the Board or the New York Fed, improperly and knowingly profited from the preparation and release of erroneous money supply data during October 1979. Mr. Levenson was directed to make a complete inquiry into the facts of the matter and to prepare a report on the results of the inquiry. He was authorized to select other persons in Fulbright and Jaworski to assist in the inquiry and to retain the services of a public accounting firm and other experts if deemed necessary. Mr. Levenson and the other persons in Fulbright and Jaworski who assisted in this inquiry are collectively referred to as "Special Counsel."

Mind you, this was done only after we had raised speculation and finally got some of the colleagues to exert a little bit of pressure and make a request. Lo and behold, one of the few times that the Federal Reserve acceded to it and they said, "OK, we will conduct an inquiry."

But we did not even have available this report. I had to dig and dig and dig and finally just a few weeks ago I got my hands on it.

But you read the report, and it is printed here in the RECORD for the citizenry to see. I defy anybody, lawyer or not, to define this as anything but the most nervy whitewashing of any kind of an inquiry I have ever known of and particularly on these high levels of Government.

□ 1300

It was obvious from the very beginning, since the Feds apparently do not have an Inspector General. We do not know. The Congress does not have control. It cannot even send the General Accounting Office over there and examine, like it does any other Federal agency. But not the Feds. They are independent. Even though they are creatures of the Congress. The overwhelming number of Americans I have talked to and Members of the Congress do not seem to know that. They are under the impression that the Federal Reserve Board is an autonomous, independent, free-wheeling agency of the Government.

Mr. HANCE. Mr. Speaker, will the gentleman yield?

Mr. GONZALEZ. I yield to the gentleman from Texas.

Mr. HANCE. It is very interesting, what the gentleman is saying, and I find that very true with the public. They think that the Federal Reserve Board reports to Congress, that they are under our control. And yet when you talk to the people who are strong supporters of the Fed, they say, "Well, we want them to remain independent."

My question always is: Independent of whom? Should they be independent of the Congress? Should they be independent of the public? I say that they should not be.

If you look at the present state of the economy right now, with unemployment being as high as it is, you can go back to October 1979, and look at the present problem, because they started changing their policies at that time, setting the interest rates not by the discount rate, which had been done in the past, but by doing it through the so-called supply of the money, when they did not even know exactly what money was.

It carried President Carter into a recession in the 1980's. They let up briefly at one time, and they got President Reagan into a recession. Last year the tax cut was designed to stimulate the economy. But it is not going to do so when interest rates are running 15 to 20 percent.

Mr. GONZALEZ. No way.

Mr. HANCE. There is no business in this country that can continue for a long period of time paying 15 to 20 percent off the top and continue in business.

I think that the time has come for us to look at the makeup of the Federal Reserve Board and bring them under control of Congress, that we do not need to be giving our rights away to some other agency, to let them be independent of the elected officials. We are the ones who are elected by the people in our districts. We have taken an oath of office. We are held accountable. Those people should be held accountable.

I think the gentleman is exactly right, in that the general public has no idea that these people are completely running loose on their own. The people think they are under the control of Congress, and they are not.

I applaud the gentleman for bringing this to the attention of the Congress and the attention the gentleman has been bringing on this issue for some time.

Mr. GONZALEZ. I really thank most sincerely my distinguished colleague from Texas. I really thank him for this presentation, even though it saddens me to hear corroboration of what I had suspected as an individual Member, and I really welcome this support.

I have been speaking out for more than 18 years, actually, since Mr. Johnson was President. So it is not anything now that I have any political motivation. But I realize that one man can do so much, and that is it. But the main thing is that I know, and I have faith in the processes. I have faith. The thing that spurs me on is that all of this has not been fair to our country. Our country is a great country. The people are great. They deserve to be by us represented faithfully and truthfully. I think the overwhelming preponderance, if not 100 percent, of our Congresses have been Members who are very diligent. In the very beginning, in the Continental Congress, for instance, the greatest leaders, the Founding Fathers of this country, had to wrestle with this problem. But they were able to control through their integrity and basic commitment to the public interest. But they feared it and said so and spoke out very specifically.

And then subsequent to that, Presidents like Andrew Jackson then very specifically, with finally the National Currency Act of 1865; before that, President Lincoln was very apprehensive. He spoke out almost in the same words that his predecessors had in 1775, 1776, 1777. And then later, Woodrow Wilson, in 1916, very specifically, after the passage of the Federal Reserve Act.

What happened was that what they feared, that is, the loss of control by the people. After all, the Constitution has the most radical words, even today—certainly in 1789. The very first words of the preamble, "We the people of the United States, in order to form a more perfect Union . . ." It does not say, "We the Congress," it does not say, "I the President," it does not say, "We the judiciary." It says, "We the people." That is the sovereign. Where we come from, all power comes from the people. That was revolutionary in a world where all of the power was supposed to be in sovereign kings, who in turn got their sovereignty from God, divine right. That was very startling and revolutionary. Even the French Revolution did not go that far in its battle cry, which was coincidental with the American Revolution.

Even today, it is still revolutionary. But we have lost that, because we have now this superoligarchic combine in our country that has taken over control. The decisions are not being made in Congress. Congress would never have legalized usury. The Feds have.

The idea that in this country we would have a prime rate of 21 percent interest, that today we are supposed to genuflect and thank these mighty, powerful beings because they have gone down to 15½ percent—that is still usury. It is still extortionate.

The gentleman is dead right, I say to my distinguished colleague from

Texas, there is no society, much less ours, predicated on the kind of economy we are, there is no business that can remain alive, like mine are in San Antonio, trying to stay alive, if they have to floor inventory to be able to stay. At 18 percent, 19 percent, 20 percent, how in the world can they stay alive and pay that extortionate rate of interest? No way.

And yet these people have told me, these chairmen, and all, that it is like an act of God. You cannot do anything about it. That is a lot of baloney. It is hogwash. Of course, a lot can be done about it.

In fact, as I pointed out here, something has been done about that since 7,000 years before Jesus Christ, in the reign of Hammurabi. They even had laws against usury. And all through our history. But the idea that this country would be having an economy that is more equated with a lesser developed country, where you have a different economy, there is no such thing as mass production, mass consumption, mass credit availability.

Mr. ANDREWS. Mr. Speaker, will the gentleman yield?

Mr. GONZALEZ. I yield to the gentleman from North Carolina.

Mr. ANDREWS. I am very impressed with what the gentleman says and with his obviously extensive research, reading and study on the subject. And it is a very important one. The one thing that bothers me about what the gentleman is saying is, how can the Federal Reserve be accountable to Congress without the Congress in effect acquiring the authority to tell the Federal Reserve, in effect, what to do? And if that should happen, then do you not in essence cause the Federal Reserve just to become an instrument that would execute the will of Congress, and hence Congress becomes in effect the Federal Reserve, and the authority that the Federal Reserve now has would be bestowed in Congress?

I do not know how you can split the difference. Somebody has to have control.

Mr. GONZALEZ. I understand the gentleman's question and his concern. I think I have a pretty good comprehension. But I think what we have got to remember is the definition of the Federal Reserve. It is a creature of Congress, to begin with. The Congress created it with the passage of the Federal Reserve Act which, incidentally, was the result of a special committee from the House. It could never get to the Senate. After the 1907 terrible panic and depression. And it was called the Pujo committee, named after the then-member of the House and the committee. It was not until 1912 that they finally got that committee. It went into the matter. The same thing happened at that period; that is, you

had restrictions and unyielding credit allocations to this country that was continuing to burgeon and grow.

Our country today, this is why our leaders are failing, because they are assuming our country has reached limits. It is a dynamic country. This country is producing, and its capacity for production has not even been tapped. We proved that during World War II.

But you have to have the engines of credit to go along, especially in an economy such as ours where you have mass production predicated on mass consumption and, in turn—and especially since World War II—mass credit is what I call it, but actually what it is, is consumer credit available. You cannot have it available if you are going to go into extortionate interest rates. But the definition of the Federal Reserve Board is that it is the fiscal agent of the U.S. Treasury.

□ 1310

Now, if it does not account to its principal—after all an agent is an agent for somebody, a principal.

But the Feds have been acting and continue to do as if they do not have to account to anybody, and they do not. They do not account to Presidents. They do not account to the Congress. Certainly we cannot get information. We requested information—and I again was one of those pressuring and yelling until we got them, and the committee requested the Federal Reserve Board to give us the statistics on the number of American banks taken over or heavily infiltrated by Arabian or Middle East oil-producing nations—most of those that had exercised the embargo on us in 1973. To this day, we cannot get it because the Feds came back and said—we wanted it country by country and they said, "No, all we can give you is region by region."

Well, that brings in Turkey and Greece and everybody else.

Now, what happened the other day, to show how prostrate we have become as a result of the absence of the people having protection.

Right at the time of the initial phase of the invasion or rather the penetration of the Israeli forces into Beirut, the Saudi prince called President Reagan and said, "If you don't restrain Israel, we will pull out all our money from your banks and create chaos."

And the President responded within 12 hours.

But we do not know. There is nobody who can tell you. The other day when we had the Chairman of the Feds on a more important matter—what I discussed the night before last, and that is the crisis that is imminent, on our head. Banks are falling over, savings and loans are going out like popcorn in a popper, businesses are

collapsing at a higher rate per week than ever since the Depression, even during the Depression.

Now, I asked the Chairman, I said, "Mr. Chairman, what can you tell us." We had him there on the Penn Square Bank failure in Oklahoma. I asked him, I said, "Can you tell us how many more of these banks are out there in that wild blue banking yonder." And he grinned and he puffed—he has a cigar he always puffs on, and then he shook his head and he said, no, he could not tell us.

I said, "Then how can you come and tell us that you have solidity in the resources available to avoid a crisis when all the Federal Deposit Insurance Agency has is no more than \$15 billion to try to cover \$1 trillion of insured deposits."

Now, who is kidding who?

The savings and loan deposit insurance—rather insurance corporation, it has no more than about \$6 billion to cover, well, about 20 times that amount. So that is what we are talking about? Naturally they have limits. I said the Federal Reserve is not unlimited because you have now converted the Federal Reserve into a giant bank of Sark. This was this great scheme, on this Island of Sark, near England, in which all they had was a computer device there taking these flight capitals, and they finally speculated and it collapsed with great impairment to the banking system and lost the money of many innocent people.

All this the Feds have brought us because of the lack of accountability, they do not have to come and account for the decisions.

Congress never intended that when it passed the Federal Reserve Act. But through certain functions and appendages, and then also some sleeper clauses in some legislation, we have ended up where we are the only nation that conducts our monetary and fiscal policies this way. We are the only nation that handles its money matters—

Mr. DORGAN of North Dakota. Mr. Speaker, will the gentleman yield?

Mr. GONZALEZ. I yield to the gentleman from North Dakota.

Mr. DORGAN of North Dakota. Mr. Speaker, I do not mean to interrupt the gentleman's presentation, but I want to say that the gentleman has been consistent in his criticism of the Federal Reserve Board over the months and the years. I appreciate that because there are far too few Members of Congress who are interested in taking a whack at this issue of monetary policy.

We get mired down in questions of fiscal policy and tend to forget monetary policy. We leave that to the Federal Reserve.

As the gentleman points out, the Federal Reserve has in its palm about half of the economic game plan in this

country. Half of the economic plan is controlled by people who are not elected by or accountable to anyone.

I know the gentleman has a resolution to impeach Paul Volcker. I do not think he should be impeached. I think Paul Volcker ought to be fired. The reason he cannot be fired is because Congress does not have the mechanism to replace the Chairman of the Federal Reserve Board and we ought to have that mechanism in place.

The first bill I introduced here in the U.S. Congress was a bill I called the Paul Volcker Retirement Act. It was a bill designed to make the Chairman of the Federal Reserve Board accountable.

People in this Chamber seem to think that monetary policy is some mysterious force that they cannot control or they do not understand. Look. Anybody serving in Congress ought to know enough economics to understand one fundamental fact and that is this. You cannot have Reaganomic supply-side economics, expansionary fiscal policy, and at the same time have high interest rates. That sort of approach will not do anything but throw America into the deepest recession that we have seen in decades.

Mr. GONZALEZ. Exactly.

Mr. DORGAN of North Dakota. The point I am trying to make is this. It is not a mystery to the gentleman in the well nor is it a mystery to me why we have the recession we have in America today. We have the recession in this country today because we have a misallocation of resources. We have got a whole series of structural problems in several areas.

But when Paul Volcker took over the helm of the Federal Reserve Board, he decided he would no longer be interested in the level of interest rates. He decided to look instead at the amount of money in circulation—at M_{1B} and several other components. As a result of that change in policy we saw a dramatic change in the way interest rates behaved.

Unfortunately interest rates went to a tremendously high level. They have fluctuated around that level. But they have not come back down into a moderate area. As long as we do not have a moderate interest rate policy—and I am not talking about easy credit for everybody, I am talking about moderate interest rates for those who are creditworthy—we will not have economic recovery in America.

The gentleman in the well has been one of the few people who has consistently pushed for inspection of this country's monetary policy and for reform of the structure of the Federal Reserve Board.

Let me say also that there have been people from the gentleman's State who have preceded him in Congress, such as the late Wright Patman, who

spent a lifetime here trying to get structural change in the Federal Reserve Board. I think we are working for a very worthwhile goal that such people labored long and hard to achieve.

They call some of us "radical" who want to change the Federal Reserve Board. They say we want to do something unusual. You bet we want to do something unusual. We want to get interest rates back down to something that is reasonable, because if we do not do that we are not going to have the economic growth and jobs and profits that keep America strong and where it ought to be in the scheme of this world of ours.

So I just wanted to say that although I do not agree with every approach the gentleman suggests—as he does not agree with all of my approaches—at least both of us understand, and more people should understand, that the core problem in our economy today is the structure of the Federal Reserve Board and the ascendence to power there of the "monetarists" who think they can keep interest rates at 16 percent without bringing economic calamity to this country. They are wrong.

And it seems to me they ought to be replaced.

I appreciate the efforts the gentleman is making in that regard.

Mr. GONZALEZ. I in turn want to thank this distinguished colleague once again, because I have expressed by gratitude to him. And also I note, and I think the record should reflect since the inception of his service he has also rendered very valuable service. And I think we share the experience of being like what I call lonely coyotes out in the brush country baying to the Moon as if nobody is going to listen. But we have, and the interest is there.

I think we both will agree that it is a matter in which Members outside of those belonging to the pertinent committee or committees, plagued as they are with a plethora of issues and all, find it very difficult to drop everything and concentrate on this. This is our challenge.

This is the only thing I really hope to accomplish. I am not doing anything more. In fact just three nights ago I rendered tribute to Chairman Wright Patman because he has been my inspiration. I have probably the biggest debt in what ever I am trying to do here in my ability to do so to him.

□ 1320

All I say is that I want to thank the gentleman very much for his participation and his support on concentrating now congressional attention on this very important and grievous matter.

Mr. Speaker, I resume this report because it is part of the exhibit attached to my individual specific allegations or bill of particulars on the impeachment resolution, known as No. 3.

The record will show that over the course of weeks I have presented three specific allegations, or what they call bill of particulars on the resolution of impeachment.

Again, there are many, many folks, especially those not connected with this legislative world, that do not understand the nature of this very sensitive resolution.

Also, I have tried to go through channels. I urged the Committee on the Judiciary by contacting its chairman to please give me a hearing, if nothing else, just a hearing; but that has been denied me; so I then had to make the decision to present the case to the House and at the proper time bring up the resolution of impeachment, which as everybody knows, is a highly privileged resolution; but I did not want to do so until on the record I had made the case as if I had been a counsel or a member of the Committee on the Judiciary. I will do so; but on article III, or the bill of particulars known as No. 3, I allege specifically that Mr. Volcker has been guilty of a usurpation of authority, an act of malfeasance, in having secret meetings with such individuals as the president of the First City National Bank, Walter Riston in Florida, with such individuals as Bunker Hunt from Texas, in order to make deals involving the banking system and in aid the pursuance of Mr. Hunt's speculation and speculative activity, which involved banking lines of credit in excess of \$15 and \$20 billion in the most speculative field of all, which is silver and its ally, the gold market speculative ventures, and where they simply lost their shirts as banks are doing now in wholesale amounts in the gold speculative field where we become so vulnerable that if a country wanted to, like Russia, as they have on two occasions in December 1976 and again 1 year later in 1977, all they have to do is just move some of that gold into Switzerland in the international and they put pressure on the dollar.

Now, the fact that Russia has not lately does not mean anything, other than their policy for the moment does not call for that, but the power is there; and yet we have been led by Secretaries of the Treasury, against stout resistance from individuals like myself, but again kind of let down by my colleagues on the committee at the time with the repeal of that 1932 Gold Restriction Act without any protection; but again on that occasion I had the chairman of the Federal Reserve Board then, Mr. Burns, called me and invited me to breakfast and I had breakfast.

He said, "Look, I agree with you. You are right on this whole thing. We are vulnerable."

And I said, "I think it is abominable that we should be doing it and leaving the public unprotected and the banks themselves, because they are soon going to get into speculation on gold."

Now it is even part of the commodity market speculation. If all the statistics were to be published today, I can tell you that tremendous amounts of depositors' money have been blown away because the gold and silver markets are the most speculative control of any economic activity. They are controlled by people that have been in that for 450 years, in London, in Zurich, even in France; but nobody would listen.

The Treasury, in fact, even had gold sales and at the time I was protesting that we did not have protection, I said that all this gold is going to end up in the vaults of the Central Bank of France, in England, and others.

Then Secretary Simon said, "Oh, no, that cannot happen because we have restrictions in our bids. They can bid."

I said, how innocent, how naive can anybody be? The central banks are not going to come in themselves. They will have agents. Well, that is exactly what happened.

I say that over 75 percent of those gold sales ended up in the central banks of France, England, and other countries, as reserves. Can you imagine that?

It is the pressure from those countries and the development of the European monetary system, the European monetary fund, where our central bank has done nothing to protect the American interests. That is part of the charges that I will be drawing up. Before I finish the bill of particulars on the resolution of impeachment, I will have quite a number of specifics. The element of specificity will not be lacking; but what a shame that I should have to be doing this. I do not have the resources. I do not have the staff. I will do what I can; but what a shame that the permanent Committee on the Judiciary could not be doing this. They are the ones that ought to be evaluating.

I am presenting the documentation, the specifics and the evidentiary facts.

This one specific instance, here is what this counsel, and nobody knows how much money they paid that firm, half a million dollars or what; but the report says:

Oh, there is no evidence to show that this error was evidence of guilt of any kind.

In other words, it says, "The report sets forth the results of special counsel's inquiry to determine whether any institution or individual, including Manufacturers Hanover Trust Co. and persons connected with the Board or the Federal Reserve Bank of New

York improperly and knowingly profited from the preparation and release of erroneous money supply data."

In other words, it was just an error that somebody made oodles of money out of—and we cannot prove that anybody intended it, when in the report in another section they say the only ones they contacted were the people that would be guilty of such a thing that happened.

Well, since when has anybody in the law enforcement aspect, whether they are lawyers in the Justice Department or prosecutors in the State system or police officers attempting to enforce the law, when do you think they will ever find a suspect that is going to gratuitously admit that he had bad intentions? This is all this report says. After interviewing all these persons involved—who were the persons involved? The agents, the officers of the Fed in New York, the Federal Board, the Hanover Manufacturers Trust Bank.

Well, that is exactly what the Fed has been doing. We Americans have put the fox to take care of that chicken in the roost.

Mr. HANCE. Mr. Speaker, will the gentleman yield?

Mr. GONZALEZ. Yes, I yield.

Mr. HANCE. What the gentleman is saying is that they asked them if they had done anything wrong.

Mr. GONZALEZ. That is exactly what it amounts to.

Mr. HANCE. So it would be like in a criminal case if they asked the criminal, "Have you done anything wrong?"

Mr. GONZALEZ. Exactly.

Mr. HANCE. Then even if he told the truth and said yes, he probably would want to come back and plead insanity.

Mr. GONZALEZ. Well, I will tell you the truth, with what is happening now, you would not blame him for that plea, would you?

Mr. HANCE. Not at all; but I think Congress will address that and change that this year.

Mr. GONZALEZ. But what if the counsel had said, well, you know, even if it were an unintended error, this reveals that there is some possibility here that there was improperly released information. That error could not have been profited by unless that information had been released prior to the public disclosure weeks later of the decision made in secret by the open market committee as to what interest would be paid, what the worth of Treasury bills are.

Now, this is the agent telling its principal what it is going to do.

Mr. HANCE. Mr. Speaker, if the gentleman will yield further, did they at any time ask that it be turned over to Congress, that Congress investigate it fully?

Mr. GONZALEZ. Well, all we have asked for through the years, and I was

one of those that vociferously joined Chairman PATMAN when we made the last request, that the General Accounting Office be permitted to go in and audit the Federal Reserve. That is all.

Then we have had several bills. I have joined in a couple, one by Representative RON PAUL, that out and out asked for an independent audit of the Federal Reserve.

□ 1330

Now, I think, even though I am for it, I still think that the first thing we ought to do is make sure that the General Accounting Office, which is the only agency directly available to the Congress, have that authority. They can do it.

For instance, have you ever heard of the Federal Reserve Board having an Inspector General? In other words, the presumption is there that they can do no wrong. But all history shows us that power, that uncontrollable power, corrupts. I am pointing to specific actions of corruption. How else can we interpret? What availability, what accessibility does a commercial bank that happens to be a member of the Federal Reserve System and has a meeting or a need for a meeting and needs to consult with the Chairman of the Federal Reserve Board have? Do you think he can get it? No.

But why should the Chairman be meeting in secret in Florida with the head of the First City National, Walter Wriston, and a speculator like Bunker Hunt, in Florida, in secret, accountable to nobody? This whole arrangement is incestuous.

To begin with, you should not even have the Open Market Committee. What is the Open Market Committee? The Open Market Committee consists of five private bankers—five select bankers from the system, bankers, private bankers—plus the members of the Federal Reserve Board.

They meet in secret to determine the fate of any administration, because they determine the Treasury bill rate and everything else.

In other words, I will conclude by saying that this is one more addition, in the bill of particulars to my third specific allegation of impeachment of the Chairman, specifically, although I have a separate resolution of impeachment for the Open Market Committee and its members because the Chairman alone does not act, even though he has tremendous power. Yet he is a principal accessory.

The way it operates, it operates like some public entities have in the past, where they have had bosses. In other words, he is pretty much the law.

What I am saying is that the destiny of this country is in the balance. We have already been economically impaired so badly—I am not a pessimist by nature but I do not see how it can be retrieved now.

They boast about having reduced the prime interest to somewhat, where is it now, about 15 percent? That means nothing. Your merchant back home is still paying 17, 18, 19 percent if he wants credit. That is obnoxious. It is wrong.

The people have a right to demand action. The people back home do not understand, when they say nothing can really be done, and the President says he has no control over the Fed. In fact, the President had a secret meeting with Paul Volcker after he invited him, and Volcker acquiesced and went. It is still secret. We do not know what came out of it. It is just as if the President had asked a foreign potentate to meet with him. They never even issued a communique.

Mr. HANCE. Mr. Speaker, will the gentleman yield?

Mr. GONZALEZ. I yield to the gentleman from Texas.

Mr. HANCE. I thank the gentleman for yielding.

Mr. Speaker, one thing that was obvious after the meeting between the President and Mr. Volcker back in January and February is that the President did endorse the policies of Mr. Volcker at that time.

Mr. GONZALEZ. Absolutely.

Mr. HANCE. If you compare the tax cuts with those of President John F. Kennedy, President Kennedy did just the opposite. He tried to get interest rates down so that the tax cut would work. But under the present conditions, with a 20-percent interest rate, the tax cut will not work to stimulate the economy.

Mr. GONZALEZ. Oh, no. You cannot compound a wrong with a worse one. To me, the whole tragedy is even today the proposed tax matter is being debated on the basis of whether you are for or against the President. That is ridiculous. The thing we have to have in mind is: Is this a fair tax? Is this a right tax? Is this tax consonant with the basic principles of taxation we have always legislated on? This was the principle that I thought ought to have ruled us last year, but it has not.

The tragedy is that now you are beginning to get the pressure from businessmen who say you have to support the President, not "Is this a right bill? Is it conscionable? Is it fair? Is it equitable?"

Look at what happened as a result of last year's bill: General Electric will not pay one penny in taxes on its income this year. That tax burden has to be shifted to somebody else. We are finding out now in the tax bill they want us to approve where some poor widow or citizen who is trying to save a little money will have to pay 10 percent on the interest on that money. That is so unconscionable that I just do not know what to do other than to say that unless we bring this back

around and the people assert their authority through their representative agents, who are us, and their President, that we have lost our liberty, because today, economic liberty is what is at stake for the average American.

What good does it do to have political freedom if you do not have economic freedom? That is what is at stake.

It is an issue as between whether the people will rule or the bankers will rule. That is what it amounts to.

Mr. Speaker, I yield back the balance of my time.

A BILL FOR SPORTS FANS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. FISH) is recognized for 15 minutes.

● Mr. FISH. Mr. Speaker, in July, I became a cosponsor of H.R. 6467, the Major League Sports Community Protection Act of 1982. This bill, introduced in May by my distinguished colleagues Messrs. EDWARDS, STARK, and HYDE, would help to restore stability to our Nation's professional sports leagues and give fans and communities a much-deserved degree of protection for the enormous investments they make on behalf of their sports teams. It deserves prompt and favorable consideration by every Member of this body.

Mr. Speaker, my decision to cosponsor this legislation was not arrived at lightly. I am no opponent of our free enterprise system. Nor is this bill a bailout of the owners of National Football League clubs. Quite simply, this bill is necessary to protect fans and communities from irresponsible actions by team owners who have forgotten on whose behalf the games are played. It will entitle leagues to refuse to permit well-supported and financially successful clubs from relocating, and it encourages leagues to maintain geographic and competitive balance by permitting revenue sharing.

H.R. 6467 will protect the loyal fans who are, after all, the lifeblood of professional sports. The simple truth is that sports teams could not survive without the support of the local fan who buys the tickets, attends the games, and watches the telecasts. Sports teams and their home communities traditionally have a unique and very special relationship with one another—a relationship that involves each adopting the other as its own. Here in Washington, for example, the Redskins are our Redskins. And it is our hockey team, the Capitals, that so many residents are working to keep in Washington. It is this bond between team and community that makes professional sports so different from any other business. No other business exists for its customers the way a sports team exists for its fans. It is the

interests of those fans that we in Congress are obligated to protect.

Moreover, communities have substantial interests in the continued operation of their local franchises that deserve protection. The presence of a major league franchise results in tremendous economic and psychic benefits to a community. The contribution a club makes to the local economy is measured in the tens, and sometimes hundreds of millions of dollars. Dozens of local businesses depend on the continuing operation of professional sports teams, and major league teams help to boost tourism and investment. Moreover, these franchises are an indispensable unifying force to their communities, and bring together people of all ages, races, and economic stations. The players are an inspiration to a community's youth, and the clubs and their players are often intimately involved in a wide variety of civic, charitable, and cultural programs.

For their part, communities make significant contributions to the success of their local sports teams. They construct and maintain, often at substantial public expense, stadiums and related facilities that are so essential to a team's economic and playing field success. More importantly, though, the communities and their residents identify with their teams. The team's victories belong to the whole community, and the civic pride that a sports team provides cannot be measured in dollars. The loss of a franchise is immeasurable, and communities should not be forced to bear such losses simply because a particular owner wants to fatten his bottom line.

Mr. Speaker, I am at a loss to understand some of the opposition that has arisen to this measure. H.R. 6467 is an extremely narrow bill that will have no effect on any player or collective bargaining issue. It has no effect on any competing league. It has no effect on broadcasting or cable television. And it has no effect on baseball's current antitrust status.

Other arguments raised against H.R. 6467 are equally spurious. It does not, as its opponents contend, give leagues a blank check to move teams at will. Precisely the opposite—H.R. 6467 only protects league decisions to maintain clubs in their existing locations. In addition, because H.R. 6467 would encourage more equal sharing of revenues among the clubs of a league, it would discourage franchise shifts that are motivated by an owner's desire to move to larger, more profitable markets.

Finally, I have heard it said that H.R. 6467 is unfair because it would deprive the Oakland Raiders of their recent court victory over the NFL. To the contrary, no single event more clearly underscores the need for legislative action to protect the sports fan

of America than the attempt by the Raiders to abandon Oakland for the cable-TV riches of Los Angeles.

When the Raiders announced their intention to abandon Oakland, they had just concluded their 12th consecutive sellout season—a record of support virtually unmatched in professional sports. Mayor Lionel Wilson, in his testimony last February before our Subcommittee on Monopolies, told of the tremendous psychological loss that the entire East Bay would suffer if the Raiders' threatened departure were to become a reality. As the New York Times reported on June 2, "The Raiders put Oakland on the map." To the fans in the East Bay who so loyally supported the Raiders, the team was "The most dynamic thing to happen" to Oakland, and rooting for them was "almost a religious experience." I am inserting the New York Times article in the RECORD at the end of my remarks. Perhaps the relationship between Oakland and the Raiders was best summarized by the team's captain, Gene Upshaw, who said on national television that "The Raiders and Oakland have given each other pride and identity."

When the Raiders announced their plan to move—despite the unanimous opposition of the other 27 NFL clubs—they ranked near the top of the league in ticket receipts and total income. They had been enormously successful on the field throughout the 1970's and had always been a highly profitable franchise. In short, there was no reason for them to move except Al Davis' desire to seek even larger profits in Los Angeles.

Finally, it should not be overlooked that the Raiders earned these revenues and profits while playing in the publicly financed Oakland-Alameda County Coliseum. This modern facility was built especially for the Raiders, largely on the strength of commitments made by the team and AFL Commissioner Joe Foss that they were in Oakland to stay. If they are now permitted to abandon Oakland, that stadium—which local residents will be forced to pay off—will be an ever-present reminder to fans and taxpayers everywhere of the cost of misplaced trust.

If the Federal antitrust laws require the NFL—or any other sports league—to stand by and permit its most successful and well-supported franchises to relocate at will, and in express disregard of past commitments to the fans, the Congress, and other members of the league, then those laws are not serving the public interest and should be changed. Unless Congress acts now, the door will remain open for a series of hit-and-run transfers that would benefit individual owners at the expense of the communities and

loyal fans that have supported the clubs over the years.

In circumstances such as these, there is every reason for Congress affirmatively to act to protect the rights and interests of fans and communities. No injustice will be worked by requiring the Raiders to honor their contractual obligations to their partners in the NFL and their civic and moral obligations to the fans and community of Oakland.

The Committee on the Judiciary, of which I am a member, has already held several days of hearings on sports and antitrust issues. Those hearings, conducted under the skilled direction of Chairman RODINO, have been extremely valuable in defining the relationship of antitrust principle to professional sports leagues and clarifying the form that any remedial legislation should take. I look forward to early hearings on H.R. 6467 and to the prompt enactment of this valuable and much-needed protection of our Nation's sports fans.

[From the New York Times, June 2, 1982]

AS RAIDERS SET SIGHTS SOUTH, FANS IN OAKLAND FEEL BETRAYED

(By Wallace Turner)

OAKLAND, CALIF., June 1.—The Oakland Raiders have left a lot of fans here feeling like a wife whose husband has left her for an ugly but rich rival.

"Rooting for a team is like a marriage," said Dan Vigil, a regular in the Cactus Room, a bar that is almost a shrine honoring the Raiders. "If the team leaves, there will be no repairing the divorce."

"I feel as betrayed as any of the other fans of the Raiders," said Don Henson, manager of Sam's Hof Brau near the Alameda County Coliseum, where the Raiders have played although they now want to go to Los Angeles, where the Coliseum has more seats and a potentially richer cable television market.

After battling through two trials in Federal District Court in Los Angeles, the Raiders have won a preliminary victory that may allow them to move despite the National Football League's last-ditch resistance. Even though appeals have begun, the heart has gone out of many fans who look on the breakup as inevitable and now want the offender out of the house quickly.

GREED IS ASSAILED

"It's wrong to bust up a relationship like this for greed," Mr. Henson said. His restaurant's walls are plastered with framed photographs of Oakland teams, with the Raiders' football victories getting more space than the Oakland A's or the Golden State Warriors. These teams were once national champions, in baseball and basketball, as the Raiders were in football two seasons back.

"People don't know where Oakland is, but they know the Raiders," Mr. Henson said, putting his finger on another aspect of the distress. "The Raiders put Oakland on the map."

Something downgrades Oakland's image among its residents. The Raiders' frequent success helped overcome that. The feeling is that if the Raiders go, can total failure be far behind?

Al Puncsak, 63 years old, has owned the Cactus Room in downtown Oakland for 25

years. He has followed the team since 1960, when the Raiders played their first games at Kezar Stadium in San Francisco. The Cactus Room is lined with Raider mementos: Jerseys marked Stabler, Villapiano, Banaszek, Upshaw, Cannon. There are 23 footballs autographed to "Big Al" Puncsak.

ALMOST A RELIGIOUS EXPERIENCE

"Watching this team has almost been a religious experience," he said. "It brings tears to my eyes to think about them leaving. They have been the most dynamic thing to happen to this city. We gave them life, we gave them birth, and the thought that they might leave really hurts. They are more than football players to the people who come in here. They are like sons to us."

David Self is director of the quasipublic Oakland Economic Development Corporation, which is fighting hard to keep the Raiders. As a lawyer, he is pushing a suit that attempts to extend the city's right of eminent domain so it would require a sale to the city of the Raiders' N.F.L. franchise. So far, he has failed.

Calling Oakland a "viable, sound, progressive city with bright prospects for the future," Mr. Self said development would be cut back.

"Loss of the Raiders," he said, "would be like losing a son or a daughter that you raised since infancy, like having him snatched away by adoption."

TEAM BRINGS BUSINESS TO CITY

Mr. Self estimated that the team was worth \$25 million to \$50 million a year to Oakland. The Chamber of Commerce says \$36 million. Rudy McMillan, a Holiday Inn food and beverage manager, said that brunches on game day drew up to 300 people and that the food and bar business jumped 70 percent. Joe Litjens, general manager of the Hyatt Oakland Hotel, said half the visiting teams stayed in his place, using 45 to 75 rooms. A football weekend means \$300,000 additional gross receipts for the hotel's many functions, he said.

People come from all over to stay overnight, see the game, eat, drink and spend money, Mr. Litjens said.

What this can mean was explained by Mike O'Callaghan, who was Governor of Nevada from January 1971 to January 1979, some of the Raiders' most glorious years. It was a drive of four and a half hours from the Governor's Mansion in Carson City to the Coliseum.

"After you left Reno, you didn't stop until the parking lot," he said. "We'd go over on Saturday night, get up and go to mass on Sunday before breakfast with John Madden and Pete Banaszek and some others, see the game, have dinner afterward and then drive home Sunday night. I guess I saw at least half their home games in those years."

I'M GLAD HE'S LEAVING

Resentment focuses on Al Davis, managing partner of the football club, who pushed the move.

"I'm glad he's leaving," said Ken Prote, 29, a house painter. "If that's how Al Davis is, then good riddance to him. With the right management we can always get another team here to love."

Skip Ulrich, 35, who parks cars on game days, said, "If Al Davis leaves, he will really be blowing it. The fans here are really dedicated to the team. They have sold out the stadium for years. How could they be more faithful anywhere else?"

Bruce Henderson, 24, sells T-shirts and bumper stickers. One that sells well now is "Oakland Traitors" with Mr. Davis's picture

in place of the pirate that adorns the team's emblem. Mr. Henderson said, "I'm not a football fan, but I cater to what the market wants."

Not everyone is bitter. Former Governor O'Callaghan left Carson City when his second term ended. He lives in Las Vegas as executive vice president of The Las Vegas Sun. Los Angeles is five hours away.

"I've already ordered my tickets in Los Angeles," he said. "A group of us got together and ordered a box." ●

PLO HOLDS LEBANON HOSTAGE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. HANCE) is recognized for 5 minutes.

Mr. HANCE. Mr. Speaker, I rise today in support of one of America's allies at a time when world opinion is slowly responding to the propaganda campaigns fueled by our common enemies.

On June the 6th, the Israeli Army entered Lebanon hoping to achieve two goals: Push the PLO out of Lebanon and return control of Lebanon to the Lebanese.

Today, the Israeli Army sits on the outskirts of Beirut close to completing its mission. The Russian-backed band of terrorists and murderers known as the PLO have the choice of either leaving Lebanon or to continue hiding behind the innocent civilian population.

None of us like to see the kind of bloodshed and killing and violence that has erupted since June the 6th. But this is not the time for any of us to fall prey to the propaganda efforts that would have us review our thinking of the PLO.

I submit to this distinguished body that our vision is becoming blurred, our memories hazy, if we think for a moment that Israel should be condemned for taking aggressive action against a foe whose past atrocities shocked the world, a foe who has robbed Lebanon of its sovereignty and inflicted years of bloodshed on the Lebanese people, a foe who has been a constant hurdle in the path of peace.

We should applaud Israel's resolve. We should urge the PLO to stop hiding behind the skirts of innocent women and the tears of their children, urge them to lay their Russian weapons on the streets of Beirut and leave Lebanon.

The Camp David peace process will never work as long as the PLO holds Lebanon hostage.

But with the PLO disarmed and rightfully disgraced in the eyes of peace-loving people throughout the world, those nations who desire a lasting peace in the Middle East can come to the bargaining table in good faith. Lebanon, Israel, Egypt, Saudi Arabia, and all our Arab friends in the region can get on with the business of build-

ing a safe and secure future for themselves and all nations of the world.

CONFERENCE REPORT ON H.R. 6863

Mr. WHITTEN submitted the following conference report and statement on the bill (H.R. 6863) making supplemental appropriations for the fiscal year ending September 30, 1982, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 97-747)

The Committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6863) making supplemental appropriations for the fiscal year ending September 30, 1982, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 7, 9, 14, 31, 38, 39, 40, 52, 53, 56, 75, 76, 80, 81, 94, 102, 109, 116, 118, 129, 133, 141, 142, 148, 152, 154, 155, 162, 163, 164, 171, 173, 179, and 181.

That the House recede from its disagreement to the amendments of the Senate numbered 20, 23, 25, 26, 28, 30, 32, 33, 34, 35, 36, 46, 48, 54, 61, 68, 70, 77, 78, 79, 87, 99, 101, 104, 105, 106, 110, 111, 125, 127, 134, 136, 139, 156, 157, 165, 167, 168, 170, 174, 175, and 176, and agree to the same.

Amendment numbered 16:

That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$4,400,000; and the Senate agree to the same.

Amendment numbered 27:

That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$53,700,000; and the Senate agree to the same.

Amendment numbered 29:

That the House recede from its disagreement to the amendment of the Senate numbered 29, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$37,145,000; and the Senate agree to the same.

Amendment numbered 71:

That the House recede from its disagreement to the amendment of the Senate numbered 71, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows: in lieu of the first sum named in said amendment, insert \$4,000,000; and the Senate agree to the same.

Amendment numbered 72:

That the House recede from its disagreement to the amendment of the Senate numbered 72, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$10,680,000; and the Senate agree to the same.

Amendment numbered 73:

That the House recede from its disagreement to the amendment of the Senate numbered 73, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows: in

lieu of the sum named in said amendment, insert \$2,000,000; and the Senate agree to the same.

Amendment numbered 82:

That the House recede from its disagreement to the amendment of the Senate numbered 82, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$18,100,000; and the Senate agree to the same.

Amendment numbered 85:

That the House recede from its disagreement to the amendment of the Senate numbered 85, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$24,957,000; and the Senate agree to the same.

Amendment numbered 90:

That the House recede from its disagreement to the amendment of the Senate numbered 90, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment amended to read as follows:

FOSSIL ENERGY RESEARCH AND DEVELOPMENT

For an additional amount for "Fossil energy research and development", \$1,080,000, to remain available until expended: *Provided*, That there are transferred to, and vested in, the Secretary of the Interior all functions vested in, or delegated to, the Secretary of Energy and the Department of Energy under or with respect to (1) the Act of May 16, 1910, and other authorities formerly exercised by the Bureau of Mines, but limited to research and development relating to increased efficiency of production technology of solid fuel minerals; (2) section 908 of the Surface Mining Control and Reclamation Act of 1977, relating to research and development concerning alternative coal mining technologies (30 U.S.C. 1328); (3) sections 5(g)(2), 8(a)(4), 8(a)(9), 27(b)(2)(3) of the Outer Continental Shelf Lands Act (43 U.S.C. 1334(g)(2) and 1337(a)(4) and 1337(a)(9)); and (4) section 105 of the Energy Policy and Conservation Act (42 U.S.C. 6213): *Provided further*, That the personnel employed, personnel positions, equipment, facilities, and unexpended balances of the aforementioned transferred programs shall be merged with the "Mines and minerals" account of the Bureau of Mines.

And the Senate agree to the same.

Amendment numbered 92:

That the House recede from its disagreement to the amendment of the Senate numbered 92, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$11,200,000; and the Senate agree to the same.

Amendment numbered 95:

That the House recede from its disagreement to the amendment of the Senate numbered 95, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows: in lieu of the sum named in said amendment, insert \$4,000,000; and the Senate agree to the same.

Amendment numbered 113:

That the House recede from its disagreement to the amendment of the Senate numbered 113, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows: in lieu of the sum named in said amendment, insert \$40,000,000; and the Senate agree to the same.

Amendment numbered 122:

That the House recede from its disagreement to the amendment of the Senate numbered 122, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows: in lieu of the sum named in said amendment, insert \$112,500,000; and the Senate agree to the same.

Amendment numbered 130:

That the House recede from its disagreement to the amendment of the Senate numbered 130, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment amended to read as follows:

For necessary expenses to carry out the commuter rail activities authorized by section 601(d) of the Rail Passenger Service Act (45 U.S.C. 601), as amended, \$5,000,000, and for necessary expenses to carry out section 1139(b) of Public Law 97-35, \$5,000,000, to remain available until expended.

And the Senate agree to the same.

Amendment numbered 131:

That the House recede from its disagreement to the amendment of the Senate numbered 131, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows: in lieu of the sum named in said amendment, insert \$15,000,000; and the Senate agree to the same.

Amendment numbered 144:

That the House recede from its disagreement to the amendment of the Senate numbered 144, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$8,998,000; and the Senate agree to the same.

Amendment numbered 147:

That the House recede from its disagreement to the amendment of the Senate numbered 147, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment insert \$39,000,000; and the Senate agree to the same.

Amendment numbered 158:

That the House recede from its disagreement to the amendment of the Senate numbered 158, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$180,000,000; and the Senate agree to the same.

Amendment numbered 159:

That the House recede from its disagreement to the amendment of the Senate numbered 159, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$86,774,000; and the Senate agree to the same.

Amendment numbered 160:

That the House recede from its disagreement to the amendment of the Senate numbered 160, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment amended to read as follows: \$75,726,000 of which; and the Senate agree to the same.

Amendment numbered 169:

That the House recede from its disagreement to the amendment of the Senate numbered 169, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows: in lieu of the sum named in said amendment,

insert; \$375,000 and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 1, 2, 3, 4, 5, 6, 8, 10, 11, 12, 13, 15, 17, 18, 19, 21, 22, 24, 37, 41, 42, 43, 44, 45, 47, 49, 50, 51, 55, 57, 58, 59, 60, 62, 63, 64, 65, 66, 67, 69, 74, 83, 84, 86, 88, 89, 91, 93, 96, 97, 98, 100, 103, 107, 108, 112, 114, 115, 117, 119, 120, 121, 123, 124, 126, 128, 132, 135, 137, 138, 140, 143, 145, 146, 149, 150, 151, 153, 161, 166, 172, 177, 178, 180, 182, and 183.

Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6863), making supplemental appropriations for the fiscal year 1982, rescinding certain budget authority, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

TITLE I CHAPTER I—DEPARTMENT OF AGRICULTURE

SOIL CONSERVATION SERVICE CONSERVATION OPERATIONS

Amendment No. 1: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which allows the Soil Conservation Service to exchange a parcel of land in Bellingham, Washington, for other land.

FOOD AND NUTRITION SERVICE CHILD NUTRITION PROGRAMS

Amendment No. 2: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

FOOD AND NUTRITION SERVICE CHILD NUTRITION PROGRAMS

If the funds available for Nutrition Education and Training grants authorized under section 19 of the Child Nutrition Act of 1966, as amended, require a ratable reduction in those grants, the minimum grant for each State shall be \$50,000.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

SCHOOL LUNCH DEMONSTRATION PROJECTS

The conferees note that bonus commodities constitute a program separate and distinct from the school lunch program, and will remain so, as long as the Department is in possession of surplus agricultural commodities for distribution. The conferees have received assurances from officials of the Department of Agriculture that the study methodology will allow a separate accounting of the value of bonus commodities in these demonstration projects. The conferees are in agreement that the purpose of this study is to analyze alternative approaches to the current operation of the school lunch program, but not to analyze alternatives to the distribution of actual bonus commodities. Therefore, the pilot projects may proceed as planned by the Department, with distribution of bonus cash or bonus letters of credit in lieu of bonus commodities, but the Department is directed to eliminate such bonuses from consideration in the evaluation phase of the school lunch demonstration projects.

Because the Department has stated that it is possible to provide a sufficient assessment of the projects within only two years of operation and still submit a full report to Congress by December 15, 1984, the conferees agree that plans for continuance beyond the end of the 1983-84 school year shall not be made unless the projects are extended by the Congress.

AGRICULTURAL RESEARCH SERVICE OREGON STATE UNIVERSITY BIOMASS ENERGY PROJECT

The Oregon State University, in cooperation with private energy and biomass consultants, has developed a proposal for a feasibility study on the use of agricultural residues and forest slash as fuel resources for a combined-cycle, closed-loop electrical powerplant. This approach offers great potential for the utilization of current waste products in a highly efficient power generation facility, which also has rural utility applications. The conferees are concerned that the Department has taken no positive action on

the funding of this meritorious proposal since the inclusion of report language in the conference report on the Agriculture, Rural Development, and Related Agencies Appropriations Act for fiscal year 1982 (H. Rept. 97-313). Therefore, the conferees urge the Department to give careful consideration to this worthwhile proposal.

CHAPTER II—DEPARTMENT OF COMMERCE

BUREAU OF THE CENSUS

PERIODIC CENSUSES AND PROGRAMS (Disapproval of Deferral)

Amendment No. 3: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment which disapproves \$100,000 of the proposed deferral D82-225 relating to the Department of Commerce, Bureau of the Census, "Periodic censuses and programs", effective upon enactment into law of this bill.

ECONOMIC DEVELOPMENT ADMINISTRATION

ECONOMIC DEVELOPMENT REVOLVING FUND

Amendment No. 4: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment which provides that during fiscal year 1982, obligations for direct loans shall not exceed \$30,000,000 and total commitments to guarantee loans shall not exceed \$150,000,000 of contingent liability for loan principal, and that unobligated balances in the Economic Development Revolving Fund shall be available for necessary expenses of protecting the Government's liability in Federally guaranteed loans made prior to October 1, 1981 under title II of the Trade Act of 1974, including defaults of loan guarantees and care and protection of collateral and other costs necessary to protect the Government's investments.

INTERNATIONAL TRADE ADMINISTRATION

PARTICIPATION IN UNITED STATES EXPOSITIONS

Amendment No. 5: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment which appropriates \$10,000,000 for the participation of the United States in the Louisiana World Exposition, to remain available through September 30, 1985. The amendment also provides that no additional Federal funds shall be available for this purpose and that the funds appropriated shall be available only upon enactment into law of authorizing legislation.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

OPERATIONS, RESEARCH, AND FACILITIES

Amendment No. 6: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate, amended to read as follows:

In lieu of the matter proposed by said amendment, insert the following:

OPERATIONS, RESEARCH, AND FACILITIES

For an additional amount for "Operations, research, and facilities", \$2,163,000, to remain available until expended: Provided, That of the funds appropriated under this head, \$200,000 shall be for necessary expenses for research to develop life history information on the bowhead whale in high level and low level area surveys and not to exceed \$50,000 shall be for implementation of the 1982 Cooperative Agreement between the National Oceanic and Atmospheric Ad-

ministration and the Alaska Eskimo Whaling Commission as amended in July 1982.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

This amendment provides \$200,000 for research on bowhead whales, \$50,000 for implementation of the 1982 amendments to the cooperative agreement between the National Oceanic and Atmospheric Administration and the Alaska Eskimo Whaling Commission, and \$1,913,000 for increased FTS costs.

The conferees are agreed that any further absorption of funds in this account for any purpose shall not be derived from the FY 1982 program level of \$35,000,000 established in prior FY 1982 appropriations acts for the Sea Grant Program.

COASTAL ZONE MANAGEMENT

(Transfer of Funds)

Amendment No. 7: Provides \$3,000,000 by transfer as proposed by the House instead of \$3,600,000 by transfer as proposed by the Senate.

RELATED AGENCIES

DEPARTMENT OF TRANSPORTATION

MARITIME ADMINISTRATION

FEDERAL SHIP FINANCING FUND

Amendment No. 8: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate which provides that during 1982, total commitments to guarantee loans shall not exceed \$675,000,000 of contingent liability for loan principal.

SECURITIES AND EXCHANGE COMMISSION

SALARIES AND EXPENSES

Amendment No. 9: Appropriates \$400,000 as proposed by the House instead of \$200,000 as proposed by the Senate.

This amendment will permit the SEC to fill 79 currently vacant positions and will provide \$232,000 for the acquisition of ADP equipment.

SMALL BUSINESS ADMINISTRATION

BUSINESS LOAN AND INVESTMENT FUND

Amendment No. 10: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides that during fiscal year 1982, total commitments to guarantee loans shall not exceed \$3,000,000,000 of contingent liability for loan principal.

(Disapproval of Deferral)

Amendment No. 11: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which disapproves \$2,500,000 of the proposed deferral D82-233A for the Business Loan and Investment Fund, effective the date of enactment into law of this bill.

SURETY BOND GUARANTEES REVOLVING FUND

(Disapproval of Deferral)

Amendment No. 12: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which disapproves the proposed deferral D82-234 for the Surety Bond Guarantees Revolving Fund effective the date of enactment into law of this bill.

POLLUTION CONTROL EQUIPMENT CONTRACT GUARANTEE REVOLVING FUND

Amendment No. 13: Reported in technical disagreement. The managers on the part of

the House will offer a motion to recede and concur in the amendment of the Senate which provides that during fiscal year 1982, total commitments to guarantee loans shall not exceed \$250,000,000 of contingent liability for loan principal.

The conferees are extremely concerned that the Small Business Administration has limited this program to a level of \$150,000,000 for fiscal year 1982, despite the fact that the House and Senate Appropriations Committees disapproved a reprogramming proposal to limit the program to this amount and directed SBA to make available the full authorization of \$250,000,000 for the program. The conferees note that this disregard of the Committees' directives has had an extremely detrimental effect on the ability of small businesses to obtain necessary funds to comply with State and local pollution control requirements. Therefore, the conferees expect that the Small Business Administration will take all necessary action to comply with the original directives of the Appropriations Committees on this matter so that as many applications for such guarantee assistance as possible can be funded up to the authorized level during the remainder of the current fiscal year.

DEPARTMENT OF JUSTICE

SALARIES AND EXPENSES, UNITED STATES

ATTORNEYS AND MARSHALS

Amendment No. 14: Appropriates \$9,015,000 as proposed by the House instead of \$10,000,000 as proposed by the Senate.

SALARIES AND EXPENSES, COMMUNITY RELATIONS SERVICE

Amendment No. 15: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which makes available not to exceed \$80,290 in fiscal year 1982 funds for payment of a settlement pursuant to the Back Pay Act for back wages from prior fiscal years.

FEDERAL BUREAU OF INVESTIGATION

Amendment No. 16: Appropriates \$4,400,000 instead of \$4,000,000 as proposed by the House and \$4,750,000 as proposed by the Senate.

Amendment No. 17: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following: *Provided further, That notwithstanding the provisions of title 31 U.S.C. 483(a) and 484, the Director of the Federal Bureau of Investigation may establish and collect fees to process fingerprint identification records for non-criminal employment and licensing purposes, and credit such fees to this appropriation to be used for salaries and other expenses incurred in providing these services: Provided further, That the funds available for carrying out these services shall be available only to the extent provided in advance in appropriation acts*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

IMMIGRATION AND NATURALIZATION SERVICE

Amendment No. 18: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which clarifies the language with regard to the purchase of automobiles.

DRUG ENFORCEMENT ADMINISTRATION

Amendment No. 19: Reported in technical disagreement. The managers on the part of

the House will offer a motion to recede and concur in the amendment of the Senate which clarifies the language with regard to the purchase of automobiles.

FEDERAL PRISON SYSTEM

BUILDINGS AND FACILITIES

(Including Transfer of Funds)

Amendment No. 20: Appropriates \$41,750,000 as proposed by the Senate instead of \$1,500,000 as proposed by the House. Of the \$41,750,000 provided, \$1,000,000 will be made available by transfer, as provided for in Amendment No. 21.

Amendment No. 21: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which makes available \$1,000,000 by transfer from the Antitrust Division.

Amendment No. 22: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides that sites for location of an alien processing facility not be excluded from consideration by the Department of Justice solely because such sites are not presently Federally owned and that the building to house aliens be constructed in a separate building from an existing Bureau of Prisons building housing Federal prisoners.

The conferees are agreed that the Department of Justice is not to locate the alien detention facility, for which funds are provided by this conference agreement, in any location other than El Reno, Oklahoma, or Oakdale, Louisiana, unless the Department submits a proposal and receives approval for another location for such facility under the reprogramming procedures established by the Committees on Appropriations of the House and Senate.

FEDERAL PRISON INDUSTRIES, INCORPORATED

LIMITATION ON ADMINISTRATIVE AND VOCATIONAL TRAINING EXPENSES, FEDERAL PRISON INDUSTRIES, INCORPORATED

Amendment No. 23: Increases the limitation on vocational training expenses to \$2,983,000 as proposed by the Senate instead of to \$3,162,000 as proposed by the House.

OFFICE OF JUSTICE ASSISTANCE, RESEARCH, AND STATISTICS

RESEARCH AND STATISTICS

(Transfer of Funds)

Amendment No. 24: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed, insert the following:

OFFICE OF JUSTICE ASSISTANCE, RESEARCH AND STATISTICS

RESEARCH AND STATISTICS

(Transfer of Funds)

For an additional amount for "Research and statistics", \$450,000, to be derived by transfer from "Law enforcement assistance" for a study of the victims of crime in the District of Columbia to be submitted to the Congress not later than September 30, 1983.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

DEPARTMENT OF STATE
ADMINISTRATION OF FOREIGN AFFAIRS
Salaries and Expenses

Amendment No. 25: Appropriates \$37,978,000 as proposed by the Senate instead of \$37,378,000 as proposed by the House.

The conferees are agreed that of the \$1,600,000 provided for preparation of the United States legal case for arbitration of the Gulf of Maine Boundary dispute by the International Court of Justice, not more than \$260,000 shall be available for contractual services unless the Department of State submits a reprogramming proposal for such a purpose and receives approval of the proposal in accordance with the procedures established by the Committees on Appropriations of the House and Senate. The conferees are concerned that the Department of State's justification submitted in support of this request failed to accurately represent the actual obligations already incurred for this activity. The conferees note that the Department has already incurred obligations approximating \$1,400,000. The conferees direct the Department of State to submit a full and complete justification in support of these actions.

RELATED AGENCIES

BOARD FOR INTERNATIONAL BROADCASTING
(Rescission)

Amendment No. 26: Changes "Grant" to "Grants" in the language of the bill.

CHAPTER III—DEPARTMENT OF
DEFENSE—MILITARY

MILITARY PERSONNEL

MILITARY PERSONNEL, ARMY

Amendment No. 27: Appropriates \$53,700,000 instead of \$61,900,000 as proposed by the House and \$14,400,000 as proposed by the Senate.

Summary.—The agreement on items in conference is as follows:

(In thousands of dollars)

	Budget	House	Senate	Conference
Foreign duty pay	4,500		4,500	4,500
European Brigade	39,300	39,300		39,300
Temporary storage	1,300	1,300		
Discretionary skill shortage pay			11,400	11,400

MILITARY PERSONNEL, NAVY

Amendment No. 28: Appropriates \$57,474,000 as proposed by the Senate instead of \$55,656,000 as proposed by the House.

Summary.—The agreement on items in conference appears in the following table. Although the conferees have denied the request for \$156,000 for Navy nuclear officer accession bonuses, it is agreed that the Navy may proceed with the program within funds already available.

(In thousands of dollars)

	Budget	House	Senate	Conference
Foreign duty pay	1,974		1,974	1,974
Nuclear officer accessions	156	156		

MILITARY PERSONNEL, MARINE CORPS

Amendment No. 29: Appropriates \$37,145,000 instead of \$31,945,000 as proposed by the House and \$40,645,000 as proposed by the Senate.

Summary.—The agreement on items in conference is as follows:

(In thousands of dollars)

	Budget	House	Senate	Conference
Foreign duty pay	1,400		1,400	1,400
Selective reenlistment bonus	9,000		9,000	5,500
Weight allowance, Okinawa	1,700	1,700		

RESERVE PERSONNEL, ARMY

Amendment No. 30: Appropriates \$9,000,000 as proposed by the Senate instead of \$4,200,000 as proposed by the House.

Summary.—The agreement on the item in conference is as follows:

(In thousands of dollars)

	Budget	House	Senate	Conference
Drill attendance	4,800		4,800	4,800

RESERVE PERSONNEL, MARINE CORPS

Amendment No. 31: Appropriates \$2,000,000 as proposed by the House instead of \$800,000 as proposed by the Senate.

Summary.—The agreement on items in conference is as follows:

(In thousands of dollars)

	Budget	House	Senate	Conference
Platoon leaders class	900	900		900
Subsistence cost increase	300	300		300

RESERVE PERSONNEL, AIR FORCE

Amendment No. 32: Appropriates \$3,650,000 as proposed by the Senate instead of \$4,000,000 as proposed by the House.

Summary.—The agreement on the item in conference is as follows:

(In thousands of dollars)

	Budget	House	Senate	Conference
ROTC subsistence	400	400	50	50

OPERATION AND MAINTENANCE

OPERATION AND MAINTENANCE, ARMY

Amendment No. 33: Appropriates \$4,300,000 as proposed by the Senate instead of \$27,300,000 as proposed by the House.

Army European Brigade.—The conferees agree that the brigade should be disestablished and deleted from the force structure as proposed by the Senate. However, it is also agreed that the 4,100 manyears should not be deleted but rather should be utilized to fill out other existing Army units in the United States which are presently undermanned.

OPERATION AND MAINTENANCE, NAVY

Amendment No. 34: Provides \$117,400,000 in transfers as proposed by the Senate in

stead of a direct appropriation of \$40,974,000 and transfers of \$76,426,000 as proposed by the House.

A summary of the transfers approved by the conferees is as follows:

(In thousands of dollars)

Source of transfer	Program	Amount
Aircraft procurement, Navy—1982/84	RDF Support	26,200
Do	AV-8B Modification	13,700
Do	SH-60B advance procurement	9,100
Do	EC-130 modification	2,100
Weapons, procurement, Navy—1982/84	Tomahawk	2,000
Do	Phoenix modification	2,000
Do	Mk75/Mk76 gun mounts	3,500
Research, development, test, and evaluation, Navy—1982/83	Dual mini sines	470

Amendment No. 35: Provides \$19,600,000 in transfers, as proposed by the Senate instead of \$37,226,000 as proposed by the House.

Amendment No. 36: Provides \$71,100,000 in transfers as proposed by the Senate instead of \$20,000,000 as proposed by the House.

Amendment No. 37: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides \$7,500,000 in transfers from Weapons procurement, Navy, 1982/1984.

OPERATION AND MAINTENANCE, AIR FORCE

Amendment No. 38: Appropriates \$23,000,000 as proposed by the House instead of \$18,000,000 as proposed by the Senate.

PROCUREMENT

OTHER PROCUREMENT, ARMY

Amendment No. 39: Deletes the language proposed by the Senate which would have appropriated for transfer \$20,000,000 from Other Procurement, Army to appropriations available to the Federal Emergency Management Agency.

SHIPBUILDING AND CONVERSION, NAVY

Amendment No. 40: Deletes the language proposed by the Senate which would have appropriated \$57,000,000 for the MCM Mine Countermeasures ship program and the TAO Fleet-oiler ship program.

AIRCRAFT PROCUREMENT, AIR FORCE

Amendment No. 41: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment insert the following:

"AIRCRAFT PROCUREMENT, AIR FORCE"

"For an additional amount for 'Aircraft procurement, Air Force', \$120,000,000, to remain available until September 30, 1984, only for the purchase of two new KC-10 aircraft or for fully funding the purchase and modification of an appropriate number of used DC-10 aircraft to the KC-10 configuration."

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees note that the only official budget document before the Congress on this matter requested fully funding two new KC-10s at a cost of \$120,000,000 including \$5,000,000 for initial spares. A subsequent letter from the Deputy Secretary of Defense which recommended using these funds

to initiate a \$3,200,000,000 multi-year procurement buy of KC-10s is not an amendment to the President's budget. It is the sense of the Conferees that a change in the budget of that magnitude clearly requires the submission of an amendment from the President.

The conferees have agreed not to require the reprogramming at this time of the \$50,000,000 appropriated in fiscal year 1982 for wide-bodied aircraft procurement as proposed by the Senate. However, these funds should not be obligated without the prior approval of the House and Senate Appropriations Committees, and the Department should use the reprogramming process to request such approval.

OTHER PROCUREMENT, AIR FORCE

Amendment No. 42: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, as follows:

In lieu of the sum proposed by said amendment, insert "\$19,700,000".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. The details of this amendment are set forth in the classified annex to this report.

PROCUREMENT, DEFENSE AGENCIES

Amendment No. 43: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, as follows:

In lieu of the sum named in said amendment, insert "\$6,500,000".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. The effect and details of this amendment are set forth in the classified annex to this report.

ADMINISTRATIVE PROVISIONS

Amendment No. 44: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which includes language prohibiting the Defense Department from purchasing coal or coke from foreign nations for use at United States defense facilities in Europe when coal from the United States is available.

Amendment No. 45: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, as follows:

In lieu of the sum named in said amendment, insert "\$800,000,000".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

This provision increases the Defense Department transfer authority limitation from \$750,000,000 to \$800,000,000.

CHAPTER IV—DISTRICT OF COLUMBIA

DISTRICT OF COLUMBIA FUNDS

PUBLIC SAFETY AND JUSTICE

(Including Rescission and Transfer of Funds)

Amendment No. 46: Changes heading as proposed by the Senate.

Amendment No. 47: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates \$3,401,500 of which \$800,000 shall be derived by transfer from the appropriation "Transportation services and assistance" upon approval by resolution

of the District of Columbia Council. The increase of \$800,000 above the House allowance is for court-appointed attorneys assigned to indigent defendants under the Criminal Justice Act program.

HUMAN SUPPORT SERVICES

(Including Rescission and Transfer of Funds)

Amendment No. 48: Changes heading as proposed by the Senate.

Amendment No. 49: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates \$40,044,000 of which \$1,900,000 shall be derived by transfer from the appropriation "Transportation services and assistance" upon approval by resolution of the District of Columbia Council. The increase of \$1,900,000 above the House allowance is for the city's youth employment program.

ADMINISTRATIVE PROVISIONS

Amendment No. 50: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate adding a new section which amends Title 11 of the District of Columbia code. The new section authorizes the use of hearing commissioners to perform the more ministerial functions presently carried out by judges of the Superior Court. The provisions of this section will remain in effect until September 30, 1983, thereby permitting the appropriate authorizing committees the opportunity to consider comprehensive court reform legislation.

The conferees are aware of a severe case-load backlog in both the Superior and Appeals courts of the District. The Superior Court has 1,851 felony cases pending with an average time of 240 days from arrest to disposition. This situation could be seriously exacerbated by ongoing efforts of the Mayor and Police Chief, with the assistance of the U.S. Attorney's Office, in the area of repeat offenders. The courts must be able to respond to this initiative and reduce the existing backlog. The conferees feel that this pilot effort will prove useful and become an important part of the criminal justice system in the District of Columbia.

Furthermore, the conferees direct that the courts work with the appropriate committees of the Congress in determining the number and status of the hearing officer positions.

ACCUMULATED GENERAL FUND DEFICIT

The conferees are concerned with the District government's accumulated general fund deficit of \$309 million (as of September 30, 1981) and what appears to be a somewhat less than vigorous commitment to reduce the deficit through every possible means. The conferees strongly urge District officials to renew their efforts to reduce the deficit without relying solely on their pending proposal to sell deficit bonds. Although the plan to retire the accumulated deficit by purchasing bonds has been pending before the Congress for several months, the conferees direct District officials to develop and submit an alternative plan by April 15, 1983, for eliminating the deficit.

The conferees remind District officials that the \$10 million appropriated in the regular bill for fiscal year 1982 is to be applied to reducing the cash portion of the general fund deficit.

CHAPTER V

The conferees agree that for the purposes of Chapter V report language included by

the House which is not changed by the report of the Senate, and Senate report language which is not changed by the conference is approved by the Committee of Conference. The statement of the managers, which may repeat some report language for emphasis, does not negate the language referred to above unless expressly provided herein.

DEPARTMENT OF THE INTERIOR

BUREAU OF RECLAMATION

OPERATION AND MAINTENANCE

(Transfer of Funds)

Amendment No. 51: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides that \$2,000,000 be transferred to Operation and Maintenance from the Construction program.

DEPARTMENT OF ENERGY

OPERATING EXPENSES

ATOMIC ENERGY DEFENSE ACTIVITIES

Amendment No. 52: Appropriates \$57,000,000 for Operating Expenses, Atomic Energy Defense Activities as proposed by the House instead of \$48,900,000 as proposed by the Senate.

PLANT AND CAPITAL EQUIPMENT

ENERGY SUPPLY, RESEARCH AND DEVELOPMENT ACTIVITIES

(Transfer of Funds)

Amendment No. 53: Transfers \$14,000,000 to Plant and Capital Equipment, Energy Supply, Research and Development Activities from the Geothermal Resources Development Fund as proposed by the House.

The conferees have agreed to a transfer of \$14,000,000 currently appropriated to a default reserve for geothermal loan guarantees issued and to be issued pursuant to the authorities provided in Public Law 93-410, as amended. This transfer of funds is agreed to with the understanding, which has been confirmed by the Department and the Office of Management and Budget, that the funds currently in the default reserve are not necessary to support either existing loan guarantees or new loan guarantees which may be issued; and that notwithstanding this transfer of funds, the current ongoing program to evaluate applications for loan guarantees pending at the Department and where appropriate to award loan guarantees for worthy geothermal projects will be continued in an expeditious fashion and that this transfer will not adversely affect implementation of the program. The conferees also wish to note that in light of the fact that these geothermal loan guarantees are issued with and supported by the full faith and credit of the United States, a default reserve is not necessary. Therefore, on the basis of these assurances from the Administration, and the full faith and credit backing of the United States for these guarantees, and transfer of funds is approved. As noted in the Senate report, additional funds may be necessary to complete this project in future years.

ATOMIC ENERGY DEFENSE ACTIVITIES

Amendment No. 54: Appropriates \$7,300,000 for Plant and Capital Equipment, Atomic Energy Defense Activities as proposed by the Senate instead of \$35,700,000 as proposed by the House.

ADMINISTRATIVE PROVISIONS

Amendment No. 55: Reported in technical disagreement. The managers on the part of

the House will offer a motion to recede and concur in the amendment of the Senate relating to the execution of work pursuant to section 202 of the 1981 Energy and Water Development Appropriations Act.

The Committee of Conference notes that the Sholey Bridge across the Little Tallahatchie River below the Sardis Reservoir, which was restored by Tallahatchie County, has become damaged and if not repaired will seriously affect the flow in the river and adversely affect drainage in the basin. The conferees, therefore, direct the Corps of Engineers, within available funds, to stabilize the banks of the river in the vicinity of the bridge and to provide necessary protection to the bridge supports and provide other assistance as necessary to prevent recurrence of the problem. This action is necessary to prevent obstruction in the water flow to the detriment of the flood control project.

The Corps of Engineers is directed to accept, without interest penalty, payments or in-kind contributions by School District No. 52 for its portion of the separable recreation costs for development and management at Sky Camp, Fall Creek Lake in Lane County, Oregon, until July 28, 1998.

CHAPTER VI—BILATERAL ECONOMIC ASSISTANCE

FUNDS APPROPRIATED TO THE PRESIDENT AGENCY FOR INTERNATIONAL DEVELOPMENT OVERSEAS AND SPECIAL DEVELOPMENT ACTIVITIES

(Foreign currency program)

Amendment No. 56: Restores the phrase "to remain available until expended", as proposed by the House.

LEBANON EMERGENCY RELIEF

(Transfer of funds)

Amendment No. 57: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate. The Senate amendment earmarks \$10,000,000 in emergency relief funds for the American University of Beirut.

ECONOMIC SUPPORT FUND

CARIBBEAN BASIN INITIATIVE

Amendment No. 58: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

"ECONOMIC SUPPORT FUND

CARIBBEAN BASIN INITIATIVE

For an additional amount for necessary expenses to carry out chapter 4 of part II of the Foreign Assistance Act of 1961, \$350,000,000, to remain available until March 31, 1983, notwithstanding section 10 of Public Law 91-672: Provided, That the funds in this paragraph shall be available only to the extent and in the manner provided as follows: not less than \$20,000,000 for the Eastern Caribbean; not less than \$41,000,000 for the Dominican Republic; not less than \$10,000,000 for Haiti; not less than \$50,000,000 for Jamaica; not less than \$10,000,000 for Belize; not less than \$70,000,000 for Costa Rica; not more than \$10,000,000 for Guatemala; not less than \$35,000,000 for Honduras; not more than \$75,000,000 for El Salvador; not less than \$2,000,000 for the American Institute for Free Labor Development; not less than \$2,000,000 for the Inter-American Foundation; and \$25,000,000 unallocated: Provided,

That none of the funds appropriated for this purpose may be obligated until September 15, 1982, or until the enactment of authorizing legislation, whichever comes first: Provided further, That none of the funds appropriated under this heading and made available only for a country referred to in the first proviso may be available for such country while such country is not taking adequate steps to cooperate with the United States, as certified monthly by the President to the Congress, to prevent narcotic drugs and other controlled substances (as listed in the schedules in section 202 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 812)) which are produced, processed, or transported in such country from entering the United States unlawfully. Notwithstanding any other provision of the act, none of the funds appropriated in this paragraph may be obligated or expended in any manner inconsistent with the policy hereby reaffirmed, which is stated in S.J. 230 (76 Stat. 697), to wit:

"Whereas President James Monroe, announcing the Monroe Doctrine in 1823, declared that the United States would consider any attempt on the part of European powers 'To extend their system to any portion of this Hemisphere as dangerous to our peace and safety'; and

"Whereas in the Rio Treaty of 1947 the parties agreed that 'an armed attack by any State against an American State shall be considered as an attack against all the American States, and, consequently, each one of the said contracting parties undertakes to assist in meeting the attack in the exercise of the inherent right of individual or collective self-defense recognized by article 51 of the Charter of the United Nations'; and

"Whereas the Foreign Ministers of the Organization of American States at Punta del Este in January 1962 declared: 'The present Government of Cuba has identified itself with the principles of Marxist-Leninist ideology, has established a political, economic, and social system based on that doctrine, and accepts military assistance from extra-continental Communist powers, including even the threat of military intervention in America on the part of the Soviet Union'; and

"Whereas the international Communist movement has increasingly extended into Cuba, its political, economic, and military sphere of influence: Now, therefore, be it

"Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the United States is determined—

"(a) to prevent by whatever means may be necessary, including the use of arms, the Marxist-Leninist regime in Cuba from extending by force or the threat of force its aggressive or subversive activities to any part of this hemisphere;

"(b) to prevent in Cuba the creation or use of an externally supported military capability endangering the security of the United States; and

"(c) to work with the Organization of American States and with freedom-loving Cubans to support the aspirations of the Cuban people for self-determination."

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers on the part of the House and the Managers on the part of the Senate are in agreement that funds appropriated in this Act for the Economic Support Fund may be approved for use for Haiti only in

accordance with the provisions of Section 721 of the International Security and Development Cooperation Act of 1981.

Amendment No. 59: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate. The amendment of the Senate is as follows: "Nothing in this Act shall be deemed to change or otherwise affect the standards and procedures provided in the National Security Act of 1947, as amended; the Foreign Assistance Act of 1961, as amended; and the War Powers Resolution of 1973. This Act does not constitute the statutory authorization for introduction of United States Armed Forces contemplated by the War Powers Resolution."

MILITARY ASSISTANCE PROGRAM

Amendment No. 60: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: In lieu of the matter inserted by said amendment, insert the following:

MILITARY ASSISTANCE PROGRAM

For an additional amount for necessary expenses to carry out the provisions of section 503 of the Foreign Assistance Act of 1961, \$2,000,000, to remain available for obligation until September 30, 1983: Provided, That such amount and \$25,000,000 of funds reprogrammed during the fiscal year 1982 to carry out such section shall be available only to the extent and in the manner provided as follows: \$10,000,000 shall be available only for Honduras; \$5,000,000 shall be available only for Somalia; \$2,000,000 shall be available only for Costa Rica; and, \$10,000,000 shall be available only for Portugal.

The managers on the part of the Senate will move to concur in the amendment of the Senate.

The conferees are concerned over the increasing number of reports that refugee agencies operating in Honduras, including the United Nations High Commissioner for Refugees, are having difficulties because of alleged harassment by Honduran military forces. The conferees expect the Administration to do everything it can to ensure that the operation of refugee receiving centers and the safe flow of refugees are not impaired. It is expected that this concern will be made known to the government of Honduras before making available to Honduras the MAP assistance provided in this bill.

INTERNATIONAL MILITARY EDUCATION AND TRAINING

Amendment No. 61: Appropriates \$3,512,000 for the International Military Education and Training Program as proposed by the Senate.

FOREIGN MILITARY CREDIT SALES

Amendment No. 62: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

FOREIGN MILITARY CREDIT SALES

For an additional amount for necessary expenses to enable the President to carry out the provisions of sections 23 and 24 of the Arms Export Control Act, \$50,000,000, which sum shall be available only for Sudan.

In addition to the total amount of gross obligations for the principal amount of direct loans, exclusive of loan guarantee defaults, which may be made during the fiscal year 1982 pursuant to the heading "Foreign Military Credit Sales" of Public Law 97-121, there may be made \$50,000,000 of such gross obligations during such fiscal year.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

SPECIAL DEFENSE ACQUISITION FUND
(Limitation on obligations)

Amendment No. 63: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

SPECIAL DEFENSE ACQUISITION FUND
(Limitation on obligations)

There are authorized to be made available for the Special Defense Acquisition Fund for the fiscal year 1982, \$125,000,000.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers on the part of the House and the Senate recognize that the SDAF is a new program and can, if properly used, serve as a valuable management tool in regard to foreign military arms sales. The managers expect that the SDAF will be utilized according to the purposes which were originally presented to the Congress; namely that procurement of items for the SDAF would be those of high foreign demand that are in short supply and in U.S. inventory; would consist of relatively unsophisticated military items such as medium tanks, artillery, ammunition, antitank missiles, and basic communications systems; would have no adverse impact on U.S. defense readiness; and would not stimulate unnecessary foreign arms sales.

DEPARTMENT OF STATE

MIGRATION AND REFUGEE ASSISTANCE

Amendment No. 64: Reported in true disagreement.

CHAPTER VII—DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
HOUSING PROGRAMS

ANNUAL CONTRIBUTIONS FOR ASSISTED HOUSING

Amendment No. 65: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

HOUSING PROGRAMS

ANNUAL CONTRIBUTIONS FOR ASSISTED HOUSING

The Urgent Supplemental Appropriations Act, 1982 (Public Law 97-216) is amended by striking the seventh and eighth provisos under this heading and inserting in lieu thereof the following: *Provided further, That to the extent the amount of budget authority (including budget authority internally transferred by State Housing Finance Development agencies pursuant to 24 C.F.R. Section 883.207) which is recaptured or deobligated during fiscal year 1982 exceeds \$3,250,000,000, the amount of recaptured or deobligated contract authority and budget authority which exceeds such \$3,250,000,000, if any, shall be deferred until October 1, 1982, except that budget authority internally transferred pursuant to 24 C.F.R. Section 883.207 shall not be deferred: Provided further, That the first \$89,321,727 of budget au-*

thority deferred in accordance with the immediately preceding proviso, or such lesser amount as is available on October 1, 1982, shall be made available for the modernization of 5,073 vacant uninhabitable public housing units, pursuant to section 14 of the United States Housing Act of 1937, as amended, other than section 14(f) of such Act.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees have deleted the language which would have reduced the Department's personnel compensation and benefits. The conferees are concerned that the Department is moving too slowly in implementing the reforms contained in Part 2 of the Housing and Community Development Amendments of 1981. The conferees hereby direct the Secretary of Housing and Urban Development to prepare a report on the current status of the regulations by August 23, 1982. Such report shall contain the target publication and implementation dates for each of these regulations.

INDEPENDENT AGENCIES

SELECTIVE SERVICE SYSTEM

SALARIES AND EXPENSES

Amendment No. 66: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

SELECTIVE SERVICE SYSTEM

SALARIES AND EXPENSES

For an additional amount for "Salaries and expenses", \$150,000: Provided, That the Director of the Selective Service System shall establish at the time of mobilization a Civilian Review Board(s) to review appeals made by alternative service workers to their job assignments or reassignments.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The Committee of Conference has included language which would require that the Selective Service System establish, at the time of mobilization, civilian review boards for the purpose of reviewing appeals made by alternative service workers to their job assignments or reassignments. The \$150,000 provided is for program development and training costs of the civilian review boards.

VETERANS ADMINISTRATION

Amendment No. 67: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate transferring \$4,198,000 to the medical and prosthetic research appropriation for agent orange studies.

GRANTS TO THE REPUBLIC OF THE PHILIPPINES

The House and Senate reports on the Supplemental Appropriation Bill, 1982, address the item of Grants to the Republic of the Philippines. Both reports specifically state that, "The funds are to assure the continued effective care and treatment of United States veterans at the Veterans Memorial Medical Center at Manila." This language needs to be clarified insofar as the term "U.S. veterans" is concerned. Those veterans eligible for this "continued and effective care and treatment" by this medical facility are those who have served under the command and control of U.S. forces and were engaged in combat operations during World War II for and on behalf of the United States.

CHAPTER VIII—DEPARTMENT OF THE INTERIOR

BUREAU OF LAND MANAGEMENT

Amendment No. 68: Appropriates \$55,000,000 for management of lands and resources as proposed by the Senate instead of \$60,000,000 as proposed by the House for fire suppression costs.

Amendment No. 69: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

LAND ACQUISITION

For an additional amount for "Land acquisition", \$700,000: Provided, That notwithstanding the date cited in section 119(d) of Public Law 96-199, this amount together with \$1,920,000 appropriated under this head in Public Law 97-100 shall be available for acquisition of lands in the Yaquina Head Outstanding Natural Area, Oregon, to remain available until expended.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

It is expected that this sum will permit the Bureau of Land Management to complete acquisition of the Yaquina Head Outstanding Natural Area, Oregon.

UNITED STATES FISH AND WILDLIFE SERVICE

Amendment No. 70: Appropriates \$1,800,000 for resource management as proposed by the Senate instead of \$2,000,000 as proposed by the House. The reduction from the amount provided by the House is \$200,000 for additional training in fire fighting for Fish and Wildlife Service employees.

Amendment No. 71: Appropriates \$4,000,000 for construction and anadromous fish instead of \$8,000,000 as proposed by the House. The reduction from the amount provided by the House is \$4,000,000 for construction of the Gainesville, Florida national fish research facility.

NATIONAL PARK SERVICE

Amendment No. 72: Appropriates \$10,680,000 for construction instead of \$17,680,000 as proposed by the House and \$6,000,000 as proposed by the Senate. The increase above the amount proposed by the Senate includes \$2,000,000 for restoration of fire-damaged portions of the Home of Franklin Delano Roosevelt National Historic Site; \$680,000 for construction of a water system for the Kalaupapa National Historic Site, Hawaii, on Molokai Island; and \$2,000,000 for plans and specifications necessary for reconstruction of the Filene Center at Wolf Trap Farm Park for the Performing Arts. The managers agree on the importance of prompt Federal support for reconstruction, and expect that this strong support will prompt vigorous and generous support from the private sector. The Filene Center funds are provided subject to enactment of authorization which will address issues such as facility location, facility design, and loan payback provisions.

Amendment No. 73: Earmarks \$2,000,000 for construction instead of \$9,000,000 as proposed by the House for the Filene Center at the Wolf Trap Farm Park for the Performing Arts.

Amendment No. 74: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which requires the Part Service to obligate up to \$160,000 to rehabilitate the mounted

police training barn at the Rock Creek Park Horse Center for use by the National Center for Therapeutic Riding by November 1, 1982. The managers direct the Service to reprogram necessary funds to rehabilitate the Edgewater Stables as a replacement mounted police training facility.

Amendment No. 75: Appropriates \$30,000,000 for land acquisition and state assistance as proposed by the House instead of \$29,000,000 as proposed by the Senate.

Amendment No. 76: Earmarks \$13,500,000 for land acquisition for Big Cypress National Preserve, Florida, as proposed by the House instead of \$12,500,000 as proposed by the Senate.

Amendment No. 77: Earmarks \$5,500,000 for land acquisition for Cape Cod National Seashore, Massachusetts, as proposed by the Senate instead of \$6,500,000 as proposed by the House.

Amendment No. 78: Earmarks \$1,000,000 for land acquisition for the Cumberland Island National Seashore, Georgia, as proposed by the Senate.

GEOLOGICAL SURVEY

Amendment No. 79: Deletes the rescission of \$16,200,000 proposed by the House for the Exploration of National Petroleum Reserve in Alaska.

BUREAU OF MINES

Amendment No. 80: Provides \$4,073,000 in new budget authority and \$991,000 by transfer for mines and minerals as proposed by the House instead of \$4,198,000 in new budget authority and \$991,000 by transfer as proposed by the Senate.

The managers agree that within previously appropriated funds the Bureau of Mines is to provide \$100,000 for the initial phase of a project to apply the latest subsidence monitoring instruments in an integrated system for abandoned mines in Eastern Pennsylvania, and \$125,000 for planning and design of a controlled burnout technology demonstration.

OFFICE OF SURFACE MINING RECLAMATION AND ENFORCEMENT

Amendment No. 81: Appropriates \$13,251,000 for abandoned mine reclamation fund as proposed by the House.

Although funds have been provided in this Supplemental for the Rural Abandoned Mine Program to take advantage of the design work that is already complete, the managers agree that no further such projects will be funded in the manner described in section 406 of Public Law 95-87, the Surface Mining Reclamation and Control Act. Future projects of this type, including those currently in the planning stage, will be funded through the reclamation grants made available to the individual States. In this regard, the States are encouraged to utilize the expertise of the Soil Conservation Service and State and local conservation districts in planning reclamation projects.

BUREAU OF INDIAN AFFAIRS

Amendment No. 82: Appropriates \$18,100,000 for operation of Indian programs instead of \$7,000,000 as proposed by the House and \$22,900,000 as proposed by the Senate.

Up to \$5,450,000 of the funds identified for implementation of the proposed reorganization plan of the Bureau of Indian Affairs shall be reprogrammed to the social services program to meet the fiscal year 1982 requirements for general assistance and child welfare payments.

Amendment No. 83: Reported in technical disagreement. The managers on the part of

the House will offer a motion to recede and concur in the amendment of the Senate which provides \$11,100,000 for transfer to the State of Alaska.

The managers expect the State of Alaska to take action at the earliest possible date to provide the balance of the required funding for upgrading, operations and maintenance of the seventeen day schools which will be transferred to the State as of the 1982-83 school year.

Amendment No. 84: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following: *Provided further, That the Act of December 23, 1981 (95 Stat. 1391, 1400) is amended under the heading "Indian Affairs" in the paragraph headed "Tribal Trust Funds" by deleting the last sentence of said paragraph and inserting the following in lieu thereof:*

"No funds shall be deposited in such Indian money, proceeds of labor (IMPL) accounts after September 30, 1982. The unobligated balance in IMPL accounts as of the close of business on September 30, 1982, including the income resulting from the investment of funds from such accounts prior to such date, shall be transferred to and held in escrow accounts at the locations of the IMPL accounts from which they are transferred. Funds in such escrow accounts may be invested as provided in section 1 of the Act of June 24, 1938 (52 Stat. 1037; 25 U.S.C. 162a) and the investment income added to such accounts. The Secretary shall determine no later than September 30, 1985 (after consultation with appropriate tribes and individual Indians) the extent to which the funds held in such escrow accounts represent income from the investment of special deposits relating to specific tribes or individual Indians. Upon such a determination by the Secretary and express acceptance of the determination by the beneficiary, the Secretary shall transfer such funds to trust accounts for such tribes or individual Indians. Not more than 10 percent of the funds transferred to trust accounts for any tribe or individual Indian under this provision may be utilized to pay for legal or other representation relating to claims for such funds. Not to exceed two percent of the funds transferred from the IMPL accounts shall be available to reimburse the Bureau of Indian Affairs for administrative expenses incurred in determining ownership of the funds. Acceptance of a determination by the Secretary and the transfer of funds under this provision shall constitute a complete release and waiver of any and all claims by the beneficiary against the United States relating to the unobligated balance of IMPL accounts as of the close of business on September 30, 1982. During the period of October 1, 1985, through September 30, 1987, or earlier if a Secretarial determination on ownership and appropriate fund transfers has been completed, the funds remaining in such escrow accounts because they have not been transferred to trust accounts, may be expended subject to the approval of the Secretary for any purpose authorized under the Act of November 2, 1921 (42 Stat. 208; 25 U.S.C. 13) and requested by the respective governing bodies of the tribes at the locations where such accounts are maintained. The unobligated balances of such escrow accounts as of the close of business on September 30, 1987, shall be deposited into miscellaneous receipts of the Treasury."

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

OFFICE OF TERRITORIAL AFFAIRS

Amendment No. 85: Appropriates \$24,957,000 for Trust Territory of the Pacific Islands instead of \$21,400,000 as proposed by the House and \$26,457,500 as proposed by the Senate.

Amendment No. 86: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following: *to remain available until expended, of which \$1,000,000 shall be available for immediate payment to the people of Bikini under the terms and conditions as set forth in a trust agreement or amendment thereto approved by the Bikini/Kili Council subject only to the disapproval of the Secretary of the Interior: Provided, That \$19,600,000 shall be available for the relocation and resettlement of the Bikini people in the Marshall Islands, principally on Kili and Ejit Islands: Provided further, That such sum shall be paid to a trustee selected by the Bikini/Kili Council subject only to the disapproval of the Secretary of the Interior to be held in trust pursuant to the provisions of the aforementioned trust agreement or amendment thereto approved by the Bikini/Kili Council subject only to the disapproval of the Secretary of the Interior: Provided further, That such fund and the earnings and distribution therefrom shall not be subject to any form of Federal, State, or local taxation: Provided further, That \$2,000,000 of such fund shall remain available for future ex gratia distribution to the people of Bikini Atoll pursuant to the provisions of the trust agreement: Provided further, That the Governments of the United States and Trust Territory of the Pacific Islands shall not be liable in any cause of action in law or equity from the administration and distribution of the trust funds: Provided further, That of the remaining funds, \$2,500,000 shall be transferred to the "Administration of territories" account for technical assistance activities, to remain available until expended.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers agree that within the funds made available in this Supplemental, \$517,000 shall be made available for purchase of construction equipment for Ponape, Federated States of Micronesia, and \$2,500,000 shall be transferred to the administration of territories account for technical assistance activities. The managers direct the Office of Territorial and International Affairs to concentrate such technical assistance in the areas of financial management, communications, and maintenance training.

DEPARTMENT OF AGRICULTURE

FOREST SERVICE

Amendment No. 87: Appropriates \$64,900,000 for national forest system as proposed by the Senate instead of \$69,400,000 as proposed by the House. The reduction from the amount provided by the House is \$4,500,000 for timber stand improvement.

Amendment No. 88: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate

which provides \$3,000,000 for a partial payment in partial settlement of land claims of the Chugach Natives, Incorporated.

Amendment No. 89: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides that the uniform allowance for each uniformed employee of the Forest Service shall not exceed \$400 annually.

DEPARTMENT OF ENERGY

Amendment No. 90: Appropriates \$1,080,000 for fossil energy research and development instead of \$2,580,000 as proposed by the House and deleted by the Senate.

The agreement provides \$1,080,000 for additional funds for the Waltz Mill, Pennsylvania, fluid gasification research facility as proposed by the House. The Department of Energy is directed to propose a reprogramming to initiate planning and engineering design to convert the Homer City, Pennsylvania, facility into a test center capable of accommodating a variety of tests on different coal gasification processes.

The managers agree that the coal mining research and development activity is to be transferred from the Department of Energy to the Department of the Interior. The coal preparation program is to remain in the Department of Energy.

The managers further agree to language to conform action taken in Public Law 97-100 to consolidate leasing functions in the Department of the Interior.

Language proposed by the House to prohibit the Department of Energy from proceeding with a reduction in force in Fossil Energy headquarters is stricken.

Amendment No. 91: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment insert the following:

FOSSIL ENERGY CONSTRUCTION (Deferral)

Of the funds made available for obligation under this heading in the Department of the Interior and Related Agencies Appropriation Act, 1982 (Public Law 97-100) for the continued design of the Solvent Refined Coal-I (SRC-I) demonstration facility (Project No. 78-2-d), \$64,000,000 is hereby deferred until the enactment of the Department of the Interior and Related Agencies Appropriation Act, 1983. Of the remaining funds, \$28,100,000 shall be used to undertake SRC-I post-baseline activities of the type specified in ICRC-DOE letter numbered 1629 entitled Technical Scope of Work for the Post-Baseline Period; \$22,000,000 shall be used for the termination costs of SRC-I; and \$5,000,000 shall be used for administrative expenses incurred by the Department of Energy in carrying out the aforementioned activities.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers agree that of the \$28,100,000 made available for undertaking the various SRC-I Post-Baseline activities, \$4,500,000 shall be used for toxicological studies and no funds shall be made available for identified market development activities.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

HEALTH SERVICES ADMINISTRATION

Amendment No. 92: Appropriates \$11,200,000 for Indian health facilities instead of \$17,000,000 as proposed by the

House and \$4,400,000 as proposed by the Senate.

The increase above the amount provided by the Senate will allow for construction of sanitation facilities needed for housing units constructed with HUD funds which will be completed in this fiscal year.

The managers agree that no funding for sanitation facilities associated with HUD unit will be provided to the Indian Health Service in fiscal year 1983. HUD and the Indian Health Service are, therefore, directed to continue implementation of the Memorandum of Understanding in order to provide the necessary sewer and water facilities for HUD Indian housing units.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

INSTITUTE OF MUSEUM SERVICES

Amendment No. 93: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides \$720,000 for the Institute of Museum Services to remain available for expenditure until September 30, 1983.

The managers agree that not to exceed \$75,000 may be used for moving expenses and increased administrative costs related to the move.

PENNSYLVANIA AVENUE DEVELOPMENT CORPORATION

The managers agree that \$8,000,000 previously appropriated for relocation, historic preservation and demolition shall be reprogrammed to purchase real estate which will be converted to public park use.

Amendment No. 94: Restores House language which prohibits the use of funds for any activity related to mineral or geothermal leasing on certain designated Federal lands in the municipal watersheds of the cities of Seattle and Tacoma, Washington.

CHAPTER IX—DEPARTMENT OF LABOR

EMPLOYMENT AND TRAINING ADMINISTRATION

EMPLOYMENT AND TRAINING ASSISTANCE

Amendment No. 95: Appropriates \$4,000,000 for construction of facilities at the Joliet, Illinois Job Corps Center, instead of \$8,500,000 as proposed by the House.

(Rescission)

Amendment No. 96: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment which rescinds \$48,186,000 of unobligated balances. The House did not consider this rescission.

COMMUNITY SERVICE EMPLOYMENT FOR OLDER AMERICANS

Amendment No. 97: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment with an amendment as follows: *Provided, That not more than \$46,325,840 shall be for grants to States under paragraphs (3) of section 506(a) of the Older Americans Act of 1965, as amended.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS

Amendment No. 98: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment with an amendment as follows:

GRANTS TO STATES FOR UNEMPLOYMENT INSURANCE AND EMPLOYMENT SERVICES

For an additional amount for "Grants to States for Unemployment Insurance and Employment Services", \$20,000,000, to remain available until September 30, 1983, to be used only for necessary administrative expenses for carrying out a Federal supplemental benefits program, subject to enactment of authorizing legislation.

ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS

Funds appropriated under this head shall be available for non-repayable advances for a Federal supplemental benefits program, subject to enactment of authorizing legislation.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The Conferees agree with the intent of the Senate amendment to make funding available for a Federal supplemental benefits program automatically upon enactment of authorizing legislation. The bill language agreed to by the Conferees clarifies that available uncommitted balances in the Advances account be utilized for such benefit payments.

The Conferees are agreed that if additional appropriations are necessary, they will be made available in a subsequent appropriations bill.

LABOR-MANAGEMENT SERVICES ADMINISTRATION SALARIES AND EXPENSES (Transfer of funds)

Amendment No. 99: Transfers \$400,000 to this account as proposed by the Senate instead of \$1,157,000 as proposed by the House.

OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION

SALARIES AND EXPENSES

Amendment No. 100: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment which permits the Secretary of Labor to grant final approval to those State plans under section 18 of the Act that have staffing levels that are at least equivalent to Federal staffing levels.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

CENTER FOR DISEASE CONTROL

PREVENTIVE HEALTH SERVICES

Amendment No. 101: Appropriates \$11,500,000 as proposed by the Senate, instead of \$11,000,000 as proposed by the House.

HEALTH RESOURCES ADMINISTRATION HEALTH RESOURCES

Amendment No. 102: Restores appropriations of \$7,000,000 for a grant for construction of a health teaching facility under section 720 (a)(1) of the Public Health Service Act, as proposed by the House.

Amendment No. 103: Reported in technical disagreement. The Managers on the part of the House will offer a motion to recede and concur in the Senate amendment, which provides that funds shall not be withheld from health systems agencies which meet certain staffing criteria.

HEALTH CARE FINANCING ADMINISTRATION GRANTS TO STATES FOR MEDICAID

Amendment No. 104: Appropriates \$112,000,000 as proposed by the Senate instead of \$142,000,000 as proposed by the House.

DEPARTMENT OF EDUCATION
COMPENSATORY EDUCATION FOR THE
DISADVANTAGED

Amendment No. 105: Changes reference to "each county" as proposed by the Senate, instead of "State and local educational agencies" as proposed by the House.

Amendment No. 106: Changes reference to "county" as proposed by the Senate, instead of "local educational agency" as proposed by the House.

Amendment No. 107: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment which provides that in the case of Puerto Rico, poverty data gathered by the Bureau of the Census in the 1975 survey of income and education shall be used if 1980 census data are not available.

The Conferees are agreed that the \$148,000,000 in supplemental funds made available for fiscal year 1982 will be allocated only to those counties which stand to gain or lose depending on whether 1970 or 1980 Census data are used. The intent is to ensure that if 1970 Census data are used in the distribution of the regular Title I appropriations for the 1982-1983 school year, supplemental funds would be allocated only to those counties which would realize a gain if 1980 Census data were used as the basis for allocating funds. Conversely, if 1980 Census data are the basis for making Title I allocations under the regular appropriation, funds under the supplemental appropriation would be allocated only to those counties which would have a lower allocation as a result of not using 1970 Census data.

In addition the Conferees further note that in cases where Title I funds are allocated to counties on the basis of 1980 Census data, the Department shall use the criteria of poverty established under the 1980 Census for determining each county's allocation.

SCHOOL ASSISTANCE IN FEDERALLY AFFECTED
AREAS

Amendment No. 108: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment which appropriates \$200,000 under section 7 of Public Law 81-874 for the Waubay School District in South Dakota. The House bill proposed no funding for this purpose.

VOCATIONAL AND ADULT EDUCATION

Amendment No. 109: Appropriates \$2,520,000 as proposed by the House. The Senate bill proposed to delete this appropriation.

STUDENT FINANCIAL ASSISTANCE

Amendment No. 110: Appropriates \$217,000,000 as proposed by the Senate, instead of \$169,000,000 as proposed by the House.

Amendment No. 111: Earmarks \$77,000,000 for Title IV, part A, subpart 2 (supplemental educational opportunity grants) of the Higher Education Act as proposed by the Senate, instead of \$2,000,000 as proposed by the House.

HIGHER AND CONTINUING EDUCATION

Amendment No. 112: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate, amended to read as follows:

For an additional amount to carry out title III of the Higher Education Act, notwithstanding section 516(c)(1) of the Omnibus Reconciliation Act of 1981, \$10,000,000

which shall remain available for obligation by the Secretary of Education through September 30, 1983, of which \$5,000,000 shall enable the Secretary (1) to award grants under title III of the Higher Education Act notwithstanding section 347 of that Act and (2) to pay expenditures of the Secretary in connection with the awarding of such grants: Provided, That the Secretary may award these funds to an eligible institution only if the institution is not eligible to receive title III funds under section 347(e) of the Act in fiscal year 1982 and its enrollment of Hispanic and Native American students, as reported on the latest available Education Department Higher Education General Information Survey (HEGIS), is at least 45 per centum: Provided further, That the remaining \$5,000,000 shall enable the Secretary to award grants under parts A and B of title III of the Act to eligible institutions which has an application approved, but did not receive a grant in fiscal year 1982: Provided further, That any funds that were appropriated for part B of title III of the Higher Education Act for fiscal year 1982 and were reserved in accordance with section 347 (e) of the Act but not awarded in fiscal year 1982 to institutions with special needs that historically serve substantial numbers of black students, shall remain available for obligation by the Secretary of Education through September 30, 1983 to enable the Secretary (1) to award such funds to those institutions with special needs that historically serve black students that were not selected for funding by the Secretary under title III of the Act in fiscal year 1982, and (2) to provide technical assistance to such institutions to assist them in applying for such funds, notwithstanding section 321 (b) of the Act: Provided further, That of the amounts that shall remain available for obligation under part B of title III of the Higher Education Act, \$300,000 shall be for two institutions of higher learning in Vermont under part A of title III of that Act.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

COLLEGE HOUSING LOANS

Amendment No. 113: Directs that the college housing loan program shall operate under the terms and conditions contained in H.R. 4560 as passed by the House of Representatives on October 6, 1981 except that the gross commitments for the principal amount of direct loans shall be \$40,000,000, instead of \$75,000,000 as proposed by the House. The Senate proposed to strike the directive in the House bill.

The Conferees are aware that between \$300,000,000 and \$400,000,000 will be required to redeem participation sales certificates maturing in 1987 and 1988. Redemption of the principal of these certificates is left to the Department's discretion; however the Government National Mortgage Association requires that all principal must be paid at the time the certificates mature. In order to deal with this problem in appropriation bills for 1983 and beyond, the conferees direct the Secretary of Education to develop and submit a clear-cut, long-term plan to the House and Senate Committees on Appropriations. The plan should be submitted by September 15, 1982 and should also include a schedule for the repayment of the certificates showing how much of the certificates can be redeemed each year under current assumptions of receipts and expenses, as well as the sources of receipts and expenses.

CHAPTER X—LEGISLATIVE BRANCH

SENATE

Amendment No. 114: Reported in technical disagreement. Inasmuch as the amendment relates solely to the Senate and in accord with long practice, under which each body determines its own housekeeping requirements and the other concurs without intervention, the managers on the part of the House will offer a motion to recede and concur in the Senate amendment.

Amendment No. 115: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur with the Senate amendment which appropriates \$160,000 for the expenses of the Commission on Executive, Legislative, and Judicial Salaries.

HOUSE OF REPRESENTATIVES

ALLOWANCES AND EXPENSES

Amendment No. 116: Appropriates \$5,987,000 for allowances and expenses, contingent fund of the House, as proposed by the House.

CHAPTER XII—DEPARTMENT OF
TRANSPORTATION

COAST GUARD

ACQUISITION, CONSTRUCTION, AND
IMPROVEMENTS

Amendment No. 117: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: In lieu of the matter inserted by said amendment, insert the following:

ACQUISITION, CONSTRUCTION, AND
IMPROVEMENTS

Of the unobligated balances available under this heading, not to exceed \$16,000,000 shall be reprogrammed upon the approval of the House and Senate Committees on Appropriations for the acquisition of an aircraft to replace a C-130 aircraft which had been based at Kodiak, Alaska.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees expect the Coast Guard to promptly submit a reprogramming request regarding the acquisition of a replacement aircraft for the C-130 that was recently destroyed. For the interim, the Coast Guard shall make every reasonable effort to deploy an existing aircraft to Kodiak, Alaska.

ALTERATION OF BRIDGES

Amendment No. 118: Appropriates \$3,000,000 as proposed by the House.

FEDERAL AVIATION ADMINISTRATION
OPERATIONS

Amendment No. 119: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: In lieu of the matter stricken and inserted by said amendment, insert the following: \$93,200,000, of which \$57,500,000 shall remain available until September 30, 1983.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 120: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which makes the funds appropriated for international security charges available until expended.

Amendment No. 121: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which makes the funds transferred from the appropriation "Construction, Metropolitan Washington airports" available until expended.

FEDERAL HIGHWAY ADMINISTRATION

INTERSTATE TRANSFER GRANTS—HIGHWAYS

Amendment No. 122: Appropriates \$112,500,000 instead of \$197,000,000 as proposed by the House. The conference agreement includes the following amounts:

Albany	\$8,000,000
New York	1,000,000
Iowa	1,000,000
Twin Cities, Minn.	1,400,000
Omaha	4,000,000
New Jersey	7,500,000
Washington, D.C.	5,000,000
Philadelphia	5,000,000
Hartford-New Britain	10,000,000
Minneapolis	2,200,000
Northeast Illinois	20,000,000
Tucson	3,000,000
Denver	5,000,000
Oregon	10,000,000
Baltimore	1,500,000
Duluth	2,400,000
Indianapolis	8,000,000
Cleveland	12,500,000
Memphis	5,000,000

Total 112,500,000

The conferees recognize that this level of funding is far below what is necessary to fulfill the obligation that the Federal Government has to fund Interstate transfer grant projects. The conferees note that many meritorious Interstate transfer projects have been brought to the attention of the Appropriations Committees and these projects will be given full consideration in the fiscal year 1983 bill. The conferees continue to acknowledge the special consideration which should be given to cities which had original contract authority under this program.

ACCESS HIGHWAYS TO PUBLIC RECREATION AREAS ON CERTAIN LAKES

Amendment No. 123: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates \$6,875,000.

FEDERAL RAILROAD ADMINISTRATION

RAIL SERVICE ASSISTANCE

Amendment No. 124: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which has the effect of making Rail service assistance funds available until expended.

GRANTS TO THE NATIONAL RAILROAD PASSENGER CORPORATION

Amendment No. 125: Deletes transfer of \$8,400,000 proposed by the House.

The conferees direct Amtrak and the Department of Transportation to jointly evaluate the merits of extending the Hoosier State route from its present route between Chicago and Indianapolis to a new route between Chicago and Cincinnati via Indianapolis and Shelbyville, Indiana. This study shall determine if operation of two trains per day over this expanded route will produce a short term avoidable loss of less than 9 cents per passenger mile (as adjusted to reflect constant 1979 dollars); ridership of more than 80 passenger miles per train mile; and a revenue to operating cost

ratio of at least 50 percent. Results of this evaluation are to be reported to the Appropriations Committees no later than October 15, 1982.

Amtrak is also directed to immediately set aside \$33,400,000 from its fiscal year 1982 operating and capital appropriation for possible use in the Indianapolis to Cincinnati corridor. Should the joint Amtrak-DOT study conclude that the extended Hoosier State route will meet all of the above mentioned criteria, Amtrak is directed to immediately proceed to submit to Congress an amendment to the statutory Route and Service Criteria pursuant to 45 U.S.C. 563(c)(3)(B) which waives Amtrak's procedures for making route and service decisions. Upon the effective date of this amendment, Amtrak shall immediately proceed to purchase this line from Conrail for the agreed upon price of \$8,400,000, and to upgrade the Indianapolis to Cincinnati line to Class 5 track standards. The conferees expect this track rehabilitation work to be accomplished over two work seasons.

The conferees also strongly encourage Amtrak to secure assistance from the State of Indiana, local governments and the private sector to share the cost of improving rail passenger service in the Chicago to Cincinnati corridor. Such assistance could include grade crossing safety improvements, marketing of Amtrak services, station improvements, assistance for local rail freight service, or other capital rehabilitation improvements.

The conferees expect the Department of Transportation to take all necessary actions to ensure that the October 15, 1982, deadline is met.

Amendment No. 126: Reported in technical disagreement. Managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which converts the existing deferral to a permanent exemption from State and local taxes.

REDEEMABLE PREFERENCE SHARES

Amendment No. 127: Deletes heading "Including Transfer of Funds" as proposed by the Senate.

Amendment No. 128: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates \$20,000,000 and has the effect of making redeemable preference share funds available until expended. The House proposed appropriating \$25,000,000 for fiscal year 1982, of which \$5,000,000 was to be derived by transfer.

COMMUTER RAIL SERVICE

Amendment No. 129: Inserts "Including" in the heading as proposed by the House.

Amendment No. 130: Appropriates \$5,000,000 to carry out the commuter rail activities authorized by section 601(d) of the Rail Passenger Service Act and \$5,000,000 to carry out section 1139(b) of Public Law 97-35 as proposed by the House and deletes restrictive language proposed by the House.

URBAN MASS TRANSPORTATION ADMINISTRATION

URBAN DISCRETIONARY GRANTS

Amendment No. 131: Appropriates \$15,000,000 instead of \$29,500,000 as proposed by the House. The conference agreement includes \$15,000,000 for the Wilshire Corridor project in Los Angeles.

The conferees will not accept any further delay in releasing preliminary engineering funds for the Santa Clara County Guadalupe Corridor project. The conferees direct

UMTA to release these funds immediately and expect notification to that effect by September 1, 1982.

Amendment No. 132: Reported in technical disagreement. The Managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: In lieu of the matter inserted by said amendment, insert the following: *From funds previously appropriated for the Urban Mass Transportation Administration, Urban discretionary grants advances shall be made immediately, upon the approval of the House and Senate Committees on Appropriations, toward extraordinary costs permitted under full funding contracts as necessary to insure project continuity.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees agree to language permitting advances toward extraordinary cost payments, following approval by the House and Senate Committees on Appropriations, and direct that this authority be used to make the payments to Buffalo, New York, Dade County, Florida and other locations as mutually agreed to by the Urban Mass Transportation Administration and the appropriate transit authorities.

INTERSTATE TRANSFER GRANTS—TRANSIT

Amendment No. 133: Appropriates \$22,000,000 as proposed by the House. The conference agreement includes the following amounts:

Chicago	\$5,000,000
Boston	10,000,000
Sacramento	5,500,000
Duluth	500,000
Portland	1,000,000

Total 22,000,000

RELATED AGENCIES

Amendment No. 134: Conforms heading.

NATIONAL TRANSPORTATION SAFETY BOARD

EMERGENCY FUND

Amendment No. 135: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates \$1,000,000.

DEPARTMENT OF THE TREASURY

OFFICE OF THE SECRETARY

INVESTMENT IN FUND ANTICIPATION NOTES

Amendment No. 136: Deletes heading "Including Transfer of Funds" as proposed by the Senate.

Amendment No. 137: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates \$20,000,000 and has the effect of making redeemable preference share funds available until expended. The House proposed appropriating \$25,000,000 for fiscal year 1982, of which \$5,000,000 was to be derived by transfer.

CHAPTER XIII—DEPARTMENT OF THE TREASURY

INTERNAL REVENUE SERVICE

Amendment No. 138: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following: *Provided, That none of the funds appropriated by this act shall be used to impose or assess any tax*

due on custom-made firearms under subchapter D of chapter 32 of the Internal Revenue Code of 1954, as amended, sections 4161 and 4181, in all cases where less than fifty items are manufactured or produced per annum.

The managers on the part of the Senate will offer a motion to concur in the amendment of the House to the amendment of the Senate.

This amendment prohibits the appropriation of funds to collect certain taxes due on custom-made firearms.

Amendment No. 139: Appropriates \$72,354,000 for taxpayer service and returns processing as proposed by the Senate instead of \$77,232,000 as proposed by the House.

Amendment No. 140: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate. This amendment provides \$340,000 for the tax counseling for the elderly program to retroactively reimburse volunteer tax counselors.

Amendment No. 141: Appropriates \$15,563,000 for examinations and appeals as proposed by the House instead of \$14,563,000 as proposed by the Senate.

Amendment No. 142: Appropriates \$19,121,000 for investigations and collections as proposed by the House instead of \$16,604,000 as proposed by the Senate.

ADMINISTRATIVE PROVISION

Amendment No. 143: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate. This amendment prohibits the expenditure of funds for redecorating and remodeling the offices of the Commissioner and Chief Counsel of the Internal Revenue Service.

UNITED STATES SECRET SERVICE

Amendment No. 144: Appropriates \$8,998,000 for salaries and expenses instead of \$7,080,000 as proposed by the House and \$11,272,000 as proposed by the Senate. These funds would provide for essential protective travel, overtime, and related basic functions of the Secret Service for the remainder of fiscal year 1982.

Amendment No. 145: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate. This amendment provides that \$1,518,000 for expansion of the Beltsville, Maryland, training facility, shall remain available until expended.

ADMINISTRATIVE PROVISION

Amendment No. 146: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate. This amendment would restrict the authority of the Treasury Department Inspector General to non-law enforcement activities until such time as this matter is resolved by basic legislation.

UNITED STATES POSTAL SERVICE

Amendment No. 147: Appropriates \$39,000,000 for payment to the Postal Service Fund as proposed by the Senate instead of \$20,000,000 as proposed by the House and deletes language proposed by the Senate. This amendment appropriates \$39,000,000 for revenue foregone to subsidize certain preferred rate mailers.

Amendment No. 148: Rescinds \$208,660,000 from the appropriation ac-

count, "Payment to the Postal Service Fund" as proposed by the House instead of \$189,660,000 as proposed by the Senate.

INDEPENDENT AGENCIES

GENERAL SERVICES ADMINISTRATION

NATIONAL ARCHIVES AND RECORDS SERVICE

Amendment No. 149: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate amended to read as follows:

In lieu of the matter inserted by said amendment, insert the following:

NATIONAL ARCHIVES AND RECORDS SERVICE OPERATING EXPENSES

For an additional amount for "Operating expenses", \$4,100,000, to remain available until expended, of which \$1,500,000 shall be for allocations and grants for historical publications and records, and \$600,000 shall be for the preservation of House and Senate historical records.

The managers on the part of the Senate will offer a motion to concur in the amendment of the House to the amendment of the Senate.

This amendment appropriates \$4,100,000 for operating expenses, of which \$1,500,000 is for allocations and grants for historical publications and \$300,000 each for the preservation of House and Senate historical records.

NATIONAL DEFENSE STOCKPILE TRANSACTION FUND

Amendment No. 150: Reported in disagreement.

TITLE II

INCREASED PAY COSTS

LEGISLATIVE BRANCH

SENATE

Amendment No. 151: Reported in technical disagreement. Inasmuch as the amendment relates solely to the Senate and in accord with long practice, under which each body determines its own housekeeping requirements and the other concurs without intervention, the managers on the part of the House will offer a motion to recede and concur in the Senate amendment.

HOUSE OF REPRESENTATIVES

Amendment No. 132: Appropriates \$10,484,000 for increased pay costs, as proposed by the House.

SENATE OFFICE BUILDINGS

Amendment No. 153: Reported in technical disagreement. Inasmuch as the amendment relates solely to the Senate and in accord with long practice, under which each body determines its own housekeeping requirements and the other concurs without intervention, the managers on the part of the House will offer a motion to recede and concur in the Senate amendment.

HOUSE OFFICE BUILDINGS

Amendment No. 154: Appropriates \$200,000 as proposed by the House.

DEPARTMENT OF AGRICULTURE

FOREST SERVICE

Amendment No. 155: Appropriates \$18,813,000 for the national forest system as proposed by the House instead of \$16,813,000 as proposed by the Senate.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

OPERATIONS, RESEARCH, AND FACILITIES

Amendment No. 156: Appropriates \$21,294,000 as proposed by the Senate instead of \$20,000,000 as proposed by the House.

DEPARTMENT OF DEFENSE— MILITARY

MILITARY PERSONNEL

MILITARY PERSONNEL, AIR FORCE

Amendment No. 157: Appropriates \$1,198,858,000 as proposed by the Senate instead of \$1,202,558,000 as proposed by the House.

OPERATION AND MAINTENANCE

OPERATION AND MAINTENANCE, ARMY

Amendment No. 158: Appropriates \$180,000,000 instead of \$234,500,000 as proposed by the House and \$125,500,000 as proposed by the Senate.

OPERATION AND MAINTENANCE, AIR FORCE

Amendment No. 159: Appropriates \$86,774,000 instead of \$67,300,000 as proposed by the House and \$126,400,000 as proposed by the Senate.

Amendment No. 160: Provides \$75,526,000 in transfers instead of \$95,200,000 as proposed by the House and \$36,100,000 as proposed by the Senate.

Amendment No. 161: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: Restore the matter stricken by said amendment, amended to read as follows: , \$10,000,000 shall be derived by transfer from "Missile procurement, Air Force, 1982/1984", \$12,000,000 shall be derived by transfer from "Aircraft procurement, Air Force, 1982/1984", and \$17,626,000 shall be derived by transfer from "Research, development, test, and evaluation, Navy, 1982/1983"

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

A summary of the transfers approved by the conferees is as follows:

[In thousands of dollars]

Source of transfer	Program	Amount
Missile procurement, Air Force—1982/1984	Maverick	10,000
Aircraft procurement, Air Force—1982/1984	E-3A	12,000
Research, Development, Test, and Evaluation, Navy 1982/1983	Seafire	17,100
Do	Dual mini sins	526

With regard to Seafire, the conferees agree to transfer of funds from Research, Development, Test, and Evaluation, Navy, 1982/1983. The conferees understand that the Navy is now restructuring the Seafire program and is in the process of developing a new Request for Proposal for a semi-active laser guided projectile. These actions are being taken pursuant to direction received from the authorizing committees to continue the development of these programs for placement on DDG-51 class ships.

The conferees agree that transfer of funds from Missile Procurement, Air Force, 1982/1984, shall be from the Maverick program in lieu of the Rapier program, as requested by the Department.

The conferees agree that transfer of funds shall be from the E-3A program in Aircraft Procurement, Air Force, 1982/1984, in lieu of the ABRES program in Research, Development, Test, and Evaluation, Air Force, 1982/1983, as requested by the Department.

DEPARTMENT OF HEALTH AND HUMAN SERVICES
HEALTH SERVICES ADMINISTRATION

Amendment No. 162: Appropriates \$18,160,000 for Indian health services as proposed by the House instead of \$16,250,000 as proposed by the Senate.

DEPARTMENT OF THE INTERIOR

UNITED STATES FISH AND WILDLIFE SERVICES
Amendment No. 163: Appropriates \$4,572,000 for resource management as proposed by the House instead of \$3,400,000 as proposed by the Senate.

DEPARTMENT OF TRANSPORTATION
FEDERAL HIGHWAY ADMINISTRATION

Amendment No. 164: Restores language proposed by the House temporarily suspending the Federal Highway Administration's rule regarding design standards for resurfacing, restoration and rehabilitation of streets and highways other than freeways.

COAST GUARD

Amendment No. 165: Appropriates \$78,100,000 for Operating expenses as proposed by the Senate instead of \$92,100,000 as proposed by the House.

NATIONAL AERONAUTICS AND SPACE
ADMINISTRATION

Amendment No. 166: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate providing that \$50,000,000 of the \$80,000,000 appropriated for research and program management shall remain available until September 30, 1983.

VETERANS ADMINISTRATION

Amendment No. 167: Deletes language proposed by the House appropriating \$1,078,000 for medical administration and miscellaneous operating expenses.

OTHER INDEPENDENT AGENCIES

ADVISORY COUNCIL ON HISTORIC
PRESERVATION

Amendment No. 168: Deletes funds for salaries and expenses proposed by the House for pay costs.

CIVIL AERONAUTICS BOARD

Amendment No. 169: Appropriates \$375,000 for Salaries and expenses instead of \$700,000 as proposed by the House. The conferees are pleased that they have been able to effect a substantial savings relative to the Board's request. In addition, the Board should realize that it must more aggressively cut expenses and prepare for the early transfer of its remaining functions to other agencies, since "sunset" legislation is expected to be promptly forthcoming.

FEDERAL COMMUNICATIONS COMMISSION

Amendment No. 170: Appropriates \$3,000,000 as proposed by the Senate instead of \$3,124,000 as proposed by the House.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Amendment No. 171: Restores language proposed by the House and stricken by the Senate indicating that the funds are to be derived by transfer from the State and local assistance appropriation.

Amendment No. 172: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: and an additional \$500,000 to be derived by transfer from "Emergency planning and assistance", for a total available by transfer of \$2,584,000.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees agree that none of the transferred funds are to be derived from the flood plain management or fire prevention and control programs.

INTERNATIONAL COMMUNICATION AGENCY
SALARIES AND EXPENSES

Amendment No. 173: Appropriates \$7,115,000 in new budget (obligational) authority instead of making this amount available by transfer from "Acquisition and Construction of Radio Facilities" as proposed by the Senate.

NATIONAL FOUNDATION ON THE ARTS AND THE
HUMANITIES

NATIONAL ENDOWMENT FOR THE ARTS
Amendment No. 174: Appropriates \$170,000 for salaries and expenses as proposed by the Senator instead of \$250,000 as proposed by the House.

SMITHSONIAN INSTITUTION

Amendment No. 175: Deletes funds for the National Gallery of Art proposed by the House for pay costs.

TITLE III—GENERAL PROVISIONS

Amendment No. 176: Deletes House language which limits outside income of Members of Congress. Members of the House will remain subject to the existing House rule on this matter.

Amendment No. 177: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

Sec. 303. Notwithstanding any other provision of law, funds provided to the Department of Energy by this Act or any other Act for any fiscal year shall be used to maintain not less than the number of full-time permanent Federal employees specified herein for each of the following offices, agencies, or categories of activity: (1) The Office of the Assistant Secretary for Conservation and Renewables, 352 employees, of which not less than 154 employees shall be assigned to conservation research and development activities, and not less than 180 employees shall be assigned to State and local conservation activities; (2) The Office of the Assistant Secretary for Fossil Energy, 754 employees, of which not less than 150 employees shall be assigned to activities of the headquarters organization, not less than 280 employees shall be assigned to the Pittsburgh Energy Technology Center, and not less than 250 employees shall be assigned to the Morgantown Energy Technology Center; (3) The Economic Regulatory Administration, 450 employees, of which not less than 40 employees shall be assigned to the Office of Fuels Conversion; and (4) The Energy Information Administration, 490 employees: Provided, That, notwithstanding any other provision of law, in any case in which the President proposes to rescind, reserve, or defer funds which are available to maintain the Federal personnel levels required by this section, the President shall continue to obligate such funds in order to maintain such levels until a period of 45 days of continuous session of Congress has expired after the President has transmitted to the Congress a special message with respect to such rescission, reservation, or deferral under section 1012 or 1013 of the Impoundment Control Act of 1974, as the case may be: Provided further, That if, within such 45-day period, the Con-

gress passes a rescission bill with respect to any such rescission or reservation or fails to pass an impoundment resolution with respect to any such reservation, the President may withhold from obligation the funds for which such special message was transmitted with respect to such rescission, reservation, or deferral; Provided further, That nothing in the foregoing provisions shall permit the transfer of funding or full-time permanent positions provided for programs and activities funded in Energy and Water Development Appropriation Acts to programs or activities funded in Interior and Related Agencies Appropriation Acts or vice versa.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers reluctantly have included language in section 303 of the bill which requires the Department to maintain employment at no less than the levels specified for certain programs. The managers are concerned that recent and proposed personnel reductions in the Department of Energy may contribute to ineffective execution of certain departmental programs funded in appropriations acts for the Department of Interior and Related Agencies. A July 19, 1982 report by the General Accounting Office confirms these misgivings. Actions by the Department ignoring previous report guidance, a letter from the Chairman and Ranking Minority Members of the House and Senate Department of the Interior and Related Agencies Appropriations subcommittees, and the intent of the House as expressed in passage of H.R. 6863 on July 29, 1982, have left the managers no alternative to recommending the language which appears in section 303.

Should the Department determine that a lower than specified level of employment would be appropriate for a particular program, a special message in accordance with the provisions of the Impoundment Control Act of 1974 shall be transmitted to the Congress, supplemented by a detailed analysis in support of the recommended level. The language also prohibits the withholding of funds necessary to maintain the specified employment levels unless Congress has approved a special message or, in the event of a deferral proposal, a period of forty-five continuous days of legislative session has elapsed.

Within the 450 employees allocated to the Economic Regulatory Administration, the Managers concur that no less than 160 shall be auditors.

With respect to the Fossil Energy Program, the Department of Energy has indicated to the Office of Management and Budget the need for an allocation of 93 additional full-time equivalent positions on a temporary basis for the operation of the energy technology centers in Bartlesville, Oklahoma; Grand Forks, North Dakota; and Laramie, Wyoming. This allocation would permit the continued Federal operation of the Grand Forks and Laramie Centers until January 1, 1983, and the Bartlesville Center until May 1, 1983. The managers understand that the Department of Energy assumes that the operation of these centers may be transferred to non-Federal entities before the dates cited. Because a specific allocation of Federal positions in law could interfere with the orderly transfer of these facilities to private operators, no such allocation is included in the language contained in section 303.

The managers reserve judgement on the merits of any conversion of these three cen-

ters to a government-owned-contractor-operated arrangement. The Department is directed to maintain the present Federal employment levels at the Bartlesville, Grand Forks, and Laramie technology centers until a transition plan detailing cost saving and contractual obligations is presented to the House and Senate Committees on Appropriations for review. This approach will permit a smooth and efficient transfer of the functions of the centers at some future date.

For programs and activities funded in Energy and Water Development Appropriation Acts, the managers expect the Department to honor its commitments to make no major personnel adjustments from May 26, 1982, staffing levels pending completion of Congressional action to resolve appropriate funding and staffing levels in the regular fiscal year 1983 appropriation bill.

Amendment No. 178: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate relating to funds earmarked for use for flood control and related measures on the Cowlitz and Toutle Rivers in the Urgent Supplemental Appropriations Act of 1982.

Amendment No. 179: Deletes language proposed by the Senate prohibiting the Department of Transportation from using funds contained in this Act to obtain judicial review with respect to Federal Motor Vehicle Safety Standard No. 208.

Amendment No. 180: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment changing the section number. The amendment expresses the sense of Congress that the proposed regulations of the Department of Education implementing part B of the Education of the Handicapped Act should not become effective until after the 97th Congress reconvenes for a special session or the 98th Congress has convened, whichever first occurs.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 181: Deletes language proposed by the Senate regarding testing procedures of certain Federal agencies.

Amendment No. 182: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

SEC. 306. Effective upon enactment of this Act and for the remainder of fiscal year 1983, notwithstanding any other provision of law, no funds may be paid out of the Treasury of the United States or out of any fund of a Government corporation to any private individual or corporation in satisfaction of any assurance agreement or payment guarantee or other form of loan guarantee entered into by any agency or corporation of the United States Government with respect to loans made and credits extended to the Polish People's Republic, unless the Polish People's Republic has been declared to be in default of its debt to such individual or corporation or unless the President has provided a monthly written report to the Speaker of the House of Representatives and the President of the Senate explaining the manner in which the national interest of the United States has been served by any payments during the previous month under loan guarantee or credit assurance agree-

ment with respect to loans made or credits extended to the Polish People's Republic in the absence of a declaration of default.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 183: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed, insert the following:

SEC. 307. Notwithstanding any other provision of law, none of the funds made available by this or any other Act, heretofore or hereafter enacted, may be used to carry out section 103 and section 305(d)(3) of S. 1193 "An Act to authorize appropriations for fiscal years 1982 and 1983 for the Department of State, the International Communication Agency and the Board for International Broadcasting, and for other purposes", unless reprogrammed in accordance with the procedures established by the Committees on Appropriations of the House and Senate.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

CONFERENCE TOTAL—WITH COMPARISONS

NEW BUDGET AUTHORITY

The total new budget (obligational) authority for the fiscal year 1982 recommended by the Committee of Conference, with comparisons to the fiscal year 1982 budget estimates, and the House and Senate bills for 1982 follow:

Budget estimates of new (obligational) authority, fiscal year 1982.....	\$16,343,043,000
House bill, fiscal year 1982	14,021,579,924
Senate bill, fiscal year 1982.....	14,391,507,424
Conference agreement, fiscal year 1982	14,578,111,924
Conference agreement compared with:	
Budget estimates of new (obligational) authority, fiscal year 1982.....	-1,764,931,076
House bill, fiscal year 1982	+556,532,000
Senate bill, fiscal year 1982	+186,604,500

RESCISSIONS

In addition, the total rescission of budget authority recommended by the Committee of Conference, with comparisons to the President's proposals, and the House and Senate bills follow:

President's proposals	-\$286,859,000
House bill	-264,860,000
Senate bill	-381,846,000
Conference agreement.....	-400,846,000

CONFERENCE REPORT ON H.R. 6530

Mr. FOLEY submitted the following conference report and statement on the bill (H.R. 6530) to establish the Mount St. Helens National Volcanic Area, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 97-748)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6530) to establish the Mount St. Helens National Volcanic Area, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate to the text of the bill and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

ESTABLISHMENT OF NATIONAL VOLCANIC MONUMENT

SECTION 1. (a) In furtherance of the purposes of this Act, certain lands within and adjacent to the Gifford Pinchot National Forest in the State of Washington, which comprise approximately one hundred and ten thousand acres, as generally depicted on a map entitled "Mount St. Helens National Volcanic Monument, August 1982", are hereby designated as the Mount St. Helens National Volcanic Monument (hereafter in this Act referred to as the "Monument").

(b)(1) Not later than six months after the date of enactment of this Act, the Secretary of Agriculture (hereafter in this Act referred to as the "Secretary") shall file a map and a legal description of the Monument established under subsection (a) with the Committee on Energy and Natural Resources of the United States Senate and the Committees on Agriculture and on Interior and Insular Affairs of the United States House of Representatives. Such map and description shall have the same force and effect as if included in this Act. Such map and description shall be on file and available for public inspection in the office of the Forest Supervisor, Gifford Pinchot National Forest and in the office of the chief of the Forest Service, Department of Agriculture.

(2) The Secretary may correct clerical and typographical errors in the legal description referred to in paragraph (1), and the Secretary may, from time to time, make minor revisions of the boundary of the Monument. Such minor boundary revisions may be made by the Secretary only after publication of notice of the proposed revision in the Federal Register and after submission of notice thereof to the committees referred to in paragraph (1). Such notice shall be published and submitted at least 60 days before the revision is made. Notice of final action regarding such revision shall also be published in the Federal Register.

EXTENSION OF NATIONAL FOREST BOUNDARY

Sec. 2. (a) The exterior boundary of the Gifford Pinchot National Forest is hereby extended to include all lands and waters within the boundaries of the Monument. Lands and interests therein acquired pursuant to section 3 shall become national forest system lands.

(b) For the purposes of section 7(a)(1) of the Land and Water Conservation Fund Act of 1965 (78 Stat. 897; 16 U.S.C. 4601-4 through 4601-11), the boundary of the Gifford Pinchot National Forest, as modified by this section, shall be treated as if it were the boundary of that forest on January 1, 1965.

ACQUISITION

Sec. 3. (a) The Secretary shall acquire all lands and interests in lands within the boundaries of the Monument by donation, exchange in accordance with this Act or other provisions of law, or purchase with donated or appropriated funds, except as provided in subsection (c) and except that the Secretary may acquire mineral and geothermal interests only by exchange. It is the sense of the Congress that in the case of mineral and geothermal interests such exchanges should be completed within one year after the date of enactment of this Act. Any lands owned by the State of Washington or any political subdivision thereof may be acquired only by exchange. Those mining claims in the Green River-Polar Star area shall not be acquired without the consent of the owner.

(b) In recognition of the rapidly deteriorating nature of much of the timber in the Monument, any timber acquired pursuant to this section shall be valued for purposes of any acquisition under subsection (a) at an amount not less than the fair market value of such timber on July 1, 1982.

(c)(1) Notwithstanding any other provision of law, the Secretary shall exchange lands and interests in lands referred to in paragraphs (2) and (3) in accordance with the provisions of this subsection. With respect to the lands and interests in lands referred to in paragraphs (2) and (3), the Sec-

retary may exercise the authorities of subsection (a) only to the extent necessary to acquire any lands or interests in lands which are not acquired pursuant to the provisions of this subsection.

(2)(A) If Burlington Northern Incorporated offers to the United States the following described lands and interests therein, except mineral and geothermal interests, the Secretary shall accept such lands and interests therein (for the purposes of this Act, the term "Burlington Northern Incorporated" shall include any subsidiary of that corporation):

Township 7 North, Range 6 East:	Acres
Section 1: Lots 1, 2, and 3, south half northeast quarter, and north half southeast quarter	310.11
Township 8 North, Range 5 East:	
Section 21: All	640.00
Section 23: All	640.00
Section 25: All	640.00
Section 27: All	640.00
Section 29: All	640.00
Section 31: All fractional	623.52
Section 33: All	640.00
Section 35: All	640.00
Township 8 North, Range 6 East:	
Section 5: All fractional	480.44
Section 7: All fractional	637.58
Section 9: All	640.00
Section 15: West half	320.00
Section 17: All	640.00
Section 19: All fractional	631.76
Section 21: All	640.00
Section 27: West half	320.00
Section 29: All	640.00
Section 31: All fractional	630.44
Section 33: All	640.00
Township 9 North, Range 5 East:	
Section 25: All	640.00
Township 9 North, Range 6 East:	
Section 5: Lot 1, southeast quarter northeast quarter, and southeast quarter	240.41
Section 9: All	640.00
Section 17: All	640.00
Section 21: All	640.00
Section 29: All	640.00
Section 31: All fractional	639.52
Section 33: All	640.00

(B) Upon acceptance of title by the United States to such lands and interests therein, the Secretary shall convey to Burlington Northern Incorporated all right, title, and interest of the United States to the following described national forest system lands and interests therein, except mineral and geothermal interests:

Township 7 North, Range 6 East:	Acres
Section 4: All fractional	680.88
Section 6: All fractional	670.04
Section 10: All	640.00
Section 22: All	640.00

(3)(A) If the Weyerhaeuser Company offers to the United States the following described lands and interests in lands, except mineral and geothermal interests, the Secretary shall accept such lands and interests therein:

Township 9 North, Range 3 East:	Acres
Section 1: South half	320.00
Township 7 North, Range 4 East:	
Section 25: Northwest quarter northwest quarter	40.00
Township 8 North, Range 4 East:	
Section 2: All fractional	494.28
Township 9 North, Range 4 East:	
Section 1: All fractional	658.52
Section 3: South half northeast quarter, and south half	400.00
Section 4: Lots 2 and 3, south half north half, and south half	560.30
Section 5: South half northeast quarter, and south half	400.00

Section 6: Lot 7, southeast quarter southwest quarter, and south half southeast quarter	155.38
Section 7: All fractional	623.44
Section 8: All	640.00
Section 9: All	640.00
Section 11: All	640.00
Section 13: All	640.00
Section 15: East half east half	160.00
Section 16: North half northwest quarter	80.00
Section 17: North half northeast quarter	80.00
Section 22: A portion of east half and east half west half	271.±
Section 23: All	640.00
Section 24: All	640.00
Section 25: All	640.00
Section 26: North half, southeast quarter, and a portion of the southwest quarter	572.±
Section 27: A portion of the northeast quarter	66.±
Section 35: A portion of the northeast quarter	105.±
Township 10 North, Range 4 East:	
Section 25: Southeast quarter	160.00
Township 9 North, Range 5 East:	
Section 5: All fractional	640.32
Section 6: All fractional	679.52
Section 7: Lots 1 and 2, northeast quarter, and east half northwest quarter	340.57
Section 8: North half	320.00
Section 17: All	640.00
Section 19: All fractional	694.72
Township 10 North, Range 5 East:	
Section 5: A portion of the east half northeast quarter northwest quarter and east half	233.±
Section 17: Northeast quarter northeast quarter, and a portion of the northeast quarter and east half southeast quarter	154.±
Section 19: A portion of the south half southeast quarter	20.±
Section 20: A portion of the south half south half	60.±
Section 21: East half, east half northwest quarter, northwest quarter northwest quarter, northeast quarter southwest quarter, and a portion of the southwest quarter, northwest quarter southwest quarter	523.±
Section 29: All	640.00
Section 30: Northeast quarter, south half, and a portion of the east half northwest quarter	550.±
Section 31: All fractional	688.55
Section 32: All	640.00
Section 33: North half	320.00
Township 11 North, Range 5 East:	
Section 32: Lots 1 and 2	16.43
(B) Upon acceptance of title by the United States to such lands and interests therein, the Secretary shall convey to Weyerhaeuser Company all right, title, and interest of the United States to the following described national forest system lands and interests therein, except mineral and geothermal interests:	
Township 10 North, Range 5 East:	Acres
Section 6: Mineral survey	193.96
Section 7: Mineral survey	12.65
Township 11 North, Range 5 East:	
Section 23: Mineral survey	24.89
Section 29: Portion of mineral survey 837	5.20
Township 8 North, Range 4 East:	
Section 29: All	640.00
Section 30: All fractional	604.07
Section 32: All fractional	702.99

Township 13 North, Range 3 East:

Section 6: All fractional	652.25
Township 4 North, Range 3 East:	
Section 10: All	640.00
Section 16: All	640.00
Section 20: All	640.00

(4) Except as provided in paragraph (7), the instruments of conveyance respecting the lands and interests exchanged under this subsection may contain such reservations as may be agreed upon by the Secretary and the Weyerhaeuser Company or the Secretary and Burlington Northern Incorporated, as the case may be.

(5) It is the sense of the Congress that the exchanges authorized pursuant to this subsection should be completed within ninety days after the date of the enactment of this Act. The Secretary shall use the authorities of subsection (a) if the exchanges authorized by this subsection are not completed within a reasonable time after the expiration of such ninety day period.

(6) The Secretary shall certify in writing that to his satisfaction, at the time of conveyance, there has been no reduction in the values of the lands or interests therein caused by a direct action on the part of the current landowner below that which formed the basis for the exchanges provided for in this section. If the Secretary finds that a reduction in the value of the lands or interests therein has occurred caused by direct action on the part of the current landowner, the Secretary shall not carry out the exchange for those lands of interests so affected under this subsection, and acquisition of those lands and interests shall be undertaken by the Secretary in accordance with the provisions of subsection (a).

(7) The provisions of this subsection (except for the provisions of paragraphs (5) and (6)) do not authorize the exercise by the Secretary of the power of eminent domain, and any exchange of lands or interests in lands carried out under this subsection shall be pursuant to a voluntary agreement entered into between the Secretary and Burlington Northern Incorporated, or the Secretary and Weyerhaeuser Company, as the case may be, with the full consent of each of the parties to such agreement.

(d) Nothing in this Act shall affect any prior contractual obligation of Burlington Northern Incorporated or Weyerhaeuser Company regarding lands owned by them and included in an exchange pursuant to this Act nor shall such obligations be transferred pursuant to this legislation to the United States.

(e) Any terms, conditions, or obligations imposed by the Act of July 2, 1864 (13 Stat. 365), as amended, that apply to lands and interests in lands exchanged under this Act by Burlington Northern Incorporated shall apply in equivalent manner to lands and interests in lands obtained by Burlington Northern Incorporated under this Act.

(f) Notwithstanding any other provision of law, the Secretary shall only be required to prepare an environmental assessment of any exchange of mineral or geothermal interests authorized by this Act. In the course of preparing the assessment, the Secretary shall conduct at least one public hearing in the vicinity of the mineral or geothermal interests to be conveyed by the United States in such exchange. Any exchange of mineral or geothermal interests may be made by the Secretary only after providing the Committee referred to in section 1 of this Act thirty days' notice of his intention to do so.

ADMINISTRATION

SEC. 4. (a) The Secretary acting through the Forest Service shall administer the Monument as a separate unit within the boundary of the Gifford Pinchot National Forest, in accordance with the appropriate laws pertaining to the national forest system, and in accordance with the provisions of this Act.

(D)(1) The Secretary shall manage the Monument to protect the geologic, ecologic, and cultural resources, in accordance with the provisions of this Act allowing geologic forces and ecological succession to continue substantially unimpeded.

(2) The Secretary may take action to control fire, insects, diseases, and other agents that might (A) endanger irreplaceable features within the Monument or (B) cause substantial damage to significant resources adjacent to the Monument.

(3) Nothing in this Act shall prohibit the Secretary from undertaking or permitting those measures within the Monument reasonably necessary to ensure public safety and prevent loss of life and property.

(c) The Secretary shall permit the full use of the Monument for scientific study and research, except that the Secretary may impose such restrictions as may be necessary to protect public health and safety and to prevent undue modification of the natural conditions of the Monument.

(d) In order to protect the significant features of the Monument, reduce user conflicts, and ensure visitor safety, the Secretary is authorized to control times and means of access and use of the Monument or parts thereof: Provided, That nothing in this section shall be construed as to prohibit the use of motorized vehicles, aircraft or motorboats for emergency and other essential administrative services, including those provided by State and local governments, or when necessary, for authorized scientific research.

(e)(1) The Secretary shall provide for recreational use of the Monument and shall provide recreational and interpretive facilities (including trails and campgrounds) for the use of the public which are compatible with the provisions of this Act, and may assist adjacent affected local governmental agencies in the development of related interpretive programs.

(2) Except for roads needed for recreational and interpretive purposes as may be recommended by the comprehensive management plan submitted in accordance with the provisions of subsection (i), roads or other developed facilities within the Monument should be located generally in areas which were developed prior to the 1980 eruption.

(f) Subject to valid existing rights, all Federal lands within the Monument are hereby withdrawn from all forms of entry or appropriation of disposal under the public land laws, and from location, entry, and patent under the United States mining laws, and from disposition under all laws pertaining to mineral and geothermal leasing and all amendments thereto. Any mining activity carried out pursuant to valid existing rights shall be conducted in accordance with applicable Federal and State law.

(g) Timber harvesting shall not be permitted on Federal lands within the Monument except (1) for timber salvage contracts awarded by the Forest Service before the date of enactment of this Act, and (2) to the minimum extent necessary to control fire, insects, diseases and other agents that would endanger irreplaceable features within the Monument, cause substantial

damage to significant resources adjacent to the Monument, or endanger public safety. National forest system roads within the Monument may be used to the extent necessary for such timber harvesting activities. If the Secretary intends to carry out timber harvesting activities under clause (2), the Secretary shall advise the Committee on Energy and Natural Resources of the Senate and the Committees on Agriculture and Interior and Insular Affairs of the House of Representatives of the action the Secretary intends to take at least 30 days in advance of initiating action to contract for such sales, except that in emergency situations the Secretary shall submit a report to such Committees, describing the action taken within 30 days thereafter.

(h) The Secretary shall permit hunting and fishing on lands and waters within the Monument in accordance with applicable Federal and State law, except that the Secretary may designate zones within the Monument where, and establish periods when, no hunting or fishing shall be permitted for reasons of public health and safety, the protection of resources, scientific research activities, or public use and enjoyment. Except in emergencies, any regulations issued by the Secretary under this subsection shall be put into effect only after consultation with the appropriate State agencies responsible for hunting and fishing activities. Nothing in this subsection shall be construed as affecting the jurisdiction or responsibilities of the State of Washington with respect to wildlife and fish within the Monument.

(i) Within three years after the date of enactment of this Act, the Secretary shall submit to the committees referred to in section 1(b), a detailed and comprehensive management plan for the Monument. The initial Monument management plan may be expressed as an amendment to the October 1981 Mount St. Helens Land Management Plan. Subsequent Monument plans shall be integrated with and periodically revised as a component of the Gifford Pinchot land management planning process. The plan shall include but not be limited to:

(1) measures for the preservation of the natural geologic and ecologic processes and integrity of the resources;

(2) indications of types, locations, and general intensities of development and access routes associated with the public understanding, use, and enjoyment of the area, including anticipated timetables and costs;

(3) identification of, and implementation plans for, visitor carrying capacities of the area; and

(4) indications of any potential modifications of the external boundaries of the area, and the reasons therefor.

MANAGEMENT OF ADJACENT FEDERAL LANDS

SEC. 6. Nothing in this Act shall be construed as authorizing or directing the establishment of protective perimeters or buffer zones around the Monument for the purpose of precluding activities outside the Monument boundary which would otherwise be permitted under applicable law. Nothing in this Act shall be construed as limiting the existing authority of the Secretary to take actions on Federal lands adjacent to the Monument necessary to protect public health and safety in emergencies involving volcanic activity.

SCIENTIFIC ADVISORY BOARD

SEC. 7. (a) There is hereby established the Mount St. Helens Scientific Advisory Board (hereinafter referred to as the "Board"). The Secretary shall consult with and seek the

advice and recommendations of the Board with respect to—

(1) the measures needed to protect and manage the natural and scientific values of the Monument; and

(2) the administration of the Monument with respect to policies, programs, and activities which are specifically intended to retain the natural ecologic and geologic processes and integrity of the Monument.

The Board may make recommendations to the Secretary in regard to new research opportunities which may exist within the Monument designed to gain scientific information for future interpretation and enjoyment by visitors to the Monument. No recommendation by the Board shall be binding upon the Secretary.

(b) The Board shall be composed of nine members, who shall be individuals with recognized professional standing in appropriate scientific disciplines, as follows:

(1) three members appointed by the Secretary (one of whom shall be a professional employee of the Forest Service);

(2) two members appointed by the Secretary of the Interior (one of whom shall be a professional employee of the United States Geological Survey);

(3) two members appointed by the Governor of the State of Washington from among professional employees of the State of Washington; and

(4) two members appointed by the Chairman of the National Science Foundation.

(c) Each member shall be appointed to serve for a term of three years, except that one of the initial appointees of each appointing official shall serve an initial term of four years, one of the initial appointees of each appointing official shall serve an initial term of two years, and one of the initial appointees of the Secretary shall serve an initial term of one year.

(d) The members of the Board shall be appointed within ninety days of the date of enactment of this Act. The members of the Board shall, at their first meeting, elect a chairman.

(e) The Secretary, or a designee, shall from time to time, but at least annually, meet and consult with the Board on matters relating to the protection of the Monument and potential and ongoing research programs within the Monument.

(f) Members of the Board shall serve without compensation as such, but the Secretary is authorized to pay, upon vouchers signed by the Chairman, the expenses reasonably incurred by the Board and its members in carrying out their responsibilities under this Act.

(g) Any vacancy in the Board shall be filled in the same manner in which the original appointment was made.

(h) The Board shall terminate ten years from the date of its first meeting.

EXPENDITURE OF CERTAIN REVENUES FROM GIFFORD PINCHOT NATIONAL FOREST BY SKAMANIA COUNTY, WASHINGTON

SEC. 8. (a) Notwithstanding the provisions of the last paragraph under the heading "Forest Service" of the Act of May 23, 1908 (16 U.S.C. 500), and of section 13 of the Act of March 1, 1911 (16 U.S.C. 500), of the amount which is paid under such provisions to the State of Washington with respect to Gifford Pinchot National Forest, to be expended for the benefit of Skamania County—

(1) not less than fifty percent shall be expended for the benefit of the public schools of Skamania County, as Skamania County may specify, and

(2) the remainder shall be expended for the benefit of public roads and other public purposes of Skamania County, as Skamania County may specify.

(b) Subsection (a) shall not apply to any amount paid by the Secretary of the Treasury under the provisions of law referred to in subsection (a) at the end of any fiscal year ending before the date of the enactment of this Act.

AUTHORIZATION OF APPROPRIATIONS

SEC. 9. There is hereby authorized to be appropriated to carry out the provisions of this Act, not to exceed \$12,000,000 for the Fiscal Year Beginning October 1, 1982, and such sums as may be necessary for each fiscal year thereafter.

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate to the title of the bill and agree to the same,

E DE LA GARZA,
MORRIS K. UDALL,

HENRY M. JACKSON,
DALE BUMPERS,

Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 6530) to establish the Mount St. Helens National Volcanic Area, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

FINDINGS

The House bill contains a section setting forth findings regarding Mount St. Helens and the resource values of the area. The Senate amendment includes no such section.

The Conferees agreed to adopt the Senate position.

DESIGNATION

The House bill designates a "Mount St. Helens National Volcanic Area" while the Senate amendment designates a "Mount St. Helens National Volcanic Monument."

The Conferees agreed to adopt the Senate position. The Conferees stress that this new Monument is to be administered by the U.S. Forest Service in accordance with this Act and laws generally applicable to the Forest Service. The Monument is not under the jurisdiction of the Department of the Interior and should in no way be considered a National Park or a unit of the Park System. The Monument created by this legislation will be treated in the same manner as the two existing National Forest Monuments, Misty Fjords and Admiralty Island, in the Tongass National Forest in Alaska.

BOUNDARY DIFFERENCES

The House bill included approximately 115,000 acres in the area while the Senate amendment encompassed some 105,400 acres.

The Conferees resolved these differences by establishing a boundary for the National Volcanic Monument which includes approximately 110,000 acres.

The agreed upon boundary is referenced on a new map dated August 1982.

BOUNDARY ADJUSTMENT AUTHORITY

The House bill includes a provision authorizing the Secretary of agriculture to make minor adjustments in the Monument boundary (up to 320 acres in size) after appropriate notice in the Federal Register and the pertinent committees of Congress. The Senate amendment includes no such provision.

The Conferees agreed to adopt the House provision modified to exclude references to specific acreage limits. The Conferees expect that this authority will be used by the Secretary only for truly "minor" boundary adjustments. This authority should not be viewed as giving the Secretary the ability to make significant additions to or deletions from the Monument. It is expected that this authority will most likely be used to adjust the boundaries in response to the changing land ownership pattern around the area which will result from the land exchanges authorized by Sec. 3.

EXPANSION OF THE NATIONAL FOREST BOUNDARY

Both the House bill and the Senate amendment include a provision extending the exterior boundary of the Gifford Pinchot National Forest to include certain lands affected by the May 1980 eruption. The two versions are very similar with only minor technical differences.

The Conferees agreed to adopt the House provision.

LAND ACQUISITION

General Authority/timber valuation date

Both the House bill and the Senate amendment provide essentially the same general authority for acquisition of non-federal lands in the Monument and a set timber valuation date on July 1, 1982, because of potential insect and disease damage if acquisition is delayed. In addition, some minor technical differences exist between the two versions.

The Conferees agreed to adopt the House position with addition of a cross-reference to the Forest Service's existing exchange authority making it clear that land exchanges within the area are to be accomplished under the provisions of this Act and other applicable law governing land exchanges.

State-owned lands

The House bill limits the Secretary's authority to acquire lands within the Monument owned by the State of Washington to exchange only. The Senate amendment permits acquisition by both exchange and donation.

The Conferees agree that State-owned lands should be acquired only by exchange and agreed to adopt the House position.

Land exchange packages for Burlington Northern Inc. (BN) and Weyerhaeuser

The House bill includes specific tract-by-tract legislated exchanges for the two major landowners in the area—BN and Weyerhaeuser. Exchanges are specified for both surface and subsurface for Weyerhaeuser,

but only a surface exchange is provided for BN.

The Senate amendment designates "pools" of national forest lands which the Secretary and the landowners are to use to facilitate and consummate an exchange agreement.

The Conferees agreed to adopt the House approach with regard to the surface exchange and have included specific tract-by-tract exchanges for Burlington Northern and Weyerhaeuser. The Conferees also agreed not to legislate the exchange of specific mineral interests of the two companies. The Conferees also agreed to limit the acquisition authority of all mineral and geothermal interests within the Monument to exchange only.

The Conferees recognize that certain lands owned by Burlington Northern included in the Monument are subject to a contract under which International Paper Company has a right to cut and remove timber until the year 2000. The Conference Report includes language making it clear that the United States shall not assume Burlington Northern's obligations under the contract nor shall any rights International Paper may have against Burlington Northern be extinguished by an exchange of lands between Burlington Northern and the United States.

The Conferees assume that when any exchange is consummated pursuant to this Act, the U.S. will receive clear title to the interests conveyed.

The Conferees wish to reaffirm the clear intent of this legislation that acquisition of lands and interests in lands within the Monument should be completed as expeditiously as possible, and acquisition by exchange shall be carried out to the maximum extent feasible.

The Conferees wish particularly to encourage the Department to expedite, insofar as possible, while providing for a public hearing and Congressional review, the environmental assessment prepared for any exchanges contemplated under this Act for mineral and geothermal interests.

Acquisition of mining claims

The House bill includes a provision prohibiting the acquisition of mining claims in the Green River/Polar Star area without the consent of the owner. The Senate amendment includes no such provision.

The Conferees agreed to adopt the House language and note that the boundary agreed to in this area excludes all but a very small portion of the existing claims. The Conferees note that the boundary adjustment authority contained in Section 1 of the bill can be used by the Secretary at his discretion to exclude these remaining claims.

MANAGEMENT POLICIES AND DIRECTION

General direction

Both the House bill and the Senate amendment include a section providing a general statement regarding how the new Monument is to be managed.

The Conferees agreed to adopt the House position modified to insure flexibility necessary to provide for a variety of different activities and uses within the Monument.

Authority to protect life and property

Both the House bill and the Senate amendment include a provision authorizing the Secretary to take reasonable actions to protect life and property both within and outside the Monument.

Although the two versions are similar, the Conferees agreed to accept the Senate posi-

tion which provides for slightly broader authority than the House language. The Conferees want to emphasize the importance of protecting the health, safety, and property of Monument visitors as well as those residents living in the general area.

For example, the Conferees are aware that there is considerable concern regarding the condition at Spirit Lake where there is serious danger of downstream flooding as the water backs up behind the unstable lakeshore. The Conferees note that the Act provides sufficient authority to take appropriate actions to prevent loss of life and property.

Recreation-related roads and developments within the monument

Both the House bill and the Senate amendment contain similar provisions regarding visitor facilities and recreation uses within the Monument. The House version includes specific language generally limiting the construction of roads and developments in the area to those which existed prior to the May 1980 eruption. The Senate amendment does not include such a limitation on roads and developments.

The Conferees agreed to accept the House provisions modified to ensure that recreation-related roads and developments which are recommended in accordance with the management plan for the Monument may be permitted without regard to their location prior to the May 1980 eruption.

Mining and mineral leasing withdrawal

Both the House bill and the Senate amendment contain a provision withdrawing federal lands in the Monument from mining and mineral leasing, subject to valid existing rights. The versions are essentially the same with only minor technical differences.

The Conferees agreed to adopt the Senate position.

Water quality protection

The House bill includes a provision directing that any mining in the Monument take place in such a manner so as to "maintain the water quality in existence in the affected area immediately prior to the commencement of such activity." The Senate amendment has no comparable provision.

The Conferees agreed to delete House language with regard to water quality and include instead a provision directing that any mining be carried out in accordance with applicable state and federal law.

Scientific study/motorized equipment

Both the House bill and the Senate amendment include language regarding the need to ensure opportunities for continued scientific research and the use of motorized equipment in the area for emergency and scientific study. The language of the two versions is similar in form and substance.

The Conferees agreed to adopt House language with regard to scientific study and adopted slightly modified House language with regard to motorized vehicles, making it clear that essential administrative and emergency services provided by state and local governments are to be permitted within the Monument.

Timber harvesting in the monument

Both the House bill and the Senate amendment place certain limitations on timber harvesting activities in the Monument.

The Conferees agreed to adopt Senate language modified to ensure that commercial harvesting, while permitted in limited circumstances is to be undertaken only to

the minimum extent necessary to control fire, insects, and disease on federal lands that would endanger irreplaceable features within the Monument, cause substantial damage to significant resources adjacent to the Monument, or endanger public safety. The respective Committees of Congress are to be kept apprised regarding the use of this authority.

The Conference agree that the "control" of fire and/or insect infestations in the area could include preventative or suppression activities provided they are kept to the minimum level necessary and carried out only to the extent necessary to deal with those emergency situations or those imminent emergency situations identified in Subsection 4(g).

The Conferees stressed that this authority was very narrowly drawn and should definitely not be considered as general authority to provide for commercial timber harvesting operations within the Monument.

The Conferees expect that the Secretary will seek the advice of the Scientific Advisory Board regarding the effects of possible timber removal authorized by subsection 4(g) on areas of special scientific concern within the Monument. While the final management decisions regarding the implementation of timber removal activities rests solely with the U.S. Forest Service, the Conferees felt that the Board could make a contribution by making its scientific and research expertise available to the Forest Service on a regular basis with regard to this matter.

The Conferees further expect that the Secretary will provide the Scientific Advisory Board, as soon as reasonably possible, copies of any notices of timber salvage operations submitted to the Committee of Congress pursuant to Subsection 4(g).

Limitation on timber hauling on national forest system roads

The House bill includes a provision placing limits on the use of National Forest roads in the Monument for timber harvesting purposes. While such activity is permitted under certain circumstances, the language provides limits on the Secretary's authority based on public notice, evaluation of alternatives and effect on the resources. The Senate amendment includes no comparable provision.

The Conferees agreed to adopt the House provision slightly modified to reflect the compromise language regarding timber harvesting activities in the Monument in general.

Hunting and fishing

Both the House bill and the Senate amendment contain a provision making it clear that hunting and fishing are to be permitted in the Monument subject to reasonable limitations.

The Conferees agreed to adopt the House language with the addition of the Senate provision regarding the jurisdiction of the State of Washington over fish and wildlife management within the Monument.

Management plan

Both the House bill and the Senate amendment include provisions directing that a management plan be prepared for the Monument. The House bill includes fairly detailed language regarding what the plan is to contain. The Senate amendment does not include this specific language.

The Conferees agreed to adopt the House position.

SCIENTIFIC ADVISORY BOARD

Both the House bill and the Senate amendment include essentially the same provisions regarding the establishment of a Scientific Advisory Board to advise the Secretary with regard to the management of the Monument—especially those aspects associated with opportunities for scientific research and study. The language is essentially the same in both the bills.

The Conferees agreed to adopt the House language modified to give the Governor of Washington some additional flexibility with regard to the appointments he is authorized to make.

MANAGEMENT OF ADJACENT FEDERAL LANDS

The Senate amendment includes language making it clear that nothing in the Act authorizes or directs the Secretary to establish buffer zones surrounding the area as a result of the creation of the Mount St. Helens National Monument. The House bill has no such provision.

The Conferees agreed to adopt the Senate position. The Conferees note that the primary intent of this provision is to ensure that federal lands surrounding the new Monument will continue to be managed in accordance with existing law—including applicable land management plans—and that the Monument status should not be viewed as placing additional management constraints on adjacent federal lands.

EXEMPTION FROM THE NATIONAL ENVIRONMENTAL POLICY ACT

The Senate amendment specifically exempts the exchanges authorized pursuant to the Act from the requirement of the National Environmental Policy Act that an Environmental Impact Statement be prepared. The House bill includes no comparable provision.

The Conferees agreed to adopt a provision requiring only that the Secretary prepare an environmental assessment with regard to the exchange of any mineral interests within the Monument. The Committee expects that such an assessment can be prepared in a more expeditious manner than an Environmental Impact Statement which might be required under NEPA. A requirement for public hearings and an opportunity for the Senate Committee on Energy and Natural Resources and the House Interior and Insular Affairs and Agriculture Committees to review and comment on any proposed exchange are also included.

Conferees note that the legislated exchanges set forth in Subsection 3(c) do not require an environmental assessment or impact statement.

AUTHORIZATION/BUDGET COMPLIANCE

Both the House bill and the Senate amendment authorize the appropriation of funds to carry out the purposes of the Act. The Senate amendment authorizes \$12 million in fiscal year 1983 and such sums as necessary thereafter. The House bill authorizes such sums as may be necessary effective only for fiscal years beginning after September 30, 1983, and includes a section regarding compliance with the Budget Act.

The Conferees agreed to adopt the Senate position.

TITLE

The title of the House bill refers to the "Mount St. Helens National Volcanic Area". The title of the Senate amendment refers to a "Mount St. Helens National Volcanic Monument".

In accordance with the Conferees' decision to designate the area as a National Vol-

canic Monument, the Conferees agreed to adopt the Senate position.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. GONZALEZ, for today, for 60 minutes, and for Monday, Tuesday, and Wednesday, August 16, 17, 18, for 60 minutes each.

(The following Members (at the request of Mr. HILER) to revise and extend their remarks and include extraneous material:)

Mr. CORCORAN, for 30 minutes, today.

Mr. FISH, for 15 minutes, today.

Mr. MARKS, for 60 minutes, August 16, 1982.

Mr. MARKS, for 60 minutes, August 17, 1982.

(The following Members (at the request of Mr. HOYER) to revise and extend their remarks and include extraneous material:)

Mr. HANCE, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. COELHO, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. HILER) and to include extraneous matter:)

Mr. EVANS of Delaware.

Mr. BROOMFIELD.

Mr. FISH.

Mr. CLINGER.

Mr. RINALDO.

Mr. PORTER in two instances.

Mr. LUNGREN.

(The following Members (at the request of Mr. HOYER) and to include extraneous matter:)

Mr. AU COIN.

Mr. MOFFETT.

Mr. WEISS.

Mr. COELHO.

Mr. WILLIAMS of Montana.

Mr. OTTINGER.

Mr. BINGHAM.

Mr. GAYDOS.

Mr. SYNAR.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 2073. An act to repeal outdated size and weight limitations now imposed on the U.S. Postal Service.

JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on August 12, 1982, present to the President, for his approval, a joint resolution of the House of the following title:

H.J. Res. 541. An act concerning the successful completion of the test flight phase of the Space Shuttle program.

ADJOURNMENT

Mr. GONZALEZ. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 39 minutes p.m.), under its previous order, the House adjourned until Monday, August 16, 1982, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

4588. Under clause 2 of rule XXIV, a letter from the Secretary of Education, transmitting certain amendments to the act of September 30, 1950 (Public Law 874, 81st Congress) and Public Law 93-380, and for other purposes, was taken from the Speaker's table and referred to the Committee on Education and Labor.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the clerk for printing and reference to the proper calendar, as follows:

Mr. FUQUA: Committee on Science and Technology. House Concurrent Resolution 204. Concurrent resolution expressing the sense of Congress that, to encourage educational programs in science and technology, a National Science Center for Communications and Electronics should be established (Rept. No. 97-745). Referred to the House Calendar.

Mr. UDALL: Committee on Interior and Insular Affairs. S. 1894. A bill to permit Indian tribes to enter into certain agreements for the disposition of trial mineral resources, and for other purposes; with an amendment (Rept. No. 97-746). Referred to the Committee of the Whole House on the State of the Union.

Mr. WHITTEN: Committee of conference. Conference report on H.R. 6863 (Rept. No. 97-747). Ordered to be printed.

Mr. FOLEY: Committee of conference. Conference report H.R. 6530 (Rept. No. 97-748). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Ms. FIEDLER:

H.R. 6989. A bill to amend the Internal Revenue Code of 1954 to provide a refundable tax credit for taxpayers who maintain households which include elderly persons who are determined by a physician to be disabled; to the Committee on Ways and Means.

By Mr. McDADE:

H.R. 6990. A bill to provide a program of Federal supplemental unemployment compensation; to the Committee on Ways and Means.

By Mr. ST GERMAIN:

H.R. 6991. A bill to amend title 10, United States Code, to authorize an alternative to the conventional construction of military family housing within the United States, Puerto Rico, and Guam; to the Committee on Armed Services.

By Mr. BLILEY:

H.J. Res. 576. Joint resolution to authorize and request the President to designate March 1, 1983, as "National Recovery Room Nurses Day"; to the Committee on Post Office and Civil Service.

By Mr. BREAUX (for himself and Mr. FORSYTHE):

H.J. Res. 577. Joint resolution to disapprove the governing international fishery agreement between the United States and Korea; to the Committee on Merchant Marine and Fisheries.

By Mr. BROOMFIELD:

H.J. Res. 578. Joint resolution to authorize and request the President to designate March 1, 1983, as "National Recovery Room Nurses Day"; to the Committee on Post Office and Civil Service.

PRIVATE BILL AND RESOLUTION

Under clause 1 of rule XXII.

Mr. EDWARDS of Alabama introduced a bill (H.R. 6992) to confer jurisdiction upon the U.S. Court of Claims to hear, determine, and render judgment upon the claim of Jack L. Williams, which was referred to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 3252: Mr. BLILEY.
H.R. 3649: Mr. STUMP.
H.R. 5054: Mr. CROCKETT.
H.R. 6054: Mr. JOHNSTON.
H.R. 6066: Mr. SCHEUER.
H.R. 6483: Mr. LEBOUTILLIER and Mr. GUARINI.
H.R. 6506: Mr. BADHAM.
H.R. 6527: Mr. ECKART, Mr. NELLIGAN, Mr. LEBOUTILLIER, Mr. KINDNESS, Mr. ARCHER, Ms. OAKAR, Mr. GILMAN, and Mr. MILLER of Ohio.
H.R. 6576: Mr. ADDABBO, Mr. COURTER, Mr. DANIEL B. CRANE, Mr. DENARDIS, Mr. DORGAN of North Dakota, Mr. FITHIAN, Mr. HAGEDORN, Mr. HAMMERSCHMIDT, Mr. HART-

NETT, Mr. HEFTL, Mr. LAGOMARSINO, Mr. LAFALCE, Mr. LUJAN, Mr. MARRIOTT, Mr. McEWEN, Mr. McHUGH, Mr. MILLER of California, Mr. MITCHELL of New York, Mr. MOLINARI, Mr. MURTHA, Mr. NEAL, Mr. OBERSTAR, Mr. PEYSER, Mr. RANGEL, Mr. RATCHFORD, Mr. ROBERTS of South Dakota, Mr. SCHUMER, Mr. SHAMANSKY, Mr. STOKES, Mr. STUDDS, Mr. WILLIAMS of Montana, and Mr. WILLIAMS of Ohio.

H.R. 6789: Mr. TAUKE.

H.R. 6833: Mr. BEVILL, Mr. LATTI, Mr. KINDNESS, Mr. STATON of West Virginia, Mr. ROBERT W. DANIEL, JR., Mr. RUDD, Mr. STUMP, Mr. DREIER, Mr. ROUSSELOT, Mr. CHAPPIE, Mr. HARTNETT, Mr. JOHNSTON, Mr. WEBER of Minnesota, Mr. HILER, Mr. GREGG, Mr. HIGHTOWER, Mr. RALPH M. HALL, Mr. MONTGOMERY, Mr. STENHOLM, Mr. GRAMM, Mr. ROEMER, Mr. WHITE, Mr. McDONALD, Mr. WILSON, Mr. KEMP, Mr. WILLIAMS of Ohio, Mr. KAZEN, Mr. LEWIS, and Mr. MARTIN of North Carolina.

H.J. Res. 157: Mr. PATMAN.

H.J. Res. 454: Mr. LEHMAN, Mr. QUILLEN, Mr. FRANK, Mr. FAUNTROY, Mr. BARNES, Mr. NELLIGAN, Mr. PASHAYAN, Mr. EDGAR, Mr. MONTGOMERY, Mr. SOLARZ, Mr. KEMP, Mr. BURGNER, Mrs. HECKLER, Mr. RODINO, Mr. FRENZEL, Mr. WAXMAN, Mr. SMITH of Pennsylvania, Mr. DORNAN of California, Mrs. HOLT, Mr. HANCE, Mr. GUARINI, Mr. DOUGHERTY, Mr. MINETA, Mr. GRADISON, Mr. FISH, Mr. SMITH of New Jersey, Mr. HUBBARD, Mr. McEWEN, Mr. WASHINGTON, Mr. MYERS, Mr. MAVROULES, Mr. FAZIO, Mr. DIXON, Mr. O'BRIEN, Mr. HORTON, Mr. GINGRICH, Mr. BAILEY of Pennsylvania, Mr. BEVILL, Mr. BINGHAM, Mr. BOWEN, Mr. BREAUX, Mr. BROWN of California, Mr. PHILIP M. CRANE, Mr. DONNELLY, Mr. FOGLIETTA, Mr. JONES of North Carolina, Mr. PEPPER, Mr. SNYDER, Mr. SOLOMON, Mr. STANTON of Ohio, Mr. SUNIA, Mr. SWIFT, Mr. TRAXLER, Mr. WILLIAMS of Ohio, Mr. WON PAT, Mr. YOUNG of Missouri, and Mr. RAILSBACK.

H.J. Res. 504: Mr. MCCOLLUM and Mr. TAUKE.

H.J. Res. 557: Mr. BENJAMIN, Mr. BIAGGI, Mr. BONER of Tennessee, Mrs. COLLINS of Illinois, Mr. CORRADA, Mr. DAUB, Mr. DORNAN of California, Mr. EDGAR, Mr. FAUNTROY, Mrs. FENWICK, Mr. FISH, Mr. FORD of Michigan, Mr. FRANK, Mr. FUQUA, Mr. HOLLENBECK, Mr. MAZZOLI, Mr. MINISH, Mr. PEPPER, Mr. RANGEL, Mr. ROSENTHAL, Mr. SHAMANSKY, Mr. SCHEUER, Mr. TAUZIN, Mr. WHITEHURST, Mr. WILSON, Mr. ZEFERETTI, and Mr. GREEN.

H. Res. 421: Mr. BEDELL, Mr. EVANS of Georgia, Mr. FOWLER, Mr. GEPHARDT, Mr. JENKINS, Mr. LUNDINE, Mr. PEASE, and Mr. SEIBERLING.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under Clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 6467: Mr. MITCHELL of Maryland.
H.R. 6529: Mr. MITCHELL of Maryland.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 4230

By Mr. BEDELL:

—In section 10(b) of the bill, insert after "United States Constitution," the following:

"except as provided in subsection (c) of this section."

Strike out section 10(c) of the bill and insert in lieu thereof the following:

(c) No State shall sell or otherwise transfer, for use outside of such State in a coal pipeline or extension thereof with respect to which a certificate is issued under section 10952 of title 49, United States Code, water which is taken from any river or other body of surface water which is located in or which passes through more than one State or any aquifer or other body of ground water which underlies more than one State unless—

(1) there is in effect an interstate compact (A) between the States in the drainage basin of such river or other body of surface water, or (B) between the affected States in the case of such an aquifer or other body of ground water, which governs such sale or transfer, and

(2) all the States which are parties to such compact consent to such sale or transfer.

By Mr. LENT:

—Page 4, line 17, strike out "necessary to construct such pipeline or extension" and insert in lieu thereof "owned by any common carrier engaged in the interstate transportation of coal".

Page 5, after line 2, insert the following:

"(b) The power granted in subsection (a) of this section may be exercised to acquire a property interest greater than that needed to effect a crossing, but in no event greater than 200 feet."

Reletter subsequent subsections accordingly.

—Page 7, after line 12, insert the following:

"(2) No certificate may be issued unless the Commission determines in writing, including the reasons for the determinations, that—

"(A) there is a substantial likelihood the rates to be charged by the applicant for the transportation of coal will be less than those which would be charged by other common carriers for the transportation of the same coal over the expected useful life of the coal pipeline; and

"(B) the coal pipeline will not materially impair the financial integrity of another carrier or the existing level or type of transportation services that carrier is able to provide, nor require another carrier to significantly raise its rates on other traffic in order to achieve or maintain adequate revenues.

"(3) In making the determinations required by subsections (b)(1) and (b)(2) of this section, the Commission shall consider and include in its written determinations a discussion of the additional following issues:

"(A) the environmental impact of the coal pipeline or extension and alternative routes, means of transportation of coal, and methods of utilization of coal;

"(B) the extent to which existing carriers have the ability to meet the same transportation needs as the coal pipeline or extension for the attainment of national coal utilization goals in a safe, adequate, economical, and efficient manner;

"(C) the balance between the energy needs of the area to be benefited by the coal pipeline or extension and the impact on the area from which the coal is to be transported, including the impact or the water needs of such area;

"(D) the extent to which the coal pipeline or extension would affect surface or ground water at the point of origin from which the coal is to be transported, at the point of destination to which the coal is to be transported—

ed, and at the point of disposal of water utilized in the transportation of the coal;

"(E) the extent to which the coal pipeline or extension thereof would disrupt the coal industry in regions of the United States other than the region in which such pipeline will originate; and

"(F) the extent to which the construction of the pipeline or extension thereof would be impeded or delayed unless the power of eminent domain is granted to the applicant under this Act.

"(4) If the Commission fails to make the determinations under paragraphs (b)(1) and (b)(2) of this section, the application for a certificate shall be denied."

Redesignate the subsequent paragraphs accordingly.

—Page 14, line 1, strike out the semicolon and all that follows through the period on line 10 and insert in lieu thereof a period and the following: "In addition, the coal pipeline shall be constructed with a capacity 25 percent greater than the capacity necessary to transport the total volume of coal of the original supporters."

—Page 22, after line 19, insert the following: "§ 10957. Abandonment

"(a) A person holding a certificate issued under section 10952 of this title may—

"(1) abandon any part of its coal pipeline; or

"(2) discontinue the operation of all coal pipeline transportation over any part of its coal pipeline;

only if the Commission finds (A) that the present or future public convenience and necessity require or permit the abandonment or discontinuance, or (B) that water used for transporting the coal has been reduced by circumstances beyond the control of such person to an amount insufficient to continue the transportation of coal, or (C) that the available supply of coal is depleted to the extent that continued service is unwarranted.

"(b)(1) A proceeding to permit abandonment or discontinuance under subsection (a) of this section begins on application filed with the Commission. If the Commission—

"(A) finds public convenience and necessity requires or permits abandonment or discontinuance, it shall—

"(i) approve the application as filed; or

"(ii) approve the application with modifications and require compliance with conditions that the Commission finds are required by public convenience and necessity; or

"(B) fails to find public convenience and necessity requires or permits abandonment or discontinuance, it shall deny the application.

"(2) On approval, the Commission shall issue to the person holding a certificate issued under section 10952 a certificate describing the abandonment or discontinuance approved by the Commission.

"(c) The abandonment or discontinuance approved by the Commission shall take effect on the 60th day after the date of issuance of the certificate under this section."

Renumber the subsequent sections accordingly and conform the analysis beginning on page 24, after line 23, accordingly.

—Page 23, after line 2, insert the following: "§ 10958. Financing

"A purchaser, consumer, or user of coal to be transported through a certificated coal pipeline shall not, through use of a tariff or otherwise, require a customer of theirs to pay a fee, surcharge, or other payment relating to the coal pipeline at any time prior

to the receipt of coal delivered through the pipeline."

Renumber the subsequent section accordingly and conform the analysis beginning on page 24, after line 23, accordingly.

By Mr. RAHALL:

—Page 7, line 12, before the period insert the following: "provided, that no such application shall be approved unless the Commission finds that the applicant has provided fair arrangements for the protection of the interests of railroad, water and motor carrier employees who may be affected thereby at least as protective of employee interests as those established under section 11347 of this title."

H.R. 5540

By Mr. WEBER of Ohio:

—Page 30, after line 10, insert the following:

"(h) No loan, loan guarantee, or commitment for a loan guarantee may be made under this section unless the Administrator of the Small Business Administration determines that such loan, loan guarantee, or commitment for a loan guarantee will not tend to restrict the availability of credit, or increase the cost of credit, to small business."

Redesignate the following subsections accordingly.

—Page 30, after line 10, insert the following:

"(h) No loan, loan guarantee, or commitment for a loan guarantee may be made under this section to any small- or medium-sized defense-related business firm unless the Secretary of Commerce determines that such loan, loan guarantee, or commitment for a loan guarantee will not give such business firm a competitive advantage over other small- or medium-sized defense-related business firms."

Redesignate the following subsections accordingly.

H.R. 6755

By Mr. ROTH:

—Page 2, line 9, strike out "\$350,000,000" and insert in lieu thereof "\$342,500,000".

Page 2, line 25, strike out "\$43,750,000" and insert in lieu thereof "\$36,250,000".

Page 3, strike out lines 5 through 9; and in line 10, strike out "(3)" and insert in lieu thereof "(2)".

H.R. 6956

By Mr. DASCHLE:

—Page 32, after line 7, insert the following:

SMALL BUSINESS LOAN REVOLVING FUND

To carry out the purposes of the "Veterans' Administration Small Business Loan Revolving Fund", as authorized by law (Public Law 97-72, title III), \$25,000,000.

H.R. 6957

By Mr. COLLINS of Texas:

—Page 33, after line 24, insert the following new section:

Sec. 303. None of the funds appropriated in this title may be used to pay any contribution for expenses necessary to meet annual obligations of membership in the United Nations or any affiliated agency in excess of 20 percent of the total annual assessment of the United Nations or such agency. This section shall not apply to the International Atomic Energy Agency and to the joint financing program of the International Civil Aviation Organization.

—Page 43, after line 21, insert the following new section:

Sec. 404. (a) This section may be cited as the "Neighborhood School Act of 1982".

(b) The Congress finds that—

(1) court orders requiring transportation of students to or attendance at public schools other than the one closest to their residences for the purpose of achieving racial balance or racial desegregation have proven to be ineffective remedies to achieve unitary school systems;

(2) such orders frequently result in the exodus from public school systems of children causing even greater racial imbalance and diminished public support for public school systems;

(3) assignment and transportation of students to public schools other than the one closest to their residence is expensive and wasteful of scarce petroleum fuels;

(4) there is an absence of social science evidence to suggest that the costs of school busing outweigh the disruptiveness of busing; and

(5) assignment of students to public schools closest to their residence (neighborhood public schools) is the preferred method to public school attendance.

(c) The Congress is hereby exercising its power under article III, section 1, and under section 5 of the fourteenth amendment.

(d) Section 1651 of title 28, United States Code, is amended by adding the following new subsection (c):

"(c)(1) No court of the United States may order or issue any writ directly or indirectly ordering any student to be assigned or to be transported to a public school other than that which is closest to the student's residence unless—

"(i) such assignment of transportation is provided incident to the voluntary attendance of a student at a public school, including a magnet, vocational, technical, or other school of specialized or individualized instruction; or

"(ii) the requirement of such transportation is reasonable.

"(2) The assignment or transportation of students shall not be reasonable if—

"(i) there are reasonable alternatives available which involve less time in travel, distance, danger, or inconvenience;

"(ii) such assignment or transportation requires a student to cross a school district having the same grade level as that of the student;

"(iii) such transportation plan or order or part thereof is likely to result in a greater degree of racial imbalance in the public school system than was in existence on the date of the order for such assignment or transportation plan or is likely to have a net harmful effect on the quality of education in the public school district;

"(iv) the total actual daily time consumed in travel by schoolbus for any student exceeds thirty minutes unless such transportation is to and from a public school closest to the student's residence with a grade level identical to that of the student; or

"(v) the total actual round trip distance traveled by schoolbus for any student exceeds 10 miles unless the actual round trip distance traveled by schoolbus is to and from the public school closest to the student's residence with a grade level identical to that of the student."

Definition

(e) The school closest to the student's residence with a grade level identical to that of the student shall, for purpose of calculating the time and distance limitations of this Act, be deemed to be that school containing the appropriate grade level which existed immediately prior to any court order or writ

resulting in the reassignment by whatever means, direct or indirect including rezoning, reassignment, pairing, clustering, school closings, magnet schools or other methods of school assignment and whether or not such court order or writ predated the effective date of this legislation.

Suits by the Attorney General

(f) Section 407(a) of title IV of the Civil Rights Act of 1964 (Public Law 88-352, section 407(a); 78 Stat. 241, section 407(a); 42 U.S.C. 2000c-6(a)), is amended by inserting after the last sentence the following new subparagraph:

"Whenever the Attorney General receives a complaint in writing signed by an individual, or his parent, to the effect that he has been required directly or indirectly to attend or to be transported to a public school in violation of the Neighborhood

School Act and the Attorney General believes that the complaint is meritorious and certifies that the signers of such complaint are unable, in his judgment, to initiate and maintain appropriate legal proceedings for relief, the Attorney General is authorized to institute for or in the name of the United States a civil action in any appropriate district court of the United States against such parties and for such relief as may be appropriate, and such court shall have and shall exercise jurisdiction of proceedings instituted pursuant to this section. The Attorney General may implead as defendants such additional parties as are or become necessary to the grant of effective relief hereunder."

(g) For the purpose of this Act, "transportation to a public school in violation of the Neighborhood School Act" shall be deemed to have occurred whether or not the order

requiring directly or indirectly such transportation or assignment was entered prior to or subsequent to the effective date of this Act.

(h) If any provision of this Act, or the application thereof to any person or circumstance, is held invalid, the remainder of the Act and the application of such provision to other persons or circumstances shall not be affected thereby.

(i) It is the sense of the Senate that the Senate Committee on the Judiciary report out, before the August recess of the Senate, legislation to establish permanent limitations upon the ability of the Federal courts to issue orders or writs directly or indirectly requiring the transportation of public school students.

By Mr. SENSENBRENNER:

—On page 26, line 22, strike "241,000,000" and insert in lieu thereof "100,000,000".

SENATE—Friday, August 13, 1982

(Legislative day of Monday, July 12, 1982)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Father in Heaven, forgive our indifference toward Thee which causes us to presume upon Thy lavish provision. Forgive us for taking for granted common gifts which cannot be bought or earned—the gifts of heart and lungs and bodily organs that function unremittably; the gifts of sight and hearing, taste and touch. Thank Thee for daily food and comfortable beds which so many do without; for work when so many are unemployed; for friends when so many are lonely and friendless.

Help us, gracious God, to comprehend and accept Thy love which is unconditional, impartial, and eternal. May we realize that there is nothing we can do to cause Thee to love us more—and there is nothing we can do to cause Thee to love us any less. We thank Thee for Thy perfect love; forgive our nonresponse and receive our inexpressible gratitude. We ask this in the name of Him who demonstrated Thy love supremely on a cross. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized for 2 minutes.

Mr. BAKER. I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

COMMENDATION TO THE CHAPLAIN

Mr. BAKER. Mr. President, I commend the Chaplain on his prayer this morning and express great relief that he did not again pray against the hard and arduous schedule of the Senate.

REASON NO. 14: THE REFUND GAME

Mr. BAKER. Mr. President, I want to take this opportunity to address my

good friends the Senate photographers and members of the press corps, and to indicate to them that next Friday may not turn out to be the best day for photo opportunities with Members of the Senate. Then, again, next Friday could turn out to be a wonderful day for photographs of Members of the Senate.

If, and only if, the Senate completes those legislative items which have been publicly designated as "essential," then my friends in the camera crews will be able to catch Members with big smiles on their faces as they leave the Capitol for the Labor Day recess. But if those items on the "must list" have not been completed, there will be a mass of frowns and long faces, maybe even some tears, because it will then be necessary for the Senate to remain in town until the 27th of August.

Mr. President, I extend this warning not only as an individual who appreciates a good picture, but also as one who is protective of the best interests of his colleagues.

I remind Members that we have finished everything now except the debt limit and the immigration bill, and I hope we can get to third reading on the immigration bill today and finish the debt limit next week, together with any essential conference reports or other matters of urgent importance.

Here is reason No. 14 of my 18 reasons why the Senate should make the effort to make the most of next week and go home on Friday. Reason No. 14 is the refund game. You are tired. You are overworked. As the Chaplain points out, your family misses you. There is no time for privacy. You suddenly realize you cannot take it any more. What will you do? What will you do?

If you are really thoughtful and really frustrated, you will rent a condominium in the mountains or at the beach, so that you can escape from all the frustration with your family. But such plans are popular, so you make early reservations to assure that your plans will not be thwarted.

You hear the majority leader say one day that there is a good possibility that the Senate can recess on August 20 and make our recess coincide with that of the House of Representatives. So you make a deposit, to make sure that your reservation on your rented condominium will stick. You tell your family that their day in the Sun is approaching, and you begin to count the days.

Mr. President, what may be forgotten is that the majority leader said that there is a possibility of recessing on the 20th and that there were no guarantees.

So, Mr. President, reason No. 14 is simply this: Make your deposits, but make them refundable. [Laughter.]

Mr. STAFFORD. Mr. President, will the majority leader yield?

Mr. BAKER. I yield.

Mr. STAFFORD. The Senator from Vermont, on behalf of those of his colleagues who are candidates for reelection, notes that reason No. 14 did not cover the Members who will have to go home this weekend and campaign, rather than go to the beach.

Mr. BAKER. Mr. President, it is easy to tell that the majority leader is not up for reelection. [Laughter.]

How quickly those thoughts pass from one's mind. The Senator is exactly right.

SENATE SCHEDULE

Mr. BAKER. Mr. President, I understand that the Senator from Georgia has a special order for 15 minutes.

Before I yield the floor, I ask unanimous consent to reserve to the minority leader such time as he may wish under the standing order, as abbreviated, for his use during the course of this day.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, after the recognition of the Senator from Georgia on special order, there will be a period for the transaction of routine morning business, not to extend past 10:30 a.m., with the proviso that Senators may speak therein for not more than 1 minute each.

At 10:30 a.m., the Senate will resume consideration of S. 2222, the immigration bill. It is the hope of the leadership that we can reach third reading on that bill today. It is not anticipated that we will have a vote on final passage today.

I hope to have a further announcement on this matter later today.

RECOGNITION OF SENATOR NUNN

The PRESIDING OFFICER (Mr. SYMMS). Under the previous order, the Senator from Georgia (Mr. NUNN) is recognized for not to exceed 15 minutes.

THE CRIME CONTROL ACT OF 1982: TITLE IV—HABEAS CORPUS REFORM

Mr. NUNN. Mr. President, Senator CHILES and I have been daily emphasizing the importance of prompt reform of our habeas corpus proceedings. I have discussed, with example after example, the drastic need for legislative action designed to stop career criminals from continually abusing the writ of habeas corpus. This procedural abuse has grown and increased every year. As a result, every year more and more local, State, and Federal judges have been expressing the need to eradicate this crippling abuse.

Not surprisingly, Senator CHILES and I do not stand alone in our concern over the burden which misuse of the writ poses for our criminal justice system. The cases, which we have cited to the Senate, have generated great alarm beyond this legislature. Individuals most closely involved in the daily operations of the judicial system have repeatedly spoken out on the dire need for legislative reform in the area of habeas corpus.

As I pointed out previously, the Conference of Chief Justices and the National Association of Attorneys General have adopted resolutions strongly supporting reform of the laws now pertaining to habeas corpus proceedings. The Department of Justice has endorsed similar measures. Previously, I mentioned the case *Schnecko* against Bustamonte in which Justice Lewis Powell suggested that habeas corpus abuse was creating a serious credibility gap as to the merits of the State court decisions.

As recently as last week, the problems of our overcrowded courts were publicly addressed by Justice John Paul Stevens and reemphasized by Justice Powell. Justice Stevens' speech before the American Judicature Society dealt with the difficulties facing a court system continually overburdened with litigation. He revealed that his colleagues on the Supreme Court faced roughly 4,000 petitions for full review each term. The number continues to increase dramatically every year. Yet, the Supreme Court is only capable of considering 150 to 200 of these cases for full briefing, oral arguments, and opinions per year. Justice Stevens pointed out that fundamental changes are needed to reduce the caseload problem in the Federal court system. Justice Powell echoed similar concerns, noting that the dramatic increase in cases the past decade "may prevent the degree of judicial care, in selecting cases for full review, that probably existed a decade or more ago." Justice Powell stressed the need for reform limiting review of State cases by Federal courts.

Certainly large portions of the rising caseloads plaguing our courts can be directly traced to frivolous habeas

corpus petitions. Senator CHILES and I have detailed to the Senate case upon case of this type of unnecessary and repetitive litigation. The time is long overdue for this Senate to initiate legislation to alleviate this procedural headache. Clearly, we are not without the power to help our courts maintain an efficient system of criminal justice in this country. Senator CHILES and I continue to support and recommend that this Congress act soon to resolve these problems. We have introduced S. 2543, the Crime Control Act of 1982, as a piece of legislation including effective measures for reform in habeas corpus proceedings. Our bill would eliminate needless petitions by enacting a 3-year statute of limitations as well as requiring increased deference to State court findings by the Federal courts.

I again urge the Senate to heed the recent comments of both Justices Stevens and Powell and act promptly, through S. 2543, to end the flood of unnecessary, repetitive, and costly litigation which now plagues our criminal justice system.

Mr. President, I yield back the remainder of my time.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business for not to extend beyond 10:30 a.m. with statements therein limited to 1 minute each.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. GORTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

WAGE INCREASE LIMITATION ON NORTH PACIFIC DIVISION CORPS OF ENGINEERS

Mr. GORTON. Mr. President, the distinguished chairman of the Appropriations Committee has included a provision in the supplemental appropriations bill which will greatly benefit a number of constituents in my State, and for which we are very grateful to him. There is currently a large disparity that exists between wages paid North Pacific Division Corps of Engineers and their counterparts in the Bonneville Power Administration and the Bureau of Reclamation. Legislation passed in the last few years imposed a limitation on wage increases for Corps of Engineers employees while it has not affected wages of employees of other Federal agencies of similar positions in the Pacific

Northwest. Thus, for example, an employee working at a Corps of Engineers dam project will automatically earn less money than an employee performing the same duties at a Bureau of Reclamation dam project. This unjustified discrepancy has caused a considerable amount of unrest among the workers affected by this wage limitation, particularly at Chief Joseph Dam, a Corps project, where the workers are paid less than their counterparts at Grand Coulee, a Bureau of Reclamation project just 40 miles down the Columbia River from Chief Joseph.

Senator HATFIELD has included a provision in H.R. 6863, the supplemental appropriations bill, which would rectify this unfair situation. The provision requires that Corps employees who are currently paid from Corps of Engineers special power rate schedules be paid wages determined by the Department of Defense Wage Fixing Authority. This change will assure that wages of the Corps employees currently paid from the special power rate schedules will be consistent with wages of the Department of Energy and the Department of the Interior employees performing similar work in the Pacific Northwest.

Senator HATFIELD is to be commended for working to achieve equity in this situation. The people of my State are affected by this provision, and I extend to him our sincere thanks for attempting to terminate this discriminatory wage discrepancy.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Assistant Secretary proceeded to call the roll.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

IMMIGRATION REFORM AND CONTROL ACT OF 1982

The PRESIDING OFFICER. Under the previous order, the hour of 10:30 a.m. having arrived, the Senate will now resume consideration of the pending business, S. 2222, which the clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 2222) to revise and reform the Immigration and Nationality Act, and for other purposes.

The Senate resumed consideration of the bill.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. SIMPSON. Mr. President, I yield to the Senator from Texas.

The PRESIDING OFFICER. The Senator from Texas.

UP AMENDMENT NO. 1228

(Purpose: To require that the Attorney General consult with certain committees of the Congress and voluntary agencies before prescribing certain regulation regarding the legalization program)

Mr. BENTSEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Texas (Mr. BENTSEN) proposes an unprinted amendment numbered 1228.

Mr. BENTSEN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the top of page 162, before line 1, insert the following new subsection (and redesignate the succeeding subsections accordingly):

"(e) The Attorney General, after consultation with the Committees on the Judiciary of the House of Representatives and the Senate and with qualified voluntary agencies designated pursuant to subsection (c)(1), shall prescribe regulations establishing a definition of the term 'resided continuously', as used in this section, and for establishing the requirements necessary to prove eligibility for immigration benefits under this section. Such regulations may be prescribed to take effect on an interim basis if the Attorney General determines that this is necessary in order to implement this section in a timely manner.

Mr. BENTSEN. Mr. President, my amendment is a simple one. It calls for the Attorney General to promulgate regulations establishing a definition of the phrase "resided continuously", as used in the legalization section of this bill, and for establishing the requirements necessary to prove eligibility for benefits under this section, after consultation with the Judiciary Committees on the Congress and with the voluntary agencies who will assist in implementing the legalization program.

This bill gives the Attorney General the discretion in two essential areas of eligibility for the legalization program. First, the evidence and procedure that will be required to establish entry into the United States on a date certain to acquire either permanent resident or temporary resident status, and second, in arriving at the definition of the phrase "resided continuously".

My amendment does not negate this discretion. It leaves the discretion for the implementation of these particu-

lar matters with the Attorney General and simply requires a consultation process designed to insure that the congressional intent and the practical logistics of implementing the legalization provisions are considered by the Attorney General. Consultation with Judiciary Committees will insure that the Members of Congress who have worked so diligently in formulating this bill, continue to have input in the very important decisionmaking process involved in implementing the legalization program. I think this concept has proven very effective, and successful, with the Refugee Act, which requires that the administration consult with the Congress in arriving at annual refugee quotas. I believe that this consultation would guarantee that the standards promulgated by the Attorney General in this area will be clear, consistent, and realistic.

I also believe it would be extremely helpful for the Attorney General to consult with the members of the respective Judiciary Committees on the definition of the phrase "resided continuously." I have reviewed some of the case law in this area and there is disagreement among the Federal circuits on what constitutes continuous residence. It is clear that continuous residence does not mean uninterrupted physical presence. What is not clear is the length of the interruption that will be tolerated. The standard applied appears to be that one has not resided continuously in the United States if there has been a "meaningful interruption" of the alien's presence in the country. That standard is subject to interpretation and disagreement.

As I mentioned earlier, the legalization program is not and should not be considered a "reward" for illegal immigration. It is a recognition of our past failures in controlling illegal immigration. It is an attempt to "wipe the slate clean" and start anew. This can be accomplished only if the standards set forth in these provisions are followed. My amendment would, therefore, facilitate the promulgation of those standards by providing for input from the committees of the Congress most familiar with the problem. So I would urge my colleagues to support this amendment. It is an uncontroversial amendment and I hope that the Senator from Wyoming will be amenable to accepting amendment.

Mr. SIMPSON. Mr. President, I support the amendment of the Senator from Texas. I appreciate his patience this morning in dealing with the amendment.

The amendment simply clarifies the procedure which is now required under the Administrative Procedure Act in allowing public and congressional comment on Federal rules. That consultation is necessary to insure that the Congress has an opportunity to review the implementation of legal-

ization in terms of legislative intent, and that the voluntary agencies, which are such a key part of any operation with regard to resettlement or immigration, will have the opportunity to comment on rules which they will follow in assisting the Justice Department to process those eligible for legalization.

Because the legalization program technically begins at the date of enactment, the Attorney General must devise some interim regulations, and those can be issued on an interim or interim-final basis before the consultation process is completed.

That is agreeable to the sponsors.

We think the amendment is helpful and mandates that consultation must occur before final regulations are completed.

I thank the Senator from Texas for offering the amendment. I think it is appropriate. It is acceptable.

Mr. BENTSEN. Mr. President, I appreciate the attitude of the chairman of the subcommittee, who has worked so hard in this particular regard. I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Texas.

The amendment (UP No. 1228) was agreed to.

Mr. BENTSEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SIMPSON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Colorado.

UP AMENDMENT NO. 1229

(Purpose: Expressing the sense of the Congress with respect to the enforcement of the immigration laws of the United States)

Mr. ARMSTRONG. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Colorado (Mr. ARMSTRONG) proposes an unprinted amendment numbered 1229.

Mr. ARMSTRONG. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 162; line 11, strike out "REPORTS TO CONGRESS" and insert in lieu thereof "GENERAL PROVISIONS".

At the bottom of page 166, add the following:

ENFORCEMENT OF THE IMMIGRATION LAWS OF THE UNITED STATES

Sec. 402. It is the sense of the Congress that—

(1) the immigration laws of the United States should be enforced vigorously and uniformly; and

(2) in the enforcement of such laws, the Attorney General should take due and deliberate actions necessary to safeguard the constitutional rights, personal safety, and human dignity of U.S. citizens and aliens.

On page 79, in the table of contents, strike out "TITLE IV—REPORTS TO CONGRESS" and insert in lieu thereof "TITLE IV—GENERAL PROVISIONS".

On page 79, in the table of contents, after the item relating to section 401, add the following new item:

"Sec. 402. Enforcement of the immigration laws of the United States."

Mr. ARMSTRONG. Mr. President, I offer this amendment because I believe it important that the Senate seriously consider the conduct of the so-called operation jobs, an attempt to roundup illegal aliens launched earlier this year by the Immigration and Naturalization Service, and, having reflected upon the conduct of Operation Jobs, to make an unequivocal statement that we expect, that we demand, that we insist upon the highest possible standard of law enforcement, not only to the end that those who are violating the law be brought to justice, but even more important to the end that those citizens whose rights might be affected are accorded in every respect the full protection of the law. And even those persons who may not be citizens, even in fact may be illegal aliens, are accorded those human rights to which their personhood entitles them.

Mr. President, I bring this to the attention of the Senate because in the conduct of operation jobs in the Denver metropolitan area there is some question whether or not, in fact, such standards of law enforcement were entirely observed. It is not my purpose to rehash this in any great degree, but let me just tick off the facts that prompted me to contact the U.S. attorney for Colorado and also the U.S. Attorney General at the time Operation Jobs was underway.

First, in the course of conducting this roundup of illegal aliens, there was a sort of atmosphere which suggested a publicity stunt. I am not suggesting that everything that was done was wrong, but there was just something about it which did not smack of law enforcement as it did of public relations. Not being entirely unfamiliar with public relations myself, and I judge that most Senators know something about that subject, I do not entirely criticize that either. But the area of law enforcement, anything which in any sense might appear to prejudice the rights of any person in the cause of public relations is something that ought to be very seriously considered.

Specifically, I note with dismay that two U.S. citizens were, in fact, included in this roundup and were detained for several hours under circumstances

which do not suggest the most scrupulous regard for their constitutional rights.

In addition, during the course of this roundup, officers entered a number of public places, which may, but in my opinion may not, reflect good judgment. There is no question in my mind that they were within their legal rights to enter public places to look for aliens, but these particular places which they entered, specifically some taverns and so on, raise a question of whether or not good judgment was actually used.

In addition, there were allegations, which I have not been able to substantiate, that they improperly entered some public places, including schools.

On at least one occasion the result of this roundup was to frighten a young man who saw the approaching officers, with the result that he fled the scene. Unfortunately, in the process of fleeing, he was killed.

I do not necessarily blame that on the immigration officers. In that particular instance, I have no reason to think that they were acting beyond the scope of their authority. And yet it is a fact that a young man is dead, a young man who I believe to have entered his country illegally but nonetheless it is an episode which should cause some concern.

The very worst of it, Mr. President, is that after officers entered some places where, frankly, I have doubts that they should have entered, after the atmosphere in which the entire roundup was conducted, after the episode with the young man which I have just described, there was, within the Hispanic community in Colorado, a sort of feeling of hysteria, a feeling that anyone who was Hispanic or who even looked like they might be Hispanic, whether they were aliens, legal or not, whether they were U.S. citizens, might be subject to being stopped on the street and forced to prove their citizenship; that they might, in fact, be subject to harassment.

Mr. President, I do not suggest that this is the moment for us to attempt to evaluate the success of operation jobs, nor am I one of those who thinks that it is possible to conduct any law enforcement operation of this type without some incidents that we wish had not occurred. I do say that in this particular case, enough concern was raised that I wanted to draw it to the attention of my colleagues and, having done so, to ask for the adoption of the sense-of-the-Senate resolution which I have offered as a new section 402 of the bill. That is just to make it clear to anyone who follows that procedure or who intends to take action under this statute if it is adopted that the Senate cares about the legal position of the people involved, that the Senate cares about the constitutional rights of

those citizens, and even cares about the rights of those who are not citizens.

Mr. President, I see no reason for extended discussion. I shall be happy to respond to any questions. Other than that, I am prepared to move the adoption of the amendment.

Mr. SIMPSON. Mr. President, I thank the Senator from Colorado. He again proves his sensitive nature in this amendment, because this is, indeed, what we are trying to do. I concur with the amendment, which reaffirms that our immigration laws are enforced in a humane fashion—that is certainly the intent—and that the rights of citizens and aliens are protected in the enforcement of these laws. Certainly, we do increase the protection and we do assure that the enforcement will be carried out in a humane manner. As I say, that is what we have been trying to do throughout the entire hearing process and the drafting process on S. 2222. This very well reaffirms our intent.

Let me say that some of the rather unfortunate—indeed unfortunate—situations the Senator from Colorado has outlined could very likely be resolved by the passage of this legislation so we would not have those types of operation throughout the country.

I thank the Senator from Colorado, Mr. President. We do accept the amendment.

Mr. KENNEDY. Mr. President, I join my colleague from Wyoming in commending the Senator from Colorado for making his recommendation. There is no question, that, over a period of years, there have been raids both in communities and in jobsite areas which have resulted in discrimination against American workers.

I know the Senator has commented on the operation jobs program and the indignities which were brought about by that operation. These searches, these raids, cause enormous concern to American citizens and permanent resident aliens. I think the recommendation that has been made by the Senator from Colorado will, for the first time, establish in the law some important guidelines which should be followed. I think it is a very helpful and constructive recommendation. I certainly welcome seeing such language included in this bill.

Mr. DOMENICI. Mr. President, I commend the Senator from Colorado for what I heard him say—may I ask him his intention with reference to the concept, in the sense-of-the-Senate resolution?

Could he briefly tell the Senator from New Mexico what it says? What specifically will we be recommending by this sense-of-the-Senate approach?

Mr. ARMSTRONG. Mr. President, if the Senator will yield to me, I shall be happy to respond.

The sense-of-the-Senate language which is contained in the amendment I have offered simply expresses the sense of this body that we call upon those who are charged with enforcing immigration laws to do so vigorously and uniformly and that, in doing so, the Attorney General and other responsible law enforcement officials should take all due care and those deliberate actions which are necessary to safeguard the constitutional rights, personal safety, and human dignity of U.S. citizens and aliens.

I distinguished, in this recommended language, U.S. citizens from aliens because, obviously, U.S. citizens have certain rights that stem from their citizenship, while those persons who are here as aliens have other kinds of rights of a more limited nature. But, I point out to my colleague from New Mexico, someone who may be here as an alien, even as an illegal alien, even as somebody who has entered this country under circumstances that may be reprehensible, even though those rights may be different from a U.S. citizen's rights, nevertheless, it would be the desire, I am sure, to accord to such persons, even those here under the wrong circumstances, the human dignity and the human rights to which his personhood itself entitles him.

I do not think that in this resolution, we establish any new legal rights for anyone. What we are saying is how we feel about the enforcement process. I particularly wanted to reflect in my remarks a concern about the specifics of an enforcement operation which occurred in my State, the details of which I am familiar with, so that, laid down beside this sense-of-the-Senate language, it would provide a degree of guidance to law enforcement officers.

Mr. DOMENICI. Let me say to my friend from Colorado that I commend him for his statement on the floor and for the resolution. I have a little different perspective than some in that both of my parents were immigrants. One was an illegal alien for a long time and did not even know that she was. I had an experience, when I was a very young boy, with the Immigration and Naturalization Service. The INS officers visited my home and the experience was one of the most frightening memories of my childhood. From that experience, and from reports I hear from others I think I would add that it appears to me that frequently, there is an absence of common, ordinary horsesense on the part of immigration officers in the manner that they discharge their official duties.

I hope that our intent in this resolution is to expect the highest level of professional conduct from the INS in dealing with people, citizens or aliens alike, with regard to their human dignity. I do not want to add my interpretation of it; I have just given it. I do not think we can accord people that

basic right of human dignity without using good commonsense.

I know the INS officers have a difficult job and I would not burden the Senate with the experience that I had as a young boy with my family, but it appears to me that there is a propensity for some kind of hysteria—the Senator mentioned it—in the community of Hispanics.

I think sometimes the Immigration officials act as if they are hysterical. They frequently do things that, with the Senator's language in mind, in retrospect, they conclude did not evidence common ordinary sense in dealing with people. I commend the Senator for good language. I think we ought to make it eminently clear that we do not think these problems are all going to go away because we pass this bill. Even if this bill is going to be everything everybody says it is going to be, we are still going to have illegal aliens. We are going to have them here for a long time. We are going to have large numbers of them. They may not even sign up for either the permanent or the temporary designation and may thus remain illegal aliens. History indicates when you have one of these kinds of programs, illegal aliens are fearful to sign up. They are afraid of the Immigration officials. We are going to have them here and they will not even prove they qualify.

History in other countries such as Belgium, Holland, and England would indicate that huge percentages are going to remain in their illegal status out of fear and trepidation. They are not going to have enough confidence to come forward to prove their eligibility for legalization. They are going to remain in the subculture classification that concerns the Senator here today. They will remain undocumented. Some will be exploited. This bill will not solve their problems any more than it solves all of our immigration problems. We have to continue to look for and approach them in an effort to carry out the laws.

I do not think those episodes are going to go away. Those instances are going to be there. I personally think that we need very levelheaded, stable, consistent people running these operations. I think the Senator's sense-of-the-Senate resolution will clearly indicate that that is a high quality and standard that is going to be required in carrying out the responsibilities of this sense-of-the-Senate resolution.

I thank the Senator for it, and I support his approach.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1229) was agreed to.

Mr. ARMSTRONG. I move to reconsider the vote by which the amendment was agreed to.

Mr. SYMMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1230

(Purpose: To protect the privacy and security of a system to determine employment eligibility in the United States, and for other purposes)

Mr. SIMPSON. Mr. President, I send to the desk an unprinted amendment on behalf of the Senator from Kansas (Mr. DOLE) and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wyoming (Mr. SIMPSON), on behalf of the Senator from Kansas (Mr. DOLE), proposes an unprinted amendment numbered 1230.

Mr. SIMPSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 84, between lines 20 and 21, insert the following:

"(D) the system will protect the privacy and security of personal information and identifiers utilized in the system including recommendations to the Congress for the establishment of civil and criminal sanctions for unauthorized use or disclosure of the information or identifiers contained in such system;

On page 84, line 21, strike out "(D)" and insert in lieu thereof "(E)".

On page 85, line 1, strike out "(E)" and insert in lieu thereof "(F)".

On page 85, line 5, strike out "(F)" and insert in lieu thereof "(G)".

On page 85, between lines 11 and 12, insert the following:

"(H) the President shall examine existing Federal and State identification systems, or the systems referred to in subsection (b) of this section, to determine suitability for use with the permanent system authorized to be developed by this section.

● Mr. DOLE. Mr. President, part A of title 1 of S. 2222, as reported from the Committee on the Judiciary, establishes Federal criminal sanctions for employers who knowingly hire illegal aliens. The employer, under this process, must verify he has examined documents which establish both (a) eligibility to work, and (b) identity showing that the individual presenting proof of eligibility is not presenting false identification. A valid U.S. passport would establish both. Otherwise one document in each of the following categories would be presented: (a) Social security card or birth certificate, and (b) INS-issued "adit" card, drivers license, other State-issued card, or other documents approved by the Attorney General.

The above verification procedure would be in effect for a 3-year transitional period. During that time, the

President would be directed to develop and implement a secure system to verify work eligibility. The system would not be available for any other law enforcement purpose and if it were to involve the use of a card, the card could not be used for any other purpose. However, if the transitional procedures proved to be effective, the new system would not be required.

These provisions, which constitute an attempt to deal with a highly complex set of issues relating to personal identification systems, could lead to the establishment of a Federal database on every employed person in the United States which would be very costly and fraught with potential violations of individual privacy and freedom.

This proposed amendment to section 101(c)(1), title 1, of S. 2222 would broaden the scope of the Presidential directive described above. The President would be directed to examine existing Federal and State identification systems including but not limited to: Social Security, drivers license, food-stamp eligibility, passports, and others to evaluate their suitability for purposes of this act. The proposed amendment also directs the President to make recommendations to Congress for the establishment of civil and criminal sanctions for unauthorized misuse or disclosure of the information or identifiers contained in the system.

Mr. President, without these above changes, the committee bill could lead to the establishment of an expensive and redundant personal identification system which may be overly centralized at the Federal level. The system may not have adequate safeguards to prevent unauthorized access to personal information on virtually every individual in the United States as well as tens of thousands of individuals seeking admission to the United States for employment purposes.

The amendment will encourage a carefully safeguarded, economical, and efficient possible use of otherwise available Federal and State identification systems.●

Mr. SIMPSON. Mr. President, Senator DOLE is not able to be present today because of his deep involvement in conference committees and he asked me to present this amendment.

This amendment will provide additional safeguards to protect privacy and the security of personal information utilized in the more secure system to determine employment eligibility to be established under the bill. It will provide coordination and cooperation with other State and Federal agencies in using expertise developed in the area.

I have discussed this amendment with the distinguished minority floor manager. I believe he shares my view

that it is a desirable amendment, and we are prepared to accept it.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1230) was agreed to.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1955

(Purpose: To strike out provisions amending the Immigration and Nationality Act regarding the admission of nonimmigrant temporary workers)

Mr. KENNEDY addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes a printed amendment numbered 1955.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 79, in the table of contents, strike out the item relating to section 211.

On page 79, in the table of contents, redesignate the items relating to sections 212 and 213 as items relating to sections 211 and 212, respectively.

On page 120, line 23, strike out "212(b)" and insert in lieu thereof "211(b)".

Beginning on page 140 with line 13, strike out all through line 21 of page 146.

On page 146, line 23, strike out "Sec. 212." and insert in lieu thereof "Sec. 211."

On page 147, line 22, strike out "Sec. 213." and insert in lieu thereof "Sec. 212."

On page 154, line 7, strike out "212(b)" and insert in lieu thereof "211(b)".

On page 165, line 10, strike out "213(a)" and insert in lieu thereof "212(a)".

Mr. KENNEDY. Mr. President, the purpose of this amendment is simply to restore existing laws and regulations governing the H-2 temporary foreign worker provisions of the Immigration and Nationality Act.

The United States has long had a limited program through which temporary workers are allowed to enter the country on an H-2 nonimmigrant visa. Petitions for these workers are reviewed by the Department of Labor, which must certify that U.S. workers are not available and that the employment of aliens will not adversely affect the wages and working conditions of other similarly employed American workers.

From 1973 through 1976, H-2 admissions averaged a little more than 30,000 workers annually, 12,000 of

whom were agricultural workers. In 1977 and 1978, the number dropped below this level to 28,000 in 1977 and 23,000 in 1978.

Although there remain some problems and bureaucratic redtape in the administration of this program, it has generally worked satisfactorily. Furthermore, we can improve the fairness of the program to both U.S. workers and employers without any change in the statute, but through simple changes in the regulations.

This is because the H-2 program is largely a function of regulations. There are only four paragraphs in the immigration law establishing the program. Otherwise, it is entirely governed through regulations prescribed by the Attorney General, after consultations with the Secretary of Labor. Also, there is nothing in the statute that bars him from consulting with the Secretary of Agriculture or anyone else.

However, because the H-2 program in the agricultural area has only been used in the East—since western agricultural growers have always been able to depend upon a continuing supply of undocumented aliens—there was strong pressure to establish a formal temporary worker program in this bill if employer sanctions are established. The western agricultural growers fear that the H-2 program will not work to meet their anticipated labor needs.

But the burden of proof must rest on the employer through the labor certification process. We must resist establishing a large-scale temporary program—of going back to the old "bracero" program—because there is absolutely no evidence that it is needed.

When the Select Commission considered this issue, we voted overwhelmingly against establishment of a massive, new temporary worker program. However, we did recommend some changes, which the President is directed in this bill to review.

Mr. President, the Commission voted against a new temporary program because the adoption of the legalization program, and the implementation of the new immigration system established in this bill, will result in the legal admission of additional immigrants and an adjustment in the status of undocumented aliens already working here. In short, all those undocumented aliens upon which western agricultural growers have become so dependent, will be legalized.

But in response to the fears of some growers, and because of their lack of experience with the H-2 program, the committee attempted to write into this bill certain reassuring provisions which are now, under existing law, simply regulations. Through a long process of negotiations, the committee

picked some of the regulations and wrote them into the bill, while ignoring others.

In the process, I believe the cumulative affect of this process has been to seriously weaken the labor certification and other labor controls on the H-2 program. This has understandably alarmed labor organizations, who see a weakening of the current high standards employers are now required to meet in seeking American workers first.

Mr. President, the need for temporary workers can be met by the existing H-2 program, as established in the Immigration and Nationality Act, and governed by regulations. If changes are needed, as suggested in this bill, then let both sides present the evidence to the Department of Labor and let the regulations be adjusted.

My amendment simply strikes the new H-2 language in the bill, leaving existing law and regulations to govern the admission of H-2 workers.

In conclusion, Mr. President, I think it is important to emphasize that the H-2 temporary worker program was designed to provide employers with temporary foreign labor only during unique and emergency circumstances. It was never intended to become a permanent, ongoing guest worker program. And it should not become one now.

We should be looking to the day when we can eliminate this program—to end America's dependence upon foreign workers—not to perpetuate it.

By returning to the H-2 program as it now is, we will be reaffirming the intention of Congress that this program should not become a formal, and continuing, guest worker program.

Mr. President, I would like to share with my colleagues a factsheet that clearly makes this point. I ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the factsheet was ordered to be printed in the RECORD, as follows:

**THE GUESTWORKER PROGRAM IN S. 2222—A
FACTSHEET PREPARED BY AFL-CIO**

THE H-2 PROGRAM: WHAT DOES IT DO?

The H-2 Program was designed to provide employers with temporary foreign labor in unique and emergency circumstances. It was not designed to accommodate the hundreds of thousands of guestworkers implied by the committee bill. In order to qualify for the present program, the employer must establish that a reasonable effort has been made to attract American workers. These protections for American citizens, rather than any formal cap, define the size of the program. The simple requirement that domestic workers get first crack at jobs in this country is, however, one of the things changed by the committee bill.

**NUMBERS: HOW MANY GUESTWORKERS ARE WE
TALKING ABOUT?**

The program has admitted about 30,000 foreign nationals annually. This year it will be about 42,000. Not all of the visas are agricultural labor, of course; some 20 percent, in

fact, are in the construction industry, which certainly faces no shortage of qualified domestic labor. While proponents of this new H-2/Guestworker program for obvious reasons won't talk numbers, they clearly mean to import a lot of people. Their program has no upper limit, and few protections for Americans. We could see several hundred thousand guestworkers shipped in for American jobs. Earlier this spring, the Attorney General described the new proposal in such very massive terms during a speech before the California Chamber of Commerce in Los Angeles.

**GUESTWORKERS IN IMMIGRATION POLICY: DO
WE NEED MORE ALIEN LABOR NOW?**

The program must be taken in context. Other parts of the legislation would legalize the status of several million illegal aliens, but nobody knows exactly how many people will be involved. Nor can anyone predict their occupational or regional mobility, their skill levels, or their unemployment rates once their status is adjusted. The bill also encourages family reunification under a new system, which means even more unfamiliar variables in the labor market. No proponent of this guestworker program, for instance, is pretending to predict the labor force participation rates of the spouses and minor teenage children admitted during the first three years following enactment. These new factors are bound to have impacts on regional and national labor markets already burdened by eleven million jobless. But until we know what they are, there is no evidence to support a new "need" for more foreign workers, particularly since the current program would accommodate any special, emergency situations.

DOMESTIC IMPACT: WHO GETS HURT?

The more guestworkers admitted, the more violence done to more of our society. On the front line would be those competing (in their own country) with cheap foreign labor. Typical in low-skill, low-wage occupations are women, minorities and new entrants into the labor force, some facing unemployment rates over fifty percent.

The consumer ends up paying for production methods which are reliant on foreign labor and which discourage the upgrading of low level jobs. In fixing wages at H-2 levels, the government depresses the ordinary instincts and incentives to improve productivity. In place of efficiency, the bill promotes "labor subsidies," underwritten by the American taxpayer, the consumer and those workers least able to pay.

Most arguments pushing guestworkers also focus on a supposed shortage of qualified American labor, but their perceived shortage exists only under the terms and conditions offered by the employer, which may be well below the going rate. They conveniently do not focus on what would happen if a free labor market were really working instead of being distorted by thousands upon thousands of imported foreign workers. If Americans were allowed to ask for better conditions, for example, instead of being undercut and routinely displaced by guestworkers, those better conditions might attract more domestic workers. It does happen, of course. Not too many years ago, coal mining was the dirtiest, most dangerous job in the country, but over time conditions improved to the extent that today the mines face no labor shortages.

**NEED VERSUS DESIRE: WOULD TEMPORARY
WORKERS REALLY BE TEMPORARY?**

While chairing hearings last October 22, Senator Simpson observed "Once employers

can use foreign workers, they want to keep using them and discourage U.S. workers, thereby justifying a continued 'need' for Mexican labor." He was absolutely right.

**THE TRACK RECORD: WHAT IS THE EXPERIENCE
WITH GUESTWORKER PROGRAMS?**

Whether here or abroad, they have been a blight. The Biblical exodus from Egypt, in fact, is the first good story of a failed guestworker program. A little later (1973) West Germany stopped recruiting its Gastarbeiters, but not all left. In 1973-74 two million European guestworkers returned home, but five million stayed, with some seven million dependents. Now, with a serious unemployment problem of its own, the German government has been forced to try special bounties to persuade the guestworkers to leave.

In our own country, we stopped the brace-ro program in 1964, after a twenty-two year history of racism and abuse. To make matters even worse, that program actually increased illegal immigration, by raising Mexican expectations of the promised land through bracero recruitment efforts.

THE NATIONAL TEST: LOOKING FOR AMERICANS

Currently, the H-2 program requires employers to make sure that there are no available American workers before foreign workers are recruited. This "national test," while obviously designed to protect our citizens, has come under fire for being "excessively burdensome." Actually, it is nothing of the kind. Typically all that is required is a job order filed free of charge at a local employment service office. The government takes it from there. To remove the "national test," however, poses considerable problems for US workers who might want to apply for the job. If, for instance, the would be employer is merely required to look within his own local area or state, there is a good chance the job offer will never reach most farm workers farther up the migrant stream. Farm labor rarely remains stationary; the occupation requires mobility. All that we would require of the employer is that he let Americans know what he wants of them, before he asks our government to forget about us.

LEGAL STATUS: PROTECTING THE H-2 WORKER

This proposal has official guarantees, but the dog won't hunt. In practice, the limited tenure of guestworkers prevents enforcement of certain, often the most important labor laws. Any protracted enforcement procedure (whether legitimate due process or not) nullifies protection of the temporary worker. A company can tie the Wagner Act in knots if it wants to. The cost to the average citizen is bad enough: To someone on a month-to-month visa, it is insurmountable. Justice delayed ends up justice denied.

One of the big question marks in this bill is what Secretary Donovan would do with the relevant regulations. Currently, there are explicit guarantees that the H-2 worker shall be transported, housed and treated with some modicum of decency. Of course, should the committee bill become law, each of those provisions may be rewritten and, possibly, returned to sender. Not that the current protections afford the farm worker any special comforts; but, on the other hand, the bill provides no guarantees that minimal protections would not go out the window either.

**EMPLOYER ASSOCIATIONS: LOOPHOLES FOR
CARTELS?**

The bill authorizes an association of agricultural producers to petition for an H-2

certification on behalf of its members. If the association is the sole employer of the alien labor, then only the association can be held liable for misrepresentations to the H-2's and the government. Should the association members violate their contract with the workers—for pay, hours, or other working conditions—only the association itself would be held responsible. Moreover, if the association makes false representations to the government in order to secure H-2 workers, the association, and not its members, is to be held liable and barred from the program for one year. This would enable employers to set up association which would be dissolved and reconstituted at will to avoid liability for the misdeeds of its members. The guilty parties would be unpunished and eligible for new certifications.

The bill also allows associations to represent producers of many crops in an association. Current regulations properly limit these associations to a single crop. Crops tend to have different peak harvest periods. Under the bill's language, once one crop is harvested, the guestworkers would be moved to another, then another, and so on. This raises the very real possibility of a vast, floating labor pool of alien workers moving around the country under these associations.

THE DEPARTMENT OF AGRICULTURE: A NEW REGULATOR FOR THE LABOR MARKET?

At the present time, the Department of Labor (DOL) is responsible for regulations covering H-2 workers. Only the DOL can approve a petition for any kind of H-2 workers. This is appropriate, because of DOL's overall stewardship of the labor market. Section 211(d) of the proposed immigration bill would vest the authority to write H-2 regulations with the Attorney General, and would dilute DOL's role by imposing the Department of Agriculture (USDA) in the process of writing the regulations.

The DOL would continue to issue all regulations relating to certification for H-2 workers, but would have to work in conjunction with the USDA in advising the Attorney General on regulations governing agricultural H-2 workers. These workers would not gain at all by adding yet another step in the regulatory process. In fact, extending the process to one more federal bureaucracy is more likely to undermine the protections they currently have.

INTERNATIONAL IMPLICATIONS: A RELATIONSHIP BASED ON EXPLOITATION?

Although promoted as a near-magical "population safety valve" for Mexico, this guestworker proposal has been a diplomatic Edsel. Before we pressure that we are doing our neighbors some big favor, consider for a moment the situation were we in their place. Consider the spectacle of our exploited compatriots working jobs beneath acceptable Mexican standards. Think about being a part of a permanent, if individually rotating, subclass relegated to the least desirable jobs. Denied the basic and minimal social services, the situation could easily excite as much tension as admiration on the border.

Marginal, substandard conditions make for a highly dangerous and provocative foreign policy, which is why Mexican church, labor and other organizations have denounced guestworker programs in the past. International traffic in exploited human beings is a reckless enterprise. Only last year Senator Simpson said, "potential short-term economic benefits must be weighed against the potential long-range social dangers which might result." Amen.

Mr. KENNEDY. Mr. President, let me make clear that the purpose of my amendment is to insure that the current rules and regulations which have been tried, tested, and worked effectively will continue to work in force over the period of the future and be applied to any temporary worker program.

It seems to me, Mr. President, that these rules and regulations have worked, they have been effective and they have also protected American workers.

It has not been an easy process to develop these rules and regulations over a period of years. Many States have been affected by the workers coming in for temporary periods of time. I know in Massachusetts, which does permit some temporary workers, a limited number, at the time of picking apples and some other crops that this is a procedure which is important in terms of protecting the interests of workers and also insuring fairness to those that are going to come in as temporary workers.

It does not seem to me to be wise for us at this time to alter that process in a way which may very well jeopardize the job conditions of Americans, particularly at this time of high unemployment, and that may very well have some adverse impact on the wages of American workers in different regions of the country.

Mr. President, it is a simple amendment, but it is extremely important and I hope that the Senate is prepared to accept it.

Mr. SIMPSON. Mr. President, I wish to resist this amendment. This is a very difficult area of H-2 workers, which is the statutory form of a temporary worker program. You will note that in S. 2222 we do not embrace the concept of "temporary worker" or "guest worker."

We found that not appropriate and so, to do what we had to to provide agriculture with the necessary personnel, especially growers in the West, livestock personnel, we had to make adjustments in the H-2 program that is presently on the statute books. We did that by a streamlining process.

The problem is that some U.S. employers have become absolutely dependent upon illegal labor. The committee did not want employer sanctions, which is the most critical part of this bill, to create an abrupt negative impact on these U.S. employers, and so we provided a transitional program for admitting needed workers by means both expeditious and protective of U.S. workers in similar jobs.

The existing H-2 program which admits entertainers, professional athletes, and only really 18,000 agricultural workers, is protective of U.S. labor, and that is very critically important. But it is not sufficiently expeditious to

provide needed workers, particularly in the agricultural industry.

This new H-2 program in S. 2222 provides a clearer and more expeditious procedure for addressing temporary labor shortages, particularly in agricultural labor.

Of all the provisions considered in the last year and a half with regard to this legislation, I would say that we spent more time on these H-2 provisions in this bill. They were carefully drafted. We not only had hearings, we had extensive consultations, informal consultations with labor unions, agricultural growers, representatives of migrant groups, the Department of Agriculture, the Department of Labor, the INS and each down through the esoteric distinctions of onions, grapes, berries, sheep—it was a fascinating procedure.

All contributed in a most significant way to the new H-2 program which is contained in the bill. Of all the areas of the legislation—and certainly some perilously mounted there—this is the one that hangs by the silken thread. Without those provisions, the committee believes that U.S. employers, agricultural employers in particular, will have difficulty obtaining needed workers during the transition period.

Mr. SYMMS. Mr. President, will the Senator yield for a question?

Mr. SIMPSON. I will yield in a moment. I have a few more remarks.

Clearly, Mr. President, there is a need for a specific program for agriculture.

In 1960, there were 400,000 U.S. migrant farmworkers. By 1970, the number declined to 200,000. In contrast, now the U.S. Department of Agriculture estimates that there are 300,000 to 600,000 illegal migrant farmworkers in the United States.

It is not likely that a great number of the labor pool will qualify for the continuous residency requirement in the legalization program. Therefore, American agriculture must have some means to convert the current illegal work force into a legal one, and we believe that we provide that in S. 2222.

I am happy to yield to my colleague from Idaho.

Mr. SYMMS. I should like the Senator to explain something for my edification. He mentioned to me yesterday something about the H-2 program. He referred to it again this morning. Can the Senator tell me how the H-2 program is going to replace what many of us thought we should have—a guest worker permit system? How is the H-2 program going to answer the demand for farm labor, particularly in the Western States, where, as the Senator from Wyoming knows, there is a guest worker program right now, but it is not legal?

Mr. SIMPSON. Mr. President, the committee rejected, as I indicated, all

proposals to have a massive, new temporary guest worker program. We felt that it had failed in Europe wherever it was used. We had interesting testimony to show that temporary workers, or guest workers, came to France and Germany, and now we find those Governments trying to pay them to return to their countries—if you can believe that. They offer Turkish persons in Germany a certain sum of money to return.

We did not want to go to that. We provided that after 80 days, when the persons involved in agriculture indicate that they need or require a flow of workers, they simply make their petition or application, within the 80-day period. Then, within 20 days, under this legislation—

Mr. SYMMS. Eighty days prior?

Mr. SIMPSON. Eighty days prior to when they need the workers.

MR. SYMMS. Let us say they need sugar beet workers in western Idaho, for example, and they make a petition 80 days before that they need 5,000 workers.

To what page is the Senator referring?

Mr. SIMPSON. I refer the Senator to the report language on H-2 workers on page 44. That is a very complete description of what we did, what we require.

We also recognize the special problems of livestock. We are indicating that under the new procedure, aliens may perform seasonal labor for not more than 8 months in any calendar year, except where there is a case of agricultural labor or services in which the Secretary of Labor recognizes, before the enactment of this, that a longer period was necessary.

As I indicate, the entire procedure is set out. The employers are not required to file for temporary agricultural workers more than 80 days before the labor or the services are required. Then the Secretary of Labor is directed to make his certification at least 20 days before the date the labor or services are required, if the employer has complied with the criteria for certification and if he has not had other qualified people referred to him as he would ordinarily.

That petition is then filed. There is an expedited procedure. If the employer, in reliance upon this approval, does not receive these employees, these temporary, seasonal workers, then he can actually demand that that take place. He can have a de novo hearing within hours, and he either receives those persons or he can go outside the labor force to do so.

Mr. SYMMS. Let us say, for example, that you are trying to bring 5,000 workers to a certain area for a very timely type of work—say, working on sugar beets or picking perishable commodities, harvesting potatoes. Does the farmer or the producer then have

to have the name of each worker, or does he go to the Department and file for 5,000 workers or 500 or 50, and they come in?

Mr. SIMPSON. If the Labor Department does not furnish the labor that has been promised, the employer can then bring them in.

Mr. SYMMS. He can bring them in himself, the employer can?

Mr. SIMPSON. That is correct.

Mr. SYMMS. Does the Senator perceive, then, that a lot of workers now coming in illegally will start coming in under the H-2 program?

Mr. SIMPSON. Many of them will be legalized under the provisions of this measure.

Mr. SYMMS. The amnesty program of this bill?

Mr. SIMPSON. That is correct.

Mr. SYMMS. In the future, when aliens are brought in, they will come under the H-2 program, so-called, as guest workers. In the Western part of the United States, we are using Mexican nationals for agricultural labor that is what I am talking about.

Mr. SIMPSON. They will be described as H-2 workers.

Mr. SYMMS. What does the amendment of the Senator from Massachusetts say?

Mr. SIMPSON. He is simply moving to strike the new H-2 temporary worker provisions of S. 2222, leaving existing law and regulations, if I state it correctly.

Mr. SYMMS. In other words, there would be no way under this bill to bring in new workers if the amendment of the Senator from Massachusetts is agreed to. Is that right?

Mr. KENNEDY. No, that is not correct at all.

Under the regulations that are in effect at the present time, which I want to continue, 28,000 were brought in during 1977 and 23,000 were brought in during 1978. But at the same time this bill has rejected the concept of returning to a bracero type of program.

What we are saying is that we have rules and regulations that have been established and are basically going to guide this program in the future. But there is no ceiling.

The law governing this program is virtually one page long. It provides enormous discretion to the Attorney General. We felt it was important that such discretion be continued. However, it has not been the position of the committee that we return to a bracero type of program.

The existing H-2 provisions provide for adequate numbers in the past, they have met the agricultural needs in the past. I would expect that there would be some increase in the future, but it will be done in a way to protect American workers, their wages and their working conditions.

Mr. SYMMS. I appreciate that. I am not trying to be argumentative. I am

trying to understand this: In the Columbia Basin—in Oregon, Washington, and Idaho, for example—in past years, 80 percent to 90 percent of the perishable crops have been harvested by what would be termed here “illegal aliens.” It is a guestworker program that works very well.

The problem with it is that because of the illegality of it, the workers are always running. I appreciate the amendment of the Senator from Colorado. I have witnessed some horrible human rights violations—but I will not burden the Senate with them—of immigration authorities chasing people who legitimately come to the United States for only one reason—to earn an honest living, to provide for their families. Yet, somehow, they run like hunted criminals if a law enforcement officer comes near.

In other words, what the Senator from Wyoming is saying is if the amendment were agreed to, then there would be no means to bring in new workers other than the 23,000 workers the Senator mentioned. I believe Senator HAYAKAWA introduced a bill earlier this year allowing for 1 million workers to come in, the guest-worker program.

I personally think that would be a reasonable figure, if we try to include what is happening in this country. But I wish to know how are these crops going to be harvested if new workers are required anywhere in the country if the Kennedy amendment should be agreed to?

Mr. SIMPSON. Mr. President, in my mind it would be indeed much more difficult if the Kennedy amendment were agreed to. The whole purpose of the H-2 provisions and the streamlining or expediting that is in S. 2222 was to expedite the flow of persons for seasonal work in the United States. We expedited this procedure particularly for the employer and particularly the agricultural grower. In addition, for the first time under S. 2222, the Secretary of Agriculture is involved.

The Secretary of Agriculture was never involved. For the first time now, under S. 2222, we have the involvement of the Secretary of Agriculture—we have him involved in the consultation process. Under the report language on page 46, we say the Secretary of Labor. We do not take away any of the powers of the Secretary of Labor. But we say:

The Secretary of Labor, in consultation with the Attorney General and the Secretary of Agriculture, is required to report annually to the Congress on the certification process, including the impact of temporary alien workers on labor conditions in the United States and on compliance with the conditions of the program.

The bill even provides appropriations of \$10 million in each fiscal year to recruit domestic workers for jobs which temporary alien workers might

otherwise perform and to monitor the conditions of employment of nonimmigrants and authorizes that type of procedure.

It makes agricultural workers more readily available to American agriculture than under the present law, at the same time protecting U.S. workers. Agricultural growers in the Northeast and in Florida have used H-2 worker programs successfully for years. Under S. 2222, we will now find that use available in other parts of the United States.

Mr. SYMMS. In other words, when people from the Caribbean, and so forth, are brought in for agricultural harvest in the Northeast and the Southeast, we would be doing a similar thing with Mexican nationals, I assume, in the Western States.

Mr. SIMPSON. That is correct.

Mr. SYMMS. And it is the opinion of the Senator there will be enough flexibility. I guess the concern the farmer will have is, will he really be able to rely on the bureaucratic maze of Government to act fast enough to realize that peaches, cherries, potatoes, and other crops like that are perishable and have to be harvested at a certain time? And it is the opinion of the Senator from Wyoming that that will be an expeditious process.

Mr. SIMPSON. Mr. President, indeed one of the critical issues we discussed was perishable crops, the seasonal nature of what was required, the immediacy—maybe even within just hours or days—of the crop to be harvested. With the procedures we have here, the promise is made and there is the commitment. If the commitment does not come through where the perishable aspects are critical, then we have a method to even overcome that in this legislation.

Mr. SYMMS. I thank the Senator very much for his enlightenment to this Senator on this question.

Mr. SIMPSON. I thank the Senator from Idaho.

Mr. KENNEDY. Mr. President, I shall only mention here some of the aspects of the current regulations which are eliminated under the provisions of this legislation.

First of all, there does have to be an active effort for recruiting workers and the recruitment provisions are weakened. It does seem to me that if the jobs are going to be available, there should be some requirements for indicating that those jobs are available, whatever those jobs are going to be, and whatever the wages are going to be. But those particular provisions are significantly weakened under this legislation.

Second, there is also a user fee requirement now, so if employers are going to need individuals to work in a particular industry, we are not going to burden the Federal Government on the costs of processing and seeking

foreign workers. Why should the Federal Government have to bear the burden for some particular grower, whether that grower happens to be in Massachusetts—and they do grow apples up there and other produce—or whether it exists in the other parts of this country?

We hear a great deal about user fees in other areas. The fact of the matter is, this weakens those particular provisions in the current regulations that require user fees. It says that if agricultural groups are going to need foreign workers, they must bear the financial responsibility in terms of trying to find out if those workers are available.

Another provision weakens the opportunity for American workers because it says that if the individual who shows up for work and is trying to bargain above the minimum wage, then the grower can say, "We do not have to pay you more; we can take a foreign worker at the minimum wage."

I believe that the impact of that can be adverse in terms of the working conditions for workers in this country.

The fact of the matter is, 70 percent of minimum wage recipients in the United States of America are heads of households, and so we are not just talking about part-time workers here. It may be part-time for a particular crop, but we are talking about men and women who are trying to provide for their families, and under this particular provision, they are able to say that if the American worker or resident alien shows up for this job or if several show up for this job and say they are prepared to do it at somewhat above the minimum wage, that the grower is able to turn them down and get a foreign worker.

And then there is the whole question of responsibility for these individuals, once they begin to work in these agricultural areas. The change in the rules and regulations on these multi-crop associations I think diffuses the responsibility of individual employers for some essential protections.

We have not established any ceiling on the H-2 program. We have not said it is 50,000, 500,000, or 1 million. We have not established any figure. But what we are asking for is that the tried and tested rules and regulations which have been established to control the temporary worker program, and also for the protection of the American workers, will continue.

This body has seen what happened when we had the bracero program. I was here in the period of the 1960's when one of the darker chapters of the employment situation in this country was the extraordinary exploitation of the braceros. I think it is essential that we do not send out a message as we consider this legislation that we are going back to that regrettable time.

As I mentioned earlier, the statutory language governing this program is effectively four paragraphs long, and that what is guiding those paragraphs are existing rules and regulations.

I say the rules and regulations which are in effect now and have applied for the admission of 28,000 temporary workers in 1977, 23,000 in 1978, should not be weakened in terms of protecting both the guest worker and protecting the American worker, particularly at this time of dramatic unemployment.

Mr. SIMPSON. Mr. President, I certainly share the views of the Senator from Massachusetts about the scope and misuses of the bracero program.

I happened to personally witness that when I was a young man in Crook County, Wyo., and it was as offensive to me then as it is now. I will leave out some of those personal recollections of that program.

But let me say that the H-2 provisions in S. 2222 actually in many ways are strengthening labor market protections under current law because we have built into the legislation what were previously some Labor Department regulations. I think that is worthy of note.

But I agree we must monitor it carefully. So in the law we have put the provision for a report annually to Congress on the certification, including the impact of temporary alien workers on labor conditions and on compliance with the program.

I thank the Chair.

Mr. KENNEDY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. MITCHELL. Mr. President, I rise in support of the amendment to strike the H-2 provisions of S. 2222. I am deeply concerned that the changes S. 2222 would make in the H-2 program could lead to the widespread use of foreign labor in this country at a time when almost 11 million Americans are unemployed.

The H-2 program, or bonded program as it is known, is designed to allow employers to hire foreign workers on a temporary basis if: First, qualified American workers are not available and second, hiring the foreign worker will not adversely affect the prevailing wage rates in the area. Although most H-2 workers work in the agricultural sector, many work in other industries in this country including the construction industry.

S. 2222 would make several major changes in the law governing the H-2 program. Taken together, they could lead to the increased use of foreign

labor at the expense of American workers. Specifically, I am concerned about three changes.

First, S. 2222 would give the Attorney General the authority to issue the regulations governing the program, in consultation with the Secretary of Labor and the Secretary of Agriculture. Under current practice, these regulations are issued by the Secretary of Labor. In my view, this is as it should be. The H-2 program, after all, involves the supply and demand of U.S. workers which is a labor issue.

I can understand the desire of agricultural interests, primarily in the West, to bring the Secretary of Agriculture into the regulatory decision-making process. However, I am concerned that bringing the Secretary of Agriculture into the process will result in regulations being issued which make it easier to bring foreign workers into the country. I believe this would be detrimental to workers in my home State of Maine, and around the Nation.

Second, current law governing the H-2 program allows foreign workers to be brought into the country if "unemployed persons capable of performing such service or labor cannot be found in this country." In practice, what this "national test" means is that the Department of Labor makes a search for available workers only in those States or regions of the country where such workers are known to exist.

S. 2222 would delete the reference to "in this country." No one knows exactly what affect this will have on the search made for U.S. workers. I am concerned that this would lead to regulations being issued which would require an employer to search for U.S. workers only in the immediate area, or the State, or perhaps a part of a State. This could lead to foreign workers being brought into the country when able and willing U.S. workers are available in adjacent States, or other parts of the same State.

Finally, I am opposed to the changes S. 2222 would make in the enforcement provisions governing the H-2 program. Under current regulations, if an employer does not "comply with the terms" of the labor certification which allows him to bring foreign workers into the country, the Regional Administrator of the Department of Labor may deny that employer's certification for the coming year. Under S. 2222, the Secretary of Labor may not issue a certification if, during the previous 2 years, the employer has substantially violated an essential term or condition of the labor certification. What is an essential term? What constitutes a substantial violation? Neither of these phrases is defined in the bill or the committee's report. I am concerned that the vagueness of this language will render the enforcement provisions meaningless and can only

lead to increased litigation as to whether an employer violated his certification.

The regulations governing the H-2 program apply to the logging industry as well. I am particularly concerned about the potential impact changes the H-2 program will have on Maine woods workers. For many years, Maine's woods workers have been competing with Canadian woods workers for scarce jobs in the logging industry. This competition is made even more intense in today's current recession in which the demand for wood products, of all kinds, is sharply reduced.

Under current practice, a logging contractor who typically signs a contract with a paper company to supply a certain amount of wood hires woods workers to do the cutting. In January, these contractors usually apply to the Job Service to bring in Canadian woods workers for the start of the cutting season, around the first of May. Contracts may be signed for up to 11 months. However, with the economy the way it is most cutters do not cut for more than 8 months.

In 1980, the Secretary of Labor certified 642 Canadian woods workers to come into Maine. In 1982, this number dropped to 366. Compared to the number of H-2 workers certified nationwide, this is not a large number of foreign workers. In my view however, it is too large if one, just one, unemployed Maine woodsman is willing and able to do the job.

We hear a lot of talk these days about protecting American industries from unfair foreign competition. What about protecting American workers from unfair foreign competition?

I am not totally opposed to the H-2 program. I believe it can serve the useful function of allowing employers to bring in foreign workers on a temporary basis when no American workers are available to do the job. There have been some problems in the administration of the program and that process needs to be streamlined. But I do not believe these problems justify the wholesale changing of the law governing the program.

It is not absolutely certain the changes in the law governing the H-2 program by S. 2222 will result in more foreign workers coming into the country. However, it seems to me that this is a distinct possibility. No one knows for sure what impact this legalization will have on the labor market.

In Maine we have a saying: "If it ain't broke, don't fix it." The H-2 program ain't broke. Let us not try to fix it.

I urge my colleagues to support the Kennedy amendment.

Mr. SYMMS. Mr. President, before we go to the vote, I just wanted to say to my colleagues here—and I hear what they are saying about the old bracero program—let us not kid our-

selves as to what is happening today. I think it would be a real mistake if the Senator's amendment passed because we have a guest worker or a bracero program working in the western part of the United States right now but it is just not a legal one. I think we can protect the rights of those workers more if somehow they did not have to hide as if they were coyotes from law enforcement officers, so that they can live in better housing and be treated more as we would all like to treat human beings.

That is the problem we face. It is a compliment to the United States, in one way, in that people will break the law to come in here to get jobs that Americans do not want.

Twenty years ago or so we were spending about 25 percent of the Federal budget on welfare transfer payment-type programs. Today we are spending over 50 percent of it, and there is not the encouragement—there is not the American citizen wanting those jobs in the western part of the United States. These workers who are up there harvesting potatoes, changing sprinkler pipes, picking fruit crops are making very good wages, so we do not want to fool ourselves on that either. It is not that people are not making what they consider to be good wages, and in some cases American citizens would consider them good wages. I am talking about anywhere from \$50 to—it is not unusual to see fruitpickers making \$50 a day, and in some cases more than that. Some days they will make much more than that. But I think what we need to understand is that if this amendment should pass and you limit it even more to the allowance of people who come into the country, guest workers if you wish to call them that, that is what is happening now, and I do not think we should try to pass something here that is going to limit the flow of workers, an adequate supply of workers.

If the Senator from Wyoming is correct in his assumption that the farm labor market in the Western States will be able to go in and apply and get adequate supplies of workers, then he has a possibility of having that program work. If you cut this off and try to enforce some kind of a new law, then this is not going to change much of what is happening right today. There will just be more counterfeiting of identification cards and more of the same thing going on.

I hope when this is over—and I am very concerned about this legislation, I must say—I would be much happier if we had a guest worker program so that you could legitimize a temporary worker to come in and fulfill a seasonal-type employment, then I think you would have a leg to stand on to enforce some firm immigration requirements.

But this is going to be very difficult to accomplish, having what the noble goals of this legislation are, to really have the impact that people here who are promoting it think that it is going to have.

I think we should recognize the reality of what is going on right now in the Western United States. I hope the Senator from California, Senator HAYAKAWA, will come to speak to that because a great deal of the fruit crops in California, Washington, Oregon, Idaho, the entire western part of the United States is actually, in fact, harvested by illegal aliens. They are not harvested by American nationals.

I urge my colleagues to vote down this amendment because I think it will be something which will seriously weaken the ability of this legislation to be successful and to accomplish the goals the authors of the legislation hope it will accomplish.

Mr. KENNEDY. Mr. President, just to make a brief comment and then I hope we will go to a vote, the purpose under this legislation, as I understand it, is that those individuals who have been utilized in agriculture in many parts of the West, and in industry in many parts of the East, are going to be legalized and adjust their status to permanent resident aliens and come out of this subclass, and eventually move toward citizenship.

So we are not just legislating for today; we are trying to legislate down the road. We are establishing in this legislation guidelines that will guide us over the period of future years.

Existing regulations obviously can be altered and changed to deal with new realities. But I still do not believe we ought to weaken in a significant way, for the reasons I outlined earlier, the current regulations which were established to protect both agricultural workers and those who work in other aspects of our economy.

I am prepared to vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Massachusetts. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Kansas (Mr. DOLE), the Senator from Utah (Mr. HATCH), the Senator from Oregon (Mr. HATFIELD), the Senator from California (Mr. HAYAKAWA), the Senator from Maryland (Mr. MATHIAS), the Senator from Alaska (Mr. MURKOWSKI), the Senator from New Mexico (Mr. SCHMITT), the Senator from Wyoming (Mr. WALLOP), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I further announce that, if present and voting, the Senator from Kansas (Mr. DOLE) and the Senator from Oregon (Mr. HATFIELD) would each vote "nay."

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON) is necessarily absent.

The PRESIDING OFFICER. (Mr. CHAFFEE). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 28, nays 62, as follows:

[Rollcall Vote No. 319 Leg.]

YEAS—28

Biden	Heinz	Pell
Bradley	Inouye	Percy
Chafee	Jackson	Proxmire
Cohen	Johnston	Riegle
Cranston	Kennedy	Sarbanes
Danforth	Levin	Sasser
Dixon	Long	Specter
Dodd	Metzenbaum	Tsongas
Glenn	Mitchell	
Hart	Moynihan	

NAYS—62

Abdnor	Eagleton	Mattingly
Andrews	East	McClure
Armstrong	Exon	Melcher
Baker	Ford	Nickles
Baucus	Garn	Nunn
Bentsen	Goldwater	Packwood

Boschwitz	Grassley	Pryor
Brady	Hawkins	Quayle
Bumpers	Heflin	Randolph
Burdick	Helms	Roth
Byrd	Hollings	Rudman
Harry F., Jr.	Huddleston	Simpson
Byrd, Robert C.	Humphrey	Stafford
Chiles	Jepson	Stennis
Cochran	Kassebaum	Stevens
D'Amato	Kasten	Symms
DeConcini	Laxalt	Thurmond
Denton	Leahy	Tower
Domenici	Lugar	Warner
Durenberger	Matsunaga	Zorinsky

NOT VOTING—10

Cannon	Hayakawa	Wallop
Dole	Mathias	Weicker
Hatch	Murkowski	
Hatfield	Schmitt	

So Mr. KENNEDY's amendment (No. 1955) was rejected.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SIMPSON addressed the Chair. The PRESIDING OFFICER. The Senator from Wyoming.

Mr. SIMPSON. Mr. President, I ask unanimous consent that on the amendment of the Senator from New York, there be a time agreement of 15 minutes equally divided.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

UP AMENDMENT NO. 1231

(Purpose: To provide that new or replacement social security cards shall be tamper-proof)

Mr. MOYNIHAN. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New York (Mr. MOYNIHAN) proposes an unprinted amendment numbered 1231.

Mr. MOYNIHAN. I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The amendment is as follows:

On page 90, between lines 2 and 3, insert the following:

(d)(1) Section 205(c)(2) of the Social Security Act is amended by adding at the end thereof the following new subparagraph:

"(D) The Secretary shall issue a social security card to each individual at the time of the issuance of a social security account number to such individual. The social security card shall be made of banknote paper, and, to the maximum extent practicable, shall be a card which cannot be counterfeited."

(2) The amendment made by paragraph (1) shall apply with respect to all new or replacement social security cards issued more than 190 days after the date of the enactment of this Act.

(3) There are authorized to be appropriated such sums as may be necessary to carry out the amendment made by paragraph (1). Such amounts shall not be paid out of the Trust Funds established under Section 201 of the Social Security Act.

Mr. MOYNIHAN. Mr. President, the purpose of my amendment is to require the Social Security Administration to print social security cards on banknote paper. As the distinguished chairman knows, as the Senate knows, for the first time, this legislation makes it a crime of perjury for an employer to employ an illegal alien. Under penalty of perjury, he must satisfy that he has verified that the individual is eligible to be employed. In the overwhelming number of instances, the identification presented will be the social security card.

For half a century, this card has been printed on pasteboard. It is, without equal, the most easily counterfeited document issued by the Federal Government. The extent of that counterfeit use has been testified to by the General Accounting Office. An estimate of the fraud and abuse resulting—may we have order, Mr. President?

The PRESIDING OFFICER. The point of the Senator from New York is well taken. If he would suspend for one moment.

We must give the Senator from New York an opportunity to be heard.

The Senator will proceed.

Mr. MOYNIHAN. I thank the Chair. Mr. President, the Senate Permanent Subcommittee on Investigations estimates that the cost to the Federal Government of counterfeit social security cards today is \$24 billion. Can you imagine what the cost to employers will be as they find themselves accused of perjury for accepting in good faith an easily and almost foolproof counterfeited document? The only respon-

sible response would be to produce a more tamper-proof document.

How do we do it? We do it in the same way we do it with our currency: we print it on banknote paper.

Mr. President, this Chamber has voted to do exactly that. Last October 15, unanimously, in a social security measure, we agreed to a proposal I submitted to require tamper-proof banknote paper cards. Unfortunately, the House conferees would not accept that on the advice then of the administration. That has long been a position through different political areas and parties of the Social Security Administration.

Mr. President, I am informed by Mr. Paul Simmons, the Deputy Director of the Social Security Administration, that the Administration is planning to print all newly issued or replacement cards on tamperproof stock beginning about January 1983. That is the first change in half a century in the social security card. It is interesting how quickly it would take effect. At a cost of about \$1.3 million a year—an administrative cost, not from the fund—we would replace almost half the social security cards in 5 years. That is a combination of new issues and replacements.

The administration has seen the light here; they accept the argument. However, Mr. President, I have to say that, once before, I obtained such an agreement from the Carter administration and they reneged. I do not in any sense suggest bad faith to the present administration. To the contrary, they have changed their mind after vigorously arguing the opposite case. The facts have persuaded them. They do not feel they need statutory authority. However, if given a statutory mandate, they will surely do what ought to be done.

Mr. President, I ask that a series of documents on this matter supporting the case be included in the RECORD, including one recent example of someone picked up for counterfeiting social security cards because the card "wasn't messy enough"—it was too obviously new.

There being no objection, the documents were ordered to be printed in the RECORD, as follows:

STATEMENT OF NEWTON VAN DRUNEN FOR THE HEARINGS ON FEDERAL IDENTIFICATION FRAUD

Mr. Chairman and Members of the Subcommittee:

My name is Newton Van Drunen. I am 54 years old. I was born in Canada and I am a citizen of the United States. I am presently incarcerated in a federal prison in Chicago, Illinois, and I am serving a ten-year sentence for counterfeiting and conspiracy offenses.

Throughout my youth, I spent a great deal of time working with members of the Mexican community. As the years went by, I began to identify more and more with their plight in this country. I speak Spanish fluently, and today I consider myself a part of the Mexican community.

I began my career smuggling aliens in 1956 or 1957. I can't recall how I got started, but during that time I also worked as an industrial arts teacher. On the side, I exported cars from the U.S. to Mexico. I started dealing in documents—as a middle-man, not a counterfeiter—in the late 1960s. I provided documents for illegal Mexicans and arranged work for them in factories around Chicago. In order to get jobs for Mexicans, I first had to get them a social security number. I did this by simply completing the application forms as there were no specific requirements at that time to get a number. When employers became concerned about hiring illegal aliens and began requiring more documentation, I furnished aliens with baptismal certificates in addition to the social security cards. I purchased these at church supply stores and just filled them out for each of my clients.

I was arrested and convicted in 1973 for illegally smuggling aliens from Mexico. In 1975, I was sent to Sandstone Federal Prison in Minnesota.

It was at Sandstone that I had my first experience with printing. I had not counterfeited any documents before going to jail, although I was very interested and eager to learn. Unbelievably, I was placed in the prison print shop to work and learn the trade. This shop did a lot of work for the Immigration Service.

Various INS internal documents crossed my hands in the print shop. Most important to me later on would be the information about the new INS alien registration card and the fact that INS had contracted with Polaroid to manufacture the card.

I couldn't believe this information was actually coming through my hands while in prison. I thought at first the government was setting me up because my wife continued running my business by furnishing vendors from the stock of documents I had accumulated. After I got over my fears, though, I learned various tricks of the trade from other inmates who were professional printers and counterfeiters.

When I got out of prison in 1976 I continued to sell documents as a middle-man. It was at this point that I set up a print shop by purchasing commonly available equipment. I did not try to counterfeit the INS card in use at that time, as I did not choose to create an inferior document. All of the information I had learned in jail about the new INS alien registration card was stored in the back of my mind until such time as the card would be issued in 1977. However, I did some experimenting to create my version of the new card. I assumed the government would use a sophisticated magnetic strip with coded information which would be placed inside the card. I later learned I was wrong—INS did not use as sophisticated a process as I had envisioned.

Meanwhile, I began producing my own Texas birth records, Selective Service cards, and social security cards. All of the Mexicans I sold to, through a network of vendors, knew the documents and the social security numbers were phony. I was selling identification packets consisting of the social security card, Texas birth certificate, baptismal certificate, and the Selective Service card for \$75.00 per package. This price was usually doubled by the vendors when they delivered the documents to Mexicans.

A few months after my release from Sandstone, I was arrested again by INS in 1977 but fled after I was released on bail. As a fugitive, I continued to operate my business in

the Chicago area. To avoid capture, I used several fake identities which I created, and I manufactured the documents to support these identities.

One of the most successful documents I counterfeited during this fugitive period was a reproduction of the photocopied letter issued by U.S. District Court Judge Grady as a result of his decision in an important immigration case. One hundred and forty-five thousand copies of this "Silva-Levi" letter were issued to aliens who, by possession of the letter, could remain legally in the U.S. and work. I simply reproduced hundreds of copies of this letter and sold it to vendors for \$15 each. The letter was a cinch to counterfeit, it did not have a serial number which could be traced, and it did not identify the person to whom it was issued. For false identification purposes, it was an ideal identity document.

I also counterfeited the INS form I-94 and issued it with the "Silva-Levi" letter. This is another dream document to reproduce. With an unsophisticated stamp noting "work authorized", a Mexican illegal can work almost without trouble in the U.S.

For a brief period, I made out income tax forms for Mexicans if they wanted me to. Some used the phony social security numbers I gave them to file for refunds. I don't think there is much coordination between IRS and the Social Security Administration. I figured it would take a while for these agencies to find out if any of the Mexicans were sharing social security numbers or using phony ones.

On a scale of "one to ten," the social security card is a "one"; it's just extremely simple to reproduce. Also, from various sources including social security office workers, I learned generalities about the social security numbering code. As far as I was concerned, phony social security numbers were undetectable by employers. The danger, if any, was in using a number issued to another person. Anyone could use my card for at least one to three years before detection, if at all. That was sufficient for my clients' needs. By 1980, I had learned enough about "unissued" social security numbers—those to be used by a state in fifteen or twenty years—and then only gave "unissued" numbers to my clients.

By the time INS first issued its new alien registration card in July 1980, I had already developed a loyal following. At one time I had a large number of vendors working throughout the Chicago area. Some of my vendors migrated to California, Arizona, New Mexico, Texas, Florida, Georgia, Indiana, Illinois, Michigan, Minnesota and Nebraska, and continued selling my documents in these states. I set the prices for the vendor and told them how much to charge the customers. For example, social security cards, birth certificates, and drivers licenses cost the vendor \$15 and the customer \$30. Harder-to-produce Texas birth certificates and birth registration cards together cost the vendor \$45 and the customer \$90. I took special request orders, and even counterfeited government agency envelopes. Since I did not deal directly with customers, I can't say exactly how many people purchased from my vendors the tens of thousands of documents I counterfeited.

I was finally able to get my hands on a just-issued INS alien registration card in the summer of 1980. Over several days, I worked out a theory of just how the card could be fabricated. I could not destroy the card I was studying, because it was someone's valid card, so I took measurements and made a

few test cards. About two weeks after I first saw the new card I created my first acceptable copy of it.

I know that optical readers for the coded information on the back of cards would not be available to Immigration inspectors at the same time the cards were to be issued. So, I didn't worry about breaking the code but used alien registration numbers that I made up. I knew that one number stood for the country of birth, therefore I used the correct number of Mexico. I also knew that another number on the back stood for the alien's date of entry or date of legalizing status.

I gambled that the government would use phosphorescent ink on the new card. I lost. INS used fluorescent ink, which is of a lesser quality ink and requires ultra-violet light for detection. I stopped using the more difficult phosphorescent ink quickly, but I never bothered to change to fluorescent ink.

I also erred in the type of film used to photograph one layer of the card. It turns out the government uses a different type of film, which is readily available on the commercial market.

The biggest problem with the new INS card is that every part of it can be completely reconstructed once the materials are discovered. The type, style, ink, paper, and even the overlays are commercially available.

I was able to counterfeit only 300 of the new alien identification cards before my arrest in 1981. After I made a new card, I maintained a filing system for everyone who bought a card from me. I guaranteed each person that the card would be corrected, within a 30-day period, if there were any errors. As I perfected the new card, I planned to have each customer receive a new and better one. Since I did not keep in touch with my customers, I put a series of identifying numbers alongside the file card, which also had a picture of the customer. If I gave the person a social security number, I would write that down on the file card. I also had a code on the file card for the vendor who sold the document.

I sold this INS card for \$60 to the vendor, and told vendors to charge customers \$120 each. I was adamant about making sure my vendors told illegal customers these identity cards were phony. I even quizzed customers, through vendors, and had the vendor give me the customer's response so I could be certain the customer wasn't fooled into thinking the purchased documents were official.

My purpose in testifying today, Mr. Chairman, is to offer some positive suggestions about the reliability of identification documents currently in use. In general, I think the INS alien registration card (I-551) has some very attractive features to withstand tampering. The document, however, is not counterfeit proof. To improve on it, INS should consider:

Using decoders which can be carried around easily by the Border Patrol and other Immigration inspectors;

Adding original art work to the border of the card;

Using phosphorescent ink so the card can be checked with a flashlight during inspection, and would be more difficult to photograph;

Using a serrated edge on the insert;

Using a two-color plastic to make photographing more difficult; and

Imprinting "U.S.I.N.S." on the plastic laminate itself.

I want to thank you for this opportunity to testify. I am available to answer any of your questions.

STAFF STATEMENT OF SENATE PERMANENT SUBCOMMITTEE ON INVESTIGATIONS

Mr. Chairman and Members of the Subcommittee:

Since August 1981, the staff of the Subcommittee has been studying the fraudulent uses of federal identity documents. The leadership had us undertake this inquiry as part of the Subcommittee's emphasis on fraud and waste in the government. We wanted to do two things: first, to trace the extent counterfeit, altered, or fraudulently-obtained identity documents can be used to penetrate government benefit programs; and second, to ascertain the reliability of these documents as a secure means of identification. In the past year, the reliability of federal identity documents has taken on added significance as Congress considers pending legislation to revise U.S. immigration policy and create a worker identification system.

Our investigative work indicates that the scope of the false identification problem is enormous and its impact on government and business is pervasive. In 1976, a Department of Justice study estimated that false identification cost the American public \$15 billion in program and commercial losses. During the course of our investigation we saw no indication that false identification crimes and the resulting fraud have in any way diminished. If the \$15 billion is adjusted to reflect annual inflation increases since January, 1977 the current cost of false identification is over \$24 billion.

To: Senator MOYNIHAN.

From: Elise Rabekoff.

Re: tamper-proof Social Security cards: conversation with Paul Simmons.

Date: August 12, 1982.

I spoke with Paul Simmons, deputy director of SSA, about whether the Administration would support your tamper-proof Social Security card amendment. He told me:

1. SSA feels they don't need statutory authority to print cards on tamper-proof stock.

2. SSA is planning to print all newly issued or replacement cards on tamper-proof stock beginning around January 1983. They can't guarantee a date because they haven't submitted the project to contractors yet. They estimate this will cost \$1.3 million yearly.

3. SSA will announce this three weeks from now.

4. You can announce this on the Senate floor.

[From the New Republic, July 12, 1982]

NOTEBOOK

Frank and Maria Richards had a clever forgery scheme going: by selling bogus Social Security cards and other fraudulent documents to illegal aliens in Los Angeles, they had made \$1.5 million. But after a few years, when the fake applications began to appear too neat to pass for government work, astute federal investigations caught on. "Sloppy applications are more acceptable because they're more like the normal ones," Daniel Lane of the Department of Health and Human Services told the Senate Permanent Subcommittee on Investigations on June 16. This discovery opens new avenues to those seeking to ferret out waste and fraud. In keeping with its characteristic

logic, the Administration might collect bureaucrats' handwriting samples or simply mandate messiness in government—provided that the always superior private sector doesn't catch on, of course.

Mr. MOYNIHAN. I reserve the remainder of my time.

Mr. BENTSEN. Will the Senator yield 1 minute?

Mr. MOYNIHAN. I am happy to yield to the Senator.

Mr. BENTSEN. I want to congratulate the Senator on his amendment.

I noticed on one of the network news programs the other night that they apprehended two Mexican nationals crossing the border who estimated they each sold some 50,000 dollar's worth of counterfeit social security cards. They had a whole stack they were trying to sell. Those people that argue against this amendment, in effect are arguing for a card that is "counterfeitable," not one that is "noncounterfeitable." I disagree with those who try to tell me that is an invasion of privacy. Anytime I go to cash a check, I am asked to show my driver's license. I do not resent that—except for the photograph, and I cannot help that. But, frankly, I am proud to be a U.S. citizen. A social security card that will assist in that kind of identification, would be very helpful and make it easier for the employer to comply with this law.

I certainly congratulate the Senator on his amendment.

Mr. MOYNIHAN. I appreciate the support, as I have always had in the Finance Committee, of the Senator from Texas, who knows what a problem this is, and a needless problem.

Mr. President, I withhold the remainder of my time.

May I say, if I may continue, a problem we can address with a sensible solution. Not every problem admits itself of such a response.

Mr. SIMPSON addressed the Chair.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. SIMPSON. I certainly concur with the last remark of the Senator from New York; indeed, a sensible solution sometimes does escape us in this place. I thank the Senator because he has brought an interesting issue to us. It is something we have spent a great deal of time discussing in the Select Commission on Immigration and Refugee Policy, and in the subcommittee and the full committee.

I think the Senator from New York will be very pleased at the information I can share with him. We do not want to preclude any options available to the administration in developing the more secure system. A data bank call-in has been discussed and improved State drivers' licenses and identification cards as well.

I think the Senator would be interested to know that 41 States have an

I.D. card that is voluntary, that is used for those who do not choose to carry a driver's license, and they may purchase that for \$2 or \$3. Forty-one States have those.

A tamperproof, revised social security card is one of our options. As I say, the use of the social security card has been a distinct possibility throughout, but we do not want to suggest that it is the system which the Administration must develop.

As to what the Senator from New York is telling us about identification cards in the United States, here I have an exhibit that is more graphic than anything I could express. I wish I had it portrayed in a larger form. This exhibit is a sample of what is happening in the United States of America.

This card at the top left of the exhibit is a fake green card. That is a fake green card that was obtained somewhere along the border. It may have been obtained at a bourse table in one of the cities during the county fair. They sell them openly under the trees down there. You can get them anywhere in the United States.

With this fake card, this one man obtained a valid social security card, a valid AFL-CIO card, a valid food stamp card, a valid medicare card, a valid driver's license, a valid unemployment insurance coverage card—one man.

So the issue, really, is it not, do they leave more on the table than they take off or do they do things Americans will not do? The issue is that our systems are being diminished by that type of conduct, and it is flagrant and it is real.

I advise my colleague from New York that the Social Security Administration has advised us that in the very near future, it will announce the issuance of tamperproof social security cards on banknote paper, and that those new tamperproof cards, just as the Senator from New York has expressed, will be issued on that type of medium and will be issued in approximately 6 months.

I think that will resolve perhaps the need for this amendment, and I urge that information upon the Senator.

Mr. MOYNIHAN. Will the Senator yield to me 1 minute on his time?

Mr. SIMPSON. I will yield that minute of my time.

Mr. MOYNIHAN. Mr. President, I know the care and concern with which the distinguished Senator from Wyoming has handled this legislation. If it is his judgment that this ought not to be placed in the bill, I am prepared to withdraw it. I am withdrawing it because the Social Security Administration knew I was going to put it on this bill at every opportunity that came along from the time last October when, after the Senate unanimously agreed to this, they blocked it in conference.

My understanding from Mr. Simmons is that they expect to have this begin in January. The Senator said 6 months. My understanding is closer to 3½ months. That is his direct word to us.

Certainly, regardless of its uses with respect to this legislation, 24 billion dollars' worth of fraud is enough per year—a half billion a week. It is time, after a great deal of friendly persuasion, the Social Security Administration has given in to legislative mandate, or the prospect thereof. In the interest of comity, I am prepared to withdraw the amendment, not to ask for a vote, but I hope I could hear from the chairman that he will take it as a matter of personal concern to see to it that the assurances he and I have been given by the Social Security Administration are abided by.

Mr. SIMPSON. Mr. President, I can assure the Senator from New York of that, for I indeed supported the Senator from New York in his original proposal in October and voted with him on that proposal.

Mr. MOYNIHAN. The Senator surely did.

Mr. SIMPSON. So I am very dedicated to that, and I do assure that I will assist in every way possible in doing that.

Mr. MOYNIHAN. I thank the chairman. I thank him, with the great satisfaction that after 5 years, we seem to have achieved this. Let us hope that it is actually done.

Mr. President, I ask unanimous consent to withdraw the amendment I have at the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. Before the Senator from New York leaves his desk, I would like to make some comments just so that there is no misimpression on the part of this body from the dialog that just went on. Somehow if we can—and obviously we can—come up with a more counterfeitproof-type of social security card and more suggestions for promoting that and get legislative intent—I agree that ought to be done—however it is important to make clear that in and of itself does not satisfy the requirements of the bill. I do not think it was implicit that the Senator tried to satisfy the requirements of the bill. I think that the Senator is using this forum as an opportunity to further accomplish his goals. I do not find any fault with that. I just want to make sure that the end result of the bill accomplishes some sort of employment verification system. It might lead to a card and we would want that card to be counterfeitproof.

But the most important goal is that that system, whatever the system might be, establish identity of the individual. In other words, is Joe Smith really Joe Smith, that he is the person he says he is. That is identity. We want that to be established. We want eligibility to be established. The person whose identity is established, is he eligible to be in this country? We want to establish who the person is. We want it to say that he is legally in this country. Then the subject of how that identity is made, whether it be through a card, and that it be counterfeitproof, is secondary to the major goal of the legislation. There is not any intent, is there, on the part of the Senator from New York that any of the statements he made would in any way satisfy the identity or the eligibility goals of our legislation?

Mr. MOYNIHAN. It was not my intent to state that one way or the other.

It is because the distinguished manager of the measure wishes that to be resolved in accordance with the legislation and because the Social Security Administration said they are going to go ahead and do what we have been trying to get them to do for 5 years now, that, rather than complicate the legislation, I withdrew the amendment.

I see the point of the Senator from Iowa. I cannot comment on it, because I do not know the intentions of the Senator from Wyoming. But the Senator certainly is correct. I did not in any way suggest that accepting my amendment would resolve all the concerns of the Senator from Wyoming. I would not be able to speak for him, and I do not do that.

Mr. GRASSLEY. Mr. President, I just wanted to make those points because the establishment of eligibility and identity are two points that are the very key to carrying out the purposes of this legislation. I wanted to make that point clear, and I think we have done so.

Mr. SIMPSON. I thank the Senator from New York for his fine cooperation and assistance.

Mr. MOYNIHAN. I am grateful.

Mr. SIMPSON. Mr. President, Senator PRESSLER, I believe, wishes to be recognized.

The PRESIDING OFFICER. The Senator from South Dakota.

UP AMENDMENT NO. 1232

(Purpose: To facilitate travel by foreign nationals to the United States)

Mr. PRESSLER. Mr. President, I send an unprinted amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from South Dakota (Mr. PRESSLER), for himself Mr. INOUE, and Mr.

SASSER, proposes an unprinted amendment numbered 1232.

Mr. PRESSLER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 149, line 15 of the Committee amendment, insert the following immediately before the period: "; except that in no event may the program be put into operation later than October 1, 1983".

On page 150, line 19 of the Committee amendment, strike "five" and insert in lieu thereof "eight".

On page 150, strike all from line 25 through line 8 on page 151 of the Committee amendment, and insert in lieu thereof the following: "unless the sum of the total number of refusals during the fiscal year ending immediately before such thirty-day period of nonimmigrant visitor visas for nationals of that country".

On page 153, line 6 of the Committee amendment, insert "and" immediately after "(1)(A)(i)".

On page 153, strike lines 7 through 12 of the Committee amendment.

On page 153, line 13 of the Committee amendment, strike "(C)" and insert in lieu thereof "(B)".

Mr. PRESSLER. Mr. President, I am offering this amendment on behalf of myself, Senator INOUYE, and Senator SASSER.

I thank the chairman and the ranking minority member and their staffs for their cooperation in working this out. I originally offered a revised version of this; and after our discussion with the Senator from Wyoming and his staff and the minority, we have concluded that the most profitable course of action at this time is to propose a series of changes in section 213 of the bill as it now exists. While I must admit that I would have preferred my original substitute for section 213, I realize that there are those who have genuine concerns about an expansion of the visa waiver program along the lines I originally suggested.

I also want to stress that I realize how much time and effort Senator SIMPSON has put into the crafting of S. 2222. It is not my desire to do anything which could be interpreted as an attempt to obstruct a full and fair discussion of S. 2222. A great deal of work has gone into the measure and Senator SIMPSON deserves an opportunity to present the fruits of his labor to the Senate.

Let me now take a few moments to describe the purpose of the visa waiver program and of my amendments to S. 2222.

It is an accepted fact that the vast majority of international travelers to the United States pose no threat to the security of our Nation. Millions of visitors arrive every year from all over the world, but primarily from nations which are major allies and trading partners. We are talking, for instance, about Western European and Japa-

nese tourists and business people. These visitors spent over \$12 billion in our country last year, thereby providing one of our largest sources of foreign trade revenue.

It is also worth noting that aside from its economic benefits, international travel promotes greater international understanding and cooperation. As chairman of the Subcommittee on Arms Control of the Foreign Relations Committee, I can assure you that international understanding is oftentimes a commodity in short supply.

In specific terms, what we are talking about when we speak of a visa waiver is a program which would permit travelers from low-risk countries, such as Western Europe, to travel to the United States without a visa. In other words, they would be permitted to travel solely on their passports as is the case in almost every other nation.

Our current visa system requires all foreign travelers to obtain a visa from the U.S. Embassy in their country before coming to the United States. Due to the explosive growth of travel to this country over the past decade, this has resulted in our embassies being flooded with visa applications. The backlog in some embassies, most notably that in Great Britain, has resulted in delays of 4 to 6 weeks for visa applications to be processed. As you can imagine, this is very disruptive to the travel plans of British tourists and business people. There is also evidence that it is sometimes such a discouraging factor that it results in a loss of foreign tourists. During hearings which I conducted on this issue we received testimony that we could be losing several hundred million dollars in foreign trade income annually because of the negative influence of the visa requirement.

In response to this problem, Senator SIMPSON has proposed, in S. 2222, that a visa waiver pilot program be conducted for 3 years in order to determine the potential benefits and problems of eliminating the visa requirement. This pilot program would be used to determine whether or not it would be feasible to expand future visa waiver eligibility to a major portion of our allies and trading partners.

As I have indicated, I strongly support the concept of the visa waiver, and I am supportive of the pilot program Senator SIMPSON is proposing. However, there are a few changes which I have suggested and which Senator SIMPSON has agreed to adopt. Let me take a moment now to outline these.

First, the current section 213 provides that five countries be included in the pilot program. I have proposed that this number be expanded to eight. This will enable us to include more nations which provide us with

the lion's share of our international travel revenues.

Second, I have proposed that a specific deadline be set for the initiation of the program. This deadline, October 1, 1983, gives the Immigration and Naturalization Service 9 months to implement and perfect their computerized system for screening and monitoring foreign visitors to the U.S. Immigration and Naturalization Service has assured me that the system will be in place by January 1, 1983. Naturally, should INS feel ready to begin the visa waiver system before October 1, then I would be very pleased to see that done.

The third of my amendments makes a slight change in the formula for calculating which nations would be eligible for the visa waiver pilot program. Under my amendment, those nations which have had less than 2 percent of their visa applications rejected during the previous year would be eligible. In the current form of section 213, this 2-percent figure would be comprised of rejections, withdrawals, and those persons refused entry at a U.S. port. As I said, this change will make only a small statistical change, but it should simplify the task of determining eligibility.

The last of my amendments strikes a current requirement of S. 2222 that the international airlines which are participating in the program provide certain data to INS. As section 213 now stands, the carriers must notify the Attorney General when a foreign visitor does not use the return portion of his airline ticket. This was originally intended to provide a measure of control over determining which foreign visitors might have overstayed the 90 days they are allotted under the pilot program. However, it appears to me that the computerized tracking system being implemented by INS would fulfill this need in a much more reliable fashion. The requirement that the airlines keep track of foreign visitors is not only inappropriate and burdensome, it is also a very unreliable measuring system.

It is my view that with the changes I have suggested the visa waiver pilot program in S. 2222 is an acceptable first step toward the goal of modernizing our system for facilitating international travel. I hope that my colleagues will agree with this view and will accept my amendments.

Last, I once again thank and congratulate my friend and colleague Senator SIMPSON as well as the Senator from Massachusetts and the minority and majority staffs for their assistance in this matter and for their able handling of this very complex piece of legislation.

Mr. SIMPSON. I thank the Senator from South Dakota.

● Mr. SASSER. Mr. President, I support the amendment offered by my distinguished colleague from South Dakota (Mr. PRESSLER). I commend him on his work on this amendment which is so important to bolstering our tourism and trade revenues.

This amendment will waive the visa requirement for certain low-risk foreign countries and should eliminate significant barriers to travel in this country by businessmen and tourists from countries like Great Britain and France which have a traditionally low visa application refusal rate, generally under 2.5 percent annually.

It is my understanding that the administration and many travel and tourism associations like the Travel Industry Association, the American Hotel and Motel Association, and the American Society of Travel Agents support this amendment. Their support indicates that this amendment could substantially help improve the opportunity for expanded foreign travel in this country.

This is very important for the country and for Tennessee which is a major tourism attraction for foreign visitors. Travel and tourism is a vital element of Tennessee's economy. It adds \$2.5 billion to Tennessee's economy, and it helps generate some \$114 million in State and local tax revenues.

More and more foreign visitors are coming to Tennessee, especially to see the 1982 World's Fair in Knoxville. It is prudent public policy to encourage foreign travel and tourism in this country, and I urge my colleagues to support the Pressler amendment.●

Mr. SIMPSON. Mr. President, this compromise does expand the visa waiver program from five countries to eight countries and provides that it will go into effect on October 1, 1983.

I do support the amendment. It is a 3-year pilot program to provide visa waivers for those countries which provide a reciprocal privilege to our citizens.

I have discussed this amendment with the distinguished minority floor manager. We believe it is a desirable amendment and are prepared to accept it.

Mr. KENNEDY. Mr. President, I welcome this amendment. Some 4 years ago, I introduced legislation on this proposal. It was passed on two occasions in the U.S. Senate. I had supported it 4 years ago and I certainly welcome the recommendation made by the Senator from South Dakota. I hope the Senate will accept it.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1232) was agreed to.

Mr. SIMPSON. Mr. President, I ask unanimous consent that on the next amendment by Senator D'AMATO that

there be a time agreement of 30 minutes equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from New York.

UP AMENDMENT NO. 1233

(Purpose: To deny second preference status to spouses and children of aliens acquiring permanent residence under the legalization provisions until certain other aliens have entered the United States)

Mr. D'AMATO. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New York (Mr. D'AMATO) for himself, Mr. MOYNIHAN and Mrs. HAWKINS, proposes an unprinted amendment numbered 1233.

Mr. D'AMATO. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 125, line 6, insert after "permanent residence" the following: "(other than an alien who acquired such status under section 245A (a), until each alien from the country of such alien's birth who had received or was entitled to receive a visa before October 1, 1983, as a quota immigrant had applied for admission to the United States or had the validity of the visa terminated)".

Mr. D'AMATO. Mr. President, I wish to congratulate the distinguished Senator from Wyoming (Mr. SIMPSON) who has labored in this area that no one has dared tread for many, many years. He has done an outstanding job in a very, very difficult and sensitive area.

Today I offer an amendment that seeks basic equity and fairness. S. 2222 would place approximately 600,000 people who have followed the law, made applications for their visa and who, in addition, are related to bona fide U.S. citizens and who have as their sponsors citizens residing in this Nation. In some cases, these applications date back to 1970. These 600,000 will be, for all intents and purposes, excluded and never have an opportunity to enter this country. In essence, what we are doing is something so fundamentally in error that it is hard to conceive that we cannot find a better way to exclude those people who seek freedom, who have bona fide sponsors and who have obeyed the law. It is not justice.

Mr. ROBERT C. BYRD. Mr. President, I rise in opposition to this amendment. During consideration of S. 2222 by the Senate Committee on the Judiciary, I offered language related to section 211 of the bill—the so-called H-2 temporary workers program. The committee adopted my language by a vote of 10 to 5. Subsequent-

ly, I reached an agreement with Senator SIMPSON, the distinguished chairman of the subcommittee with jurisdiction over this legislation, and with other Senators, that resulted in a modification of my original language. This agreement represents what I consider to be a fruitful compromise on this issue.

I urge the retention of the compromise provisions relating to the H-2 program which are contained in S. 2222, as reported by the Judiciary Committee.

Under current law, a foreign worker can be admitted into the United States for temporary labor or service only if the Secretary of Labor has determined that sufficient domestic workers are not available anywhere in this country to perform such service or labor.

The requirement in existing law is vague, and it has produced extremely burdensome requirements for agricultural employers. I can personally speak of the frustration suffered by fruitgrowers in the eastern panhandle of West Virginia.

Time and time again, West Virginia growers have informed me of the unnecessarily cumbersome nature of the present H-2 system. The Labor Department has used the indefinite nature of the present requirements for participation in the H-2 program to frustrate the applications of employers for certifications of eligibility for that program.

The requirement that sufficient domestic workers must be located and hired before temporary foreign workers are hired has been warped by counting domestic workers, regardless of their qualifications, willingness, or availability to perform the work required of them at the time and the place needed.

The provision in S. 2222, as reported, would require the Secretary of Labor to find that domestic workers would not only have to be available, but would be willing, able, and qualified to do the work as well.

Adding these terms, which have well-established meanings in labor law, as interpreted by the courts and the Labor Department, will produce a far more workable and reasonable H-2 program.

Domestic workers found to be qualified, willing, and able will have to present themselves at the time and place needed for the work required of them. In the case of crops that are extremely time-sensitive, such as tree fruit, and in particular the apples and peaches grown in the eastern panhandle of West Virginia, the workers must be ready to harvest on short notice.

The predictability of the workers needed to harvest such crops is a critical element for these growers. Uncertainty about the status of the labor

force can result in a harvest rotting on the trees.

The Labor Department tries to locate workers for the harvest of tree fruit in West Virginia 2 or 3 months in advance of the date of need. If the domestic workers located by DOL do not appear at harvest time; if they appear late; or if they do not remain on the job, then the grower is placed in a situation of economic ruin.

My constituents in West Virginia have faced this situation on more than one occasion. My language, as contained in S. 2222, requires that a worker must be willing to appear at the time and place needed—and thereby improves the operation of the H-2 program.

I commend Senators KENNEDY and SIMPSON for their fine efforts in connection with this legislation. I am most pleased that the bill reported by the Judiciary Committee addresses the concern that I have raised about the H-2 program and its effects on West Virginia growers. I might also mention that the language related to the H-2 program in the bill has the strong support of the West Virginia Farm Bureau.

Once again, I urge the retention of the language of S. 2222, as reported, with respect to the H-2 program.

● Mr. D'AMATO. Mr. President, I rise in opposition to the amendment offered by the Senator from Massachusetts and in support of the H-2 provisions in S. 2222, the Immigration Reform and Control Act of 1982. The H-2 provisions of current law permit agricultural employers to hire temporary alien workers only if "unemployed workers capable of performing such service or labor cannot be found in this country."

Agricultural employers and the various State employment services are required to search for and recruit workers everywhere in this country before they can justify bringing in temporary workers. Such workers will not remain in this country, but will be here only long enough to make up a temporary labor shortage. The present situation and one which the amendment offered by the Senator from Massachusetts would perpetuate, forces agricultural employers and the Federal-State employment services to spend time and money seeking and interviewing farmworkers throughout the country—who may or may not agree to migrate to the farm or orchard in need.

The H-2 provisions of S. 2222 restrict the scope of the search for temporary workers to the time and place of need. A countrywide search would no longer be required. It makes very little sense to expect New York apple-growers to assume that qualified workers can be found in California, workers who would be willing to move to New York on a temporary basis. Restricting the scope of the search for domestic

workers will help to ease the burden that now is all too often borne by U.S. farmers. Indeed, I have received several letters from agricultural employers in New York State who are overwhelmed by the bureaucratic morass which the Federal Government has created in the administration of the H-2 program.

I would like to emphasize, Mr. President, that S. 2222 does require annual reports to the Congress regarding the potential impact of the H-2 provisions on domestic labor conditions, so that the Congress will be able to determine whether these provisions will adversely affect domestic workers. I do not believe that they will.

In conclusion, Mr. President, we must ease the regulatory burden on agricultural employers in this Nation. I urge my colleagues to support our agricultural employers and defeat the pending amendment.

Let me share with you, if I might, some of my concerns of what will take place if S. 2222 is adopted in its present form. Within 2 years we will go from a situation where we now admit relatives, brothers and sisters of U.S. citizens, bona fide citizens of this country at a rate approximately 90,000 annually to approximately 7,000 annually. That is a total worldwide figure of 7,000.

Some of these people again filed applications as long ago as 1970. They have been waiting. They have sponsors and not only do they have sponsors but those sponsors are U.S. citizens. They have followed the law.

Not only do we penalize them as a practical matter, we say to most, "You will never, never, never come or have an opportunity to come to these shores."

Yet, we confer legal status, cloak them with S. 2222, to those in many cases who have deliberately violated the law and given them an opportunity to be reunited with their families.

We reward some for breaking the law and penalize others for following the law.

My amendment would permit those who have filed applications prior to October 1, 1983, to be grandfathered in, giving them priority over those who are now without status who are here illegally and that we will give to them the right to come to these shores first.

I just believe that it is a matter of equity, of fair play. I believe that it would be very difficult to many to support this comprehensive legislation, unless this inequity is dealt with. I will find it very difficult to be able to support this bill unless there is recognition of this inequity.

It is hard to imagine if we are going to take in 7,000 people in each year, while we have in excess of 600,000 who are waiting. We know the life expectancy of people is getting older and

older. But 100 years? That is what we are talking about. What we are really saying is that most of these people will never be allowed to come in because they followed the law. Yet, if they had broken the law and come over we would let them stay here.

I believe that this amendment goes a long way toward correcting that deficiency. ●

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SIMPSON. Mr. President, this amendment by the Senator from New York would severely, and I speak in opposition to it, restrict the ability of legalized aliens to bring in their relatives. This amendment would prohibit the admission of any relatives of legalized aliens until all other aliens in the current backlogs have been admitted into the United States.

The aliens presently in the backlogs who would come in prior to that are relatives of U.S. citizens and permanent resident aliens.

On its face, I think we might believe that that amendment would seem appropriate. In other words, why should not the families of the former illegal aliens have to wait until all of those who have been patiently waiting in the backlogs, legally, have been admitted?

Also under our law they would go to the end of the lines to wait in the backlog in any event.

However, if none can come in until all previously backlogged aliens have been admitted it means this: it means that spouses and minor children of former illegal aliens would have to wait until all of the backlog brothers and sisters, including adults in the fifth preference, had been admitted. That will take years and years, since we only gave them a rather small percentage of the available visas to use for those who are in the pipeline already.

There are 700,000 persons in the fifth preference backlog, alone, just that one alone. It will be an extraordinary number of years before all of those brothers and sisters of U.S. citizens are admitted and they are in the pipeline. In the meantime spouses and children then of permanent resident aliens will not be able to reunite.

I do not think that is a good result. It does not seem appropriate.

I think this amendment would contribute to illegal flows in the future, since spouses and children would very likely simply always attempt to come to the United States illegally again rather than wait for so many, many frustrating years to join their spouses and children who are truly the description of the nuclear family.

For those reasons I do not support the D'Amato amendment and urge its defeat.

Mr. D'AMATO. Mr. President, if I might respond—

The PRESIDING OFFICER. The Senator from New York.

Mr. D'AMATO. The fact is my amendment addresses this problem on a country-by-country basis, so indeed where there might be a preference and would be, and I think justifiably so, to those who apply first and those who have legal status and, let us say in the case of the Philippines that would not be the case but in, let us say, Venezuela, where there is no backlog or in many of the other Central American countries or indeed for most of the countries that exist, yes, that would be the case, and I think it is equity and justice for perhaps 10 cases.

I would point out something else. I think we really go to an extreme when we say we are going to create special preferences for people who are violating the law, and penalize those who have followed the law saying, "You for all time, shall be denied the right to come to this country."

I find particularly repugnant a section in this bill which would permit those with \$250,000 of capital to invest to receive preference. While if you filed in 1970 and you are poor, if you have a brother and sister in the United States, you will never come here. If you have \$250,000 to invest in this country, "Come on in," I do not think that is what has made this country great. My grandparents could not have come here if we had that kind of law or that kind of thinking or philosophy. They followed the law, and I think when we begin to depart from that because of expediency, we are in a sorry state.

Mr. KENNEDY. Mr. President, there is much wisdom in what the Senator from New York has stated here on the floor of the Senate this afternoon, and it reaches one of my very deep concerns about this whole piece of legislation.

In the effort to try to deal with what all of us have understood to be sort of an uncontrolled kind of movement of people into this country, across borders in some instances, and because of what has happened in terms of the entrance of the boat people and Cuban refugees of recent years, the concern with that, what this body has done is now pitted American families against American families.

As one who was, as I mentioned yesterday, the floor manager of the 1965 act, as we tried to eliminate aspects of discrimination in our immigration, the national origins quota system, the Asian Pacific Triangle, we put an important priority on families and family reunification.

Now yesterday for the first time we eliminated the fifth preference, the

opportunities of brothers and sisters of American citizens to be joined with their families here in the United States. The Senate even rejected a very limited program for brothers and sisters who were unmarried, part of what I consider to be a family, with all due respect, and I think the Senator from Maryland made the case very eloquently yesterday. I did not feel less of a brother or less of a brother to a sister after I was 21 than I did before. But we have eliminated the fifth preference. For the first time we have put the bringing of wives and small children under a ceiling which is going to put pressure on other family relationships in those other categories.

I think, Mr. President, with all due respect, that the Senate is really losing sight of what the problem is for this country, and in an attempt to deal with what "is the problem," in terms of being able to reach these arbitrary feelings, we are ending up with the hard and difficult choices which the Senator from New York has stated.

We are pitting the wives and children of legalized aliens against the brothers and sisters of American citizens. That is a fine how-do-you-do for this Nation. I mean, how did we get ourselves into this particular bind when the real problem has been that we have the undocumented people moving on across borders down through the Southwest as a result of 32 percent unemployment, a population in Mexico that is going to double in the next 20 years, and as the result of the gross mismanagement of the Cuban situation under the previous administration? Absolutely inexcusable.

With all of the human tragedy which has been spoken about so eloquently by both Senators from Florida, and has been—

Mr. SIMPSON. Excuse me, Mr. President, will the Senator yield? Is the Senator on my time in this debate? If so, I would like it transferred on the clock because I will be on the opposite side. I would like to make that inquiry.

Mr. KENNEDY. I think the Senator will be satisfied with my conclusion.

Mr. SIMPSON. Eventually. (Laughter.) Mr. President, I certainly hope that that conclusion will be reached very shortly. (Laughter.)

Mr. KENNEDY. Fine. I thank the Senator. I thank the Senator for yielding the time.

Mr. President, I feel that the statement has been made, I think we are in an extremely unfortunate situation as posed by the Senator from New York where we are getting the wives and children of legalized aliens versus the brothers and sisters of American citizens, and that is a part of the pitting families against families to deal with a public policy question which I think is certainly outside of this extremely important policy question where we

ought to be trying to have public policy that is bringing families together rather than immigration bills that are going to continue the separation.

Ultimately we are going to have to make a judgment, and the Senator has put the question well, as to where we are going to draw the line, because we all vote yea and nay. I will vote with those who give preference to the close family relationships, but I regret very much being placed in that position. So regrettably I will have to vote against the amendment of the Senator from New York. However, I think he raises an extremely important and compelling argument.

Mr. D'AMATO. Mr. President, I yield back any of my time that may be remaining.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. SIMPSON. Mr. President, I appreciate the conclusionary remarks of my colleague from Massachusetts. That was helpful. The other remarks I would have to disassociate myself from.

There have always been those hard and difficult choices, it will always be that case.

I would say to the Senator from New York, all of the persons in the present backlog are not waiting patiently in line, following the law. Nearly 85 percent of those from Mexico who are waiting in line under the legal authorization are already in this country. That may be a startling fact but that is the reality.

Mr. D'AMATO. Mr. President, will the Senator yield for an observation?

Mr. SIMPSON. I will.

Mr. D'AMATO. I would conclude that those figures could be applicable as well to those families supposedly waiting for reunification, and we would find on careful analysis that the great percentage are here, that they are not going to be great in numbers in terms of bringing in because we have now conferred a legal status upon those who are here, this great number coming forth of children and wives, so that the same thing, the same statistic, would probably be applicable.

Mr. SIMPSON. I doubt that we will ever see those types of figures for those waiting in line for other countries simply because there is no proximity like that to our border.

Let me just say that when we have to deal with this fifth preference we have 700,000, and many of those in that backlog will be legalized under this bill. This backlog will then be greatly reduced.

Let me then conclude and say we have not placed a cap on immediate relatives in this legislation. Let that be quite clearly said. We have not done that. We still allow unrestricted immediate relatives into the United States.

But we do say that then those are offset against the family reunification preference system because if there is one thing that will come out of this body, whether this bill comes out or not, we are going to set a cap on legal immigration into the United States. When you do that you squeeze, and you squeeze human beings, and that is the unfortunate thing. But the whole thrust of what we have been up to is to allow that squeeze to affect much less spouses and minor children and affect much more adult brothers and sisters. That was the hard grisly choice.

The PRESIDING OFFICER. Who yields time?

Mr. D'AMATO. Mr. President, I ask unanimous consent that I may have another minute of the time I yielded back.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. D'AMATO. Mr. President, the fact is that there are 171,000 filipinos waiting to come in. I doubt many of them are here. There are 96,000 Koreans; I doubt many of them are here.

The Senator points to the fact, in terms of Mexico, where there are 56,000 who have legally applied and probably many of them are here, but certainly you would not contend that in terms of the Chinese. We have a great Chinese-American community, 75,000 waiting to come in.

So, yes, in terms of Mexicans and those in Central America, those facts may be correct. Many of them are here.

Again, there is something basically, philosophically, tragically in error when this Nation deprives itself from following the law and discriminates against those who have followed the laws of this land and the procedures and who have waited patiently and who are looking to be reunited with their brothers and sisters, citizens of this country.

I thank the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. SIMPSON. Mr. President, I thank the Senator from New York. He has brought his great interest to the body.

I would conclude by saying that I think we would all be surprised, on the Senator's side and on this side of the issue, as to how many of those that are in the backlogs of the various countries are multiple filings, persons who have filed under, perhaps, various preferences. We do not know how many those are. That backlog may be clearly distorted by that reason.

I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from New York. (Mr. D'AMATO). The yeas and nays

have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Utah (Mr. HATCH), the Senator from Oregon (Mr. HATFIELD), the Senator from Maryland (Mr. MATHIAS), the Senator from Alaska (Mr. MURKOWSKI), the Senator from New Mexico (Mr. SCHMITT), the Senator from Wyoming (Mr. WALLOP), and the Senator from Connecticut (Mr. WEICKER), are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD), would vote "nay."

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON) is necessarily absent.

I further announce that the Senator from Montana (Mr. MELCHER), is absent on official business.

The PRESIDING OFFICER (Mr. EAST). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 38, nays 53, as follows:

[Rollcall Vote No. 320 Leg.]

YEAS—38

Abdnor	Exon	Moynihan

NOT VOTING—9

Cannon	Mathias	Schmitt
Hatch	Melcher	Wallop
Hatfield	Murkowski	Weicker

So Mr. D'AMATO's amendment (No. 1233) was rejected.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1947

(Purpose: To provide for the termination of provisions relating to the unlawful employment of aliens unless certain circumstances occur)

Mr. KENNEDY. Mr. President, I have an amendment at the desk on which I should be glad to engage in a time limitation.

Mr. SIMPSON. Mr. President, I ask unanimous consent that on the next amendment there be a time agreement of 20 minutes equally divided.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I call up my amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state it.

The legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes an amendment numbered 1947.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 90, between lines 2 and 3, insert the following:

(d) The amendments made by this section shall terminate, and the provisions of the Farm Labor Contractor Registration Act of 1963 amended by subsection (c) which were in effect on the day before the date of enactment of this section shall apply, three years after the date of the enactment of this section, unless ninety days before the close of such three-year period the President prepares and transmits to the Committee on the Judiciary of the House of Representatives and the Committee on the Judiciary of the Senate a comprehensive report certifying that the provisions contained in the amendment made by subsection (a) have been carried out satisfactorily and have not resulted in a pattern of discrimination against United States citizens or other eligible workers seeking employment.

Mr. KENNEDY. If I may have the attention of the Members of the Senate, I think this amendment is exceedingly important. I do not think it is very complicated, but I think it reaches to the heart of one of the most important aspects of the legislation before us.

Under the legislation before us, Mr. President, we are going to put in place employer sanctions. At the present time, if there is some kind of raid on a plant or a factory, the individuals who are picked up are undocumented aliens and the employers who may be exploiting them, are set free. There is no question that the current system works a hardship on the individual involved and no hardship on the employers.

Under the legislation, if there is a pattern or practice of the hiring of undocumented aliens, there is a sanction

against the employers. I shall let the chairman of the subcommittee spell it out in some detail.

However, there is, Mr. President, a legitimate and serious concern in my mind, and in the minds of many of those who have watched this issue closely over a period of years, about some of the ramifications of this proposal.

As I indicated in my opening statement on this bill, one of my principal reservations about it—and the reason I voted against reporting it out of the Judiciary Committee as drafted—is my concern that this bill must not become a vehicle for discrimination against minority groups in our country.

Unfortunately, the employer sanctions provisions in this bill poses this danger. There are deep and understandable fears about them, especially in the Hispanic Community.

I believe it would be irresponsible of Congress not to address those fears—to say clearly and unequivocally in the law we are proposing—that if those fears do prove valid, if discrimination does result in the implementation of employer sanctions, then they shall be terminated until Congress enacts Remedial Legislation. That is the objective of the Amendment I am offering today.

Mr. President, the history of immigration legislation in recent decades has been that once a law is enacted, Congress does not act again on immigration for many years. To assure that Congress will not ignore any discrimination that results from employer sanctions, I offered an amendment in committee—which I am offering now—that provides a crucial safeguard in the law; namely, that employer sanctions will end after 3 years unless the President certifies in a comprehensive report to the Judiciary Committees of Congress that employer sanctions “have been carried out satisfactorily and have not resulted in a pattern of discrimination against United States citizens or other eligible workers seeking employment.”

If the President cannot give this certification after 3 years, then employer sanctions ought to be terminated.

If, as argued by many, no pattern of discrimination develops, then the sanctions will be continued. Congress does not have to act. This is not a full-blown “sunset” provision; it is merely a safeguard built into the bill.

However, if this safeguard is accepted, and if it is coupled with the other amendments I will be offering to provide for an independent review of employer sanctions and increased funding for the enforcement of existing labor and civil rights laws, then I believe minority groups in our country will be willing to take the risks involved in an employer sanctions program. If they are adopted, minorities in our society will be given a pledge that, if a pattern

of discrimination develops, Congress will not ignore it.

Without that assurance they will not support this bill—nor can I.

Finally, Mr. President, as someone who has followed immigration legislation over a period of years, I have seen where provisions have been built into the law for the purpose of not discriminating, but nonetheless end up having a discriminatory impact. I think the best way we can try to address this in this case is to require a Presidential certification.

We require Presidential certification on the issue of human rights in El Salvador. We require Presidential certification on the movement of military aid and assistance to Argentina or to Chile. It seems to be we ought to be willing to require a Presidential certification that this particular employer sanction is not being used in a discriminatory way against American citizens.

That is the essential aspect of this amendment.

In another amendment later that I will offer, we will require the Equal Employment Opportunity Commission as well as the GAO to do a study on this particular provision to make information on this issue available to the Congress.

This amendment deals with Presidential certification. I think that is the minimum we can ask, and I think it is an essential aspect to insure that this particular provision will not be used in a discriminatory way.

I withhold the remainder of my time.

Mr. SIMPSON addressed the Chair. The PRESIDING OFFICER. The Senator from Wyoming.

Mr. SIMPSON. This provision that the Senator seeks to sunset is the very key portion of the legislation. The committee bill contains provisions to prevent employment discrimination. There is a requirement that employment eligibility be checked for all employees, and the bill provides for reports to Congress on any pattern of employment discrimination that would develop.

I also will be offering an amendment which will provide for an employment discrimination report every 18 months, which will mean that three reports will be issued in the next 4½ years.

There is this concern as expressed by my colleague from Massachusetts that the employer sanctions program will be used somehow as an excuse by employers who wish to avoid hiring certain persons because of race or national origin or because they simply “look foreign.”

The committee felt that any such discrimination in hiring is an obvious violation of title VII of the Civil Rights Act of 1964. If an action were brought against such an employer, the employer might allege that his deci-

sion not to hire was motivated by fear of employer sanction. If, however, the plaintiff were to show by a preponderance of the evidence that the employer did not actually have such fear, then such allegation would not have helped the defendant's case.

I think the most likely form of such evidence would be a sworn statement that documents had been presented to the employer showing that the applicant was authorized to be so employed, along with documentary evidence itself, which of course, would be in the possession of the applicant. If the documents appeared on their face to be genuine and to belong to the applicant, if the employer were unable to present equally convincing evidence that such documents had not been presented or that despite the documents the employer had reasonable ground for believing the applicant to be an alien ineligible to be employed, then the judge or jury would likely conclude that the employer's reason for deciding against hiring the applicant was something other than a fear of employer sanctions.

This amendment also with its sunset provisions would enable a President who is opposed to sanctions to simply do nothing and thereby kill the program. Congress then, I am certain, would have to pass a bill which would focus solely on employer sanctions and did not contain other more appropriate features. I fear that employer sanctions if discussed as an individual item in itself would be a rather tough, long haul, without any kind of accompanying legislation such as verifier system, increased enforcement and the other things that S. 2222 calls for.

I again believe that if we do nothing with employer sanctions, if we do nothing with verification systems worse prejudice and discrimination will happen. For if we continue under existing law we will beef up the INS and the border patrol and say, “There, go ahead and do your duties with the new moneys we have given you.” We will see a continuing array of searches. We will see a continuing array of intrusion in the workplace, into various operations, and that cannot be good for the minorities in this country.

I urge that the amendment be defeated. I reserve the remainder of my time.

Mr. KENNEDY. Mr. President, how much time do I have?

The PRESIDING OFFICER. The Senator from Massachusetts has 4 minutes 55 seconds.

Mr. KENNEDY. I yield myself 2 minutes.

Mr. President, I want to acknowledge at the outset that the chairman and the members of the committee that have supported this proposal have made every effort to try and assure that this legislation would be

free of any provisions that could be utilized for discriminatory purposes. I certainly recognize and respect those efforts.

But the fact remains, Mr. President, that this is an extremely modest amendment and it addresses what has been a problem in the past, and that is that individuals who are foreign looking, whose skin may be a different shade from others in society, will be discriminated against because the employer will say "Look, I cannot be certain of your standing in our society. I know if the choice is between an individual whose skin is not white, I will take the person whose skin is white because the chances are he or she isn't an undocumented alien."

This provision may not be used in a discriminatory way—may not be—but there is a chance that it will be and there is a chance that it will be in many areas of this country.

As to Presidential certification, this body has been willing to have that on a wide variety of issues, basically in the foreign policy area.

All we are saying in this amendment is that the President of the United States must certify, after 3 years and after he reviews the information, that he makes a finding that it is not being used in a discriminatory way and then it will continue. If he cannot, then it will lapse. I think it should lapse.

The PRESIDING OFFICER. The Chair advises the Senator that his 2 minutes have expired.

Mr. KENNEDY. I yield myself 1 more minute.

The fact is, as one who has served on the Immigration Subcommittee for a number of years, I know that Congress does not act on these piecemeal provisions, and I daresay I do not believe it would act on this piecemeal provision. It only deals with the issue when there are dramatic public policy questions before it, as they are with regards to the numbers now with undocumented aliens.

Mr. President, citizens in this country who fear the risk of discrimination and who have felt the whip of discrimination in the past are entitled to this kind of protection.

Mr. SARBANES. Will the Senator yield for a question?

The PRESIDING OFFICER. The Senator is advised his minute has elapsed.

Mr. SIMPSON. How much time remains, Mr. President, on my time?

The PRESIDING OFFICER. The Senator has 5 minutes and 59 seconds.

Mr. SIMPSON. I yield 2 minutes of my time to the Senator from Maryland.

Mr. SARBANES. Will the Senator yield for a question?

Under the Senator's amendment, if I understand it correctly, if the President certifies that these provisions are not being used in a discriminatory

fashion, then the provisions would remain in effect, is that correct?

Mr. KENNEDY. The Senator is correct.

Mr. SARBANES. So it is only if the President sends to Congress a certification that they are being used in a discriminatory fashion that the provisions would lapse.

Mr. KENNEDY. The Senator is correct. I believe that if a President makes a finding that they are being used for discriminatory purposes or in a discriminatory way, they should lapse.

Mr. SARBANES. Is it not the premise of the provisions that they would not be used in a discriminatory fashion?

Mr. KENNEDY. The Senator is correct.

Mr. SARBANES. I do not know of anyone who has advanced the proposal that these provisions should be included in the legislation if, in fact, they are used in a discriminatory fashion. The assertion, as I have understood it, has been that the provisions will not be used in a discriminatory fashion. Is there anyone who is making the contention that if they were used in a discriminatory fashion, the provisions should remain in the law?

Mr. KENNEDY. No one has made that assertion.

Mr. SARBANES. Then, what is the difficulty with an amendment that says that if the President certifies they are not being used in a discriminatory fashion, the provisions will continue, but if the President states that they are being used in a discriminatory fashion, the provisions will lapse?

Mr. KENNEDY. I find that there is no good answer for that. Perhaps the principal sponsor of the legislation may have an answer to it.

Mr. SIMPSON. Mr. President, the dual question asked by the Senator is not a bad one at all, if we could go to that. But this amendment says that there will be a sunset on employer sanctions in 3 years unless the President certifies no pattern of employment discrimination resulting from employer sanctions.

What I am expressing is that the amendment would enable a President opposed to sanctions to simply opt out and thereby kill the program.

The employer sanctions has always been the very key to any kind of control of illegal immigration.

Representative RODINO of New Jersey, has spent years in attempting to revise the laws of the United States, and the key provision, he insists, must be employer sanctions. Without employer sanctions, there will be no control over illegal immigration.

Mr. SARBANES. I support the employer sanctions, but I understood the Senator's statement earlier to be that he did not anticipate that the exist-

ence of these provisions in the law would result in a pattern of discrimination against those seeking employment. I take it that the Senator would not want to include the provisions if, in fact, it were stipulated for matters of discussion that they would use any discrimination.

If that is the case, what is wrong with a proposal that if the President certified that they were being used in a discriminatory pattern, the provisions would then sunset? If he certified they were being used properly, without discrimination, the provisions would continue. Surely, we do not want the provisions to continue if they are being used in a discriminatory fashion.

Mr. SIMPSON. Mr. President, the issue is this: If the President does not like employer sanctions and he does not certify it, it ends. I think that is the message I am trying to convey.

There is always a danger of discrimination in employment, unfortunately, but there is nothing in this bill which is going to increase discrimination. Let me tell the Senator why.

We have new safeguards in S. 2222 which should actually reduce discrimination, and the principal one is that each employee in the United States is going to be asked the same information, regardless of what he looks like. He will have a verification system which may be a revised social security card or some other document in the 3-year period for determination. At the time of new-hire employment, that person presenting himself will have to produce that, and it will have to be produced by people who look foreign and by people who are less than hirsute and white, such as your correspondent.

Mr. SARBANES. I am not disagreeing with the distinguished chairman of the subcommittee with respect to those provisions, and I know how hard he has worked to try to develop a careful system. The only point I do not understand is that no one would assert that this system should be kept in place if, in fact, it were being used in a discriminatory pattern. I take it that we agree on that. Is that correct?

Mr. SIMPSON. I think that indeed would be correct. It would be offensive, if that were shown to be so.

Mr. SARBANES. The only question is whether requiring a Presidential certification in order to continue it is reasonable.

The Senator suggested that if you had a President who did not like employer sanctions, he could simply terminate the system. Of course, he could not do it for that reason. He could do it only if he certified that it was being used in a discriminatory pattern. One might say that he could certify that it was not the case and he did it because he did not like it. I think that is a

pretty harsh comment on any President, since the reason for making the certification is stipulated in the amendment, as I understand it, and that is to find a discriminatory pattern.

Second, if you had a President who fell so short of his responsibilities in carrying them out in a genuine fashion, Congress, of course, would be in a position, I take it, to overrule that.

So it seems to me that the amendment does not seek to go to any of the essential premises of the scheme which the chairman of the committee has included in his legislation. It does provide one additional safeguard against discriminatory treatment, and that is the requirement of a Presidential certification.

The PRESIDING OFFICER. The Chair advises the Senator from Wyoming that all the time of the opponents of the amendment has expired.

Mr. SIMPSON. I ask unanimous consent for 1 additional minute.

Mr. KENNEDY. Make it 2 minutes.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. SIMPSON. Mr. President, we believe that in the bill we take care of the issue as to whether discrimination is resulting. I refer to page 50 of the report. Reports will be filed, and one of the issues to be included in that report is discrimination against members of minority groups. There are other things. It is at the bottom of page 50. I will not read it because of the limitation of time.

I say to the Senator from Maryland that a peculiar situation arose when we had testimony from the Civil Rights Commission on the entire issue, and they said: "We don't like employer sanctions. We are opposed to employer sanctions in whatever form they take."

Therefore, we had to exclude them sometimes from various areas of discussion, because they said already they did not favor employer sanctions. It did not have anything to do with discrimination or civil rights. It had to do with one rock-hard issue to them. That is why we are saying it could be a rock-hard issue to the President of the United States.

Mr. KENNEDY. Mr. President, the fact is that the Civil Rights Commission was divided on that issue because they thought there was the real danger that employer sanctions would be used in a discriminatory way.

All that is provided in the bill now are reports. I do not think they have the teeth necessary to deal with discrimination if, in fact, it is found to exist.

I say to the Senator from Maryland that when I initially offered this proposal in the committee, I also asked for a report to be done by the Civil Rights Commission, also by the GAO.

Later, I will ask for it to be done by the EEOC, so that Congress will have the information as well.

I do think, with respect to the danger of discrimination, that if the President cannot make a certification that this is not being used in a discriminatory way, this provision should be sunsetted.

There is no reluctance around this body to require a President to make findings and report to Congress on other matters of importance. We give the President both the authority and the responsibility.

I do not think the argument of frivolousness has been made with regard to those grants of authority. I do not think that charge should be leveled at this one.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. CHAFEE. Mr. President, I have two serious concerns about the employer sanctions provisions contained in section 101 of S. 2222. The first is the potential discriminatory impact the sanctions will have on American citizens who are members of minority groups, especially Hispanic citizens.

There is no doubt that the problem of illegal immigration is a crisis which we can no longer afford to ignore—with anywhere from 3 to 5 million illegal aliens currently in the United States accounting for somewhere between 30 to 50 percent of the annual population increase in the United States. Since 1971 every major immigration reform bill that has been introduced has contained some provision imposing penalties on employers for knowingly hiring illegal aliens. President Ford's Cabinet-level Domestic Council Committee on Illegal Aliens 1976 report, President Carter's 1977 Task Force Study on Immigration Reform and most recently President Reagan's Select Commission on Immigration Reform in its 1981 report, all recommended the enactment of employer sanctions. Thus, based on the research that has been done on the problem of illegal immigration over the last several years, some form of employer sanctions appears to be an essential part of any effort to achieve a solution. However, in the course of the recent Subcommittee on Immigration and Refugee Policy hearings, an objection was raised to employer sanctions on the grounds that they might result in discrimination against certain American workers.

Mr. President. While I do not believe that it is fair to only impose sanctions on undocumented aliens as we do under current law while allowing employers who may be exploiting those aliens to escape liability, I also do not believe that it is equitable to create a

system that makes employers reluctant to hire certain American citizens, particularly Hispanic Americans. It is for that reason that I support the amendments proposed by the distinguished Senator from Massachusetts (Mr. KENNEDY), which would do the following:

First, require the President to monitor implementation of employer sanctions and certify in writing to Congress within 3 years that the sanctions have not resulted in a pattern of discrimination. If he cannot make that certification, the employer sanctions would be terminated unless Congress takes remedial action and;

Second, require the General Accounting Office to undertake a review of the implementation of employer sanctions each year. The Civil Rights Commission would also be authorized to investigate allegations of discrimination under employer sanctions.

With these amendments we can insure that employer sanctions will be monitored and will be terminated if they cannot be implemented in a non-discriminatory manner.

In addition to the monitoring and certification process, I also believe that we should promote vigorous enforcement of the Fair Labor Standards Act, social security insurance laws, unemployment insurance and title VII of the Civil Rights Act to eliminate substandard wages and working conditions. If we encourage full enforcement of these laws, we will reduce the incentive for employers to hire undocumented aliens.

Mr. KENNEDY. Mr. President, I do not know what time remains, but I yield it back.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Massachusetts.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Utah (Mr. HATCH), the Senator from Oregon (Mr. HATFIELD), the Senator from Maryland (Mr. MATHIAS), the Senator from Alaska (Mr. MURKOWSKI), the Senator from New Mexico (Mr. SCHMITT), the Senator from Wyoming (Mr. WALLOP), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "nay."

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), and the Senator from Texas (Mr. BENTSEN) are necessarily absent.

The PRESIDING OFFICER (Mr. ABDNOR). Are there any other Senators wishing to vote?

The result was announced—yeas 22, nays 69, as follows:

[Rollcall Vote No. 321 Leg.]

YEAS—22

Boren	Heinz	Riegle

NOT VOTING—9

Bentsen	Hatfield	Schmitt
Cannon	Mathias	Wallop
Hatch	Murkowski	Welcker

So Mr. KENNEDY's amendment (No. 1947) was rejected.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the amendment was defeated.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1234

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes an unprinted amendment numbered 1234.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment is as follows:

On page 90, between lines 2 and 3, insert the following:

(d) Nothing in this section shall be construed to restrict the authority of the Equal Employment Opportunity Commission to investigate allegations, in writing and under oath or affirmation, of unlawful employment practices, as provided in section 2000e-5 of Title 42 of the United States Code, or any other authority provided therein.

On page 166, after line 10, insert the following:

Sec. 402(a) Eighteen months after the date of the enactment of this Act, the

Comptroller General of the United States shall prepare and transmit to the Committee on the Judiciary and the Committee on Education and Labor of the House of Representatives and the Committee on the Judiciary and the Committee on Labor and Human Resources of the Senate a report describing the results of a comprehensive review of the implementation and enforcement of the provisions contained in the amendment made by section 101(a) of this Act during the preceding 18 month period, for the purpose of determining if—

(A) such provisions have been carried out satisfactorily;

(B) a pattern of unlawful discrimination has resulted against United States citizens or aliens, other than unauthorized aliens as defined in section 274A(a)(4), seeking employment; and

(C) an unnecessary regulatory burden has been created for employers hiring such workers.

Two more such reports shall be prepared and transmitted, one 36 months after the date of the enactment of this Act and one 54 months after the date of the enactment of this Act.

Mr. KENNEDY. Mr. President, I have talked this amendment over with the floor manager.

This amendment simply requires that the General Accounting Office, and the Equal Employment Opportunity Commission undertake independent reviews of the implementation of the employer sanctions program established in this bill.

The amendment authorizes the GAO to report, each year, to the Judiciary Committees of the House and Senate, to determine whether employer sanctions—Have been carried out satisfactorily; have resulted in a pattern of discrimination against U.S. citizens or eligible workers; or have created an unnecessary regulatory burden for employers hiring such workers.

In addition, it authorizes the EEOC to investigate allegations of discrimination if they develop during the implementation of the employer sanctions program.

Mr. President, I know there are some reporting requirements already in the bill requiring the President to study some of these issues. But I believe we should go beyond simply relying on the executive branch to study employer sanctions, and explicitly authorize additional funds, if they are required, to the GAO and the EEOC to carry out independent studies.

I believe that attaching this explicit authorization to this bill, will give some assurance to those in our country who are concerned over the possible impact of employer sanctions, that the Congress will receive independent assessments of the program, along with the reports from the President and related executive branch departments.

Mr. SIMPSON. The amendment is acceptable.

The PRESIDING OFFICER. The question is on agreeing to the amend-

ment of the Senator from Massachusetts (Mr. KENNEDY).

The amendment (UP No. 1234) was agreed to.

UP AMENDMENT NO. 1235

(Purpose: To provide for congressional review of refugee admissions in excess of 75,000 in any fiscal year.)

Mr. BUMPERS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Arkansas (Mr. BUMPERS) proposes an unprinted amendment numbered 1235.

Mr. BUMPERS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 140, between lines 11 and 12, insert the following:

CONGRESSIONAL REVIEW OF REFUGEE ADMISSIONS

Sec. 206. (a) Subsection (a)(1) of section 207 (8 U.S.C. 1157) is amended to read as follows:

"Sec. 207. (a)(1) Except as provided in subsection (b), the number of refugees who may be admitted under this section during a fiscal year may not exceed seventy-five thousand unless the President—

"(A) determines, before the beginning of the fiscal year and after appropriate consultation (as defined in subsection (e)), that admission of a specific number of refugees in excess of such number is justified by humanitarian concerns or is otherwise in the national interest;

"(B) transmits such determination in writing to both Houses of Congress; and

"(C) the Congress fails to adopt a concurrent resolution of disapproval of the determination under the provisions of section 210."

(b) Section 207 (8 U.S.C. 1157), as amended by subsection (a) of this section, is further amended by striking out subsection (a)(2) and redesignating subsection (a)(3) as subsection (a)(2).

(c) Chapter 1 of title II of the Immigration and Nationality Act is amended by adding at the end thereof the following new section:

"CONGRESSIONAL REVIEW

"Sec. 210. (a)(1) The President, after making a determination under subsection (a)(1) of section 207, shall submit such determination to the Congress for review in accordance with this section. Such determination shall be delivered to the Congress while it is in session. Such determination shall be referred to the Committees on the Judiciary of each House of Congress.

"(2) Any such determination shall become effective in accordance with its terms unless, before the end of the period of 30 calendar days of continuous session after the date such determination is submitted to the Congress, both Houses of the Congress adopt a concurrent resolution disapproving such determination.

"(b)(1) The provisions of this subsection are enacted by the Congress—

"(A) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of concurrent resolutions which are subject to this section, and such provisions supersede other rules only to the extent that they are inconsistent with such other rules; and

"(B) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

"(2)(A) Any concurrent resolution disapproving a determination of the President shall, upon introduction or receipt from the other House of the Congress, be referred immediately by the presiding officer of such House to the Committee on the Judiciary.

"(B) If a committee to which a concurrent resolution is referred does not report such concurrent resolution before the end of the period of 15 calendar days of continuous session of the Congress after the referral of such resolution to that committee it shall be in order to move to discharge any such committee from further consideration of such concurrent resolution.

"(C)(i) A motion to discharge in the Senate may be made only by a Member favoring the concurrent resolution, shall be privileged (except that it may not be made after the committee has reported a concurrent resolution with respect to the same determination of the President); and debate on such motion shall be limited to not more than 1 hour, to be divided equally between those favoring and those opposing the motion. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to. If the motion to discharge is agreed to or disagreed to, the motion may not be renewed, nor may another motion to discharge the committee be made with respect to any other concurrent resolution with respect to the same determination of the President.

"(ii) A motion to discharge in the House may be made by presentation in writing to the Clerk. The motion may be called up only if the motion has been signed by one-fifth of the Members of the House. The motion is highly privileged (except that it may not be made after the committee has reported a concurrent resolution of disapproval with respect to the same determination). Debate on such motion shall be limited to not more than 1 hour, the time to be divided equally between those favoring and those opposing the motion. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(3)(A) When a committee has reported, or has been discharged from further consideration of, a concurrent resolution, it shall be at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the concurrent resolution. The motion shall be privileged in the Senate and highly privileged in the House of Representatives, and shall not be debatable. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to.

"(B) Debate on the concurrent resolution shall be limited to not more than 10 hours,

which shall be divided equally between those favoring and those opposing such concurrent resolution. A motion further to limit debate shall not be debatable. An amendment to, or motion to recommit, the concurrent resolution shall not be in order and it shall not be in order to move to reconsider the vote by which such concurrent resolution was agreed to or disagreed to.

"(4) Appeals from the decision of the Chair relating to the application of the rules of the Senate or the House of Representatives, as the case may be, to the procedure relating to a concurrent resolution shall be decided without debate.

"(5) Notwithstanding any other provision of this section, if a House has approved a concurrent resolution with respect to any determination of the President, then it shall not be in order to consider in such House any other concurrent resolution with respect to the same determination.

"(c) If a determination by the President is disapproved by the Congress under subsection (a)(2), then the President may make a different determination and shall submit the determination to the Congress in accordance with subsection (a)(1).

"(d)(1) For purposes of this section—

"(A) continuity of session is broken only by an adjournment sine die; and

"(B) days on which either House is not in session because of an adjournment of more than 5 days to a day certain are excluded in the computation of the periods specified in subsection (a)(2) and subsection (b).

"(2) If an adjournment sine die of the Congress occurs after the President has submitted a determination under subsection (a)(1), but such adjournment occurs—

"(A) before the end of the period specified in subsection (a)(2); and

"(B) before any action necessary to disapprove the determination is completed under subsection (a)(2); then the President shall be required to resubmit the determination involved at the beginning of the next regular session of the Congress. The period specified in subsection (a)(2) shall begin on the date of such resubmission.

"(e) For purposes of this title:

"(1) The term 'concurrent resolution' means a concurrent resolution the matter after the resolving clause of which is as follows: 'That the Congress disapproves the determination made by the President dealing with the matter of —, which determination was submitted to the Congress on —'. (The blank spaces shall be filled appropriately.)

"(2) The term 'determination' means any determination made by the President pursuant to section 207(a)(1).

"(f) The provisions of this section shall take effect on the date of the enactment of this Act.

"(d) The table of contents of the Act is amended by inserting after the item relating to section 209 the following new item: 'Sec. 210. Congressional review.'"

Mr. SIMPSON. Mr. President, will the Senator yield?

Mr. BUMPERS. I yield to the Senator from Wyoming.

Mr. SIMPSON. Mr. President, I ask unanimous consent that there be a time limitation on this amendment of 30 minutes, equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. Mr. President, perhaps we can finish in less time than 30

minutes. I know Senators have planes to catch.

First of all, on a philosophical note, I think this bill presents a real dilemma for most of the Members of this body. It presents us with a conflict between our normal commitment to human rights, our humanitarian instincts, our Judeo-Christian beliefs and ethics, on the one hand, and on the other hand, our commitment to the first law of nature, which is self-preservation.

Now, I think that the bill is correct, at least to this extent: there must be a limit, there must be a cap on how many immigrants we are going to take into this country. But I also believe there must be a cap on how many refugees we are going to permit to enter. Otherwise, our work is for naught.

We are in the position of people on a lifeboat. If you have 10 people on a lifeboat and that is the capacity for the lifeboat, and you take on 5 more people, both the 10 who are in the lifeboat and the 5 who are climbing aboard are all going to be lost.

The analogy is that the United States—a great, powerful nation, a great agrarian land with tremendous resources—can absorb, in the interest of human rights, a lot of people, but not everybody. So we are in the position, and rapidly moving into an even more precarious position, of accepting more people in our lifeboat than we can sustain.

I voted for the first Kennedy amendment, which is almost a contradiction to my commitment to a cap. But I voted for it because I cannot think of anything more traumatic, more perverse, than saying that a family may not be reunified. Every parent in this body and every parent in this country can identify with not being able to live with your children or your wife, or even your brothers and sisters. We take those things for granted in this country.

Mr. President, the fact that I voted for that, on the one hand, and I voted for the Huddleston amendment, on the other, is, I think, a manifestation of the ambivalence we all feel about what the proper action ought to be here. It is almost a Sophie's choice. Somebody said a while ago that the D'Amato amendment was an amendment which forced Senators to decide which child you grab when a house is on fire. It is a Sophie's choice, similar to the situation where Sophie had to make up her mind whether she wanted to save her son or her daughter. She arrived in Auschwitz and got off the train and the guard said, "You can keep one of your children, but not both." So here is a desperate mother having to decide which one of her children is going to go to the gas chamber.

Well, this situation is not quite that dramatic, of course, but it is an illus-

tration of the terrible conflict and choices we are having to make on this bill.

Now, the amendment that I am offering here does not affect the cap of 425,000 immigrants in the bill. I want to repeat that. It does not affect the 425,000 immigrants who are allowed for family reunification and so on under the preferences. It does not disturb that cap.

What it does do is put a cap on the number of refugees that we can accept into this country, except under certain conditions.

Now, to understand what we are faced with, let me point out that the existing law of the land is that, unless the President comes over to the Congress and consults with us and issues a determination that he wants more than 50,000 refugees, then 50,000 is the limit. But it is an ineffective limit, because we have been admitting a lot more than that.

The President has submitted a determination to us before the beginning of each fiscal year saying, "We want more than 50,000." Now, I want you to bear in mind, that under existing law, before the beginning of each fiscal year the President has to come to the Congress and say, "Here is the way it looks to me, but I am going to consult with you about it." He is then bound by law to consult with the Judiciary Committees of both the House and the Senate. After that consultation, he, and he alone, makes the determination as to how many refugees will be admitted into this country in the ensuing year. If he says, "I think this coming year we need 150,000 refugees," his say is final; not ours, his.

My amendment changes that ever so slightly. We will raise the current 50,000 limit to 75,000—and I want to point out that at the end of this year there is no limit on the number of refugees that can be admitted into this country so, what I am saying is that we are going to take the committee bill of 425,000 for immigrants, add 75,000 refugees, in order to produce a total cap of 500,000 who may enter this country next year.

There could be no interchanging of numbers between categories. If we do not have 75,000 refugees, that would not raise the number of immigrants coming into the country. If we do not have 425,000 immigrants, that does not raise the number of refugees that can come into the country.

What the amendment simply says is that the President, if he wants more than 75,000 refugees to come into this country in any one year, not only must consult and make the determination that he wants more and why, but also that Congress reserves, under my amendment, the right to disapprove the President's request within 30 days under expedited procedures after he submits it.

If the President comes over and says, "I want 150,000 refugees next year," twice as many as my amendment would permit, Congress has the right to say, "Mr. President, you are helping to sink our ship. That is too many refugees." We have 30 days in both Houses to disapprove it under expedited procedures.

I think it is only fair to say at this point that I have never been a great champion of legislative vetoes. I do not much like the concept. And I assume the Supreme Court is going to rule on the constitutionality of legislative vetoes sometime, but it has not done so yet.

I want to say one thing. In this bill, if we pass this amendment, you are saying to the President when he signs it, "Mr. President, if you sign this bill, there is a provision by which Congress reserves unto itself some say-so about who and how many people are going to cross our borders next year."

Is that an unfair reservation to the Congress?

Mr. HUDDLESTON. Will the Senator yield.

Mr. BUMPERS. I am happy to yield. Mr. HUDDLESTON. I thank the Senator for yielding.

Certainly my efforts here will indicate that I am in general agreement with the direction that the Senator from Arkansas intends to take.

There are just a couple of questions I would like to ask the Senator. First, on the question of 75,000, why would the Senator increase that number from 50,000 which is in the Refugee Act of 1980?

Mr. BUMPERS. That is a very good question. Let me answer it this way: In 1980, there were 212,000 refugees that came into this country, most of them Cuban. That was during the great Mariel boat lift. In 1981, last year, we accepted 159,000. This year there is a limit of 140,000. The President sent over his message before the beginning of the fiscal year for 1981 and said, "I want 140,000." But through June of this year there have only been 53,000 who came into the country.

I reached the figure of 75,000 in two ways. You can look at it either way, and it is necessarily an arbitrary figure. With the number of refugees coming into the country right now, this would be the lowest year we have had for some time for refugees. If the flow continues at its present rate we will accept about 75,000 refugees into this country this year. The other way of looking at 75,000 is that it is a little less than half of what we accepted last year. It is admittedly an arbitrary figure, but one which I think will cause the Congress to look very carefully if the President says he want more than that.

Mr. HUDDLESTON. I have not had the chance, of course, to study this amendment in any great detail, but as

I understand it the amendment also provides an emergency provision which allows the President to act without any limit. Is that correct?

Mr. BUMPERS. This amendment does not change the emergency provisions in existing law.

Mr. HUDDLESTON. So by declaring the Cuban boat lift an emergency, that would be outside the 75,000 and Congress would have no authority? Or by declaration any other situation—the Southeast Asian situation, where we were bringing in 14,000 a month—could be determined as an emergency? Does the President have the authority to make the declaration as to what is an emergency?

Mr. BUMPERS. He does have it.

Mr. HUDDLESTON. If you look at the record of the State Department, everything is an emergency.

Mr. BUMPERS. I understand that.

Mr. HUDDLESTON. If a situation is not an emergency when it starts out, they will make it one.

Mr. BUMPERS. If I thought I had a ghost of a chance in getting this amendment passed by capping the emergency numbers, too, I would do it. This is a very pragmatic concern on my part. I voted for the amendment of the Senator from Kentucky because the emergency provision is indeed a big loophole. But I think this is a modest step in the right direction, and, based upon my conversations with other Senators, it is probably the best thing we can hope for.

Mr. HUDDLESTON. I think certainly it is in the right direction when it restores to the Congress some reasonable way to exert its own authority and its own opinion as to what the refugee level ought to be. As a practical thing, it does have loopholes, and I do not know that as an operative piece of legislation it would put us into any better situation than we are in now.

We had the Cuban boat lift, for instance. There was no consultation of that with Congress or anybody else. There was no law that covered that. The President at that time just said, "We welcome you with open arms. We will call you legal entrants."

I do not know how this would address that situation. Can the Senator give me any help as to whether or not this would, in fact, give Congress an opportunity to participate on those kinds of deliberations and decisions?

Mr. BUMPERS. My amendment does not address the emergency powers of the President, but I do want to say one thing. As I say, I would like to put it in but I do not believe we can pass it. I think there is a chance we can pass this measure and I think it is an improvement in the bill. I will also say that the President's emergency power has only been used one time in the history of this country and that

was in 1980 when the President allowed the Mariel boat lift.

Second, just from a political standpoint, I believe that was the most devastating decision of the Presidency of Jimmy Carter and I think it was one of the reasons for his defeat. I think any other President is going to look at this hole card very closely in light of that.

Mr. HUDDLESTON. As I say, I do agree with many parts of this amendment. I am concerned that it does not, in fact, put a ceiling on immigration. The only way to do that, in my judgment, is to have one overall cap. This does restore to the Congress, however, some limited authority in order to deal with the executive branch in trying to develop a rational program and rational figures. From that standpoint, I will support the Senator's amendment. I would hope that he might amend that figure back to the level which is in the present bill of 50,000, but, nevertheless, I think it is an improvement over the situation that exists at the present time.

Mr. BUMPERS. I thank the Senator very much.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. SIMPSON. Mr. President, I was pleased with the debate between my two colleagues on the issue of refugee levels because both of them have followed it closely. Senator BUMPERS from his standpoint in the State of Arkansas and Senator HUDDLESTON who has had long experience in this issue. I understand what is being sought, but I have difficulty with it.

As I understand it, this amendment provides that the first 75,000 refugees will be free on board. In other words, without consultation, without any consultation with the Congress. May I inquire if that is correct?

Mr. BUMPERS. The Senator is not exactly correct. That is the maximum.

Mr. SIMPSON. There will be nothing affecting over 75,000 unless there is consultation with Congress, notification to Congress of the number chosen by the President, and Congress then failing to pass a concurrent resolution rejecting the numbers over 75,000.

Mr. BUMPERS. The Senator is correct, Mr. President.

Mr. SIMPSON. Mr. President, I think as we continue to use this figure of 50,000 in our refugee discussions, many may be a bit surprised that the Refugee Act, which we shall reauthorize here very shortly, in a few days, states that the number of refugees who may be admitted under this section in fiscal years 1980, 1981, and 1982 may not exceed 50,000.

Mr. BUMPERS. The Senator is correct. Incidentally, that expires at the end of this year and there is no limit after October 1 of this year.

Mr. SIMPSON. That is correct. That is what I am emphasizing because, instead of having the normal flow of 50,000 as we referred to it, the normal flow will be zero. The normal flow under the legislation in 1983 will effectively be zero, because we will no longer have the 50,000 allowed without consultation. So, in effect, here we have an amendment which actually increases the number of refugees which may be admitted without consultation. Is that not correct?

Mr. BUMPERS. The Senator is not entirely correct. Incidentally, if the committee, in reauthorizing the Refugee Act, wants to reduce it to 50,000, it certainly will get my support, or if it wants to reduce it to zero.

Would the Senator like me to amend my amendment either to cut it to zero or to 50,000?

Mr. SIMPSON. In the form of the amendment as it presently reads, we are really saying there can be 75,000 who can come into the United States of America, admitted without consultation of Congress. I think that is certainly not a good step at all.

Mr. BUMPERS. I must have misunderstood the Senator, Mr. President. The President must consult with us as he does right now. If he wants to admit 10,000 next year or 5,000, he still must consult with us. The only difference is that if he wants more than 75,000, we reserve the right to ourselves to say no.

Mr. SIMPSON. But under the Senator's amendment, Mr. President, there is no consultation process under 75,000.

Mr. BUMPERS. Yes, there is, Mr. President. We do not change the consultation process one iota. If he wants 1 or 75,000, he must consult with us, he must make a determination, he must send it over and it must be put in the CONGRESSIONAL RECORD, exactly as it is today.

Mr. SIMPSON. It says in the amendment, Mr. President, "Except as provided in subsection (b), the number of refugees who may be admitted under this section during a fiscal year may not exceed seventy-five thousand unless the President," then it goes on.

Mr. BUMPERS. Mr. President, the intent of that provision is that unless he gives us justification for more than 75,000—in which case, if we read on—we are reserving to ourselves the right to veto. But he still must make a determination. Whether it is zero or up to 75,000, he must consult and he must make a determination.

Mr. SIMPSON. Mr. President, I would not read that amendment that way. Perhaps we can adjust, but there is a time agreement.

Let me say this to the Senator from Arkansas. The present procedure works. Let me express to him how that is.

Mr. President, under the Refugee Act—let me swiftly give these figures. We had a proposed figure of 234,000. We had a ceiling then of that amount. We actually had admissions of 212,000. Then Congress became aware of where we were going with the misuse. The parole authority had gotten us into such poor condition that we just never quit. We were hooked on the old parole authority.

So in 1981, we had proposed admissions of 222,000. The ceiling was proposed at 217,000, the authorized ceiling. The actual admissions were 159,000. In 1982—this was my first consultation process—they proposed 173,000. The subcommittee and the Judiciary Committee said, no, 140,000. That was accepted.

This year, the best knowledge we have is that they will come in with about 99,000. So we are coming down very swiftly. We were headed for the historical flow of 50,000. Now that is removed. The flow can be anywhere between zero and what it is at present, which is 99,000. We believe the administration is likely to come in in 1983 with a proposed figure of about 85,000. We will go to consultation on that figure.

I submit that, Mr. President, just to show that it is working. It is, indeed, working and working well, the present law.

Mr. HUDDLESTON. Mr. President, will the Senator yield?

Mr. SIMPSON. Yes.

Mr. HUDDLESTON. It is working simply because the State Department has not yet taken into account some of the situations that exist in the world and begun to address them. We have 400,000 illegal El Salvadorans in this country at the present time. It is only a matter of time until the State Department determines that there is an emergency there. When that happens, they will admit 200,000 or 300,000 and there is nothing in the present law, no matter what the recommendations of the subcommittee may be, that will in any way restrain them.

Mr. SIMPSON. Mr. President, the restraint has come because Congress is finally exercising its muscle in the consultation process. They can even come up with numbers in an emergency situation that we could consult on. I think that the issue is that it has taken this long for the Refugee Act to impact upon the administration's decision and I hope any administration, at least this one—and the previous one was beginning to respond to it—understands that indeed Congress is going to call the shots. That was best proven by the change of numbers last year from 173,000 down to 133,000.

Mr. BUMPERS. Mr. President, I ask unanimous consent that I be permitted to send a modification to the desk.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The amendment (UP 1235) was modified.

The amendment, as modified, is as follows:

On page 140, between lines 11 and 12, insert the following:

CONGRESSIONAL REVIEW OF REFUGEE
ADMISSIONS

SEC. 206. (a) Subsection (a)(1) of section 207 (8 U.S.C. 1157) is amended to read as follows:

"Sec. 207. (a)(1) Except as provided in subsection (b), the number of refugees who may be admitted under this section during a fiscal year may not exceed seventy-five thousand unless the President—

"(A) determines, before the beginning of the fiscal year and after appropriate consultation (as defined in subsection (e)), that admission of a specific number of refugees in excess of such number is justified by humanitarian concerns or is otherwise in the national interest;

"(B) transmits such determination in writing to both Houses of Congress; and

"(C) the Congress fails to adopt a concurrent resolution of disapproval of the determination under the provisions of section 210." *Provided, however,* That nothing herein shall be construed to allow the President to determine that fewer than seventy-five thousand refugees should be admitted without consultation with Congress.

(b) Section 207 (8 U.S.C. 1157), as amended by subsection (a) of this section, is further amended by striking out subsection (a)(2) and redesignating subsection (a)(3) as subsection (a)(2).

(c) Chapter 1 of title II of the Immigration and Nationality Act is amended by adding at the end thereof the following new section:

"CONGRESSIONAL REVIEW

"Sec. 210. (a)(1) The President, after making a determination under subsection (a)(1) of section 207, shall submit such determination to the Congress for review in accordance with this section. Such determination shall be delivered to the Congress while it is in session. Such determination shall be referred to the committees on the Judiciary of each House of Congress.

"(2) Any such determination shall become effective in accordance with its terms unless, before the end of the period of 30 calendar days of continuous session after the date such determination is submitted to the Congress, both Houses of the Congress adopt a concurrent resolution disapproving such determination.

"(b)(1) The provisions of this subsection are enacted by the Congress—

"(A) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively but applicable only with respect to the procedure to be followed in that House in the case of concurrent resolutions which are subject to this section, and such provisions supersede other rules only to the extent that they are inconsistent with such other rules; and of the House. The motion is highly privileged (except that it may not be made after the committee has reported a concurrent resolution of disapproval with respect to the same determination). Debate on such motion shall be limited to not more than 1 hour, the time to be

divided equally between those favoring and those opposing the motion. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(3)(A) When a committee has reported, or has been discharged from further consideration of, a concurrent resolution, it shall be at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the concurrent resolution. The motion shall be privileged in the Senate and highly privileged in the House of Representatives, and shall not be debatable. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to.

"(B) Debate on the concurrent resolution shall be limited to not more than 10 hours, which shall be divided equally between those favoring and those opposing such concurrent resolution. A motion further to limit debate shall not be debatable. An amendment to, or motion to recommit, the concurrent resolution shall not be in order and it shall not be in order to move to reconsider the vote by which such concurrent resolution was agreed to or disagreed to.

"(4) Appeals from the decision of the Chair relating to the application of the rules of the Senate or the House of Representatives, as the case may be, to the procedure relating to a concurrent resolution shall be decided without debate.

"(5) Notwithstanding any other provision of this section, if a House has approved a concurrent resolution with respect to any determination of the President, then it shall not be in order to consider in such House any other concurrent resolution with respect to the same determination.

"(B) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

"(2)(A) Any concurrent resolution disapproving a determination of the President shall, upon introduction or receipt from the other House of the Congress, be referred immediately by the presiding officer of such House to the Committee on the Judiciary.

"(B) If a committee to which a concurrent resolution is referred does not report such concurrent resolution before the end of the period of 15 calendar days of continuous session of the Congress after the referral of such resolution to that committee it shall be in order to move to discharge any such committee from further consideration of such concurrent resolution.

"(C)(1) A motion to discharge in the Senate may be made only by a Member favoring the concurrent resolution, shall be privileged (except that it may not be made after the committee has reported a concurrent resolution with respect to the same determination of the President); and debate on such motion shall be limited to not more than 1 hour, to be divided equally between those favoring and those opposing the motion. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to. If the motion to discharge is agreed to or disagreed to, the motion may not be renewed, nor may another motion to discharge the committee be made with respect to any other concurrent resolution with respect to the same determination of the President.

"(ii) A motion to discharge in the House may be made by presentation in writing to the Clerk. The motion may be called up only if the motion has been signed by one-fifth of the Members.

"(c) If a determination by the President is disapproved by the Congress under subsection (a)(2), then the President may make a different determination and shall submit the determination to the Congress in accordance with subsection (a)(1).

"(d)(1) For purposes of this section—

"(A) continuity of session is broken only by an adjournment sine die; and

"(B) days on which either House is not in session because of an adjournment of more than 5 days to a day certain are excluded in the computation of the periods specified in subsection (a)(2) and subsection (b).

"(2) If an adjournment sine die of the Congress occurs after the President has submitted a determination under subsection (a)(1), but such adjournment occurs—

"(A) before the end of the period specified in subsection (a)(2); and

"(B) before any action necessary to disapprove the determination is completed under subsection (a)(2);

then the President shall be required to resubmit the determination involved at the beginning of the next regular session of the Congress. The period specified in subsection (a)(2) shall begin on the date of such resubmission.

"(e) For purposes of this title:

"(1) The term 'concurrent resolution' means a concurrent resolution the matter after the resolving clause of which is as follows: 'That the Congress disapproves the determination made by the President dealing with the matter of _____, which determination was submitted to the Congress on _____'. (The blank spaces shall be filled appropriately.)

"(2) The term 'determination' means any determination made by the President pursuant to section 207(a)(1).

"(f) The provisions of this section shall take effect on the date of the enactment of this Act.

(d) The table of contents of the Act is amended by inserting after the item relating to section 209 the following new item: "Sec. 210. Congressional review."

Mr. BUMPERS. Mr. President, I have only 20 seconds left. The modification is designed to clarify the point that the Senator from Wyoming raised. That is that the President must consult in any event as he does now and if he wants more than 75,000 refugees, then Congress withholds to itself the two-House veto.

The PRESIDING OFFICER. All time of the Senator from Arkansas has expired.

Mr. SIMPSON. Mr. President, may I earnestly suggest to the sponsor that I know what he is trying to accomplish with regard to refugee limitation. The amendment was unclear. I would like to have the opportunity and pledge him that I shall give him the opportunity to review this with the subcommittee and the staff. Our first knowledge of this amendment was this morning.

We have already now modified it once. I deeply feel that it has some flaws in it that we will regret if we

should accept it. I must respectfully advise the sponsor that I will move to table the amendment and the modification, whatever form it may take, and assure the Senator from Arkansas that I will hold a hearing on that if he wishes, or the staffs will meet, but with this limited time I cannot accommodate the amendment in its present form.

Mr. BUMPERS. Will the Senator yield?

Mr. SIMPSON. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator has 4 minutes 39 seconds.

Mr. SIMPSON. I will yield 1 minute.

Mr. BUMPERS. Mr. President, I just want to say to my colleagues that unless we adopt this amendment, there will be no limit on how many refugees will be admitted next year. My purpose here is to make that limit a fairly generous number, much higher than the Senator from Kentucky would like, higher than others would like, but at least there is a limit and there is a congressional limitation. If we do not put a limit on the number of refugees, then what we are doing on this entire bill is really for naught.

Mr. KENNEDY. Mr. President, during the course of this debate we have heard a good deal about the impact of refugees on our society. And from the discussion one would conclude that they have all been negative.

An article in this morning's Washington Post, Mr. President, tells a different story, a story of how one homeless refugee has come to our shore, built a new life for himself, and greatly contributed to our society.

Mr. President, the article speaks for itself, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Aug. 13, 1982]

ENERGETIC VIETNAMESE REFUGEE BUILDS A BUSINESS EMPIRE IN U.S.

(By Jay Mathews)

SEATTLE, Aug. 12.—On his first U.S. job as a welder, Quang Tran was laid off because he worked too hard, he said. Someone at the union had complained that this young Vietnamese refugee was so productive that his ironworker shop had stopped hiring more men.

Seven years later, the slim, boyish, hyperactive Tran is famous here for becoming a Vietnamese refugee tycoon.

In the midst of a flood of 600,000 Indochinese refugees into the United States, straining welfare rolls and raising unemployment figures, Tran's story shows how many of the earliest refugees have lifted themselves and pulled up some of their American neighbors with them.

A month shy of his 30th birthday, Tran has established his own shipbuilding and repair company on 22 acres of what was barren Seattle waterfront. He grossed about \$8 million last year.

Employees like Sonny Parker, a forklift operator from Texas, call him "a crazy man,"

devoted to working seven days a week. Workmen on the dock describe their initial shock at seeing Tran, president of his Eagle Marine Construction Co., staying on the work site every day in his overalls and reserving the most dangerous welding chores for himself.

The Seattle port authorities wish Tran would restrain his impulse to put up new buildings first and seek permission later. Some port workers wish he would relax some of his exacting hiring standards.

But Tran is setting such an example of energy and excellence, businessmen here said, that he has given many people in Seattle a different impression of the huge refugee community, which often has been criticized for its drain on the city's resources.

According to a survey in late 1981, commissioned by the U.S. office of refugee settlement, only 55 percent of refugees had entered the labor force and 13 percent of those had actually found work.

The remaining 45 percent included young adults struggling with English, women caring for children, the sick and the bewildered. Most of them were receiving some kind of public assistance.

But Linda Gordon, the office's chief data analyst, noted that many of those surveyed had only recently arrived in the United States. Her office's statistics showed that after a readjustment period, refugees like Tran who had arrived in the first wave after the communist victory in Indochina in 1975 have settled into productive jobs and are beginning to contribute to their communities.

"He doesn't party and he doesn't drink and he doesn't do any of the other things that most people do to reward themselves," said Bob Galloway, sales manager for Tran's company.

Tran displays some signs of his new prosperity; he drives a Delorean and pilots a cruiser he converted from a fishing boat. But most of his time is spent around his small dockside office, decorated with pictures of the little landing craft he has lovingly designed and built.

He keeps a sleeping bag in the office, and in busy periods prefers to sleep overnight on the floor.

Galloway calls Tran "the little general" because he is often "yelling and screaming and running around." But when he arrived in the United States in April, 1975, he was little more than a former lieutenant with seven years experience in the navy of a defeated country, some knowledge of how to repair damaged ships and little more than a high school education.

Tran was born in Haiphong, North Vietnam. In 1954 his father, a Sino-Vietnamese engineer, fled the communist takeover of the north and resettled in the Cholan district of Saigon. His father died when Tran was 7, and his elder brother supported the family by managing a toothpick factory.

Tran was drafted in 1968. Assigned to a dock facility in the southern delta, he often had to go into disputed territory and try to raise and recover river boats knocked out by Vietcong mortars. U.S. Coast Guard Chief Warrant Officer Robert L. Havner, who worked with Tran then, remembers him as "one in a thousand. Even then he was working 24 hours a day."

His energy won him a chance at further training in the United States, at Governor's Island in New York and later San Diego and San Francisco.

Tran's roommate at Governor's Island took him home to New Jersey for a brief visit, and Tran remembers the splendid

summer home of his roommate's wealthy realtor father. To him it was a monument to the American way.

When he had to return to Vietnam, Tran said, "I had the idea that I was going to come back. This was the land of opportunity. If you work for it, you get it."

On April 28, 1975, with desperate Vietnamese pounding on the gate of the American Embassy, Tran and most of his family managed to get on a C150 refugee flight because of their connections with the U.S. military and U.S. businesses.

He headed for Seattle, where a refugee employment service center found him a job teaching welding.

"I like to teach," he told himself, "but if I teach like this, I got no future."

He became a welder for a local ironworking factory, but was laid off. Disgruntled with life as an employee, he started to contract with local fishing companies to manage the conversion of surplus Navy ships into fishing boats.

His reputation for careful workmanship and meeting deadlines spread. A steel supplier, who later befriended Tran and helped him get a line of credit, heard of this unusual refugee suddenly getting into the business. Then, at a shop, "I kept hearing this guy yelling 'Give me my . . . stuff.' I had to meet him."

Having saved his money and found a bank willing to gamble on his unusual blend of talents, Tran founded the Eagle Marine Construction Co. in 1979. He soon won contracts to build 1,500 cargo flaps, design and build two special landing craft for fishing and supply work in two Alaskan towns, and refit a huge barge.

Workers applying for the projects had to take a test supervised by Tran and only about 10 percent passed. When dangerous jobs like overhead welding were required, Tran often did them.

"I feel I am more responsible than they," he said. "And if I get hurt it's okay, because I'm still single."

Faced with a recession particularly dangerous to young companies like his, Tran has added a small parts and tool-making facility and has begun to advertise and try to take advantage of government contracts which cater to minority-owned firms. Tran said he has not taken a vacation since he arrived in 1975.

He said he has no marriage prospects. "Who would want to get involved with someone who works all the time?" he said.

Mr. BUMPERS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SIMPSON. Mr. President, I can only say that at least this year there will be two figures at the parapet, Ron MAZZOLI in the House of Representatives and myself in this Chamber, with our respective chairmen, STROM THURMOND and PETER RODINO, to assure the Senator that in the conference process we will have a limit on refugees.

Mr. President, has the time been yielded back by the proponents?

The PRESIDING OFFICER. All time has expired.

Mr. SIMPSON. Then I yield back all time of the opposition to the amendment.

Mr. BUMPERS. Did the Senator move to table?

Mr. SIMPSON. I did move to table.

Mr. BUMPERS. I ask for the yeas and nays.

Mr. SIMPSON. I do move to table the amendment of the Senator from Arkansas.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table.

Mr. BAKER. Mr. President, I ask unanimous consent that I may proceed for 2 minutes.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. BAKER. Mr. President, I have a unanimous-consent agreement that I submitted to the minority leader and which I believe has been cleared by the managers of this measure, and I would like to present it now for the consideration of the Senate.

S. 2222

Mr. President, I ask unanimous consent that any rollcall votes ordered after the hour of 2:45 p.m. today in relation to S. 2222 be postponed, to begin on Tuesday, August 17, at 10 a.m., with the first vote to be 15 minutes in length and any remaining rollcall votes occurring back-to-back to be 10 minutes in length.

Mr. President, I further ask unanimous consent that no amendments be in order on Monday or Tuesday in relation to S. 2222 and that the bill be advanced to third reading and to final passage without any intervening action following the back-to-back rollcall votes on amendments on Tuesday.

HOUSE JOINT RESOLUTION 520

Further, I ask unanimous consent that following the period for morning business on Monday, the Senate turn to consideration of Calendar No. 752, House Joint Resolution 520, the debt limit bill.

And finally, Mr. President, I ask unanimous consent that paragraph 4 of rule XII be waived.

The PRESIDING OFFICER. Is there objection?

Mr. BUMPERS. Reserving the right to object, Mr. President, is the leader's request postponing the vote on this amendment?

Mr. BAKER. Not on this one.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

AUTHORIZATION FOR CERTAIN ACTION DURING ADJOURNMENT

Mr. BAKER. Mr. President, I have a subsequent request. I ask unanimous consent that during the adjournment

of the Senate over until Monday, August 16, that messages from the President of the United States and the House of Representatives may be received by the Secretary of the Senate and appropriately referred; that the Vice President and the President pro tempore and the acting President pro tempore be authorized to sign duly enrolled bills and joint resolutions.

ORDERS FOR MONDAY

Finally, Mr. President, I ask unanimous consent that when the Senate reconvenes on Monday, the reading of the Journal be dispensed with, no resolution come over under the rule, the call of the calendar be dispensed with, and following the time allocated the two leaders under the standing order and special orders there be a period for the transaction of routine morning business not to exceed 30 minutes in length, with Senators permitted to speak therein for not more than 3 minutes each.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, and I will not object, I merely want to state for the record there is no way to keep the distinguished Senator from Tennessee, the majority leader, from adjourning the Senate today until Monday if he wants to do that. He prefers to do it by unanimous consent. If he does not have unanimous consent, the majority leader can move it at the end of the day. That is not debatable; he has the votes to do it, and I want the record to so show.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

ORDER FOR ADJOURNMENT UNTIL MONDAY, AUGUST 16, 1982

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in adjournment until 12 noon on Monday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I yield the floor.

IMMIGRATION REFORM AND CONTROL ACT OF 1982

The Senate continued with the consideration of the bill.

Mr. SIMPSON addressed the Chair.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. SIMPSON. Mr. President, I withdraw my motion to table. The amendment may be considered on an up-and-down basis.

The PRESIDING OFFICER. Without objection, the motion to table has been withdrawn. The question is on the amendment. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. BRADY),

the Senator from Maine (Mr. COHEN), the Senator from Utah (Mr. HATCH), the Senator from Oregon (Mr. HATFIELD), the Senator from Maryland (Mr. MATHIAS), the Senator from Alaska (Mr. MURKOWSKI), the Senator from New Mexico (Mr. SCHMITT), the Senator from Vermont (Mr. STAFFORD), the Senator from Wyoming (Mr. WALLOP), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "nay."

Mr. CRANSTON. I announce that the Senator from Texas (Mr. BENTSEN), the Senator from Nevada (Mr. CANNON), the Senator from Connecticut (Mr. DODD), and the Senator from South Carolina (Mr. HOLLINGS), are necessarily absent.

The result was announced—yeas 41, nays 45, as follows:

[Rollcall Vote No. 322 Leg.]

YEAS—41

Boren	Exon	Long
Bumpers	Ford	McClure
Burdick	Glenn	Mitchell
Byrd	Grassley	Moynihan
Harry F., Jr.	Hart	Nickles
Byrd, Robert C.	Hawkins	Nunn
Chafee	Hefflin	Pryor
Chiles	Helms	Randolph
Cochran	Huddleston	Riegle
D'Amato	Inouye	Roth
DeConcini	Jackson	Rudman
Denton	Johnston	Sasser
Eagleton	Kasten	Stennis
East	Levin	Zorinsky

NAYS—45

Abdnor	Goldwater	Packwood
Andrews	Gorton	Pell
Armstrong	Hayakawa	Percy
Baker	Heinz	Pressler
Baucus	Humphrey	Proxmire
Biden	Jepsen	Quayle
Boschwitz	Kassebaum	Sarbanes
Bradley	Kennedy	Simpson
Cranston	Laxalt	Specter
Danforth	Leahy	Stevens
Dixon	Lugar	Symms
Dole	Matsunaga	Thurmond
Domenici	Mattingly	Tower
Durenberger	Melcher	Tsongas
Garn	Metzenbaum	Warner

NOT VOTING—14

Bentsen	Hatch	Schmitt
Brady	Hatfield	Stafford
Cannon	Hollings	Wallop
Cohen	Mathias	Weicker
Dodd	Murkowski	

So Mr. BUMPERS' amendment (UP No. 1235) as modified was rejected.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. KENNEDY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CRANSTON. Mr. President, I will oppose S. 2222, the Immigration Reform and Control Act.

But before I explain my criticisms of the bill, I first want to say what I think is right about it—and there is much that is.

First, the bill explicitly recognizes the special relationship we have with

our next-door neighbors, Canada and Mexico. Those nations, by reason of proximity and history, deserve special treatment for immigration purposes. I have advocated such special recognition for immigration from Canada and Mexico for many years and I am very pleased to see this provision in S. 2222.

Second, the bill will promote reasonable immigration into the United States and coordinates normal immigration with our admission policies for refugees under the Refugee Act of 1980. I am disappointed, however that Senator KENNEDY's efforts to restore the fifth preference category failed on the floor yesterday.

Third, the bill accepts the existence of a valued population of undocumented workers who have contributed substantially to our national productivity, to our culture, and who have become welcome members of many communities.

Finally, this legislation is built upon an impressive foundation of study by many citizens and groups and was subject to extraordinary deliberation in the Judiciary Committee under the leadership of my colleagues Senators SIMPSON and KENNEDY.

I applaud the thoughtful and conscientious work the Senator from Wyoming has done in his usual thorough way on this measure even though I disagree with many of his conclusions. I applaud the effective leadership the Senator from Massachusetts has provided in his customary courageous way—and I agree with virtually all the stands he has taken on this measure.

Differences remain.

The bill, in my view, imposes a new and controversial legal order upon the United States for the purpose of controlling illegal immigration. I disagree deeply with the direction taken by S. 2222 to control illegal immigration.

My fundamental objection to S. 2222 is its system of verification of the requirement that no employer shall hire any individual who is not authorized to work in the United States.

The authors of the bill argue that such a work authorization system is necessary to protect employers and, in their words, minority workers. It is even suggested by one advocate that "minority workers could use the system to demonstrate that they are citizens or aliens authorized to work in this country, and to counter any possible suspicion."

I find this offensive and repugnant to the concept of individual dignity and liberty.

Apparently, many do not agree with me.

Apparently, many of my colleagues are ready to vote to require that every American be authorized by his or her Government to work.

What more is there that a "Big Brother" government can do to obtain

control over every citizen and resident of the United States?

My distinguished colleagues on the Judiciary Committee argue that the work permit system will never be used for law enforcement purposes other than enforcement of the immigration laws.

I accept those assurances at face value.

But the Senators who make them today may not be here to defend against some future effort by the Government to use ID cards for nefarious purposes. The Senators who assured the citizens of 1935 that social security cards and numbers would never be used for identification purposes are not here today to argue against the provision in S. 2222 which leads toward the use of the social security card and number as a universal identifier.

So while I accept the good faith of my colleagues, I doubt deeply their ability to keep their word into the future when they are no longer here.

Any system that leads to the requirement that citizens be identified, no matter how you do it, or what you call it, boils down to an internal passport system that will sooner or later be abused by the Government.

S. 2222 will make every individual in the United States—whether born here or not—subject to the control of immigration authorities—even if they spend every day of their lives in their own hometowns.

Such a result, in my view, infringes upon our traditional respect for individual liberty in the United States best expressed in the Revolutionary War slogan "Don't Tread On Me" and New Hampshire's State motto, "Live Free or Die."

I am told repeatedly by the bill's supporters that virtually every country in the world has such a system. Scandinavian nations are held up as prime exhibits as are other European nations. That should not be persuasive to anyone who appreciates the history and traditions of our Nation.

One of my reasons for opposing the identification card approach is based upon my personal experience and what I have witnessed in Hitler's Germany, Mussolini's Italy, and in various Communist countries. The first tool of a totalitarian system is a domestic passport, let us not have them in our beloved land.

I understand why such a provision is necessary in the scheme set forth in S. 2222.

It is basic that the key to any program of controlled immigration is the ability to limit entry to lawful means.

Obviously, any system of allocating fairly the right to immigrate to the United States from other countries depends upon assuring that persons will use only the system of lawful immigration and not be able to resort success-

fully to unlawful ways of entering and remaining in the United States.

S. 2222 seeks to obtain control over illegal immigration first by making it unlawful to hire an illegal alien or an alien unauthorized to work. Under such an approach, it is elementary that employers have an affirmative defense. The bill provides such a defense through the verification system which involves statements made under penalty of perjury plus assorted identification documents, pending the development of a so-called secure verification system.

I would approach the problem of employers hiring undocumented workers differently. I do not think employers should be made to be immigration policemen. But for the purposes of this discussion I concede that S. 2222, if passed, will contain a provision making it against the law to hire an alien unauthorized to work in the United States.

Having made that assumption, it appears adequate to me to limit the bill's requirement for verification to the system proposed in section 101(b) of the bill. Verification that an alien is authorized to work should be limited only to those provisions provided in section 101(b). Those are: First, attestation by both employer and employee that the provisions have been complied with and that the employee is authorized to work; second, examination of the individual's U.S. passport, or third, social security card or U.S. birth certificate, plus some other identity document.

I urge that we consider dropping the requirement that the President be directed to move toward the development of a secure verification system. This limitation would help guard against the growth of an I.D. card system. Frankly, I prefer that the verification be limited further to simple statements made under penalty of perjury that the individual is authorized to work plus presentation of a social security card as is now required under law.

The verification of identity provisions are in my view an overreaction to the need to assure that aliens and employers comply with the law.

I think Americans and, for that matter, most people are law-abiding.

The current situation, as the distinguished chairman of the Subcommittee on Immigration well knows, is highly ambiguous on the question of hiring illegal aliens. Hiring illegal aliens is not against the law today. In addition, our immigration policy for the most part has been based in recent years upon the tolerance of illegal aliens working and living in the United States.

Thus, I believe that if the law is changed as it is in section 101(a) of S. 2222 and elsewhere in the bill, most

American employers will comply with the law. That has been our experience with many changes in law, which seemed to be highly controversial, even inflammatory, such as the public accommodations title of the Civil Rights Act of 1964, and the Voting Rights Act of 1965. Most Americans complied with those laws when passed by Congress and signed by the President.

No evidence has been presented to me that employers will not comply and the committee report concedes that employers will comply.

Would compliance under such a scheme as I have outlined be absolute?

Probably not. But compliance would be substantial and workers and job applicants would be fairly treated.

Perfection in compliance with S. 2222, in my judgment, is not worth subjecting every American to a police card system of identity. And I think that is where the bill leads.

Much has been made of the accusation that employers unfairly exploit illegal aliens and undocumented workers. The areas of mistreatment are said to be substandard or unlawful wages and hours; dangerous, unsafe, and unhealthy working conditions; and outright cheating with respect to withholding tax payments not made and other abuses related to payroll practices.

Mr. President, every one of these abuses is a violation of some Federal law as well as of some State law.

I have urged that we act to see to it that those workplace laws are enforced.

My State of California does have such a program.

It is not a substitute for stopping the employment of undocumented workers.

But it has been effective in securing a higher degree of compliance with basic workplace laws.

In fact, recent exit interviews conducted in detention centers operated by INS show that illegal alien workers employed by California employers suffered less economic exploitation and law violation than workers from other States.

In my view, we should move toward a significant enforcement program to receive better compliance with our tax laws which require withholding of taxes on wages and prompt payment of payroll taxes for social security and unemployment insurance. In addition, I would hope to see expanded efforts to enforce minimum wage and fair hours laws as well as stepped up efforts in the health and safety fields.

But, instead of taking steps to help all workers, S. 2222 imposes substantial new regulatory burdens upon employers. All employers will be subject to the prohibition against hiring unauthorized aliens. All employers of four or more workers must retain paper-

work with respect to compliance with section 101(b) for 5 years. That is a significant requirement.

I am not persuaded that the committee has considered the cost of compliance to small businesses and large, as well as the cost to individual citizens seeking to obtain jobs.

I even have some doubt that the committee has met the requirements of paragraph 11 of rule XXVI that an evaluation of the regulatory impact of the bill be made. The rule requires the evaluation to estimate the numbers of individuals and businesses who would be regulated and a determination of the economic impact of such regulation on the individuals, consumers, and businesses affected; a determination of the impact on personal privacy; and a determination of the amount of additional paperwork that will result from the regulations.

Since committees rarely comply in detail with rule XXVI, paragraph 11, I suppose it would be unsportsmanlike to raise a point of order against the bill on the grounds that the report of the committee does not comply with the provisions of paragraph 11 of rule XXVI.

Nevertheless, in spirit, if not literally, I do believe such a point of order could be taken against the bill.

It will suffice to say that the regulatory and paperwork impact of S. 2222 is grossly underestimated and is a sufficient ground to vote against the bill in my opinion.

UP AMENDMENT NO. 1236

Mr. GRASSLEY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Iowa (Mr. GRASSLEY) proposes unprinted amendment numbered 1236.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 84, at line 13, after "ing" strike all thereafter through line 15 to the semicolon.

Mr. GRASSLEY. Mr. President, this amendment modifies a provision in the bill which both the majority and minority floor managers of the bill feel is inconsistent with the basic thrust of amendments adopted previously to this bill.

Mr. President, since the managers of the bill are aware of the amendment and since this has been cleared with the majority manager, I ask that the amendment be adopted.

Mr. SIMPSON. We have no objection.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Iowa.

The amendment (UP No. 1236) was agreed to.

Mr. GRASSLEY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCURE. Mr. President, I ask unanimous consent that the pending matter be laid aside temporarily for the consideration of the conference report on H.R. 6530.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

MOUNT ST. HELENS NATIONAL VOLCANIC AREA—CONFERENCE REPORT

Mr. McCURE. Mr. President, I submit a report of the committee of conference on H.R. 6530 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6530) to establish the Mount Saint Helens National Volcanic Area, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report will be printed in the House proceedings of the RECORD.)

Mr. McCURE. Mr. President, I rise in support of the conference report on H.R. 6530. I commend my distinguished colleagues from the State of Washington, Senators JACKSON and GORTON, for their hard work in bringing this legislation to fruition.

The House offer, recommended by Congressman SEIBERLING, on a settlement of the differences in the boundaries described in both bills was accepted by the Senate conferees after discussions with Senate conferees and sponsors. Concerns over the additions to the boundary of the Goat Creek area were difficult to reconcile. However, the boundaries were adjusted to exclude the known mining claims.

In the Kipuka area, the conferees adjusted boundaries to eliminate known active timber sale areas.

The conference committee in resolving boundary differences in relation to the extant mining claims and mineral interests agreed to exclude known mining claims to the maximum extent

possible and to acquire mineral interests only by exchange.

In the case of those mining claims remaining inside the boundary of the Mount Saint Helens National Volcanic Monument, the Secretary may acquire the claims in the Polar Star-Green River area only with the consent of the owner. Further, the Secretary has ample authority to make minor boundary adjustments to exclude those claims which are near the boundary in the Green River-Polar Star area.

Mr. President, this legislation directs the Secretary to use exchange as the primary tool of acquisition of the private lands and interests in lands in the monument. The conferees expect that the Secretary shall move expeditiously to complete these exchanges, however, since it is also the intent of the conferees to use the exchange authority to the maximum extent possible, the Secretary should allow such reasonable time as may be necessary for parties to exchanges to work out the details of any complicating factors so that the exchanges may be carried out smoothly and effectively.

Mr. President, this legislation represents a response from society to a natural phenomenon of great magnitude that occurred on May 18, 1980, and repeated a number of times up to today and will be predictably repeated in the future.

I believe this legislation strikes a balance in how Congress wishes the land to be managed. It gives the Secretary flexibility to manage and yet preserve, educate, interpret, and protect. The collection, conduct, and dissemination of scientific data by the USGS and Forest Service will be foremost in the management objectives.

Mr. President, I wish to thank Senators JACKSON, GORTON, and WALLOP and the Senate conferees for their work in this legislation. I wish to thank the Senate Energy and Natural Resources Committee staff for their work and perseverance in bringing this legislation to a successful conclusion.

Mr. JACKSON. Mr. President, I rise in strong support of the conference report on H.R. 6530—the Mount St. Helens National Volcanic Monument bill.

Mr. President, I believe that the compromise reached by the conferees in this regard is fair and equitable. I think it strikes a reasonable balance that fairly considers the various interests represented. Throughout the process, both Senator GORTON and I have tried to be responsive to the concerns expressed by the many witnesses and others who have commented on this bill.

The measure before us today creates a national volcanic monument comprising approximately 110,000 acres. The Senate-passed bill included some 105,400 acres. The conference agreement makes important additions in

Smith Creek, Kipuka, and Goat Creek. The mining claims in the Green River Polar Star area have been almost entirely excluded from the monument. The Secretary will be able to use the boundary adjustment authority provided in the bill to delete even these last remaining claims.

The conference report provides for expeditious legislated exchanges of the surface resources of the two largest non-Federal landowners in the area—Burlington Northern and Weyerhaeuser. The subsurface rights are to be exchanged as expeditiously as possible under the general exchange authority provided in the act and existing law. In an effort to insure as little fiscal impact as possible, the Conferees agreed to limit the acquisition authority of the Secretary with regard to mineral interests to exchange only. As I noted earlier, almost all the surface rights in the area will also be acquired for exchange. With regard to the exchange of mineral interests, the conferees adopted language making it clear that only an environmental assessment rather than an impact statement is required to be prepared. This should help expedite the exchange of these interests.

The conference report includes specific language regarding the management of the area which represents a good compromise between the two versions. Language has been included regarding the very narrow circumstances under which timber salvage operations can take place within the monument. Provisions are made to insure that the Secretary can take necessary actions to prevent loss of life and property. Direction is provided the Secretary with regard to the construction of roads and related developments, scientific research and study, and hunting and fishing.

Mr. President, we have an opportunity today to set aside for future generations a truly special resource. The scientific, research, recreation, and other opportunities that Mount St. Helens will provide are, in my view, of inestimable value. I am proud to have played a role in the establishment of this area, and I urge my colleagues to join with me in adopting this conference report.

I want to express my deep appreciation to the chairman of the committee, Senator McCLURE, the chairman of the subcommittee, Senator WALLOP, and, may I say, to the members of the staff of both majority and minority who worked so hard in dealing with a number of intricate details involved in the legislation. I especially want to commend Tom Williams, Mike Harvey, Gary Ellsworth, and Tony Bevinetto of the Senate Energy Committee staff as well as Dale Crane, Nick Ashmore, Bob Boar, and Bob Lowery of the House Interior and Agriculture Committee staffs. I also want to express

my appreciation to my colleague, Senator GORTON, and to his staff, especially Catherine Besteman, for working with us very closely on this bill.

Mr. President, I think it dramatizes what can be accomplished when people work together in a common effort to resolve a lot of difficult pros and cons in legislation of this kind.

Mr. GORTON. Mr. President, today we are considering the conference report on the establishment of a Mount St. Helens National Volcanic Monument. Prior to the conference, the Senate version of the bill and the House version of the bill passed their respective Houses unanimously. The differences between the two versions were slight, and the conference committee was able to conclude its work expeditiously. The conferees are to be commended for the speed with which they conducted the conference, and for producing an excellent compromise bill. I am extremely pleased with the final bill, and it is considered a fair compromise by all the competing interests which must be served by this bill. In fact, it is an improvement over both the original House and Senate bills. I give my enthusiastic support to the final bill worked out in the conference committee, and urge its immediate approval by the Senate.

Mr. President, this is one of those felicitous occasions in my view in which the product of the conference committee is superior to either the bill, which originally was passed by the House of Representatives, or that which originally passed the Senate.

It is due, as my senior colleague has said, to diligent and skillful work on the part of our staffs. It is due most particularly to the understanding and generosity of the chairman of the Energy and Natural Resources Committee, the distinguished senior Senator from Idaho, whom I wish particularly to thank for facilitating the passage of perhaps the most significant single bill dealing with public lands and with their preservation during the course of this Congress.

I recommend to my colleagues the immediate passage of the conference report.

Mr. McCLURE. Mr. President, I too, would like to especially thank my colleagues from the State of Washington, and to again express what Senator JACKSON has expressed with respect to the help of the staff on both sides of the aisle.

The professional staff of the committee, on both the majority and minority side, have been very helpful. They are very competent people, and it has been a pleasure to work with them in working out the details of this matter.

Mr. MATSUNAGA. Mr. President, I rise in strong support of the pending measure. In so doing I wish to con-

gratulate the two Senators from the State of Washington. Their persuasive powers were not to be denied. I wish we had such persuasion in other matters, such as sugar. [Laughter.]

I would ask the same support which I gave the two Senators pertaining to this matter because, as you know, the matter comes up next week possibly—we hope it will.

Again I wish to congratulate the two Senators for the most effective manner in which they represented their State with reference to this bill.

Mr. McCLURE. I, of course, agree with my distinguished colleague from Hawaii on both matters, the matter of Mount St. Helens and sugar.

Mr. President, I move the adoption of the conference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. JACKSON. Mr. President, I move to reconsider the vote by which the conference was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

IMMIGRATION REFORM AND CONTROL ACT OF 1982

The Senate continued with its consideration of the bill.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, the distinguished Senator from Oklahoma has asked for me to yield him 1 minute, and I yield him 1 minute.

Mr. NICKLES. Mr. President, I thank my good friend, the Senator from Pennsylvania.

I wish to thank the chairman of the Immigration Subcommittee for the fine work he has done, and also the work of his staff and the minority staff.

UP AMENDMENT NO. 1237

(Purpose: To clarify how violations are counted when determining an employer's penalty, establishing separate and distinct units of corporate liability)

Mr. NICKLES. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Oklahoma (Mr. NICKLES) proposes an unprinted amendment numbered 1237.

Mr. NICKLES. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 85 after line 25 insert the following: "In counting the number of previous determinations of violations for purposes of

determining whether clause (i) or (ii) applies, determinations of more than one violation in the course of a single proceeding or adjudication shall be considered as a single determination. In the case of a person or entity composed of distinct, physically separate subdivisions each of which provides separately for its own hiring, recruiting, or referral for employment, each such subdivision shall be considered a separate person or entity if such hiring, recruiting, or referral for employment is not under the direct control of another subdivision or any entity or office exercising final management authority over such subdivisions.

Mr. NICKLES. Mr. President, the amendment that I offer is to modify the provisions of this legislation so that the enforcement of the new responsibility which employers will have to bear recognizes the realities of the workplace. This bill lays out, in section 274, the employer penalties for a first violation, a second and subsequent violations, and for a pattern or practice of violations. These penalties are sound and justified. However, the bill does not make clear how INS is to determine if a violation is multiple or singular, whether a violation should count as one or more than one. The House bill does specify how a violation is counted, and establishes separate and distinct units of corporate liability. My amendment would adopt this concept of the House bill.

S. 2222, in its present form, would place the responsibilities for compliance on single corporate entities when in fact, hiring decisions are most often made on a local basis. This is especially true for multidivision and multiplant location corporations who do not, as a matter of practice, clear all hirings through a corporate headquarters. Thus, if not modified, this bill will focus the liability and any resulting punishment for employment of illegal aliens on the aggregated corporate level and not where the hiring decisions are made. The effect would be akin to "punishing the father for the sins of his children."

It is my belief that, by adopting this amendment to create separate and distinct units of liability, we will be placing the onus of compliance directly on those people who do the hiring. Under the provisions of this amendment, it is these people who bear the burden of implementing the effort to control illegal immigration through this act who will be held responsible for failure to comply.

Furthermore, the amendment clarifies that all violations by an employer during one adjudication proceeding against that employer be treated as a single violation. Thus, if the employer failed to check several employees' documentation and INS brought action against the employer, that action would be considered one violation. Therefore, whether a proceeding involves 1, 5, or 20 employees, that proceeding is counted as one violation.

If accepted, this amendment would serve to avoid unnecessary prosecution. More importantly, it would preserve the intent of the act and its sanctions without forcing business to put in place costly centralized systems of preemployment screening and paperwork which could be better and less expensively handled at the plant level. It would also clarify how one counts violations.

Mr. President, I want to make perfectly clear that when I refer to "final management authority" in my amendment I am referring to final "hands on," direct, operational control over the day-to-day hiring and employment practices of the separate entity. I am not referring to general management control of a corporation over its subdivisions, which would exist in other cases.

Mr. President, it is my understanding that the House bill, H.R. 6514, includes similar language to my amendment. I also understand that the administration endorses this amendment. I believe that it is important that the Senate also recognize separate units of accountability and attribute violations on a disaggregated basis.

Mr. President, to summarize, this amendment by its adoption will recognize separate and distinct units of liability. We will be placing the onus of compliance directly on those people who do the hiring.

Under the provisions of this amendment it is the people who will bear the burden of implementing the effort to control the illegal immigration through this act and who will be held responsible for the failure to comply.

This amendment, Mr. President, has been cleared on both sides, and I ask for the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oklahoma.

The amendment (UP No. 1237) was agreed to.

Mr. NICKLES. I thank the Chair and I thank the Senator from Wyoming and the Senator from Pennsylvania.

The PRESIDING OFFICER (Mr. BOSCHWITZ). The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I commend my colleague, the distinguished Senator from Wyoming, Mr. SIMPSON, and Congressman MAZZOLI for their outstanding work in developing the Immigration Reform and Control Act, now being considered by the Senate.

In the life of our Nation, there has been no subject of greater importance than immigration because the immigrants have populated and created the great strength of the United States of America. In my own life, there has similarly been no subject of greater

importance than immigration because both of my parents were immigrants. My mother, Lillie Shanin Specter, emigrated to the United States at the age of 5 from Poland to St. Joseph, Mo., with her parents. My father, Harry Specter, emigrated to the United States at age 18 from a small village named Batchkurina, 170 miles south of Kiev in the Ukraine section of Russia. Last month, I had the opportunity to visit my father's birthplace and saw firsthand how much greater my opportunities were than his.

In enacting this legislation, the Congress, the courts, and the administrators of this statute should be ever mindful that the United States continues to be not only the greatest Nation on Earth but the Nation with the greatest opportunity on Earth. The essence of life is freedom, and the core of freedom is the opportunity for the individual to develop his greatest potential. Toward that end, this statute is intended to and should be interpreted to allow the maximum opportunity for as many people as possible to emigrate to the United States.

A fundamental principle for statutory construction is that remedial legislation should be liberally construed. Too often, administrators and courts lose sight of a statute's purpose behind labels such as "liberal" or "conservative" with the admonition against judicial lawmaking. This statute is designed to provide the maximum opportunity for immigrants, which is reasonably consistent with its provisions.

In case of a tie in baseball, the runner is safe. In horseshoes, points are awarded for being close. Under this statute, the immigrant prevails on less rigid standards. As my law school professor, Freiderich Kessler, used to ask: "Can you make the argument without blushing?" If the immigrant's argument can be made without blushing, the immigrant should prevail.

This interpretation benefits both the immigrant and the Nation. Our national strength lies in our diversity. The United States of America continues to be the international melting pot where the sky is the limit; and the foreign-born, as well as first or eighth generation Americans, can contribute to the Nation in lofty places such as the U.S. Senate.

Our American creed emphasizes the worth of each individual. Let the immigrant applicant become a part of our Nation if at all possible. We shall all be stronger with the implementation of that purpose which is embodied in this important legislation.

Mr. SIMPSON. Mr. President, I have learned to respect the thoughtful Senator from Pennsylvania. We serve together on two committees—Veterans' Affairs and the Judiciary. He is, indeed, correct. Our present adjudica-

tion systems do not work well. Case-loads are growing—backlogs are growing. Appeals are layered one on top of the other. Our asylum situation is absolutely out of control with 106,000 pending asylum actions. Layer upon layer, indeed.

Questions have been raised about the independence of the present adjudication, and I understand what the Senator is saying, all of those procedures being under the INS. The administration requested that the new Immigration Board and immigration judges remain within the Justice Department but independent of the Immigration Service. So we provide in S. 2222 that very independence while continuing the supervision of the Justice Department over the adjudication process.

But we have established a new system which is completely independent of, as I say, the INS. I know that the Senator has examined that carefully. We provide for the new U.S. Immigration Board with increased stature for the nine members appointed for 6 years.

Mr. SPECTER. I had made this statement available to the distinguished Senator from Wyoming earlier and I would like to seek his view as to the accuracy of my general statement of the legislative intent and his response on the general principles of statutory construction I have set forth. I think he is in general agreement that it is our intent that this statute be construed in a way to permit the administration, wherever it can be done, to favor the immigrant, consistent with the provisions of the statute.

Mr. SIMPSON. Indeed, that is the intent, and it is the intent of S. 2222.

If you would look at the entire statutory structure of the measure, you will find that the first thrust is family reunification—and immediate relatives and compassion. We would not have come this far with this measure if it lacked compassion for family reunification, as in the poignant story that you tell of your own relatives and your visit there.

In the adjudication process, it is easy for the administrators to get lost in their efforts and not consider the very human aspects that you portray. I can only tell the Senator that strict statutory construction in the immigration law field is going, I think, to be carefully monitored because of the humanitarian concerns.

Mr. SPECTER. That is precisely the point that I wish to make, and I think it would be useful, as this statute is interpreted by many in the administrative branch and also in the courts, that that expression of the statutory construction be heeded.

If I may now, I would like to proceed to the subject of Shailesh Patel. This matter has come to the attention of

the distinguished Senator from Wyoming, as well as his subcommittee, in terms of legislation which I had introduced for Mr. Patel, both as a general matter for all those who came under his category and legislation for him specifically.

Essentially, and succinctly stated, Mr. Patel came to this country from India in 1966 on a student's visa in order to study at Villanova University.

He graduated from Villanova in 1970 with a degree in mechanical engineering. Except for a short visit to India in 1971, when he married and returned to the United States with his wife Prem-lata, Shailesh Patel has lived here continuously for 16 years.

In May of 1972, Mr. Patel's student visa expired. He then placed a critical decision. He could, as millions of other immigrants have done, simply go underground, with little practical chance of being found, prosecuted, or deported. Instead, consistent with the scrupulous respect he has shown for our laws throughout his residence here, Mr. Patel sought a legal adjustment of his status. He was operating a service station in which he had invested over \$15,000, and he was understandably confident that he would gain permanent residence on the basis of the immigration law's "investor clause," which granted a preference to any immigrant who has invested \$10,000 or more in a job-creating U.S. business.

However, his application was rejected because his service station was leased rather than owned—an arbitrary interpretation of the "investor clause" that lacked precedent.

Shailesh Patel's ultimately unsuccessful appeal lasted until 1978. A reapplication for permanent residence was also rejected and a deportation order was issued in 1981. The Patels are in the United States with the status known as "extended voluntary departure."

I submit that Shailesh Patel has become a model citizen, a productive citizen, a patriotic and law-abiding citizen in every sense but a technically legal one.

Mr. Patel's stakes in this country begin with his family. He has three children—Aparna, Sheetal and Alpa. Each was born in the United States. Each is a U.S. citizen. Each attends school in the West Chester School District. Each has made good friends here. This is the only home they have known. If their parents are deported, these children—aged 9, 7, and 5—will either have to stay here without their parents or go to a country they have never seen, where they do not speak the language, where they could not possibly succeed in school, where they have no friends, and where they face serious psychological difficulties. It is a nightmarish situation in which these

children, and thousands of children of other immigrants, are the victims.

Mr. Patel has leased and operated a Sunoco service station in Berwyn since 1978. He employs three persons. He has invested about \$35,000 in a lease deposit and in new equipment. With the income from the station, he has purchased a fine home in West Goshen Township. Deportation would mean the loss of the service station and the home. Similar self-employment in India would be impossible.

The loss would not only be to the Patels, but to the entire community that has come to rely on his skill. Mr. Patel's special efforts and consideration for his customers have earned him their highest esteem, as evidenced by the approximately 300 letters, petitions, and telephone calls I have received in his behalf.

The Patels have no criminal record. They have paid all applicable local, State, and Federal taxes throughout their residence in the United States. They have neither sought nor required any State or Federal welfare assistance. They are a credit to their community and to this country.

Because of my concern for the Patels, and the uncounted immigrants who share their nightmarish battle with our immigration laws, I introduced S. 1789 to give amnesty to law-abiding immigrants who lived here for 10 years and had American-born children.

The processing of that bill is now made unnecessary by the prospective enactment of S. 2222.

What I wish to do at this time is to continue this colloquy with the distinguished Senator from Wyoming to establish the legislative history which I think is clear—but there is nothing like making it explicit in the legislative history—that the Patels do, in fact, fall within the provisions of S. 2222 and will be permitted to remain in the United States.

Mr. SIMPSON. Mr. President, I am well aware of the situation of the family referred to, the Patels. We have discussed that previously. It is a good question.

There are a number of groups of people in the United States whose members are known to the Immigration and Naturalization Service, but who do not fall into the statutory immigrant or nonimmigrant category.

The bill as drafted leaves it to the discretion of the Attorney General as to which of these groups should be considered in unlawful status and, therefore, included within the legalization program. We are informed by the General Counsel's office of the INS that persons on extended voluntary departure do fall within the scope of the legalization provisions.

Mr. SPECTER. I thank the distinguished Senator from Wyoming. In simple and direct terms, that means

that the Patels would be able to stay, does it not?

Mr. SIMPSON. That is correct, as I interpret it.

Mr. SPECTER. That interpretation is good enough for me, and I think has very considerable weight in the legislative history.

If I may now, I would like to refer to another specific case that I have heretofore discussed with the distinguished Senator from Wyoming, where the situation does fall within the provisions of the statute for preference, but, again, I think it is highly advisable to establish this legislative history.

This relates to two Venezuelan citizens about whom I have heretofore written to the Commissioner of Immigration and Naturalization, Mr. Nelson. These two Venezuelan citizens, who have two sons in the United States, have sought, so far unsuccessfully, to enter this country. But under S. 2222, they would have a preference under the provisions of section 202 (b)(1), entitled "Aliens of Exceptional Ability," which specifies that preference be given to qualified immigrants who, because of their exceptional ability in the sciences, arts, professions, or business, will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States.

These two Venezuelan citizens, who are husband and wife, are approximately 58 years of age. Dr. Ela Bacalao was born in Romania on June 19, 1924, and graduated with an M.D. degree in 1947 from the Venezuelan Central University, according to the information provided to me.

She received postgraduate training in the United States through New York University Postgraduate Medical School between 1949 and 1953, including in that period a 1-year course in basic sciences, a year as assistant resident in the gynecology department of Bellevue Hospital in New York, and a 6-month course in gynecological cytology at New York Hospital, Cornell Medical Center.

She then served as a research fellow for 2 years, 1962-64, in the gynecological pathology department of Columbia Presbyterian Medical Center, and, subsequently, for 10 years, 1965-75, was in charge of an important training program in Venezuela.

Since 1975 she has devoted her time to the private practice of medicine in gynecology in Venezuela.

Her husband, Dr. Pedro Bacalao, was born in Venezuela on March 7, 1923. He graduated with an M.D. degree in 1946 from the Venezuelan Central University, and then undertook postgraduate training in the United States through New York University Postgraduate Medical School between 1949 and 1953, including in that period a 1-year course in basic sciences, a 1-year residentsip in ortho-

pedic surgery in the New Jersey Orthopedic Hospital, and 6 months residency specializing in fractures in Orange County Memorial Hospital, both in New Jersey.

He was then a fellow in orthopedics for 2 years, 1962-64, in the Hospital for Special Surgery, Cornell Medical Center, New York City, and later belonged to the staff of the Orthopedic Department of the University Hospital, Venezuelan Central University, for 17 years, 1954-71.

Since 1971, he has devoted his full time to private practice of medicine in Caracas in a private hospital.

These very distinguished physicians, I think, do fall within the preference which is established by the section that I heretofore referred to. They are typical of the many people who will be accorded this preferential status which will, I believe, work to the benefit of the national economy, the cultural interests, or welfare of the United States, as those terms are delineated in the statute.

At this time, I would ask the distinguished Senator from Wyoming for his concurrence on that by way of legislative history on the subject which we have discussed heretofore.

Mr. President, my distinguished colleague is correct. Title II of S. 2222 does provide for preferential allocation of independent immigrant visas. In order to qualify for a preference, the applicant must have exceptional ability in the sciences, the arts, the professions, or business, needed skills, or substantial investments in the United States, or businesses in which the alien would be the principal manager and which would benefit the Nation's economy and create employment opportunity for not fewer than four workers.

Mr. SIMPSON. The family that the Senator refers to could apply for the first of these three preference groups. The three preferences are persons with exceptional ability in the sciences, arts, or professions. Among other persons, this section of the bill is to admit persons who would substantially benefit the economy, cultural interests, or welfare of the United States, or persons with exceptional medical ability could fall within this category. One of the members of this family could show such exceptional ability and if each of the others is otherwise qualified, they would be eligible for admission, subject, of course, to applicable numerical restrictions.

Mr. SPECTER. I thank the distinguished Senator from Wyoming for that response.

The final matter I wish to have a very brief colloquy on relates to the subject of the U.S. Immigration Board, which, under an earlier draft, was to be selected by the President with the advice and consent of the

Senate. I know that this provision was modified after extensive deliberation by the distinguished Senator from Wyoming so that the Board would be selected by the Attorney General.

I understand the considerations which led to that selection process and I had considered the possibility of introducing an amendment to return the statute to its original status. I think, however, that the objective can be achieved in large measure through colloquy by agreeing upon an explicit statement of statutory intent that this Board to be an independent judicial board, to function independently of control by the Attorney General.

The reality is that under the original provisions for the President to make the appointments, very likely they would be on the Attorney General's recommendation, and as the case, realistically viewed, in such matters, the advice and consent of the Senate is, very frequently, pro forma. So that, as a practical matter, we can have the same quality from the Board under the current provision if there is a clear-cut determination that the Board is independent from the Attorney General. That independence, I think, is absolutely necessary because of the requirement that there be a separation for investigative, prosecutorial, and judicial functions.

I know it is the intent of the committee that there be that type of independence, but I would just like to establish that positively for the record at this time.

Mr. SIMPSON. Mr. President, the administration has requested that the new Immigration Board and immigration judges remain within the Justice Department, but independent of the Immigration Service. Provisions of S. 2222 provide that very independence while continuing the supervision of the Justice Department over the adjudication process.

Current provisions of S. 2222 provide for a new U.S. Immigration Board with increased stature for the nine members appointed for 6-year terms by the Attorney General. It also provides for new immigration judges of increased stature and specially trained asylum adjudication judges who have training in international law and international affairs. Thus, the present provisions of the bill increase both the stature and the independence of the immigration adjudication system.

Immigration pressures on the United States are increasing. Asylum applications have grown to a number which would have been unbelievable a few years ago. We need a fair immigration adjudication system within the Justice Department. We have provided that with increased training, increased stature, and increased independence.

Mr. SPECTER. Mr. President, there is one final matter which I shall not pursue at this moment, but which I

have discussed with the distinguished Senator from Wyoming. That relates to the pattern and practice which activates the possibility of criminal prosecution with respect to the consideration of such three violations. I understand it is the desire of the Senator from Wyoming that this matter be reviewed with careful attention to the precise language, so I shall defer any further reference to that provision at this time. I shall await that colloquy and will consider it at a later time.

Mr. SIMPSON. I thank the Senator from Pennsylvania. I appreciate that very much.

Mr. SPECTER. I thank the distinguished Senator from Wyoming. I compliment him for a job well done. I thank him for the attention he has given to the matter I have presented this afternoon.

I wish to commend the Senator from Wyoming on retaining an unusual degree of composure, as he has been surrounded by some 99 Senators at various times during these proceedings, each one wishing to put his measure on the top of the list.

I yield the floor.

Mr. HAYAKAWA. Mr. President, the Senate has at last begun discussion and debate on a matter of tremendous importance to the future of our Nation. I believe that every Member of this body will agree that action must be taken to modernize our immigration laws, and I hope that an acceptable solution can be engineered from the core of the Immigration Reform and Control Act of 1982. S. 2222 is the product of many hours of hearings and deliberation. Senator SIMPSON deserves our highest praise for his efforts and commitment to address the very difficult issues surrounding our immigration policies.

However, I have some specific concerns with this bill as do a number of my colleagues. We have many amendments with which to deal, but I hope that by the end of our debate we can form a consensus and pass S. 2222.

We have, by some estimates, from 3 to 12 million illegal aliens in this country. Immigration, legal and illegal, from the Third World has never been higher. The forces behind this flow of humanity to our bountiful shores will only get stronger, and our ability to deal responsibly with the issue rests largely on our ability to understand the circumstances of and impacts related to the flow of foreigners into our Nation.

It is time to come to grips with our acceptance and treatment of refugees from around the globe. We must gain some sense of control over our 2,000-mile border with Mexico. This must be done with compassion and understanding for those less privileged than ourselves.

Unlike other political problems, there is no clear ideological division on

these issues. There is no sharp conservative or liberal division. Moreover, immigration is a highly emotional issue involving ethnic and racial agendas, attitudes, and fears which are not always clear or expressed. Immigration, in addition, involves emotions which are not easily compromised. It is no wonder then, that most experienced politicians see the immigration question as dangerous territory with serious short-run costs and no clear advantages. They do so despite the fact that public opinion polls repeatedly show that the overwhelming majority of Americans are greatly dissatisfied with our immigration policy and want the Government to take action to solve the problem.

We must be absolutely certain that we do not compound our current immigration law problems as we move to change the laws. I am particularly concerned about the manner in which we deal with the flow of temporary workers into and out of our Nation. The Judiciary Committee has recognized this phenomenon and included language to modify the H-2, temporary worker program that is currently under the purview of the Department of Labor. This H-2 program is too restrictive and too burdensome to function in the West. Therefore I will be offering an amendment to include a guest worker program that will meet not only the needs of employers but will treat these temporary immigrants with respect and give them the freedom that they deserve.

I shall offer several other amendments Mr. President which I will discuss at the appropriate time. This debate on the reform of our Nation's immigration laws is long overdue. Let us proceed, but never let us lose sight of our unique place in global affairs as a nation of immigrants. Thank you.

Mr. McCLURE. Mr. President, I take the floor at this time on a Friday afternoon, with the indulgence of my friends from Wyoming and California, for just a few moments because I think this is, perhaps, one of the most important pieces of legislation we shall have in many respects for the many people who live in this country who do employ labor, as well as for those who desire to come to this country, either on a temporary permit for study or for permanent residence.

As I review this legislation, and I think the Senator from Wyoming has done a remarkable job in moving it to this point—he is a remarkable person in having been willing to undertake this thankless task in the first place. My remarks, if they sound less than enthusiastic about the work product, are in full recognition of the difficulty of addressing the question.

Mr. President, many people in my State of Idaho must depend upon seasonal work. We are an agricultural

State. But we are a State in which agriculture is, for many, not a 12-months-a-year occupation. There are crops that are planted in the spring, tended in the summer, and harvested in the fall, with varying amounts of work required at those times but with reductions in the work force required.

In a State of that character, it is very, very difficult to find enough resident workers to accomplish all the work that must be done, I had hoped that when we got to the question of the workers who would come into this country, we would have a much better and more flexible and, I believe, more workable provision than that provided for the expansion of the work certification under this bill. We at one time did have a farm workers bill known as the bracero program. I know from my conversations with employers in my State and elsewhere that that worked from their standpoint. I know, with respect to the people from the countries of their origin, mostly in Mexico, that it worked well for them. I know from my contacts with the Ambassador from Mexico as well as other officials in Mexico, they wish it could be instituted again.

They do not like this illegal immigration any better than we do. They do not like the wetback problem any more than we do. They would like to have the opportunity to have men in Mexico who cannot find work in Mexico given the opportunity to provide the labor that is necessary in our country, but to return to their wives and their families in their own country at the end of that work period. That, I believe, is good for them and it is good for us.

I do not see that being made very workable under the provisions of this bill. I would have been much better satisfied if there were a more explicit provision for that kind of temporary worker program.

Mr. President, my most fundamental question with respect to this bill lies in the question of whether or not it is workable. I look at the enforcement mechanisms that are in this legislation and it seems to me there is only one change in enforcement. That is in employer sanctions.

Employer sanctions become the very centerpiece around which any improvement in the status quo must evolve. I do not think it is going to work, Mr. President. It is not going to work for two reasons.

First of all, all the employer has to do to satisfy the requirements of the bill is to look at documents to be presented by the work applicant and make a record that those documents were there, and he is free of any criminal sanction.

Those documents are and will be readily available to tens of thousands, hundreds of thousands, perhaps millions of people, and all the employer

has to do to avoid that problem is make sure that he has gone through the paperwork. That does not seem to me to be a workable provision. If it is not workable, we are deluding ourselves.

The other side of that is the employer problem, not just the paperwork burden but the hazard of making an error in the paperwork or preserving the paperwork in the event he is charged with criminal action; he has to be able then to defend himself. I know the argument is, and I have made it with a number of people with whom I have discussed this problem over the last several years, that you can be exposed to a civil penalty in which a bureaucrat, whoever it may be, in this case the Immigration and Naturalization Service, simply makes a charge against a person and you are subject to civil penalties. You must defend yourself against those civil penalties, you have no presumption of innocence. You do not have the value that comes from a jury trial, a jury of your peers in your own community. Being charged with a criminal penalty is really safer than the imposition of a civil penalty in which there are no safeguards.

But the employer does not want to be charged with a crime. The employer does not want to be exposed to the hazard of having to hire his own attorney and go into court and defend himself and have his reputation damaged as a result of a criminal charge brought against him simply because he did not keep the paperwork well enough. I am concerned about the employer problem, as well as the employee problem, as well as the lack of any really effective enforcement mechanism.

Finally, Mr. President, I am concerned with the civil rights questions that must necessarily spin out of the application of this statute. I say that from the standpoint, Mr. President, that I know that an employer is going to keep a bunch of forms on hand and he is going to fill out those forms when somebody applies for work, or at least he is going to do that when that person has brown skin. He is going to do that only when there is reason for him to believe that that person might have been a citizen of another country and not legally present in this country. There will become a pervasive pattern of discrimination between people who appear to have a right to be here and those who appear to be alien to the United States.

Growing out of that will inevitably come the demand for equal enforcement for all people regardless of race or origin or accent. Every employer across the land will then be required as a matter of fact to follow the paperwork burden that is being imposed ostensibly for a very small portion of our population but which will become uni-

versal in its application when you look at the question of whether or not there is civil rights discrimination between races.

Mr. President, while I recognize the dilemma that is faced by this country in trying to deal with this flood of immigration across unprotected, unguarded, and open borders, every person in this country must be willing, if they wish to stem illegal immigration, to have the Federal Government ask them who they are, where they are from, what right do they have to be here, applicable to every one of us at any time. We are not at that point, Mr. President. I do not think the American public has looked at the consequences of that, nor are they ready to confront that. And this bill does not do so.

Mr. President, we will not have ended this question with the passage of this legislation. We will simply have pushed it ahead of us a little while until we find out that this has not done it either.

Mr. SIMPSON addressed the Chair. The PRESIDING OFFICER. The Senator from Wyoming.

Mr. SIMPSON. I shall just take 2 minutes to respond and then defer to the Senator from California, who has been more than patient.

I am interested in the comments of Senator McCLEURE. I wish he could have been here this morning when we had a rather significant colloquy and debate with his colleague from Idaho about the seasonal worker issue. I think he was totally satisfied with what we are doing here. We finally have included the Secretary of Agriculture in the proceedings. He has never been there before.

I will be the first to say that upon passage of S. 2222, which I hope will take place Tuesday at 10 o'clock or soon thereafter, we will have made a very small step forward. It is not an end all, an all-seeing piece of legislation of any kind. It was never expected to be that. But it is the first step toward doing two things: The first and most important duty of a sovereign nation is to get control over its borders, and we start. The second message sent throughout the entire world will be, "Hey, to work in the United States of America, you have to have some kind of documentation," which every other developed country on Earth has. We seek nothing more mythical or mystical or curious than that.

When we say, however, that nothing there is workable, I would certainly challenge it. The transitional system which utilizes existing documents will only be in effect for 3 years. That pushes us to something. The President must develop that system.

Employer sanctions. Without employer sanctions, do not bother to pass S. 2222 because it will be just as

hollow as everything we have passed for the last 30 years that had anything to do with immigration reform.

I do share the views of the Senator from Idaho that indeed this is a small step, but I can assure the Senator that it is much, much better than doing absolutely nothing.

AMENDMENT NO. 1907

(Purpose: Providing for agricultural guest worker program)

Mr. HAYAKAWA addressed the Chair.

The PRESIDING OFFICER. The Senator from California.

Mr. HAYAKAWA. Mr. President, I wish to call up amendment No. 1907.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from California (Mr. HAYAKAWA) proposes an amendment numbered 1907.

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

AMENDMENT NO. 1907

Insert the following section after the existing section 211 and renumber the subsequent sections accordingly.

AGRICULTURAL GUEST WORKERS

SEC. 212. (a) Section 101(a)(15) (8 U.S.C. 1101(a)(15)), as amended by section 205(b) of this Act, is further amended by striking out "or" at the end of subparagraph (M), by striking out the period at the end of subparagraph (N) and inserting in lieu thereof "; or", and by adding at the end the following new subparagraph:

"(O) an alien having a residence in Mexico which he has no intention of abandoning who is a national of Mexico and is coming to the United States for a period not to exceed one hundred and eighty days in any calendar year to perform temporary services or labor."

(b) Section 214 (8 U.S.C. 1184) is amended by adding at the end the following new subsection:

"(c)(1)(A) The Attorney General, the Secretary of Agriculture, the Secretary of Labor, and the Secretary of State, shall by regulation establish a program (hereinafter in this subsection referred to as 'the program') for the admission into the United States of nonimmigrants described in section 101(a)(15)(O). The program shall include the imposition of monthly and annual numerical limitations, established under paragraph (2), on the issuance of nonimmigrant visas for such nonimmigrants. These visas shall be made available subject to such limitations to aliens described in section 101(a)(15)(O) in the chronological order in which the aliens submit applications for such visas.

"(B) Except as provided pursuant to paragraph (3)—

"(i) aliens shall not be required to obtain any petition from any prospective employer within the United States in order to obtain a nonimmigrant visa under the program, and

"(ii) such a nonimmigrant visa shall not limit the geographical area within which an alien may be employed.

"(2) The Attorney General shall establish monthly and annual numerical limitations on the issuance of nonimmigrant visas to aliens described in section 101(a)(15)(M), based on the number of seasonal or cyclical agricultural workers sought by employers in the United States. In establishing such numerical limitations, the Attorney General also shall consider historical employment needs in the United States, the availability of domestic workers, and the projected labor needs of prospective employers. The Attorney General shall consult with the Secretary of Agriculture, and the Secretary of Labor in establishing numerical limitation under this paragraph.

"(3) The Attorney General, on the request of the Secretary of Labor, and the Secretary of Agriculture, shall impose a restriction on the employment of aliens described in section 101(a)(15)(M) who are issued nonimmigrant visas under the program which prohibits the aliens from accepting employment provided by a specific employer or at a specific site if such employer, or employees of such employer or at such site, demonstrate to the Secretary of Labor, and the Secretary of Agriculture, that the aliens will displace available, qualified, and willing domestic workers. The Secretary of Labor, and the Secretary of Agriculture, shall establish a procedure for such employer and such employees to request, and the criteria for the imposition of, any restriction under this paragraph.

"(4) Any alien described in section 101(a)(15)(M) who obtains a nonimmigrant visa under the program and who violates—

"(A) any restriction with respect to the period of time for which the alien is allowed to remain in the United States, or

"(B) any restriction imposed under paragraph (3),

shall be ineligible to obtain a nonimmigrant visa under the program during the five-year period beginning on the date such violation occurs. Any alien who enters the United States unlawfully after the date the program becomes effective, is ineligible to obtain a nonimmigrant visa under the program during the ten-year period beginning on the date such entry occurred.

"(5)(A) The Secretary of State is authorized to take such steps as may be necessary in order to expend and establish consulates of the United States in Mexico in order to implement the program.

"(B) The Secretary of State shall cooperate with representatives of the Government of Mexico in order to insure that residents of Mexico are made aware of the nature and operation of the program.

"(C) The Secretary of Labor shall insure, to the extent practicable, that aliens who are nationals of Mexico and who reside in the United States are informed of the nature and operation of the program.

"(6) The Attorney General, the Secretary of Agriculture, and the Secretary of Labor shall report to Congress semi-annually regarding the program. Each such report shall include a statement of the number of nonimmigrant visas issued under the program, an evaluation of the effectiveness of the program, a description of any problems related to the enforcement of the program, and any recommendations for legislation relating to the program."

(c) Section 245(c) (8 U.S.C. 1255(c)) is amended—

(1) by striking out "or" before "(3)", and

(2) by inserting "; or (4) any alien admitted as a nonimmigrant under section 101(a)(15)(O)" before the period at the end.

(d) It is the sense of Congress that the President should negotiate with representatives of the Government of Mexico to establish an advisory commission to consult with and advise the Attorney General regarding the regulations to be promulgated, and the monthly and annual numerical limitations to be established, under the program established under section 214(e) of the Immigration and Nationality Act.

(e)(1) Section 202 of the Social Security Act (42 U.S.C. 402) is amended by adding at the end thereof the following new subsection:

"LUMP-SUM BENEFITS FOR CERTAIN NONIMMIGRANT MEXICAN WORKERS"

"(x)(1) Upon the return to Mexico of an alien described in section 101(a)(15)(O) of the Immigration and Nationality Act after the performance of temporary services or labor in the United States under the program established under section 214(e) of such Act, an amount equal to the sum of—

"(A) the taxes imposed under section 3101 of the Internal Revenue Code of 1954 on the income of such alien consisting of remuneration for the performance of such services or labor, and

"(B) the excise taxes imposed under section 3111 of such Code on the employer or employers of such alien with respect to having such alien in their employ pursuant to such program,

shall be paid in a lump sum to such alien if it is demonstrated to the satisfaction of the Attorney General either in an application for such benefit filed after his return by certification under paragraph (3), that he has not violated any restriction referred to in section 214(e)(4) of the Immigration and Nationality Act and has no intention of abandoning his residence in Mexico.

"(2) An application by an alien for a benefit under this subsection may be made only at the consulate of the United States in Mexico which is nearest the residence in Mexico of such alien, and payment of such benefit may be made to such alien only at such consulate.

"(3) The Secretary of State and the Secretary of the Treasury shall each, upon written request of the Attorney General, make certification to the Attorney General with respect to any matter, determinable for the Attorney General by the Secretary of State or the Secretary of the Treasury, as the case may be, under this subsection, which the Attorney General finds necessary in administering this subsection."

(2) Section 210(b) of such Act (42 U.S.C. 410(b)) is amended—

(A) in paragraph (19), by striking out "or,"

(B) in paragraph (20), by striking out "individuals," and inserting in lieu thereof "individuals; or"; and

(C) by adding at the end thereof the following new paragraph:

"(21) Temporary service or labor performed by an alien described in section 101(a)(15)(O) of the Immigration and Nationality Act in the United States under the program established under section 214(e) of such Act."

Mr. SIMPSON. Will the Senator yield?

Mr. HAYAKAWA. Yes, I yield.

Mr. SIMPSON. I ask unanimous consent that there be a time agreement of 30 minutes equally divided on this amendment.

The PRESIDING OFFICER. Is there objection?

Mr. HAYAKAWA. No objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HAYAKAWA. I would like to inform the distinguished Senator from Wyoming I do not intend to take up anything like 30 minutes on either side of this discussion. I just want to introduce the amendment and we shall vote on it in due time.

I congratulate the distinguished Senator from Wyoming, first of all, for his conscientious study of this entire problem of immigration, and despite the fact that he and I disagree on some aspects of it, I want to congratulate him on the thoroughness and the conscientiousness with which he has covered the subject, trying to cover all bases and deal with every problem that is involved.

My amendment, No. 1907, will institute a guest worker program over and above the H-2 program which is included in the legislation that the distinguished Senator from Wyoming has introduced. I do not believe that the H-2 program will provide the necessary agricultural labor that we so badly need in California and the Western States. This agriculture program I submit without hesitation because it has been discussed in depth with former President Lopez Portillo of Mexico. It has been discussed in depth with Mexican citizens in California and with California farmers. It has also been discussed with former Ambassador Hugo Margain of Mexico, here in Washington, who is now back in Mexico City.

There is an enormous transient population of agricultural workers needed to harvest the crops of America, and we need something more flexible and more numerous than the guest worker program that is provided by the H-2 program.

My amendment proposes that the Attorney General should establish numerical limits on the issuance of non-migrant visas which would allow workers in the United States for up to 180 days—roughly 6 months—per year. At the end of that time, they would return to Mexico—as the distinguished Senator from Idaho says, back to their families, back to their villages.

If they stay within the law, they will go back. Then, the following year, they will be entitled to come to the United States again, to work for another 6 months, and go back again; and they can do that year after year, as long as they wish, because we need them.

California, for example, has extremely labor-intensive crops in which the work is hard, the pay is relatively low, and in which we are unable to get American workers to work.

Let me tell a very simple story: A farmer in Fresno needed 700 harvest-

ers for his crop. He advertised for them on radio. He stood in shopping centers and handed out flyers. He put ads in newspapers, trying to get 700 workers. He did not get them. He got less than 60. As I recall, of those 60, 50 were illegal aliens, and the 10 who were not resigned after the second day.

Meanwhile, there were 25,000 people in that county on food stamps and on welfare. Confronted with the alternative of being on welfare or working in the hot sun gathering crops, doing heavy physical labor, they decided to stay on welfare.

That is why we need these transient workers that Mexico provides us so generously.

Therefore, Mr. President, this guest worker program is a supplement to and not in competition with the H-2 program that the distinguished Senator from Wyoming presents—a program which has its uses. I submit this amendment to create such a guest worker program.

Mr. President, this amendment will establish an agricultural guest worker program to meet the needs of western farmers who will have their current work force drastically reduced with the institution of employer sanctions. This amendment is designed to complement the H-2, temporary worker program which is contained in S. 2222. The Judiciary Committee approved the H-2 program with the clear recognition that a need exists in our Nation for temporary alien workers, workers who will take jobs which domestic workers refuse.

I propose this amendment for two reasons Mr. President: First, we must recognize the importance of alien workers to western agriculture. Over 50 percent of this Nation's fruit and vegetables come from one State—California. These crops are highly labor intensive, especially during the critical harvest season. If we exclude alien workers from the fields, we will be denying farmers the majority of their work force. This will drive farmers out of business, drive consumer prices up, and increase our reliance on Mexico as a supplier of fresh fruits and vegetables. Second, I feel very strongly that if we do not legalize, regularize, and direct the flow of illegal aliens, we will simply be compounding the problems we face today. We will drive the illegals further underground while the incentives which push them north, and the regional demand for their services will remain. I say let this reform of our immigration laws be successful. Let us be realistic, let us be humanitarian, let us consider and accept this guest worker proposal.

My amendment calls for the Attorney General and the Secretaries of Labor and Agriculture to establish regulations for the admission of temporary workers. The Attorney General

would establish numerical limits on the issuance of nonimmigrant visas, which would allow workers into the United States for up to 180 days per year. As opposed to the "Bracero-like" approach of the H-2 program, workers would not be bound to work for a specific employer. However, guest workers would be prohibited from specific worksites if employees or employers demonstrate that aliens will displace available, qualified, and willing domestic workers. As an inducement for the workers to return home, my amendment provides for the return to the worker of the social security taxes they have paid and the contributions their employers have made in their behalf. The money would be returned in the country of origin and only if the worker has complied with the requirements of the program.

Some may ask: Why should we consider a special program to meet the needs of western farmers, especially in these times of high unemployment? The answer is simple. Western agriculture has legitimately grown to rely on the services of illegal aliens, in fact I would estimate that in most labor-intensive crops the work force is 50 to 80 percent illegal alien. Farmers have been unable to attract and retain domestic workers to do field work. The work is hard and the pay relatively low, especially when compared to the income potential that one can realize through welfare, food stamps, and so forth. Further, the demand for workers is highly variable and seasonal in nature, the job tenure is brief, and the potential for advancement is minimal.

The Immigration Reform and Control Act of 1982 is based on the assumption that the legalization provision and the H-2 temporary worker program will satisfy those employers who currently rely on illegal aliens to make up their work force. For the most part, legalization will be of little benefit to the illegals currently in agriculture, the number of whom is less than 8 percent of the total illegal alien population in the country. Most illegal aliens in the service industries and in manufacturing live in urban residential areas. Illegal aliens in agriculture are nomadic. They come into this country for a few months when work is plentiful and return home in the fall to be with their families. They normally have no desire to stay in the United States, and they could not meet the continuous residency requirement if they wanted to.

Let us look at the H-2 program. It has been available for several years but has been of little benefit to agricultural employers. It has brought in only about 13,000 workers a year, primarily for the sugarcane fields of Florida and the apple orchards of New York; 13,000 workers a year. During these years the U.S. Department of

Agriculture has estimated that 300,000 to 500,000 of the 5.1 million workers in agriculture were illegal aliens. The only reason the H-2 program has worked on the east coast is that their crops have allowed them to provide continuous employment for 8 to 11 months. Agriculture in the West is different, with farmers demanding large numbers of workers for short periods of time. For example, the raisin harvest in Fresno County, Calif., requires about a hundred thousand workers for a 3- to 4-week period. There is no way the local labor market can supply this quantity of workers.

Farmworkers in the West must have the freedom to move from employer to employer, from crop to crop, from county to county. However, H-2 workers are contracted to work with a single employer—or association of employers—and transferring workers between employers is difficult if not impossible. This lack of freedom for the workers is not only impractical, but is abusive of their basic rights and dignity. Another complication is the difficulty in predicting the actual dates of need and the number of workers required because of weather and market variability. Given the short harvest season for many of our highly perishable fruits and vegetables, the requirements that farmers provide transportation from the country of origin and housing are virtually impossible to justify.

The push factors which compel Mexican workers northward cannot be legislated away. S. 2222 is based on the faulty assumption that by taking away the opportunity to work, the flow of illegals will be stopped. We must recognize that there are major structural problems with Mexican economy. Currently 45 to 55 percent of the Mexican work force is unemployed or underemployed and the recent 50-percent devaluation of the peso makes dollar earnings more attractive than ever. Today, the population of Mexico is over 70 million and will double by the year 2000. The working age population is growing at 600,000 to 800,000 a year; and, at best, only about 450,000 new jobs are likely to be created each year. Given this situation, Mexican nationals will have no choice but to come to the United States in search of jobs, jobs which will pay them up to 10 times the amount they would earn for the same work in Mexico.

It is often argued that alien workers deprive domestic workers of the opportunity to work. In theory this may be correct, but in practice it is far from the truth. A farmer from Arizona that has attempted for several years to utilize the H-2 program commented at a hearing here in Washington last winter:

We have tested the availability of U.S. workers over the past 3 years. Our job offer has always exceeded the considerable re-

quirements of the Department of Labor and we have attracted thousands of domestic workers to our 200 jobs. Yet, 80 percent of our openings have consistently remained to be filled by foreign workers. U.S. workers have rarely worked more than a few days out of our 9-month season (90 percent of the 1,100 U.S. workers we hired last year worked 10 days or less). We do not understand the complexities of this phenomenon. There is no simple answer. Our wages are good. Our workplace is governed by a union contract with extensive benefits. We have been monitored on a daily basis by government officials. The fact remains: we will need foreign workers, for the foreseeable future, to harvest our crops.

I am convinced that we will rely on foreign workers as long as we have such generous relief programs for those people who would most likely take the low-paying, low-status jobs that aliens most often take. The incentives to not work are simply too great and the alternative, hard work, is undesirable.

Mr. President, this amendment provides an excellent opportunity for the Senate to deal realistically with an issue of tremendous importance, not only to the farmers of the Western States, but to consumers, and the Mexican nationals who, for years, have been migrating into this country for a short period of time to earn a few American dollars to raise their standard of living. My amendment provides the necessary flexibility to employers and employees alike. It guarantees that domestic workers will not be displaced. And most significantly it is a program that will operate with a minimum amount of Government involvement. It will function in a free and simple manner thus guaranteeing that alien workers will indeed participate and not opt to remain as illegal aliens. The workers will receive the protections from employer abuses to which their illegal status now subjects them.

I urge my colleagues to consider this proposal with care.

Mr. President, I also wish to bring up amendment No. 1908.

The PRESIDING OFFICER. The Senator's next amendment will be out of order until this amendment is disposed of.

Mr. SIMPSON. Mr. President, my remarks will be 2 or 3 minutes in length, in response to each amendment. I will respond to that amendment now.

Mr. HAYAKAWA. By all means.

Mr. SIMPSON. Mr. President, the committee, after very extensive hearings and research concerning guest worker programs in this country and in other countries, came to the position that it is not in the national interest for the United States to become dependent upon foreign workers.

We were stunned at the situation that has occurred in Germany and France with regard to temporary or guest workers—the "Gastarbeiter"

program in Germany. In those two countries, they are at a position now where they are offering a financial inducement to those people to return to their home country. They are offering cash bonuses.

We found nowhere in the developed countries of the world where the guest worker program was an attractive solution.

I realize that the Senator is essentially speaking of agriculture. Nevertheless, it has not worked in other countries. Therefore, we decided to reject the guest worker program proposals, both in the Select Commission and in the subcommittee and full committee. In doing that, we realized that employers have been dependent upon an illegal flow of workers, and we understand that.

So, in this bill we provide transitional assistance to U.S. employers through the streamlining of the temporary worker program already in our laws, which is the existing H-2 program.

Besides the hearing and consultations, the Members and staff worked many, many hours—more than any other area of this, I think—with representatives of agricultural growers.

Not only did we have growers, but also, we had the definitions of produce within the growers' ranks: berries, strawberries, onions, citrus, broccoli. We got down to some pretty thin slices of the vegetable kingdom with regard to whom we heard from as agricultural growers: labor unions, including activist labor; even uncertified unions; migrant worker groups; the Department of Labor; the Department of Agriculture, and others. This was done to put together the H-2 provisions in the bill, which is a delicate balance to protect the U.S. worker and to provide sufficient workers to meet U.S. agricultural labor needs.

In our experience, the bracero programs—and Senator SYMMS and I discussed that this morning—and the European experience are bringing more problems than benefits often associated with such foreign worker programs.

The agricultural employers have indicated a preference for the H-2 approach in which the foreign workers are admitted for specific jobs because it assures them, under this bill, that they will get those workers. This would not necessarily be so if the foreign workers were allowed to go from employer to employer or from State to State, as is provided in this amendment.

The admission of workers for specific jobs and employers provides better protection for U.S. labor, assuring that foreign workers will work only in jobs where it has been certified that no American workers are available.

Furthermore, the H-2 system provides better control. The INS will

know where each worker is located and can better assure their return home when the visa has expired.

Although I have discussed those reform plans with Mexican leaders in my time in Mexico, they never indicated to me, oddly enough, that any massive guest worker program in the United States would be desirable or beneficial to the Mexican Government.

Finally, the European experience, as I say, indicates that these large programs lead eventually to nothing but increased pressures for both legal and illegal immigration.

Mr. SYMMS. Mr. President, I should like to make a point.

I hope I did not give the Senator from Wyoming the mistaken impression this morning that I prefer the H-2 program over the guest worker program. I thought I heard him say that when I was in my office, and I bolted out of my chair.

Mr. SIMPSON. No, Mr. President, that was never the intent. I talked about how I enjoyed the debate as we discussed the temporary worker, the H-2 worker program. I found that a very fruitful debate.

No, the Senator from Idaho mentioned the guest worker program.

Mr. SYMMS. I might speculate that one of the reasons why the Mexican Government has not talked about the need for the guest worker program is that they have one working now. It is not against the law for a Mexican national to go to the United States, get a job, earn money, and go back home. They do that now in California and the Pacific Northwest. That is exactly what is happening now.

I think that what Senator HAYAKAWA is trying to do is to have a control on who is coming in and who is not.

What I am fearful of in this legislation is that, with the amnesty that will be granted to everyone, people will just simply go out and start providing historical work records for people, and they will be giving amnesty to people and we will still have the same thing going on that is going on now.

We have a guest worker program that works in California, Oregon, Idaho, Washington State, Nevada, in that part where there is some intensive hand-labor agriculture. But it is being done and it is being done illegally, so, of course, the Mexican Government likes what happens now. It is the U.S. Government that is complaining about it.

Mr. President, whose time am I on? I may be taking the chairman's time.

The PRESIDING OFFICER. The time of the Senator from Wyoming.

Mr. SYMMS. If it is all right, does the Senator mind yielding further?

Mr. SIMPSON. Mr. President, how much time remains on the amendment?

The PRESIDING OFFICER. Eight minutes.

Mr. SYMMS. Maybe I could get 2 minutes from the Senator.

Mr. SIMPSON. I will be glad to yield. I only wished to check how much time was remaining.

The PRESIDING OFFICER. Seven minutes and fifty-four seconds.

Mr. SIMPSON. I beg the Chair's pardon?

The PRESIDING OFFICER. Seven minutes and forty-nine seconds.

Mr. SYMMS. I will talk rather fast.

Mr. SIMPSON. I yield 2 minutes and 49 seconds to the Senator.

Mr. SYMMS. I thank the Senator. That is very generous of him in view of the fact that I support the Hayakawa amendment. I think it shows that my friend from Wyoming certainly is a gentleman on this.

On the question that we are talking about I talked with Mr. Tom Dungan yesterday morning, of the Washington Labor Association, which is very close to where my home is. He told me that last week when they wrote their payroll checks it was somewhere around 1,100 checks, average earnings per worker \$154 per worker, and it was not a particularly good week.

He said sometimes they run up much higher than that. But this particular week it was \$154 per worker, and he said a great number of these people are on public assistance programs, food stamps, and so forth, mostly the food stamp program because he said they go in with a family of four or five or six and show the check of \$154 and then they can qualify. So the person who disburses those welfare benefits does not realize that there were five other members of the family who received \$154 checks also. So, in fact, the family may be making from \$3,000 to \$5,000 a month. Yet they go in and show that they only made \$154 a week, which would be a great deal less than that.

Under this legislation, we are going to legitimize most of the people who have been illegal in the country so then they will become eligible for these programs also.

If we can have the guest worker program where the farmer could in fact hire people who come in with a card who are guest workers, they would not be eligible for those programs and we could keep it all up above board and know where we are going and know what we have, and then we could have a legitimate case for these sanctions to get employers to handle only those.

Back to the H-2 programs, as I see it, what happens if the farmer orders, say, 200 cherry pickers in the Stockton area in the H-2 program and the day before cherry picking starts it starts raining and it ruins the cherries? Who is liable? Who has to pay the workers then if the Labor Department actually provided the workers?

Mr. SIMPSON. Mr. President, we used to have a phrase for that in the

law business called *force majeure*. It was a dazzling phrase. It meant acts of God. If the crop were ruined by something that was outside the control of the parties, then certainly there is no liability on the employer in that situation.

Mr. SYMMS. What if the cannery goes on strike?

Mr. SIMPSON. The same thing. Those are the things that are written.

Mr. SYMMS. Something beyond the control of the farmer?

Mr. SIMPSON. Beyond the control of the parties.

Mr. SYMMS. So he would not be liable.

I had a farmer friend of mine in Idaho tell me that a year ago in the summer, he put a request in at the Labor Department Employment Service for 120 workers for a Monday morning, and he got 2. Then he was able to hire a crew through different people and he came to find out some of those workers in the crew, who all filled out the forms that said their date of birth, that they are citizens of the United States, a form similar to this that they fill out, turned out when Immigration came to be illegal aliens.

The PRESIDING OFFICER. The time allotted to the Senator from Idaho has expired.

Mr. SYMMS. Mr. President, will the Senator from California yield me 2 minutes?

Mr. HAYAKAWA. I am glad to yield 2 minutes to the Senator.

Mr. SYMMS. Then he said if we had a program where the workers we were hiring had a card that they were legal then it would be easy to administer by the Government.

That is why I think the Senator's amendment is proper to this legislation because under the H-2 program I believe that the Labor Department will have a very difficult time in actually coming around and delivering these workers and actually getting them there for these perishable crops by the very nature of it. I think that it is going to be a complicated part.

The point I wish to make to my friend from Wyoming is if we are going to have the employers enforce the law then there has to be an adequate supply of labor for the farmer to hire. Otherwise, people are going to walk in and they are going to say, "Sure, I am a U.S. citizen. Here is my social security card. Here is my driver's license. Here is my ID card."

We will go right on down the road we are going down now.

I said earlier the reality of it is that in the western part of the United States a very high percentage of perishable commodities are being harvested with Mexican nationals at the present time, and I am very concerned that if we do not have some arrange-

ment in this bill—how many workers does the Senator have in this amendment?

Mr. HAYAKAWA. That has to be determined by the Attorney General.

Mr. SYMMS. I told the Attorney General earlier this year at a breakfast meeting that he should have about a million as a number that would be somewhere in the right category, and it did not go over with a great deal of enthusiasm at the Attorney General's office, but I think it is a realistic number.

When one starts looking at what is happening in the whole Columbia basin, the 100-million-bushel crop of apples picked in Yakima, I invite colleagues to go out and inspect. I also say if one happens to go to a good restaurant in Washington, D.C., tonight, go back into the kitchen where the people are washing dishes and doing the work and start yelling, "Immigration," and see what happens. People will start running through the doors to get out.

There are literally thousands upon thousands of jobs in this country that are being done by illegal immigrants into the United States, and there should be some kind of program we will be able to get where we can get it up aboveboard.

I praise the Senator for offering the amendment. I certainly intend to support it. I hope he will get a record vote on this amendment so that some of us, at least from the Western States, who are very aware of the problem, can record ourselves in favor of this program.

Mr. HAYAKAWA. I thank the distinguished Senator from Idaho.

Mr. SIMPSON. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Wyoming has 4 minutes and 8 seconds remaining, and the Senator from California has 6 minutes and 15 seconds remaining.

Mr. SIMPSON. Mr. President, I shall not expend the remainder of that time, and I will yield back after I finish these remarks.

I hope the Senator from Idaho will realize that the sponsor of this bill is a western Senator. I am right across his border, and this has been one of the most extraordinary parts of developing workable immigration reform—to meet the needs of the West and still realize this tremendous national obligation.

In fact, where I was impaled on the horns of the largest dilemma throughout the entire effort was when finally I came to this tough, rock-hard decision. That is that while I am trying to draft a bill for 230 million Americans who are already here, what am I going to do with 1,000 needed shepherders for the West? Believe it or not, we reached that accommodation in this

bill. But those are the kinds of things that we have addressed in great detail.

Mr. SYMMS. On that point I would like to compliment the Senator, and I will tell him that the sheep industry in Idaho—and I apologize for my comment, I did not mean in any way to infer that my good friend is not from a Western State. He is, he is from Wyoming—the sheep industry and the people in Idaho are happy with this portion of the bill where you have taken this under consideration, and they think it will work, and I want to compliment the Senator for that.

I also want to tell the Senator, and I said this earlier today or I believe it was yesterday, that I think the Senator has worked long and hard on this, and I certainly would not have wanted to have the job.

I come from a background in a produce industry where I have seen this literally and lived with it going on for the last 20-some years, and I have seen what actually has happened, and after you have had some experience in this, that is why I make the comment about the restaurants.

I invite any of my colleagues to just go into a good Washington restaurant, Washington, D.C., in Cleveland, St. Paul, or somewhere, and take a look in the kitchen.

You sense there are people in there who might possibly not be U.S. citizens, and you pull out your Senate badge and flash it like a law enforcement officer and say "Immigration," and people will start running for the doors.

It is incredible how many people are in the country, and that is why I think the Senator from California is talking about, we are talking about literally, thousands of farmworkers who have become a part of our society now, and I do not see why we could not just get a card out there and then we would have them under control, and they would not be eligible for food stamps and all the transfer payment programs.

There is a lot of merit in this, and I think it would make the bill more workable, get a card system or a guest workers system, because there is a guest worker system now working illegally, and it is not good the way it is. I am the first to admit that, but it is a fact, it is a reality.

Mr. SIMPSON. Mr. President, I can certainly add to what the Senator says about the restaurant personnel. The reason for the emaciated condition of the sponsor is because they know who I am downtown now. [Laughter.] If they are not fleeing from the kitchen, they are out front asking me for a change of status. So it has been a harrowing year and a half, I can assure you.

Mr. President, just one other item that needs to be said and that is in the legalization program adopted through

the Grassley amendment, it is important to note that for 3 years there will be no benefits for the new permanent residents aliens I supported fully this amendment. Also, for 3 years there will be no benefits for temporary resident aliens. The block grant will take care of emergency needs, and we think that solves that one problem as you discuss those welfare abuses which are certainly real.

For the first time, may I point out to my colleagues, we have the Secretary of Agriculture in the consultation process, and that has never happened under any program ever before.

The PRESIDING OFFICER (Mr. GRASSLEY). The Senator's time has expired. Who yields time? The Senator from California.

Mr. HAYAKAWA. Mr. President, I am ready to go to another amendment.

The PRESIDING OFFICER. The Senator from California has 6 minutes, 3 seconds left.

Mr. HAYAKAWA. I am happy to yield to the Senator from Minnesota.

Mr. BOSCHWITZ. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. HAYAKAWA. I yield.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent to have printed in the RECORD an article by Senator SIMPSON that appeared in the New York Times on August 10.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Aug. 10, 1982]

ILLEGAL ALIENS

(By Alan K. Simpson)

WASHINGTON.—All objective, comprehensive studies of the problem of illegal immigration, including those by the Ford, Carter and Reagan Administrations, and by the Select Commission on Immigration and Refugee Policy, have concluded that adequate enforcement of immigration laws cannot be achieved without greatly reducing the incentive represented by the temptation of employment in the United States.

For this reason, section 101 of the proposed Immigration Reform and Control Act of 1982 is the single provision most urgently needed to assist in reducing illegal immigration. This section would make unlawful the knowing hiring of illegal aliens and would provide a system that enables employers to verify that job applicants are American citizens or legal aliens. Section 101 and the bill's other provisions are strongly supported by the Administration, by an imposing array of newspapers and special-interest groups and by the Senate Judiciary Committee.

Yet, the United States Chamber of Commerce has spiritedly lobbied against this provision. The most startling feature of its opposition is that it appears to be based solely on a selfish perception of employers' short-term, purely economic interest: profitability. That is not the right perspective.

To properly assess the economic impact of illegal immigration, we must consider long-term effects. Moreover, even a totally selfish person does not act solely to achieve economic goals; adverse noneconomic impacts can often make an economic benefit unpalatable. Thus, consideration of the effects of illegal immigration on our population, of potential social and political changes and of historical immigration objectives must be part of the decision-making process.

The Chamber argues that any secure verification system would be "too expensive." As evidence, it has published some extraordinarily high cost estimates. More objective sources present less-alarming figures: \$100 million to \$300 million per year. Certainly, these are not small numbers, but inadequate enforcement also involves major costs. The number of illegal aliens in this country in 1978 has been estimated at 3.5 million to six million. Even if those estimates are used and it is assumed that only 2 percent hold jobs that unemployed Americans would take, then the cost in public assistance and unemployment benefits to the jobless is \$490 million to \$840 million. The actual number of people displaced from jobs is probably substantially higher. The number of illegal aliens is estimated to have increased by 500,000 per year. This calculation does not even consider the other, less easily quantifiable costs of illegal immigration.

The Chamber states that the verification procedure would be "too burdensome" for employers. Actually, the procedure would be optional for those with three or fewer employees. Larger employers would be required simply to examine in good faith a United States passport or two other documents—say, a driver's license, birth certificate, Social Security card—complete and sign a short form and have that form signed by the employee. The employer would not be responsible for the authenticity of the documents, only for their reasonably appearing genuine. Without this system, the two key goals of section 101 could not both be achieved: screening illegal aliens out of the workforce and avoiding discrimination against citizens and legal aliens who look or sound "foreign" to employers.

The most disappointing part of the Chamber's argument is the assertion that individuals, including businessmen, have no obligation to assist the Government in enforcing our laws. That view is certainly not consistent with our tradition of responsible citizenship and limited government.

Does the Chamber feel that businesses' legal obligation to withhold income and Social Security taxes is also unreasonable? There is no practical alternative. Moreover, a legitimate businessman ought not knowingly hire illegal aliens and thereby provide the major incentive for violating one of the most fundamental laws of a sovereign nation—the one controlling its borders.

Fortunately, most businessmen do not share the Chamber's view. Other business groups support the bill—the National Association of Manufacturers, for example. Many local Chambers of Commerce, including those in Texas and California, where there are great numbers of illegal immigrants, have acknowledged the need for such reform.

The sponsors are attempting to protect America from uncontrolled immigration for the sake of their children and grandchildren, while keeping at bay the specter of meanness, nativism and racism. Fortunately, a sizable majority of Americans are willing to hark to an appeal to rise above any

special interest they may have in order to obtain workable immigration reform. It is puzzling why the United States Chamber of Commerce is not.

AGRICULTURAL GUEST WORKER PROGRAM

Mr. SCHMITT. Mr. President, I support the amendment offered by the Senator from California (Mr. HAYAKAWA). New Mexico shares a 180-mile border with Mexico, so naturally it has been one of my priorities to find a practical and fair solution to the problems of undocumented workers from Mexico. The pending amendment is a key to resolving those problems. It simply recognizes that a significant number of Mexicans supplement their income by working temporarily in the United States and that our Nation has a continuing need for short-term labor.

I commend the manager of the bill, Senator SIMPSON, for addressing this so-called push-pull phenomenon in those provisions of the bill that streamline the H-2 program. Unfortunately, the need for temporary labor in agriculture is so great that the agencies mandated to implement the H-2 program will be inundated with so many applications for H-2 workers that they will be hard pressed to process them before the crops rot on the vine. We can avoid this potential nightmare by adopting the Hayakawa amendment.

Mr. President, the pending amendment is very similar to a bill that I have introduced in each of the last two Congresses. During this 4-year period, I have spent considerable time thinking about this issue, as Senator HAYAKAWA has, and this amendment and my bill reflect a shared belief that the American economy is greatly benefited by the presence of temporary workers from Mexico. There is no reason to believe that our economy could not benefit in the same way if we shift the status of these workers from illegal to legal. Adopting this amendment would do just that.

We cannot forget that employing Mexican workers in the United States contributes to the Mexican economy and also diffuses political and social problems caused by widespread Mexican unemployment. In no other part of the world does a developing nation with such severe economic problems border such a technologically and economically advanced nation. The Mexican economy simply could not absorb the Mexican workers who are already in the United States if we suddenly stop the flow of labor. Given the strategic and economic importance of a strong and stable Mexico, our long-term policy toward our neighbor must be geared toward improving its economic development. Our Nation has a historical commitment to assist our neighbor. Now is the time to review that commitment.

In the short term, a temporary agricultural guest worker program would stabilize the situation and reduce the pressure which drives so many illegal aliens north to look for jobs.

Mr. President, I urge my colleagues to consider carefully the implications of not adopting this amendment. It will not encourage more illegal immigration as some have suggested, but will provide workers for an industry that has always had problems recruiting sufficient numbers of Americans.

Mr. President, I ask that an article which details my views on Mexican migration and which recently was published in the *Immigration and Nationality Law Review* be inserted in the RECORD.

The material follows:

LOS COMPANEROS: A RATIONAL MEXICAN MIGRATION POLICY

INTRODUCTION

The problem of illegal migrant labor from Mexico is a problem with an obvious solution. The proposals advanced by the previous Administration for vastly increased border restrictions are unaffordable; unworkable proposals for employer sanctions are inherently discriminatory and proposals for some vague amnesty are worse than nothing. Clearly the designers of these proposals were completely unfamiliar with the facts of Mexican worker migration.

Unfortunately, some Americans see the Mexican migrant as a threat to the American worker, the American economy and the American way of life. According to their view, Mexican aliens are entering the country in ever-increasing numbers; thus, taking jobs from American workers, draining the welfare system and disrupting American life by refusing to adopt American ways. Accordingly we should respond to this threat by sealing the border and punishing employers who hire such illegal aliens.

This view does not square with the new facts developed by modern research.¹ According to all recent factual studies, Mexican migrant workers add productivity and jobs to the American economy, work largely in low-skilled jobs only they will take and pay far more in taxes than they receive in social services. Having no real desire to become Americans, they do not adopt American ways because they think of themselves as Mexicans. The vast majority return home regularly and permanently after earning enough money to meet the economic crisis which brought them North.

It is also well-established that many American employers need low-skilled seasonal labor. They meet this need by hiring illegal aliens, most of whom are Mexican migrants. Many marginal small businesses and farms are kept from unnecessary bankruptcy by the availability of these willing workers.

We can meet the needs of both Americans and Mexicans and continue to reap the benefits of their efforts by legalizing work which is presently illegal but unenforceably so. A realistic program of temporary visas for Mexican workers is the only feasible economic answer and the only moral human answer. A program of eight months based on the number of available jobs and with responsible safeguards for American workers,

¹Footnotes at end of article.

can work to the benefit of good relationships between Mexico and the United States. By addressing the issue of economic migration in a reasonable and bilateral manner, we can strengthen our political and economic ties with Mexico and help both our neighbor and ourselves at the same time. This is the essence of "Los Compañeros." Compañero is the Spanish word for companion, friend, equal. The Los Compañeros bill, S. 1427, is entitled the "United States-Mexico Good Neighbor Act."

CURRENT U.S.-MEXICAN RELATIONS

Mexico and the United States share a 1,960 mile border including 180 miles which borders my state, New Mexico. Proximity and history have resulted in an often unrecognized, yet substantial and natural economic and cultural interdependence between our two countries and their adjoining states. The examination of the migrant Mexican labor issue must be viewed against the background of other issues affecting United States-Mexico relations.

The United States has an enormous and long-standing economic presence in Mexico. According to Richard Fagen, a Professor of Political Science at Stanford University and a former President of the Latin American Studies Association:

"The United States is the primary source of direct foreign investment (in Mexico) . . . by the end of 1976, U.S. private banks were carrying the impressive total of \$11.5 billion in outstanding loans and credits to Mexico, an increase of \$2.5 billion over the previous year's figure."

The United States currently supplies more than 60 percent of Mexico's imports which is balanced by a strong Mexican presence in the U.S. economy. Mexico is our leading trading partner in Latin America, and our fifth largest in the world.³ With the continuing exports of Mexican oil and gas, Mexico will become even more important to the United States as a trading partner. The desirability and mutual benefit of having a close-by source of imported energy for the United States and a close-by export market for Mexico is obvious to all.

This interdependence extends to many other areas with both international and domestic impact. Manufacturing, agriculture, land and water use, law enforcement and, of course, labor. For this reason, it serves our interests to preserve and strengthen Mexico as a nation and our good relations with that nation. These interests have been compared by Lucey with our interests in a strong Europe after World War II:

"We felt that it was in our long-term interest to see a Europe strong enough and united enough to negotiate on equal terms with the United States. We were, and perhaps still are, the strongest supporters of European unity. For the same reasons, the United States will benefit from a Mexican neighbor strong enough and confident enough to negotiate with us on terms that are perceived by both parties to be equal. It has not been and never will be in our interest to have a Mexico that is other than a full partner in the joint undertakings that close neighbors must constantly pursue. It will be in the distinct interest of both our countries if Mexico experiences healthy economic growth, develops jobs and opportunities for her poorest citizens, and approaches economic equality with the United States."

Our historic and even our recent dealings with Mexico show an irrational insensitivity to the importance of dealing fairly and equally with this vital neighbor. The recent natural gas negotiations epitomize our

short-sighted approach.⁵ Six U.S. natural gas distributors negotiated with PEMEX, the government-owned Mexican petroleum company, to buy natural gas. Under present law,⁶ the Secretary of Energy must approve the final terms. Then Secretary of Energy, James Schlesinger, rejected the price asked by Mexico (which was the going price in the world market) as being too high, reasoning that the gas could be piped to the U.S. more cheaply than it could be shipped from other overseas areas; thus, Mexico could afford to lower its price for the U.S. market. This argument ignored the fact that there are always competitors for scarce commodities, in this case the Japanese. Instead of pursuing this line quietly, Schlesinger publicly stated that Mexico "has to sell the gas sooner or later."⁷ Mexico finally agreed to sell the U.S. some (but not all) of the gas initially contracted for, but at a far higher price. This agreement was reached only under the pressure of a Presidential visit to Mexico.

In another energy-related incident, while asking Mexico to hold the line on oil price increases, the U.S. Government accepted a bid from Phillips Petroleum to purchase oil from the Elk Hills Naval Petroleum Reserve at a price of \$41 per barrel—above the going world price. This demonstrated a clear hypocrisy in our dealings with Mexico. Naturally, the Mexican government responded appropriately by raising the price of oil to us.⁸

Thus, to solve the vexing problems between us, we must develop a coherent policy focusing on all aspects of our relationship with Mexico, including energy, trade, labor, cultural exchange and foreign policy. Our present course, if maintained, bodes ill in this respect. Although this discussion focuses on the migrant labor issue, its resolution must be viewed in the context of all other major issues.

HISTORICAL DEVELOPMENT

The current American economic presence in Mexico results from decades of American involvement in Mexico's affairs. In the 1840's our westward expansion led to a war with Mexico (1846-1848) that resulted in the transfer to the United States most of California, Arizona and New Mexico. Prior to that, Texas had successfully revolted from Mexican rule and became an independent nation, eventually joining the Union in 1845. In 1853 we negotiated the Gadsden Purchase, which essentially established the border at its present location.

Our own Civil War kept us out of Mexico during the turbulent years of Maximilian and Juarez; but when the dust settled in 1876 under Porfirio Diaz, expanding U.S. business interests moved into the Mexican economy. During the Diaz regime (which lasted until 1911), American and other foreign companies controlled Mexico's petroleum and mining industries with the approval of the Diaz government.

This time of relative tranquility came to an end when the Mexican revolution (1910-1920) broke out over the issues of land reform and a control of their economic destiny. A decade of turmoil followed, causing untold suffering for millions of Mexicans which was graphically described by population biologist Paul Ehrlich:

"Untold thousands were killed in the fighting or simply as innocent bystanders. Toward the end of the decade, the worldwide influenza epidemic of 1918-1919 took its toll. Many thousands of additional Mexicans fled across the border to the United States, and many of them stayed there per-

manently. Although demographic records are far from complete, it appears that altogether Mexico's population (in 1910 about 15 million) declined by a million during the decade."⁹

During the revolution the U.S. first supported one side and then another, following no consistent policy. The low point of U.S.-Mexican relations in this century came in April, 1914 when the U.S. Navy occupied the port of Veracruz at the cost of 300 Mexican lives.

American employers have always welcomed Mexican labor. In the 1880's, Mexican workers took the place of excluded Chinese coolies in railroad and agricultural work. During the decade of the Revolution, Mexicans entered the U.S. as "economic refugees" fleeing the conditions which made it impossible for them to live at home.

In the 1920's the U.S. imposed restrictions on Mexican immigration for the first time, establishing the Border Patrol in 1924,¹⁰ requiring visas and enforcing the head tax and literacy requirements by 1930.¹¹ The Great Depression slowed migration to the United States as jobs north of the border became scarce. In the early years of the Depression, we sent back to Mexico many Mexicans who had entered legally before 1928 because they had no documents. Our policy towards Mexico and other Latin American nations became more important under President Roosevelt's Good Neighbor Policy.¹² This policy represented the first real effort to develop a coordinated policy for relations between our two countries. The cooperation which this policy began resulted in the development of the Bracero program in 1942.¹³

The controversial Bracero program attempted to use Mexican labor to fill wartime labor shortages in U.S. agriculture. American farmers had used Mexican workers under various contract labor programs during the first World War¹⁴ and because of several farmworker shortages in World War II, it was decided to reinstitute this approach. The Bracero program began in 1942 with an international agreement¹⁵ and continued for 22 years under various statutory provisions. The program, under both provisions, allowed American farmers to contract for the use of Mexican workers on their farms. It ostensibly required them to offer no less than the prevailing wage rate, as well as to house and feed the workers. Due to lax enforcement in practice, the workers did not always receive all of the protections envisioned.

The Bracero program did not totally eliminate illegal migration from Mexico; although, even when adjusted for population growth, the problem then was not as substantial as today's estimates indicate. Border patrol and Immigration and Naturalization Service (INS) apprehensions averaged 230,740 from 1942-1964.¹⁶ Some say the program stimulated illegal entry since more Mexicans wanted to come to the United States than the Bracero program had room for. Some growers preferred to use illegal labor to avoid the requirements of the Bracero program. By greatly expanding the program and increasing enforcement, the U.S. diverted much of the illegal flow to legal channels.¹⁷ At its peak in 1956, the Bracero program admitted 445,197 workers.¹⁸ This followed the largest enforcement effort, Operation Wetback, in 1954. This sweeping roundup of Mexican workers resulted in the expulsion of over one million people,¹⁹ including many legal

residents and even citizens of the United States.

American organized labor has consistently opposed all temporary worker programs. The Bracero program was opposed from the beginning because it secured on paper benefits for Mexican workers which American workers had not achieved:

"Not only were the Mexicans guaranteed room, board and a decent wage, they were also granted various fringe benefits that the native farmworkers had not been able to achieve in a century of struggle. Included among these benefits were medical care, social security, free transportation and subsistence en route, tools and equipment, minimum working standards and a guaranteed amount of work time."²⁰

This opposition became stronger in the 1960's and resulted in the end of the Bracero program in 1965 when the legislation authorizing the importation of labor expired. However, American farmers (as well as other employers) have continued to use Mexican workers without the legal framework of a Bracero program, defending those actions as an economic necessity.

Organized Labor's objections to foreign migrant workers stem from the belief that employment of these workers had highly adverse effects on employment opportunities, wages and working conditions for American workers. Numerous modern studies²¹ demonstrate that this is not generally true, but Labor's traditional opposition continues.²² Migrant workers do not cause widespread unemployment of American workers, instead they, for the most part, take low-skill jobs in marginal businesses which are not attractive to American workers, most of whom are protected by various unemployment benefits. The existence of this social net beneath U.S. labor is a major factor in assuring that jobs for Mexican migrants will always be available in this country. Without foreign workers, most of the businesses who employ the migrants would fail or locate in other countries with available labor.

While some Mexican workers continue to be paid less than the minimum wage in rural agricultural work, they receive the legal minimum or more in urban areas. The average hourly wage rate for illegal migrant workers is estimated to be \$2.77/hour with only about 28.6 percent of the workers receiving less than the current minimum wage.²³

The prearranged contracts of the Bracero program, unfortunately, encouraged exploitation of Mexican workers. Since the end of the program, horror stories of wage and other exploitation have been drastically reduced²⁴ as labor shortages have become more critical than labor costs in low-skill employment categories.

In the 1960's, Congress reshaped American immigration policy scrapping the discriminatory quota system of the 1920's in favor of a nondiscriminatory system favoring family reunification.²⁵ In place of quotas developed from the number of immigrants already in the U.S. from a particular country, the new law set the same quota for each country.²⁶ In 1976, we extended this quota to Mexico allowing only 20,000 visas a year,²⁷ ignoring our historical immigration patterns and failing to reflect any special relationship resulting from our proximity to Mexico and the interdependence of our economies and cultures; thus, the problem of illegal migration was exacerbated by restricting the number of Mexicans who might legally immigrate.

THE CURRENT IMMIGRATION SITUATION

Because of the difficulty of measuring a largely illegal population, we cannot know many of the facts about immigration and migration from Mexico. We do know the number of Mexicans who enter the U.S. legally as permanent residents or temporary agricultural workers ("H-2" programs). Of those who become permanent residents, some receive visas under the 20,000 quota and others enter under relative and occupational preferences. 53,400 immigrated in 1976 and 44,600 in 1977.²⁸

Some Mexicans enter the United States under the "H-2" temporary workers program. Section 101(a)(15)(h)(ii) of the Immigration and Naturalization Act²⁹ provides for the entry of temporary workers after the Department of Labor certifies that domestic workers cannot be found for particular jobs upon application of the employer. The "H-2" program resembles the Bracero program in that the workers are tied to a specific worksite; ordinarily farms. It also requires that benefits available to foreign workers also be provided to domestic workers. According to Aaron Podin, head of the Division of Labor Certification at the Department of Labor, the Department vigorously enforced its regulations, resulting in the admission of only a small number of workers which has adversely affected many employers with no other labor alternative. In fiscal year 1977, the program used only 27,760 workers, of which 977 were Mexicans. In 1978 Mexicans admitted under the "H-2" program numbered only 1,039.³⁰ The program currently is expanding somewhat, largely as a result of litigation between agricultural employers and the department.³¹

Illegal migrants make up the largest portion of Mexican nationals in the United States. We have no reliable estimates of their numbers, but the range of recent estimates of the total number of illegal aliens in this country range between 2-12 million. Most researchers agree that the actual number is closer to 2 million than to 12, of whom about two-thirds to three-quarters are Mexicans.³² Many of these estimates use the number of apprehensions by the INS as a base. The INS apprehended 792,600 Mexicans in 1977, 841,500 in 1978 and 1,069,400 in 1979.³³ These figures include many repeated apprehensions of the same persons. The widely varying estimates of the illegal population based on this data also overlook or underestimate the volume of annual return migration to Mexico, which all recent studies have found to be as high as 9 out of every 10 illegal entrants.³⁴

As a consequence of recent studies,³⁵ we know more about the characteristics of the illegal Mexican migrants than about their absolute numbers. They are mostly males between 22 and 30 years of age. They are poorly educated with three or fewer years of schooling, although probably better educated than the average of their peers. A majority of the youngest migrants have completed the sixth grade. Although more than half are married when they first migrate to the U.S., fewer than one percent bring their wives and children with them.

Most Mexican migrants come to the United States as temporary wage-laborers, not permanent settlers.³⁶ The most recent group studies by Dr. Wayne Cornelius³⁷ stayed in this country an average of only 5.5 months and came an average of less than three times in a lifetime.³⁸ This figure is consistent with the estimates of others who have studied the field,³⁹ and according to the Cornelius study, migrants come to this

country to accumulate relatively small amounts of cash to meet specific needs at home. They migrate to the United States, rather than Mexican cities, because they can more easily find jobs that pay an average of \$120 per week versus \$10 per week they might be paid in Mexico. This is an irresistible economic pressure to "go North".

During their short stay in the U.S., Mexican workers take a variety of jobs. Naturally, a large number work in agriculture—between 40 and 50 percent according to most recent authorities.⁴⁰ Other migrants take commercial, industrial, construction and service jobs. The most recent group studied by Dr. Cornelius broke down as follows: 45 percent in agriculture, 20.8 percent in industry, 14 percent in commerce, 10.6 percent in construction and 8.6 percent in service.⁴¹ In non-agricultural occupations, they take unskilled jobs such as janitors, garbage collectors, dishwashers or busboys. Less than 14 percent hold skilled or semi-skilled jobs.⁴² According to Dr. Cornelius:

"(The) jobs often held by Mexican illegal aliens have several characteristics in common. They require little or no technical skill and only a rudimentary command of English, if any at all. They involve dirty, often physically arduous tasks, wages at or slightly above the legal minimum, low social status, low job security (often due to the short term or seasonal nature of the work), and little chance of advancement. In short, they are menial, dead-end jobs which are nevertheless attractive to the migrant by comparison with the alternatives in his home community."⁴³

Needless to say, it is likely that such jobs as these would go unfilled absent these temporary workers. Consequently their presence in actuality increases our economic productivity. Approximately two-thirds of the migrants are also employed in Hispanic dominated businesses which are unlikely to hire more expensive and less available U.S. workers.

Mexicans migrate to the United States for two reasons: jobs in the U.S. "pull" them and bad conditions in Mexico "push" them. Some policymakers in the U.S. emphasize the push factors. The Interagency Task Force on Immigration Policy reported in 1979 that many Americans blame high Mexican birth rates and an unequal distribution of opportunity and wealth within Mexico as the primary causes of illegal migration.⁴⁴ Rather than use immigration as a safety valve for its internal problems, those Americans expect Mexico to make a commitment of purpose and capital to the solving of the social and economic problems underlying illegal migration.⁴⁵

Mexican policymakers emphasize the pull factors of wage differentials and continuing requirements for low-wage workers in the United States.⁴⁶ According to the Interagency Task Force, Mexico tends to see the illegal entry of their workers into the United States as a natural response to the United States' need for cheap labor. According to many Mexicans, "if their workers were not wanted and needed by American business, their workers wouldn't come to the United States in the first place."⁴⁷ Modern research tends to support the Mexican position that "pull" outweighs "push."

According to David F. Ronfeldt of the Rand Corporation and Cesar D. Sereseres of the University of California, the migrants also have a clearly beneficial economic impact on the United States:

"Recent field research indicates that the undocumented workers contribute more to

the U.S. economy than they take out. Accordingly, the undocumented workers often take the lowest paying, least skilled, dirtiest jobs—in agriculture, canneries, packing houses, restaurants, hospitals, machine shops, garment and construction industries—while Americans prefer to collect unemployment or welfare. These workers enable some industries to survive that otherwise might succumb to rising wages or cheaper imports. The undocumented workers pay far more in taxes and social security than they consume in social services. Extremely few seek welfare or unemployment benefits and the aliens are carefully law-abiding to avoid detection and deportation. The vast majority are temporary migrants who work in the United States about a half-year before returning to Mexico; very few stay longer than a year.⁴⁸

A study in San Diego County, the area of the nation most severely affected by the illegal entry of Mexican workers, estimated the total contributions of illegal aliens to unemployment insurance, workmen's compensation, social security and disability at \$48.8 million in 1976. In the same period, the total cost impact attributable to illegal migrants on the San Diego County Social Service Delivery System was estimated at \$6 million. Out of the \$260.3 million estimated earnings of the aliens, most was spent in the U.S., however, \$96.7 million was sent home to Mexico as a form of indirect foreign aid.⁴⁹ It is generally concluded that illegal aliens have an overall beneficial impact on the communities they work in.

SOLUTIONS

The solution to illegal Mexican migration in the long run lies with eliminating the push and pull factors which contribute to it. To eliminate the push factor of unemployment in Mexico, we should provide technical assistance for and encourage private investment in labor-intensive rural development in the migrants' home areas. We can hope and expect that the development of Mexico's petroleum resources will help to stimulate the economy and provide long-term expansion of job opportunities. This may help to eliminate a portion of the push factors; however, this process will take many years.

We can assist the process of job growth in Mexico by extending trade and tourism preferences to Mexico. As former Ambassador Lucey said:

"Mexico needs the U.S. market for her manufacturers if her economy is going to develop the jobs needed to absorb her population increase. The United States cannot express concern about Mexican migration and be disinterested when it comes to Mexican economic growth."⁵⁰

However, the push factors are formidable and will be around for a long time. Forty-six percent of Mexico's population (estimated at 64 million) is below the age of 15; and of the working age population, 45 to 55 percent are unemployed or underemployed.⁵¹ Even with a drastic drop in Mexican population growth, these figures would not be affected for a long time.

It will be even more difficult to eliminate the pull factors which contribute to illegal migration. Proposals by former President Carter and others for employer sanctions overlook the inherently discriminatory effect of such actions. If the law is well enforced, employers will be afraid to hire anyone who looks like he might be a Mexican national; thus, discriminating against Hispanics who are citizens or legal residents of the U.S. The alternative of identity cards

is abhorrent to American traditions of individual freedom.

Attempting to completely close the border would be the most drastic approach to eliminating illegal migration. Given our societal attitudes and budgetary limitations, such an effort is unrealistic. The expense involved in closing the border, both in money and in human rights, would be prohibitive. A "Tortilla Curtain" which forced Mexico to absorb the migrants into an already overburdened economy, would create the potential for turmoil south of the border. It would threaten not only our relations with Mexico, but would also potentially destabilize Mexico's internal situation. This is to say nothing of the human cost. Even a small increase in border enforcement leads to an increase in smuggling activity and the profits of the smugglers preying on human economic deprivation.

In the short run we must recognize the existence of the real factors which cause illegal migration. We must move to regulate the flow of migrants in a way that recognizes the human facts of the situation while still providing necessary labor for the U.S. economy.

A program which would allow the number of Mexican workers required by U.S. business to enter this country legally for seasonal work would serve to bring Mexican migration under control. Such a program would meet the legitimate unmet needs of American employers for workers, while providing temporary employment opportunities for Mexicans in economic need and recognizing that these workers will come across the border somehow.

As sensible as that seems, some⁵² have criticized guest worker programs asserting that such will either continue to encourage illegal migration or depress domestic employment opportunities.

Such arguments ignore the fact that the Mexican government simply cannot absorb the workers currently in the United States if this government were to conduct another "Operation Wetback" or erect a "Tortilla Curtain" thus sealing the border. Even these actions might not stem illegal migration unless tremendous resources were allocated to the effort, including deployment of the military. Those options are simply not realistic and are necessarily excluded from serious consideration. Given the strategic importance of a strong and stable Mexico, it is obvious that American foreign policy should not contribute to increased social upheaval in that land. Rather, our policy should be geared toward assisting Mexico as it develops economically. In short, the solution is two-fold: a temporary worker program coupled with Mexican economic development.

The argument that such a program will either encourage more illegal migration or harm domestic workers is another example of conveniently ignoring the present situation. The undocumented are here now and will undoubtedly be here tomorrow unless we begin to attempt channelizing them into a legal and realistic program.

To address this problem, I have introduced the "Compañeros" legislation which would create a temporary worker program (S. 1427, the United States-Mexico Good Neighbor Act). Identical legislation has been introduced in the House of Representatives (H.R. 5128). This legislation would provide for the legal provision of labor needs in the United States while also being a direct, people-to-people form of "foreign aid" and a means of training large numbers

of future workers for Mexico's growing economy.

Putting available facts and logic together, the essential elements of a solution to the problem of illegal aliens are as follows:

Make the workers' stays legal for the six months or so they need to be here and are, in fact, needed within our labor force.

Base the number of temporary worker visas on the number of unfilled, unskilled or semi-skilled jobs in agricultural, service and other appropriate industries.

Allow U.S. workers to protect their jobs at specific business locations if qualified and willing U.S. workers are available.

These elements are embodied in the United States-Mexico Good Neighbor Act.

Under the provisions of the bill, the Attorney General in consultation with the Secretary of State, would set up a program of temporary worker visas. Acting in consultation with the Secretaries of Agriculture, Labor and Commerce, the Attorney General would establish annual and monthly quotas for temporary worker visas based on need over-and-above available domestic labor. These visas would be issued by U.S. Consulates in Mexico on a first-come first-serve basis. The Mexican national holding such a visa would then be eligible to spend up to six months (eight months will probably be a more workable time) in the U.S. seeking or working at a job.

Clearly different from the old Bracero program, the legislation does not place any geographical and contractual restraints on where the visa holder may seek employment. Similarly, there is no prohibition on the type of work in which he or she may engage.

There is, however, a provision designed to help protect American workers at any given work location from unreasonable labor competition. The Secretary of Labor, under specific guidelines, could make a finding that at a specific business or agricultural site, there are sufficient qualified and willing domestic workers available. If so, Mexican nationals holding temporary visas would be restricted from working at that site.

Should a visa holder fail to return to Mexico after the expiration date of the visa or enter the U.S. illegally, there would be stiff prohibitions on his or her eligibility for future visas. However, it is clear that the real incentives for the worker to adhere to the provisions of the program would be that their stay in the U.S. would be legal and not subject to the uncertainties and potential abuses of an illegal status. A program that conforms to reality is always more workable than one which creates an impossibly artificial reality.

As a legal worker, the Mexican national would be clearly protected by the laws and Constitution of the United States. Decent working conditions and needed social services could be obtained without fear of deportation.

The legality of the Compañeros program would eliminate the economic incentives for smugglers. Furthermore, remaining border and immigration law enforcement efforts would be enhanced since the numbers of illegal aliens should decline to a more manageable level. American employers would find the legal workers more attractive than illegal migrants under the threat of apprehension by the Immigration and Naturalization Service.

CONCLUSION

We cannot eliminate illegal migration in the short run. However, we can manage the

flow of migrants with a *Compañeros* visa program which will conform to law and to the realities of the present situation.

By recognizing the Mexican perspective on illegal migration as well as our own economic realities and by accepting our own responsibility for the current situation, we can meet this problem in a friendly and constructive fashion. By working for good relations with our close neighbor, Mexico, we can finally turn our proximity into opportunity; our neighbors into friends. In today's world, we need all the friends we can get.

ACKNOWLEDGMENTS

This paper on Los *Compañeros* was prepared with the assistance of Douglas McCullough of my staff. His help is greatly appreciated as is the modern research by the numerous workers in this field, without which the development of real solutions to the problems of economic migration would not be possible.

Mr. BOSCHWITZ. Mr. President, I request unanimous consent that the attached articles be included in the RECORD following the debate on amendment No. 1907 which would require the establishment of an agricultural guest worker program. These articles detail some of the realities as seen from the perspective of the press and people of our Nation.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ILLEGAL MEXICAN ALIENS: A FLOATING POPULATION

(By Senator S. I. HAYAKAWA)

Problems for the U.S. created by a continually increasing number of undocumented Mexican workers crossing a 2,000-mile border are not going to simply go away. So long as there are millions of people starving in Mexico—with little or no hope—they will risk everything to cross the border for survival for themselves and their families.

The U.S. holds out a promise to Mexicans trapped at the bottom of the ladder, as it has for immigrants throughout history. One major difference, however, is that the native Mexican immigrant only has to cross an invisible border, not the Atlantic or Pacific Ocean. In contrast to immigrants from Europe or Asia, Mexicans really don't want to stay in this country. If given a choice, most of them would prefer to stay home. However, half of Mexico's citizens are unemployed or underemployed. Social scientists estimate that malnutrition affects 60 percent of adults and 80 percent of children under five.

Roots and family concepts are strong among Mexicans. A Mexican folk song now popular north of the border expresses the loneliness of illegal aliens.

"Between hills and mountains . . . In the village where I was born . . . The memories of mornings . . . I have lived through . . ."

The undocumented brings with him solitude and loneliness. He works and saves, and sends money home. About 40 percent of what the migrants earn in the U.S. is sent home. This system has been called "the purest form of foreign aid." The money gets to the people who need it most, instead of being filtered through government agencies.

The illegal Mexican worker yearns to go home, and 90 percent of them do return—they have been called a "floating population." In order to safely get back to Mexico, they have even arranged for their own arrests. The harder we make it for them to go back and forth across the border, the greater the chances they will bring their families—one by one—and settle permanently in the United States, creating enormous social problems for local governments and communities.

Until the 1920's the border was basically "open," a stipulation of the treaty ending the Mexican-American War of 1848. Each time we have needed large numbers of laborers we have reached out to the Mexican worker. During World War I and again during World War II when we had a manpower shortage, thousands of Mexican workers were recruited. During World War II this was known as the "bracero program," under which Mexico supplied the workers, and the U.S. government was the labor contractor for America's agribusiness. The braceros were restricted to short-term agricultural work and more or less indentured to one employer. They were afforded more humane treatment than the migrants who had come before, but only slightly. The bracero program was terminated, and rightfully so, in the early 1960's, but many migrants who had worked as braceros continued to do so—as illegal aliens. In a sense of the word, the bracero program really didn't end, it simply went underground.

Thus, with a long history of short-term migration established, children grew up assuming that one day they too would go north. Most undocumented workers today are either former braceros or the sons of braceros. Although neither country wants

to admit it, the temporary worker is accepted by both the U.S. and Mexico. When workers migrate to find seasonal work, they provide the U.S. with a cheap labor force, and the Mexican government considers it a blessing. The migration provides Mexico with an escape valve for rising political and economic tension.

The time has come now for our two countries to face the problem realistically. With a 100-year history of temporary migration and our 2,000-mile border, there is no point in trying to stop starving people from coming across the border to find work. If this migration is legalized and controlled, the majority of Mexican workers will come for seasonal short-term employment, and then return to their villages. They will not be forced, out of loneliness, fear and despair, to bring their families here to settle permanently. A legal "Guest Worker Program" is the only answer for these people, for the United States and Mexico.

On April 8, 1981, I introduced the "Guest Worker Act of 1981." This bill establishes a five-year guest worker program with Mexico. Qualified Mexican nationals who post a \$500 bond with the United States Government will obtain guest worker visas good for six months. At the end of that time they must return to Mexico. After six months they are eligible for another six-month work visa. Their deposit will be refunded with interest at the prevailing rate. Each time an alien pays a "coyote" (smuggler) to bring him across the border it costs from \$200 to \$500. There is a saying in the villages in Mexico that you usually make it the fourth time you cross the border. This bill also establishes a bilateral advisory commission composed of Mexicans and Americans who will consult with the Attorney General to work out details and regulations.

It is important for us to establish a legal framework for Mexican labor in the U.S. in order to harmonize the use of such workers, to prevent abuse by "coyotes" as well as unscrupulous employers, to reduce the flow of illegal migrants, and to permit a better understanding of the opportunities and problems for Mexican workers in the United States and Mexico.

The United States and Mexico are neighbors in a shrinking world of international politics. It is important to both countries to maintain a working, open and friendly relationship between the two nations. The migration of Mexican nationals into the U.S. has been a sore spot for years. My "Guest Worker Program" will help solve the problem, ease tension in the Western Hemisphere, and improve relations with Mexico.

THE GUEST WORKER PROGRAM: A PURE FORM OF FOREIGN AID

(By Senator S. I. HAYAKAWA)

The contrast between America and Mexico is unique. Mexico is the only Third World nation that borders such an affluent, highly technological country.

It has been demonstrated over the years that when the U.S. economy is in a recessionary state, tremendous anti-alien feelings build up in the country. Mexican workers have been called lazy undesirables who clog the welfare rolls and take jobs from Americans. But there is a total inconsistency in such a statement; either they take American jobs—or they don't work and live off welfare—they can't do both.

The facts are that the majority of Mexican illegals come here to work—they have little understanding of public assistance and

would fear deportation if they applied for welfare.

Undocumented workers pay the same withholding taxes as we do, but are unable to draw social security, unemployment or receive an income tax refund because of their illegal status. For example, an alien who works 60 hours a week at minimum wage (overtime is rarely paid) will earn \$201, of which \$33.17 is withheld.

The tax contributions of undocumented aliens add up to a staggering windfall. One study estimated undocumented aliens contribute as much as \$1.5 billion a year in withholding taxes. In regard to the Social Security Trust Fund in particular, without these funds it would face depletion earlier than current financing schedules indicate.

The time has come for America and Mexico to face the problem of this floating population—realistically.

With a 100-year history of temporary migration and a 2,000-mile common border, there is no point in trying to put a unilateral stop to people crossing the border to work. If migration is legalized and controlled, the majority of Mexican workers will come here for seasonal and short-term employment and then return to their villages, as roots and family concepts are strong among Mexicans.

Typically it is the young man who goes North and he brings with him solitude and loneliness. He works and saves to send money home. About 40 percent of what the migrants earn is sent to their families in Mexico. This system has been called the "purest form of foreign aid." The money goes directly to the people who need it most, instead of being filtered through government agencies.

In World War II, with a manpower shortage in America, the U.S. and Mexican governments got together and created what came to be known as the "bracero program," under which Mexico supplied the workers and the U.S. government was the labor contractor for America's agribusiness. The injustices and inequities of the bracero program are well known, and it was rightfully terminated in the 1960's.

So it is important for us to establish a legal framework for Mexican labor to harmonize their use and to prevent abuse by "coyotes" (smugglers), as well as unscrupulous employers—and to reduce the flow of illegal migrants.

To that end I have introduced in the U.S. Senate the "Guest Worker Act of 1981," which establishes a five-year guest worker program with Mexico. Qualified Mexican nationals who post a \$500 bond with the U.S. government will obtain guest worker visas good for six months, after which time they must return to Mexico. At that time their deposit will be returned to them with interest at the prevailing rate.

Also in my bill, protection is provided for American workers by a provision which permits the Attorney General, at the request of the Secretary of Labor, to restrict the employment of guest workers at specific job sites when it has been shown that American laborers are available and willing to take the jobs.

A primary purpose of a legal guest worker program is to encourage guest workers to return to Mexico after a specified period of time. Estimates of the number of illegal aliens in the U.S. range from 1.4 million to 3 million. Therefore, my proposal provides for the participation of up to one million guest workers each year. Anything short of this figure would hardly discourage illegal traf-

fic and the program would accomplish nothing.

The United States and Mexico are neighbors in a shrinking world of international politics. It is important to both countries to maintain a working, open and friendly relationship—this is one way to accomplish this goal.

[From the PSA California Magazine, April 1982]

INTERVIEW WITH WAYNE CORNELIUS

(In 1974, Wayne Cornelius set out on the largest research project the U.S. government had yet sponsored on Mexican migration. He began at the source: the towns and villages of the state of Jalisco, where seasonal migration within Mexico itself and across the border into the United States has been a way of life since the 1880s. He lived among the migrant families, watched the arid land turn to dust and saw the young men of the villages set out for the North. Cornelius followed them and studied their destinations: the restaurants and fields of California and Illinois. Over the next several years, Cornelius, then a professor of political science at the Massachusetts Institute of Technology, became the most widely quoted U.S. expert on migration—in part because he said the unsayable: far from being a drain on the U.S. taxpayer, the migrants were, he contended, a boon to the economy. Most migrants, he said, traveled back and forth across the border without settling in the United States.)

(Cornelius also claimed that the number of illegal Mexican immigrants had been highly inflated by the Immigration and Naturalization Service (INS). In contrast to the Border Patrol's claim that eleven million Mexicans were here illegally, Cornelius estimated that the figure was probably closer to between one and three million. Studies since then have supported his figures.)

(A former Fellow at Harvard's Center for International Affairs and the Woodrow Wilson International Center for Scholars, Cornelius is now director and founder of UC San Diego's Center for U.S.-Mexican studies at UC San Diego, the nation's largest university-based program devoted exclusively to Mexico and U.S.-Mexican relations.)

(Cornelius has received a series of top awards from fellow Latin American Scholars—and an outpouring of anger from many U.S. citizens, ranging from the far-right proponents of a Berlin-style wall along the border to such Chicano activists as San Diego's Herman Baca, who favors an open border and calls him "Wayne Confuseus," to some of his colleagues, who still contend that the professor's interpretation of data favors the immigrants.)

(His most controversial statements surround a "temporary worker visa system," which he drafted for Stuart Eizenstat, President Carter's domestic policy adviser. The proposal was designed to legalize much of the back-and-forth flow, without resorting to the geographic and employer restraints that had made Mexican workers virtual slave-laborers under the "bracero program" of the 1950s and 1960s. The plan was rejected by the Carter administration, but the idea stuck. Senators S. I. Hayakawa (R-CA) and Harrison Schmitt (R-NM), the ex-astronaut, proposed legislation to create a guest worker program based in part, on Cornelius's ideas. The Reagan administration has also proposed a program with shades of Cornelius's temporary worker visa. The latest proposal is another plan devised by

historians Harry E. Cross and James A. Santos and published in January by the Institute of Governmental Studies at UC Berkeley. The plan has striking similarities to Cornelius's and is seen by some immigration experts as more realistic than the Reagan approach.

(Cornelius, though, has backed away from the temporary worker visa. He is, in short, an angry man—angry at what he considers a prostitution of his original proposal, and at what he calls a rising "new American nativism." At his UCSD office, he spoke with reporter Richard Louv. Louv is on leave from the San Diego Union to write a book about American migration.)

PSA. Most observers, regardless of their politics, believe that the United States has no cohesive immigration policy. Why not?

CORNELIUS. As one congressman told me, it's not the facts that matter, but people's perceptions of the facts. The reason we can't come up with effective major legislation is that that would be tantamount to recognizing publicly that we need this labor, that it is not just charity to poor Mexicans or a free ride for the uncaring Mexican government. In ten or fifteen years, many of the debates that we're involved in now will seem ridiculous. We're going to be confronted with significant labor shortages in certain parts of the country, for certain kinds of jobs. The baby bust is already having some effect, with American fertility rates dropping since the last 1960s.

PSA. Why do we need foreign laborers when we don't appear to need unskilled American kids? That just doesn't seem to make sense to most people.

CORNELIUS. First, while some individual youngsters may find it more difficult to get a job because of undocumented migrants, there is a lot of evidence that for the most part unemployed U.S. citizens and foreign undocumented immigrants are not competing for the same jobs. U.S. citizens are not interested, as a general rule, in the kinds of jobs filled by Mexican immigrants. In fact, in some areas of the country where Mexican migration is the heaviest, youth unemployment is lower than the national average. Second, there is simply no future for U.S. workers in the kinds of jobs filled by foreign migrants in this country. We do have an obligation to provide access to the right kind of job training, mass transit and education. That, over the longer haul, must be the goal of social policy—not deporting Mexicans.

PSA. With the economy at a standstill, isn't that question irrelevant, especially now that we've cut CETA training programs for unemployed youths?

CORNELIUS. Obviously, in a period of short-term economic contraction like this, a menial job may in fact be the most satisfactory alternative for a young U.S. citizen, but certainly not in the longer haul.

PSA. Stanford University economist Clark Reynolds has said that because of falling birth rates, the U.S. might need as many as five to fifteen million foreign workers in the next twenty years to fill low-income jobs, just to keep our economy going at its present rate. Does that sound reasonable to you?

CORNELIUS. That's one reasonable projection. Surprisingly, the number of low-skilled jobs is increasing. This is true even in agriculture, despite mechanization and despite all the acres of land that get paved over and turned into shopping centers every year. In urban areas, as long as the domestic immigration into Sunbelt cities continues to grow, there will also be an expanding need

for personal services of all types, for a very broad range of goods and services that are provided by foreign labor today. With the baby bust, we're going to be confronted with the same kind of situation that the European countries were confronted with in the late 1950s and early 1960s, when large-scale importation of foreign labor was essential to economic expansion. In advanced industrial countries, it's impossible to eliminate that class of jobs. It is a structural feature of most Western economies. Whether that is good or bad, it's a fact.

PSA. Who is the typical immigrant?

CORNELIUS. There isn't any. Of course, I know the most about the Mexican migrants, who make up about 60 percent of illegal entrants. One of the popular misconceptions is that there is one kind of Mexican migrant. The migration includes several subpopulations, including temporary, illegal long-distance migrants who come mostly from the western portion of Mexico's central plateau; temporary, legal migrants, sometimes called "greencarders" who may live just over the Mexican side of the border or deep in Mexico; long-term, long-distance illegal immigrants who enter the U.S. clandestinely or with temporary visas and then stay; and permanent legal immigrants, many of whom lived in the U.S. as illegal immigrants prior to their documented entry. These categories don't even begin to capture the full diversity in the Mexican immigrant population.

PSA. California has been called the "new Ellis Island." With so many immigrant groups, legal and illegal, in what context should we place Mexican immigration?

CORNELIUS. Most of the Asian immigrants entering California are entering legally as political refugees, and therefore are entitled to a set of government benefits, assistance in resettlement and other social services to which undocumented Mexicans have no access. And of course, they are here as legal residents and therefore are not subject to the kind of abuse some Mexicans suffer because of their illegal status. In terms of numbers, Indochinese immigrants may well outnumber Mexican legal immigrants. Between 140,000 and 150,000 Indochinese immigrants are settling in the U.S., mostly in Southern California, per year. But if you include all those Mexicans here illegally, of course, Mexicans far outnumber Indochinese.

PSA. How separated from mainstream U.S. culture are these two groups?

CORNELIUS. Culturally, there is a far greater gap for the Indochinese than for the Mexicans. Although the Indochinese do have some enclaves in Orange and San Diego counties, Mexicans have a much larger support network of friends and relatives. We're just beginning to study this, with a five-year study of San Diego's Indochinese refugees compared to Mexican immigrants.

PSA. And the other groups?

CORNELIUS. There are many countries contributing to the illegal flow of immigrants—even Japan, as has been recently demonstrated by the INS raids of Japanese neighborhoods of Los Angeles, raids that reportedly shut down about 40 percent of the small businesses in those neighborhoods for a few days. The problem there is Japanese who overstayed their visas, who have remained to work as illegal immigrants. Now, the same could be said of Canadians, Filipinos, Koreans and probably a dozen other nationalities, but what makes these groups so much less visible than the Mexicans is that most of them entered the U.S. legally on tourist or student visas, which they over-

stayed. They were not caught illegally trying to cross the border, as most Mexicans typically are. We simply don't know the relative numbers of these groups. For one reason, the INS has focused perhaps a disproportionate degree of its attention on Mexicans. The raid of the Japanese neighborhoods may reveal the tip of the iceberg of illegal, non-Mexican immigration. The East Coast, I might add, is affected primarily by refugees from the Caribbean basin and Central America. And this tends to be highly localized—for example, Colombians seem to go primarily to New York City; Haitians and Cubans to the Miami area.

PSA. What concerns you about U.S. public opinion?

CORNELIUS. Americans seem to have a need to believe that immigrants are to blame for their problems. Public opinion surveys show a growing nativism. A survey in 1979 in San Diego found that nearly half of the respondents felt that legal immigration should be reduced; what was most interesting was the specific anti-Mexican bias, even in a local area whose economic livelihood depends heavily upon Mexican labor and consumer spending by Mexican immigrants and tourists. Three times during the last sixty years, anti-immigrant sentiment among the U.S. public emboldened officials to carry out mass roundup and deportation campaigns aimed specifically at Mexicans. It could be argued that the United States is now overdue for another such nativist spasm. The stage has been set. When the spasm comes, U.S.-Mexican relations will deteriorate swiftly, regardless of other mutual interests such as trade, energy and tourism.

PSA. Say we could turn off the spigot, stop the migration. What would happen to the economy in the Southwest?

CORNELIUS. First, turning the spigot off completely would take a militarized border, gun turrets and a wall. But assuming that restrictionist policies would work, in the short term, cutting off the supply of immigrant labor would be truly disruptive. Some of the marginal operations wouldn't be able to survive. The larger establishments might shift to less labor-intensive kinds of activities, or move their businesses out of the country to nations with cheaper labor.

PSA. Would that work to decrease the total number of U.S. jobs?

CORNELIUS. It might well. It would certainly not help the hard-core unemployed. In other words, the net increase of employment opportunities to U.S. workers would be very small and in fact might be negative, because of the impact on our economy. Given the range of options of most employers, I don't think that all the good things that are supposed to happen, as the restrictionists see it, are going to happen. What will not happen, in most cases, is an increase in wages that would make these kinds of jobs attractive to U.S. citizens.

PSA. Most Americans believe that Mexican illegal immigration is draining our social services and tax base.

CORNELIUS. Yes, if they are in the United States for long periods, especially if they have children with them; the immigrants do take advantage of health services and education. I'd point out, though, that those who do use tax-supported health facilities more often than not pay cash for the services they receive. Our studies in San Diego have shown that a very large portion of health services to legal and illegal immigrants is being provided by private practitioners and health providers on the other side of the border. The reason is partly

pride, and also because the immigration service is involved with screening Medi-Cal patients—they don't want to get deported. For the same reasons, few of them are receiving any kind of income transfer payments—welfare, food stamps. On balance, they are not a drain on the U.S. taxpayer.

PSA. What tax contribution do they make?

CORNELIUS. The vast majority are undocumented taxpayers. And their overall contribution to the financing of the services they do use is quite substantial. Now, the legitimate grievance that local and state governments have is that the bulk of the money undocumented immigrants pay in to the public treasury goes off to Washington. The local governments have the greatest grievance because most of the taxes undocumented workers pay goes into federal and state income taxes and Social Security. Increasingly, less of that money comes back to the local governments.

PSA. Which creates the crises for local hospitals?

CORNELIUS. Right. Local and state governments are bearing an unfair burden for the human services for this population. The federal government shirks its responsibility, by and large, and refuses to recognize the existence of the problem.

PSA. What about Social Security?

CORNELIUS. They're subsidizing it. This is true if you consider the total population, not just the permanent settlers, but also the short-term migrants who come here to work for a few years and then go back to live in Mexico. They're paying into the Social Security Trust Fund and usually are not taking anything out. This is less true of immigrants who are staying here permanently and manage to legalize their residence. But overall, the immigrant population is younger than the U.S. population, paying in more than they consume in Social Security benefits.

PSA. What do you think of the Cross-Sandos proposal for a five-year guest worker pilot program, viewed by some as a fresh approach? [The proposal requires a \$300 deposit, to be returned, with interest, if the migrant returns to Mexico; provides the worker with the right to join U.S. labor unions and look for jobs anywhere he or she wishes; requires that the worker be paid by check, so that standard tax and benefit deductions would be made, enabling the worker to draw disability payments; features a special withholding tax on the guest worker's paychecks, which would create a fund for hospital and health-care expenses, and allows for each migrant to carry a tamper-proof identity card.]

CORNELIUS. The main problem is that there's no quick fix, and this approach would delude people into thinking that there may be one. I only wish they had come up with something fresh. Three-quarters of what they propose appears to be lifted directly from my 1977 proposal for a temporary worker visa system. Other ideas were taken from S. I. Hayakawa's bill. I can't identify a single element of Cross-Sandos that has not been proposed, debated and rejected in the U.S. political and academic domains during the past five years. It's just another hodgepodge, a Frankenstein's monster no more politically viable than ones that came before. It's likely to arouse such a vociferous nationalist reaction on the Mexican side that there would be no hope of acceptance.

PSA. Why have you backed off from your own proposal for a temporary worker visa?

CORNELIUS. Legalizing entry of Mexican immigrants is still the most humane and rational approach. But I no longer labor under the illusion that it is possible, within the context of the U.S. economy and politics of the 1980s.

PSA. What about the Reagan proposals, which include a "guest worker" program, a permanent worker ID card, employer sanctions and amnesty for some undocumented immigrants?

CORNELIUS. In some ways, it's an improvement over the Carter proposals, but still unworkable. Take employer sanctions: there are already twelve states in the nation that have legislation to this effect, including California; given the fact that there is already a federal law governing contracting in farm labor, which also specifically prohibits agricultural employers from hiring undocumented immigrants, if we look at the actual impact it has had, I think we need to ask seriously if employer sanctions can ever be enforced. We can't even enforce the minimum wage law for the general population. How can we keep track of the millions of employers? In thinking you can enforce employer sanctions, you're assuming the feasibility of a truly counterfeit-proof credential. I think there would immediately be a whole new industry springing up to produce facsimiles of whatever new kind of credential you want to create.

PSA. You seem to be saying that the problem isn't the immigrants themselves, but their illegal status; but you're also saying that it's impossible to legalize them, given the political climate. If legalizing the migration is politically unfeasible—or just plain wrong, as some of your opponents say—what are we left with?

CORNELIUS. The status quo, which I don't regard as either morally acceptable or economically rational. Or increased restrictionist pressures, fueled by economic stagnation and popular hysteria.

PSA. What about the long-term view? Is there any cause for optimism?

CORNELIUS. We have evidence from a variety of surveys, among them the United Nations World Fertility Survey, that there has been a significant and continuing drop in fertility rates that can be expected to cut future population growth in Mexico. By the year 2000, Mexico may have roughly 100 million people rather than 120 million, as had been projected in the 1970s. The problem, of course, is that this doesn't mean an immediate reduction in the growth of the labor force. There also appears to be improvement in Mexico's ability to feed itself. But the regions of Mexico that sends the most migrants are less affected by the strides in agriculture. Mexican oil will certainly make a difference. But we simply can't predict the long-range effect on the economy. As for what happens in the meantime, the migrants and their U.S. employers will continue to be the central actors determining what really happens in the labor market—not the government, whose capacity to intervene effectively at this point is dramatically diminished.

PSA. Are we at a crossroads, moving toward an enriched, culturally pluralistic Southwest—or toward a separatist movement, another Quebec?

CORNELIUS. If we are moving toward another Quebec, it certainly won't be because of a preference of the immigrants, especially those who remain here for a long time. They're mainstreamers. They want to make it in this society. They particularly want their children to make it, and they know

that to achieve that goal their children must get some kind of schooling, proficiency in English and knowledge of U.S. customs to make them competitive in the U.S. job market. The older immigrants do tend to retain their use of Spanish, don't vote and stay separate from the majority culture. This is partly because they're too busy making a living. But their children are another matter, and this is where the focus should be placed. Whether they're successfully integrated into the society will depend largely on whether they have access to the kind of education that will give them the tools to survive in American society.

PSA. If our schools are having trouble providing English-speaking children with that kind of education, how are they going to succeed with Spanish-speaking children?

CORNELIUS. That's certainly a serious problem, which is at the root of our overall social policies. But what is the alternative? The long-term price of not providing this education, and good health care, will be huge. It's unfortunate that there are so many people who associate immigration with separatism. A lot of people in the majority culture are intolerant of cultural and linguistic differences. Some of them really don't believe in cultural pluralism as a worthy goal of society. They feel threatened, choose to put up barriers, and prefer to think the worst of those who enter the country and don't divest themselves immediately of their language and culture. We have a real opportunity in the Southwest for cultural pluralism. If we fail it won't be because of the immigrants, but because of ignorance and fear and prejudice.

GETTING A HANDLE ON IMMIGRATION WILL REQUIRE STARTING FROM SCRATCH

(By Frank del Olmo)

Like so many things, the U.S. Immigration and Naturalization Service does, last week's Operation Jobs generated lots of controversy, anger and publicity, but accomplished very little.

The nationwide series of raids was targeted at illegal immigrants holding well-paying jobs, the kind that U.S. citizens might take if they were available. About 5,500 people were arrested, less than one-tenth of 1 percent of the estimated 6 million believed to be living in this country illegally.

There are no reliable figures yet on how many of those vacated jobs will be filled by Americans. Spot checks indicate that many of those arrested have already returned to work while they appeal the deportation order. So it will be awhile—if ever—before we see whether Operation Jobs proves that illegal immigrants displace U.S. workers.

But one conclusion can be drawn from Operation Jobs: Enforcement of immigration laws is beyond the abilities of the Immigration and Naturalization Service; it should be abolished.

If the United States is ever to get its immigration system in order, new laws and more money will not be enough. There has to be a drastic reorganization of the federal agencies that administer those laws, primarily the immigration service, an agency of the Justice Department.

The immigration service has been incapable of effectively doing its job for a number of years. This first became clear in 1972 when the Justice Department launched Operation Clean Sweep, a wide-ranging investigation of corruption in the INS.

Operation Clean Sweep demonstrated that the immigration service was a deeply

troubled agency—underfunded by Congress, overwhelmed by the millions of people it had to deal with, and operating largely out of sight of the general public. All this resulted in a demoralized atmosphere in which corruption could flourish.

Unfortunately, while immigration has become an issue for public debate in the last few years, things have not improved much for the immigration service.

The agency still does not get the funding that its leaders believe is necessary to control illegal entry. In 1972 the INS budget was \$130 million, enough to pay and support 2,005 Border Patrol agents, 1,346 immigration inspectors and 1,219 criminal investigators. This year, the agency has a \$400-million budget and more Border Patrol agents, 2,700. But there still are 1,350 inspectors and only 770 investigators.

And horror stories about the agency's mismanagement and ham-handed methods still abound. In Operation Jobs, we learned of agents refusing to allow the detained suspects to see lawyers or even spouses in some instances, and coercing suspected illegal aliens into waiving their rights. The sad thing is that anyone who deals with INS regularly knows how routine these kinds of allegations are.

Even those members of the general public who occasionally must deal with INS on more mundane matters tell angry stories of long lines, lost files, unanswered telephones and harried, impolite clerks.

A major reason for this is that INS has a split personality—it must service legal immigrants and resident aliens, while trying to track down illegal immigrants, doing neither job particularly well.

Since World War II, the law-enforcement function has come to dominate INS operations as civil servants who began their careers in the Border Patrol rose to the agency's highest ranks. These policy makers still tend to think of all immigrants as the Mexicans they used to chase along the Rio Grande.

The reality of this country's immigration dilemma is far more complicated than that. Mexican workers tend to come as migrants, not immigrants, hoping to earn enough money here to buy a piece of land or a small business back home. They may be the least of our problems when compared to the Haitians, Iranians, South Americans, Asians and other foreigners who would like to settle in this country permanently.

Getting a handle on this phenomenon will require more sensitivity and farsightedness than our current immigration agency is capable of. So it should be put out of its misery, and a new system built from the ground up.

The Border Patrol's functions could be absorbed into a single, comprehensive border management agency, along with the Customs Service. Law-enforcement specialists believe that illegal immigration can be controlled more efficiently, and more humanely, at the point of entry rather than searching all the scattered likely destinations in the nation's interior.

The idea of a single border agency has been bouncing around the Office of Management and Budget since Richard M. Nixon was President, but it has been effectively opposed by the agencies involved and their employee unions.

The INS's service function—helping new and prospective legal immigrants—should go to a new Bureau of Immigration. Specialists predict that most of this country's population growth in the coming years will occur

not from natural births, but from immigration. That is as good an argument as any for spending more money to build a better system of immigrant admissions and acculturation than we have now.

There are bills working their way through Congress now that would make far-reaching changes in U.S. immigration laws, making them more restrictive but also fairer and less arbitrary. I have serious doubts whether they will work, because the economic forces that cause illegal immigration may be too strong to be legislated away. But these reforms have been designed by thoughtful people who are trying to create a national consensus on a complex and emotional issue while avoiding the nativism that has tainted past debates about immigration to this country.

If these immigration reform proposals pass, it would be a tragic joke to leave their administration to one of the most heavily-handed, overworked and ill-prepared agencies in the federal bureaucracy.

MEXICAN OFFICIAL ASSAILS BILL TO CURB IMMIGRATION

CORONADO. (UPI)—Mexico's leading expert on illegal immigration into the United States Thursday called the immigration bill before the U.S. Congress a "step backward."

Dr. Jorge A. Bustamante, director of the Center for Northern Mexico Border Studies, said the Simpson-Mazzoli bill "starts from the premise that illegal immigration is an illness which must be cured by drastic measures."

"The bill is a step backward from the need to rationalize costs and benefits to the United States of what is, in effect, an international labor market with demand for cheap labor on one side and a labor pool on the other," Bustamante told a binational conference sponsored by the Center for U.S.-Mexican Studies of the University of California at San Diego.

The bill sponsored by Sen. Alan Simpson, R-Wyo., and Rep. Romero Mazzoli, D-Ky., would make it unlawful to hire illegal aliens; make it an offense for an illegal alien to use false documentation in seeking a job; set up an experimental two-year, guest-worker program for 50,000 Mexican nationals annually; and grant varying degrees of legal status to qualifying illegal aliens in the United States prior to Jan. 1, 1980.

Cutting off the flow of illegal aliens would be tantamount to "economic suicide" to sectors of the U.S. economy, Bustamante said, and not just the seasonal agricultural sector that attracts only 37 percent of illegal aliens.

Recent studies indicate that the majority obtain jobs in the hotel and restaurant trade, other service industries, light industry, and the garment and shoemaking fields.

Bustamante said the Simpson-Mazzoli bill responds to the present bad economic situation in the United States, which he said makes it temporarily impossible "to analyze the phenomenon in a fair-minded way."

He said the bill formalizes the treatment of illegal aliens as "a subclass of worker whose lack of access to the courts is perceived in Mexico as unfair, unjust, and an offense to all Mexican nationals... the closest thing to slavery, the denial of rights of human beings to this underclass of workers."

He said Mexican President Jose Lopez Portillo has not voiced disapproval of the bill so as not to intervene in U.S. internal affairs. Bustamante said this silence has been misinterpreted by the Reagan administration

as tacit approval of the proposed immigration law.

AGENTS ON HORSEBACK SEIZE 200 ILLEGAL ALIENS

(By Lennie La Guire)

U.S. Border Patrol agents on horseback charged into Orange County strawberry fields yesterday in a raid that netted more than 200 suspected illegal aliens.

And as astonished motorists watched from a crowded freeway dozens of agents on foot also entered the fields, chasing the workers into surrounding foliage.

Assistant Chief Patrol Agent Tom Gaines of the Chula Vista Border Patrol said approximately 237 suspected illegal aliens were taken in during the two-hour sweep of five strawberry fields bordering the Santa Ana Freeway.

The workers taken into custody were put aboard buses headed for Tijuana, said Jim Grim, assistant chief patrol agent for the San Ysidro district.

"We'll do the paperwork on them on the bus on the way to the border and then dump them at the border," he said.

Sixty agents aided by a helicopter participated in the raid over 600 acres near the intersection of the Santa Ana and San Diego freeways. Two of the growers who leased portions of the land denied any of their workers were picked up.

"It was very fortunate for us we didn't have any pickers in the field," said rancher Don Wall, who said he lost about \$80,000 after a similar raid last year when he couldn't find workers to replace those rounded up.

"Even when you get legal workers from this area they get spooked by such raids and they don't like to get hassled and they don't come back," he said.

Another grower, Glenn Tanaka, said, "We were lucky. We didn't have any workers in the field."

Asked if any of the growers would admit that they did, he laughed and didn't reply.

Grim said that following the usual pattern, workers dropped off across the border would return.

A rancher said the raid could severely affect strawberry growers.

"This is a very critical time for strawberry growers," said Jerry Collins of the Irvine Co., owner of the land leased by at least five tenant farmers.

"It is very possible to lose from a half a million to a million dollars if they don't have workers in the field at this time," he said.

But Gaines warned that the raids would continue.

"For us it's a routine operation and we're going to be up there for several days," he said. He added that the raids were made "in order to free up some jobs for American workers."

Grim said that growers would not be held accountable "unless there is an indication that they are (knowingly) hiring illegal workers."

[From the Fresno (Calif.) Bee, Mar. 27, 1982]

LOCALS FIND PICKING NOT BERRY GOOD JOB

SANTA ANA.—Local residents who flocked to strawberry fields when immigration agents roused regular pickers have apparently decided berry picking isn't as lucrative

as expected: Most quit the first day, officials said.

To make a hoped-for \$12 an hour, they had to pick between 2,300 and 2,900 berries an hour. "It's very hard work down on your hands and knees, especially if you're not conditioned to it," said Bob Harkness of SF Farms. "To make the money, you'd have to stick with it."

Only four of the 20 new pickers who showed up at SF Farms on Wednesday came back to work Thursday, said Harkness, sales representative for the 160-acre Irvine strawberry spread. On Thursday about 30 newcomers—many of them victims of Orange County's 6 percent January unemployment rate—picked for a while, he said.

Rain prevented harvesting Friday, further deepening the losses of Orange County's strawberry industry, already hard-hit by this week's federal round-ups of illegal field workers, Harkness said.

The new workers were apparently dissuaded by the amount of backbreaking work required to earn the \$12 an hour that had been mentioned in a newspaper article, he said.

To make \$12 an hour, a person would have to pick 12 flats an hour, each containing 12 one-pint baskets, he said. Each basket holds between 16 and 20 berries, meaning a laborer would have to pick 2,880 berries an hour. Growers' pay scales differ, but at SF Farms, workers have the option of taking the minimum \$3.35-an-hour wage or going for \$1-a-flat incentive rate.

"During a peak harvest, a good worker could make as much as \$12 an hour," Harkness said, but generally the good pickers average about \$7 or \$8 an hour.

Acknowledging that growers "have to rely on Mexican help during the harvest," he noted that the raids coupled with the wet weather are seriously hurting the harvest this year.

Thursday's raids by the U.S. Border Patrol resulted in the round-up of 329 Mexican illegals and one Guatemalan from fields in Irvine, Orange and Fountain Valley, said Border Patrol Deputy Chief Dale Musegades.

On Monday and Tuesday, agents picked up 340 illegal immigrants and sent most back to Mexico by bus.

Wednesday's raids didn't hit SF Farms and a fairly normal picking day ensued, Harkness said; but federal agents did hit ranches in Anaheim, Fullerton, and Buena Park, netting 221 illegals, Musegades said. He said up to 40 of the county's estimated 60 farms have been raided.

State employment Development Department officials say they hadn't been posting job openings for farmhands, because they thought locals weren't interested in the manual labor.

But dozens of inquiries have come in from unemployed workers, and this week for the first time the strawberry growers placed large job orders for emergency pickers in Orange County's five EDD offices.

In Fullerton, about 30 EDD applicants were sent out to a ranch but were beaten to the fields by other workers who had heard about the raids, said employment counselor Louise Sherill.

**FEAR OF IMMIGRATION RAIDS GROWS IN
 HISPANIC AREAS**
 (By Diane Alters)

Hispanic people living in Sacramento are so afraid of being swept up in a nationwide roundup of illegal aliens that priests at Our

Lady of Guadalupe Catholic Church have released them from their obligation to attend Sunday Mass.

The decision is a result of panic that has seized the Spanish-speaking community during a weeklong campaign by the U.S. Immigration and Naturalization Service to search out and arrest illegal aliens, said the Rev. Keith Kenny of the parish.

The fear even touched American citizens of Mexican descent, who say they are afraid of being arrested in the sweep because they look like Mexicans, said Don Chairez, a local lawyer who specialized in immigration law.

Despite persistent rumors of arrests, local INS chief David Johnston said Sacramento would not be part of the controversial week-long raiding operation, called "Operation Jobs" by the INS. Although the local office conducts its own raids, none has taken place this week, he said.

A Border Patrol agent who declined to give his name at the agency's Franklin Boulevard office also said no one had been arrested locally under the program.

The raids have taken place in factories, hotels, restaurants and other businesses in San Francisco; Los Angeles; Dallas; Houston; New York; Denver; Newark, N.J.; Detroit; and Chicago. About 3,500 suspected illegal aliens, many from Mexico, were arrested Monday through Wednesday, national INS officials said. The operation is to end today.

"They're in immediate danger of arrest," Kenny said of parishioners who would otherwise be obligated under church law to attend Mass but who are afraid to leave their homes. Arrest is considered a grave danger, the basis for allowing such an unusual release from obligation, he said. Nobody knows how many people in the parish are in the country illegally, he said. Another Catholic Social Services official estimated that "thousands" were in the Sacramento area illegally.

Monsignor James Poole of St. Charles Borromeo, which also has many Hispanic parishioners, said he had not heard similar fears in his parish, and had not released anyone from the obligation to attend Sunday Mass.

Kenny expressed skepticism that the raids had not been conducted here. "They're notorious liars," he said of immigration officials.

"I have done nothing but answer people's calls for two days. They're scared," said a counselor at the Catholic Social Service's immigration division. The woman, who asked not to be identified, described rumors of local raids. None of the rumors has been substantiated.

INS officials have said the raids would remove illegal aliens from jobs that could be held by unemployed Americans. But clergy, politicians and minority groups in the nine cities raided issued angry criticisms of the INS.

In the San Francisco area, operators of fish markets and chicken plants said they were having trouble finding replacements for aliens arrested this week.

"It's not the kind of work most white middle-class Americans want to do," said Nickle Becker, manager of the Petaluma Poultry Co., where INS agents arrested 18 of 125 employees.

Les Amunesen, manager of the Point St. George Fishery in Santa Rosa, disagreed with INS officials that aliens were in "high-paying" and "attractive" jobs. The 53 aliens arrested Tuesday at his plant were fish cleaners who had worked there two years.

Job applications since then were for truck drivers and fork-lift operators, which he doesn't need, Amunesen said.

In Denver, the Roman Catholic archbishop and the Episcopal bishop protested the roundups. One priest there said he would harbor illegal aliens in his church, "just as the church served as a refuge in the Middle Ages."

In Los Angeles, attorneys for an immigrant rights group won a federal court order Wednesday barring the imminent deportation of 150 of 425 Mexicans arrested there. U.S. District Judge William Mathew Byrne ordered all aboard a busload of detainees in Los Angeles to be asked whether they wanted to talk to a lawyer.

"To say INS is really interested in the rights of these people is absurd," Byrne said.

[From the Los Angeles Times, Aug. 1, 1982]
**MOST ALIENS REGAIN JOBS AFTER RAIDS—
 SURVEY CONTRADICTS INS FINDINGS THAT
 SWEEPS SUCCEEDED**

(By Larry Stammer and Victor M. Valle)

Eighty percent of the suspected illegal aliens apprehended in Los Angeles and Orange counties three months ago during nationwide immigration raids on factories are back on the job, a survey by The Times has found.

The results contrast sharply with an earlier survey by the U.S. Immigration and Naturalization Service and call into question INS success in meeting its stated objective of opening "higher-paying" jobs for unemployed Americans and legal residents by deporting illegal aliens.

Dubbed "Operation Jobs," the highly publicized sweep of 5,635 suspected illegal aliens from factories in nine cities throughout the country during the week of April 26-30 resulted in thousands of unemployed flocking to the factories to apply for the jobs vacated by those arrested.

WIDESPREAD CRITICISM

Despite widespread criticism at the time from immigrants' rights attorneys and U.S. Sen. Alan Cranston (D-Calif.), who called the raids "terroristic," Omer G. Sewell, deputy district director for the INS in Los Angeles, pronounced the sweep a success.

"I think we certainly did meet our target," he told a press conference the day the raids ended. "Our target was to open up a substantial number of jobs to American citizens and lawful residents. . . . Judging from reports about large numbers of job applicants seeking these jobs, we believe it's been successful, and we're very, very proud," Sewell said.

Responses to a Times survey of union leaders, management and employees in Los Angeles and Orange counties three months later show, however, that the INS approach failed.

The Times found that of the 801 workers arrested in the two counties during the weeklong sweep, 646—or 80%—are back on the job.

One personnel manager reported, "Some of them were here the very next day. They were deported that evening and they were back the next morning."

NUMBER UNKNOWN

It is not known precisely how many of the returning workers were deported and then crossed back into the United States illegally or were permitted to remain in the United States pending a review of their immigration status after asking for a hearing.

Based on answers from several firms, however, it appears that a sizable majority—nearly seven out of 10 returning workers—had been deported.

Those numbers approximate the INS breakdown. The agency reported that 68.7%, or 550, of the 801 workers arrested agreed to voluntary deportation, and 31.3%, or 251, asked for immigration hearings.

Employers also indicated that many of the Americans and legal residents who were hired to fill vacancies did not stay on the job, either because they believed that the pay was too low or because the working conditions were not to their liking. Wages averaged \$4.80 an hour in the Los Angeles-Orange County area and ranged from the minimum \$3.35 an hour to \$7.50 an hour, the INS has reported.

One firm, where wages ranged from \$3.35 to \$4 an hour, reported hiring 90 new workers immediately after the raids. But Rudy Pompa, employment manager of the B. P. John Furniture Co. in Santa Ana, said 75 of them quit shortly after.

"They told me they found another job, that the work was too hard, that there wasn't enough pay. One tried to provoke the foreman to fire him in order to collect unemployment. His benefits had run out and he was looking for an extension," Pompa said.

Hal Takier, personnel manager of West American Rubber Co. in Orange said, "The Americans? None of them stayed; maybe 1%. It isn't the work. It's just that they feel like they want something better, whether they have education or not." When 10 arrested workers returned, Takier said, "I was just glad to get 'em back."

Operation Jobs, executed at a cost of \$500,000 nationally, including \$160,000 to transport deportees to the border, was an experiment to determine whether the INS should concentrate enforcement efforts on illegal aliens holding supposedly "higher-paying" jobs that Americans and legal residents might take. In the past, the agency had been criticized for rounding up illegal aliens in low-paying jobs for which there was insufficient domestic labor.

The reaction from most employers to Operation Jobs was summed up recently by Walter Gibson, controller at Carolyn Shoes Inc. in Monterey Park: "I think if the announced purpose was making jobs . . . then they failed because they did not create jobs. Now, if their purpose was to harass those people who didn't take the time to document themselves, then they succeeded."

Some employers disputed the INS contention that the raids involved workers in higher-paying jobs, and several complained that production lines had to be shut down.

The immigration service is evaluating the effectiveness of the raids. No decision has been made whether to continue them.

Philip Smith, assistant district director for investigations at the agency's Los Angeles office, said one week was not enough time to adequately test the effectiveness of Operation Jobs.

The experiment would have had greater impact if 1,000 suspected illegal aliens had been picked up every week for several weeks, he said.

"But in depressed economy, it did accomplish something," he added. "It focused attention on the immigration problem. . . . It did accomplish the goal of getting people to zero in on employment opportunities in which illegal aliens were arrested. . . . but it certainly did not solve the illegal immigration problem or the unemployment problem."

Two weeks after the raids, the INS conducted an "informal survey" of factories in Los Angeles, Chicago, Dallas and Houston to determine how many U.S. citizens and legal permanent residents were hired to replace the arrested workers. Other cities included in the sweep were Detroit, Denver, Newark, New York and San Francisco.

That survey, depending on how the answers were treated statistically, indicated that between 65% and 70% of the jobs vacated by arrested workers had been filled by Americans or legal residents, based on employers' answers.

INS spokesman Bob Walsh in Washington, D.C., said the survey had no "scientific credibility" and that the government had no way of knowing whether employers answered truthfully. Thirty-one of the 39 firms contacted agreed to answer the agency's questions.

Unlike the INS survey, in which respondents were asked to volunteer information to a law enforcement agency that might act on the information obtained, The Times promised confidentiality to those companies requesting it.

The Times survey was limited to Los Angeles and Orange counties and included all of the 12 firms raided instead of using a random sample.

Eight of the 12 firms cooperated, five on the condition that their statistical answers be included only in a total figure for all 12 companies. The eight were Acme Lighting and Manufacturing Co. in the City of Industry, B. P. John Furniture Co. of Santa Ana, Carolyn Shoes of Monterey Park, El Rey Mexican Foods of the City of Industry, Kern's Foods of the City of Industry, Magdesian of California in Monterey Park, Pharmavite of Pacoima and West American Rubber Co. of Orange.

Three firms—Accurid Co. of Santa Fe Springs, Price Pfister Brass Manufacturing Co. and U.S. Sales Co., both of Pacoima—refused to cooperate. One firm, Hiebert Inc. of Carson, claimed not to know how many of its workers had returned to work. In those cases, The Times contacted workers, union officials or lower-level management personnel in an attempt to determine the situation.

Although there is no way to independently verify the answers, union officials and workers who spoke to reporters without the knowledge of their employers tended to corroborate management reports from cooperating firms that a majority of the arrested workers were back on the job.

They also provided specific numbers. A union official, for example, reported that he was informed by Price Pfister management that 67 of the 83 people arrested had returned to work, reportedly after they produced "green cards" establishing them as legal permanent residents or had asked for hearings to contest their deportation.

UNION FILED GRIEVANCES

Manuel Barbosa, business representative of Teamsters Local 389 at Price Pfister, said the union has filed grievances to get the company to rehire the remaining 16 workers.

"I'm not the INS," Barbosa said. "I just represent my members. It's not a condition of union membership that you have to be a U.S. citizen."

Price Pfister was the first company hit in the raids and was the subject of widespread publicity. The firm reported that it received 1,000 job applications the next day.

At Hiebert Inc., an office furniture manufacturer, Personnel Manager Bill Hite said

he did not know how many of the 182 arrested workers had returned to work, although he said "quite a few came back." Another company official said that 95 percent had returned.

The company reported to the INS two weeks after the raids that it had hired 200 U.S. citizens or legal permanent residents through the state Employment Development Department. An official at the state agency, when informed of the company claim, said, "Oh dear, no! That certainly wasn't the case." An Employment Development Department spokesman said records indicated that the department made only 23 referrals to the company.

In some cases, the return rate was nearly 100 percent. El Rey Mexican Foods reported 34 of the 35 arrested workers back on the job. Acme Lighting and Manufacturing Co. said 19 of the 20 arrested returned. West American Rubber Co. reported the lowest return rate, with only 10 of the 52 arrested workers back on the job.

CHANGE IN HIRING PRACTICES

The raids have resulted in several employers changing their hiring practices. They report—and the INS confirms—that more of them now ask the agency to check the names of job applicants against INS computer files of legal residents, although there is no legal requirement to do so.

Hite, personnel manager at Hiebert, said that his firm logs the time and day it attempts to verify the resident status of job applicants and the INS official contacted.

Hal Takier, personnel manager of West American Rubber Co., said, "Whether it's legal or not, I've been asking for a green card and a Social Security card. Usually we take a photo of it and put it on their application. I have no choice, and still you know you're going to have counterfeits and phonies . . . but that's what we have to do to keep our skirts clean."

Other employers, however, say privately that they are skirting the issue.

Said one, "We do require some type of identification, but we're not so naive to think it's not bought on the corner Depending on how badly we need the workers, we'll accept their identification."

Indications that employers are taking back arrested employees in large numbers, including those who were deported as well as those who sought hearings before an immigration judge, drew criticism from one immigration service official in Washington, D.C.

Informed of The Times' findings, Deputy INS Commissioner Joseph Salgado said, "It would be a disappointment to me to think that American employers, who have a vested interest in this country, would elect to hire or rehire people they know are illegal aliens before Americans. That would be a disappointment to me. That would be a major disappointment. I'm not saying I would be surprised by it."

Disappointment or not, several employers said that as long as they cannot find legal residents and Americans to fill jobs, they will hire anyone.

Several employers and INS agents said that most efforts to stem the tide of illegal aliens looking for work in the United States will be ineffective until Congress imposes sanctions against employers who hire illegal aliens.

Others, like Gibson, the controller at Carolyn Shoes, said that if illegal aliens are to be stopped, they must be stopped at the border.

But, he said, the underlying cause of illegal immigration will remain, regardless of how the U.S. government tries to slow it.

"The shoe industry has Puerto Rican workers in New York; in Florida, mostly Cubans; and here, mostly Latins (Mexicans). Whether they are documented or not, I imagine they are documented as much as the Cubans are documented.

"The only difference is the State Department says the Cuban government is communist and the Mexican government isn't. But the workers are the same. They still want to eat no matter what their government is. You can call the Cubans political refugees, but they are principally economic refugees, the same as the Mexicans are economic refugees."

COUPLE DEPORTED; CHILDREN LEFT ON OWN—
INS RAID: THE PAIN OF SEPARATION

(By Victor M. Valle)

Aurelio Norte is a part-time accordion player, and when he gets off from his factory job, he often sings in the cantinas of San Fernando about those deported by the Immigration and Naturalization Service.

In dreary cantinas where men like him gather, he sings as one who knows the pain of being separated for days from his children. In April, he and his wife, Rebecca, were apprehended for the first time at a Pacoima mail order company where they had worked more than four years.

They were among the hundreds of undocumented aliens deported in "Operation Jobs," a week of factory raids designed to remove illegals from jobs that could be held by unemployed U.S. citizens and legal residents.

Aurelio and Rebecca eventually got their jobs back, as did most workers seized at their plant. But for the Nortés, the cost was especially high. Aurelio was separated from his wife and six children for 16 days, during which time he made seven unsuccessful attempts to recross the border from Mexico. Rebecca returned home 10 days later on her fourth attempt.

"SUFFERED THE MOST"

"Of all the people arrested in the raid, we suffered the most," Aurelio said. "We suffered physically, we suffered spiritually."

Aurelio, 42, has squared, weathered features that make him appear older. His voice is coarse, restrained and proud. He brought his family to this country more than four years ago to escape poverty in his native state of Durango.

Rebecca, 40 has smooth, gentle features. In her voice you can hear the twang of northern Mexico. Her eyes reflect the sound of humiliation in her husband's voice.

"You feel bad, you feel bound, you feel very small," Aurelio said, recalling how he felt when immigration agents entered the plant. A female immigration agent, he said, questioned and then handcuffed him, which he found especially embarrassing.

"I was afraid, I was shaking, I saw the rest of the people hiding. I ran to hide," Rebecca said, recalling her thoughts as the raid began.

"They searched for us as if we were inhuman," Aurelio said of the way the agents pushed over boxes and packages to get at workers who hid. "And when they put us in the van, one of the agents said—'Boys, yell Viva La Migra! He was laughing, inflaming us, acting like a big shot.'"

"I didn't say anything when he did that, I just thought, my God, how things turn out.

I was, as they say, crying inside, because I left my children at home, alone."

Fortunately, their 18-year-old daughter Marisela was not picked up in the raid. She was on her break at a corner food stand when the agents arrived. Her friends at work told Marisela that her parents had been taken, and then took her home.

"They broke out crying all once," Marisela said, after she told her three sisters and three brothers—the youngest 6 years old—and what had happened.

"And me without money and food," she said. "It seemed pretty hard, pretty ugly. I had to stop working to stay home with sisters and brothers."

But an uncle, friends from work, and members of the Hermandad de Trabajadores Mexicanos in Pacoima (Brotherhood of Mexico Workers), a group acting as a liaison between undocumented aliens and labor unions, brought the children food and money while their parents were gone.

Although the children were safe, Rebecca and Aurelio had no way of knowing that.

They were arrested in different parts of the plant and the immigration agents did not find out that they were married. And they did not volunteer that fact, Aurelio said, since those apprehended try to withhold details about themselves to avoid being identified by immigration authorities.

Positive identification of a person deported several times can prevent that person from legally emigrating later, said an agency spokesman. It can also mean fines and a jail sentence if a person were caught and identified several times.

HELD SEPARATELY

Aurelio and Rebecca were first separated when they were led into different vans that transported them to section B-17, the temporary holding facility in the basement of the Federal Building in downtown Los Angeles. Men and Women were taken to different rooms in the building.

Before being questioned, Aurelio considered asking for a hearing to appeal deportation. But he said he began to have second thoughts when an agent threatened to detain him for three months and set his bail at \$5,000.

Seeing his wife through a darkened window as she walked into a room with those who agreed to voluntary departure helped him make up his mind.

The possibility of his being detained and of Rebecca struggling to cross the border could mean that his children would be left by themselves for weeks, he said.

Aurelio signed the voluntary departure form, as had Rebecca.

"My back was to the wall. Anyway, God willing, I'll go to Tijuana, leave and in three days I'll be back," he said to himself.

That night, he began his ride back to Mexico in a bus filled with men like himself. He arrived without sleep in San Luis Rio Colorado in the state of Sonora about 4:30 a.m. and, figuring that Rebecca had been sent to Tijuana, he boarded the next bus for there.

However, Rebecca arrived in San Luis one hour later. Luckily she decided to stick with her female workmates as they headed back to Tijuana.

Aurelio called home when he got to Tijuana. But when he tried to ask where Rebecca was and to say where he was staying, "Tears poured down my face, and the children let out crying, begging me to come home," he said in a coarse whisper.

Late that afternoon, Rebecca called home, receiving word of where Aurelio was wait-

ing. She walked into the poorly lit market and saw her husband leaning against the counter with his back facing her she said.

"We met, we talked, we lamented, and then we telephoned the family," he said. "Then we began thinking about how to get back."

He and his wife had hidden \$220 between them in the heels of their shoes, which they would use to survive if they were ever deported and to pay a coyote to smuggle them across the border.

In the week that followed, the couple and three other friends from work made several aborted attempts to cross the border. Their first try began with a pollero, a person who guides people past the border fence to a coyote waiting to take them to Los Angeles.

ARRIVED NEAR FENCE

After meeting their guide outside their hotel early one evening, they rode a bus to the border, arriving near the fence while there still was light.

"You have to get to the line early," Aurelio said, "because once it gets dark, you have to watch out for the *judiciales* (plainclothes Mexican police). They're more dangerous than immigration (border patrol)."

"They take all your money and beat you, and accuse you of trafficking in marijuana. They do this to scare people. If you try to talk . . . for your rights, God help you."

They walked under the fence through a dry canal just north of the Playas de Tijuana and hid behind a large tree waiting for the dark.

Late that night, the group began crawling through the brush and through mud. Border patrolmen in a Jeep were parked not far off.

They were almost spotted near a dirt road "when the mosquito, the helicopter, passed over," Aurelio said. "Our guide told us to take care, get under the weeds, and don't look up because they'll see your eyes shine."

"About three kilometers ahead, there were some men on these three-wheeled motorbikes," he said. "There were about eight of them and they were getting some people."

He said they were spotted but the border patrolmen were too busy to give chase as the Nortés and their party ran into a muddy area where the motorbikes could not follow.

"It was then that they (border patrolmen) called the men on horses," Aurelio said.

When mounted patrolmen caught up with them, he said, "they made their horses lunge at us, yelling, 'move, quick.' One of the horses stepped on my friend's foot. They told us to run, faster, faster. They thought my wife was a man, because of the way she was dressed. I felt bad because of the way they treated her."

Eventually, after Rebecca had run a few miles, the patrolmen noticed she was a woman and they let them walk, Aurelio said.

Their group was then picked up by a van and taken to the *corralon* (the big holding pen) in Chula Vista. They had to sleep on the detention center's cold concrete floors before being returned to Tijuana.

ANOTHER CYCLE STARTS

The ride back to the border began another cycle.

"You had bad luck today," the border patrol driver told them as they got off. "Tomorrow you'll have another chance." Aurelio said the driver said this with cold blood. "They always try to make you feel small," he said. "They tossed us across the line like throwing a soccer ball" into a field.

Three attempts later, Rebecca crossed using a local passport (good only for work in the San Diego area) brought to her by her brother. The passport could get her across the border, but not beyond the border patrol check point in San Clemente.

She made her way back by hiring a coyote who took 12 hours to drive her home, she said.

"I felt better then," after speaking to Rebecca on the telephone, "but I still was sick," Aurelio said.

In the course of another unsuccessful attempt to cross over, Aurelio was pulled out of a restaurant by plainclothes Mexican police in Tijuana and forced to pay a bribe, he said.

He also lost his 1973 Lincoln for two months and had to pay \$368 in towing charges and border patrol fines when his brother-in-law used the car to try to drive him home. On this, his sixth attempt, they were stopped at San Clemente by the border patrol, and it was back to square one again.

After yet another failed attempt, in which he was caught by the border patrol trying to walk around San Clemente by way of the beach, the bus driver taking them to Chula Vista made his passengers an offer.

"He told us if we behaved, if we were quiet, he would take us direct to Tijuana," thus avoiding a few hours of hard sleep on a concrete floor.

Two days later, while Aurelio was suffering from a fever, an elderly man walked five of them across the border near the Tijuana airport, he said. They were picked up at a K-Mart in San Ysidro by a young woman in a station wagon and driven past the San Clemente check point to Los Angeles without being stopped.

"On Saturday I got back and on Monday I started working again," he said.

"I would have kept trying until death," he said. "My kids are in school here, they are learning English, and I have four years seniority at my job. In Mexico you cannot support a family, you suffer too much. That's why we live outside our own country."

"I'm an illegal, but I'm not a criminal, a murderer," Aurelio said. "We are simply workers, and we don't take away anyone's bread. What we earn, we earn with our own effort."

[From the San Francisco Chronicle, May 6, 1982]

S.F. PROTESTERS BLAST ALIEN RAIDS, CHARGE RACISM

(By Katy Butler)

A bitter wave of protest mounted yesterday—Mexican independence day—against the federal immigration agency's week of raids on undocumented alien workers.

About 400 people chanted and marched outside the office of the Immigration and Naturalization Service in San Francisco, waving flags and signs with messages such as "Sweep up the Reagan administration" and "Who is the real alien, pilgrim?"

The raids netted 5500 permitless workers across the country, and sparked protests and denunciations from activists, politicians and employers.

"I think the raids are disgusting," said a 30-year-old San Francisco city health worker of Mexican ancestry. He would not give his name because of restrictions on political activity by government workers.

"There is selective enforcement of the laws against these people just because they're brown," he said. "This was Mexico once and there were no borders then. Traveling will continue."

He called the raids "a scapegoat plan to take attention away from Reagan's poor economic policies."

Meanwhile, several employers who lost workers in the raids said yesterday that some of those picked up, who turned out to have the residency permits called "green cards," and others who had since applied for the cards, had all returned to work. But replacement workers have been quitting the tough, dirty jobs in droves.

"They've been dropping like flies, six or seven a day," said Nickie Becker, office manager of Petaluma Poultry Processors, which has gone through about 30 replacements so far for the 18 chicken slaughterers taken by the INS last week. "It's chaos and it's been very costly."

Susie Souza, a bookkeeper for the Point St. George Fishery in Santa Rosa, said nearly a dozen of the company's 53 detained workers were back on the job or expected soon.

One family of four obtained green cards, Souza said, and another five had applications pending. One worker caught in the dragnet held residence papers and has returned to work, and another woman, who had an application pending, was shipped to Mexico by the INS and is expected back once her permit comes through.

"We've filled all the jobs, but a lot have quit already because they don't like the work," Souza said.

Mayor Dianne Feinstein yesterday strongly attacked the raids and a U.S. attorney's investigation of the residence status of people seeking bilingual voting information.

She said the immigration raids reminded her of the Japanese internments of World War II and the anti-communist McCarthy era of the 1950s.

"People have been taken from their homes and places of employment and put in facilities over things that happened years ago and 'phoom'—they're gone," Feinstein said. "This represents a day in history I thought we were long past."

In Sacramento, at a small Cinco de Mayo rally outside the federal building, Mario Obledo, the former state health secretary who is seeking the Democratic nomination for governor, called the INS actions "Nazi-type" measures undertaken by "terrorists."

The raids netted 5500 undocumented alien workers and their family members across the country last week, including 800 in California and 467 in the Bay Area. Many of those apprehended are fighting deportation.

David Ilchert, director of the U.S. Immigration and Naturalization Service in San Francisco, said yesterday that of the 435 employed undocumented aliens grabbed in the Bay Area, 37 were earning \$7.25 an hour or more, 154 were earning \$5.25 to \$7.24, 229 were making \$3.25 to \$5.24 and 15 were making \$3.25 or less.

"Five or six" people detained had green cards but were not carrying them, he said. They were released after providing the documents, which he said permanent resident aliens are required to carry. "We made no mistakes," said Ilchert.

"A lot of activist groups claim the raids were racist," he said. "My answer is, as a practical matter, 80 percent of those apprehended without documents at job sites in California are Mexican or Hispanic. It's a fact of life."

Mr. BOSCHWITZ. I wish to add my congratulations to the congratulations of others for the work the Senator has done on this bill.

The PRESIDING OFFICER. The Senator from California.

Mr. HAYAKAWA. Mr. President, if we are voting on this Tuesday, I shall ask for the yeas and nays now. Shall I?

Mr. SIMPSON. The Senator may, although that is part of the unanimous-consent agreement that there will be rollcalls. You may ask for the yeas and nays.

Mr. HAYAKAWA. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Does the Senator wish to yield back the remainder of this time?

Mr. SIMPSON. I yield back the remainder of my time.

The PRESIDING OFFICER. The rollcall will be put off until Tuesday.

Mr. BOSCHWITZ. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BOSCHWITZ. Are all rollcalls going over until Tuesday?

The PRESIDING OFFICER. Only on S. 2222, the pending legislation.

Mr. BOSCHWITZ. I thank the Chair.

The PRESIDING OFFICER. Other legislation will be discussed Monday. There has been no deferral of rollcall votes.

Mr. BOSCHWITZ. I thank the Chair.

AMENDMENT NO. 1908

(Purpose: To require a properly executed warrant before an officer or employee of the Immigration and Naturalization Service may enter a farm or other agricultural operation)

Mr. HAYAKAWA. Mr. President, I call up amendment 1908.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from California (Mr. HAYAKAWA) proposes an amendment numbered 1908.

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in section 111, add the following:

(c) Section 287 (8 U.S.C. 1357) is amended by adding at the end thereof the following:

"(d) Notwithstanding any other provision of this section, other than paragraph (3) subsection (a), an officer or employee of the Service may not enter onto the premises of a farm or other agricultural operation without a properly executed warrant."

Mr. HAYAKAWA. Mr. President, I ask my listeners today to imagine themselves members of the Immigration and Naturalization Service patrol looking for illegal aliens in agricultural country, let us say Guadalupe,

Calif. As they go along the road, they see a farm over here with a number of brown-skinned men stooped over gathering cauliflower or strawberries or whatever the crop may be, and they look like Mexicans.

They say to themselves, "By God, they must be illegal Mexicans—they must be illegal aliens."

So they charge onto the field and grab whomever they can. They charge on there in trucks, in four-wheel drive vehicles, on horseback. In doing so, they not only frighten those workers to death but they also destroy the crops. If it is cauliflower, they destroy the cauliflower; if it is strawberries, they crush the strawberries.

Now according to the rules by which the INS works, they have to have a search warrant if they are looking for illegal aliens working in a hotel or a motel or a restaurant, but if they are looking for illegal aliens in an open field on a farm or in an orchard, they do not have to have a search warrant.

My amendment No. 1908 will require that the Immigration and Naturalization Service, in their search for illegal aliens, must have a search warrant if they are going to search or invade the premises of a farm or an orchard with no fence around it, an open field. They have to treat that as private property in the same way they treat a Holiday Inn as private property or in the same way they treat a McDonald's restaurant as private property. In the latter cases, they would have to have a search warrant to go in and look to see who is working in the kitchen.

But in farms, they do not have to do that. In so doing, they violate the civil liberties of the workers out in those fields. It is a very serious matter, Mr. President. Supposing they grab all those people and find out, first of all, that not all of them are Mexicans. Many of them may very well be American citizens of Mexican descent. Some of them are Filipinos or Japanese, but they have been out in the sun so long, they all look the same color as the Mexicans, anyway.

Others are here on green cards, legitimately, and some may very well be illegal aliens, but you do not know. You round up the whole bunch.

Whether they are illegal or not, you disrupt the operation of that farm, you scare them to death, and you cannot get the harvesting operation going again the next day, or the day after, because so many of the workers are scared to death to come back to work, including those who are citizens of the United States.

My amendment, Mr. President, will insist that, in order to raid a farm or open space or unfenced area in which there are workers, the INS will have to have a search warrant, just the same as they do in order to raid, let us say, a factory, a manufacturing plant, a hotel, a restaurant, or a walled en-

closure or building. This seems to me to be a simple matter of the application of the fourth amendment, and that is, protection from unreasonable search and seizure.

Mr. President, this amendment would require that agents of the Immigration and Naturalization Service obtain a search warrant prior to entering a farm or ranch for purposes of interrogating suspected illegal aliens. This amendment places before the Senate a simple question: Should the fourth amendment of the Constitution apply to the farms and ranches of this Nation? To me the answer is a simple Yes. The INS operates today with a glaring double standard. While required to obtain a search warrant to enter a factory or restaurant, they can enter the private property of a farmer without justification or prior discussion with the owner.

Farmers are denied the basic right which is guaranteed under the fourth amendment—protection from unreasonable search and seizure. My amendment will remedy this situation and provide farmers and farmworkers the protections inherent in the Constitution. I urge my colleagues to consider carefully the current operations of the INS and examine the merits of my proposal. Immigration Service statistics show us that 8 percent of the illegal aliens employed in the United States are working in agriculture. However, almost 50 percent of the undocumented alien workers apprehended are agriculture workers.

These statistics reflect a bias in the enforcement activities of the INS. They demonstrate that the INS is selectively enforcing the law by going to the industry where it is the simplest and most cost-effective to carry out the law. This must be changed.

The border patrol argues that because agricultural lands are "open fields," they are beyond the scope of protection of the fourth amendment. Their agents need not obtain consent, a search warrant, or show probable cause that some criminal activity is occurring prior to entering a farmer's fields. In short, border patrol agents enter agricultural land at will to search for undocumented workers.

However, unlike traditional "open field" cases where law enforcement officers see the so-called "fruit of the crime," the only thing the border patrol witnesses are human beings working in the field. It is not until the INS agents enter the field that an illegal versus legal status can be determined.

My amendment does not establish any special protection for farmers it merely guarantees them the same rights and protections enjoyed by every other employer in the Nation. Likewise, the agricultural workers will be protected from the antagonism of impulsive interrogation by the INS.

Harassment of agricultural employers and employees has gone on for years—agriculture is an easy target. Fieldworkers are easy prey. Yet I must ask: Does the fact that they are relatively easy to locate justify the violation of their constitutional rights? Does the phrase "equal protection under the law" not apply to the farmers and farmworkers of this Nation?

I am embarrassed that this legislation is needed. Our system has failed an important sector of our society; we must take action now. The guarantee of the fourth amendment is basic to the free functioning of our Nation, our economy, and our people.

Before closing, I would like to return to the existence of a double standard in INS enforcement practices. Last month, the Ninth Circuit Court of Appeals issued a decision which clearly widens the gap in fourth amendment protections between factory and fieldworkers. The court reviewed the question of whether citizenship status questioning is constitutionally valid when based upon suspicion of alienage alone. Their determination was that suspicion of alienage alone is insufficient. The court stated that: "The fourth amendment requires an individualized suspicion of illegal alienage of those subject to detentive questioning." The court went on to state: "We feel the fourth amendment rights of workers would be impermissibly diminished were we to sanction the unconstrained use of warrantless, detentive questioning * * *"

I am heartened by the Ninth Circuit Court and their belief in the rights of individuals in our society, rights we all enjoy regardless of the color of our skin.

I trust my colleagues would endorse the court's declaration that:

The apparent Hispanic ancestry of one sought for questioning, while possibly relevant, is insufficient, even if noticed in conjunction with the knowledge of the presence of a person in an area known to contain a high concentration of illegal aliens.

Mr. President, this amendment has the support of the League of United Latin American Citizens, known in California as LULAC, the Mexican-American Legal Defense Fund, and the major agricultural organizations of the country.

Mr. President, this amendment to our Nation's immigration laws, simply, is greatly needed as a matter of protection of our civil rights.

I thank the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. HAYAKAWA. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SYMMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SYMMS. Mr. President, I compliment the Senator from California again for this amendment also. I can tell him that I have seen exactly those things happen.

I recall that I had a good friend who lived right next door, literally, to where I was living. He was arrested one day with a group of workers, of which about half of them were American citizens, were legal in this country, anyway, and half were not. He spent a good part of the day in the sheriff's office.

I asked him, "Why didn't you say something? Why didn't you speak up and tell them?" Well, he was scared, literally, as the Senator points out. When this happens, it is enormously disruptive.

In Stockton, Calif., where the Senator is well aware, they harvest a big cherry crop and they have about 10 days to harvest those cherries. When the disruption takes place it becomes enormously difficult for people to get a crew back into the field, just because of the fear of this thing.

I think it would certainly be a protection that would be helpful to the civil rights of the American people if search warrants were required to go onto the farms.

I have heard stories told of the Immigration Service driving out across the fields, damaging sprinkler pipes, running over crops, potato crops, that are growing, and so forth. It is just one example after another of abuses, I think, that take place.

Mr. President, I have to say to the people in the Immigration Service that they have a tough job. I do not envy them for it. It is very difficult for them to try to get the arrests made, and so forth.

This would be consistent, I think, with policy that is acceptable in this country and the protection of the human rights of the citizens of this country who may be Hispanic by their historic birthright that are going to be abused if this is not part of this bill. They are being abused now and I think we should correct it now.

So I am in strong support of this.

The PRESIDING OFFICER. The Senator from California.

Mr. CRANSTON. Mr. President, I am pleased to join in cosponsoring the amendment offered by my friend and colleague from California, Senator HAYAKAWA, which will require INS to obtain search warrants before entering onto the private property of farmers, growers and other citizens.

The objective of the amendment is to stop open-field raids by INS that disrupt farming operations and harass many people.

Raids on farm fields are a form of summary punishment inflicted by INS agents on farmers and their employees. Raids can cost thousands of dollars in lost and damaged crops and in lost wages.

S. 2222 should make raids by INS an exercise of the past.

The response of Alan Nelson, Commissioner of Immigration, to Senator SIMPSON, appearing in Wednesday's RECORD seems to overlook the fact that our amendment will be part of S. 2222.

If S. 2222 becomes law, farmers and growers will be violating the law if they hire unauthorized workers. That is not now the case.

California farmers will comply with the law.

In addition, INS will have ample opportunity to check farmers' records to see to it that they are following the law.

Thus, there is no need for the element of surprise inherent in a warrantless raid on open fields.

What is necessary is to amend the bill as proposed by Senator HAYAKAWA to put an end to the spectacle of INS agents chasing workers through open fields by truck, helicopter, and on foot as if they were merely so many animals to be hunted down instead of men and women—and, sometimes, children.

I congratulate my colleague for his proposal. I express again my admiration for his sincere commitment to securing and preserving values of human dignity.

I urge my colleagues to support Senator HAYAKAWA's amendment.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. SIMPSON. Mr. President, I oppose the amendment. The purpose of S. 2222 is to improve control over illegal immigration, and increased enforcement is the key element of that. This amendment would defeat that purpose by greatly diminishing the ability of the INS to enforce immigration laws in the very occupations and industries which are dominated by an illegal labor force.

The current law provides for the arrest without warrant of aliens who, in the officer's presence or view, are reasonably believed to be in violation of the immigration laws. This amendment would reverse a tremendous reservoir of case law holding that the protections of the fourth amendment—pertaining to unreasonable searches and seizures—extend to people not places and that special protection according to people is not extended to open fields.

That represents a considerable body of case law which has never been overturned.

This amendment would extend fourth amendment protections beyond

what the U.S. Supreme Court has determined the Constitution requires.

This amendment would very effectively end all Immigration and Naturalization Service farm and ranch check enforcement programs.

The INS estimates that 4 to 6 hours would be needed to process a routine warrant, including travel between the site and the U.S. Attorney's office, clerical requirements to complete the warrant and the supporting documents, and approval by the magistrate. Resources are simply not available for this type of operation.

In addition, agricultural work crews are extremely mobile, moving rapidly from field to field and farm to farm, and by the time a valid warrant is secured the crews will frequently have moved to another location rendering invalid any kind of warrant.

I cannot help but see that countless resources will be wasted by countless attempts to rewrite warrants under these continually changing conditions.

Let me ask unanimous consent to have printed in the RECORD at this point a letter from the Commissioner of Immigration and Naturalization Service dated August 10, 1982, describing this amendment and its impact upon the efforts of law enforcement by the INS.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF JUSTICE, IMMIGRATION AND NATURALIZATION SERVICE,

Washington, D.C., August 10, 1982.

HON. ALAN K. SIMPSON,
Chairman, Subcommittee on Immigration and Refugee Policy, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This is in response to your letter of August 4, 1982 regarding the amendment proposed by Senator Hayakawa to S. 2222, the Immigration Reform and Control Act of 1982, that would forbid an officer or employee of the Immigration and Naturalization Service to enter on the premises of a farm or other agricultural operation without "a properly executed warrant".

Set forth below are specific responses to the questions you raised concerning the anticipated impact on Service enforcement efforts should that amendment be adopted.

1. Section 287(a)(2) of the Immigration and Nationality Act grants Immigration Officers the authority, without a warrant, to arrest aliens who in the officer's presence or view are attempting to enter the United States in violation of the immigration laws, or are reasonably believed to be in the United States in violation of the immigration laws.

Farm and ranch operations normally are conducted in open areas providing unrestricted avenues of escape to individuals wishing to evade the detection of immigration officers. It was the intent of present statutes in such circumstances to enable Service officers to apprehend aliens who are in their presence or sight and who are in violation of the immigration laws before they are able to abscond.

The circumstance of violations occurring in plain view is, of course, not normally present in factory situations where employees usually are enclosed within a confined area and not observed. Moreover, in such situations, if owner consent is sought and refused, exists may be monitored by Service officers while a search warrant is sought, to prevent aliens from absconding.

2. (a) The special problems associated with obtaining a warrant to search agricultural lands arise from the practiced difficulties in obtaining a warrant in time to respond to an observed violation. Present standards require a "particularized description" of the location to be searched, as well as of the evidence or person to be sought. The probable cause necessary to support these standards, in most cases, necessitates between four and six hours to process a routine warrant. This includes travel between the site to be searched and the U.S. Attorney's office, clerical requirements to complete the warrant and supporting documents, approval by a magistrate, etc.

Agricultural work crews, who are usually in the employ of a labor contractor under contract to several farms are extremely mobile moving rapidly from field to field and farm to farm. By the time a valid warrant could be secured, these crews likely will have moved to another location, rendering the warrant invalid. Countless resources would be wasted by repeated attempts to re-write warrants under constantly changing conditions.

(b) Regarding the proposal to obtain consent of the owner or agent, it is presently Service policy for officers, whenever possible, to inform the owner of their presence when entering on private lands. However, where the owner is not available or not known, as frequently is the case when farm land is leased or sublet, it is often difficult to locate the individual with legal control over the land. By the time such notification could be sought and secured, the aliens likely will have been alerted to the presence of immigration officers and will have departed.

Furthermore, if the receipt of consent were mandated by legislation, it is unlikely that such consent would ever be granted by an owner with the knowledge that the alternative for the Service is a search warrant which probably could not be effectively executed.

3. The authority of immigration officers to enter onto open lands without a warrant or consent to enforce the immigration laws is based on Section 287(a)(2) of the Immigration and Nationality Act which provides for the arrest without warrant of aliens who, in the officer's presence or view, are reasonably believed to be in violation of the immigration laws.

Furthermore, it is a well-settled law that the Fourth Amendment does not bar entry onto so-called "open fields" by a law enforcement officer in the performance of his official duties. The term "open fields" has been interpreted to include private lands but not including dwelling or the immediately surrounding area. (See *Hester v. U.S.*, 265 U.S. 57 (1924)).

In *Katz v. U.S.*, 389 U.S. 347 (1967) the Supreme Court determined that "the Fourth Amendment protects people, not places." In *Hester*, the court decided that the special protection accorded to people by the Fourth Amendment is not extended to the open fields. Passage of the proposed amendments would extend procedural requirements well beyond what the Supreme Court has deter-

mined the Constitution requires to protect the people from unreasonable searches.

4. Consistent with outstanding case law, the dwellings and curtilage (an area of domestic use immediately surrounding a dwelling) on agricultural premises may not be entered by Service officers without consent or a valid search warrant.

5. The present proposed amendments apparently would not affect INS authority within 25 miles of the border. ("Notwithstanding any other provision of this section other than paragraph (3) subsection (4) . . .")

6. The proposed amendment, if passed, would definitely adversely affect the ability of the Immigration and Naturalization Service, particularly the Border Patrol, to enforce the immigration laws. Farm and Ranch operations presently account for the apprehension of approximately 60,000 employed illegal aliens annually. Passage of the proposed amendment would drastically reduce these apprehensions. Although it is difficult to know the precise extent to which this number would be decreased, the proposed legislation would seriously curtail Farm and Ranch Operations as an effective enforcement tool.

7. Should farm and ranch checks by Service officers be substantially curtailed, there could be serious additional ramifications on the migration of illegal aliens to the interior.

The ineffectiveness of Service Farm and Ranch enforcement resulting from passage of the proposed amendment would tend to create a type of "free zone" for illegal aliens in the agricultural areas of the interior, as it would be extremely difficult or impossible to effect their apprehension and removal. This would tend to stabilize the status of these individuals, which, in turn would encourage them to bring in other family members—spouses, children, etc., in light of the reduced risk of Service detection. Internal migration could be expected to increase resulting in added burdens to American social and educational systems within the rural areas of the interior.

8. The proposed amendment would seriously reduce the Service officers' capability to effectively track and pursue large groups or smuggled aliens or other illegal entrants who are enroute from border areas to interior locations. Presently the INS enters into long-term agreements with landowners outside the 25 mile limit in order to maintain continuity of surveillance and tracking across private lands. The Hayakawa amendment would discourage such agreements and possibly render existing agreements invalid by requiring entry only with a warrant.

Such circumstances would result in smuggling groups traveling virtually unchecked across private lands and into the interior where they would be undetected.

9. The effect of the proposed amendments on Service anti-smuggling activities is in part related to INS officers' ability to track and detect smugglers and smuggling groups across open areas into their interior. If this activity were seriously restricted by warrant or consent requirements, the overall result could be expected to be fewer smuggling groups detected, less smuggling information and intelligence gathered, and fewer smugglers apprehended and prosecuted.

Furthermore, the owners and management personnel of farms or other agricultural related businesses (e.g., labor contractors) are, in some cases, principals in felony investigations involving alien smuggling, harboring, and transporting. It would be vir-

tually impossible to effectively implicate such individuals if the consent or warrant requirements were legislated.

10. The proposed amendment could be anticipated to have a definite adverse effect on the enforcement of employer sanctions provisions in agricultural areas. Because warrants would be rendered ineffective [No. 2(a)] and consent would infrequently be granted, it would be impossible to effect the apprehension of illegal aliens employed in these areas. Cases against notorious employers of illegal aliens would be difficult, effectively placing these employers outside the range of sanctions enforcement.

11. The INS does not selectively enforce the immigration laws with regard to agricultural areas. In support of his amendment, Senator Hayakawa has cited a statistic that almost 50 percent of undocumented alien workers apprehended by INS are in agriculture. Actually, of the approximately one million Service apprehensions annually (953,475 in fiscal year 1981) only 8 percent are located in agricultural occupations.

Of the one million illegal aliens apprehended yearly by Service officers, approximately 168,000 (in fiscal year 1981) are located after they have entered the United States and secured employment. Half of these employed aliens are located in agriculture, including almost 60,000 which are apprehended as a result of Farm and Ranch checks.

It should be remembered however, that Farm and Ranch Operations are conducted by the Border Patrol which represents this Agency's greatest enforcement presence, with jurisdiction predominantly in agricultural areas along the Southern and Northern borders of the United States. It is not unreasonable to expect that of the number of employed aliens apprehended by the Border Patrol, the majority would be working in agricultural occupations.

The Immigration and Naturalization Service maintains that a more accurate reflection of Service resource allocation for enforcement in agricultural areas is the percentage of actual enforcement time devoted to such activity rather than the apprehensions which result. The overall percentage of INS field enforcement man-hours devoted solely to effect the apprehension of illegal aliens in agricultural occupations in fiscal year 1981 was 2.0 percent.

In conclusion, it is our opinion that the hyper-technical requirements mandated by the Hayakawa amendment would have a definite adverse impact on the enforcement capabilities of INS and, in essence, would be antagonistic to the basic thrust of S. 2222—which is to control illegal immigration into this country.

Please do not hesitate to contact me if I can provide further information on this matter. And congratulations on your success in bringing this important legislation to the floor of the Senate.

Sincerely,

ALAN C. NELSON,
Commissioner.

Mr. SIMPSON. Let me say in conclusion that there was commentary during the early effort of the Senator from California on this issue that the INS was selectively enforcing the laws. The Senator cited a statistic that almost 50 percent of undocumented alien workers apprehended by the INS are in agriculture.

Actually, in terms of the record, there are approximately 1 million apprehensions annually 953,475 in fiscal year 1981, and only 8 percent were located in agricultural occupations. Of the 1 million illegal aliens apprehended yearly by the Service, approximately 168,000 are located after they entered the United States and secured employment, and half of those are located in agriculture, including almost 60,000 which are apprehended as a result of farm and ranch checks.

The most significant thing, to put it in perspective, is that a more accurate reflection of the Service's resources and allocations on this issue of enforcement in agricultural areas is the percentage of actual enforcement time devoted to that kind of activity, rather than as to the apprehensions within that area. The overall percentage of INS field enforcement man-hours devoted solely to apprehensions of illegal aliens in agricultural occupations in fiscal year 1981 was 2 percent.

I think those are rather significant figures. If this amendment were to pass, what we would effectively have is a free zone for illegal aliens in the United States of America, known for the lack of any appreciable enforcement or apprehensions. In other words, this amendment would create a type of free zone for illegal aliens in the agricultural areas of the interior of our Nation, making it extremely difficult or impossible to effect their apprehension or their removal.

I think such an amendment would also perpetuate the status quo for these illegal immigrants. They are going to stay there. They will, in turn, be encouraged to bring in their family members, their spouses, their children, in light of the reduced risk of detection in these zones. I think illegal migration in the interior of the United States could be expected to increase.

Those are some of the reasons. The rest of the reasons are very clearly set out in the letter from the Commissioner of the Immigration and Naturalization Service.

Mr. President, for those reasons, I urge defeat of the amendment.

The PRESIDING OFFICER. The Senator from California.

Mr. HAYAKAWA. I am ready to yield back the remainder of my time.

The PRESIDING OFFICER. There has been no allocation of time.

Mr. SIMPSON. I believe we have a unanimous-consent request that on the next amendment we have 30 minutes equally divided as a time limitation. I ask unanimous consent that that be the limitation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Would the Senator from California be agreeable to laying the pending amendment aside for the consideration of another amendment?

Mr. HAYAKAWA. I have two more amendments to offer.

The PRESIDING OFFICER. The Senator will have to dispose of the pending amendment before we proceed to another amendment. The Chair would suggest that the Senator ask unanimous consent that the pending amendment be set aside.

Mr. HAYAKAWA. First of all, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Under the previous order, a vote on the amendment will take place after 9 a.m. on Tuesday.

Without objection, the pending amendment will be set aside. The Senator can offer another amendment.

AMENDMENT NO 2019

(Purpose: To express the sense of the Congress that English be declared the official language of the United States)

Mr. HAYAKAWA. Mr. President, I call up amendment No. 2019 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from California (Mr. HAYAKAWA) proposes an amendment numbered 2019.

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that further reading of the amendment of dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

TITLE V—SENSE OF THE CONGRESS

SEC. 501. It is the sense of the Congress that—

(1) the English language is the official language of the United States, and

(2) no language other than the English language is recognized as the official language of the United States.

Mr. HAYAKAWA. Mr. President, this amendment declares that it is the sense of the Congress that the English language is the official language of the United States and that no language other than the English language is recognized as the official language of the United States.

I would like to add as cosponsors Senator LAXALT and Senator DENTON.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HAYAKAWA. Language is a unifying instrument which binds people together. When people speak one language they become as one, they become a society.

In the Book of Genesis, it says when the Lord saw that mankind spoke one universal language. He said, "Behold, they are one people, and they all have the same language * * * and nothing which they propose to do will be impossible for them."

If you will recall the Bible story, God destroyed this power by giving mankind many languages rather than the one. So you had the proliferation of language breaking up human pride and, therefore, human power.

But there are more recent political lessons to be drawn on the subject of language when you think that right here in this U.S. Senate and the Congress we have descendants of speakers of at least 250 to 350 languages. If you go back to the grandparents of just the Members of Congress, you have speakers of, I would say, at least 350 languages. But we meet here as speakers of one language. We may disagree when we argue, but at least we understand each other when we argue. Because we can argue with each other, we can also come to agreements and we can create societies. That is how societies work.

Take in contrast to this the situation in, for example, Belgium, where a small country is sharply divided because half of the population speaks French and the other half speak Flemish. Those who speak Flemish do not like the people who speak French and those who speak French do not want to speak Flemish.

Think of Canada, just to the north of us, where the French-speaking people feel paranoid about the fact that they are a minority and feel that they are being picked upon and abused by the English-speaking majority.

Think about Ceylon, right now, of course, known as Sri Lanka. Sri Lanka is sharply divided right to this day because the speakers of Sinhalese, which is the language of Sri Lanka, and the speakers of Tamil, which is the language of India. A number of people moved from India into Sri Lanka, and they created a language bloc thus the two are fighting each other.

Think of the recent history of India. Between 1957 and 1968, something like 1 million people were killed in what were essentially language riots. They were riots about other things as well, about cultural differences, but essentially those cultural differences could not be resolved because there were a hundred languages there dividing those people. So they could not understand each other and they could not come to the resolutions we arrive at daily in a Chamber like this or in the House of Representatives.

So, Mr. President, the fact that we have a common language, one language, is one of the most important things we have tying us together. Now we live in a time of unprecedented immigration. Not only speakers of Spanish, but speakers of Cantonese, speakers of Thai, speakers of Vietnamese, speakers of a variety of European languages, speakers of Mandarin—they are coming from all over the world and joining us in our society.

From the Philippines, we have speakers of Tagalog and other Filipino languages. Somehow or other, within a generation or two, we have to get them all together, talking to each other, electing each other to city councils, doing business with each other, buying and selling from each other, creating governments, creating societies. We can only have this unified society if we ultimately agree on a common language.

This is not to say, Mr. President, that I oppose the study of other languages. We are very backward as a nation in our study of other languages. I think more of us should study Spanish. I am very proud of the fact that two of my children speak Spanish very well. I do not. One of them speaks Japanese, too. I do not.

I have told my students for many, many years, in the coming world that they will grow up in, certain languages are going to be important in world history that they will have to know. They ought to choose, as we go into the 21st century, at least one of these languages—Spanish, Russian, Chinese, Japanese, or Arabic. There are very few of my students who ever bothered studying any one of these languages. We are very poor at languages because we are linguistically provincial. Nothing I say in this amendment encouraging the use of an official language in the United States is intended to discourage the study of all languages around the world so we, in business and diplomacy, will be better represented around the world.

Mr. President, when you think there are 20,000 Japanese businessmen in New York speaking English and about 2,000 American businessmen in Tokyo not able to speak Japanese, you can see why there is a trade imbalance between Japan and the United States. I say in all seriousness, we ought to be linguistically more sophisticated than we are. At the same time, I believe we should unite as speakers of English insofar as we have a society in common.

Mr. President, the United States, a land of immigrants from every corner of the world, has been strengthened and unified because its newcomers have historically chosen ultimately to forgo their native language for the English language. We have all benefited from the sharing of ideas, of cultures and beliefs, made possible by a common language. We have all enriched each other.

The Italians are better for having lived next door to the Jews; the Jews are better for having socialized with the Chinese; the Chinese are better for having mixed with the Italians, and so on. All around, we are better Americans because we have all melded our cultures together into this wonderful cultural symphony which is the United States of America.

There are those who want separatism, who want bilingual balance, who want bilingual education. I am all in favor of bilingual education only insofar as it accelerates the learning of English. I do not believe that the taxpayer should be taxed to promote an enclave of speakers of Yiddish, speakers of Japanese, speakers of Spanish, speakers of Bulgarian, speakers of Russian, of Tibetan, or any other language. Essentially, the taxpayers' responsibility is to see to it that we all speak English together no matter where we come from. That cultural unity which we ultimately achieve—that is the United States.

If you think of the culture that we have, you think, as I said a little earlier, of the melding of cultures right here in Congress. You look at the lineup of any American professional baseball team or football team. You see all foreign names there, all English-speaking, all managing to get along, and you see what a miracle this is. The wonderful thing about the United States is that that kind of cultural intermixing, that cultural melding, is possible.

When you go to other parts of the world, you find to your amazement that China is full of Chinese; that Russia is full of Russians and practically nobody else. Italy is full of Italians and Korea is full of Koreans, and so on around the world. But we are full of people from all parts of the world having learned one language and ultimately having learned to get along with each other to create institutions of a multiracial, multicultural democratic society.

Mr. President, that is what I want to preserve when I say I want an amendment that says the English language shall be the official language of the United States.

I thank the Chair.

Mr. President, I do not know if the distinguished Senator from Wyoming wishes to make a further comment on this subject, but I yield to him.

Mr. SIMPSON. Mr. President, I hope many are aware of the deep feelings—I am sure they are now, after hearing him—of this remarkable linguist and semanticist in our midst, who will be retiring from this body at the end of this session.

When he speaks on issues of ethnicity and racism and English, he brings a very special perspective that is heard by all of us. I share many of the views of the Senator from California on the subject of the English language in this country. I have so indicated within the committee hearings. We have always indicated the importance of English as a unifying force in creating the American identity and the key part of it in relation to our public culture. I do not refer to the private culture, for no one in this Nation should intrude upon the

private culture of the various ethnic groups in this country.

I have been asked often in the course of the debate on the immigration bill, to hold a hearing on the subject of cultural unity, to discover and review and assess the social and cultural impacts of immigration on the United States of America. I can assure the Senator that I intend to hold a hearing on that subject, the discussion of common values and customs, public customs.

One of the witnesses at that hearing will be James Michener, who has asked to testify, and I have known that remarkable gentleman for some 5 years. He was in my home in Wyoming when he was writing his book "Centennial." I visited with him at St. Michaels, and he has shared with me this comment, that "the most serious problem that could confront the United States of America in the future is the issue of biculturalism." He is married to a Nisei, Maura Michener, and to hear them both speak on that issue is a fascinating thing.

So we will have that hearing. In the discussion of immigration, any reference to immigration reform or control turns out, unfortunately, to be a code word for ethnic discrimination. This bill, if it has done nothing else, has tried to avoid that association. It truly is not nativist, not racist, not mean, and for the purpose solely of avoiding any confusion as we discuss it in relation to this, I must oppose this amendment at this time. But I pledge that the hearings will be held on the issue of social and cultural impacts of immigration. The kickoff witness will be Jim Michener, and I am looking forward to that. It should be fascinating. I am sure the country will benefit from it. I thank the Chair and yield back the remainder of my time.

The PRESIDING OFFICER. Is all time yielded back? The Senator from California has 2 minutes 47 seconds. The Senator from Wyoming has 10 minutes 36 seconds.

Mr. HAYAKAWA. I yield to the Senator from North Carolina whatever time I have left.

Mr. HELMS. I do not desire time.

Mr. SIMPSON. Is the Senator from North Carolina requesting time on this amendment?

Mr. HELMS. No.

Mr. SIMPSON. I thought not. Therefore, I yield back the remainder of my time.

The PRESIDING OFFICER. If all time is yielded back, the question is on the amendment.

Mr. SIMPSON. The amendment under the previous order will come to a rollcall vote.

The PRESIDING OFFICER. Not unless the yeas and nays are ordered, and they have not been ordered.

Mr. HAYAKAWA. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The rollcall will take place after 10 a.m. on Tuesday. The amendment has been laid aside.

UP AMENDMENT NO. 1238

(Subsequently numbered amendment No. 2024.)

(Purpose: To set forth the policy of the Congress regarding State services to illegal aliens)

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I thank the Chair. I send an unprinted amendment to the desk and ask for its immediate consideration.

Mr. SIMPSON. Mr. President, I think I am correct in stating this unanimous-consent request, that there be 20 minutes on this amendment equally divided.

The PRESIDING OFFICER. Is there objection?

Mr. HELMS. Not at all, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 1238.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 162, line 11, strike out "REPORTS TO CONGRESS" and insert in lieu thereof "GENERAL PROVISIONS".

At the bottom of page 166, add the following:

POLICY REGARDING STATE SERVICES TO ILLEGAL ALIENS

SEC. 402. (a) Title I, as amended by section 122, is further amended by adding at the end thereof the following:

"POLICY REGARDING STATE SERVICES TO ILLEGAL ALIENS

"Sec. 108. (a) The Congress finds and declares that—

"(1) the illegal entry and residence of aliens within the United States have occurred in recent years at unprecedented rates and represent a threat to the national security of the United States and a burden on the Federal treasury;

"(2) the illegal entry and residence of aliens within the United States constitute a severe burden upon the States in all aspects of the enforcement of State laws and constitute a particular burden on State treasuries;

"(3) illegal aliens and their dependents do not contribute taxes sufficient to cover the cost of their presence to the States or to the United States;

"(4) insofar as the States provide free public services, especially public education,

to illegal aliens and their dependents, an incentive is created for illegal immigration; and

"(5) it is the policy of the United States to discourage illegal immigration, and Federal and State welfare, educational, and other social policies should accordingly be directed to this end;

"(6) consistent with national immigration policy as made by the Congress, the States should be free to provide or not to provide, in their discretion, free public services, including public education, to illegal aliens and their dependents.

"(b) No State shall be required to provide free public services, including free public education, to illegal aliens and their dependents."

(b) The table of contents for title I is amended by adding after the item relating to section 127 the following new item:

"Sec. 128. Policy regarding State services to illegal aliens."

On page 179, in the table of contents, strike out "TITLE IV—REPORTS TO CONGRESS" and insert in lieu thereof "TITLE IV—GENERAL PROVISIONS".

On page 79, in the table of contents, after the item relating to section 401, add the following new item:

"Sec. 402. Policy regarding State services to illegal aliens."

Mr. HELMS. Mr. President, this amendment seeks to establish a congressional policy to restore the right of the States to provide or not to provide, as they see fit, free public schooling and other benefits to illegal aliens. In a June 1982 case the Supreme Court ruled that in the absence of congressional policy on this matter the Constitution does not allow the States to withhold free public schooling from illegal aliens. I propose by this amendment to provide the congressional policy the Supreme Court said was lacking.

In the case of Plyer against Doe, the Court asserted that a distinction by the States between illegal aliens and legal residents in providing free public schooling was not "rational" under the Court's 14th amendment analysis. The Court, speaking through Justice Brennan said:

Faced with an equal protection challenge respecting the treatment of aliens, we agree that the courts must be attentive to congressional policy; the exercise of congressional power might well affect the State's prerogatives to afford differential treatment to a particular class of aliens. But we are unable to find in the congressional immigration scheme any statement of policy that might weigh significantly in arriving at an equal protection balance concerning the State's authority to deprive these children of an education.

Justice Brennan continued:

[I]n the area of special constitutional sensitivity presented by this case, and in the absence of any contrary indication fairly discernible in the present legislative record, we perceive no national policy that supports the state in denying these children an elementary education.

Mr. President, it is the purpose of my amendments to fill the gap in Federal policy perceived—rightly or

wrongly—by Justice Brennan. The amendment consists of two basic parts. The first part lists congressional findings and declarations to the effect that illegal immigration is a threat to national security and also burdens Federal and State treasuries. It further states that U.S. policy is to discourage illegal immigration and that the States should thus be free to provide or not provide public benefits to illegal aliens in their discretion.

The second part of my amendment reduces these principles to a provision of Federal law. It says: "No State shall be required to provide free public services, including free public education, to illegal aliens and their dependents."

The intent here is to restore the right of the States to withhold public services, if they so choose, consistent—I emphasize this—with Federal immigration law and policy.

Mr. President, I reserve the remainder of my time.

Mr. SIMPSON. Mr. President, I suggest the absence of a quorum. I have not yet received a copy of the amendment.

The PRESIDING OFFICER (Mr. ANDREWS). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. HAWKINS. Mr. President, I try to take every opportunity to inform my colleagues and the Reagan administration of the immigration problems that plague my State, Florida. By now, I am sure everyone is aware that the 125,000 Cubans that arrived on Florida's shores during the 1980 Mariel boatlift have resulted in tremendous economic and social costs to my State. And that those costs continue to mount 2 years later. The people of Florida feel like they have been abandoned by the Federal Government. They are also concerned that there is nothing to prevent Florida from being overwhelmed again should the leader of a hostile foreign power instigate another emergency.

It was a great disappointment to me when I learned that the immigration bill before us, does not address this fear. As a result, I felt compelled to offer an amendment to S. 2222 that would reassure Florida and other States that could be threatened by hostile foreign leaders. My amendment was based on a simple premise. Foreign policy and defense are solely a Federal responsibility. States are not permitted to conduct their own foreign policies or maintain armies and navies. Hence, when our foreign policy fails communities held hostage by Federal action or inaction, it is the re-

sponsibility of the Federal Government to hold them harmless.

Based on this principle I intend to offer an amendment to reimburse communities devastated by undocumented aliens due to foreign policy blunders. However, I believe that this might complicate swift and final action on this very important piece of legislation. And due to the exceptional consideration of the distinguished Senator from Wyoming, I believe it is no longer necessary. Senator SIMPSON has shown extraordinary understanding and sympathy for the problems facing Florida. I believe that he is committed to addressing many of those problems before the end of this session of Congress.

I have received assurances from my friend from Wyoming that the amendment that I had intended to offer will now be considered when the Senate Immigration Subcommittee holds hearings and markup on the reauthorization of the Refugee Act of 1980. I have spoken with the distinguished chairman of the House Subcommittee on Immigration, Refugees and International Law, RON MAZZOLI. He indicated that though the issue raised by my amendment was not included in the reauthorization of the Refugee Act of 1980, as recently passed by the House, he is sympathetic to its consideration on the bill. I express my gratitude to Chairman MAZZOLI and also my colleague from Florida, Congressman BILL MCCOLLUM, with whom I have been working closely on this issue. Both of these men have dedicated themselves to the critical need to reform our immigration laws. I was particularly impressed to find Chairman MAZZOLI spending much of the day yesterday on the floor of the Senate. There could, I believe, have been no more eloquent statement of the gentleman from Kentucky's concern and commitment to this issue.

Mr. President, I offer special thanks to my friend from Wyoming. He has made every effort to accommodate my concerns regarding this issue. But not only this, Senator SIMPSON has shown great skill, leadership, and determination in bringing this vital legislation to the Senate floor. And I believe he deserves the very highest commendation for his efforts.

Mr. SIMPSON. Mr. President, I am very appreciative of the concern evidenced by the very able Republican Senator from Florida. Her concern has been a continuing one. She has testified before the Senate Subcommittee on Immigration and Refugee Policy and, in addition has made personal representations to me on a number of occasions bringing clearly home to me and my colleagues in the Congress the terrible difficulty caused by the inability of the Federal Government to respond to the Cuban-Haitian influx in Florida from April to October 1980.

She has sincerely and appropriately stated that there is a need both for new legislation and for advanced planning which will prevent such an influx from again incurring and causing such a burdensome impact on the citizens of Florida.

Refugees are a Federal responsibility and it is the Federal Government's duty to protect citizens of the various States, particularly citizens of border States, from sudden inflows of refugees and asylees that impact on the social services of a State and on the quality of life in the United States.

I do want to now assure the Senator from Florida that immediately after the disposal of S. 2222 I shall request the administration to submit to the subcommittee on Immigration its form of emergency legislation which will address all of the issues that she has raised so cogently before this body. The legislation will address Presidential powers to interdict ships coming inappropriately to our shores, prevention of U.S. citizens and permanent residents from assisting those coming to the United States without authorization.

In addition all forms of financial assistance to areas impacted by the refugee emergencies will be covered during our hearings on the Refugee Act of 1980 reauthorization.

I can assure the Senator from Florida that her amendment will be considered during our hearings on the Refugee Act of 1980 and that act will be reported out during September 1982.

Let me say again that I am very much personally aware of the problems that exist in Florida and appreciate the representations by the Senator from Florida and want to assist in her effort to assure that the Federal Government will be able to respond swiftly and fully to these situations in the future.

UP AMENDMENT NO. 1239

Mr. SIMPSON. Mr. President, I ask unanimous consent at this time that the Helms amendment be set aside so that I may propose various committee amendments to be considered en bloc as one unprinted amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Could the Senator send the committee amendments to the desk?

Mr. SIMPSON. Yes, indeed.

Mr. President, I send committee amendments as an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wyoming (Mr. SIMPSON) proposes committee amendments as unprinted amendment numbered 1239.

Mr. SIMPSON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

IV. REPORTS TO CONGRESS

Sec. 401. (a) On page 163, line 15, delete all that follows "Act" and insert in lieu thereof the following:

"Reports concerning the matters described in subparagraphs (D) and (E) of paragraph (3) shall be submitted three times: the first not later than 18 months after the date of enactment of this Act, the second not later than 36 months after the date of enactment of this Act, and the third not later than 54 months after the date of enactment of this Act."

Amendment intended to permit more frequent periodic reports (every 18 months) rather than only one report after 36 months as in existing Committee bill.

H-2 WORKERS

Page 142, line 6. After the word "employed" delete the comma and insert in lieu thereof a period.

Page 142, line 7. Delete the words "and such certification has been issued."

Deletion intended to continue existing situation where Secretary of Labor's certification is advisory to AG.

TITLE II REFORM OF LEGAL IMMIGRATION

On page 126 lines 6 and 7, and lines 23 delete March 1, 1982 and substitute in lieu thereof May 27, 1982.

Amendment designed to provide additional safeguards for fifth preference persons who had petitions approved and second preference sons and daughters who had petitions approved.

Mr. SIMPSON. Mr. President, I reviewed this with the sponsors and we then will proceed with Senator HAYAKAWA's amendment momentarily.

Mr. President, these committee amendments are with relation to reports, with relation to certification, and with relation to the dates on preference categories.

Mr. President, I ask that the amendment be adopted.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wyoming.

The amendment (UP No. 1239) was agreed to.

Mr. SIMPSON. Mr. President, is the status of business that the Helms amendment is presently set aside?

The PRESIDING OFFICER. The status of business is that the Helms amendment was set aside before the Senator from Wyoming made his proposals on these other amendments.

Mr. SIMPSON. I thank the Chair and I appreciate that clarification.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1240

(Subsequently numbered Amendment No. 2025.)

(Purpose: To add a title relating to providing educational assistance for children of illegal aliens)

Mr. HAYAKAWA. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from California (Mr. HAYAKAWA) proposes an unprinted amendment numbered 1240.

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 78, line 14, strike out "This" and insert in lieu thereof "Titles I through IV of this".

At the bottom of page 79, add the following:

TITLE V—ALIEN CHILDREN EDUCATION ASSISTANCE

Sec. 501. Short title.

Sec. 502. Definitions.

Sec. 503. Reimbursement payment.

Sec. 504. Applications.

Sec. 505. Withholding.

Sec. 506. Payments.

Sec. 507. Authorization of appropriations.

At the bottom of page 166, add the following:

TITLE V—ALIEN CHILDREN EDUCATION ASSISTANCE

Sec. 501. This title may be cited as the "Alien Children Educational Services Assistance Act".

DEFINITIONS

Sec. 502. As used in this title—

(1) the term "alien children" means undocumented aliens to whom State or local educational agencies are required by order of any Federal court to provide educational services or who are permitted under any such order to receive the benefits of State funds available for educational purposes. Any person who is an alien child (as described in the preceding sentence) at any time after the date of the enactment of this title shall be considered to maintain such status for purposes of this title regardless of any subsequent change in status under any other law;

(2) the term "local educational agency" has the same meaning given the term under section 198(a)(10) of the Elementary and Secondary Education Act of 1965;

(3) the term "State educational agency" has the same meaning given the term under section 198(a)(17) of the Elementary and Secondary Education Act of 1965; and

(4) the term "State" means a State and the District of Columbia.

REIMBURSEMENT PAYMENT

Sec. 503. (a) Each State educational agency and each local educational agency in a State shall receive reimbursement for reasonable costs of providing educational services to alien children within the State, except that no reimbursement payment under this title may exceed \$450 for each such child in any fiscal year.

(b) A State educational agency may receive a payment under subsection (a) only

for directly providing educational services to alien children in the schools of such agencies.

APPLICATIONS

Sec. 504. Each State educational agency and each local educational agency which is authorized to receive assistance under this title shall submit an application at such time, in such manner, and containing or accompanied by such information as the Secretary deems reasonably necessary. Each application shall—

(1) describe the costs of providing educational services to alien children within the State by the applicant;

(2) provide such audit procedures as are necessary to verify the number of alien children eligible for assistance and receiving assistance under this title; and

(3) provide such fiscal control and such accounting procedures as may be necessary (A) to insure a proper accounting of Federal funds paid to the applicant under this title, and (B) to insure the verification of the costs of furnishing educational services to alien children by the applicant.

(b) The Secretary shall expeditiously approve any application that meets the requirements of this section.

WITHHOLDING

Sec. 505. Whenever the Secretary, after reasonable notice and opportunity for a hearing to any State or local educational agency, finds that there has been failure to comply with the provisions set forth in the application of that agency approved under section 504, the Secretary shall notify the agency that further payments will not be made under this title until the Secretary is satisfied that there is no longer any such failure to comply. Until the Secretary is so satisfied, no further payments shall be made under this title.

PAYMENTS

Sec. 506. (a) From amounts available under section 507, the Secretary shall pay, in accordance with the provisions of this title, to each State or local educational agency which has an application approved under section 504, an amount equal to the amount needed for the purposes set forth in the application.

(b)(1) Payments under this title shall be made as soon after approval of the application as practicable.

(2) Payments under this title may be made in installments, in advance or by way of reimbursement with necessary adjustments on account of overpayments and underpayments.

AUTHORIZATION OF APPROPRIATIONS

Sec. 507. There are authorized to be appropriated such sums as may be necessary for fiscal year 1984 and for each succeeding fiscal year ending prior to October 1, 1986, to carry out the provisions of this title.

Mr. HAYAKAWA. Mr. President, on June 15, 1982, the U.S. Supreme Court ruled that States may not deny a free public education to alien children illegally present in the United States.

In both the concurring and dissenting opinions, Congress was chastized and scolded by the Court for failure to set a national policy regarding illegal immigration. My fellow colleagues, I, too, feel that by not addressing this problem we have neglected our duties and responsibilities to our Nation. The States, counties, and school districts

are now faced with a tremendous problem: Now to pay for the education of those children of undocumented workers or aliens who attend their public schools.

Mr. President, I have a solution to this problem. I am submitting an amendment to this bill which gives Federal reimbursement assistance to those States and local educational agencies affected by the decision of the Supreme Court.

I decided to offer this amendment after reading and discussing the High Court's opinions, however a strong belief and philosophy in the value of education is the basis of my action. The education of a child, any child, whether a citizen of this Nation or not, is an important matter. This is exactly that the Court expressed when reviewing the case of Plyler against Doe, Texas against certain undocumented alien children. In deciding the fate of those undocumented alien children, the Court, for the first time ever, applied to illegal aliens the 14th amendment promise that no State shall "deny to any person within its jurisdiction the equal protection of the laws."

The majority opinion is a very precise statement of American truth and justice. The Court ruled that illegal aliens are persons protected by the Constitution's guarantee of equal protection and that the Texas law violated this guarantee.

It was argued that these undocumented workers were not persons within the jurisdiction of the State and thus had no right to equal protection. Fortunately, this was rejected by the majority and Justice Brennan wrote:

Whatever his status under the immigration laws, an alien is surely a "person" in any ordinary sense of that term. The equal protection clause was intended to work nothing less than the abolition of all caste- and individuals, class-based legislation.

This very law that the Court's rule pointed to is what makes our Nation so great. Why do we have hordes of people from all over the world coming to our shores, crossing over our borders—illegally—risking life and limb to gain entry into America? It is because our Constitution has been a beacon of light and shimmering hope not only to the people of this Nation, but to people of all nations for over 200 years. It sets down principles and truths to establish justice in the message that all men shall be treated equally.

I strongly agree with Justice Brennan when he wrote of the "ensuring disability" alien children would suffer if denied a public education. He said education:

Has a fundamental role in maintaining the fabric of our society. We cannot ignore the significant social cast borne by our nation when select groups are denied the

means to absorb the values and skills upon which our social order rests.

It was Justice Powell who said:

Congress—vested by the Constitution with the responsibility of protecting our borders and legislating with respect to aliens—has not provided effective leadership in dealing with this problem. It therefore is certain that illegal aliens will continue to enter the United States and, as the record makes clear, an unknown percentage of them will remain here. I agree with the Court that their children should not be left on the streets uneducated.

I am not saying, as Justice Brennan so carefully refrained from arguing, that free education is a "fundamental right" but "neither is it merely some Government benefit indistinguishable from other forms of social welfare legislation." I don't believe education should be considered a form of welfare and put into the same category as food stamps or aid to families with dependent children. It is a highly motivating vehicle which can be used to steer one's life away from such dependent vices as welfare.

It is clear to me that we as legislators have failed to provide this Nation with effective immigration policies. This amendment corrects a weakness in S. 2222 and I urge my colleagues to vote with me for a strong and more cohesive immigration bill.

Mr. SIMPSON. Mr. President, I understand fully the intent of the Senator from California, what this amendment intends to do. But I really believe that this amendment is outside of the basic scope of S. 2222 because, rather than focusing on control and reform, we are focusing on the issue of providing a service.

Further, S. 2222 provides for the control of future illegal immigration and channels the current population of undocumented aliens into legal status.

It would be counter, I think, to the intent of this legislation to begin authorizing Federal funds for services for illegal immigrants. We handled that in the Grassley amendment with regard to block grants.

We sincerely believe that future illegal immigration will be drastically curtailed through the adoption of employer sanctions and the universal verifier. As I say, we have provided these block grants to meet the basic subsistence programs provided to legalized aliens by States and counties.

We have tried to assure that this is not a bill involved with expenditures, except for those that are absolutely necessary to meet the needs of control.

Therefore, I resist the amendment, but assure the Senator from California that we will have hearings on this issue because certainly it does have to do with the issue of immigration, and the subcommittee is the Subcommittee on Immigration and Refugee Policy.

We will have hearings on this issue and address not only the issue addressed by this amendment, but also the amendment of Senator TOWER, which will be presented in several minutes, and also the amendment of Senator HELMS, which we will again address in a few moments.

All three of those amendments will be addressed in hearings of the subcommittee because they are indeed critically important.

Mr. President, I yield back the remainder of my time, if we have a time agreement. I am not certain that we have a time agreement on that amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment. Those in favor of the amendment will signify by saying aye; those opposed, no.

The amendment (UP No. 1240) was rejected.

Mr. SIMPSON. Mr. President, I believe the sponsor of the amendment would like to wait until he consults with Senator TOWER, who will be in the Chamber in a few moments, to determine whether or not he wants to have a voice vote.

I ask unanimous consent that the voice vote on the amendment be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. But it was fun for a moment.

Mr. President, we now await Senator TOWER. His is the last amendment that I am aware of. We will also deal with placing back on the floor the amendment of Senator HELMS.

AMENDMENT NO. 1954

(Purpose: To require that hearings on asylum applications shall be closed to the public unless the applicant requests otherwise)

UP AMENDMENT NO. 1241

Mr. SIMPSON. Mr. President, at this time, on behalf of Senator KENNEDY, I send two amendments to the desk, one unprinted, and ask for their immediate consideration.

The PRESIDING OFFICER. Does the Senator request unanimous consent that the amendment proposed by the Senator from California be temporarily set aside?

Mr. SIMPSON. I would ask unanimous consent under these circumstances that it be set aside, temporarily.

The PRESIDING OFFICER. Without objection, it is so ordered.

Does the Senator ask that these amendments be considered en bloc?

Mr. SIMPSON. Mr. President, I am not aware at this time whether that is the case. I will have to clear that with the sponsor.

The PRESIDING OFFICER. The Senator may send them up singly.

Mr. SIMPSON. Mr. President, I thought the Chair was asking about

the amendment of the Senator from California.

The PRESIDING OFFICER. The amendment of the Senator from California has been set aside temporarily, by unanimous consent. The amendments that we are now discussing are the two amendments which were to be offered by the Senator from Massachusetts. The question of the Chair was, Did the Senator from Wyoming desire to have these two amendments considered en bloc?

Mr. SIMPSON. My response to that question on those two amendments is yes.

The PRESIDING OFFICER. Without objection, the amendments will be considered en bloc.

The amendments will be stated.

The legislative clerk read as follows:

The Senator from Wyoming (Mr. SIMPSON), for Mr. KENNEDY, proposes amendment numbered 1954 and unprinted amendment numbered 1241.

Mr. SIMPSON. Mr. President, I ask unanimous consent that further reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments are as follows:

AMENDMENT NO. 1954

On page 107, line 16, strike out "open" and insert in lieu thereof "closed".

On page 107, line 17, strike out "closed" and insert in lieu thereof "open".

UP AMENDMENT NO. 1241

Page 109, following line 18.

This amendment provides for exemption from disclosure of asylum and asylum related records and documents. This provision is necessary to safeguard asylum applicants and others who may be endangered by disclosure of asylum information. Such records or documents could be released to a court if they were needed in a case and their release served the interests of justice. This exemption from disclosure is consistent with the Freedom of Information Act.

Mr. SIMPSON. Mr. President, on behalf of Senator KENNEDY, I have sent those two amendments to the desk. These amendments protect the privacy of asylum applicants.

Mr. President, I am supportive of the amendments, I think they are an important addition.

● Mr. KENNEDY. Mr. President, I am offering this amendment at the suggestion of officials in the Department of State to allow asylum proceedings to be closed unless the asylum applicant wishes to have them open to the public.

This is necessary, Mr. President, to protect asylum applicants. They are seeking asylum precisely because they fear persecution in their native lands—many at the hands of their governments. To force them to state in public their grounds for seeking asylum may have serious consequences for their families who remain behind as well as to themselves.

There is no effort here restricting the asylum process, or to shroud it in secrecy. If an applicant desires, for any reason, to have the asylum hearing open, he can do so.

Mr. President, this small change has also been recommended by the Attorney General and is supported by the administration. I urge its adoption.●

The PRESIDING OFFICER. Without objection, the amendments are agreed to.

The amendment (No. 1954) was agreed to.

The amendment (UP No. 1241) was agreed to.

Mr. SIMPSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HAYAKAWA). Without objection, it is so ordered.

UP AMENDMENT NO. 1238

Mr. SIMPSON. Mr. President, I believe we set aside the Helms amendment. I ask unanimous consent that that be the pending business.

The PRESIDING OFFICER. That would be the pending business.

Mr. SIMPSON. Mr. President, I have now had the opportunity to review the amendment of the Senator from North Carolina. I regret to say that I must reluctantly resist the amendment at this time and at the appropriate moment, I shall move to lay the amendment on the table.

The issues raised in the now famous Plyler against Doe case are very, very important, very significant. I believe that those issues deserve more consideration than we can possibly devote to them at this time. I do not feel comfortable with addressing the tremendous scope of that case at this time.

The case itself is terribly controversial. There are issues of congressional intent and policy in that case.

I really am unable at this time to assess the full implications of that case. We are going to know a lot more soon, when we see if it spreads into areas other than education.

I pledge to the Senator from North Carolina that I shall hold a hearing on this very controversial matter as soon as it is possible. I believe many Senators, including the sponsors of this bill, will be very interested in the testimony of experts and other interested parties as we pursue the true impact of this case.

Mr. President, that concludes my remarks on the amendment. On behalf of the sponsor, Mr. President, I request the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SIMPSON. Mr. President, I move to table the amendment and I ask for the yeas and nays on that motion.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

UP AMENDMENT 1242

(Subsequently Numbered Amendment 2026.)

(Purpose: To add a title relating to providing education assistance for alien children)

Mr. SIMPSON. Mr. President, I send an amendment to the desk on behalf of the Senator from Texas and ask that it be immediately considered.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Wyoming (Mr. SIMPSON), on behalf of Mr. TOWER, proposes an unprinted amendment numbered 1242.

Mr. SIMPSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 78, line 14, strike out "This" and insert in lieu thereof "Titles I through IV of this".

At the bottom of page 79, add the following:

TITLE V—ALIEN EDUCATION ASSISTANCE

PART A—GENERAL PROVISIONS

Sec. 501. Short title.

Sec. 502. Definitions.

Sec. 503. Authorizations and allocation of appropriations.

Sec. 504. Treatment of certain jurisdictions.

Sec. 505. State administrative costs.

Sec. 506. Withholding.

Sec. 507. Application of certain rules.

PART B—GENERAL ASSISTANCE FOR LOCAL EDUCATIONAL AGENCIES

Sec. 511. State entitlements.

Sec. 512. Applications.

Sec. 513. Payments.

At the bottom of page 166, add the following:

TITLE V—ALIEN EDUCATION ASSISTANCE

PART A—GENERAL PROVISIONS

SHORT TITLE

Sec. 501. This title may be cited as the "Alien Education Assistance Act".

DEFINITIONS

Sec. 502. As used in this title:

(1) The term "alien children" means aliens to whom State or local educational agencies provide educational services, and includes Cuban and Haitian refugee children (as defined in section 101 of the Refugee Education Assistance Act of 1980). Any person who is an alien child (as described in the preceding sentence) at any time after the date of the enactment of this Act shall be considered to maintain such status for

purposes of this Act regardless of any subsequent change in status under any other law.

(2) The terms "average per pupil expenditure", "construction", "elementary school", "local educational agency", "secondary school", "school facilities", "State", and "State educational agency" have the meanings given such terms under section 198(a) of the Elementary and Secondary Education Act of 1965.

(3) The term "elementary or secondary nonpublic schools" means schools which comply with the compulsory education laws of the State and which are exempt from taxation under section 501(c)(3) of the Internal Revenue Code of 1954.

(4) The term "Secretary" means the Secretary of Education.

AUTHORIZATIONS AND ALLOCATION OF APPROPRIATIONS

SEC. 503. (a) There are authorized to be appropriated for each of the fiscal years 1984, 1985, and 1986, to remain available until expended and subject to allocation in accordance with subsection (b), such sums, but not to exceed \$68,000,000 in any fiscal year, as may be necessary to make payments to which State educational agencies are entitled under this title and payments for administration under section 505.

(b)(1) If the sums appropriated for any fiscal year to make payments to States under this title are not sufficient to pay in full the sum of the amounts which State educational agencies are entitled to receive under part B for such year, the allocations to State educational agencies under each of such parts shall be ratably reduced by the same percentage to the extent necessary to bring the aggregate of such allocations within the limits of the amounts so appropriated.

(2) In the event that funds become available for making payments under this title for any period after allocations have been made under paragraph (1) of this subsection for such period, the amounts reduced under such paragraph shall be increased on the same basis as they were reduced.

TREATMENT OF CERTAIN JURISDICTIONS

SEC. 504. (a) The jurisdictions to which this section applies are Guam, American Samoa, the Virgin Islands, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands.

(b)(1) Each jurisdiction to which this section applies shall be entitled to grants for the purposes set forth in section 511(a) in amounts equal to amounts determined by the Secretary in accordance with criteria established by the Secretary, except that the aggregate of the amount to which such jurisdictions are so entitled for any period for the purposes set forth in section 511(a), shall not exceed an amount equal to 1 per centum of the aggregate of the amounts to which all States are entitled under section 511 for that period.

(2) If the aggregate of the amounts determined by the Secretary pursuant to paragraph (1) to be so needed for any period exceeds an amount equal to such 1 per centum limitation, the entitlement of each such jurisdiction shall be reduced proportionately until such aggregate does not exceed such limitation.

STATE ADMINISTRATIVE COSTS

SEC. 505. The Secretary is authorized to pay to each State educational agency amounts equal to the amounts expended by it for the proper and efficient administration of its functions under this Act, except

that the total of such payments for any period shall not exceed 1 per centum of the amounts which that State educational agency is entitled to receive for that period under this title.

WITHHOLDING

SEC. 506. Whenever the Secretary, after reasonable notice and opportunity for a hearing to any State educational agency, finds that there is a failure to meet the requirements of part A or B of this title, the Secretary shall notify that agency that further payments will not be made to the agency under such part, or in the discretion of the Secretary, that the State educational agency shall not make further payments under such part to specified local educational agencies whose actions cause or are involved in such failure until the Secretary is satisfied that there is no longer any such failure to comply. Until the Secretary is so satisfied, no further payments shall be made to the State educational agency under such part, or payments by the State educational agency under such part shall be limited to local educational agencies whose actions did not cause or were not involved in the failure, as the case may be.

APPLICATION OF CERTAIN RULES

SEC. 507. Notwithstanding any other provision of law, classroom facilities obtained by a local educational agency with assistance under title I of the Elementary and Secondary Education Act of 1965 may be used in any fiscal year for educational services of alien children if the number of alien children enrolled in the elementary or secondary public schools under the jurisdiction of such agency, during that fiscal year, is equal to—

- (1) at least 500, or
- (2) at least 5 per centum of the total number of students enrolled in the public elementary or secondary schools during such fiscal year, whichever is less.

PART B—GENERAL ASSISTANCE FOR LOCAL EDUCATIONAL AGENCIES STATE ENTITLEMENTS

SEC. 511. (a) The Secretary shall, in accordance with the provisions of this part, make payments to State educational agencies for each of the fiscal years 1984, 1985, and 1986 for the purpose of assisting local educational agencies of that State in providing basic education for alien children. Payments made under this part to any State shall be used in accordance with applications approved under section 512 for public educational services for alien children enrolled in the elementary and secondary public schools under the jurisdiction of the local educational agencies of that State, or for the construction of necessary school facilities for such children, or both.

(b)(1) Except as provided in paragraph (2) and in subsection (c), the amount of the grant to which a State educational agency is entitled under this part, for any fiscal year described in subsection (a), shall be equal to the product of—

(A) the number of alien children enrolled in elementary or secondary public schools under the jurisdiction of each local educational agency within that State during the period for which the determination is made; multiplied by—

(B) the average per pupil expenditure in the State, or \$1,000, whichever is less.

(2) For the purpose of this subsection, the term "State" does not include Guam, American Samoa, the Virgin Islands, the Northern

Mariana Islands, and the Trust Territory of the Pacific Islands. The entitlements of such jurisdictions shall be determined in the manner specified in section 504, but for purposes of this part and section 506 any payments made under section 504 for the purposes set forth in section 511(a) shall be considered to be payments under this part.

(c) Determinations by the Secretary under this part for any period with respect to the number of alien children shall be made, whenever actual satisfactory data are not available, on the basis of estimates. No such determination shall operate because of an underestimate or overestimate to deprive any State educational agency of its entitlement to any payment (or the amount thereof) under this part to which such agency would be entitled had such determination been made on the basis of accurate data.

APPLICATIONS

SEC. 512. (a) No State educational agency shall be entitled to any payment under this part for any period unless that agency submits an application to the Secretary at such time, in such manner, and containing or accompanied by such information, as the Secretary may reasonably require. Each such application shall—

(1) provide that the payments under this part will be used for the purposes set forth in section 511(a);

(2) provide assurances that such payments will be distributed among local educational agencies within that State in accordance with section 511;

(3) provide assurances that the State educational agency will not finally disapprove in whole or in part any application for funds received under this part without first affording the local educational agency submitting the application for such funds reasonable notice and opportunity for a hearing;

(4) provide procedures for an accounting of the number of alien children within the State; and

(5) provide for periodic audits in accordance with the provisions of sections 434(a) and 435 of the General Education Provisions Act, and for making such reports as the Secretary may reasonably require to carry out this part.

(b) The Secretary shall approve an application which meets the requirements of subsection (a). The Secretary shall not finally disapprove an application of a State educational agency except after reasonable notice and opportunity for a hearing on the record to such agency.

PAYMENTS

SEC. 513. The Secretary shall pay to each State educational agency having an application approved under section 512 the amount which that State is entitled to receive under this part.

● Mr. TOWER. Mr. President, this amendment is in keeping with the directives of the Supreme Court that the additional costs of admitting these children to public schools might fairly be shared by the Federal and State Governments.

The Texas Education Agency estimates that there will be 25,000 illegal alien students enrolled in Texas schools in the upcoming school year, at a cost of \$62.5 million to the State. The amendment provides Federal assistance for fiscal years 1984, 1985, and 1986, up to \$68 million to those districts most affected. Each district with

a level of enrollment of undocumented aliens comprising 500 or 5 percent of the total would be entitled to an amount up to \$1,000 per child for costs associated with education. Such expenses could include both construction and operating costs.

Texas will educate these children willingly, but it would be unconscionable if the Federal Government were to shirk its responsibility for a situation it has created through allowing unregulated and underregulated flows of immigrants entrance to this country.

The mere numbers of undocumented alien children in this State and the fact that other States have been able to educate their alien population with minimal adverse consequences do not tell the full story. Cultural and linguistic barriers augment to a significant degree the normal costs associated with standard State educational programs. While these additional costs would present a problem for wealthy school districts, the majority of illegal alien students are enrolled in our poorest districts, such as Brownsville, where the market value of property utilized to determine a taxable base for support of public education is typically below the statewide mean. Especially in these heavily affected districts, Federal assistance is essential in order to maintain a standard of quality education for all children.

The high number of documented Spanish-speaking aliens in these areas further exacerbates the problem of providing for the special education needs—such as bilingual education programs—of a large Spanish-speaking school age population.

Citing Brownsville as an example:

City of 85,000; 39.3 percent below age 18, as opposed to nationwide of 28.1 percent below age 18; median value of owner-owned home nationwide is \$47,200, as compared to Brownsville which is \$28,500; average household in Brownsville is 3.69 persons, compared to 2.75 nationwide.

Sitting across the Rio Grande from Brownsville is Matamoros, which has a population of 300,000 and an economy hard hit by more than 30 percent inflation and a devalued peso. In addition, Brownsville has experienced a 4,000 increase in documented and undocumented public school enrollment over the last 2-year period.

This is not merely a "Texas" problem. Recent testimony presented estimates the number of undocumented alien students in Colorado at 5,000; refugees in Florida at 19,000. Employment opportunities, mobility factors, and the opportunity for free public education exist in all 50 States. As this population increases, it will continue to spread throughout the country.

Education experts testified before the House Subcommittee on Element-

tary, Secondary, and Vocational Education that the impact of these children will also be keenly felt in New York, New Jersey, Michigan, and Illinois.

Mr. President, I ask unanimous consent to have printed in the RECORD certain material in connection with this matter.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

OFFICE OF THE GOVERNOR,
Austin, Tex., July 14, 1982.

On June 15, 1982 the United States Supreme Court held in *Plyler v. Doe and Texas v. Certain Named and Unnamed Undocumented Alien Children* that Section 21.031 of the Texas Education Code, which withholds from local school districts any state funds for the education of children who were not "legally admitted" into the United States, and which authorizes local Texas school districts to deny enrollment to such children, violates the Equal Protection Clause of the Fourteenth Amendment. As you are aware, the Justices were narrowly divided in their 5-4 decision.

We, the elected leadership of the State of Texas, agree with the dissent filed by Chief Justice Burger in which Justices White, Rehnquist and O'Connor joined that:

"It does not follow, however, that a State should bear the costs of educating children whose illegal presence in this country results from the default of the political branches of the federal government. A State has no power to prevent unlawful immigration, and no power to deport illegal aliens: those powers are reserved exclusively to Congress and the Executive. If the federal government, properly chargeable with deporting illegal aliens, fails to do so, it should bear the burden of their presence here. Surely, if illegal alien children can be identified for purposes of this litigation, their parents can be identified for prompt deportation."

We have also noted that in the concurring opinion, Justice Powell expresses sympathy for the "exasperation" which the citizens and governing authorities in Texas must feel over this issue. In fact, he states that:

"Their responsibility, if any, for the influx of aliens is slight compared to that imposed by the Constitution on the federal government. So long as the ease of entry remains inviting, and the power to deport is exercised infrequently by the federal government, the additional expense of admitting these children to public schools might fairly be shared by the federal and state governments."

When one adds Justice Powell's comment to those of the dissenting Justices, it appears to us that the majority of the court has indicated that the expense of educating these children should be borne, at least in part, by the federal government.

There appear to be two courses of action open to Texas. One, Texas can pursue any available remedies through the courts. The other route, obviously more preferable, would be to proceed through the political process and work with Congress to obtain impact funding for those Texas school districts which are severely affected. The purpose of this letter is to ask your help in achieving the second alternative and to offer our assistance in any way possible to achieve that goal.

It is necessary to understand that, while Texas will abide by the majority opinion

which states that nothing is to be gained by creating a subclass of illiterate citizens and that children not in control of their residency should be afforded a public education, these students will in all likelihood be "high cost" students. It is our opinion that the majority of these students will need the benefit of bilingual education, compensatory work in academic subject areas and additional textbooks including bilingual versions thereof, and that at least the normal incidence of special education will occur. There will be additional maintenance and operation costs, increases in state equalization to those districts severely impacted, and further local enrichment funds and capital facilities required. It should be noted that these numbers do not include federal dollars, do not assume local property tax increases, and use statewide averages for local enrichment and debt service costs.

Additionally, one of our greatest concerns is that best estimates indicate that there are currently 25,000 illegal alien students in the public schools today and that many of these students became part of that system after the 1980 census counts were conducted. It is also anticipated that there will be continued growth of approximately 3000-5000 in average daily attendance per year. Therefore, few of the federal programs, with the exception of Special Education, that flow federal dollars to Texas school districts will reflect these counts. This has the practical effect of denying Texas school districts federal dollars which these students would normally earn through calculations pursuant to federal formulas.

It is our considered view that there is a precedent at the federal level for impact aid to reimburse school districts for costs incurred in providing supplemental education services to these type of children. For example, the Transition Program for Refugee Children operated under the authority of Public Law 96-212, The Refugee Act of 1980, provides for this type of financial assistance to cover services such as testing, special English language instruction, bilingual education, remedial instruction and special materials and supplies. In fact, for the 1981-82 school year Texas received \$1.2 million for these refugee children and it is estimated that Texas will again receive \$1.2 million in 1982-83.

The technical problem which the State faces in reaching a precise and accurate count of the number of these children who are present in the public schools in order to build a statistical base upon which to make future estimates is that the reasoning underlying the district court's orders appears to preclude school districts from requesting documentation, at least in the absence of Congressional imprimatur. We are able to identify their age and alleged residence through the normal method of presentation of a birth certificate. However, there is no notation on a birth certificate as to whether that child is legally or illegally present within the United States. It will be necessary at such time that the Congress appropriates federal funds to assist in the education of these children that Congress also direct the State of Texas to provide accurate enrollment data. For your information we have provided enrollment data as we currently collect it by ethnic group and a preliminary estimate by local school districts in the Valley area as to the number of illegal alien children present.

We are aware that other delegations may feel that this is a "Texas problem." It does indeed have its initial impact on Texas due

to the long, virtually open border which provides illegal aliens access to the United States. However, once these individuals enter the United States there is no guarantee that they will remain within the State of Texas. We suggest that employment opportunities, mobility factors, and the opportunity for free public education exist in all 50 states, and that as this population increases it will begin to spread throughout the country.

We consider this matter of extreme importance not just for Texas but as a matter of national policy. We will be happy to work with you in any manner that you deem beneficial in order to obtain equitable support to provide these youngsters with an education while at the same time not diluting the educational resources for those children legally present in the state. Additional specific data may be obtained from Raymon L. Bynum, Commissioner of Education (512/475-3271).

WILLIAM P. CLEMENTS, JR.,
Governor of Texas.
WILLIAM P. HOBBY,
Lieutenant Governor.
BILLY CLAYTON,
Speaker of the House.
MARK WHITE,
Attorney General.
JOE KELLY BUTLER,
Chairman, State Board of Education.

[From the Austin News Summary, June 16, 1982]

VALLEY PLEA: LET FEDS PAY FOR ALIEN TIDE

BROWNSVILLE.—Congress should help pay to educate the growing number of illegal alien children in Texas classrooms now that the Supreme Court has ruled they are entitled to free schooling, public school officials say.

"They had impact aid for the Cuban and Vietnamese children that have been brought in. We were hoping to get some type of subsidy to help us," Assistant Superintendent Tom Keller said.

Keller and others say they were not surprised at the Supreme Court's ruling on Tuesday that the children of undocumented workers are entitled to a free education.

The court struck down a Texas law that had allowed school districts to charge tuition or refuse admission to illegal aliens.

Brownsville schools began enrolling illegal aliens in November 1980 after the system lost a federal district court fight over its policy to refusing such children admission.

About 1,600 illegal aliens from Mexico and Central American countries are among the 30,000 students enrolled in Brownsville—and illegal alien enrollments are even higher in Houston and Dallas.

Dallas school officials predicted that the ruling could bring as many as 5,000 aliens into the Dallas Independent School District during the next few years.

"I would not be surprised at all to see our illegal alien enrollment double next year," Superintendent Linus Wright said.

The district had about 1,300 illegal alien students during the 1981-1982 school year, he said.

The superintendent of the Houston Independent School District, Billy Reagan, said the cost of educating the expected influx of alien children would be "phenomenal."

He said the ruling would serve as a "magnet for these people."

"I'm hoping this now will be an impetus for Congress to move and insist that present immigration laws be enforced," Reagan said.

The HISD ended the school year with an enrollment of about 5,000 aliens who cost the district at least \$7.5 million to educate, he said.

Attorney General Mark White said in Austin the decision underlines the need for either better immigration enforcement or impact aid for school districts like Brownsville.

"I have consistently stated and continue to state that the children should be educated and should not suffer because of the actions of their parents or the inaction of the federal government in enforcing the law," White said.

Gov. Bill Clements in Houston echoed local school officials in predicting an increase in illegal aliens moving to Texas.

"We have created a situation that makes illegal immigration, primarily from Mexico, attractive. I don't think anyone could possibly reach any other conclusion," Clements said at a Houston news conference.

He said Texas would comply with the ruling, but may need federal funds to do it.

The Brownsville lawyer who represented illegal alien children in the suit said it was a victory for many children who otherwise might have been expelled.

"Hopefully, it will help kids who didn't apply for admission because they didn't want to go through it and then be told to leave," said Linda Yanez.

Yanez said that one of her clients was denied admission but his brothers and sisters, who were born in the United States were enrolled. It is not uncommon along the border to have resident aliens, illegal aliens and U.S. citizens within a single family.

School officials expressed fears that the ruling will encourage families living across the Rio Grande in Matamoros, Mexico to move here and take advantage of the free schooling.

"I think that will happen especially in the border areas where Mexico is finding it hard to provide their own facilities," said Gracie de Pena, school board president.

"No one is against educating the children, per se," she said.

Officials here say a relatively low tax base, high child-adult ratio and the large number of children entering school speaking only Spanish contribute to the alien problem.

[From the Dallas Times Herald, June 16, 1982]

RULING COULD RAISE SCHOOL COSTS BY \$20 MILLION

(By Ernie Sotomayor)

The annual cost of educating illegal aliens in Texas may increase by as much as \$20 million because a new wave of undocumented students will be attracted to the state's public schools by Tuesday's U.S. Supreme Court ruling, said Texas Education Commissioner Raymon L. Bynum.

Bynum was joined by most other state officials, including those who pushed hard for allowing illegal aliens into public schools, in saying Texas must now make a strong bid for increased federal funding to pay for educating the 20,000 to 30,000 illegal alien children already enrolled in Texas schools.

The commissioner said he was unable to say precisely how many illegal aliens are now enrolled in Texas schools or how many more would come in September. But Dallas school officials predicted the current estimated enrollment of 2,500 illegal aliens could double in five years, while Brownsville educators said that an additional 800 students could register annually during the next few years.

"I think more aliens will come to this country because of the ruling," Bynum said. "We have a federal law not being adequately enforced, and that is putting an undue burden on local school districts."

"I don't know how many will come. But the cost now runs about \$55 million to \$60 million a year," said Bynum. "I think I could increase \$10 million to \$20 million after this."

Bynum said the Texas Education Agency will begin lobbying the Department of Education to increase its Title I funds, which supplement the cost of educating economically disadvantaged students. School districts have these funds to help offset the cost of educating other immigrants, such as Indochinese refugees.

Rick Arnett, general counsel for the Texas Education Agency, said it costs more to educate illegal alien children than other students.

"Generally they are behind, and they are going to require some kind of immediate remedial program, and they are going to need some special language programs too," he said.

Dallas school officials joined San Antonio Independent School District educators in saying increased illegal alien student populations will require the hiring of additional bilingual education teachers. That, the officials said, will be difficult because there is currently a shortage of hundreds of bilingual education instructors in the state.

Brownsville officials said the increased enrollment will require facilities equivalent to a new school every year.

Officials in other districts around the state, such as Lubbock, Austin and Midland-Odessa and San Antonio's 17,000-student Edgewood Independent School District, said they expect little impact because their illegal alien student populations are minimal. Houston school officials said they estimate there are now 5,000 illegal alien students enrolled in their district but they expect no major increase.

Secretary of State George Strake, the Republican nominee challenging incumbent William P. Hobby in the lieutenant governor's race, was the only political figure to attack the ruling. He said the Supreme Court justices based their decision on "strained reasoning."

"I think it is incredible that those five men could say, in effect, 'Anyone on the globe is entitled to the benefits of U.S. citizenship.' Using the logic of the Supreme Court, children in Uganda, India or Burma must be educated for free so long as their parents can successfully evade the immigration laws and get them here," he said.

State Sen. Hector Uribe, a Brownsville Democrat who represents the Rio Grande Valley, warned that the Texas Legislature will have to provide additional funds immediately for schools in his district because his area of the state cannot wait for the federal government to respond.

"The burden has been foisted upon the poorest of school districts to provide education to children of illegal aliens," Uribe said. "... The quality of education is going to suffer unless the federal or state government provides assistance."

While Uribe called the court's ruling "humane and compassionate," he complained that it would put an additional burden on school districts which already tax at higher rates than most other districts in the state and provide fewer services.

During the last legislative session, Uribe tried without success to pass a bill that

would have provided impact funds to school districts with a high percentage of illegal alien children. Tuesday's ruling should increase the chances of a similar bill passing during the next legislative session, he said.

Gov. William P. Clements Jr. was more reserved in his reaction, siding with officials in urging more federal aid and saying that he didn't believe the education issue was "the problem some believe it is."

The Texas law that was struck down by the court was sponsored originally by former Brownsville state Rep. Ruben M. Torres, who is now chairman of the Texas Board of Pardons and Paroles. Torres, who could not be reached for comment, argued at the time that the education of illegal aliens would put too much of a financial burden on school districts in his area.

WAVE OF ALIENS MAY COME

BROWNSVILLE.—The Supreme Court's ruling Tuesday that illegal aliens are entitled to a free education could trigger a new wave of undocumented immigration from Mexico, say school officials in this border city.

"I have worries about it. Maybe it will just open the door to have people immigrate in the future," said school board member Carlos Barrera. "If there's any unrest in Mexico, that's going to hurt us."

Brownsville, a city of 90,000, sits across the Rio Grande from Matamoros, which has a population of 300,000 and an economy hit hard by more than 30 percent inflation and a devalued peso.

A relatively low tax base, high child-adult ratio and the large number of children entering school speaking only Spanish contribute to the problem, school officials say.

Barrera and other officials said they expected the ruling but still feel the federal government should help school districts with large alien enrollments.

"I don't think anybody is against educating the children, per se. It's just that we have a big responsibility to our citizens and legal residents," said Gracie de Pena, school board president.

Sen. John Tower, Texas, said in Washington that the court's decision may cause severe financial hardship for many Texas school districts and added that he anticipates "some federal assistance will be required to enable them to assume this added burden."

Gov. Bill Clements said in Houston, "We have created a situation that makes illegal immigration, primarily from Mexico, attractive. I don't think anyone could possibly reach any other conclusion."

He said children of illegal aliens in public schools in Texas had risen from 12,000 to between 18,000 and 20,000 in the last two years.

"We undoubtedly will try to evolve something through the Education Department to assist us in this regard," Clements said. "There are vast sums of money going into all forms of education, and perhaps we can get some assistance from the federal government."

[From the Houston News Summary, June 23, 1982]

TOWER BLASTS EDUCATION RULING—SAYS SUPREME COURT PROVIDED INCENTIVE FOR ILLEGAL IMMIGRATION

(By Judy Wiessler)

WASHINGTON.—The Supreme Court provided an incentive for illegal immigration and a probable expansion of "all kinds of" bene-

fits in illegal aliens in its recent Texas education ruling, Sen. John G. Tower, Texas, said.

"It occurs to me that if they're eligible for (free public) education, they ought to be eligible for everything else," Tower said Monday.

He predicted that last week's decision in a Texas case that illegal alien children have a right to free public schooling "will stimulate the flow of illegal aliens" because it will "open up all kinds of other things for illegal aliens."

The primary lure may not be free education, he said, but "a vast number of other things" that aliens will assume they can get as a result of the court ruling.

He cited "the possibility that, based on this decision, illegal aliens could exert rights to other services and benefits" that could be an incentive for them to come here illegally.

"If you take the decision to its obvious conclusion, that's where it's going," he said.

The Supreme Court case dealt only with public education and did not question other benefits or services. The majority opinion did point to a "distinction" between education and other benefits, saying public education is not "merely some governmental 'benefit' indistinguishable from other forms of social welfare legislation."

Tower said he would not "second guess the Supreme Court" but added, "I'm inclined to think better legal reasoning went into the minority opinion than the majority opinion."

Tower has invited nine other senators from states along the Mexican border, including Sen. Lloyd M. Bentsen, Texas, to meet with him later this week on ways to get federal help for school districts with concentrations of illegal alien children.

He said unnamed officials at the White House were receptive to the idea of some form of "impact aid" for districts such as those along the border and in large cities like Houston and Dallas.

● **MR. BENTSEN.** Mr. President, I am pleased to join my colleague Senator Tower as an original cosponsor of the pending amendment to reimburse States and local school districts for costs they incur in educating alien children.

Mr. President, our immigration policies have been characterized as ineffective, out of control and in a state of shambles. Our failure at the National Government level has led to unprecedented immigration of illegal aliens and their families, individuals who settle in our States and cities, taxing the finite resources of many communities beyond the limits of their abilities to provide basic services.

Numerous references have been made today to the fact that Plyler against Doe is a precedent-setting decision—one which mandates that services to the general public be available to illegal aliens. While the majority opinion of the Court seeks to differentiate between educational programs and services that are traditionally considered a form of welfare, the narrow margin of the decision and the concurring opinion of Justice Powell underscore the likelihood that the parameters of the Court's opinion will be broadened. In effect, since the Court

has determined these children are entitled to educational services because they are not responsible for their parents' status as illegal immigrants, then what justification can be offered to deny health care and welfare assistance to the dependents of illegal aliens?

Mr. President, my State of Texas has a very great stake in the outcome of this amendment because we share the 2,000-mile border with the country from which the vast majority of illegal aliens are said to migrate. But I would like to stress to my colleagues that they should not be deceived into thinking the problem of illegal aliens is confined to Texas, New Mexico, Arizona, California, and Florida. This is a national problem and it is a growing problem. In the absence of a firm and enforceable immigration policy, the tide of illegal immigrants will continue and the drain of community resources will increase. In my judgment, passage of this amendment will serve two extremely important functions: first, it will relieve the inequitable burden the Federal Government has placed on local and State jurisdictions; and second, it will encourage Federal and local officials to better document the numbers and whereabouts of individuals who are entering this country illegally. A first step in stemming the tide of illegal immigration.

Mr. President, the pending amendment is just, it is necessary, and it is the most equitable way for the Federal Government to assume its fair share of responsibility.

I commend my colleague from Texas for his initiative in offering the amendment, in particular I want to thank him for his cooperation in accepting my suggestion that States and local communities be permitted to determine how funds allocated through the program will be expended. I urge my colleagues to join with us in support of the pending amendment.

Mrs. HAWKINS. Mr. President, I rise in support of the amendment offered by the Senator from Texas.

The recent decision by the Supreme Court to require local school districts to provide educational opportunities to the children of illegal aliens sent shock waves throughout communities across the country. Not only would the people in a given community have to pay taxes to support the education of children of resident aliens and others who are in this country legally, but now they must also pay to educate the children of aliens who broke American law in order to live and work in this country. This is no small number of people. As has been mentioned repeatedly on the floor, there are an estimated 3.5 to 6 million illegal aliens now in this country, and the number of children of these individuals probably numbers in the hundreds of thousands. The decision by the Supreme

Court to require the education of the children of illegal aliens will place a sudden and tremendous burden on many school districts.

The experience of my State, Florida, offers a glimpse of what may be in store for many States as a result of this Supreme Court ruling. The Mariel boatlift brought 125,000 Cubans to this country in 1980 in the span of only 5 short months. Out of this number, 15,000 Cuban children ended up in the Dade County school system that were not there the year before. This resulted in tremendous problems for affected school districts. Facilities were overcrowded. There were too few teachers. And there were problems teaching children, who at the time they entered the schools, spoke only Spanish. Though there has been some progress in the Dade County School District integrating these new children, the district continues to face serious financial problems. Local Florida officials estimate that the cost of educating the children of the Marielitos exceeds \$40 million in the 2 years they have been here. Many of these costs are expected to continue. Fortunately, the amendment offered by the Senator from Texas includes school districts that now have a large number of children of Cuban and Haitian entrants. Since immigration is a Federal responsibility, I believe that the Federal Government should be responsible for those costs forced on localities as a result of a failure of the Federal Government to enforce its laws.

I thank my friend from Texas for his leadership on this issue, and I urge my colleagues to support this amendment.

Mr. SIMPSON. Mr. President, S. 2222 provides for the control of future illegal immigration and channels the current population of undocumented aliens into legal status. It would be counter to the intent of this legislation to begin authorizing Federal funds for services for illegal immigrants. We sincerely believe that future illegal immigration will be drastically curtailed through the adoption of employer sanctions, and we have provided for block grants to meet the basic subsistence programs provided to legalized aliens by States and counties.

Mr. President, the amendment is outside the basic thrust of S. 2222 by providing services rather than focusing control.

Further, S. 2222 has tried not to be a bill involved with expenditures except for those absolutely necessary to meet its control needs.

Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

UP AMENDMENT NO. 1243

(Subsequently numbered amendment No. 2027.)

(Purpose: To modify provisions imposing sanctions against employers who hire, or recruit or refer, for employment certain unauthorized aliens)

Mr. SIMPSON. Mr. President, I send an amendment to the desk on behalf of Mr. TOWER and ask that it be stated.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Wyoming (Mr. SIMPSON), for Mr. TOWER, proposes an unprinted amendment numbered 1243.

Mr. SIMPSON. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Beginning on page 80 with line 9, strike out all through line 14 on page 89 and insert in lieu thereof the following:

"Sec. 274A. (a)(1) It is unlawful for a person or other entity after the date of the enactment of this section willfully to hire, or for consideration knowingly to recruit or refer, for employment in the United States an alien knowing the alien is an unauthorized alien (as defined in paragraph (4)) with respect to such employment.

"(2) It is unlawful for a person or other entity who, after hiring an alien for employment subsequent to a date 180 days after the date of the enactment of this Act and in accordance with paragraph (1), continues to employ the alien in the United States knowing the alien is (or has become) an unauthorized alien with respect to such employment.

"(3) A person or entity that establishes that it has complied in good faith with the procedures of subsection (b) with respect to the hiring, recruiting, or referral for employment of an alien in the United States has established an affirmative defense that the person or entity has not violated paragraph (1) or (2) with respect to such hiring, recruiting, or referral, except that non-compliance with the procedures of subsection (b) shall not be admitted as evidence in a proceeding under subsection (c) for the purpose of proving that a violation of paragraph (1) or (2) was willfully or knowingly committed.

"(4) As used in this section, the term "unauthorized alien" means, with respect to the employment of an alien at a particular time, that the alien is not at that time either (A) an alien lawfully admitted for permanent residence, or (B) authorized to be so employed by this Act or by the Attorney General.

"(b) A person or other entity hiring, recruiting, or referring an individual for employment in the United States may attest, under penalty of perjury and on a form established by the Attorney General by regulation, in consultation with the Secretary of Labor, the Secretary of Agriculture, the Secretary of Commerce, and the Small Business Administration, that he has verified that the individual is eligible to be employed (or recruited or referred for employment) in accordance with subsection (a)(1) by examining the individual's—

"(1) United States passport, or

"(2)(A) social security account number card (issued by the Social Security Adminis-

tration under section 205(c)(2)(B) of the Social Security Act, or United States birth certificate, and

"(B)(i) alien documentation, identification, and telecommunication card, or similar fraud-resistant card issued by the Attorney General to aliens and designated for use for this purpose,

"(ii) driver's license or similar document issued for the purpose of identification by a State, if it contains a photograph of the individual or such other personal identifying information relating to the individual as the Attorney General finds sufficient for purposes of this section, or

"(iii) in the case of individuals under sixteen years of age or in a State which does not provide for issuance of an identification document (other than a driver's license) referred to in clause (ii), documentation of personal identity of such other type as the Attorney General finds, by regulation, provides a reliable means of identification.

"(c)(1)(A) Whenever the Attorney General has reasonable cause to believe that a person or entity has or is engaged in a violation of paragraph (1) or (2) of subsection (a), the Attorney General shall provide such person or entity with notice and the opportunity to request a hearing respecting the violation within 30 days after receipt of such notice. Any hearing so requested shall be conducted before an immigration officer designated by the Attorney General, individually or by regulation, in accordance with section 554 of title 5, United States Code.

"(B) If an immigration judge determines by a preponderance of the evidence that a person or entity violated paragraph (1) or (2) of subsection (a), the Attorney General shall issue and cause to be served on such person or entity an order to cease and desist from such violation. Such order may require such person or entity to verify, in accordance with such procedures as the Attorney General deems necessary, the employment status of each individual sought to be hired, or for consideration recruited or referred, after the date of such order. The Attorney General shall review such order for its effectiveness two years after its date of issuance and may terminate such order at such time.

"(C)(1) If a person or entity fails to comply with an order of the Attorney General under subparagraph (B), the Attorney General may commence proceedings in any district court of the United States to insure compliance with such order. As part of such proceedings the Attorney General may ask for and the district court may grant relief, including—

"(I) in the case of the first violation of such order, a civil penalty of up to \$10,000;

"(II) in the case of a subsequent violation of such order, a fine of not more than \$10,000, or imprisonment for not more than 12 months, or both, for each violation of such order; and

"(III) a permanent or temporary injunction, restraining order, or other order against such person or entity as the Attorney General deems necessary.

"(ii) In any suit seeking to review the immigration judge's determination, the suit shall be determined solely upon the administrative record upon which the determination was made and the immigration judge's finding of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive.

"(d) In providing documentation or endorsement of authorization of aliens (other

than aliens lawfully admitted for permanent residence) to be employed in the United States, the Attorney General shall provide that any limitations with respect to the period or type of employment or employer shall be conspicuously stated on the documentation or endorsement.

"(e)(1) There shall be established an Interagency Immigration Reform Task Force (hereafter in this subsection referred to as the "Task Force") composed of the Attorney General, the Secretary of Labor, the Secretary of Commerce, the Chairman of the Equal Employment Opportunity Commission, and the Chairman of the United States Civil Rights Commission or their respective designees.

"(2) The Task Force shall have the responsibility for coordinating, developing, and recommending policies and practices designed to maximize effort, promote efficiency, promote compliance, and reduce any possibility of discrimination based on national origin in carrying out the provisions of this section.

"(3) On or before October 1 of each year, the Task Force shall prepare and transmit to the President and to the Congress a report setting forth its recommendations for legislative and administrative changes, including proposed guidelines for the Attorney General, as may be necessary to promote the purposes of this section.

"(f) The provisions of this section preempt any State or local law imposing civil or criminal sanctions upon those who employ, or refer or recruit for employment, unauthorized aliens."

(2) The amendment made by paragraph (1) shall take effect one hundred and eighty days after the date of the enactment of this Act.

(3) The Attorney General, in cooperation with the Secretaries of Commerce, Labor, and Agriculture and the Administrator of the Small Business Administration, shall disseminate forms and information to employers, employment agencies, and organizations representing employees and provide for public education respecting the requirements of section 274A of the Immigration and Nationality Act. For the purpose of carrying out this subparagraph, there are authorized to be appropriated \$10,000,000 for the fiscal year 1983.

(4) The Secretary of Labor is authorized, in the enforcement of section 15 of the Fair Labor Standards Act of 1938, to give priority to the enforcement of such provisions of such section as are applicable to employers who are in violation of section 274A(a)(1) of the Immigration Reform and Control Act of 1982.

On page 89, line 22, strike out "(1)(A)" and insert in lieu thereof "(1)".

Mr. TOWER. Mr. President, the employer sanctions currently included in S. 2222 are objectionable on four main grounds: First, unreasonably burdensome to the employer; second, costly for the American taxpayer; third, unlikely to curb significantly the flow of illegal immigrants; and fourth, potentially discriminatory against any job applicant of foreign origin.

The paperwork alone, which S. 2222 would generate through mandatory usage of verification forms by an employer, is staggering. With an estimated 70 million job changes annually in the private, nonagricultural sector, not

including referrals or recruiting or "casual" employment, that amounts to the Federal Government generating and ultimately monitoring 70 million transactions a year, 190,000 transactions a day, or 2.3 transactions a second. Even if the employee is later terminated voluntarily or involuntarily, the employer must retain these documents for a 1-year period of time. Not only are the bureaucratic nightmares which this provision could create obvious; but the American taxpayer is asked to foot the bill for the creation of a vague and undefined "secure system of national identification" which has been estimated to cost into the billions.

Social security officials have claimed that it is impossible to verify the legal status of every application requesting benefits or a card—yet, even in the absence of the as yet undefined, so-called secure identification system, this same impossible task would be required of employers. In addition, this procedure of verification of worker eligibility is required of all employees of an employer covered by this act, with the imposition of severe fines on an employer who does not comply with this section of the bill, even if the employer is found to have employed only American citizens in his or her place of business.

Question: I run a small store and I am covered by the provision of this bill. My next door neighbor sends his 17 year old son to work, part-time after school. I know that his son is an American citizen. I don't ask to see a driver's license or other document, but I hire him. Have I broken the law?

Under the terms of this bill, yes.

Or: I am in agricultural employer and I need several hundred workers immediately because my crop is ready for harvest. The local growers association or a crew leader sends me these workers, after running their own system of verification of the citizenship of these individuals. Do I have to follow an additional system of "checking off" eligibility of these 200 or so job applicants before I allow them to begin work which may need to be completed within two days or one week?

Again, the answer is yes under this bill.

In addition, it would be more realistic and more convenient for INS officials to neglect border enforcements in favor of detecting technical violators—the employer who does not have the time or the resources to verify every potential employee's legal status, the employer who knows absolutely that he has American citizens working for him and therefore chooses not to comply with the verification procedure, or the employer who simply does not know that he must verify his employee's eligibility and retain those documents. Employers would be found who did not comply.

These provisions are unreasonable in their demands and illogical in their requirements. There is no rational justi-

fication for shifting to the private sector the Federal Government's responsibility to uncover our Nation's illegal aliens.

The ultimate losers under this bill are the employer who, for the reasons given above, fails to comply with this section and the potential employee who, regardless of his willingness or suitability for a particular job, is denied the chance to work because he or she has an alien surname or is "foreign-looking."

Bear in mind that an employer under S. 2222 must reasonably believe that whatever documents are presented to him by the applicant are genuine in order for the employer to be safe from prosecution. The potential for discrimination is great since the employer himself has the burden to show that he did not hire an illegal. Further, few employers will feel capable to make the judgment as to the validity of the papers presented. Thus, the probability is that employers will attempt to avoid hiring individuals from Hispanic or other foreign heritage at all to preclude liability under this section.

By the same token, those unscrupulous employers who do not want to hire a certain minority group could probably also assert to a job applicant that his documents did not appear to be genuine, and that he would rather not risk breaking the employer sanctions law.

This amendment targets enforcement of employer sanction provisions against willful violators, for which a higher standard of proof must be met than that currently provided in the bill.

No employer would be required to verify worker eligibility, as the bill now provides. The burdensome paperwork requirements generated by S. 2222 are eliminated as well as the imposition of fines for noncompliance with this procedure or the failure to maintain records.

Under my amendment, the employer would be afforded an affirmative defense against a charge of willfully hiring illegals if he voluntarily chose to use a standard verification form provided by the Attorney General. The verification form, moreover, would be strictly limited in terms of the information required and would be used only for the purpose of determining eligibility to work. It could not be turned into a general information sheet on the applicant to be used for any other purpose.

These provisions protect the law-abiding citizen, while going after the business or entity who is intentionally hiring illegal aliens. For these entities, however, severe penalties could be imposed, including the ability of the Attorney General to monitor the future hiring practices of the organization. Note that after a 2-year period of

"good behavior" the entity could petition for release from future supervision by the Attorney General under the order, thus allowing an employer to bail out after a good compliance record has been established.

My amendment provides another decided benefit to Hispanics and other alien minorities by authorizing the Secretary of Labor to concentrate enforcement of existing labor laws against willful violators.

One California study relied upon by MALDEF revealed that 6,000 labor law violations were committed by employers who also employed undocumented workers—because these aliens would work without complaint under substandard conditions. Strengthened enforcement in this area will not only help ferret out the willful violators, but may improve overall standards of work conditions for all American citizens.

Realistically, there may still be some instances of discrimination against Hispanics by virtue of the fact that the use of a verification form may be selectively applied, until regulations governing use are developed by the Attorney General in conjunction with the task force. The relative potential of such discrimination is minuscule as compared to that which would occur if employers had no opportunity for an affirmative defense to the charge of hiring illegals. Hispanics or other minorities would never get a foot in the door without this protection. At the same time, the burden of proof has shifted to the Attorney General to prove a willful violation of this section, and an employer's voluntary non-compliance with the verification procedures will under no circumstances be held against him as evidence that he willfully violated the law.

The establishment of the task force to monitor any possible discriminatory effects of the bill, as well as their role in transmitting recommendations to the Attorney General for use in implementing future regulations is a positive factor which benefits significantly all ethnic minorities which would be affected by this bill.

I am confident that those regulations will reflect constitutional guarantees against discrimination on the basis of national origin and established EEOC guidelines on employment practices.

I also believe that increased border enforcement could be a more effective alternative to those promoting current section 101 employer sanction standards. There are more police officers assigned to guard the Capitol and adjacent buildings in Congress than there are INS officers patrolling our borders during any 8-hour period.

Most illegal border crossings occur within a 60-mile gap bordering parts of Texas and California. Border guards

know when and where illegal crossings occur, but lack the proper resources to enforce the law.

In addition, I would like to state for the RECORD two statements which I have received on this amendment:

As a past National President of LULAC, and as a person interested in the rights of all human beings, I am of the opinion that this amendment is the best route to take and I wholeheartedly support the amendment which is being offered by Senator Tower to the employer sanctions portion of this bill. Willie Bonilla, August 13, 1982 (1:50 p.m.), speaking from Corpus Christi, Texas.

I think that this is a positive step—a step in the right direction—and is preferable to the provisions currently in the bill. I understand the legislative process, and I know that such improvements must be done step by step. Henry Cisneros, Mayor of San Antonio, August 13, 1982 (2:00 p.m.), speaking from San Antonio, Texas.

Mr. President, I ask unanimous consent to have materials from various organizations in support of this amendment printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

BUSINESS ORGANIZATIONS OPPOSED TO SECTION 101

American Retail Federation.
Associated Builders & Contractors.
Association of General Contractors.
National Restaurant Associates.
Association of General Merchandise Chains.
American Association of Nurserymen.
United Fresh Fruit & Vegetable Association.
National Club Association.
National Broiler Council.

LOCAL CHAMBERS OF COMMERCE OPPOSED TO SECTION 101

Arizona, State of.
Business and Industry Association of New Jersey.
New Hampshire Industry and Business Association.
El Paso, Texas.
City of Big Spring, Texas.
Lake Charles, Louisiana.
Providence, Rhode Island.
Atlanta, Georgia.
Chattanooga, Tennessee.
Yakima, Washington.

EXCERPTS FROM MALDEF POSITION PAPER ON EMPLOYER SANCTIONS

Employer sanctions will make the employer responsible for determining a job applicant's legal status through reviewing certain documents, each of which is readily available on the already thriving black market. Rather than risk hiring an individual whose documents show he is legal but who may nevertheless "appear illegal" to the employer, many employers will choose to close their doors to all "Hispanic-looking" or "foreign-looking" job applicants, whether or not their documents appear to be genuine. Still other employers who may not want to hire Hispanics for discriminatory reasons can easily assert to the job applicant that his documents do not appear genuine and he would rather not risk breaking the employer sanctions law. Employment discrimination laws, such as Title VII, will be of little value to a worker who is turned away from a

job in this manner. First of all, Title VII protections only apply to workplaces with 15 or more employees. Second, job applicants simply do not have the time and resources to become involved in costly and time consuming administrative or legal procedures: their sole interest is in finding employment.

Employer sanctions will be enforced selectively and it is uncertain how widespread "good faith" deterrence will be. It is therefore unlikely that employer sanctions will significantly decrease job opportunities for undocumented workers. It is also uncertain that American workers will want to take jobs that become available. For example, many of the Texas companies raided by the INS during Operation Jobs report they have had trouble finding U.S. citizens to fill the positions (Washington Post, July 18, 1982, p. 2.)

MALDEF proposes the enforcement of current labor laws, such as the Fair Labor Standards Act and Minimum Wage laws, in order to create disincentives for employers to hire undocumented workers. A California study revealed that 6,000 violations of these laws were committed by employers who also employed undocumented aliens—because these aliens would work without complaint under sub-standard conditions. With proper enforcement of these laws, employers who pay undocumented workers below the minimum wage will be punished for doing so and will also grow disinclined to repeat this behavior, thus creating jobs that American workers may want.

EXCERPTS FROM THE STATEMENT OF THE CHAMBER OF COMMERCE OF THE UNITED STATES ON IMMIGRATION REFORM AND CONTROL ACT

CHAMBER POLICY REEXAMINED

The Chamber submitted a rather extensive statement to Senator Simpson's Subcommittee last September during previous hearings on this topic. That statement was based on long-standing Chamber policy which opposed the concept of placing the burden of enforcing immigration laws on the business community.

I want to stress that Chamber policy is formed through strict procedures. Any Chamber policy must meet the qualification that it be "national in character, timely in importance and general in application and of significance to business and industry." Although the overwhelming majority of employers do not knowingly hire illegal aliens, it is our conclusion that an employer sanctions law would clearly meet these criteria.

Proposed policy originates in one of the Chamber's standing policy committees. These Committees are made up of members who represent a cross section of the Chamber's membership. After careful deliberation, a proposed policy is submitted to the Chamber's Board of Directors. Adoption of a policy by the Board requires a two-thirds vote.

In view of the recent Congressional and Administration attention given to immigration reform, it was decided that a reexamination of our existing policy was in order. After considering specific proposals introduced by the Administration and pending in Congress, the Labor Relations Committee, which I chair, on October 28, 1981, unanimously reaffirmed its opposition to employer sanctions. The Chamber's Board of Directors, on November 11, 1981, also affirmed unanimously this position. Then, on April 1, 1982, the Labor Relations Committee specifically considered the employer sanctions

provisions set out in Section 101 and rejected them unanimously.

SECTION 101 WOULD REGULATE HIRING PRACTICES OF ALL BUSINESSES

Section 101 makes it unlawful for "a person or other entity" to hire, recruit, or refer for employment:

An alien, knowing the alien is an unauthorized alien with respect to employment.

An individual (even U.S. citizens) without complying with the required verification procedures.

During a 3-year transitional period, a person or entity that hires recruits, or refers for employment must attest, under penalty of perjury, on a form issued by the Attorney General, that he has examined documents which establish both eligibility to work and the identity of the job applicant.

Eligibility to work would be established by a social security card or a birth certificate.

Identity would be established by an alien registration (green) card, a driver's license with a photo, a similar identification document issued by a State, or other personal identifying information which the Attorney General finds, through regulation, sufficient for this purpose. A United States passport would establish both eligibility and identity.

After examining these documents and recording the information, the person must keep on record the form provided by the Attorney General and make it available for inspection to Immigration (INS) officers. If the individual is terminated voluntarily or involuntarily, the form must be retained for at least five years from the hiring date by the persons who recruit, refer or hire.

A person has complied with the requirements of examining the documents if he concludes the documents "reasonably appear on the face to be genuine."

After expiration of the 3-year transitional period, the President must develop and implement a "secure system to determine employment eligibility to be used with respect to all applicants for employment." This secured system would be based on a verification process not otherwise specified in the bill.

Civil and criminal penalties for hiring an unauthorized alien range from \$1,000 to \$2,000, or jail sentences of not more than six months, or both. The Attorney General has injunctive power to stop a "pattern or practice" of employment of unauthorized aliens.

A person that hires, recruits, or refers, but does not follow the verification procedures or maintain the required paperwork will be subject to a civil penalty of \$500 for each individual, even if the individual is a citizen.

Since the bill divides the employer sanctions section into two parts, we will analyze them separately. First, the three year transitional period, then, the permanent program.

INEFFECTIVE ENFORCEMENT AND INCREASED CONFUSION

The requirements during the 3-year transitional period would result in an ineffective enforcement mechanism and in increased confusion. Ineffective enforcement would occur because the required documents may be obtained or forged easily. Confusion would occur because the burden on employers to detect illegal aliens and to distinguish legitimate documents from illegitimate documents is unclear.

U.S. passports

Requiring a U.S. passport would be the most secure system. But, according to the Passport Office of the State Department, only 12 million citizens hold passports. Thus, with a work force of over 100 million people, the passport would not satisfy the identity-verification requirement.

*Birth certificate**Easy to obtain*

A mailed request to most town clerks or city registrars will obtain a copy of someone else's legitimate birth certificate.

Forged birth certificates are commonly used within the illegal alien population. One birth certificate is often used by several individuals.

Confusion

Birth certificates widely vary in size, form, and information contained.

*Social security card**Easy to obtain*

A December, 1977 General Accounting Office (GAO) report¹ noted that the federal government has no control over the use of illicit cards.

A December, 1980, GAO report² noted that cards are commonly counterfeited, stolen, or are peddled by federal employees. One spot-check showed 3 million person with two cards. Cards are called "Keys to the Kingdom" which virtually all illegal aliens can easily obtain.

In a report entitled "Keeping Undocumented Workers Out of the Workforce: Costs of Alternative Work Permit Systems",³ it was noted that simple possession of a social security number should not be viewed as an indicator of legal presence in the country "because so many undocumented workers are found in possession of such cards, most of which are genuine, but secured fraudulently."

Confusion

Social Security Officials claim it is impossible for them to verify the legal status of every applicant requesting benefits or requesting a card. Yet this impossible task would be imposed on employers.

Genuine cards vary in shape, size, color, format, and age.

Many U.S. citizens have lost their cards.

*Driver's license**Easy to Obtain*

In certain states, citizenship is not required to obtain a license.⁴

Licenses can be interchanged among relatives and friends—a common practice within the illegal alien community.

Licenses can be easily duplicated.

Confusion

Many citizens do not drive and have no need for a license.

Does an employer accept a license from another state?

Certain states do not require a photograph on their driver's licenses.⁵

*Alien documentation cards (green cards)**Easy to Obtain*

Cards are sold openly in county fairs, grocery stores and other public places in this country and foreign countries.

"Coyotes" or illegal immigration smugglers provide "green cards" as part of their services.

A March 29, 1982 National Law Journal⁶ story noted that one individual, operating a stolen car ring, was apprehended with 7,000 forged "green cards."

Cards are interchanged among relatives and friends.

Confusion

Though called "green" cards, some are green, other pink, others blue. Some have photographs taken when the immigrant was young—and is old now.

UNCERTAINTY FOR EMPLOYERS AND CITIZENS

In addition to the specific problems outlined, there are additional problems. For example:

Are those U.S. citizens who are unable to produce or obtain these documents precluded from employment?

Will some employers who are shown these documents but still have doubts on the legal status of a job applicant refuse to hire a person who is a U.S. citizen?

Because most employers cannot be expected to be experts in determining the legitimacy of an identification document, how will they know whether it "appears on its face to be genuine?"

It is important to emphasize at this point that the section 101 requirements would apparently apply to virtually every U.S. employer. The section makes it unlawful for "a person or other entity" to hire, recruit, or refer to employment an unauthorized alien. The term "person or other entity" is not defined. We must presume that the intent is to cover all employers, regardless of size and capacity to comply. Even casual employment, such as baby-sitters, would appear to be covered. We question the ability of the INS, which has primary responsibility for enforcing the employer sanctions, to carry out this responsibility in any effective manner.

ENFORCEMENT BURDEN RESTS ON EMPLOYERS

If an illegal alien is discovered in the workplace, a presumption will be made by INS officers that the employer has either knowingly hired that alien or that the employer has failed to check for documents that "reasonably appear" genuine.

It will be incumbent upon the employer to show that documents offered by an employee when the hiring occurred are, or appear to be, genuine. No guidelines are given on how an employer can meet this burden.

Further, an INS officer will not be able to distinguish between an employer that followed the verification process as contrasted to an employer that did not follow the process but has nevertheless filled out the forms indicating compliance. Again, the burden will be on the employer to show good faith compliance.

⁴ According to the Driver's License Guide Company, Redwood, Calif., nine states (Maine, Mississippi, New Jersey, New York, Pennsylvania, Tennessee, Vermont, West Virginia, and Wisconsin) do not require a photograph or provide for licenses without a photograph.

⁵ National Law Journal, Mar. 29, 1982, p. 29.

Only by the employer retaining the offered documents or by the employer photocopying these documents will the burden be relaxed.

Is it fair or practical for employers to request and hold social security cards or driver's licenses from their employees? Thus, for the overwhelming number of employers—if INS discovers an illegal alien in the workforce—a presumption will be made that the employer knowingly hired that illegal alien and the employer will be at a loss to offer immediate proof to the contrary.

This problem for the employer can be increased further since, under section 101, an appeal from an INS officers' penalty assessment will be made to another INS officer. As such, INS officers play an important role of police and jury in a highly subjective and unclear procedure.

This likely presumption that an employer knowingly hired an illegal alien simply because one is discovered in his work force is unfair.

Many companies have internal policies which restrict hiring to U.S. citizens or permanent residents. Unfortunately, because of a lax border enforcement, and because there is such widespread use of illegitimate documents, illegal aliens gain entry easily into the U.S. work force. As an example, public testimony and news stories have shown that illegal aliens have been found working as:

Prison guards at state correctional institutions

Cooks at U.S. military academies

Typists at Capitol Hill offices

Stewards at U.S. military installations

Janitors at the INS.

These employers presumably did not knowingly hire illegal aliens. Thus, the presumption that an employer knowingly hires an illegal alien simply because one is discovered in the work force is both unfair and extremely difficult to overcome.

Experiences with well-intentioned laws such as the Occupational Safety and Health Act and the Equal Employment Opportunities Laws, has shown that some federal officials are more concerned with assessing civil fines than with achieving the stated objectives of the laws. These laws provide for government intervention in the workplace and for civil penalties if regulatory mandates are not followed. Section 101, with its technical penalties for failure to follow complicated verification and recordkeeping procedures, will lead to similar enforcement abuse.

POST TRANSITION PERIOD: A SECURE SYSTEM TO DETERMINE EMPLOYMENT ELIGIBILITY

Section 101 provides that, within three years after its enactment, the President "shall develop and implement a secure system to determine eligibility to be used with respect to all applicants for employment."

It provides further that such a system shall be designed to give personal information on individuals and that verification will be provided for eligibility to work. Although certain restrictions are put on the use of the verification system, no further explanation is given.

Thus, the system which Congress is asked to enact is undefined. The system with which the business community is asked to ultimately comply is unclear. The procedures which an employer will have to follow every time a person is hired in order to avoid a \$500 fine are unknown.

Congress is being asked to approve an undefined system—no matter how burdensome.

² "Reissuing of Tamper Resistant Cards Will Not Eliminate Misuse of Social Security Numbers," HRD 81-20, December, 1980.

³ "Keeping Undocumented Workers Out of the Workforce: Evaluation of Alternative Strategies," by David North, Center for Labor and Migration Studies, May, 1978.

⁴ Most, if not all, states simply ask for identity, not citizenship. Thus, possession of a social security card will enable a person to receive a driver's license.

some, no matter how unreasonable, it might turn out to be.

For example, if the system eventually provides for a national I.D./worker authorization card, it is unknown which agency will administer it. The Social Security Administration may be the most appropriate agency (i.e. by re-issuing "foolproof" social security cards), but this agency has been reluctant to assume the extra duties of INS enforcement. Or will the President create a new independent agency? At this point, we simply don't know.

The only guidance provided as to the ultimate system is by examining existing proposals. Perhaps the most relevant example, the "Immigration and Nationality Security Act of 1981" (S. 776) provides for:

A national identification/work permit card for every citizen and permanent resident in the workforce.

A federally run, computer data bank system to determine worker eligibility.

Under S. 776, employers, before hiring a job applicant, would have to make a telephone call to a regional government office requesting verification of employment eligibility. This would be handled by a computer hook-up and an electronic voice.

Absent this instant hook-up or verification (because of computer malfunction or other reasons), an employee of the federal government would most likely handle the phone call and provide the verification. A \$500 civil fine would be imposed on any one failing to follow this procedure even if the person is a citizen.

EXPENSIVE AND UNWORKABLE

In earlier testimony before the subcommittees, the Attorney General estimated that the start-up costs for a national identification card would be between \$860 million and \$2 billion. The Chamber estimated that start up costs for the phone call-in system could be up to \$2.5 billion. Thus, the range for starting the type of verification system outlined in S. 776 ranges from \$860 million to \$4.5 billion, with unknown continuing annual costs.

But, if past government cost estimates for adopting a similar I.D. card are any indication, we can reasonably expect that their will be substantial additional costs.

For instance, in 1977, the INS adopted a program to make a fool-proof alien "green" card projecting an estimated cost of \$13 million and a 7-year implementation plan. According to a GAO report,⁷ as of November 1980, the card was behind schedule and costs had increased to \$67 million, a five-fold increase in three years.

The system proposed by S. 776 would also run counter to the dynamic job-changing practices of our national work force. It would impact severely on certain industries and on certain localities.

Many industries are "project oriented" and thus experience a significantly high turnover rate. In the construction industry, with about 6 million workers, a labor turnover rate of 500% annually is common. In agriculture, a labor turnover rate of over 100% per quarter is common.

The U.S. Bureau of Labor Statistics does not have information on the exact figure on the number of job turnovers. Based on limited information, a labor turnover rate of 70 million annually may be a minimum.

If this system were enacted, the federal government would have to handle at least:

70 million phone calls per year;
192 thousand phone calls per day;
8 thousand phone calls per hour;
2.3 phone calls per second.

The phones of the federal government would never stop ringing, and there would surely be severe impacts on our economy.

Further, the system would impact severely on businesses in remote areas or with no access to a telephone. Unless an employer wishes to violate the law, a whole project might be unnecessarily delayed because an employee's identification card number has been forged or appears twice in the computer or simply because there is a busy signal on the telephone.

We don't know if a system like the one outlined in S. 776 would be the one adopted by the President. However, given the magnitude of the problems associated with such a system, is it reasonable to ask Congress to enact, and the business community to accept the unknown system proposed by Section 101? The answer must be no.

BILL IMPOSES FINES EVEN IF EMPLOYER HIRES ONLY U.S. CITIZENS

We must point out a technical section which will impose unjust penalties. It is probable that many employers would not know about or would not be able to utilize the prescribed verification procedures. Then, even if that employer hires only U.S. citizens, civil fines for violation of the employer sanctions law would be assessed, since the section ascribes strict liability.

It is also probable and most convenient for INS officials to neglect border enforcement and to request the records of employers to detect technical violations of the law. Then, as a measure of immigration control, the amount of penalties recovered would be the measuring gauge rather than the protection of our borders. A "successful" employer sanctions law would be operating while employers would be fined for hiring U.S. citizens.

For instance, a small business with 100 employees may, over the course of a few months, hire 10 people. If that business does not follow the prescribed procedures—a \$5,000 fine can be levied even if all 10 new employees are U.S. citizens.

This section is illogical in its requirement, unreasonable in its demands, and irrelevant to the objective of controlling illegal immigration.

EFFECTIVE STEPS CAN BE TAKEN TO DEAL WITH THE PROBLEM OF ILLEGAL IMMIGRATION

Though we have concluded that an employer sanctions proposal cannot achieve its intended purpose, we nevertheless believe that certain actions can be taken that will assist the Federal government in gaining control over the illegal alien problem. We offer these recommendations now, in the spirit of a dedication to confront and solve the problem, and in addition to the recommendations which we expect to develop later this year when the National Chamber Foundation study is completed. We recommend:

Tightening the procedures for obtaining and for using border crossing passes.

Tightening the procedures for obtaining and enforcing student visas and tourist visas.

Increasing the capacity of INS to patrol the borders.

Exploring the extent to which increasing legal immigration or working visas can ease the pressures of illegal immigration.

Exploring the development of a broad program of voluntary business cooperation rather than relying on coercive sanctions.

Although shown to be successful when applied, these programs have never been tried on a coherent and broad basis.

TIGHTEN PROCEDURES FOR OBTAINING AND FOR USING BORDER CROSSING PASSES

Illegal aliens enter this country by either crossing the border illegally and escaping detection from INS officers or by crossing legally with a visa and violating the terms of the visa.

For Mexican illegal aliens, the most widely used visa for legal entry is the border crossing card (I-186 Form). This card permits entry into the United States, for business or pleasure, within 25 miles of the borders and for up to 72 hours.

Most Mexican illegal aliens who obtain the I-186, through legitimate means, enter this country, and immediately mail the cards to Mexico. Then, if they are arrested and deported, the border pass is waiting to be used again for easy entry. The border pass is also used by friends and relatives, or others wishing to gain entry to the United States.

Some Border Patrol officials believe that this method is used by a majority of Mexican illegal aliens. Another report estimates that this method is used for 70%-80% of all illegal entries.

In 1978, there were 103 million crossings from Mexico by aliens using these passes and crossing the border at key ports in the Southwest.⁸ This compares with a Mexican population of 68 million.

These passes are good for the life of the holder and do not contain a date of entry or exit. If they did, mailing them back to Mexico would make them useless since they could be seized if presented for re-entry to the United States if no exit date were recorded. Increased personnel, and an automated system for recording, would be needed to enact a program whereby border passes identify the holder and have the date of entry and exit recorded. This kind of program could significantly reduce illegal entry.

INCREASE THE CAPACITY OF THE INS TO PATROL OUR BORDERS

Most illegal aliens who are apprehended are found in a 30-mile section south of San Diego, called the Chula Vista Sector, and in a 20-mile section at El Paso, Texas. However, helicopter reconnaissance, which has been shown to deter illegal crossings, has been impeded because immigration officials have lacked funds to buy gasoline. On the East Coast some seaports are left unpatrolled at night and illegal aliens enter freely by boat.

Right now, there are more police officers assigned to guard the Capitol and adjacent buildings, then there are INS officers patrolling our borders.

The Border Patrol Supervisors Association estimated that an increase in its force, from 2,400 to about 6,000, would stop about 90 percent of illegal border crossings attempts. Border guards know when and where illegal border crossings occur, but lack proper resources to enforce the law.

This bill provides no funding for increased border enforcement. This alternative should be considered also.

⁷ "Prospects Dim for Effectively Enforcing Immigration Laws", November 5, 1980, GGD-81-4.

⁸ 1978 Statistical Year Book of the Immigration and Naturalization Service, U.S. Department of Justice, page 57, table 19.

[From the Wall Street Journal, Aug. 12, 1982]

EMPLOYERS AS COPS

Smallbusinessmen, watch out. A bill coming before the Senate floor would provide you with another regulatory nuisance, without solving the problem it is intended to solve.

The bill is Sen. Alan K. Simpson's Immigration Reform and Control Act of 1982 (a companion bill has been introduced by Rep. Romano L. Mazzoli). It is a complicated bill, with hundreds of provisions including amnesty for illegal aliens who arrived in the U.S. before 1982, as well as a long-overdue streamlining of asylum procedures. But the most important provision, in the view of the sponsors, would impose civil and criminal penalties on employers who knowingly hire illegal immigrants.

The idea is to shift onto businesses the burden of enforcing our immigration laws. The Immigration and Naturalization Service hasn't been very effective in policing U.S. borders or in making sure foreigners don't stay here after their visas expire. So, it is argued, the only way to stop illegal immigrants is to make employers responsible for denying them jobs. But, at best, employer sanctions won't work. At worst, they could be a regulatory nightmare like OSHA.

At first, under the Simpson bill, the obligations on business would only be a slight bother. Everytime someone is hired, the employer would have to fill out a form saying he'd seen at least two pieces of identification—Social Security card, driver's license, etc.—indicating legal residence. However, ID cards are easily forged: You can even buy U.S. identification in Tijuana or Santo Domingo. So this rule, while boosting paper and filing cabinet sales, would be completely useless in stopping the hiring of illegal aliens.

The real trouble would begin after three years, when the president would be authorized to introduce some kind of national identification system. The most common proposal is for something like the telephone checking system retailers use for credit cards: Before anyone could be hired, the employer would have to call up a government data bank to make sure the applicant's ID is genuine. A University of Michigan study in the mid-1970s estimated that there are about 70 million new hires a year—which translates into 7,500 calls every hour. If you've had any experience with the filing systems of the Social Security Administration or other government agencies, you can imagine how much fun it will be waiting for an answer.

Big companies would be able to adapt to sanctions. They already have personnel departments that make detailed investigations into job applicants' backgrounds. They have copying machines and hordes of bookkeepers. They have expensive lawyers to make sure the company keeps out of trouble. Perhaps for these reasons, the Labor Management Committee of the Business Roundtable has endorsed the principle of employer sanctions.

But for small companies, without personnel or legal departments, and where the boss is scurrying around so much that he has to make snap hiring and firing decisions, the measure would be a real headache. Unless there is an OSHA-style inspection force ready to barge in on everybody's files, the incentive for most small businesses will be to ignore the rules.

Even with the penalties, moreover, many businesses—particularly in construction, retailing, hotels and restaurants and light

manufacturing—will still have an economic incentive to hire illegal aliens. Often this will be because the work is menial and Americans won't take it. Sometimes it is because the illegal alien will work for lower wages. Perhaps the major reason is that these are businesses with high worker turnover where bosses must hire people instantly: A building subcontractor doesn't care where you're from when he needs concrete-pourers right away. It is no accident that the greatest number of illegal immigrants have been in the boom economies of Texas and California. Indeed, it is widely believed that both states' economies would have suffered if they hadn't been able to draw on illegal labor.

None of this is to suggest that illegal immigration isn't worrisome. A nation that prides itself on the rule of law can hardly be comfortable when millions of people are breaking the rules. But employer sanctions will not remove the incentives for illegal immigration. Even if they reduce the flow somewhat, the disruption they will cause in small businesses may make the cure worse than the disease.

EMPLOYER SANCTIONS

(The following occurred earlier:)

Mr. SYMMS. Mr. President, I ask unanimous consent that the remarks I am about to make and the article I intend to insert in the RECORD be printed in the RECORD at the proper place in the debate over the Tower amendment which deals with the subject of employer sanctions.

The PRESIDING OFFICER. Without objection so ordered.

Mr. SYMMS. Mr. President, I ask unanimous consent to have printed in the RECORD an editorial from the Wall Street Journal dated August 12, 1982, entitled "Employers as Cops."

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Aug. 12, 1982]

EMPLOYERS AS COPS

Smallbusinessmen, watch out. A bill coming before the Senate floor would provide you with another regulatory nuisance, without solving the problem it is intended to solve.

The bill is Sen. Alan K. Simpson's Immigration Reform and Control Act of 1982 (a companion bill has been introduced by Rep. Romano L. Mazzoli). It is a complicated bill, with hundreds of provisions including amnesty for illegal aliens who arrived in the U.S. before 1982, as well as a long-overdue streamlining of asylum procedures. But the most important provision, in the view of the sponsors, would impose civil and criminal penalties on employers who knowingly hire illegal immigrants.

The idea is to shift onto businesses the burden of enforcing our immigration laws. The Immigration and Naturalization Service hasn't been very effective in policing U.S. borders or in making sure foreigners don't stay here after their visas expire. So, it is argued, the only way to stop illegal immigrants is to make employers responsible for denying them jobs. But, at best, employer sanctions won't work. At worst, they could be a regulatory nightmare like OSHA.

At first, under the Simpson bill, the obligations on business would only be a slight bother. Everytime someone is hired, the em-

ployer would have to fill out a form saying he'd seen at least two pieces of identification—Social Security card, driver's license, etc.—indicating legal residence. However, ID cards are easily forged: You can even buy U.S. identification in Tijuana or Santo Domingo. So this rule, while boosting paper and filing cabinet sales, would be completely useless in stopping the hiring of illegal aliens.

The real trouble would begin after three years, when the president would be authorized to introduce some kind of national identification system. The most common proposal is for something like the telephone checking system retailers use for credit cards: Before anyone could be hired, the employer would have to call up a government data bank to make sure the applicant's ID is genuine. A University of Michigan study in the mid-1970s estimated that there are about 70 million new hires a year—which translates into 7,500 calls every hour. If you've had any experience with the filing systems of the Social Security Administration or other government agencies, you can imagine how much fun it will be waiting for an answer.

Big companies would be able to adapt to sanctions. They already have personnel departments that make detailed investigations into job applicants' backgrounds. They have copying machines and hordes of bookkeepers. They have expensive lawyers to make sure the company keeps out of trouble. Perhaps for these reasons, the Labor Management Committee of the Business Roundtable has endorsed the principle of employer sanctions.

But for small companies, without personnel or legal departments, and where the boss is scurrying around so much that he has to make snap hiring and firing decisions, the measure would be a real headache. Unless there is an OSHA-style inspection force ready to barge in on everybody's files, the incentive for most small businesses will be to ignore the rules.

Even with the penalties, moreover, many businesses—particularly in construction, retailing, hotels and restaurants and light manufacturing—will still have an economic incentive to hire illegal aliens. Often this will be because the work is menial and Americans won't take it. Sometimes it is because the illegal alien will work for lower wages. Perhaps the major reason is that these are businesses with high worker turnover where bosses must hire people instantly: A building subcontractor doesn't care where you're from when he needs concrete-pourers right away. It is no accident that the greatest number of illegal immigrants have been in the boom economies of Texas and California. Indeed, it is widely believed that both states' economies would have suffered if they hadn't been able to draw on illegal labor.

None of this is to suggest that illegal immigration isn't worrisome. A nation that prides itself on the rule of law can hardly be comfortable when millions of people are breaking the rules. But employer sanctions will not remove the incentives for illegal immigration. Even if they reduce the flow somewhat, the disruption they will cause in small businesses may make the cure worse than the disease.

Mr. SYMMS. Mr. President, I rise in support of the amendment offered by the Senator from Texas (Mr. Tower).

One of the biggest single concerns that the people in my part of the country—and I am talking about the

Columbia Basin drainage, all the way from Yellowstone Park to the Pacific Ocean—are concerned with in this legislation is how we are going to have the employers enforcing this law without having racial or other kinds of discrimination take place.

Already it is very customary, Mr. President, in my State for agricultural employers to require application forms for people to fill out as to whether or not a person is a citizen, if not the alien registration number, and so forth. I think, after this legislation passes, we will probably find we may be doing this in our offices to protect ourselves unless an amendment would be made which deals with the criminal sanctions which will be imposed on employers.

Mr. President, I encourage my colleagues to heed very carefully the arguments made by the Senator from Texas on this. I think it would be a very beneficial program in this country to not try to have the small businessmen of America end up being the ones who have to enforce the immigration laws of the United States.

If an employee comes in, a potential employee, to a small business, farm, ranch, or small business on Main Street and applies for work, if they have some sort of identification, a social security card is primarily what they use today, but a social security card or some other acceptable form of identification and present that to the employer, and if the employer then would later be penalized or have charges brought against him, what may happen is that the small business employers, in order to protect themselves, will gradually start being less and less inclined to hire Americans with a Hispanic birthright.

I think that is a fact. It certainly is a fact of what is happening with the migration patterns in this country, people moving up from south Texas into the Snake River and the Columbia Basin area, the Yakima Valley in Washington State and the Wenatchee and Columbia drainage area where there are a great number of people working in hand labor who are Hispanic by their birthright.

I certainly encourage my colleagues to support this amendment and to read carefully the editorial of the Wall Street Journal of August 12, 1982.

(Conclusion of earlier proceedings.)

The PRESIDING OFFICER. Did the Senator request the yeas and nays on the unprinted amendment numbered 1443?

Mr. SIMPSON. Yes, Mr. President, I do request them.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SIMPSON. Mr. President, I ask unanimous consent that my previous statement on the previous amendment

be recognized as being in opposition to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. I ask for the yeas and nays on the second amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SIMPSON. Mr. President, I recall we laid aside the last Hayakawa amendment, and I ask for the yeas and nays on that amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SIMPSON. Mr. President, I ask unanimous consent that that amendment be sequenced as we have previously agreed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. Mr. President, I have a very brief comment on the Tower amendment on employer sanctions.

That amendment would gut the enforcement of the law prohibiting the knowing employment of illegal aliens. If the amendment were to pass, it would have an effect similar to having a free tax audit.

It would be as if a person were allowed to commit tax fraud without any possibility of penalty until after he was apprehended and ordered not to repeat the offense. In fact, because the amendment provides that the order can be terminated after 2 years, this cycle could be repeated. An employer could knowingly employ many illegal aliens over a long time, finally be apprehended and ordered to cease and desist, comply for 2 years, have the order terminated, then be safe to violate the section again without threat of penalty until caught again.

The substitution of a willful standard may be interpreted to mean that even if the employer knows he is hiring an illegal alien, if he can show that he does not prefer illegal aliens; that is, that he is indifferent to whether he hires an illegal alien or not, then he would not be violating the prohibition. Obviously, this would seriously weaken the law.

No improved verification system is required. Therefore, verification would be accomplished indefinitely by a showing of, first, a U.S. birth certificate or social security card, and second, a driver's license. The U.S. birth certificate and social security card are readily available in counterfeit form. Indeed a genuine birth certificate referring to another person can easily be obtained. With a birth certificate a driver's license can be obtained. This same criticism can be made of the transitional system in the bill, the difference is that the bill requires that a system without these

flaws be developed and implemented in 3 years.

The amendment would make us of the verification system optional. This could lead to discrimination. He could require documents only from those who look or sound "foreign" to him.

I urge my colleagues to consider the amendment carefully. The amendment, indeed, would lead to some conclusions that I do not think would be appropriate in connection with this bill, and it has been resisted by several organizations of national stature.

Mr. GRASSLEY addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. Mr. President, I rise to oppose the amendment by the Senator from Texas. This amendment would essentially render useless the employer sanction provision in the bill. The Wall Street Journal in its editorial yesterday called this provision a real headache, that strict employer sanctions will not remove the incentive for illegal immigration, that they will cause disruption in the workplace.

These types of arguments are real copouts.

Those who oppose employer sanctions admit that illegal immigration may be a problem but nowhere do they offer another solution.

They claim the incentives for illegal immigration will not be curbed by employer sanctions.

If those do not, what will? Do not illegal aliens come to this country to work? Our border with Mexico stretches for 2,000 miles; short of building a wall there is really no other solution to this problem.

It is important to remember that over half of the illegal population is Mexican. The rest consists mainly of student and tourist overstays and those who illegally enter through our harbors and airports. If the latter group changes residence, it is virtually impossible to track them down.

If strong workable employer sanctions are not imposed what will entice this other group to return home?

Claims are heard that employees will not comply with the law. Most Americans are law-abiding people. To say that businessmen are going to deliberately break the law is to insult them. In fact, though the chamber has come out against employer sanctions, both the Business Roundtable and the National Association of Manufacturers are supportive of these provisions. In addition, the Alliance for Immigration Reform, a group made up of large corporations such as Xerox, NCR, Ford, and Caterpillar, has been actively lobbying in favor of the bill.

That group has certain reservations about the bill in the areas of foreign students and independent immigrants,

therefore it is not a blanket endorsement.

It should be pointed out that not all chambers oppose this legislation. For example, the San Diego and Houston chambers, both of which are areas heavily dependent on illegal labor, support employer sanctions.

More importantly, according to the Wall Street Journal, this bill is going to prove most burdensome to small employees. I point out that the NFIB's most recent poll of their members shows two to one support for employer sanctions.

As far as I am concerned, these arguments do not hold water and should be dismissed.

I urge defeat of the amendment.

Mr. SIMPSON. Mr. President, I believe the Senator from Minnesota seeks recognition. With the approval of the Senator, I ask unanimous consent that on this amendment there be a time agreement of 20 minutes equally divided.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

UP AMENDMENT NO. 1244

(Subsequently numbered amendment No. 2028.)

(Purpose: To prevent the transfer of unused visas from one contiguous foreign state to the other contiguous foreign state)

Mr. BOSCHWITZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Minnesota (Mr. BOSCHWITZ) proposes an unprinted amendment numbered 1244.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 124, lines 9 and 10, strike out "(or the number determined under subparagraph (C))".

On page 124, line 25, insert quotation marks and a period immediately after the period.

On page 125, strike out lines 1 through 8.

Mr. BOSCHWITZ. Mr. President, I enter this amendment on behalf of myself and the distinguished Senator from Kentucky (Mr. HUDDLESTON). This amendment would conform the Senate bill to the House bill with respect to the transferability of numbers between Canada and Mexico.

I have agreed with my friend and colleague, the distinguished junior Senator from Wyoming, on most aspects of the immigration bill and have congratulated him time and again for the great work that he has done on the bill, and so it is with great reservation that I disagree with him in this particular area.

Mr. President, each country is entitled to 20,000 entrants each year as a maximum with two exceptions, and each exception is a country that borders us: One to the north, Canada, and one to the south, Mexico.

In those two instances, Mr. President, the maximum is not 20,000 but 40,000, and it is not that that we are addressing. That we understand. They are our neighbors. There is a greater interrelationship between our peoples than perhaps other countries, so a larger number is quite properly in order.

However, in the event the 40,000 is not used by one of those two countries, the numbers that remain available would be transferable to the other country. As an example, if only 10,000 Canadians choose to come south to the United States in a given year, then 70,000 Mexicans would be entitled to legally come to this country.

Mr. President, it is that that we are seeking to change by this amendment, not to make those numbers transferable. We have done a great deal in this bill for our friends from Mexico. We are making legal a very large number of people either in a permanent or temporary status in this country in allowing them to stay. I am not quite sure how many hundreds of thousands of people are involved, but certainly this bill has to be regarded as an enormous gesture of our friends from Mexico. It is, indeed, quite correct in so doing, and it is, indeed, quite correct in its effort to control the flow of people across our borders because, as the Senator from Wyoming has so correctly stated to me on a number of occasions, one of the first duties that a country owes to itself is to control its borders.

The number of immigrants in this country who have come from countries other than Mexico is very large. I am not sure whether the Senator from Wyoming is familiar with the numbers, but it seems to me that the number of immigrants who now live in this country and who have come from countries other than Canada or Mexico is certainly far larger, much larger, than the number of immigrants who have come from those countries.

To give those two countries such a large, disproportionate share of the total number of immigrants that we allow into this country, in my judgment, does not represent equity. We will allow a total of 350,000 immigrants in under the various preferences; 80,000 of those would be attributable and assigned to only two countries—Mexico and Canada. All other countries would have the remaining 270,000, and any other country would not be allowed to have immigrants to this country in excess of 20,000.

Mr. President, it is not equitable that one country have perhaps as

many as 80,000 and all other countries of the world be limited to just 20,000.

Again, this is not an effort to penalize any of our neighbors. That is not the neighborly thing to do, of course. This bill deals very fairly, very expansively, with our neighbors, particularly our Mexican neighbors.

Mr. President, that is the sum and substance of the amendment—that the 40,000 cap be maintained for both Canada and Mexico, a cap that is twice as large as the cap for any other country in the world, but the transferability between those caps be disallowed, so that in the event one of those countries does not use the entire 40,000, what they do not use will not be transferable to the others, but what they do not use will apply to every other country of the world.

I reserve the remainder of my time.

Mr. SIMPSON. Mr. President, regretfully, I will resist this amendment by my good friend from Minnesota—and that is not a hollow statement. He is a delightful fellow. His pin number is one higher than mine in this body, and he continually reminds me of that fact. He recalls that I am simply number 65 and he is number 64, something of that nature.

Mr. BOSCHWITZ. Mr. President, if the Senator will yield, I believe it is 65 and 66.

Mr. SIMPSON. Whatever, it is one below.

Mr. President, I will be very brief.

There were no per country ceilings for Mexico and Canada until 1976. The policy that we emphasize here recognizes a very special friendship, relationship, and proximity that we have with our contiguous neighbors in trade and mutual strategic interests and commitment to democratic principles.

By allowing the unused numbers of one of these contiguous neighbors to go to the quota of the other, we will be reducing the pressure for illegal immigration while recognizing this very special, sensitive relationship we have with our neighbors, and it will relieve the backlogs with those countries. These things come from my visit with Mexican officials—the President, the President-designate, and others—that they are very pleased at this special recognition of a special privilege. And that is what it is; that is what it is provided for. That is why it applies only to Canada and Mexico. But the historical flow would show that Mexico will most benefit.

I reserve the remainder of my time.

Mr. BOSCHWITZ. Mr. President, I wish to note that the distinguished Senator from Kentucky (Mr. HUDDLESTON) and I have been on opposite sides in most of this immigration bill, that on this particular amendment we are together, that we recognize the very special friendship we have with

our neighbors, both Canada and Mexico, about which my friend from Wyoming speaks.

As a member of the Foreign Relations Committee, I am aware that we have very special friendship with many countries throughout the world but have not given them attention of an extraordinary sort in this bill. Throughout this bill, we have given extraordinary attention and consideration to our friends from Mexico.

I recognize that the chairman of the Immigration Subcommittee, Mr. SIMPSON, has had conversations with the Mexican Government. Yet, I must respectfully defer. Whether or not it impacts on illegal immigration, I must also contest, because an illegal immigrant does not worry or think about quotas, anyway, and whether or not they are going to come here in large numbers will be protected, as the Senator well knows, by the employer sanction rather than by a quota of one type or another.

The distinguished chairman talks about relieving the backlog. I believe the backlogs from other countries are as high as or higher than the backlog for Mexico, and as such, they, too, need some consideration.

So I must respectfully take another view from that of my friend and join Senator HUDDLESTON in proposing this amendment.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SIMPSON. Mr. President, just one comment. The purpose of the amendment is to reduce the backlogs, 85 percent of the Mexican people in the backlogs already reside in the United States. I know that is curious, but that is true. This would simply reduce those backlogs, and it would be of great assistance to us in reducing the pressure for illegal immigration.

I yield back the remainder of my time.

Mr. BOSCHWITZ. I yield back the remainder of my time.

Mr. GRASSLEY. Mr. President, I rise for the purpose of making a statement in regard to the fact that I was going to offer an amendment on the subject of law enforcement. I am not going to offer that amendment, and my statement gives an explanation.

My amendment, to permit cooperation between the Immigration and Naturalization Service and State and local law enforcement agencies, was accepted by the immigration subcommittee, but deleted during full committee consideration of the bill.

I have discussed this amendment with the Senator from Wyoming and other Senators, with the administration, especially the Department of Justice and the INS, and with many orga-

nizations interested in the proposal. As a result of these discussions and extensive legal research into the questions addressed by my amendment, I now believe that the activities which my amendment is intended to foster can be conducted without limitation under current law. Both administrative opinion and case law indicate that cooperation between Federal immigration officers and State and local law enforcement officials is not only permitted, but is considered useful and should be encouraged.

My intention when I offered this amendment was to clarify a confused situation in which State and local law enforcement agencies were unsure as to their liability if they cooperated with Federal immigration officers. Legal authorities in several States indicated that the situation was so unclear as to preclude any cooperation, not from fear of doing wrong, but because they did not know where the limits to their actions, if any, would lie. I sought to ameliorate this chilling effect.

I first looked at this situation to determine if there was a substantial difference of legal opinion. I was surprised to find the reverse, a substantial uniformity of legal opinion. The current case law involved in this area is fairly complete. Congress power over immigration is plenary and without substantial restriction. The case of *Carlson against Landon* (1952), provides such an analysis. Historically, State and local officers have been able to enforce criminal violations of immigration laws. See *Testa against Katt* (1947). Although Federal power preempts State and local power over immigration, as in the case of *Hines against Davidowitz* (1941), the Supreme Court, in *DeCanas against Bica* (1976), has held that a State may exercise its police powers to protect its citizens from the effects of immigration.

Perhaps more important, the Supreme Court, just a few weeks ago, in *Pyler against Doe*, the Texas school case, held that a State may protect its citizens against illegal immigration so long as its actions are consistent with Federal law. On page 22 of the opinion, Justice William Brennan, a staunch supporter of civil rights, says:

As we recognized in *De Canas v. Bica*, 424 U.S. 351 (1976), the States do have some authority to act with respect to illegal aliens, at least where such action mirrors Federal objectives and furthers a legitimate state goal.

And on page 27, Justice Brennan writes that:

Although the State has no direct interest in controlling entry into this country, that interest being one reserved by the Constitution to the Federal Government, unchecked, unlawful migration might impair the State's economy generally, or the State's ability to provide some important service. Despite the exclusive Federal control of this Nation's borders, we cannot conclude that the States

are without any power to deter the influx of persons entering the United States against Federal law, and whose numbers might have a discernible impact on traditional State concerns.

Clearly, then, the Supreme Court, the highest judicial body in the land, recognizes the value of such cooperation and holds that it is permissible.

Perhaps the only real difficulty in this area arises from a directive issued in 1978 by then-Attorney General Griffin Bell. The Bell directive established the policy of the Carter administration that Federal-State cooperation in this area was not to be encouraged, and should not be viewed as desirable by that Justice Department leadership. In my conversations with Attorney General William French Smith and his staff at the Department of Justice, I have found a much more positive impression of cooperation between State and local and Federal authorities. I have been assured that Commissioner Nelson and Attorney General Smith will immediately begin a review of the Bell directive in order to correct the misimpression it has created that cooperation of any kind between Federal, State, and local law enforcement authorities in the area of immigration is unhealthy and in order to foster legitimate efforts to better coordinate these resources.

Therefore, with these legal and administrative authorities from the highest judicial and law enforcement levels, I believe that my amendment is no longer necessary to clarify a previously cloudy area. The activity on this issue has provided sufficient guidance to State and local legal authorities to allow them to know where they stand on cooperating with the Federal Government.

Mr. President, with that understanding of this complex and heretofore obfuscated issue, I will not offer my amendment. I thank my colleagues.

UP AMENDMENT NO. 1245

Mr. SIMPSON. Mr. President, I send to the desk a final amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wyoming (Mr. SIMPSON), for Mr. KENNEDY, Mr. CHAFEE, Mr. TSONGAS, Mr. BRADLEY, and Mr. BRADY, proposes an unprinted amendment numbered 1245.

Mr. SIMPSON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows.

On page 127 beginning with the quotation marks on line 11, strike out all through "United States" on line 24 and insert in lieu thereof the following:

"(1) Aliens who are members of the professions holding Doctoral Degrees or Aliens of Exceptional Ability.—Qualified immi-

grants who are members of the professions holding doctoral degrees (or the equivalent degree) or who because of their exceptional ability in the sciences, arts or business, will substantially benefit prospectively the national economy, cultural or educational interests, or welfare of the United States, and whose services in the sciences, arts, professions or business are sought by an employer in the United States, shall be allocated visas. In determining under this subparagraph whether an immigrant has exceptional ability, the possession of a degree, diploma, certificate, or similar award from a college, university, school or other institution of learning or a license to practice or certification for a particular profession or occupation shall not by itself be considered sufficient evidence of such exceptional ability.

Page 147, after line 6, insert the following new paragraph:

(4) by inserting before the period at the end the following: "And provided further, That the Attorney General may, if he determines it to be in the public interest, waive such two-year foreign residence requirement—"

(A) in the case of an alien admitted under section 101(a)(15)(F) who has obtained a degree in a natural science, mathematics, computer science, or an engineering field from a college or university in the United States and who is applying for a visa as an immigrant described in section 202(b)(1), up to a limit of 1,500 such waivers per year, for aliens who have been offered a position on the faculty of such institution teaching in the field in which he obtained such degree, and 4,500 such waivers per year for aliens who have been offered a research or technical position by a U.S. employer in the field in which he obtained such degree, or

(B) in the case of an alien admitted under section 101(a)(15)(F) who has obtained a degree in a natural science, computer science, or in a field of engineering or business, who is applying for a visa as a nonimmigrant described in section 101(a)(15)(H)(iii), and will receive no more than four years of training by a United States firm, corporation, or other legal entity, which training will enable such alien to return to the country of his nationality or last residence and be employed there as a manager by the same firm, corporation, or other legal entity, or a branch, subsidiary, or affiliate thereof."

2. Page 147, line 3, strike out "and".

3. Page 147, line 6, strike out the period and insert in lieu thereof, "and".

Page 166, after line 10, add the following new subsection (f) to Section 401:

"(f) a report on the need for qualified immigrants under section 202(b) of the Immigration and Nationality Act:

Three years from the effective date of this Act, the Secretary of Labor, after consulting with the Attorney General, and with representatives of domestic employers and representative domestic employees, and domestic institutions of higher learning, shall submit to Congress and the President a report, to be accompanied by his recommendations for changes in current law and regulations, concerning the Nation's need for qualified immigrants identified in paragraphs 1 and 2 of subsection (b) of this section who have acquired professional or technical skills that may be in critical demand in the United States.

● Mr. KENNEDY. Mr. President, the amendment I am offering—cosponsored by Senators TSONGAS, CHAFFEE, BRADLEY, and BRADY—is designed to

correct some unfortunate limitations contained in this bill on the ability of certain highly trained foreign students to adjust their immigration status without leaving the country for 2 years. The amendment also seeks to restore the language of existing law on the terms governing the admission of professionals, managers and executives.

As drafted, this bill would require all future foreign students to leave the United States for 2 years before they can adjust their immigration status—except if they marry an American citizen. I believe this is too restrictive, especially in areas such as engineering, computer sciences, and other areas of high technology, where the United States is facing critical shortages in industry and in teaching.

It is contrary to our national interests to force students of exceptional merit and ability—who are participating in essential academic, professional and industrial programs—to leave the country.

It also ignores the current reality that such qualified students do not return to their homes in the Third World or elsewhere, but simply move to Japan or to Europe and use their skills to help those nations compete against the United States. It makes no sense when our universities and businesses are starved for scientific talent, for the United States to train engineers or computer specialists at M.I.T. for jobs in Germany.

My office has been deluged by letters from American universities, research institutions, and companies, documenting in very persuasive terms that this change in student visas would be contrary to our national interests.

Mr. President, the numbers of students involved is apparently very small—although the Immigration Service does not have precise statistics. But only approximately 5,000 foreign students adjust their immigration status to other than family reunion preferences. That is hardly a "brain drain"—yet it represents an important pool of talent in the high-technology, teaching, and research fields.

I have been willing to reach a compromise on this amendment—to establish a numerical limit of 5,000—with a requirement for a study within three years to determine what changes should be made in the future. However, I have not been willing to narrow or limit the kinds of students who can adjust beyond the high professional standards contained in existing law for third preference—or the new independent categories contained in the bill. Any such limitation would be arbitrary and not based upon any thoughtful review of the needs of industry or the academic world.

The revised amendment I am offering establishes a ceiling of 5,000, re-

quires a thorough and independent review of the program, and restores the existing law on the standards contained in the first and second preferences on the admission of professionals in the new independent immigration category.●

● Mr. TSONGAS. Mr. President, I rise in support of Senator KENNEDY's amendment to the proposed Immigration Reform and Control Act. A provision of the bill would require foreign students to return to their home country for 2 years after completing their studies before they could become eligible for immigration to the United States. It is this provision that Senator KENNEDY's proposal would amend.

The provision is intended to limit the "brain drain" from developing countries into the United States. In effect, however, it is more likely merely to divert talented individuals away from United States employment and toward jobs in Europe and Japan.

By excluding these persons, we would deny American industry and academia talent that it sorely needs. With America's rate of economic growth falling behind the level prevailing in many other countries, we are gambling dangerously with our future if we deter foreign students of exceptional merit from settling here.

Further, the bill in its present form would be counterproductive to the continued health and future growth to the high-technology industry in this country. High technology companies in Massachusetts, for example, employ 250,000 persons, one-third of the State's manufacturing labor force, and had sales last year of \$19.5 billion, according to the Massachusetts High Technology Council. The high-technology business, particularly in electronics and computers, pits the United States against Japan, West Germany, and several other countries in what is a keen international competition for limited markets. Foreign-born graduates who remain in the United States help us to compete. If barriers are erected against their participation, the United States suffers in lost technological innovation and productivity.

Senator KENNEDY's amendment would amend S. 2222 to permit students of exceptional merit and ability—those who could contribute to essential academic, professional and industrial programs—to remain in the United States without leaving for 2 years. This proposal is eminently sensible.

Already in some areas of the high tech industry, there is a shortage of engineers and highly qualified workers. And the problem is likely to grow more acute. For instance, a survey conducted by the American Electronics Association projects a need for 200,000 electrical/electronic and computer science engineers by 1985. But it also

projects a shortfall of 20,000 annually in the number of U.S. graduates that will be available for these jobs.

Currently, newly graduated foreign students are an important source of faculty for American colleges and universities, particularly in engineering and computer science. With over 1,600 faculty positions in these fields now vacant, there is a critical need for qualified teachers to fill the void. The president of the American Council on Education, J. W. Peltason, puts the point this way: "If our institutions are unable to utilize these students as faculty, America's ability to educate the next generation of scientists and engineers will be severely hampered."

For these reasons, Mr. President, I urge passage of the amendment providing a waiver of the 2-year return requirement for those qualified graduates whose talents are needed by U.S. industry and academia.●

● Mr. CHAFFEE. Mr. President, many of our universities rely on foreign graduate students to fill teaching positions in areas such as engineering and computer sciences when American graduate students are not available to fill those positions. For example, Brown University in my home State of Rhode Island has been hiring foreign graduate students over the last few years to fill teaching positions in the field of computer science. Thus, Brown and other academic institutions across the country are concerned about the provision in S. 2222 which requires all foreign students to return to their countries for 2 years upon completion of their education unless they marry an American citizen.

I share the universities concern and I believe that the provisions of S. 2222 affecting foreign students of exceptional merit are too restrictive. Therefore, I support the amendment proposed by the distinguished Senator from Massachusetts, Mr. KENNEDY, which would permit students of exceptional merit and ability—who are participating in essential academic, professional and industrial programs—to remain in the country upon completion of their education. The adoption of this amendment is essential to help our universities deal with the problem of critical shortages of teachers in high technology areas and I urge the adoption of the amendment.●

● Mr. BRADY. Mr. President, I urge my colleagues to support amendment No. 1956 offered today by Senator KENNEDY to S. 2222, the Immigration Reform and Control Act. Without Senator KENNEDY's amendment, S. 2222 will impede the research, technological, and economic interests of the United States. S. 2222, as it stands, will deprive the United States of highly skilled professionals needed in industry and universities and deprive the American economy of the professional mobility and development in high

technology fields which have been its hallmark.

If unchanged, S. 2222 would reorganize the preference system to create a first preference for independent immigrants limited to persons of "exceptional ability." The INS in practice, has interpreted this phrase to mean primarily persons holding Nobel prizes and similar international honors. Obviously we wish to continue to attract and admit such persons; however, it is essential to industries and universities to be able to train and develop younger scientists of extraordinary promise. It is well-known that outstanding achievements in the mathematical and science fields, in particular, occur early in the careers of talented youth. If unchanged, the bill would necessarily deprive the the United States of the benefit of these important early achievements. Senator KENNEDY's proposals would allow the United States to continue to attract and hire these younger outstanding individuals.

A second part of the Kennedy amendment would provide flexibility in the requirement that all foreign students return to their native countries following completion of their studies. This provision is crucial to both universities and industry. According to the American Electronics Association, U.S. electronics and other high technology firms face a serious shortage of engineers. Because aerospace and defense industries may hire only U.S. citizens, foreign Ph. D. graduates represent a major pool for universities and nondefense industries.

Additionally, American-trained Ph. D's serve to supplement science and engineering faculty at U.S. colleges and universities. The United States currently is experiencing a shortage of 1,600 to 2,000 faculty members in the fields of engineering and computer science alone. Foreign students are needed to train urgently needed American engineers and computer specialists.

According to the National Science Foundation, 70 percent of foreign science and engineering doctorate recipients leave the United States at the end of their studies. However, those students who remain in this country are an important supplement to the American-born graduates.

Mr. President, I support this amendment, and urge all Senators to join me to make it possible for us to maintain the preeminence of American science and technology.●

Mr. SIMPSON. Mr. President, I have cleared this with the minority and move the adoption of the amendment. It has to do with special recognition of high-tech and professional personnel, including professors, and including the important reservoir of highly skilled persons in high-tech industries. However, I have serious reservations concerning many aspects of the amend-

ment. Senator Kennedy shares some of my concerns. We accept the amendment now, but shall examine its provisions carefully in conference.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wyoming.

The amendment (UP No. 1245) was agreed to.

Mr. SIMPSON. Mr. President, I ask for the yeas and nays on the bill itself at the time set under the unanimous-consent agreement for S. 2222.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SIMPSON. Mr. President, I ask unanimous consent to make conforming and technical amendments to the various amendments presented today and yesterday.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. Mr. President, I ask unanimous consent to have printed in the RECORD the order of the voting on the amendments Tuesday.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Hayakawa Amendment No. 1907.

Hayakawa Amendment No. 1908.

Hayakawa Amendment No. 2019.

Simpson motion to table Helms Amendment No. 2024.

(If tabling motion fails)—vote on Helms Amendment No. 2024.

Vote on Hayakawa Amendment No. 2025.

Vote on Tower Amendment No. 2026.

Vote on Tower Amendment No. 2027.

Vote on Boschwitz Amendment No. 2028.

Third Reading.

Vote on passage.

Mr. SIMPSON. Mr. President, I shall take 1 minute to thank very sincerely the ranking minority member of this subcommittee, Senator TED KENNEDY, for his attendance throughout; Senator THURMOND and his very capable staff, particularly Eric Hultman; Senator GRASSLEY and Ally Milder, his assistant; Jerry Tinker, who has been a most remarkable minority counsel of the subcommittee; Senator DeCONCINI, the remaining member of the subcommittee and his capable person, Ed Baxter; and on my own behalf to Dick Day, the chief counsel and staff director of this subcommittee who I took away from a nice law practice in Cody, Wyo., for this, and he will never recover; and to Chip Wood, Donna Alvarado, Arnold Liebowitz, Tina Jones, Frankie DeGooyer, Avelina Sabangan, and Ellen Hughes of the subcommittee. I offer my profound thanks.

Mr. STEVENS. Mr. President, we are all indebted to the distinguished Senator from Wyoming for his perseverance in handling this bill.

It is my understanding now that no further amendments to this bill are in order after today. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. KENNEDY. Mr. President, before we conclude our debate on immigration issues, I want to note some immigration problems confronting some Americans and permanent residents at the American University of Beirut.

Within just the past 10 weeks, when AUB has faced so many other trials, it also has been confronted with a threat to its faculty by the regulations of the Immigration and Naturalization Service.

As an American university serving the Middle East, AUB places high value on a faculty which is rooted both in the American educational tradition and in the Middle Eastern cultural milieu. This balance is achieved by maintaining a significant number of faculty members who are Middle Easterners who have earned their advanced degrees in the United States and who have major employment experience here as well. Many of these individuals have strengthened their U.S. ties even further by obtaining permanent resident status or by becoming naturalized citizens.

For those Middle Eastern faculty members who are not already naturalized citizens when they leave the United States to teach and conduct research at AUB, two problems arise:

First, they are prevented, by their necessary absence from the United States, from meeting the continuous residency requirement and therefore becoming eligible for naturalization; and

Second, they risk forfeiting, through their extended absences, the very resident alien status which provides their strong cultural link to the United States and assures them the possibility of applying for citizenship at a later date.

Some 50 or 60 members of AUB's faculty, or approximately 12 percent, are confronted with these problems. This poses a serious threat to the university since these individuals' ties to the United States are sufficiently strong that they will resign their professorships to return to the States rather than abandon their U.S. residency and the prospect of citizenship.

On May 23 of this year, Dr. Khalil Abu Feisal, chief of staff of American University Hospital, was required by immigration officials at New York's John F. Kennedy Airport to forfeit his green card. Dr. Abu Feisal had come here to recruit new medical faculty. The irony, Mr. President, is immense. This man, whose dedication to service and training in Beirut is contributing immeasurably to the American image in the Middle East, finds himself undercut in the very task of trying to find others to render the same service. I might add that while awaiting an administrative hearing on his case, Dr.

Abu Feisal returned to Beirut and has been endangering his own life for the past 2 months in order to help care for wounded in the current fighting.

Yet more recently, on August 2, Dr. Bashara Faris, the head of AUB's Department of Ophthalmology, had his green card confiscated when he landed in New York. Dr. Faris is the only doctor in Beirut skilled in laser techniques for reattaching the eye's retina. He had come to the United States for 2 months of research at Boston's famed Eye Research Institute. I can assure my colleagues that his expertise is in very high demand here. He would have no difficulty staying. Yet he wants to go back to serve American medicine in the Middle East. But he will not do so if the condition for getting his green card back is that he remain.

I hope these cases make plain that pursuit of present policy by INS will cause American interests in the Middle East to suffer substantially. All the 50 or 60 faculty members in question much prefer to continue at AUB. But their American ties are also important to them, and the security situation in Lebanon over the past year—and especially over the past 2 months—has underscored for them the value of their present ability to return to the United States.

If these dedicated people are required to give up their appointments at AUB in order to preserve their permanent resident status, AUB simply will not be able to continue in anything like its present form. A 12-percent faculty reduction would be devastating. The likelihood of recruiting large numbers of new faculty is more than remote given the current situation in Lebanon. Moreover, precisely the type of faculty member desired—those of Middle Eastern heritage with American educations and cultural ties—would be impossible to obtain.

To threaten AUB's continued existence in this way is not only a shame, it is contrary to American policy interests. At this very moment, the Agency for International Development is consulting with AUB about how the expertise of its faculty can be used in the reconstruction of Lebanon, once the fighting finally ends. And this is only the latest example of the immensely important role AUB plays for us in the Middle East. For years the university has been America's best face forward in the Arab world, and this fact has long been acknowledged by the U.S. Government.

Mr. President, I do not believe the legislation before us today is the appropriate place to deal in a definitive way with AUB's problem. But I do feel a legislative solution to this situation may be required at an early date. In the meantime, I call upon the Immigration and Naturalization Service to reexamine the manner in which it is

implementing the current statute with respect to AUB faculty members. Taking into account American policy interests in the Middle East, I believe it would be fully appropriate for INS to call a moratorium on the further confiscation of green cards from AUB personnel until such time as the Congress has had the opportunity to give this matter its attention. In the absence of such a change in policy implementation, the Service threatens to cause a major faculty exodus from an institution which now more than ever is important to American interests.

THE ARMENIAN PEOPLE

Mr. LEVIN. It is important in the context of this debate on immigration reform to look back at U.S. commitments to the Armenian people, victims of the first genocide of the 20th century.

American concern and support for the Armenian people go back to our extensive missionary presence and charitable work in Armenia in the 19th century. But official American dealings with the Armenians have consisted of broken promises and nonaction. During the terrible massacres of Armenians in 1894 and 1895, President Cleveland declined to protest to the Turkish Government, although he was asked to do so by both the House and the Senate. After the massacres and deportations of Armenians in 1915 and 1916 American public support for Armenians was even greater.

In President Wilson's "14 Points" speech of January 8, 1918, he called for a "free, open-minded, and absolutely impartial adjustment of all colonial claims, based upon a strict observance of the principal that in determining all such questions of sovereignty the interests of the populations concerned must have equal weight with the equitable claims of the government whose title is to be determined." His 12th point stated, "the other nationalities which are now under Turkish rule should be assured an undoubted security of life and an absolutely unmolested opportunity of autonomous development." Justice to small nations became the American theme for a negotiated peace.

After the armistice ending the war with Turkey was signed October 31, 1918, the Armenians of Turkey declared their independence. The Armenian contribution to the allied cause had been substantial for such a small nation. There was every reason to suppose that when the Allies met in Paris, Armenian independence would be recognized.

By the end of the war, the mandate system, under which a small nation was put under the temporary guidance of a more advanced nation to prepare it for self-government, was increasingly accepted as allied policy. Armenia desperately needed protection and

guidance. Armenia's population had been decimated by massacres, the survivors relocated, and the countryside devastated. The United States was widely assumed to be the logical choice to be Armenia's "mandatory," or protector, which President Wilson favored. He wrote to the head of the Armenian Committee for the Independence of Armenia on February 14, 1919, "I beg that you will assure the committee that I shall be as watchful as possible to do my utmost on Armenia's behalf." In a speech in Boston on February 24, 1919, President Wilson asked, "Have you thought of the sufferings of Armenians? You poured out your money to help succor the Armenians after they suffered. Now set up your strength so that they will not suffer again."

The Treaty of Versailles, signed June 28, 1919, accepted most of President Wilson's "14 Points" as the basis for peace, including the principle of the independence of nations. Throughout late 1919 and early 1920, the American Government received thousands of resolutions and appeals on behalf of Armenia from citizens and organizations. The Allies, completing work on the Turkish treaty, asked the United States to accept the mandate responsibility for Armenia. On August 10, 1920, the Treaty of Sevres, making peace with Turkey, was finally signed. It was guaranteed the creation of an Armenian state. But on September 13, 1920, Turkish Nationalist armies invaded Armenia, and Armenia appealed to the League of Nations for admission to membership and defense help. The League rejected the pleas. Although President Wilson offered his personal mediation, Armenia was forced to sign an armistice which left part of Armenia under the control of the Turkish Nationalists. On December 2, 1920, the rest of Armenia was officially declared a Soviet republic.

The 1923 Treaty of Lausanne reversed the Treaty of Sevres in nearly every respect, and the status of minorities in Turkey was restored to what it was before World War I, which meant it was entirely up to the Turkish Government.

All through the drawn out peace process, the United States repeated that we would "do something" for Armenia, and yet we procrastinated and in the end did nothing. Because it was seen as our responsibility, none of the other allies did anything to help the Armenians, and the separate, independent nation of Armenia became another of history's broken promises. We had led them to believe that we would not abandon them, but in the end, we did. The dream of a free Armenian nation for the heroic survivors of the persecuted people was frustrated just at the time when it looked like it would at long last become a reality.

This history alone creates a compelling, continuing moral commitment by the United States to the Armenian people. Armenians today are scattered throughout the Middle East—in Turkey, Iran, Lebanon, Iraq, and the Soviet Republic of Armenia. In some areas, their unique culture identity is being systematically repressed by institutionalized discrimination against Armenian schools and churches. At present, the only way for most Armenians to come to the United States is through the preference system, based on family reunification. Since many do not have families here, they are unable to emigrate. Although there is an Armenia in the Soviet Union, it is not a free and independent nation. And some Armenians are trying to get out. In fiscal year 1981, 4,077 Armenians from the Soviet Union came to the United States. The numbers are down now, because of our strained relations with the Soviets, so it is unclear how many Armenians would emigrate if they could.

I am concerned that repression against Armenians could worsen in many of these countries. I would ask my friend Senator SIMPSON, as chairman of the Subcommittee on Immigration and Refugee Policy, if it is his intention that the State Department and the Immigration and Naturalization Service be specially sensitive to our unfulfilled commitments to the Armenian people when criteria are determined and applied for allowing refugees into the United States under the pending act and existing laws.

Mr. SIMPSON. I thank my fine colleague, Senator LEVIN, for raising this important issue today. I greatly appreciate Senator LEVIN's bringing to our attention the plight of the Armenian people.

I assure my colleagues that as long as I am chairman of the Immigration Subcommittee, I will do my best to make certain that this situation is not forgotten when discussions take place of which persons should be considered refugees and which refugees should be admitted to the United States.

Mr. CHILES. Mr. President, 2 years ago, my State was the point of entry of an uncontrolled influx of thousands of refugees from Cuba and Haiti. In just 5 months, 125,000 had arrived requesting political asylum in the United States. Mixed among those were hardened criminals, mentally ill people, and others, who should never have been allowed to enter the United States. American citizens, anxious to rescue Cubans from the repressive Castro regime, provided the transportation for the refugees. They left with lists of relatives provided by Cuban-Americans. But they returned with those who Castro chose to release. Today, there are still 1,227 Cubans in the Federal penitentiary in Atlanta

who are being held because of the serious crimes they committed in Cuba.

The city of Miami was quickly overwhelmed by hungry, impoverished refugees. Meanwhile, the Federal Government, uncertain of its role in such a crisis, delayed taking the decisive steps necessary to control the influx. Refugees were released into the community without sponsors, food or housing. Tent cities and temporary shelters arose to accommodate them. Jackson Memorial Hospital, the county hospital in Dade County, was overrun by refugees seeking medical care.

In the early days, it was the State and local governments, not the Federal Government, that provided for the refugees. Throughout the crisis, the Federal Government was placed in a position of reacting, rather than actively controlling the situation.

Mr. President, I am sure that no one here wants to be confronted with another crisis of this kind but, as Thomas Enders, our Assistant Secretary of State, has pointed-out, we cannot rule out the possibility of such large scale immigration emergencies in the future. And that possibility becomes more concrete when we remember that the Cuban Government has already shown itself capable of such cynical manipulation in the past.

Just prior to the Mariel crisis, Secretary Enders noted that the United States had signals which indicated that a mass migration from Cuba to Florida was about to occur. Unfortunately, because we did not have a contingency plan ready to be put into place, we were unable to take any steps to control the situation which we knew was about to occur. Had some sort of plan been in place, the United States could have determined what persons would be allowed to enter. Because we had no plan, Castro was able to control the situation. And the end result, instead of an embarrassment for Castro, was an opportunity for the Cuban Government to empty its jails and mental institutions, and to force the United States to accept the dregs of his society as the price for allowing legitimate refugees to flee from his oppressive regime.

Had a contingency plan been in place, I do not believe that Castro would have even tried to do what he did. But he recognized that the U.S. Government had no way to control the course of events. A contingency plan will help deter such events from occurring, and clearly state the U.S. determination to control its borders. Secretary Enders underscored the importance of this notion of deterrence when he testified in support of a contingency plan before the Senate Judiciary Committee. He said:

Castro, and the Cuban people, must be in no doubt or uncertainty about the nature of

our response to a new Mariel. If they believe we are unprepared to handle an illegal immigration emergency; if they believe we will waver between attempting to stop the migration and welcoming it; if they believe we will in the end welcome the arrivals and resettle them in American communities, then the temptation to deal us another blow will be very great.

Mr. President, I agree with Secretary Enders that it is absolutely essential that the U.S. Government make it clear that we have both the determination and the tools to prevent another Mariel from occurring in the future. That means that it is imperative that the U.S. Government act now to put into place a contingency plan that can be put into effect should we be confronted with the possibility of another mass immigration crisis.

In this regard, I am not alone in calling for prompt action to establish a contingency plan for immigration emergencies. Last year, when the administration unveiled its immigration reform package, it called for establishing just such a contingency plan. In April of this year, just before S. 2222 was marked up by the Senate Judiciary Committee, the administration reiterated its belief that a contingency plan must be an essential part of any meaningful immigration reform effort. In testimony before the Judiciary Committee, Attorney General Smith stated:

It is our firm judgment that there remains a serious need to provide the President with special legal authorities in the event of a declared immigration emergency. These provisions can be drawn carefully and narrowly so as to minimize the disruption of normal and legitimate activities. We need not sacrifice our liberties in the pursuit of preparedness for an immigration crisis. But neither can the Government responsibly limp along with the legal authorities that proved so painfully inadequate during the Mariel boatlift.

Mr. President, the administration submitted a specific proposal that carefully defined the way in which the executive branch could exercise its authority to deal with any future immigration crisis. The Judiciary Committee did not see fit to include that proposal when it dealt with S. 2222. I had planned to offer the administration's proposal as an amendment to S. 2222.

However, I have been persuaded not to move forward with the specific language of the amendment at this point. The amendment itself is very detailed and Senator SIMPSON has suggested that it would be more appropriate to fully consider all of its provisions before bringing the proposal to the floor. Given the time pressures we are under and the importance of acting on S. 2222 as soon as we can, I agree that a specific examination of the proposals can wait.

Mr. President, it is critical, however, to keep in mind that the fact that we are not considering the specifics of the contingency plan proposal today in no

way means that the executive branch is without power to respond to an immigration crisis. It has been my belief that the executive branch has the authority under existing law to draw up a contingency plan and to implement that plan in an immigration emergency.

The amendment which I had planned to offer simply defined in more detail the way in which these powers can be exercised. But the fact that we are not acting today in no way effects the existence of those powers.

The administration concurs with me in my belief that it has the authority to develop a contingency plan to deal with immigration emergencies.

Mr. SIMPSON. Mr. President, I am very well aware of the interest the Senator from Florida has shown in this issue and the efforts he has personally taken to assure that the people of Florida will not be severely impacted by another sudden influx of refugees or asylees. As the Senator from Florida has indicated, the administration already has taken administrative steps to prepare this country to respond quickly and effectively in the event of another mass migration.

I am advised by the Justice Department that the President has directed the Attorney General to oversee and coordinate the U.S. Government's response to mass illegal immigration. To that end, the Justice Department has now prepared a detailed contingency plan to insure that the United States will be prepared to deal promptly and effectively with any sudden illegal large-scale immigration, including one that is deliberately generated by a foreign government. A coordinated Federal effort will be made to utilize the resources of appropriate agencies to thwart and control illegal mass migrations. These efforts will be fully coordinated with State and local officials, whose involvement is critically important in any effective emergency response. The contingency plan identifies and assigns responsibilities to Federal civilian as well as military agencies for the management and implementation of the Government's planned response. The necessity of such planning was demonstrated by the mass migration by sea into the Florida area, but the contingency plan is drawn suitably to deal with similar situations elsewhere in the United States as well.

The contingency plan consists of five phases, each encompassing an area of operation that can be addressed separately and involving a different mix of agency efforts from that involved in other phases. Individual agency plans have been developed by the respective agencies consistent with their designated mission responsibilities. Particular emphasis of the plan is placed on the "ready phase" to insure early knowledge of any future mass migra-

tions and the "interdiction phase" to restrict the actual number of illegal aliens who enter the country. Illegal aliens who elude interdiction efforts will be taken into custody, identified and moved to holding centers pending exclusion or deportation proceedings. Safeguards are provided to assure that bona fide refugees would not be returned to a place where they would face persecution.

Mr. CHILES. Mr. President, I am delighted that the administration is drawing up such a plan, and I am sure that the people of Florida are delighted, too. I have just received a copy of that Justice Department memorandum. It not only describes the status of the contingency plan; it also lists the specific provisions in existing law which give the executive branch the authority to develop and, if necessary, to implement the contingency plan. I should like to submit that listing of authority for the RECORD, and make certain that it becomes a part of the legislative history of this bill.

I ask unanimous consent that it be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

JUSTICE DEPARTMENT LISTING OF AUTHORITY

SEC. 212(f) of the Immigration and Nationality Act authorizes the President by proclamation to suspend the entry of all aliens or a class of aliens if he finds that their entry would be detrimental to the interests of the United States.

Under 50 U.S.C. 191, upon a Presidential proclamation a national emergency exists by reason of an actual or threatened disturbance of the international relations of the United States, the Secretary of the Treasury may make rules and regulations governing the anchorage and movement of any vessel, foreign or domestic, in the territorial waters of the United States; may inspect such vessels at any time and may in some cases, if necessary, take possession and control of such vessels.

8 U.S.C. 1324(b) provides for the forfeiture and seizure of any vehicle or vessel used to bring aliens illegal into the United States in violation of 8 U.S.C. 1324(a)(1) or used to transport aliens within the United States in violation of 8 U.S.C. 1324(a)(2).

50 U.S.C. App. 16 authorizes the forfeiture of any vessel used in violation of the provisions of the Trading with the Enemy Act, 50 U.S.C. App. 1 et seq. This provision was invoked in the recent Mariel boatlift and the District Court for the Southern District of Florida has held that vessels used in the Mariel boatlift are subject to forfeiture under this provision. While this provision would be available if there were another mass migration from Cuba, it would not be available if the migration were from a country other than one covered by the Trading with the Enemy Act.

19 U.S.C. 1581(e) authorizes the seizure of a vessel or vehicle which is subject to forfeiture or to secure any fine or penalty. It has been the government's position that a vessel or vehicle used to bring illegal aliens into the United States in violation of 8 U.S.C. 1323 is subject to seizure in order to secure any fines levied.

Under general non-statutory authority, land traffic check points could be set up at reasonable locations for the purpose of stopping, warning and questioning vehicles that could be involved in facilitating the migration.

8 U.S.C. 1182(f), as noted, authorizes the President to suspend the entry of aliens or classes of aliens if it finds their entry would be detrimental to the interests of the United States. Pursuant to this provision, the President could authorize the stopping of United States flag vessels, stateless vessels, or with the permission of a foreign government, a foreign flag vessel carrying illegal aliens to the United States.

8 U.S.C. 1323 provides for civil penalties for bringing to the United States aliens without valid visas.

8 U.S.C. 1324 provides for criminal penalties for bringing into the United States aliens who have not been duly admitted by an immigration officer. However, in *United States v. Anaya*, the Court held that the provision does not prevent the mere bringing of undocumented aliens to this country's borders, but only the surreptitious landing of aliens.

50 U.S.C. App. 16 provides criminal penalties for persons violating its provisions and implementing regulations. Under 31 C.F.R. 515.415, the bringing of a Cuban national who does not have a valid immigrant or non-immigrant visa into the United States is prohibited.

Sec. 235(b) of the Immigration and Nationality Act provides for the detention until further examination can be conducted, of every alien who does not appear to the examining officer to be "clearly and beyond a doubt entitled to land."

Mr. CHILES. Mr. President, by listing these authorities, I do not want to suggest that there are not other provisions in current law which could be used by the Government to respond to immigration emergencies. I believe that it is important, however, that we make it clear on the Record at this point that there is authority to respond to immigration emergencies and to make it clear that the administration is developing a contingency plan based on current law to deal with immigration emergencies. I hope that the Senator from Wyoming concurs in this analysis.

Mr. SIMPSON. Mr. President, I concur with the Senator from Florida and with the Justice Department and State Department that the Government can use existing policies to respond to immigration emergencies.

However, the administration remains convinced that additional legal authorities are requested if the country is to respond adequately to another Mariel or similar emergency. Beyond existing legal authorities, it is the firm judgment of the administration that there remains a serious need to provide the President with special legal authorities in the event of a declared immigration emergency.

The administration is now finalizing draft legislation that would provide these authorities and will soon transmit them to Congress. Thereafter, I have indicated that I will promptly

move to conduct hearings and a markup on the bill. The administration also urges the earliest possible consideration of its emergency legislation.

I am pleased that action is being taken both under existing policies and that there is a recognition by you and by the administration of new administrative policies to assure that the people of Florida are not made to again suffer unnecessarily.

Mr. CHILES. Mr. President, I agree with the Senator from Wyoming that we need to act promptly on the legislative proposal that the administration plans to submit. It is important that we make sure that the Federal Government has the ability to respond to all possible contingencies. It is also important that Congress carefully review that proposal, to make certain that the new measures provided are appropriate. I commend him for his commitment to move quickly to hold hearings on the administration's proposal, and to move the proposal through the Immigration Subcommittee. I stand prepared to do whatever I can to help him.

I thank the Senator from Wyoming for discussing this important issue. It is essential that Congress and the administration signal their determination to respond to any future mass migrations to the United States. By making clear that there is authority to respond to such crises, and by showing our determination to strengthen existing authority, we are sending a message to the people of the United States and to the people of other countries that we are determined never to allow a Mariel to occur again. We sent a signal that the United States, and not the Fidel Castros of this world, will set our immigration policies.

Mrs. HAWKINS. Mr. President, I rise in support of the comments made by the senior Senator from Florida regarding the need to grant the President of the United States special emergency powers in the event of an immigration emergency. Our Nation was caught unprepared during 1980, when Fidel Castro opened the Mariel Harbor on the north coast of Cuba to anyone who wished to leave his island paradise. As Senators know, Castro included along with bona-fide Cuban emigrants significant numbers of criminals, social outcasts, mentally handicapped, and Cuban spies. The cost of our goodwill has been high—over \$1.1 billion. Especially exasperating is the tremendous cost to such localities as Dade County in south Florida, which has had to cope with the tremendous increase in demand for social and community services as 120,000 people descended into the area in a matter of months.

Let me try to give Senators an idea of the numbers of homeless people involved in the Mariel boatlift. In a

period of about 5 months, according to the 1980 census, roughly the same number of undocumented aliens arrived on Florida's shores as populate the cities of Peoria, Ill.; South Bend, Ind.; Boise City, Idaho; Cedar Rapids, Iowa; or Topeka, Kans. The population of Wyoming's three largest cities combined is smaller than the number of Cubans who landed on Florida's shores in only 5 months. Let me say that under no circumstances will we be caught off guard and without aid again.

Do not mistake me: I continue to support the United States idealism in granting political asylum to those who flee political persecution. I believe that this country must hold out its hand in generosity to those whose love for freedom and liberty is so great that they are willing to risk their lives for it. Furthermore, most of the Cubans who came to Florida during that period are upstanding, deserving people. I am proud to count many of these Cubans as my friends.

What occurred during the Mariel emergency, however, was a clear-cut case of diplomatic terrorism. Castro manipulated for his own gain the longing for freedom felt by his people. He arranged to inundate Florida with more people than the area could possibly assimilate in such a short period of time. Thus, the Cuban regime contrived to create an entirely avoidable immigration emergency for the United States. What is especially frightening is that the elements necessary for Castro to create an even greater immigration emergency are at his disposal at this very moment. The State Department estimates conservatively that one-tenth of the Cuban population, 1 million people, would like to leave Cuba. Using this tremendous power of discontent, Fidel Castro could make the Mariel boatlift look like child's play. Clearly, the President needs extraordinary powers in order to cope with extraordinary circumstances that might again be thrust upon this Nation either by events or by design.

When fires rage, when flood waters overflow their banks, when volcanoes erupt, the emergency authority of local officials to preserve the public good and restore order is a clear-cut given. Emergency circumstances require emergency authority. We must apply the same principle in an immigration emergency. We must grant the President those powers now and not delay consideration until we are in the middle of another immigration emergency. Emergency powers is the only major provision dealing with our national immigration situation that has hitherto been ignored.

This issue should come as a surprise to no one. Over a year ago the administration submitted its immigration proposals to Congress. Included promi-

nently among its suggestions was a provision expanding Presidential powers in the event of an immigration emergency.

Perhaps some feel that the emergency powers provisions will be controversial. Amnesty itself is controversial. Employer sanctions is controversial. Elements of the H-2 program are controversial. Immigration policy best to deal with our country's immigration problem is fraught with controversy. Let us accept that, and move on.

Senator SIMPSON has assured Senator CHILES and me that he will hold hearings on the subject of emergency powers later this year. I hold the Senator from Wyoming in high regard and know him to be a man of honor. And so are we all honorable men and women. If he says he will hold hearings, then he will hold hearings. But after those hearings are held, emergency powers will never be enacted by this Congress. This would certainly be no fault of the Senator from Wyoming. We are now nearing the end of this session of Congress, and the increasing press of urgent business is felt with each passing week. The difficulty in getting this bill to the floor should indicate the impossibility of getting an addendum to this bill later this year. The time to debate, discuss, and vote on this issue is now. The people of Florida have lived in fear and without aid long enough. It is time now to offer protection to Florida and all the other States that could face a sudden and massive influx of undocumented aliens. If the President is to deal effectively with an immigration emergency, he must have expanded authority to restrict travel and close ports, harbors, and airports. He must be able to redirect vessels. In short, the President must be given all the tools by which he can assure American communities against a loss of security, stability, and safety that is sure to follow a mass immigration.

As I drove through one of the communities in south Florida not long ago, I passed a church that had on it a sign with the words, "Why has the United States Government abandoned Miami?" I reiterate the question. I urge my colleagues to answer the question and to show the people of Miami and other communities that the Government cares about them.

CLARIFYING JUDICIAL REVIEW

Mr. KENNEDY. Mr. President, as the distinguished manager of this bill is aware, I have been concerned over the limitations of judicial review contained in this bill.

During the committee's markup, I offered a number of amendments to clarify an ambiguity in the bill regarding the possible limitation of judicial review of asylum class actions. I am also concerned over the limitations on judicial review of exclusions and deportations.

However, following the discussion of my amendments in committee, I note that the committee's report has been changed in order to address some of the concerns raised in my amendment.

Therefore, I should like to ask the manager of the bill a few questions to clarify the legislative intent of the limitations on judicial review contained in this bill.

First, Mr. President, let me indicate—as I did in my opening statement—I have supported many of the important reforms of the asylum adjudication process achieved in this bill. But I am concerned over the limitations of judicial review.

Is it the understanding of the manager of the bill that the habeas corpus jurisdiction permitted in the bill is sufficient to allow persons to seek judicial review if a class of cases develop alleging discrimination?

Mr. SIMPSON. Although there appears to be disagreement among several circuit courts of appeal on the issue of whether the class action provisions of rule 23 of the Federal rules of civil procedure are available in habeas corpus proceedings, an issue which has not yet been resolved by the Supreme Court—there is no doubt that at a minimum the following statement is true—and here I would note the 1982 case of *Bertrand against Sava*:

A Federal court may permit multi-party habeas actions similar to the class actions authorized by the Rules of Civil Procedure when the nature of the claim so requires.

Mr. KENNEDY. If this bill were law some years ago, could the case that resulted in Judge King's decision on the Haitians been allowed?

Mr. SIMPSON. I cannot answer specifically concerning the case to which the Senator refers, but let me say generally that the issue of whether aliens have been denied asylum and unlawfully detained or otherwise subjected to significant restraints on liberty in violation of their constitutional right to due process may be considered by a Federal court in habeas corpus proceedings guaranteed under the Constitution.

Due process for an alien applying for asylum will include the individual adjudication of his claim through fundamentally fair procedures, procedures which could be relied on for an objective determination, on the merits, of whether or not the individual applicant satisfies the statutory definition of "refugee" in INA section 101(a)(42) and whether or not his "life or freedom" would be threatened "on account of race, religion, nationality, membership in a particular social group, or political opinion" if he were to be returned to his home country—or another country to which he might be deported—as provided in INA section 243(h).

An example of such a due process violation would be a pattern or prac-

tice of denying asylum applications of aliens from a particular country because of their national origin rather than on the basis of the merits of their individual claims. If all applicants from Haiti were denied asylum solely because they came from Haiti, or even because of the fact that in the past most applicants from Haiti had been determined not to qualify, then procedural due process would not have been provided and judicial review through habeas corpus would be available.

Mr. President, if any of my colleagues wish additional detail, including a discussion of cases, they may consult the committee report at pages 12 through 14.

Mr. KENNEDY. I know there is some dispute between lawyers on this question, and I think we need to clarify it.

Finally, Mr. President, I have submitted two other amendments relating to the limitations on judicial review of exclusion cases, to assure that persons being held for deportation under the exclusion provisions of the immigration law can seek judicial review—as they can under current law.

As everyone who follows immigration law knows, our exclusion laws are hopelessly vague and out of date. The select commission voted unanimously that we should throw them out and reform them entirely—which is the intention, I know, of the chairman of our subcommittee and the manager of the bill.

However, until those reforms are accomplished, is it the view of the manager of the bill that persons in exclusion proceedings can seek judicial review if they believe they have been the subject of discriminatory treatment?

I have already discussed asylum cases.

In nonasylum deportation cases a substantive review of the U.S. immigration board's decision would be available, including whether the findings of fact were supported by substantial evidence.

In addition, for exclusion cases, the issue of whether aliens are being excluded and unlawfully detained or otherwise subjected to significant restraints on liberty in violation of their constitutional right to due process may be considered by a federal court in the habeas corpus proceedings guaranteed under the constitution.

Due process for an excluded alien includes the individual adjudication of his case through fundamentally fair procedures, procedures which could be relied on for an objective determination, on the merits, of whether or not he is excludable. An example of such a due process violation would be a pattern or practice of adverse determinations with respect to aliens from a par-

ticular country because of their national origin rather than on the basis of the merits of their individual cases.

ORDER OF BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent now that we go on to other business.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRESERVATION OF THE HISTORIC CONGRESSIONAL CEMETERY IN THE DISTRICT OF COLUMBIA

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 6033, preserving the congressional cemetery. This has been cleared with the minority.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 6033) relating to the preservation of the historic Congressional Cemetery in the District of Columbia for the inspiration and benefit of the people of the United States.

There being no objection, the Senate proceeded to consider the bill, which was considered to have been read twice.

Mr. STEVENS. Mr. President, this is a very worthwhile bill. I visited that cemetery. I visited the graves of some of my friends there.

I ask that we have immediate consideration of this bill.

The bill was considered, ordered to a third reading, read the third time, and passed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. STEVENS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXTENSION OF TIME TO FILE CONFERENCE REPORT ON H.R. 4961

Mr. STEVENS. Mr. President, I ask unanimous consent that the managers on the part of the Senate to the conference on the disagreeing votes of the two Houses on H.R. 4961, the Miscellaneous Revenue Act, have until midnight on Sunday, August 15, to file a conference report. This has been cleared with the minority.

The PRESIDING OFFICER. Without objection, it is so ordered.

REMOVAL OF INJUNCTION OF SECRECY

Mr. STEVENS. Mr. President, as in executive session, I ask unanimous consent that the injunction of secrecy be removed from a Tax Convention with New Zealand (Treaty Document

No. 97-27), transmitted to the Senate today by the President of the United States; and ask that the treaty be considered as having been read the first time; that it be referred, with accompanying papers, to the Committee on Foreign Relations and ordered to be printed, and that the President's message be printed in the RECORD. This has been cleared with the minority.

The PRESIDING OFFICER. Without objection, it is so ordered.

The message of the President is as follows:

To the Senate of the United States:

I transmit herewith, for Senate advice and consent to ratification, a Convention between the United States of America and New Zealand for the avoidance of double taxation and the prevention of fiscal evasion with respect to taxes on income, together with a related Protocol, signed at Wellington on July 23, 1982. I also transmit the report of the Department of State on the Convention.

The Convention, based on the OECD and draft United States model income tax conventions, takes into account changes in the income tax laws and tax treaty policies of the two countries. It provides limits on the tax at source with respect to taxes on investment income and provides rules for the taxation of capital gains, business profits, personal service income and other income. It also specifies the method used to avoid double taxation and provides for administrative cooperation between the tax officials of the two countries to avoid double taxation and prevent fiscal evasion.

I recommend that the Senate give early and favorable consideration to the Convention and related Protocol and give advice and consent to their ratification.

RONALD REAGAN.

NEBRASKA AND THE UNITED STATES NEED A SUGAR INDUSTRY

Mr. ZORINSKY. Last summer I joined 63 of my Senate colleagues in approving the sugar title of the 1981 Food and Agriculture Act. I did do in the belief that a viable domestic sugar industry is in the Nation's best interest. I continue to adhere to that belief.

I was further convinced that the beet sugar industry is also important to Nebraska. It provides jobs and wages, and taxes and, yes, even purchases of soda pop and bakery products. The beet sugar industry is a good customer for Nebraska farm implement dealers, fertilizer suppliers, railroads, and other providers of goods and services.

The American sugar industry is a highly integrated operation—that is due to the nature of the crop. Unlike producers of corn, wheat, or cotton, a sugar grower cannot grow a crop without ready access to a sugar mill or processing plant.

And due to the economics of the industry, the grower cannot survive without an ongoing relationship with a processor.

If sugar mills go out of business, as is happening in Nebraska and adjoining

ing, Colorado, so do the growers who depend on that mill, unless there is a nearby competitor with adequate capacity to take on additional growers—not a likely event. High costs simply make it impossible to transport raw, unrefined sugar hundreds of miles for processing.

What may cause a mill to go out of business? One reason may be the loss of growers who supply the mill—and that can happen if prices farmers receive for their sugar fall low enough and stay low enough to induce them to switch to more profitable crops. Without adequate supplies of raw sugar, the mill cannot stay in business.

Later, if sugar prices increase, the grower does not have the alternative of returning to sugar production—the mill is gone. It is not likely that a mill can restart production if it has been closed for any length of time—the odds are that it has been sold for other purposes or torn down. Nor is it likely that a new mill or processing plant will be built—it is estimated that a new plant today would cost more than \$50 million to build.

In the last 8 years, it is estimated that 21 sugarcane mills or sugar beet processing plants have closed down in the United States.

Americans consumed 9.77 million tons of sugar, raw value, last year—enough to amount to 79.5 pounds for every man, woman, and child in the United States.

Only 55 percent come from U.S. sugar producers—the rest was imported. The sugar produced on U.S. farms amounts to only 6 percent of the sugar produced in the world last year. Where is U.S. sugar produced?

Thirty percent comes from sugar beets grown in 17 Midwestern and Western States: Arizona, California, Colorado, Idaho, Kansas, Michigan, Minnesota, Montana, Nebraska, New Mexico, North Dakota, Ohio, Oregon, Texas, Utah, Washington, and Wyoming.

Twenty-five percent comes from sugarcane in four Western and Southern States: Florida, Hawaii, Louisiana, and Texas.

More than 15,000 individual farmers and their families are involved in producing sugar in the United States—many of them dependent entirely on their sugar crop. Remarkably, these 15,000 individuals supply half of the sugar consumed by 250 million Americans.

As telling as any argument for the maintenance of a U.S. sugar production capability, however, is the fact that if this basic commodity were no longer available from nearby American farms, sugar users in Nebraska would be totally beholden to cane refiners in the Gulf States or refiners located along the Northeastern seaboard—quite a freight haul to Hast-

ings. These distant refiners would, in turn, have to depend on growers in politically unstable Central and South America for a commodity essential to all Nebraska households and one that is critical to the State's bottlers, bakers, and confectioners.

Frequently, one hears the argument that it is not necessary to support the price for a domestic sugar industry when the world price of sugar is far lower than the domestic price. Let us understand the world price a little better.

The so-called world price is based on only about 20 percent of the world's production—the other 80 percent either is consumed in the country where it is produced or sold under bilateral agreements—such as one which requires Cuba to supply the Soviet Union a fixed amount of sugar each year—at a price well in excess of the world price.

There is no world market in sugar in the traditional sense—it is a dump market for overproduction in any given year that cannot be consumed locally or sold under bilateral agreements. This oversupply, available only in years of overproduction which cannot be predicted from year to year, provides no supply assurance, no expectation of reasonable prices.

Likewise, there is no free market in sugar—almost every nation has erected one or another barrier to the free entry of sugar. The European Economic Community permits only limited imports from former colonies of its country members; Brazil, Cuba, and Australia do not permit sugar imports at all. Canada, Japan, and the EEC subsidize sugar production at a level substantially higher than any proposed for the United States.

Nebraska sugar beet farmers and processors and other segments of the U.S. sugar industry cannot remain viable in the misnamed world free market when the fact is that this country's sugar industry would be the only group that plays by free trade rules. More than 80 percent of the world's sugar production is marketed in protected home markets—Australian refiners pay 23.8 cents per pound for Aussie-produced raw sugar; sugar imports into Australia are prohibited—or sold under preferential trade agreements—Russia pays Cuba 31.5 cents per pound for raw sugar under long-term contract, which takes about two-thirds of the Cuban output.

The balance of the world's sugar production—averaging about 20 percent—is dumped at whatever price it can bring. It is against such dumped sugar that American farmers must compete and thus a loan program becomes essential to keep the industry afloat in years of world glut. The dividend for American consumers come in the years of short world supply. During those periods if there were no

U.S. industry, Americans would pay dearly for sugar, if indeed it was available at all.

The Senator from Massachusetts (Mr. TSONGAS), sponsor of legislation to eliminate the sugar support program, perhaps feels no such concern. The two cane refineries in Boston—one owned by Philippine interests—operate essentially on imported raw sugar. They remain viable by simply passing along their refining costs to consumers whether they pay 10 cents or \$10 per pound for imported raws.

The Quayle-Tsongas approach to reduce the sugar support level for the purpose of having a level that can be conveniently achieved is somewhat like the story of the freshman economics student, who proudly announced that he had, that afternoon, run home beside the bus and achieved a savings of 30 cents. His father advised that if, on the following day he would run home beside a taxi, he could achieve a savings of \$2.

Like other agricultural commodities subject to wide fluctuations in production and price, sugar has been the subject of varying efforts by government to support and stabilize prices and supply.

The old Sugar Act, which created price stability and assured adequate supplies for American consumers, expired in 1975. There was no sugar program for a brief period, and a stopgap program was enacted in omnibus farm legislation in 1977. That program and intermediate programs established by administrative authority of the U.S. Department of Agriculture continued until enactment of the Agriculture and Food Act of 1981.

The 1981 act provided an interim "purchase program" that operated for sugar produced before March 31, 1982. It provided for the U.S. Government to offer to purchase any sugar at 16.75 cents per pound. Beginning October 1, 1982, a loan program similar to those established for several other farm commodities will take effect. The price support loan rate will be 17 cents per pound for 1982 sugar, 17.5 cents per pound for 1983, 17.75 cents per pound for 1984, and 18 cents per pound for 1985.

Congress designed the sugar program to be administered in a manner that does not cost the taxpayer any money. There are existing laws and authorities—in the form of import fees, duties, and/or quotas—that can be implemented to assure there is no Government cost to support the price of sugar produced in the United States.

Here is how it works: With a purchase program this year at 16.75 cents per pound, USDA determined that it would have to maintain the actual price at 19.88 cents per pound to be certain that the Government would not actually purchase sugar. USDA

calculated its price objective by adding the purchase cost to adjusted transportation costs and an incentive of 0.2 cent per pound.

By its imposition of fees and quotas, the Government seeks to keep the price of sugar high enough to prevent taking over any domestic sugar—either under this year's purchase program or under the price support loan program in subsequent years.

Such fees and quotas are unique to sugar—in no other commodity is there such a mechanism to maintain prices high enough to prevent Government takeover. Thus, when there is chronic overproduction in some other commodities, producers often forfeit commodities and the Government has no recourse but to take possession.

The current sugar program is no bonanza to American beet and cane producers. The price support loan rate for 1982 crop sugar will cover only about 70 percent of the average cost of producing sugar as USDA calculates it. Compared with other commodities, the sugar price support level covers far less of the total production cost to the grower.

I believe the sugar support program adopted last summer achieves a fair balance among the interests of consumers, taxpayers and the producers of an essential commodity. Agriculture Secretary Block has stated that the import quotas will be removed when the glut-induced distressed price of imports advances. The mechanics of the fee arrangement similarly reduce the fees as the prices of imports achieve a more realistic level. I am convinced that for now, we should keep the sugar support program on the books at its present modest level. I will, therefore, work to defeat the Quayle-Tsongas amendment.

LONG-TERM FIXED-RATE SBA LOANS: "THE MINNESOTA PLAN"

Mr. BOSCHWITZ. Mr. President, small businesses are the most credit-sensitive segment of our economy. Low interest rates are vital to the survival and growth of small businesses. While interest rates have declined substantially over the past year or so, small businesses need stable, long-term financing to grow and prosper.

Today I take pride in announcing an innovative approach that will lower interest rates on SBA loans and provide much-needed long-term, fixed-rate financing to small businesses in Minnesota. My State of Minnesota has long been recognized for its innovative and progressive business community. Once again, recognition is due for the Small Business Administration's guaranteed loan pilot program in Minnesota.

This pilot program is generally referred to as the Minnesota plan—and for good reason. Last October, the

Minnesota Small Business Finance Agency (MSBFA) presented the SBA with a plan to lower interest rates on SBA guaranteed loans and allow SBA to guarantee long-term, fixed-rate loans—without cost to the Treasury or changing SBA eligibility requirements.

MSBFA's Chairman Robert Anderson and Executive Director Jean Laubach deserve much credit for developing the plan with Minnesota's banking and investment community, and their perseverance in refining the plan to accommodate the concerns of SBA. Minnesota Bankers Association President John Ingebrand and Executive Vice President Truman Jeffers are to be commended for their support, which is extremely important for the plan's success. In addition, SBA Administrator Jim Sanders and Region V Director Dick Durkin played a crucial role in making the plan a reality. As a member of the Small Business Committee, I am pleased to have been involved in the process for what could become a national program. Clearly, the Minnesota plan is the result of a team effort to make the best use of SBA loans on the best terms possible for small businesses in Minnesota.

Under the Minnesota plan, the MSBFA, a State agency, acts as a conduit for packaging the guaranteed portion of SBA loans for sale in the secondary market. MSBFA sells taxable, long-term fixed-rate bonds to investors in lots of \$5 to \$10 million. The proceeds from these bonds can only be invested in SBA guaranteed loans—giving the bonds a high rating and making them extremely safe for investors. The proceeds of the bonds are used to purchase the guaranteed portion of SBA fixed asset loans from banks, providing banks an additional marketing tool for their customers and a liquid secondary market. In return, the banks agree to make SBA guaranteed loans on terms comparable to the bonds. The small business borrower agrees to a prepayment penalty, declining over the term of the loan, in exchange for the long-term fixed-rate loan. The small business makes its loan payments to the bank; the bank pays MSBFA and MSBFA uses the loan payments to retire the bonds. In effect, the small business gets the benefits of issuing long-term bonds.

MSBFA and investment bankers estimate the Minnesota plan will reduce interest rates on SBA loans for plant and equipment by 1 to 3 percent, depending on market conditions. Equally important, small businesses will have an alternative to variable rate financing that provides the certainty and stability necessary to plan and expand.

The dedication and determination of MSBFA, SBA and Minnesota's banking community to the needs of small business cannot be overstated. I applaud their efforts and pledge my efforts to make the Minnesota plan the

standard against which guaranteed loans are judged.

Mr. President, I ask unanimous consent that a letter from the Minnesota Bankers Association and a fact sheet describing the Minnesota plan be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MINNESOTA BANKERS ASSOCIATION,
Minneapolis, Minn., August 10, 1982.

Hon. RUDY BOSCHWITZ,
U.S. Senate, Dirksen Senate Office Building,
Washington, D.C.

DEAR RUDY: We are pleased to learn of the favorable action by the Small Business Administration in approving the proposal for a Minnesota program to develop long-range capital for the expansion of small businesses, and that you will announce this new development this week. We certainly appreciate your assistance in the development and approval of this project.

I also want to let you know that the Minnesota Bankers Association Board of Directors has approved our support for the new Minnesota program, and we will be encouraging our members to actively participate in the plan.

Please extend our congratulations to everyone involved in this significant announcement.

Sincerely

TRUMAN L. JEFFERS,
Executive Vice President.

"MINNESOTA PLAN" FACT SHEET

Description

Pilot program in Minnesota to provide long-term fixed rate SBA guaranteed loans to small businesses.

Current SBA loans activity

Term of under 7 years.

Variable rate of up to prime plus 2% percent, adjusted quarterly over the term.

Minnesota plan

Term of 15-20 years.

Fixed rate determined by rate of bonds issued by Minnesota Small Business Finance Agency (MSBFA), a state agency authorized to issue bonds.

Interest rate 1 to 3 percent below current SBA rate, depending on market conditions.

How it works

MSBFA sells long-term, fixed-rate taxable bonds in lots of \$5-10 million in the bond market.

Proceeds from the bonds are placed with a Trustee.

The Trustee can use the proceeds to invest only in the guaranteed portion of SBA loans.

Banks sell their guaranteed SBA loans to the Trustee, agreeing to "pass-through" the interest rate on the bonds to a small business borrower.

Small business borrower agrees to a prepayment penalty in exchange for a long-term, fixed rate loan.

Small businesses make loan repayments to the bank, which turns over the proceeds to the Trustee.

The Trustee uses the loan repayments to retire the bonds.

Benefits to small businesses

Long-term financing 1 to 3 percent below current rates depending on market conditions.

Fixed rate financing comparable to large "blue chip" businesses.

Benefits to banks

Additional marketing tool to service small business customers.

Liquid secondary market for SBA guaranteed loans.

Benefits to investor

Low-risk investment.

Effect on SBA programs

Management tool to reduce interest rates on SBA loans.

No change in eligibility requirements (credit test, size standards, amount of loan).

No increase in guaranteed loan authority or budget authority.

SALE OF SOME NATIONAL FOREST LANDS

Mr. JACKSON. Mr. President, I want to bring to the attention of my colleagues a recent press release from the Forest Service regarding the administration's program to sell off the Nation's public lands to reduce the national debt.

It appears, Mr. President, that the reservations that many of us expressed last year when the administration proposed this program are indeed well founded. According to the Forest Service, only some 51 million acres are included at this point in the "retention" category; 60,133 acres have been identified for sale without additional legislative authority. The remaining 140 million acres are being reviewed to determine which should be sold and which should be retained. I should note here, Mr. President, that the Forest Service is now indicating that some of the acreage in the "retain" category may have been double counted and that the amount actually designated for retention at this point is only about 48.5 million acres.

I am frankly astounded that the Forest Service is only willing to identify less than 27 percent of the entire forest system off limits for sale at this time. Even to suggest that over 70 percent of our Nation's national forest system is potentially available for sale to the highest bidder is shocking to me. And I am sure it is equally shocking to the millions and millions of Americans who use these forests for hunting, fishing, camping, hiking, and other forms of recreation.

Of course, I understand full well that the administration will not sell off 140 million acres of national forest system—the Congress and the American people would not stand for it even if they wanted to. I understand that, according to the Forest Service, "substantial" acreage will be added to the "retained" category. And, Mr. President, I understand that additional legislative authority will be necessary to liquidate the Nation's national forest holdings.

Nevertheless, this announcement regarding this proposed sale greatly concerns me. In my State of Washington, for example, out of almost 9 million

acres of national forest lands only about 2 million acres currently fall into the retain category as a result of their wilderness or wilderness-study status. The remaining lands in Washington State are being studied to determine if they qualify for sale. I can assure my friends in the Forest Service that they will be hearing from the citizens of my State regarding the disposition of these lands.

Mr. President, I and a number of my colleagues sounded the alarm months ago regarding privatization and asset management. I said then that I thought the idea was shortsighted, ill-conceived, and definitely not in the best interest of the citizens of this Nation who use the public lands. Actions such as this on the part of the Forest Service only serve to underscore how misguided and potentially devastating this program can be. I can only hope that President Reagan, John Crowell, Jim Watt, David Stockman, and the other proponents of this scheme to sell the public's lands will reconsider their position.

I ask unanimous consent that a copy of the press release appear in the RECORD at this point.

There being no objection, the news release was ordered to be printed in the RECORD, as follows:

[News Release]

LEGISLATION TO BE SOUGHT FOR SALE OF SOME NATIONAL FOREST LANDS

WASHINGTON, August 10.—A legislative proposal will be developed to give the U.S. Department of Agriculture's Forest Service new authority to sell excess lands carefully selected from the 191 million acres the agency administers.

Under existing authorities, only about 60,000 acres of national forest lands qualify for sale, Secretary of Agriculture John R. Block said today.

The proposal for new legislation will be part of the USDA legislative program for the 98th Congress, Block said.

As part of the president's federal assets management program, national forest system lands are to be placed in one of three categories. These categories consist of lands to be retained, lands meeting criteria for sale and lands requiring further study before deciding whether to retain or sell them.

The first category initially consists of some 51 million acres that are to be retained. It includes all Congressionally-designated areas such as wilderness, wild and scenic rivers, national recreation areas and national monuments. After further review of other national forest system lands, substantial acreage will be added to this "retained" category.

The second category consists of lands which can be offered for immediate sale without additional legislative authority. Totalling 60,133 acres in 26 states, these lands have initially been identified as excessive to the needs and objectives of the Forest Service. Tracts convenient to urban and suburban areas where private or local government ownership would provide greater benefits than federal ownership are included in this category. Additions will be made to the category of lands meeting criteria for disposal

after needed legislation is passed, Block said.

The remaining 140 million acres of national forest system lands have been placed in a category for further study. An initial review of the acreage in this category will quickly identify those lands which need more intensive study to determine whether they might qualify for sale once the needed legislation is enacted.

After the initial review, lands in this third category not identified for intensive study would be placed in the retention category.

Block said 15 to 18 million acres of national forest system lands are likely to receive this intensive study; they would include lands in scattered and checkerboard ownership patterns; portions of the national grasslands; other national forest areas with a low percentage of federal ownership; and certain other lands already under paid special use permit.

Block said opportunities exist to improve the use of certain lands and to reduce administrative costs. Block also indicated that development of the legislation will require close coordination between the executive branch and Congress.

National forest system acreage initially identified as qualifying for sale under existing authority

LET US SET A BETTER EXAMPLE

Mr. PRESSLER. Mr. President, I have not always agreed with the Washington Post's editorial positions. However, I strongly concur with a recent Post editorial on the recent Senate vote concerning the Hart Building gym. I ask unanimous consent that this editorial be printed in the RECORD immediately following my remarks.

I voted in favor of the amendment to delete additional funding for this project included in H.R. 6863, the supplemental appropriations bill. Unfortunately, the amendment failed. I voted for this deletion because I believe that Congress must set an example by reducing frivolous Government expenses

during this time of massive Federal deficits and high interest rates.

In the past months, the Senate has had to make difficult budgetary decisions concerning programs for the elderly, the handicapped, the unemployed, this country's students, and veterans. I do not understand how we can ask the American people to make sacrifices and tighten their belts if Congress is not willing and able to cut funding for something so unnecessary as a third Senate gym. If we want the respect and cooperation of the American people, we must earn it. Yesterday's vote to retain funding for the Hart gym is a sad comment on congressional priorities.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Aug. 12, 1982]

GYMDOGGLE

It wasn't really a third gymnasium that the austere Senate was about to create for itself, Louisiana's Bennett Johnston protested before the vote the other day, because basically the Senate only has one full gymnasium with swimming pool and so forth now—poor things. The Senate's second so-called gymnasium, Mr. Johnston explained, is merely an exercise room (with equipment, of course, plus separate locker and shower rooms). So why not go ahead and appropriate the mere \$736,400 needed to finish up its third gymnasium, which is only, as he tells it, the Senate's second-and-a-half or maybe its second-and-a-quarter gym?

Make sense to you? No? Well, try this: and besides, since the thing has now been begun, not to finish it as a gym would be wasteful and anyhow some day someone would finish it and the cost by then would be higher. What's that you say? You still aren't persuaded? What are you, anyway—some kind of Communist? The Senate, in its infinite, selfless wisdom, did buy the argument by a vote of 50 to 48 on Tuesday. So there will be yet another gym for the 100 legislators. No staff, no family, no friends. Just 100 senators availing themselves of these luxurious facilities. What a joy—makes you feel physically fit all over just to think of it.

Or, do we mean physically ill? Sen. Proxmire, with whose words we don't always agree, had it absolutely right. As you might imagine, he led the opposition to this boondoggle, and in the course of doing so, he said this: "For the past year and a half, this Congress, and especially this Senate has been trying to hold down spending. Think of the sacrifices we have imposed. We have cut federal assistance for disadvantaged schoolchildren. We have hammered down appropriations for the handicapped—men, women and children. We have cut food stamps. We have reduced Medicaid. We have forced elderly people to make higher payments for their Medicare. . . . almost all Americans have been asked one way or another to make a sacrifice. And yet, now we will provide over \$700,000 for a third Senate gymnasium and over \$1 million for a new especially fancy and super-equipped media hearing room [yet another legislative self-indulgence scheduled for this glitzy new Senate office building]. Why do we need still another gym?"

There was no good answer, but that will not surprise you. And it probably will not

surprise you either that many of those who voted for this latest gift to themselves are among the world-class "economizers" on the Hill—when it comes to economizing on other people's medical benefits or food stamps. Nor we suppose will you exactly faint from shock to learn that there are others on the list (which we print for your edification) from the party that has made such a big thing of Mrs. Reagan's life style—of which we hope to hear nothing further from these gym-builders.

You hear it said a lot about this town—we sometimes say it ourselves—that it is really too bad that the people who work so hard in government, whether in Congress or the executive branch, are so dismally misunderstood by the public, so suspect, so vulnerable to bum raps. Then, just when you're full of sympathy, they go and do something stupid and insensitive like this. Three quarters of a million dollars to finish up a third gym for the same 100 senators who already have two gyms. How come the new gym won't also have an espresso machine and a wine bar? Or did we miss something?

A COMPREHENSIVE TEST BAN TREATY IS VITAL TO SURVIVAL

Mr. PROXMIRE. Mr. President, recently the Milwaukee Journal carried a letter from me on the critical importance of the administration's resuming negotiations with the Soviet Union for the resumption of a comprehensive nuclear test ban treaty. Frankly, I cannot think of an issue more important than the survival of mankind on this planet and negotiations for a test ban treaty are designed to achieve exactly that.

The President deserves credit for pushing the START negotiations. We should go beyond SALT II and ratify it. But those measures will still leave us short of the most fundamental action we can take to stop the nuclear arms race. It will continue and escalate even as we reduce and eliminate weapons systems as long as testing enables both massive nuclear powers to refine and improve the deadly destructive capability of their weapons.

I ask unanimous consent that the letter be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

IT STARTED AT HIROSHIMA: WHERE WILL IT ALL END?

The administration has decided not to continue negotiations with the Soviet Union for a comprehensive test ban treaty. For 20 years we have had a test ban treaty honored by both the US and the Soviet Union. What's wrong with it? To answer that question, we must ask: What is the purpose of a test ban treaty? Answer: To stop the testing of newer, more devastating nuclear weapons which speed up the arms race.

Not only do these tests permit the development of ever more devastating weapons, but they permit Third World countries to develop their own arsenals of weapons, join the nuclear club and, in the process, enhance the likelihood of nuclear war. No action by the USSR or the US could more surely protect this old Earth from a nuclear war than the agreement—first, by the two

superpowers and then, by other countries—to cease testing of nuclear arms at any level.

The present test ban treaty only prevents tests above a certain level of power, which is 10 times greater than that of the bomb dropped at Hiroshima. Almost any weapon or concept can be thoroughly refined and improved with testing at that power.

The present treaty does protect the environment to a considerable extent. Tests of greater power would pollute the environment and cause radioactive-induced illness throughout the world, even if carried out underground. But the fundamental purpose of slowing the arms race has not been seriously affected by the current treaty.

Neither the START negotiations nor a revival of SALT II will accomplish this. Although both would serve a useful arms-control purpose in limiting the nuclear arsenals of the two superpowers, neither would stop testing. Even with severely limited nuclear arsenals, two very dangerous problems will continue:

1. Both the US and USSR can vastly increase the deadliness of their nuclear weapons while sharply reducing their number and, at the same time, comply with any conceivable nuclear arms limitation treaty. Both countries can increase their ability to strike first and hardest, as long as testing continues. They can do this while abiding fully by any arms reduction treaty. Both nations can rush down the road to final nuclear power, while the world is lulled into a happy assumption that nuclear arms limitations are guiding us to safety.

2. Non-nuclear countries see the superpowers racing ahead developing know-how and infinite nuclear power. That know-how, developed through testing and for which testing is absolutely essential, becomes worth its weight in the most precious of values to other countries. They test to learn it themselves or they beg, buy, borrow or steal it from one superpower or the other.

The Russians have indicated a willingness to discuss and perhaps agree to a comprehensive test ban treaty. In 1978 they even indicated agreement to on-site inspection. We have far better verification procedures than ever before. I do not say we should agree to such a treaty until we are fully satisfied that we can enforce it. I do say we should negotiate with all our heart and soul to develop a comprehensive test ban treaty that we can verify and count on. What could be more important?

SEN. WILLIAM PROXMIRE

WASHINGTON, D.C.

CAMBODIAN CHILDREN'S ART: EXPRESSING THE MEMORY OF DEATH

Mr. PROXMIRE. Mr. President, many Cambodian refugee children who have found a haven in the United States are learning to take a new interest in life through art classes in their schools.

These are children who have seen their loved ones killed and their homes destroyed; children who have miraculously survived bomb explosions within feet of their hiding places; children who have been forced to work in labor gangs, building roads and dams and hauling heavy rocks; children who have grown into fearful and defensive adolescents through long years of tragedy and horror.

Now that they are in the United States, these children and young people are learning to breathe more easily. Slowly, they are learning to smile, to laugh, to speak without fear, and to trust other people.

Evidence of this slow adjustment to a free and peaceful society can be found in these children's artwork. Newly arrived refugee children paint and sculpt the instruments of death and destruction: tanks, guns, airplanes, hand grenades. A refugee child in Boston, Mass., recently presented his teacher with a precisely sculpted hand grenade, complete with a removable pin. The teacher tried to explain to the child that if he did not hollow out the inside of the clay grenade, it would explode when it was fired in the kiln. She did not understand why the class of refugee children burst into laughter.

As the Cambodian children become more accustomed to peace and safety, they begin to paint and model dragons, oxen, snakes, frogs, and other mythical and real animals from Asia. They reach a point at which they can move beyond the memories of death and begin to draw upon what memories they have of a coherent and ordered world. Some children, who have difficulty making the transition, create strange animals that are half dragon and half tank.

The memories of death and destruction expressed by these children in their art are memories which no child should have. These children have experienced the horror of mass killing as no child should ever experience it. At an age at which most children are learning to make sense of the world in an atmosphere of love and stability, these children have learned that the world is filled with senseless hatred and cruelty. We who enjoy the benefits of peace and freedom must take action to minimize the number of children who learn these tragic lessons and grow up with these terrifying memories.

To achieve this goal, we must prevent the recurrence of programs of mass slaughter similar to the one that took place in Cambodia. And we cannot take an effective stand against such atrocities if we do not ratify the International Genocide Convention. As a party to this important treaty, we would lend the weight of the world's most powerful and influential nation to international efforts to stop such programs of systematic killing. We could bring the weight of world condemnation to bear on the perpetrators. Efforts could be made to halt such senseless murder and, in the case of actual genocide, to punish those who are responsible. Our support of this treaty would, in addition, create a strong deterrent that might prevent

the initiation of systematic death campaigns.

In their artwork, children reflect their experience of the world and attempt to give it meaning. Let us hope that the children of the future will reflect an experience that is peaceful and safe. Let us do what we can to insure that they draw pictures of flowers and animals, not of tanks and guns. Let us therefore affirm our commitment to these children by ratifying the Genocide Convention.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

INTERNATIONAL FISHERY AGREEMENT BETWEEN THE UNITED STATES AND SPAIN—MESSAGE FROM THE PRESIDENT PM 164

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers; which, pursuant to Public Law 94-265, was referred jointly to the Committee on Commerce, Science, and Transportation and the Committee on Foreign Relations:

To the Congress of the United States:

In accordance with the Magnuson Fishery Conservation and Management Act of 1976 (Public Law 94-265; 16 USC 1801), I transmit herewith a governing international fishery agreement between the United States and Spain, signed at Washington on July 29, 1982.

This agreement is one of a series to be renegotiated in accordance with that legislation to replace existing bilateral fishery agreements scheduled to expire this year. I urge that the Congress give favorable consideration to this agreement at an early date.

RONALD REAGAN.

THE WHITE HOUSE, August 13, 1982.

MESSAGE FROM THE HOUSE

At 1:14 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed

the following bills, in which it requests the concurrence of the Senate:

H.R. 5203. An act to amend the Federal Insecticide, Fungicide, and Rodenticide Act; and

H.R. 6892. An act to provide changes in legislation to meet reconciliation requirements in the first congressional budget resolution—fiscal year 1983—for the House Committee on Agriculture.

ENROLLED BILL SIGNED

The message also announced that the Speaker has signed the following enrolled bill:

S. 2073. An act to repeal outdated size and weight limitations now imposed on the U.S. Postal Service.

The enrolled bill was subsequently signed by the President pro tempore (Mr. THURMOND).

HOUSE BILL REFERRED

The following bill was read the first and second times by unanimous consent, and referred as indicated:

H.R. 5203. An act to amend the Federal Insecticide, Fungicide, and Rodenticide Act; to the Committee on Agriculture, Nutrition, and Forestry.

HOUSE BILL PLACED ON THE CALENDAR

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 6892. An act to provide changes in legislation to meet reconciliation requirements in the first congressional budget resolution, fiscal year 1983, for the House Committee on Agriculture.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, August 13, 1982, he had presented to the President of the United States the following enrolled bill:

S. 2073. An act to repeal outdated size and weight limitations now imposed on the U.S. Postal Service.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DOLE, from the Committee on Finance, without amendment:

S. Res. 445. An original resolution to express the sense of the Senate concerning consultations with the Government of the Socialist Republic of Romania with respect to facilitation of increased emigration and the encouragement of religious and cultural freedom (Rept. No. 97-522).

By Mr. PERCY, from the Committee on Foreign Relations, without amendment:

H. Con. Res. 385. Concurrent resolution expressing the sense of the Congress that the Government of the Soviet Union should allow Yuri Balovlevkov to emigrate.

By Mr. MCCLURE, from the committee of conference:

Report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6530) to establish the Mount St.

Helens National Volcanic Area, and for other purposes (Rept. No. 97-523).

By Mr. MCCLURE, from the Committee on Energy and Natural Resources and the Committee on Environment and Public Works, jointly, with an amendment in the nature of a substitute and an amendment to the title:

S. 1606. A bill to establish a supplemental insurance fund administered by the Secretary of Energy to pay the costs of necessary remedial action following damage to nuclear powerplants, including certain remedial action at the Three Mile Island facilities in Pennsylvania, to require participation in such fund by the licensees of nuclear powerplants as a condition for the licensing and continued operation of such plants, and for other purposes (with minority and supplemental views) (Rept. No. 97-524).

By Mr. MCCLURE, from the Committee on Energy and Natural Resources, without amendment:

S. Res. 447. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1606; referred to the Committee on the Budget.

By Mr. PERCY, from the Committee on Foreign Relations, without amendment:

S. Res. 448. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 6409.

By Mr. PERCY, from the Committee on Foreign Relations, with an amendment:

H.R. 6409. An act to provide for the participation of the United States in the 1984 Louisiana World Exposition to be held in New Orleans, La., and for other purposes (Rept. No. 97-525).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs:

Ralph D. DeNunzio, of Connecticut, to be a Director of the Securities Investor Protection Corporation for a term expiring December 31, 1982;

David F. Goldberg, of Illinois, to be a Director of the Securities Investor Protection Corporation for a term expiring December 31, 1984; and

Roger A. Yurchuck, of Ohio, to be a Director of the Securities Investor Protection Corporation for a term expiring December 31, 1984.

By Mr. MCCLURE, from the Committee on Energy and Natural Resources:

Milton M. Masson, Jr., of Arizona, to be a member of the Board of Directors of the U.S. Synthetic Fuels Corporation for a term of 1 year;

John B. Carter, Jr., of Texas, to be a member of the Board of Directors of the U.S. Synthetic Fuels Corporation for a term of 2 years; and

Oliver G. Richard III, of Louisiana, to be a member of the Federal Energy Regulatory Commission for a term expiring October 20, 1985.

(The above nominations were reported from the Committee on Energy and Natural Resources with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. PERCY, from the Committee on Foreign Relations, with an understanding:

Ex. N. 92-2. International Convention on Tonnage Measurements of Ships, 1969, which was signed for the United States at London, June 23, 1969 (Ex. Rept. 97-57).

By Mr. PERCY, from the Committee on Foreign Relations, without amendment:

Treaty Doc. 97-25. Convention for the Conservation of Salmon in the North Atlantic Ocean, signed in March 1982 by the United States, Canada, the European Community, Iceland, and Norway (Ex. Rept. 97-58).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HUMPHREY (for himself, Mr. RUDMAN, Mr. STAFFORD, Mr. WEICKER, Mr. TSONGAS, Mr. KENNEDY, Mr. DODD, and Mr. LEAHY):

S. 2835. A bill to grant the consent and approval of the Congress to an interstate agreement or compact relating to the restoration of Atlantic salmon in the Connecticut River Basin, and to allow the Secretary of Commerce and the Secretary of the Interior to participate as members in a Connecticut River Atlantic Salmon Commission; to the Committee on the Judiciary.

By Mr. TSONGAS (for himself and Mr. PELL):

S. 2836. A bill to amend the Export Administration Act of 1979 to terminate certain export controls imposed on December 30, 1981, and June 22, 1982; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. GARN (for himself, Mr. COHEN, Mr. NUNN, Mr. ARMSTRONG, Mr. EAST, Mr. HATCH, Mr. SYMMS, Mr. THURMOND, and Mr. MOYNIHAN):

S. 2837. A bill to unify the export administration functions of the U.S. Government within the Office of Strategic Trade, to improve the efficiency and strategic effectiveness of export regulation while minimizing interference with the ability to engage in commerce, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs, by unanimous consent with instructions that when reported, the bill be referred to the Committee on Governmental Affairs for not to exceed 60 days.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. DOLE, from the Committee on Finance:

S. Res. 445. To express the sense of the Senate concerning consultations with the Government of the Socialist Republic of Romania with respect to facilitation of increased emigration and the encouragement of religious and cultural freedom; placed on the calendar.

By Mr. D'AMATO:

S. Res. 446. Resolution to honor Michael R. Masone; to the Committee on the Judiciary.

By Mr. MCCLURE, from the Committee on Energy and Natural Resources:

S. Res. 447. An original resolution waiving section 402(a) of the Congressional Budget

Act of 1974 with respect to the considerations of S. 1606; to the Committee on the Budget.

By Mr. PERCY, from the Committee on Foreign Relations:

S. Res. 448. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 6409; to the Committee on the Budget.

STATEMENTS OF INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HUMPHREY (for himself, Mr. RUDMAN, Mr. STAFFORD, Mr. WEICKER, Mr. TSONGAS, Mr. KENNEDY, Mr. DODD, and Mr. LEAHY):

S. 2835. A bill to grant the consent and approval of the Congress to an interstate agreement or compact relating to the restoration of Atlantic salmon in the Connecticut River Basin, and to allow the Secretary of Commerce and the Secretary of the Interior to participate as members in a Connecticut River Atlantic Salmon Commission; to the Committee on the Judiciary.

CONNECTICUT RIVER ATLANTIC SALMON COMMISSION

● Mr. HUMPHREY. Mr. President, today Senators RUDMAN, STAFFORD, LEAHY, WEICKER, TSONGAS, DODD, KENNEDY, and I are introducing legislation which would authorize the formation of the Connecticut River Atlantic Salmon Commission whose objective is to restore the sea-run Atlantic salmon to the Connecticut River Basin. The decline in numbers of the Atlantic salmon is a matter of historical record, and efforts to restore this valuable game fish have been ongoing for many years. Recognizing that this problem of mutual concern could be solved only through cooperative action, the Governors of New Hampshire, Vermont, Connecticut, and Massachusetts, on January 4, 1982, signed into law, legislation which authorizes a compact to restore the Atlantic salmon. The compact calls for the formation of the Connecticut River Atlantic Salmon Commission with membership including the four compact States, the U.S. Fish and Wildlife Service, and the National Marine Fisheries Service.

The Constitution grants States the right to establish such a compact subject to the consent of Congress. Also, when it is desired, as it is in this case, to make the Federal Government a partner in the compact, affirmative action by the Congress is required.

By historical accounts, efforts to restore the Atlantic salmon to the Connecticut River Basin began as early as 1867. These efforts continued over time but achieved only limited success due to lack of a formal compact among the States whose cooperation was essential to the restoration program. The affected States view their Connecticut River compact proposal as the

necessary step toward achieving their goal of restoration.

Because the proposed Commission involves participation by the U.S. Fish and Wildlife Service and the National Fisheries Service, these two agencies were consulted. Both agencies have reviewed the proposed legislation and have indicated their concurrence.

On the House side, an identical bill is being submitted today.

This bill requires no Federal appropriations; it merely authorizes the formation of a four-State compact. It represents a cooperative effort to solve a problem of mutual concern involving four separate entities; it would provide the mechanism by which the Atlantic salmon could be restored to its former abundance to the benefit of the entire four-State region. I ask unanimous consent that the text of the bill together with a relevant letter from Charles E. Barry, executive director, New Hampshire Fish and Game Department be printed in the RECORD.

There being no objection, the material ordered to be printed in the RECORD follows:

S. 2835

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress consents to and approves the entering into by the States of Connecticut, Massachusetts, New Hampshire, and Vermont of an agreement or compact relating to the restoration of Atlantic salmon in the Connecticut River Basin and to the creation of a Connecticut River Atlantic Salmon Commission.

SEC. 2. The Secretary of Commerce, or the designee of the Secretary of Commerce, and the Secretary of the Interior, or the designee of the Secretary of the Interior, may participate as members in a Connecticut River Atlantic Salmon Commission created under any agreement or compact consented to and approved by the Congress in the first section of this Act, and may cooperate with any such Commission and any committee of any such Commission.

STATE OF NEW HAMPSHIRE,
FISH AND GAME DEPARTMENT,
Concord, N.H., June 1, 1982.

HON. GORDON J. HUMPHREY,
U.S. Senate, Washington, D.C.

DEAR SENATOR: As of January 4, 1982, the governors of Vermont, New Hampshire, Massachusetts and Connecticut have signed into law legislation which authorizes a compact to restore sea-run Atlantic salmon to the Connecticut River Basin. The Compact calls for the formation of the Connecticut River Atlantic Salmon Commission with membership including the four Compact states, the U.S. Fish and Wildlife Service and the National Marine Fisheries Service.

In 1981, a major milestone was achieved in the restoration program when a record 530 Atlantic salmon returned to the Connecticut compared with 175 in 1980 and one in 1974. Our goal is to restore an annual run of 6,000 by 1997. Those of us who joined to form the Compact believe it to be a critical step toward assuring continuing cooperation and the establishment of equitable regula-

tions once the salmon begin to return regularly in large numbers.

As you know, the U.S. Constitution grants the right to states to establish a compact subject to the consent of the Congress. Also, when it is the desire, as in this case, to make the Federal Government a partner, Congress must take affirmative action.

Therefore, we would like to know your feelings about sponsoring a bill in the current session of Congress. I have enclosed a briefing paper prepared by the U.S. Fish and Wildlife Service, Northeast Regional Office which provides background information and a "draft bill". Please call if you have any questions or wish to call a meeting. I can be reached at (603) 271-3511.

Sincerely,

CHARLES E. BARRY,
Executive Director.

By Mr. TSONGAS (for himself and Mr. PELL):

S. 2836. A bill to amend the Export Administration Act of 1979 to terminate certain export controls imposed on December 30, 1981, and June 22, 1982; to the Committee on Banking, Housing, and Urban Affairs.

TERMINATING SOVIET GAS PIPELINE SANCTIONS

● Mr. TSONGAS. Mr. President, today I am introducing a bill to terminate U.S. economic sanctions regarding the Soviet gas pipeline. I invite co-sponsors of this important bill.

It is clear now that the gas pipeline from the Soviet Union to Western Europe will go forward whether or not U.S. sanctions are applied. Sanctions may cause some delay in construction and will probably reduce the initial capacity of the pipeline, but our European allies are nonetheless determined to proceed and indeed are proceeding with the project.

In the United States, a number of firms have already been excluded from the pipeline project with a significant impact on export earnings and jobs for segments of the U.S. economy.

The NATO alliance is under serious strain as dramatically evidenced by the announcement of the European Community denouncing the pipeline sanction decision. The sanctions policy is driving a wedge between the United States and Western Europe, to what must be the obvious delight of the Kremlin.

The effectiveness of these sanctions on Soviet policy toward Poland is considered nil or minimal by a wide spectrum of experts, several of which recently testified before the Senate Foreign Relations Committee. Unilateral economic sanctions against the Soviet Union are easily circumvented and exert very little economic political leverage.

There remains the question of Soviet hard currency earnings generated by the pipeline. There is no doubt that such earnings will be high, but the sanctions will not have a substantial impact on the flow of currency to the Soviet Union.

The pipeline built without U.S. supplied equipment will operate at or

near the capacity of the Soviet gas fields to supply the line.

Opponents of the pipeline have argued that it will deepen European economic dependence on the Soviet Union. This may well be the outcome but it is worth noting that our European allies are united in their support for the pipeline in spite of such dependence. In any case, Europe will pay cash for Soviet natural gas, and it is fair to say that the Soviets need hard currency as much as or more than the Europeans need natural gas. Dependence in this case will be mutual.

The U.S. pipeline sanctions are damaging our relations with Europe, and inflicting harm on the U.S. economy while the intended victim, the Soviet Union, escapes almost unscathed.

Sanctions are a ponderous and costly foreign policy lever, and must be used only when the policy impact is assured and the cost to the U.S. economy is minimal. The pipeline sanctions satisfy neither requirement.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2836

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 6 of the Export Administration Act of 1979 (50 U.S.C. App. 2405) is amended by adding at the end thereof the following new subsection:

"(1) TERMINATION OF CERTAIN CONTROLS.—Those export controls imposed under this section on December 30, 1981, and June 22, 1982, on goods or technology shall not be effective on or after the date of enactment of this subsection."●

By Mr. GARN (for himself, Mr. COHEN, Mr. NUNN, Mr. ARMSTRONG, Mr. EAST, Mr. HATCH, Mr. SYMMS, Mr. THURMOND, and Mr. MOYNIHAN):

S. 2837. A bill to unify the export administration functions of the U.S. Government within the Office of Strategic Trade, to improve the efficiency and strategic effectiveness of export regulation while minimizing interference with the ability to engage in commerce, and for other purposes; by unanimous consent, referred to the Committee on Banking, Housing, and Urban Affairs, and then sequentially to the Committee on Governmental Affairs for a period of not to exceed 60 days.

OFFICE OF STRATEGIC TRADE ACT OF 1982

Mr. GARN. Mr. President, today I am introducing, along with several of my colleagues, the Office of Strategic Trade Act of 1982. This legislation, made necessary by the failure of our current export control system to meet our commercial, strategic, foreign policy, and other related needs, would focus and centralize export adminis-

tration within an independent Federal agency designated the Office of Strategic Trade.

This coordinating and policymaking agency would be the hub of a control system relying upon the expertise of appropriate other agencies and departments. The Department of State, for example, would be the primary consultative body with respect to foreign policy controls, the Department of Defense with respect to national security controls, and the Department of Commerce, and to a certain degree the Department of Agriculture, with regard to short supply controls. Nevertheless, Mr. President, while relying upon the expertise of various agencies, the Office of Strategic Trade would be captive of none.

This bill is a rewrite of the Export Administration Act of 1979 and would replace that act when it expires in 1983. Hearings this Congress in both the Banking Committee and the Governmental Affairs Committee, as well as the past experience of many involved with export controls, have revealed the need for basic structural changes in our administration of export controls.

The measure that I am introducing today is a modified version of a bill that I introduced in 1980. In hearings held at that time on the bill and similar issues Lawrence Brady, having served as Acting Director of the Office of Export Administration, and today the Assistant Secretary of Commerce for Trade Administration, testified:

I feel there are certain areas in which the Commerce Department, no matter what personalities are in authority, will always be deficient in its implementation of long-term export control policies as mandated by the Export Administration Act.

Mr. Brady would be hard pressed to make an argument that conditions have changed sufficiently to make such views invalid today.

Recent press accounts have drawn attention to the great extent to which the Soviet military buildup has been supported by Western exports. This has been going on for some time despite our export control system. The advanced accuracy of the guidance systems of Soviet ICBM's, for example, was made possible by the sale to the Soviets of American ball-bearing grinders, which sale was approved by the Office of Export Administration. The Soviets obtained their shaped charge technology used in warheads for antitank guided missiles from the U.S. oil tool industry. Similarly, a recent CIA study reported that "since the early 1970's the Soviets and East Europeans have legally purchased more than 3,000 minicomputers, some of which are now being used in military-related organizations." The fact that Soviet troops rolled into Afghanistan on trucks manufactured at the

Kama River plant built by American and Western European companies has been well reported.

Furthermore, Mr. President, the problems are not limited to a few glamorous cases. Rather, the problems are basic and structural in nature. The spectacular, well-publicized incidents are representative of many more, similar, small-scale failures of the system. The aggregate effect on our national security of these may be as great or greater than the few cases that find their way into the news.

There is an important point that I wish to stress, Mr. President. For although Under Secretary Lionel Olmer and Assistant Secretary Lawrence Brady have done an excellent job in trying to improve export administration—their efforts, I know, have been strenuous—after nearly 2 years, progress has been slow and material results precious few. Report after report tells us that plans are being formulated and reform is on the way, but it has yet to arrive. My own personal experience and the experience of others has been, and the record itself shows, that the inherent contradiction in assignments within the Commerce Department between export promotion, on one hand, and export controls, on another, make it improbable that there can be any long lasting reconciliation that will provide the adequate emphasis and resources necessary for the Commerce Department to carry out the purposes of the law.

Mr. President, the Office of the Inspector General, within the Department of Commerce, recently conducted an investigation that further demonstrated the need for an Office of Strategic Trade. The report of that investigation, submitted on June 11 of this year, states, in part, that the failure of the Commerce Department to rectify inadequacies in its export administration operations "raised serious questions about the Department's commitment to, and ability to, enforce the Export Administration Act of 1979." I do not know what better evidence one could ask for demonstrating the need for this legislation. The Commerce Department itself, in its own analysis, has shown the failure to enforce adequately the export control statutes, despite the fact, as the report notes, that these inadequacies have been identified in earlier reviews, and "despite strong public statements by the present and past administrations in support of tight controls."

Again, Mr. President, I think that it would be a mistake to pin the blame for this failure on the well-meaning and hard-working officials who have been assigned this task within the Department of Commerce. The fact is, Mr. President, that there is an almost irresistible bias for Federal agencies to serve the interests of their constituency. No one applauds a Commerce

Department official when exports are controlled, but that same official is likely to be praised for his wisdom when export licenses are granted. The pressure at the Commerce Department, because of its very nature, is toward export promotion.

The report of the Inspector General referred again and again to the conflict in the Department presented by its conflicting duties of trade promotion and export control. Allow me to read again from this report:

The inspection team repeatedly was advised that the problems it noted reflect the Department's dual and possibly conflicting missions of trade promotion and export control. The team was not able to reach this conclusion unequivocally. It is clear, however, that the Department's failure to provide adequate resources, policy guidance and management direction has impeded the compliance effort and produced at very least the perception of a de facto supremacy of the trade promotion mission over the Department's export control function.

Let me emphasize, Mr. President, that this was not just the impression of the inspection team. This view is one that is widespread within the Commerce Department. The very officials charged with enforcing the export control statutes recognize and admit the existence of this conflict. Reading again from the report:

Virtually without exception, each of the staff interviewed in OEA (the Office of Export Administration), OEA/CD (OEA's Compliance Division), the Office of the General Counsel and the U.S. Customs Service referred to this conflict and acknowledged its impact—real or perceived.

Moreover, the Inspector General's report goes on to state:

We found no evidence that the "delicate balance" referred to, or the Department's dual commitment to trade promotion and export control, have yet been translated into adequate staffing resources and management priorities for enforcement of the Export Administration Act. We did find ample evidence that those involved in implementing the Act, both inside and outside the Commerce Department, perceive the long history of inadequate enforcement as a manifestation of a lower priority vis-a-vis export promotion.

Therefore, Mr. President, it is not just this Senator's impression that Commerce does not, and over the long run has not and will not, devote adequate priority and resources to export controls. This is the impression of the people within the Department itself, within the Office of Export Administration. Most people know where their bread is buttered. An employee at OEA knows what the priority of his Department is and which decision on an export license is going to receive praise. That is why we need an agency that is captive of no other agency, and that includes, I might add, being free from the excessive influence of the Department of Defense as well. We need an agency with the stature and bureaucratic insulation to carry out

fully all of the purposes of the export control statutes.

The impression within the Commerce Department that export control receives a low priority is not unjustified. The Inspector General's report points out nine major problems with Commerce's performance, "which severely hamper its ability to enforce controls on U.S. exports." The problems listed in the report include:

No comprehensive appraisal of or effective overall strategy to address the Nation's technology leakage problem;

Insufficient trained personnel;

Inadequate management direction and oversight;

Failure to use modern, state-of-the-art intelligence, investigative, and enforcement techniques and systems;

Lack of strong leadership and clear lines of organizational responsibility;

Unwarranted interference in the detailed conduct of investigative operations;

Inadequate cooperation and coordination with the U.S. Customs Service and vital information sources in the U.S. intelligence community;

Inadequate travel funds, law enforcement equipment, and other support resources; and

Use of antiquated or inefficient internal administrative and management systems and procedures.

Mr. President, these are not a few, insignificant problems that can be cleared up with a change in personnel. This is representative of widespread neglect over the course of years with the enforcement of laws vital to our national security.

Needless to say, our defense budget would be many billions of dollars less were it not for the cost of developing countermeasures to the weapons that we helped the Soviets develop and deploy.

Western goods, services, and technology have aided the Soviet military in three broad ways:

First, by transferring know-how for weapons systems that the Soviets did not possess, saving them billions of dollars in R. & D., as well as making up for gaps in Soviet technology;

Second, by giving the Soviets knowledge about Western weapons systems, allowing them to develop countermeasures, thereby undermining the Western qualitative edge in armaments that has been our defense against Soviet bloc quantitative superiority.

Third, by facilitating overall Soviet economic growth, allowing them to have both guns and butter. This has allowed growth in consumer-oriented production as well as increased infrastructure necessary for the financing and manufacture of armaments. The Kama River truck plant is one example of this.

Mr. President, ambivalence at the Commerce Department over export controls has also damaged our commercial interests. As I have argued, officials at the OEA are never quite sure what the priorities are. That leads to indecision and delay, even in the case of licenses for nonsensitive exports. According to the latest report by the Commerce Department; on September 30, 1981, 2,811 export license applications were in processing, 793 of which had been in processing for over 90 days.

In spite of herculean efforts, the administration of export controls remains inadequate. Controls are confusing, incoherently administered, shortsighted, and ineffective. At times Commerce spends inordinate resources examining inconsequential exports while truly sensitive items receive little more than cursory review. For 2 years a Soviet cover organization purchased 10.5 million dollars' worth of controlled U.S. high technology while the Commerce Department, informed of these Soviet efforts, failed to take any steps to stop this illegal transfer of technology. Presumably, the Department's resources were involved in trying to reduce the backlog of thousands of routine export applications. Both American export performance and American security are damaged.

For these reasons, I consider it appropriate at this time to reintroduce the proposal to remove export administration from the Commerce Department, where it conflicts with that Department's mandate to promote exports and has often been forced to take a back seat to commercial concerns. Coordinating export administration activities in an independent agency will give the priority necessary and the bureaucratic insulation essential to balance appropriately the input received from the various Departments of the Government involved in the export control process.

I am reluctant to be advocating the establishment of a new agency. But, in this case we are moving an operation from one department and giving it the independence and authority necessary to do its job, a job that is vital to our national security. It should not, therefore, result in any significant new expense for the Government, since personnel and facilities would simply be transferred from the Commerce Department to the new Office of Strategic Trade. Certainly, the billions of defense dollars alone that can be saved from effective export controls justifies this step. It is critical to our Nation's security that a dialog start between Congress and the administration on this vital issue. This bill should act as the catalyst to this dialog. Most of all, we must insure that the attention is given to enforcing export controls that the Soviets devote to circumventing them.

As the Inspector General's report concludes:

The problems arising from past inadequacies cannot be corrected by rhetoric.

Mr. President, I ask unanimous consent that the bill be included in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2837

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Office of Strategic Trade Act of 1982".

TABLE OF CONTENTS

- Sec. 1. Short title.
- Sec. 2. Findings.
- Sec. 3. Declaration of policy.
- Sec. 4. Definitions.
- Sec. 5. Establishment of Office of Strategic Trade.
- Sec. 6. General provisions.
- Sec. 7. National security controls.
- Sec. 8. Foreign policy controls.
- Sec. 9. Short supply controls.
- Sec. 10. Foreign boycotts.
- Sec. 11. Procedures for hardship relief from export controls.
- Sec. 12. Procedures for processing export license applications.
- Sec. 13. Violations.
- Sec. 14. Enforcement.
- Sec. 15. Exemption from certain provisions relating to administrative procedure and judicial review.
- Sec. 16. Annual report.
- Sec. 17. Regulatory authority.
- Sec. 18. Transfer of functions.
- Sec. 19. Effect on other Acts.
- Sec. 20. Authorization of appropriations.
- Sec. 21. Effective date.
- Sec. 22. Termination date.
- Sec. 23. Savings provisions.
- Sec. 24. Technical amendments.
- Sec. 25. Amendments to the National Security Act of 1947.

FINDINGS

Sec. 2. The Congress makes the following findings:

- (1) The ability of United States citizens to engage in international commerce is a fundamental concern of United States policy.
- (2) It is important for the national interest of the United States that both the private sector and the Federal Government place a high priority on exports, which would strengthen the Nation's economy.
- (3) Uncertainty of export control policy can inhibit the efforts of American business and work to the detriment of the overall attempt to improve the trade balance of the United States.
- (4) The failure to restrict the transfer of national security sensitive technology and goods to the Soviet Union and other countries where actions or policies are adverse to the national security interests of the United States, has led to the significant enhancement of Soviet bloc military-industrial capabilities, thereby creating a greater threat to the security of the United States, its allies, and other friendly nations, and increasing the defense budget of the United States.
- (5) The failure to restrict the export of national security sensitive technology and goods is attributable in large part to the diffusion of decisionmaking responsibilities regarding strategic trade matters among sev-

eral Federal agencies, and the lack of adequately trained and disciplined personnel.

(6) Because of the overlapping and frequently confusing responsibilities of the many Federal agencies that administer controls over strategic trade, the United States export control system has not served national security, foreign policy, or export interests effectively.

(7) It is important that the administration of export controls imposed for national security purposes give special emphasis to the need to control exports of goods and technology (and goods which contribute significantly to the transfer of such technology) that could make a significant contribution to the military potential of any country or combination of countries which would be detrimental to the national security of the United States.

(8) Further, the availability of certain materials at home and abroad varies so that the quantity and composition of United States exports and their distribution among importing countries may affect the welfare of the domestic economy and may have an important bearing upon fulfillment of the foreign policy of the United States.

(9) Minimization of restrictions for reasons of national security and/or foreign policy on exports of agricultural commodities and products is of critical importance to the maintenance of a positive balance of payments, to reducing the level of Federal expenditures for agricultural support programs, and to United States cooperation in efforts to eliminate malnutrition and world hunger.

DECLARATION OF POLICY

Sec. 3. The Congress makes the following declarations:

(1) It is the policy of the United States to minimize uncertainties in export control policy and to encourage trade with all countries with which the United States has diplomatic or trading relations, except those countries with which such trade has been determined by the President to be against the national interest.

(2) It is the policy of the United States to use export controls only after full consideration of the impact on the economy of the United States—

(A) to restrict the export or re-export of goods and technology which could make a significant contribution to the military potential of any other country or combination of countries which would prove detrimental to the national security of the United States;

(B) to restrict the export of goods and technology where necessary to further significantly the foreign policy of the United States or to fulfill its declared international obligations; and

(C) to restrict the export of goods where necessary to protect the domestic economy from the excessive drain of scarce materials.

(3) It is the policy of the United States (A) to apply any necessary controls to the maximum extent possible in cooperation with all nations, and (B) to encourage observance of a uniform export control policy by all nations with which the United States has defense treaty commitments or common strategic objectives.

(4) It is the policy of the United States to use its economic resources and trade potential to further the sound growth and stability of its economy as well as to further its national security and foreign policy objectives.

(5) It is the policy of the United States—

(A) to oppose restrictive trade practices or boycotts fostered or imposed by foreign countries against other countries friendly to the United States or against any United States person.

(B) to encourage and, in specified cases, require United States persons engaged in the export of goods or technology or other information to refuse to take actions, including furnishing information or entering into or implementing agreements, which have the effect of furthering or supporting the restrictive trade practices or boycotts fostered or imposed by any foreign country against a country friendly to the United States or against any United States person; and

(C) to foster international cooperation and the development of international rules and institutions to assure reasonable access to world supplies.

(6) It is the policy of the United States that the desirability of subjecting, or continuing to subject, particular goods or technology or other information to United States export controls should be subjected to review by and consultation with representatives of appropriate United States Government agencies.

(7) It is the policy of the United States to use export controls, including license fees, to secure the removal by foreign countries of restrictions on access to supplies where such restrictions have or may have a serious domestic inflationary impact, have caused or may cause a serious domestic shortage, or have been imposed for purposes of influencing the foreign policy of the United States. In effecting this policy, the President shall make reasonable prompt efforts to secure the removal or reduction of such restrictions, policies, or actions through international cooperation and agreement before imposing controls on exports from the United States. No action taken in fulfillment of the policy set forth in this paragraph shall apply to the export of medicine or medical supplies.

(8) It is the policy of the United States to use export controls to encourage other countries to take immediate steps to prevent the use of their territories or resources to aid, encourage, or give sanctuary to those persons involved in directing, supporting, or participating in acts of international terrorism. To achieve this objective, the President shall make reasonable and prompt efforts to secure the removal or reduction of such assistance to international terrorists through international cooperation and agreement before imposing export controls.

(9) It is the policy of the United States to cooperate with other countries with which the United States has defense treaty commitments or common strategic objectives in restricting the export of goods and technology which could make a significant contribution to the military potential of any country or combination of countries which would prove detrimental to the security of the United States and of those countries with which the United States has defense treaty commitments or common strategic objectives.

(10) It is the policy of the United States to minimize restrictions on the export of agricultural commodities and products.

(11) It is the policy of the United States to encourage other friendly countries to cooperate in restricting the sale of goods and technology that can harm the security of the United States.

DEFINITIONS

SEC. 4. As used in this Act—

(1) the term "person" includes the singular and the plural and any individual, partnership, corporation, or other form of association, including any government or agency thereof;

(2) the term "United States person" means any United States resident or national (other than an individual resident outside the United States and employed by other than a United States person), any domestic concern (including any permanent domestic establishment of any foreign concern) and any foreign subsidiary or affiliate (including any permanent foreign establishment) of any domestic concern which is controlled in fact by such domestic concern, as determined under regulations of the President;

(3) the term "good" means any article, natural or manmade substance, material, supply or manufactured product, including inspection and test equipment, but excluding technical data;

(4) the term "technology" means technological or technical data, and shall include information or know-how of any kind that can be used or adapted for use in the design, production, manufacture, repair, overhaul, processing, engineering, development, operation, maintenance, or restoration of goods of commodities, including computer software. Information or know-how may take tangible form, such as models, prototypes, drawings, sketches, diagrams, blueprints, or manuals, or take an intangible form, such as training or technical services. Technological data shall also include all goods or commodities that will be used in the industrial application of the technological information, regardless of the end-use classification of the goods or commodities;

(5) the term "export of goods" means—

(A) an actual shipment or transmission of goods out of the United States; or

(B) an actual shipment or transmission of goods, or portions thereof, originally exported from the United States to any destination other than that indicated to the appropriate United States authority as the initial destination of the goods at the time of original export from the United States.

(6) The term "export of technology" means—

(A) an actual shipment or transmission of technology out of the United States; or

(B) any release of technology of United States origin in a foreign country;

(7) the term "Director" means the Director of the Office of Strategic Trade;

(8) the term "Office" means the Office of Strategic Trade; and

(9) the term "United States" means the States of the United States, its commonwealths, territories (leased or owned), its dependencies, and the District of Columbia.

ESTABLISHMENT OF OFFICERS, FUNCTIONS, AND STRUCTURE OF OFFICE OF STRATEGIC TRADE

SEC. 5. (a) ESTABLISHMENT AND PRINCIPAL OFFICERS.—(1) There is established as an independent executive agency an Office of Strategic Trade. The Office shall be headed by a Director of Strategic Trade, who shall be appointed by the President by and with the advice and consent of the Senate, and who shall serve for a term of four years, and who shall be assisted in the fulfilling of his responsibilities by a Deputy Director of Strategic Trade. The Office of Strategic Trade shall be administered, in accordance with the provisions of this Act, under the supervision and direction of the Director. The Director shall exercise all of the executive and administrative functions and authorities conferred in or transferred to the Office of Strategic Trade by this Act. The

Director or his designee shall act as Chairman of the Interagency Advisory Committee for Export Policy (ACEP), which shall consist of representatives from the Department of Commerce, the Department of State, the Department of Defense, the Department of Energy, the Department of the Treasury, the Central Intelligence Agency, and the National Aeronautics and Space Administration.

(2) There shall be in the Office of the Director of the Office of Strategic Trade an Exporter Services Facility which shall act as liaison with the business community and shall receive and respond to inquiries from the public or interested persons.

(b) OTHER PRINCIPAL OFFICERS.—(1) There shall be in the Office an Operations Division which shall be headed by an Assistant Director for Operations. It shall be the function of the Assistant Director for Operations to process incoming applications for export licenses, to disseminate such applications to the licensing division for evaluation, and to forward approved licenses to the applicant. In addition, the Operations Division shall monitor conformity of export applications and licenses with the terms and conditions applicable to them. The Operations Division shall perform such other functions as the Director may determine to be appropriate which were carried out prior to the effective date of this Act by the Office of Export Administration's Operating Division.

(2) There shall be in the Office a Compliance Division which shall be headed by an Assistant Director for Compliance and which shall carry out functions performed prior to the effective date of this Act by the Deputy Assistant Secretary of Commerce for Export Enforcement. The Compliance Division may also conduct physical inspections for controlled items, and shall monitor overseas compliance with the Export Administration Act of 1979.

(3) There shall be in the Office a CoCom Division which shall be headed by an Assistant Director for CoCom Affairs and which shall carry out functions relating to the representation of technical positions (including those of military and strategic significance) in connection with the Coordinating Committee for Multilateral Export Controls (CoCom). The CoCom Division shall also provide representatives to the Department of State to assist in negotiations with other members of the Coordinating Committee.

(4) There shall be in the Office a Licensing Division which shall be headed by an Assistant Director for Licensing and which shall be responsible to the Director for the evaluation of criteria and establishment of policy relating to the commodity control list, munitions control list, foreign policy controls, and short supply controls. The Licensing Division shall prepare draft documents and license criteria for license applications and submit such documents to the Advisory Committee for Export Policy for review. In addition, there shall be within the Licensing Division—

(A) an office of the Operating Committee, which shall disseminate license documents from the licensing officers to the interagency committee members, specify deadlines, collect responses and recommendations from the respective agencies, summarize each agency position for the Office of the Director, and prepare cases for review by the Export Administration Review Board;

(B) an Office of Computer Licensing, which shall prepare draft documents analyzing criteria for licensing with respect to

computers in accordance with the commodity control list;

(C) an Office of Capital Goods Licensing which shall prepare draft documents analyzing criteria for licensing with respect to capital goods in accordance with the commodity control list;

(D) an Office of Electronics, which shall prepare draft documents analyzing criteria for licensing with respect to the field of electronics in accordance with the commodity control list;

(E) an Office of Short Supply Licensing which shall prepare draft documents analyzing criteria for licensing with respect to the field of short supplies;

(F) an Office of Munitions Control which shall carry out the functions formerly carried out by the Department of State's Office of Munitions Control in maintaining the munitions control list;

(G) an Office of Technological Data which shall monitor and review the transfer of unembodied technology and knowledge through cultural exchange, educational, or other programs or means;

(H) an Office of Evaluation which shall monitor and review exports under general and validated licenses to determine whether items should be added to or deleted from commodity control lists, to assess foreign availability and comparability, and to make periodic (not less often than quarterly) specific recommendations, regarding additions to or deletions from the commodity control list to the Assistant Director for Licensing; and

(I) an Office of Foreign Policy Controls which shall formulate and maintain the list of foreign policy controls, in consultation with the Export Administration Review Board.

(5) There shall be in the Office a General Counsel.

GENERAL PROVISIONS

SEC. 6. (a) TYPES OF LICENSES.—Under such conditions as may be imposed by the Director which are consistent with the provisions of this Act, the Director may require any of the following types of export licenses:

(1) A validated license, authorizing a specific export, issued pursuant to an application by the exporter.

(2) A qualified general license, authorizing multiple exports, issued pursuant to an application by the exporter.

(3) A general license, authorizing exports without application by the exporter.

(4) Such other licenses as may assist in the effective and efficient implementation of this Act.

(b) COMMODITY CONTROL LIST.—The Director shall establish and maintain a list (hereinafter in this Act referred to as the "commodity control list") consisting of any goods or technology subject to export controls under this Act.

(c) FOREIGN AVAILABILITY.—In accordance with the provisions of this Act, the President shall not impose export controls for foreign policy or national security purposes on the export from the United States of goods or technology where he determines adequate evidence has been presented to him that the goods or technology are available without restriction from sources outside the United States in comparable quantities and comparable in quality to those produced in the United States, and that adequate evidence has been presented to him demonstrating that the absence of such controls would not prove detrimental to the foreign policy or national security of the United States.

(d) RIGHT OF EXPORT.—No authority or permission to export may be required under this Act, or under regulations issued under this Act, except to carry out the policies set forth in section 3 of this Act.

(e) DELEGATION OF AUTHORITY.—The President may delegate the power, authority, and discretion conferred upon him by this Act to such departments, agencies, or officials of the Government as he may consider appropriate, except that no authority under this Act may be delegated to, or exercised by, any official of any department or agency the head of which is not appointed by the President, by and with the advice and consent of the Senate. The President may not delegate or transfer his power, authority, and discretion to overrule or modify any recommendation or decision made by the Director, the Secretary of Defense, or the Secretary of State pursuant to the provisions of this Act.

(f) NOTIFICATION OF THE PUBLIC CONSULTATION WITH BUSINESS.—The Director shall keep the public fully apprised of changes in export control policy and procedures instituted in conformity with this Act with a view to encouraging trade. The Director shall establish suitable procedures for obtaining the views of a broad spectrum of enterprises, labor organizations, and citizens interested in or impacted by export controls on the United States export control policy and the foreign availability of goods and technology.

NATIONAL SECURITY CONTROLS

SEC. 7. (a) AUTHORITY.—(1) In order to carry out the policy set forth in section 3(2)(A) of this Act, the President may, in accordance with the provisions of this section, prohibit or curtail the export of any goods or technology subject to the jurisdiction of the United States or exported by any person subject to the jurisdiction of the United States. The authorities and duties contained in this subsection shall be exercised by the Director, in consultation with the Secretary of Defense, and such other departments and agencies as the Director considers appropriate, and shall be implemented by means of export licenses described in section 6(a) of this Act. In accordance with the provisions of section 12 of this Act, the Secretary of Defense shall have the right to review any export application under this section which the Secretary of Defense requests to review.

(2)(A) Whenever the Director makes any revision with respect to any goods or technology, or with respect to the countries or destinations, affected by export controls imposed under this section, the Director shall publish in the Federal Register a notice of such revision and shall specify in such notice that the revision relates to controls imposed under the authority contained in this section.

(B) Whenever the Director denies any export license under this section, the Director shall specify in the notice to the applicant of the denial of such license that the license was denied under the authority contained in this section. The Director shall also include in such notice what, if any, modifications in or restrictions on the goods or technology for which the license was sought would allow such export to be compatible with controls imposed under this section, or the Director shall indicate in such notice which officers and employees of the Office who are familiar with the application will be made reasonably available to the applicant for consultation with regard to such modifications or restriction, if appropriate.

(3) In issuing regulations to carry out this section, the Director shall give particular attention to the devising of effective safeguards to prevent a country that poses a threat to the security of the United States from diverting covered goods and technologies to military use and to the need to take effective measures to prevent the reexport of covered goods and technologies from other countries to countries that pose a threat to the security of the United States.

(b) POLICY TOWARD INDIVIDUAL COUNTRIES.—In administering export controls for national security purposes under this section, United States policy toward individual countries shall not be determined exclusively on the basis of a country's Communist or non-Communist status but shall take into account such factors as whether its policies are adverse to the national security interests of the United States, the country's present and potential relationship to the United States, its present and potential relationship to countries friendly or hostile to the United States, its ability and willingness to control retransfers of United States exports in accordance with United States policy, and such other factors as the President considers appropriate. The President shall review not less frequently than every three years in the case of controls maintained cooperatively with other nations, and annually in the case of all other controls, United States policy toward individual countries to determine whether such policy is appropriate in light of the factors specified in the preceding sentence.

(c) NATIONAL SECURITY CONTROL LIST.—(1) the Director shall establish and maintain, as part of the commodity control list, a list of all goods and technology subject to export controls under this section. Such goods and technology shall be clearly identified as being subject to controls under this section.

(2) The Secretary of Defense and other appropriate departments and agencies shall identify goods and technology for inclusion on the national security control portion of the commodity control list. Those items on which the Director and the Secretary of Defense concur shall be subject to export controls under this section shall comprise such list. If the Director and the Secretary of Defense are unable to concur on such items, the matter shall be referred by the Director to the President for resolution.

(3) The Director shall issue regulations providing for review of the list established pursuant to this subsection not less frequently than every 3 years in the case of controls maintained cooperatively with other countries, and annually in the case of all other controls, in order to carry out the policy set forth in section 3(2)(A) and the provisions of this section, and for the prompt issuance of such revisions of the list as may be necessary. Such regulations shall provide interested Government agencies and other affected or potentially affected parties with an opportunity, during such review, to submit written data, views, or arguments, with or without oral presentation. Such regulations shall further provide that, as part of such review, an assessment be made of the availability from sources outside the United States of goods and technology comparable to those controlled under this section. The Director and any agency rendering advice with respect to export controls shall keep adequate records of all decisions made with respect to revision of the list of controlled goods and technology, including the factual and analytical basis for the decision, and, in the case of the Direc-

tor, any dissenting recommendations received from any agency.

(d) **MILITARILY CRITICAL TECHNOLOGIES.**—(1) The Secretary of Defense, in consultation with the Director, shall review and revise the national security control list established pursuant to subsection (c), as prescribed in paragraph (3) of such subsection, for the purpose of insuring that export controls imposed under this section cover and (to the maximum extent consistent with the purposes of this Act) are limited to militarily critical goods and technologies and the mechanisms through which such goods and technologies may be effectively transferred.

(2) The Secretary of Defense shall bear primary responsibility for inclusion in the national security control list, the militarily critical technologies as described below. In developing such items for inclusion, primary emphasis shall be given to—

(A) arrays of design and manufacturing know-how,

(B) keystone manufacturing, inspection, and test equipment,

(C) goods accompanied by sophisticated operation, application, or maintenance know-how, and

(D) goods (i) which would extend, complete, maintain, or modernize a process line employed in the application of a militarily critical technology, or (ii) the analysis of which would reveal or give insight into a United States military system and would thereby facilitate either the design and manufacture of that system or the development of countermeasures against that system.

which, as determined by the Secretary of Defense, are not possessed and able to be utilized by countries to which exports are controlled under this section and which, if exported, would permit a significant advance in a military system of any such country.

(3) The description of the military critical technologies referred to in paragraph (2) shall be sufficiently specific to guide the determinations of any official exercising export licensing responsibilities under this Act.

(e) **NATIONAL SECURITY CONTROL AGENCY.**—To assist in carrying out the policy and other authorities and responsibilities of the Secretary of Defense under this section, there shall be established within the Office of the Under Secretary of Defense for Policy a National Security Control Agency. The Secretary of Defense may delegate such of those authorities and responsibilities, together with such ancillary functions, as he may deem appropriate to the Agency.

(f) **ANNUAL REPORT.**—The Secretary of Defense shall report annually to the Congress on actions taken to carry out this section.

(g) **EXPORT LICENSES.**—(1) The Congress finds that the effectiveness and efficiency of the process of making export licensing determinations under this section is severely hampered by the large volume of validated export license applications required to be submitted under this Act. Accordingly, it is the intent of Congress in this subsection to encourage the use of a qualified general license in lieu of a validated license.

(2) To the maximum extent practicable, consistent with the national security of the United States, the Director may require a qualified general license in lieu of a validated license under this section for the export of goods or technology, except where—

(A) the export of such goods or technology is restricted pursuant to a multilateral agreement, formal or informal, to which the

United States is a party and, under the terms of such multilateral agreement, such export requires the specific approval of the parties to such multilateral agreement; or

(B) the United States is seeking the agreement of other suppliers to apply comparable controls to such goods or technology and, in the judgment of the Director, United States export controls on such goods or technology, by means of such validated license, are necessary prior to the conclusion of such agreement.

(3) To the maximum extent practicable, consistent with the national security of the United States, the Director may require a qualified general license, in lieu of a validated license, under this section for the export of goods or technology if the export of such goods or technology is restricted pursuant to a multilateral agreement, formal or informal, to which the United States is a party, but such export does not require the specific approval of the parties to such multilateral agreement.

(h) **FOREIGN AVAILABILITY.**—(1) The Director, in consultation with the Secretary of Defense and such other Government agencies as may be appropriate in the circumstances as well as with such technical advisory committees established pursuant to subsection (i) as the Director may deem appropriate, shall review, on a continuing basis, the availability, to countries to which exports are controlled under this section, from sources outside the United States, including countries which participate with the United States in multilateral export controls, of any goods or technology the export of which requires a validated license under this section. In any case in which the Director determines, in accordance with procedures and criteria which the Director shall by regulation establish, that any such goods or technologies are available in fact to such destinations from such sources in comparable quantity and of comparable quality so that the requirement of a validated license for the export of such goods or technology would have no effect in achieving the purpose set forth in subsection (a) of this section, the Director may not, after the determination is made, require a validated license for the export of such goods or technology during the period of such foreign availability, unless the President determines that the absence of export controls under this section would prove detrimental to the national security of the United States. In any case in which the President determines that export controls under this section must be maintained notwithstanding foreign availability, the Director shall publish that determination together with a concise statement of its basis, and the estimated economic impact of the decision.

(2) Subject to paragraph (4), the Director shall approve any application for a validated license which is required under this section for the export of any goods or technology to a particular country and which meets all other requirements for such an application, if the Director determines that such goods or technology will, if the license is denied, be available in fact to such country from sources outside the United States, including countries which participate with the United States in multilateral export controls, in comparable quantity and of comparable quality so that denial of the license would be ineffective in achieving the purpose set forth in subsection (a) of this section, subject to the exception set forth in paragraph (1) of this subsection. In any case in which the Director makes a determina-

tion of foreign availability under this paragraph with respect to any goods or technology, the Director shall determine whether a determination of foreign availability under paragraph (1) with respect to such goods or technology is warranted.

(3) With respect to export controls imposed under this section, any determination of foreign availability which is the basis of a decision to grant a license for, or to remove a control on, the export of a good or technology, shall be made in writing and shall be supported by reliable evidence, including scientific or physical examination, expert opinion based upon adequate factual information, or intelligence information. In assessing foreign availability with respect to license applications, uncorroborated representations by applicants shall not be deemed sufficient evidence of foreign availability.

(4) A technology or good proposed for, or subject to, export control for national security purposes, which is not possessed in comparable quantity of quality by a nation or combination of nations threatening to the national security of the United States, shall not be deemed to be available to that nation or combination of nations from foreign sources until the Secretary of State verifies that negotiations with the appropriate foreign governments have been undertaken. For purposes of this Act, assessment of comparable quantity of quality shall include but not be limited to the following factors: cost, reliability, the availability and reliability of spare parts and the cost and quality thereof, maintenance programs, technological data packages, back-up packages, long-term durability, scale of production, ease with which machinery will be integrated in the mode of production, and spoilages and tolerance factors for end products produced by the machinery. In any case in which, in accordance with this subsection, export controls are imposed under this section notwithstanding foreign availability, the President shall take steps to initiate negotiations with the governments of the appropriate foreign countries for the purpose of eliminating such availability. Whenever the President has reason to believe goods or technology subject to export control for national security purposes by the United States may become available from other countries to countries to which exports are controlled under this section and that such availability can be prevented or eliminated by means of negotiations with such other countries, the President shall promptly initiate negotiations with the governments of such other countries to prevent such foreign availability.

(5) In order to further carry out the policies set forth in this Act, the director shall establish within the Office a capability to monitor and gather information with respect to the foreign availability of any goods or technology subject to export controls under this Act.

(6) Each department or agency of the United States with responsibilities with respect to export controls, including intelligence agencies, shall, consistent with the protection of intelligence sources and methods, furnish information to the Office concerning foreign availability of goods and technology subject to export controls under this Act, and the Office, upon request or where appropriate, shall furnish to such departments and agencies the information it gathers and receives concerning foreign availability.

(i) **TECHNICAL ADVISORY COMMITTEES.**—(1) Upon written request by representatives of

a substantial segment of any industry which produces any goods or technology subject to export controls under this section or being considered for such controls because of their significance to the national security of the United States, the Director shall appoint a technical advisory committee for any such goods or technology which the Director determines are difficult to evaluate because of questions concerning technical matters, worldwide availability, and actual utilization of production and technology, or licensing procedures. Each such committee shall consist of representatives of United States industry and Government, including the Departments of Defense, State, Commerce, the intelligence community, and, in the discretion of the Director, other Government departments and agencies. No person serving on any such committee who is a representative of industry shall serve on such committee for more than four consecutive years.

(2) Technical advisory committees established under paragraph (1) shall advise and assist the Director, the Secretary of Defense, and any other department, agency, or official of the Government of the United States to which the President delegates authority under this Act, with respect to actions designed to carry out the policy set forth in section 3(2)(A) of this Act. Nothing in this subsection shall prevent the Director or the Secretary of Defense from consulting, at any time, with any person representing industry or the general public, regardless of whether such person is a member of a technical advisory committee. Members of the public shall be given a reasonable opportunity, pursuant to regulations prescribed by the Director, to present relevant material to such committees.

(3) Upon request of any member of any such committee, the Director may, if the Director determines it appropriate, reimburse such member for travel, subsistence, and other necessary expenses incurred by such member in connection with the duties of such member.

(4) Each such committee shall elect a chairman, and shall meet at least every three months at the call of the chairman, unless the chairman determines, in consultation with the other members of the committee, that such a meeting is not necessary to achieve the purposes of this subsection. Each such committee shall be terminated after a period of 2 years, unless extended by the Director for additional periods of 2 years. The Director shall consult each such committee with respect to such termination or extension of that committee.

(5) To facilitate the work of the technical advisory committees, the Director, in conjunction with other departments and agencies participating in the administration of this Act, shall disclose to each such committee adequate information, consistent with national security, pertaining to the reasons for the export controls which are in effect or contemplated for the goods or technology with respect to which that committee furnishes advice.

(6) Subject to subsection (h) (4) of this section, whenever a technical advisory committee certifies to the Director that goods or technology with respect to which such committee was appointed have become available in fact, to countries to which exports are controlled under this section, from sources outside the United States, including countries which participate with the United States in multilateral export controls, in comparable quantity and of comparable

quality so that requiring a validated license for the export of such goods or technology would be ineffective in achieving the purpose set forth in subsection (a) of this section, and provides adequate documentation for such certification, in accordance with the procedures established pursuant to subsection (h)(1) of this section, the Director shall investigate such availability, and if such availability is verified, the Director shall remove the requirement of a validated license for the export of the goods or technology, unless the President determines that the absence of export controls under this section would prove detrimental to the national security of the United States. In any case in which the President determines that export controls under this section must be maintained notwithstanding foreign availability, the Director shall publish that determination together with a concise statement of its basis and the estimated economic impact of the decision.

(j) **MULTILATERAL EXPORT CONTROLS.**—The President shall enter into negotiations with the governments participating in the group known as the Coordinating Committee (hereinafter in this subsection referred to as the "Committee") with the view toward accomplishing the following objectives:

(1) Agreement to publish the list of items controlled for export by agreement of the Committee.

(2) Agreement to hold periodic meetings with high-level representatives of such governments, for the purpose of discussing export control policy issues and issuing policy guidance to the Committee.

(3) Agreement on more effective procedures for enforcing the export controls referred to in paragraph (1).

(k) **COMMERCIAL AGREEMENTS WITH CERTAIN COUNTRIES.**—(1) Any United States firm, enterprise, or other nongovernmental entity which enters into any agreement with any agency of the government of a country to which exports are restricted for national security purposes, which calls for the encouragement of technical cooperation and is intended to result in the export from the United States to the other party of unpublished technical data of United States origin, shall report the agreement with such agency with sufficient detail to the Director.

(2) The provisions of paragraph (1) shall not apply to colleges, universities, or other educational institutions, except where the unpublished technical data involve a technology identified by the Secretary of Defense as a militarily critical technology.

(l) **NEGOTIATIONS WITH OTHER COUNTRIES.**—The Secretary of State, in consultation with the Secretary of Defense, the Director, and the heads of other appropriate departments and agencies, shall be responsible for conducting negotiations with other countries regarding their cooperation in restricting the export of goods and technology in order to carry out the policy set forth in section 3(9) of this Act, as authorized by subsection (a) of this section, including negotiations with respect to which goods and technology should be subject to multilaterally agreed export restrictions and what conditions should apply for exceptions from those restrictions.

(m) **DIVERSION TO MILITARY USE OF CONTROLLED GOODS OR TECHNOLOGY.**—(1) Whenever there is reliable evidence that goods or technology which were exported subject to national security controls under this section to a country to which exports are controlled for national security purposes have been di-

verted to an unauthorized use or consignee in violation of the conditions of an export license, the Director for as long as that diversion continues—

(A) shall deny all further exports to or by the party or parties responsible for that diversion of any goods or technology subject to national security controls under this section to an unauthorized use or consignee regardless of whether such goods or technology are available to that country from sources outside the United States; and

(B) may take such additional steps under this Act with respect to the party or parties referred to in subparagraph (A) as he determines are appropriate in the circumstances to deter the further unauthorized use of the previously exported goods or technology.

(2) As used in this subsection, the term "diversion to an unauthorized use or consignee" means the use of United States goods or technology to design or produce or maintain or contribute to the design, production, or maintenance of any item on the United States Munitions List, or the transfer of United States goods or technology to any consignee or and user engaged in or contributing to such design, production, or maintenance.

(n) **RECORDKEEPING.**—The Director, the Secretary of Defense, and any other department or agency consulted in connection with a license application or revision of a list of controlled commodities, goods, or technologies, shall make and keep records of their respective advice, recommendations, or decisions, including the factual and analytical basis of the advice, recommendations, or decisions.

FOREIGN POLICY CONTROLS

SEC. 8. (a) AUTHORITY.—(1) In order to carry out the policy set forth in paragraph (2)(B), (7), or (8) of section 3 of this Act, the President may prohibit or curtail the exportation of any goods, technology, or other information subject to the jurisdiction of the United States or exported by any person subject to the jurisdiction of the United States, to the extent necessary to further significantly the foreign policy of the United States or to fulfill its declared international obligations. The authority granted by this subsection shall be exercised by the Director, in consultation with the Secretary of State and such other departments and agencies as the Director considers appropriate, and shall be implemented by means of export licenses issued by the Director.

(2) Export controls maintained for foreign policy purposes shall expire one year after imposition unless extended by the President in accordance with subsections (b) and (e). Any such extension and any subsequent extension shall not be for a period of more than one year.

(3) Whenever the Director denies any export license under this subsection, the Director shall specify in the notice to the applicant of the denial of such license that the license was denied under the authority contained in this subsection, and the reasons for such denial, with reference to the criteria set forth in subsection (b) of this section. The Director shall also include in such notice what, if any, modifications in or restrictions on the goods or technology for which the license was sought would allow such export to be compatible with controls implemented under this section, or the Director shall indicate in such notice which officers and employees of the Office who are familiar with the application will be made reasonably available to the applicant for

consultation with regard to such modifications or restrictions, if appropriate.

(4) In accordance with the provisions of section 12 of this Act, the Secretary of State shall have the right to review any export license application under this section which the Secretary of State requests to review.

(b) **CRITERIA.**—When imposing, expanding, or extending export controls under this section, the President shall consider—

(1) the probability that such controls will achieve the intended foreign policy purpose, in light of other factors, including the availability from other countries of the goods or technology proposed for such controls;

(2) the compatibility of the proposed controls with the foreign policy objectives of the United States, including the effort to counter international terrorism, and with overall United States policy toward the country which is the proposed target of the controls;

(3) the reaction of other countries to the imposition or expansion of such export controls by the United States;

(4) the likely effects of the proposed controls on the export performance of the United States, on the competitive position of the United States in the international economy, on the international reputation of the United States as a supplier of goods and technology, and on individual United States companies and their employees and communities, including the effects of the controls on existing contracts;

(5) the ability of the United States to enforce the proposed controls effectively; and

(6) the foreign policy consequences of not imposing controls.

(c) **CONSULTATION WITH INDUSTRY.**—The Director, before imposing export controls under this section, shall consult with such affected United States industries as the Director considers appropriate, with respect to the criteria set forth in paragraphs (1) and (4) of subsection (b) and such other matters as the Director considers appropriate.

(d) **ALTERNATIVE MEANS.**—Before resorting to the imposition of export controls under this section, the President shall determine that reasonable efforts have been made to achieve the purposes of the controls through negotiations or other alternative means.

(e) **NOTIFICATION TO CONGRESS.**—The President in every possible instance shall consult with the Congress before imposing any export control under this section. Except as provided in section 9(g)(3) of this Act, whenever the President imposes, expands, or extends export controls under this section, the President shall immediately notify the Congress of such action and shall submit with such notification a report specifying—

(1) the conclusions of the President with respect to each of the criteria set forth in subsection (b); and

(2) the nature and results of any alternative means attempted under subsection (d), or the reasons for imposing, extending, or expanding the control without attempting any such alternative means.

Such report shall also indicate how such controls will further significantly the foreign policy of the United States or will further its declared international obligations. To the extent necessary to further the effectiveness of such export control, portions of such report may be submitted on a classified basis, and shall be subject to the provisions of section 14(c) of this Act.

(f) **EXCLUSION FOR MEDICINE AND MEDICAL SUPPLIES AND FOR CERTAIN FOOD EXPORTS.**—This section does not authorize export con-

trols on medicine, or medical supplies. Before export controls on food are imposed, expanded, or extended under this section, the director shall notify the Secretary of State in the case of export controls applicable with respect to any developed country and shall notify the Director of the United States International Development Cooperation Agency (IDCA) in the case of export controls applicable with respect to any developing country. The Secretary of State with respect to developed countries, and the Director of the IDCA with respect to developing countries, shall determine whether the proposed export controls on food would cause measurable malnutrition and shall inform the Director of that determination. If the Director is informed that the proposed export controls on food would cause measurable malnutrition, then those controls may not be imposed, expanded, or extended, as the case may be, unless the President determines that those controls are necessary to protect the national security interests of the United States, or unless the President determines that arrangements are insufficient to ensure that the food will reach those most in need. Each such determination by the Secretary of State or the Director of the United States International Development Cooperation Agency, and any such determination by the President, shall be reported to the Congress, together with a statement of the reasons for that determination. It is the intent of Congress that the President not impose export controls under this section on any goods or technology if he determines that the principal effect of the export of such goods or technology would be to help meet basic human needs. This subsection shall not be construed to prohibit the President from imposing restrictions on the export of medicine or medical supplies or of food under the International Emergency Economic Powers Act. This subsection does not apply to any export control on medicine or medical supplies which is in effect on the effective date of the Export Administration Act of 1979 or to any export control on food which is in effect on the date of the enactment of the Export Administration Amendments Act of 1981.

(g) **FOREIGN AVAILABILITY.**—In applying export controls under this section, the President shall take all feasible steps to initiate and conclude negotiations with appropriate foreign governments for the purpose of securing the cooperation of such foreign governments in controlling the export to countries and consignees to which the United States export controls apply of any goods or technology comparable to goods or technology controlled under this section.

(h) **INTERNATIONAL OBLIGATIONS.**—The provisions of subsections (b), (c), (d), (f), and (g) shall not apply in any case in which the President exercises the authority contained in this section to impose export controls, or to approve or deny export license applications, in order to fulfill obligations of the United States pursuant to treaties to which the United States is a party or pursuant to other international agreements.

(i) **COUNTRIES SUPPORTING INTERNATIONAL TERRORISM.**—The Director and the Secretary of State shall notify the committee on Foreign Affairs of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs of the Senate before any license is approved for the export of goods or technology valued at more than \$7,000,000 to any country concerning which the Secretary of State has made the following determinations:

(1) Such country has repeatedly provided support for acts of international terrorism.

(2) Such exports would make a significant contribution to the military potential of such country, including its military logistics capability, or would enhance the ability of such country to support acts of international terrorism.

(j) **CRIME CONTROL INSTRUMENTS.**—(1) Crime control and detection instruments and equipment shall be approved for export by the Director only pursuant to a validated export license.

(2) The provisions of this subsection shall not apply with respect to exports to countries which are members of the North Atlantic Treaty Organization or to Japan, Australia, or New Zealand, or to such other countries as the President shall designate consistent with the purposes of this subsection and section 502B of the Foreign Assistance Act of 1961.

(k) **CONTROL LIST.**—The Director shall establish and maintain, as part of the commodity control list, a list of any goods or technology subject to export controls under this section, and the countries to which such controls apply. Such goods or technology shall be clearly identified as subject to controls under this section. Such list shall consist of goods and technology identified by the Secretary of State, with the concurrence of the Director. If the Director and the Secretary of State are unable to agree on the list, the matter shall be referred by the Director to the President. Such list shall be reviewed not less frequently than every three years in the case of controls maintained cooperatively with other countries, and annually in the case of all other controls, for the purpose of making such revisions as are necessary in order to carry out this section. During the course of such review, an assessment shall be made periodically of the availability from sources outside the United States, or any of its territories or possessions, of goods and technology comparable to those controlled for export from the United States under this section.

SHORT SUPPLY CONTROLS

SEC. 9. (a) **AUTHORITY.**—(1) In order to carry out the policy set forth in section 3(2)(C) of this Act, the President may prohibit or curtail the export of any goods subject to the jurisdiction of the United States or exported by any person subject to the jurisdiction of the United States. In curtailing exports to carry out the policy set forth in section 3(2)(C) of this Act, the President shall allocate a portion of export licenses on the basis of factors other than a prior history of exportation. Such factors shall include the extent to which a country engages in equitable trade practices with respect to United States goods and treats the United States equitably in times of short supply.

(2) Upon imposing quantitative restrictions on exports of any goods to carry out the policy set forth in section 3(2)(C) of this Act, the Director shall include in a notice published in the Federal Register with respect to such restrictions an invitation to all interested parties to submit written comments within 15 days from the date of publication on the impact of such restrictions and the method of licensing used to implement them.

(3) In imposing export controls under this section, the President's authority shall include, but not be limited to, the imposition of export license fees.

(b) **MONITORING.**—In order to carry out the policy set forth in section 3(2)(C) of this

Act, the Secretary of Commerce shall monitor exports, and contracts for exports, of any good (other than a commodity which is subject to the reporting requirements of section 812 of the Agricultural Act of 1970) when the volume of such exports in relation to domestic supply contributes, or may contribute, to an increase in domestic prices or a domestic shortage, and such price increase or shortage has, or may have, a serious adverse impact on the economy or any sector thereof. Any such monitoring shall commence at a time adequate to assure that the monitoring will result in a data base sufficient to enable policies to be developed, in accordance with section 3(2)(C) of this Act, to mitigate a short supply situation or serious inflationary price rise or, if export controls are needed, to permit imposition of such controls in a timely manner. Information which the Secretary of Commerce requires to be furnished in effecting such monitoring shall be confidential, except as provided in paragraph (2) of this subsection.

(2) The results of such monitoring shall, to the extent practicable, be aggregated and included in weekly reports setting forth, with respect to each item monitored, actual and anticipated exports, the destination by country, and the domestic and worldwide price, supply, and demand. Such reports may be made monthly if the Secretary of Commerce determines that there is insufficient information to justify weekly reports.

(3) The Director shall consult with the Secretary of Energy to determine whether monitoring or export controls under this section are warranted with respect to exports of facilities, machinery, or equipment normally and principally used, or intended to be used, in the production, conversion, or transportation of fuels and energy (except nuclear energy), including, but not limited to, drilling rigs, platforms, and equipment; petroleum refineries, natural gas processing, liquefaction, and gasification plants; facilities for production of synthetic natural gas or synthetic crude oil; oil and gas pipelines, pumping stations, and associated equipment; and vessels for transporting oil, gas, coal, and other fuels.

(c) PETITIONS FOR MONITORING OR CONTROLS.—(1)(A) Any entity, including a trade association, firm, or certified or recognized union or group of workers, which is representative of an industry or a substantial segment of an industry which processes metallic materials capable of being recycled with respect to which an increase in domestic prices or a domestic shortage, either of which results from increased exports, has or may have a significant adverse effect on the national economy or any sector thereof, may transmit a written petition to the Director requesting the monitoring of exports, or the imposition of export controls, or both, with respect to such material, in order to carry out the policy set forth in section 3(2)(C) of this Act.

(B) Each petition shall be in such form as the Director shall prescribe and shall contain information in support of the action requested. The petition shall include any information reasonably available to the petitioner indicating (i) that there has been a significant increase, in relation to a specific period of time, in exports of such material in relation to domestic supply, and (ii) that there has been a significant increase in the price of such material or a domestic shortage of such material under circumstances indicating the price increase or domestic shortage may be related to exports.

(2) Within 15 days after receipt of any petition described in paragraph (1), the Direc-

tor shall publish a notice in the Federal Register. The notice shall (A) include the name of the material which is the subject of the petition, (B) include the Schedule B number of the material as set forth in the Statistical Classification of Domestic and Foreign Commodities Exported from the United States, (C) indicate whether the petitioner is requesting that controls or monitoring, or both, be imposed with respect to the exportation of such material, and (D) provide that interested persons shall have a period of 30 days commencing with the date of publication of such notice to submit to the Director written data, views, or arguments, with or without opportunity for oral presentation, with respect to the matter involved. At the request of the petitioner or any other entity described in paragraph (1)(A) with respect to the material which is the subject of the petition, or at the request of any entity representative of producers or exporters of such material, the Director shall conduct public hearings with respect to the subject of the petition, in which case the 30-day period may be extended to 45 days.

(3) Within 45 days after the end of the 30- or 45-day period described in paragraph (2), as the case may be, the Director, in consultation with the Secretary of Commerce, shall—

(A) determine to impose monitoring or controls, or both, on the export of such material, in order to carry out the policy set forth in section 3(2)(C) of this Act; and

(B) publish in the Federal Register a detailed statement of the reasons for such determination.

(4) Within 15 days after making a determination under paragraph (3) to impose monitoring or controls on the export of a material, the Director shall publish in the Federal Register proposed regulations with respect to such monitoring or controls. Within 30 days following the publication of such proposed regulations, and after considering any public comments thereon, the Director shall publish and implement final regulations with respect to such monitoring or controls.

(5) For purposes of publishing notices in the Federal Register and scheduling public hearings pursuant to this subsection, the Director may consolidate petitions, and responses thereto, which involve the same or related materials.

(6) If a petition with respect to a particular material or group of materials has been considered in accordance with all the procedures prescribed in this subsection, the Director may determine, in the absence of significantly changed circumstances, that any other petition with respect to the same material or group of materials which is filed within 6 months after consideration of the prior petition has been completed does not merit complete consideration under this subsection.

(7) The procedures and time limits set forth in this subsection with respect to a petition filed under this subsection shall take precedence over any review undertaken at the initiative of the Director with respect to the same subject as that of the petition.

(8) The Director may impose monitoring or controls on a temporary basis after a petition is filed under paragraph (1)(A) but before the Director makes a determination under paragraph (3) if the Director considers such action to be necessary to carry out the policy set forth in section 3(2)(C) of this Act.

(9) The authority under this subsection shall not be construed to affect the author-

ity of the Director under any other provision of this Act.

(10) Nothing contained in this subsection shall be construed to preclude submission on a confidential basis to the Director of information relevant to a decision to impose or remove monitoring or controls under the authority of this Act, or to preclude consideration of such information by the Director in reaching decisions required under this subsection. The provisions of this paragraph shall not be construed to affect the applicability of section 552(b) of title 5, United States Code.

(d) DOMESTICALLY PRODUCED CRUDE OIL.—(1) Notwithstanding any other provision of this Act and notwithstanding subsection (u) of section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), no domestically produced crude oil transported by pipeline over right-of-way granted pursuant to section 203 of the Trans-Alaska Pipeline Authorization Act (43 U.S.C. 1652) (except any such crude oil which (A) is exported to an adjacent foreign country to be refined and consumed therein in exchange for the same quantity of crude oil being exported from that country to the United States; such exchange must result through convenience or increased efficiency of transportation in lower prices for consumers of petroleum products in the United States as described in paragraph (2)(A)(ii) of this subsection, or (B) is temporarily exported for convenience or increased efficiency of transportation across parts of an adjacent foreign country and re-enters the United States) may be exported from the United States, or any of its territories and possessions, unless the requirements of paragraph (2) of this subsection are met.

(2) Crude oil subject to the prohibition contained in paragraph (1) may be exported only if—

(A) the President makes and publishes express findings that exports of such crude oil, including exchanges—

(i) will not diminish the total quantity or quality of petroleum refined within, stored within, or legally committed to be transported to and sold within the United States;

(ii) will within 3 months following the initiation of such exports or exchanges, result in (I) acquisition costs to the refiners which purchase the imported crude oil being lower than the acquisition costs such refiners would have to pay for the domestically produced oil in the absence of such an export or exchange, and (II) not less than 75 percent of such savings in costs being reflected in wholesale and retail prices of products refined from such imported crude oil;

(iii) will be made only pursuant to contracts which may be terminated if the crude oil supplies of the United States are interrupted, threatened, or diminished;

(iv) are clearly necessary to protect the national interest; and

(v) are in accordance with the provisions of this Act; and

(B) the President reports such findings to the Congress and the Congress, within 60 days thereafter, agrees to a concurrent resolution approving such exports on the basis of the findings.

(3) Notwithstanding any other provision of this section or any other provision of law, including subsection (u) of section 28 of the Mineral Leasing Act of 1920, the President may export oil to any country pursuant to a bilateral international oil supply agreement entered into by the United States with such nation before June 25, 1979, or to any country pursuant to the International Emergen-

cy Oil Sharing Plan of the International Energy Agency.

(c) **REFINED PETROLEUM PRODUCTS.**—(1) No refined petroleum product may be exported except pursuant to an export license specifically authorizing such export. Not later than 5 days after an application for a license to export any refined petroleum product or residual fuel oil is received, the Director shall notify the Congress of such application, together with the name of the exporter, the destination of the proposed export, and the amount and price of the proposed export. Such notification shall be made to the chairman of the Committee on Foreign Affairs of the House of Representatives and the chairman of the Committee on Banking, Housing, and Urban Affairs of the Senate.

(2) The Director may not grant such license during the 30-day period beginning on the date on which notification to the Congress under paragraph (1) is received, unless the President certifies in writing to the Speaker of the House of Representatives and the President pro tempore of the Senate that the proposed export is vital to the national interest and that a delay in issuing the license would adversely affect that interest.

(3) This subsection shall not apply to (A) any export license application for exports to a country with respect to which historical export quotas established on the basis of past trading relationships apply, or (B) any license application for exports to a country if exports under the license would not result in more than 250,000 barrels of refined petroleum products being exported from the United States to such country in any fiscal year.

(4) For purposes of this subsection, "refined petroleum product" means gasoline, kerosene, distillates, propane or butane gas, diesel fuel, and residual fuel oil refined within the United States or entered for consumption within the United States.

(5) The Director may extend any time period prescribed in section 12 of this Act to the extent necessary to take into account delays in action by the Director on a license application on account of the provisions of this subsection.

(f) **CERTAIN PETROLEUM PRODUCTS.**—Petroleum products refined in United States Foreign Trade Zones, or in the United States Territory of Guam, from foreign crude oil shall be excluded from any quantitative restrictions imposed under this section except that, if the Director finds that a product is in short supply, the Director may issue such regulations as may be necessary to limit exports.

(g) **AGRICULTURAL COMMODITIES.**—(1) The authority conferred by this section shall not be exercised with respect to any agricultural commodity, including fats and oils or animal hides or skins, without the approval of the Secretary of Agriculture. The Secretary of Agriculture shall not approve the exercise of such authority with respect to any such commodity during any period for which the supply of such commodity is determined by the Secretary of Agriculture to be in excess of the requirements of the domestic economy except to the extent the President determines that such exercise of authority is required to carry out the policies set forth in subparagraph (A) or (B) of paragraph (2) of section 3 of this Act. The Secretary of Agriculture shall, by exercising the authorities which the Secretary of Agriculture has under other applicable provisions of law, collect data with respect to export sales of animal hides and skins.

(2) Upon approval of the Director, in consultation with the Secretary of Agriculture, agricultural commodities purchased by or for use in a foreign country may remain in the United States for export at a later date free from any quantitative limitations on export which may be imposed to carry out the policy set forth in section 3(2)(C) of this Act subsequent to such approval. The Director may not grant such approval unless the Director receives adequate assurance and, in conjunction with the Secretary of Agriculture, finds, (A) that such commodities will eventually be exported, (B) that neither the sale nor export thereof will result in an excessive drain of scarce materials and have a serious domestic inflationary impact, (C) that storage of such commodities in the United States will not unduly limit the space available for storage of domestically owned commodities, and (D) that the purpose of such storage is to establish a reserve of such commodities for later use, not including resale to or use by another country. The Director may issue such regulations as may be necessary to implement this paragraph.

(3) If the authority conferred by this section or section 8 is exercised to prohibit or curtail the export of any agricultural commodity in order to carry out the policies set forth in subparagraph (B) or (C) of paragraph (2) of section 3 of this Act, the President shall immediately report such prohibition or curtailment to the Congress, setting forth the reasons therefor in detail. If the Congress, within 30 days after the date of its receipt of such report, adopts a concurrent resolution disapproving such prohibition or curtailment, then such prohibition or curtailment shall cease to be effective with the adoption of such resolution. In the computation of such 30-day period, there shall be excluded the days on which either House is not in session because of an adjournment of more than 3 days to a day certain or because of an adjournment of the Congress sine die.

(h) **BARTER AGREEMENTS.**—(1) The exportation pursuant to a barter agreement of any goods which may lawfully be exported from the United States, for any goods which may lawfully be imported into the United States, may be exempted, in accordance with paragraph (2) of this subsection, from any quantitative limitation on exports (other than any reporting requirement) imposed to carry out the policy set forth in section 3(2)(C) of this Act.

(2) The Director shall grant an exemption under paragraph (1) if the Director finds, after consultation with the appropriate department or agency of the United States, that—

(A) for the period during which the barter agreement is to be performed—

(i) the average annual quantity of the goods to be exported pursuant to the barter agreement will not be required to satisfy the average amount of such goods estimated to be required annually by the domestic economy and will be surplus thereto; and

(ii) the average annual quantity of the goods to be imported will be less than the average amount of such goods estimated to be required annually to supplement domestic production; and

(B) the parties to such barter agreement have demonstrated adequately that they intend, and have the capacity, to perform such barter agreement.

(3) For purposes of this subsection, the term "barter agreement" means any agreement which is made for the exchange with-

out monetary consideration, of any goods produced in the United States for any goods produced outside of the United States.

(4) This subsection shall apply only with respect to barter agreements entered into after the effective date of the Export Administration Act of 1979.

(i) **UNPROCESSED RED CEDAR.**—(1) The Director shall require a validated license, under the authority contained in subsection (a) of this section, for the export of unprocessed western red cedar (*Thuja plicata*) logs, harvested from State or Federal lands. The Director shall impose quantitative restrictions upon the export of unprocessed western red cedar logs during the 3-year period beginning on the effective date of the Export Administration Act of 1979 as follows:

(A) Not more than thirty million board feet scribner of such logs may be exported during the first year of such 3-year period.

(B) Not more than fifteen million board feet scribner of such logs may be exported during the second year of such period.

(C) Not more than five million board feet scribner of such logs may be exported during the third year of such period.

After the end of such 3-year period, no unprocessed western red cedar logs may be exported from the United States.

(2) The Director shall allocate export licenses to exporters pursuant to this subsection on the basis of a prior history of exportation by such exporters and such other factors as the Director considers necessary and appropriate to minimize any hardship to the producers of western red cedar and to further the foreign policy of the United States.

(3) Unprocessed western red cedar logs shall not be considered to be an agricultural commodity for purposes of subsection (g) of this section.

(4) As used in this subsection, the term "unprocessed western red cedar" means red cedar timber which has not been processed into—

(A) lumber without wane;
(B) chips, pulp, and pulp products;
(C) veneer and plywood;
(D) poles, posts, or pilings cut or treated with preservative for use as such and not intended to be further processed; or
(E) shakes and shingles.

(j) **EXPORT OF HORSES.**—(1) Notwithstanding any other provision of this Act, no horse may be exported by sea from the United States, or any of its territories and possessions, unless such horse is part of a consignment of horses with respect to which a waiver has been granted under paragraph (2) of this subsection.

(2) The Director, in consultation with the Secretary of Agriculture, may issue regulations providing for the granting of waivers permitting the export by sea of a specified consignment of horses, if the Director, in consultation with the Secretary of Agriculture, determines that no horse in that consignment is being exported for purposes of slaughter.

FOREIGN BOYCOTTS

SEC. 10. (a) PROHIBITIONS AND EXCEPTIONS.—(1) For the purpose of implementing the policies set forth in subparagraph (A) or (B) of paragraph (5) of section 3 of this Act, the President shall issue regulations prohibiting any United States person, with respect to his activities in the interstate or foreign commerce of the United States, from taking or knowingly agreeing to take any of the following actions with intent to comply

with, further, or support any boycott fostered or imposed by a foreign country against a country which is friendly to the United States and which is not itself the object of any form of boycott pursuant to United States law or regulation:

(A) Refusing, or requiring any other person to refuse, to do business with or in the boycotted country, with any business concern organized under the laws of the boycotted country, with any national or resident of the boycotted country, or with any other person, pursuant to an agreement with, a requirement of, or a request from or on behalf of the boycotting country. The mere absence of a business relationship with or in the boycotted country with any business concern organized under the laws of the boycotted country, with any national or resident of the boycotted country, or with any other person, does not indicate the existence of the intent required to establish a violation of regulations issued to carry out this subparagraph.

(B) Refusing, or requiring any other person to refuse, to employ or otherwise discriminating against any United States person on the basis of race, religion, sex, or national origin of that person or of any owner, officer, director, or employee of such persons.

(C) Furnishing information with respect to the race, religion, sex, or national origin of any United States person or of any owner, officer, director, or employee of such person.

(D) Furnishing information about whether any person has, has had, or proposes to have any business relationship (including a relationship by way of sale, purchase, legal or commercial representation, shipping or other transport, insurance, investment, or supply) with or in the boycotted country, with any business concern organized under the laws of the boycotted country, with any national or resident of the boycotted country, or with any other person which is known or believed to be restricted from having any business relationship with or in the boycotting country. Nothing in this paragraph shall prohibit the furnishing of normal business information in a commercial context as defined by the Director.

(E) Furnishing information about whether any person is a member of, has made contributions to, or is otherwise associated with or involved in the activities of any charitable or fraternal organization which supports the boycotted country.

(F) Paying, honoring, confirming, or otherwise implementing a letter of credit which contains any condition or requirement compliance with which is prohibited by regulations issued pursuant to this paragraph, and no United States person shall, as a result of the application of this paragraph, be obligated to pay or otherwise honor or implement such letter of credit.

(2) Regulations issued pursuant to paragraph (1) shall provide exceptions for—

(A) complying or agreeing to comply with requirements (i) prohibiting the import of goods or services from the boycotted country or goods produced or services provided by any business concern organized under the laws of the boycotted country or by nationals or residents of the boycotted country, or (ii) prohibiting the shipment of goods to the boycotting country on a carrier of the boycotted country, or by a route other than that prescribed by the boycotting country or the recipient of the shipment;

(B) complying or agreeing to comply with import and shipping document require-

ments with respect to the country of origin, the name of the carrier and route of shipment, the name of the supplier of the shipment or the name of the provider of other services, except that no information knowingly furnished or conveyed in response to such requirements may be stated in negative, blacklisting, or similar exclusionary terms, other than with respect to carriers or route of shipment as may be permitted by such regulations in order to comply with precautionary requirements protecting against war risks and confiscation;

(C) complying or agreeing to comply in the normal course of business with the unilateral and specific selection by a boycotting country, or national or resident thereof, of carriers, insurers, suppliers of services to be performed within the boycotting country or specific goods which, in the normal course of business, are identifiable by source when imported into the boycotting country;

(D) complying or agreeing to comply with export requirements of the boycotting country relating to shipments or transshipments of exports to the boycotted country, to any business concern of or organized under the laws of the boycotted country, or to any national or resident of the boycotted country;

(E) compliance by an individual or agreement by an individual to comply with the immigration or passport requirements of any country with respect to such individual or any member of such individual's family or with requests for information regarding requirements of employment of such individual within the boycotting country; and

(F) compliance by a United States person resident in a foreign country or agreement by such person to comply with the laws of that country with respect to his activities exclusively therein, and such regulations may contain exceptions for such resident complying with the laws or regulations of that foreign country governing imports into such country of trademarked, trade named, or similarly specifically identifiable products, or components of products for his own use, including the performance of contractual services within that country, as may be defined by such regulations.

(3) Regulations issued pursuant to paragraphs (2)(C) and (2)(F) shall not provide exceptions from paragraphs (1)(B) and (1)(C).

(4) Nothing in this subsection may be construed to supersede or limit the operation of the antitrust or civil rights laws of the United States.

(5) This section shall apply to any transaction or activity undertaken, by or through a United States person or any other person, with intent to evade the provisions of this section as implemented by the regulations issued pursuant to this subsection, and such regulations shall expressly provide that the exceptions set forth in paragraph (2) shall not permit activities or agreements (expressed or implied by a course of conduct, including a pattern of responses) otherwise prohibited, which are not within the intent of such exceptions.

(b) FOREIGN POLICY CONTROLS.—(1) In addition to the regulations issued pursuant to subsection (a) of this section, regulations issued under section 8 of this Act shall implement the policies set forth in section 3(5).

(2) Such regulations shall require that any United States person receiving a request for the furnishing of information, the entering into or implementing of agreements, or the taking of any other action referred to in section 3(5) shall report that

fact to the Director, together with such other information concerning such request as the Director may require for such action as the Director considers appropriate for carrying out the policies of that section. Such person shall also report to the Director whether such person intends to comply and whether such person has complied with such request. Any report filed pursuant to this paragraph shall be made available promptly for public inspection and copying, except that information regarding the quantity, description, and value of any goods or technology to which such report relates may be kept confidential if the Director determines that disclosure thereof would place the United States person involved at a competitive disadvantage. The Director shall periodically transmit summaries of the information contained in such reports to the Secretary of State for such action as the Secretary of State, in consultation with the Director, considers appropriate for carrying out the policies set forth in section 3(5) of this Act.

(c) PREEMPTION.—The provisions of this section and the regulations issued pursuant thereto shall preempt any law, rule, or regulation of any of the several States or the District of Columbia, or any of the territories or possessions of the United States, or of any governmental subdivision thereof, which law, rule, or regulation pertains to participation in, compliance with, implementation of, or the furnishing of information regarding restrictive trade practices or boycotts fostered or imposed by foreign countries against other countries.

PROCEDURES FOR HARDSHIP RELIEF FROM EXPORT CONTROLS

SEC. 11. (a) FILING OF PETITIONS.—Any person who, in such person's domestic manufacturing process or other domestic business operation, utilizes a product produced abroad in whole or in part from a good historically obtained from the United States but which has been made subject to export controls, or any person who historically has exported such a good, may transmit a petition of hardship to the Director requesting an exemption from such controls in order to alleviate any unique hardship resulting from the imposition of such controls. A petition under this section shall be in such form as the Director shall prescribe and shall contain information demonstrating the need for the relief requested.

(b) DECISION OF THE DIRECTOR.—Not later than 30 days after receipt of any petition under subsection (a), the Director shall transmit a written decision to the petitioner granting or denying the requested relief. Such decision shall contain a statement setting forth the Director's basis for the grant or denial. Any exemption granted may be subject to such conditions as the Director considers appropriate.

(c) FACTORS TO BE CONSIDERED.—For purposes of this section, the Director's decision with respect to the grant or denial of relief from unique hardship resulting directly or indirectly from the imposition of export controls shall reflect the Director's consideration of factors such as the following:

(1) Whether denial would cause a unique hardship to the petitioner which can be alleviated only by granting an exception to the applicable regulations. In determining whether relief shall be granted, the Director shall take into account—

(A) ownership of material for which there is no practicable domestic market by virtue of the location or nature of the material;

(B) potential serious financial loss to the applicant if not granted an exception;

(C) inability to obtain, except through import, an item essential for domestic use which is produced abroad from the good under control;

(D) the extent to which denial would conflict, to the particular detriment of the applicant, with other national policies including those reflected in any international agreement to which the United States is a party;

(E) possible adverse effects on the economy (including unemployment) in any locality or region of the United States; and

(F) other relevant factors, including the applicant's lack of an exporting history during any base period that may be established with respect to export quotas for the particular good.

(2) The effect a finding in favor of the applicant would have on attainment of the basic objectives of the short supply control program.

In all cases, the desire to sell at higher prices and thereby obtain greater profits shall not be considered as evidence of a unique hardship, nor will circumstances where the hardship is due to imprudent acts or failure to act on the part of the petitioner.

PROCEDURES FOR PROCESSING EXPORT LICENSE APPLICATIONS

SEC. 12. (a) PRIMARY RESPONSIBILITY OF THE DIRECTOR.—(1) All export license applications required under this Act shall be submitted by the applicant to the Director. All determinations with respect to any such application shall be made by the Director, subject to the procedures provided in this section.

(2) It is the intent of the Congress that a determination with respect to any export license application be made to the maximum extent possible by the Director without referral of such application to any other department or agency of the Government.

(3) To the extent necessary, the Director shall seek information and recommendations from the Government departments and agencies concerned with aspects of United States domestic and foreign policies and operations having an important bearing on exports. Such departments and agencies shall cooperate fully in rendering such information and recommendations.

(b) INITIAL SCREENING.—Within 10 days after the date on which any export license application is submitted pursuant to subsection (a)(1), the Director shall—

(1) send the applicant an acknowledgment of the receipt of the application and the date of the receipt;

(2) submit to the applicant a written description of the procedures required by this section, the responsibilities of the Director and of other departments and agencies with respect to the application, and the rights of the applicant;

(3) return the application without action if the application is improperly completed or if additional information is required, with sufficient information to permit the application to be properly resubmitted, in which case if such application is resubmitted, it shall be treated as a new application for the purpose of calculating the time periods prescribed in this section;

(4) determine whether it is necessary to refer the application to any other department or agency and, if such referral is determined to be necessary, inform the applicant of any such department or agency to which the application will be referred; and

(5) determine whether it is necessary to submit the application to a multilateral review process, pursuant to a multilateral agreement, formal or informal, to which the United States is a party and, if so, inform the applicant of this requirement.

(c) ACTION ON CERTAIN APPLICATIONS.—In each case in which the Director determines that it is not necessary to refer an application to any other department or agency for its information and recommendations, a license shall be formally issued or denied within 90 days after a properly completed application has been submitted pursuant to this section.

(d) REFERRAL TO OTHER DEPARTMENTS AND AGENCIES.—In each case in which the Director determines that it is necessary to refer an application to any other department or agency for its information and recommendations, the Director shall, within 30 days after the submission of a properly completed application—

(1) refer the application, together with all necessary analysis and recommendations of the Office, concurrently to all such departments or agencies; and

(2) if the applicant so requests, provide the applicant with an opportunity to review for accuracy any documentation to be referred to any such department or agency with respect to such application for the purpose of describing the export in question in order to determine whether such documentation accurately describes the proposed export.

(e) ACTION BY OTHER DEPARTMENTS AND AGENCIES.—(1) Any department or agency to which an application is referred pursuant to subsection (d) shall submit to the Director, within 30 days after its receipt of the application, the information or recommendations requests with respect to such application. Except as provided in paragraph (2), any such department or agency which does not submit its recommendations within the time period prescribed in the preceding sentence shall be deemed by the Director to have no objection to the approval of such application.

(2) If the head of any such department or agency notifies the Director before the expiration of the time period provided in paragraph (1) for submission of its recommendations that more time is required for review by such department or agency, such department or agency shall have an additional 30-day period to submit its recommendations to the Director. If such department or agency does not submit its recommendations within the time period prescribed by the preceding sentence, it shall be deemed by the Director to have no objection to the approval of such application.

(f) ACTION BY THE DIRECTOR.—(1) Within 90 days after receipt of the recommendations of other departments and agencies with respect to a license application, as provided in subsection (e), the Director shall formally issue or deny the license. In deciding whether to issue or deny a license, the Director shall take into account any recommendation of a department or agency with respect to the application in question. In cases where the Director receives conflicting recommendations, the Director shall, within the 90-day period provided for in this subsection, take such action as may be necessary to resolve such conflicting recommendations.

(2) In cases where the Director receives questions or negative considerations or recommendations from any other department or agency with respect to an application, the

Director shall, to the maximum extent consistent with the national security and foreign policy of the United States, inform the applicant of the specific questions raised and any such negative considerations or recommendations, and shall accord the applicant an opportunity, before the final determination with respect to the application is made, to respond in writing to such questions, considerations, or recommendations.

(3) In cases where the Director has determined that an application should be denied, the applicant shall be informed in writing, within 5 days after such determination is made, of the determination, of the statutory basis for denial, the policies set forth in section 3 of the Act which would be furthered by denial, and, to the extent consistent with the national security and foreign policy of the United States, the specific considerations which led to the denial, and of the availability of appeal procedures. In the event decisions on license applications are deferred inconsistent with the provisions of this section, the applicant shall be so informed in writing within 5 days after such deferral.

(4) If the Director determines that a particular application or set of applications is of exceptional importance and complexity, and that additional time is required for negotiations to modify the application or applications, the Director may extend any time period prescribed in this section. The Director shall notify the Congress and the applicant of such extension and the reasons therefor.

(g) SPECIAL PROCEDURES FOR SECRETARY OF DEFENSE.—(1) Notwithstanding any other provision of this section, the Secretary of Defense is authorized to review any proposed export of any goods or technology to any country to which exports are controlled for national security purposes and, whenever the Secretary of Defense determines that the export of such goods or technology will make a significant contribution, which would prove detrimental to the national security of the United States, to the military potential of any such country, to recommend to the President that such export be disapproved.

(2) Notwithstanding any other provision of law, the Secretary of Defense shall determine, in consultation with the Director, and confirm in writing the types and categories of transactions which should be reviewed by the Secretary of Defense in order to make a determination referred to in paragraph (1). Whenever a license or other authority is requested for the export to any country to which exports are controlled for national security purposes of goods or technology within any such type or category, the Director shall notify the Secretary of Defense of such request, and the Director may not issue any license or other authority pursuant to such request before the expiration of the period within which the President may disapprove such export. The Secretary of Defense shall carefully consider any notification submitted by the Director pursuant to this paragraph and, not later than 30 days after notification of the request, shall—

(A) recommend to the President that he disapprove any request for the export of the goods or technology involved to the particular country if the Secretary of Defense determines that the export of such goods or technology will make a significant contribution, which would prove detrimental to the national security of the United States, to

the military potential of such country or any other country;

(B) notify the Director that he would recommend approval subject to specified conditions; or

(C) recommend to the Director that the export of goods or technology be approved. If the President notifies the Director, within 30 days after receiving a recommendation from the Secretary of Defense, that he disapproves such export, no license or other authority may be issued for the export of such goods or technology to such country.

(3) The Director shall approve or disapprove a license application, and issue or deny a license, in accordance with the provisions of this subsection, and, to the extent applicable, in accordance with the time periods and procedures otherwise set forth in this section.

(4) Whenever the President exercises his authority under this subsection to modify or overrule a recommendation made by the Secretary of Defense or exercises his authority to modify or overrule any recommendation made by the Secretary of Defense under subsection (c) or (d) of section 7 of this Act with respect to the list of goods and technologies controlled for national security purposes, the President shall promptly transmit to the Congress a statement indicating his decision, together with the recommendation of the Secretary of Defense.

(h) MULTILATERAL CONTROLS.—In any case in which an application, which has been finally approved under subsection (c), (f), or (g) of this section, is required to be submitted to a multilateral review process, pursuant to a multilateral agreement, formal or informal, to which the United States is a party, the license shall not be issued as prescribed in such subsections, but the Director shall notify the applicant of the approval of the application (and the date of such approval) by the Director subject to such multilateral review. The license shall be issued upon approval of the application under such multilateral review. If such multilateral review has not resulted in a determination with respect to the application within 60 days after such date, the Director's approval of the license shall be final and the license shall be issued, unless the Director determines that issuance of the license would prove detrimental to the national security of the United States. At the time at which the Director makes such a determination, the Director shall notify the applicant of the determination and shall notify the Congress of the determination, the reasons for the determination, the reasons for which the multilateral review could not be concluded within such 60-day period, and the actions planned or being taken by the United States Government to secure conclusion of the multilateral review. At the end of every 60-day period after such notification to Congress, the Director shall advise the applicant and the Congress of the status of the application, and shall report to the Congress in detail on the reasons for the further delay and any further actions being taken by the United States Government to secure conclusion of the multilateral review. In addition, at the time at which the Director issues or denies the license upon conclusion of the multilateral review, the Director shall notify the Congress of such issuance or denial and of the total time required for the multilateral review.

(i) RECORDS.—The Director and any department or agency to which any application is referred under this section shall keep

accurate records with respect to all applications considered by the Director or by any such department or agency, including, in the case of the Director, any dissenting recommendations received from any such department or agency.

(j) APPEAL AND COURT ACTION.—(1) The Director shall establish appropriate procedures for any applicant to appeal to the Director the denial of an export license application of the applicant.

(2) In any case in which any action prescribed in this section is not taken on a license application within the time periods established by this section (except in the case of a time period extended under subsection (f)(4) of which the applicant is notified), the applicant may file a petition with the Director requesting compliance with the requirements of this section. When such petition is filed, the Director shall take immediate steps to correct the situation giving rise to the petition and shall immediately notify the applicant of such steps.

(3) If, within 30 days after a petition is filed under paragraph (2), the processing of the application has not been brought into conformity with the requirements of this section, or the application has been brought into conformity with such requirements but the Director has not so notified the applicant, the applicant may bring an action in an appropriate United States district court for a restraining order, a temporary or permanent injunction, or other appropriate relief, to require compliance with the requirements of this section. The United States district courts shall have jurisdiction to provide such relief, as appropriate.

VIOLATIONS

SEC. 13. (a) IN GENERAL.—Except as provided in subsection (b) of this section, whoever knowingly violates any provision of this Act or any regulation, order, or license issued thereunder shall be fined not more than five times the value of the exports involved or \$50,000, whichever is greater, or imprisoned not more than 5 years, or both.

(b) WILLFUL VIOLATIONS.—(1) Whoever willfully exports anything contrary to any provision of this Act or any regulation, order, or license issued thereunder, with knowledge that such exports will be used for the benefit of any country to which exports are restricted for national security or foreign policy purposes—

(A) except in the case of an individual, shall be fined not more than five times the value of the exports involved or \$1,000,000, whichever is greater; and

(B) in the case of an individual, shall be fined not more than \$250,000, or imprisoned not more than 10 years, or both.

(2) Any person who is issued a validated license under this Act for the export of any good or technology to a controlled country and who, with knowledge that such a good or technology is being used by such controlled country for military or intelligence gathering purposes contrary to the conditions under which the license was issued, willfully fails to report such use to the Secretary of Defense—

(A) except in the case of an individual, shall be fined not more than five times the value of the exports involved or \$1,000,000, whichever is greater; and

(B) in the case of an individual, shall be fined not more than \$250,000, or imprisoned not more than 5 years, or both.

For the purpose of this paragraph, the term "controlled country" means any country described in section 620(f) of the Foreign Assistance Act of 1961.

(c) CIVIL PENALTIES; ADMINISTRATIVE SANCTIONS.—(1) The head of any department or agency exercising any functions under this Act, or any officer or employee of such department or agency specifically designated by the head thereof, may impose a civil penalty not to exceed \$10,000 for each violation of this Act or any regulation, order, or license issued under this Act, either in addition to or in lieu of any other liability or penalty which may be imposed, except that the civil penalty for each such violation involving national security controls imposed under section 7 of this Act or controls imposed on the export of defense articles and defense services under section 38 of the Arms Export Control Act may not exceed \$100,000.

(2)(A) The Authority under this Act to suspend or revoke the authority of any United States person to export goods or technology may be used with respect to any violation of the regulations issued pursuant to section 10(a) of this Act.

(B) Any administrative sanction (including any civil penalty or any suspension or revocation of authority to export) imposed under this Act for a violation of the regulations issued pursuant to section 10(a) of this Act may be imposed only after notice and opportunity for an agency hearing on the record in accordance with sections 554 through 557 of title 5, United States Code.

(C) Any charging letter or other document initiating administrative proceedings for the imposition of sanctions for violations of the regulations issued pursuant to section 10(a) of this Act shall be made available for public inspection and copying.

(d) PAYMENT OF PENALTIES.—The payment of any penalty imposed pursuant to subsection (c) may be made a condition, for a period not exceeding one year after the imposition of such penalty, to the granting, restoration, or continuing validity of any export license, permission, or privilege granted or to be granted to the person upon whom such penalty is imposed. In addition, the payment of any penalty imposed under subsection (c) may be deferred or suspended in whole or in part for a period of time no longer than any probation period (which may exceed one year) that may be imposed upon such person. Such a deferral or suspension shall not operate as a bar to the collection of the penalty in the event that the conditions of the suspension, deferral, or probation are not fulfilled.

(e) REFUNDS.—Any amount paid in satisfaction of any penalty imposed pursuant to subsection (a) shall be covered into the Treasury as a miscellaneous receipt. The head of the department or agency concerned may, in his discretion, refund any such penalty, within 2 years after payment, on the ground of a material error of fact or law in the imposition of the penalty. Notwithstanding section 1346(a) of title 28, United States Code, no action for the refund of any such penalty may be maintained in any court.

(f) ACTIONS FOR RECOVERY OF PENALTIES.—In the event of the failure of any person to pay a penalty imposed pursuant to subsection (c), a civil action for the recovery thereof may, in the discretion of the head of the department or agency concerned, be brought in the name of the United States. Except as provided in this subsection and in subsection (d), no such liability shall be asserted, claimed, or recovered upon by the United States in any way unless it has previously been reduced to judgment.

(g) OTHER AUTHORITIES.—Nothing in subsection (c), (d), or (f) limits—

(1) the availability of other administrative or judicial remedies with respect to violations of this Act, or any regulation, order, or license issued under this Act;

(2) the authority to compromise and settle administrative proceedings brought with respect to violations of this Act, or any regulation, order, or license issued under this Act; or

(3) the authority to compromise, remit or mitigate seizures and forfeitures pursuant to section 1(b) of title VI of the Act of June 15, 1917 (22 U.S.C. 401(b)).

ENFORCEMENT

SEC. 14. (a) GENERAL AUTHORITY.—To the extent necessary or appropriate to the enforcement of this Act or to the imposition of any penalty, forfeiture, or liability arising under the Export Control Act of 1949, the Export Administration Act of 1969, or the Export Administration Act of 1979, the head of any department or agency exercising any function thereunder (and officers or employees of such department or agency specifically designated by the head thereof) may make such investigations and obtain such information from, require such reports or the keeping of such records by, make such inspection of the books, records, and other writings, premises, or property of, and take the sworn testimony of, any person. In addition, such officers or employees may administer oaths or affirmations, and may by subpoena require any person to appear and testify or to appear and produce books, records, and other writings, or both, and in the case of contumacy by, or refusal to obey a subpoena issued to, any such person, a district court of the United States, after notice to any such person and hearing, shall have jurisdiction to issue an order requiring such person to appear and give testimony or to appear and produce books, records, and other writings, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.

(b) IMMUNITY.—No person shall be excused from complying with any requirements under this section because of his privilege against self-incrimination, but the immunity provisions of section 5002 of title 18, United States Code, shall apply with respect to any individual who specifically claims such privilege.

(c) CONFIDENTIALITY.—Except as otherwise provided by the third sentence of section 10(b)(2) and by section 13(c)(2)(C) of this Act, information obtained under this Act on or before the date of enactment of this Act, which is deemed confidential, including Shipper's Export Declarations, or with reference to which a request for confidential treatment is made by the person furnishing such information, shall be exempt from disclosure under section 552 of title 5, United States Code, and such information shall not be published or disclosed unless the Director in his sole discretion determines that the withholding thereof is contrary to the national interest. Information obtained under this Act or the Export Administration Act of 1979 after June 30, 1980, may be withheld only to the extent permitted by statute, except that information obtained for the purpose of consideration of, or concerning, license applications under this Act or the Export Administration Act of 1979 shall be withheld from public disclosure unless the release of such information is determined by the Director in his sole discretion to be in the national interest. This subsection shall not affect any judicial proceed-

ing commenced under section 552 of title 5, United States Code, to obtain access to boycott reports submitted prior to October 31, 1976, which was pending on May 15, 1979; but such proceeding shall be continued as if this Act had not been enacted.

(2) Nothing in this Act shall be construed as authorizing the withholding of information from the Congress or from the General Accounting Office. All information obtained at any time under this Act or previous Acts regarding the control of exports, including any report or license application required under this Act, shall be made available to any committee or subcommittee of Congress of appropriate jurisdiction upon request of the chairman or ranking minority member of such committee or subcommittee. No such committee or subcommittee, or member thereof, shall disclose any information obtained under this Act or previous Acts regarding the control of exports which is submitted on a confidential basis unless the full committee determines that the withholding of that information is contrary to the national interest. Notwithstanding paragraph (1) of this subsection, information referred to in the second sentence of this paragraph shall, consistent with the protection of intelligence, counterintelligence, and law enforcement sources, methods, and activities, as determined by the agency that originally obtained the information, and consistent with the provisions of section 313 of the Budget and Accounting Act, 1921, be made available only by that agency, upon request, to the Comptroller General of the United States or to any officer or employee of the General Accounting Office who is authorized by the Comptroller General to have access to such information. No officer or employee of the General Accounting Office shall disclose, except to the Congress in accordance with this paragraph, any such information which is submitted on a confidential basis and from which any individual can be identified.

(3) Departments or agencies which obtain information which is relevant to the enforcement of this Act shall furnish such information to the department or agency with enforcement responsibilities under this Act to the extent consistent with the protection of intelligence, counterintelligence, and law enforcement sources, methods, and activities, except that—

(A) the provisions of this paragraph shall not apply to information subject to the restrictions set forth in section 9 of title 13, United States Code; and

(B) return information, as defined in subsection (b) of section 6103 of the Internal Revenue Code of 1954, may be disclosed only as authorized by such section.

(d) REPORTING REQUIREMENTS. In the administration of this Act, reporting requirements shall be so designed as to reduce the cost of reporting, recordkeeping, and export documentation required under this Act to the extent feasible consistent with effective enforcement and compilation of useful trade statistics. Reporting, recordkeeping, and export documentation requirements shall be periodically reviewed and revised in the light of developments in the field of information technology.

(e) SIMPLIFICATION OF REGULATIONS.—The Director, in consultation with appropriate United States Government departments and agencies and with appropriate technical advisory committees established under section 7(g), shall review the regulations issued under this Act and the commodity control list in order to determine how compliance

with the provisions of this Act can be facilitated by simplifying such regulations, by simplifying or clarifying such list, or by any other means.

EXEMPTION FROM CERTAIN PROVISIONS RELATING TO ADMINISTRATIVE PROCEDURE AND JUDICIAL REVIEW

SEC. 15. (a) EXEMPTION.—Except as provided in section 13(c)(2), the functions exercised under this Act are excluded from the operation of sections 551, 553 through 559, and 701 through 706 of title 5, United States Code.

(b) PUBLIC PARTICIPATION.—It is the intent of the Congress that, to the extent practicable, all regulations imposing controls on exports under this Act be issued in proposed form with meaningful opportunity for public comment before taking effect. In cases where a regulation imposing controls under this Act is issued with immediate effect, it is the intent of the Congress that meaningful opportunity for public comment also be provided and that the regulation be reissued in final form after public comments have been fully considered.

ANNUAL REPORT

SEC. 16. (a) CONTENTS.—Not later than December 31 of each year, the Director shall submit to the Congress a report on the administration of this Act during the preceding fiscal year. All agencies shall cooperate fully with the Director in providing information for such report. Such report shall include detailed information with respect to—

(1) the implementation of the policies set forth in section 3;

(2) general licensing activities under sections 7, 8, and 9, and any changes in the exercise of the authorities contained in sections 7(a), 8(a), and 9(a);

(3) the results of the review of United States policy toward individual countries pursuant to section 7(b);

(4) the results, in as much detail as may be included consistent with the national security and the need to maintain the confidentiality of proprietary information, of the actions, including reviews and revisions of export controls maintained for national security purposes, required by section 7(c)(3);

(5) actions taken to carry out section 7(d);

(6) changes in categories of items under export control referred to in section 7(e);

(7) determinations of foreign availability made under section 7(f), the criteria used to make such determinations, the removal of any export controls under such section, and any evidence demonstrating a need to impose export controls for national security purposes notwithstanding foreign availability;

(8) actions taken in compliance with section 7(f)(5);

(9) consultations with the technical advisory committees established pursuant to section 7(g), the use made of the advice rendered by such committees, and the contributions of such committees toward implementing the policies set forth in this Act;

(10) the effectiveness of export controls imposed under section 8 in furthering the foreign policy of the United States;

(11) export controls and monitoring under section 9;

(12) the information contained in the reports required by section 9(b)(2), together with an analysis of—

(A) the impact on the economy and world trade of shortages or increased prices for commodities subject to monitoring under

this Act or section 812 of the Agricultural Act of 1970;

(B) the worldwide supply of such commodities; and

(C) actions being taken by other countries in response to such shortages or increased prices;

(13) actions taken by the President and the Director to carry out the antiboycott policies set forth in section 3(5) of this Act;

(14) organizational and procedural changes undertaken in furtherance of the policies set forth in this Act, including changes to increase the efficiency of the export licensing process and to fulfill the requirements of section 12, including an analysis of the time required to process license applications, the number and disposition of export license applications taking more than 90 days to process, and an accounting of appeals received, court orders issued, and actions taken pursuant thereto under subsection (j) of such section;

(15) delegations of authority by the President as provided in section 6(e) of this Act;

(16) efforts to keep the business sector of the Nation informed with respect to policies and procedures adopted under this Act;

(17) any reviews undertaken in furtherance of the policies of this Act, including the results of the review required by section 14(d), and any action taken, on the basis of the review required by section 14(e), to simplify regulations issued under this Act;

(18) violations under section 13 and enforcement activities under section 14; and

(19) the issuance of regulations under the authority of this Act, including an explanation of each case in which regulations were not issued in accordance with the first sentence of section 15(b).

(b) **REPORT ON CERTAIN EXPORT CONTROLS.**—To the extent that the President determines that the policies set forth in section 3 of this Act require the control of the export of goods and technology other than those subject to multilateral controls, or require more stringent controls than the multilateral controls, the President shall include in each annual report the reasons for the need to impose, or to continue to impose, such controls and the estimated domestic economic impact on the various industries affected by such controls.

(c) **REPORT ON NEGOTIATIONS.**—The President shall include in each annual report a detailed report on the progress of the negotiations required by section 7(j), until such negotiations are concluded.

REGULATORY AUTHORITY

SEC. 17. The President and the Director may issue such regulations as are necessary to carry out the provisions of this Act. Any such regulations issued to carry out the provisions of section 7(a), 8(a), 9(a), or 10(b) may apply to the financing, transporting, or other servicing of exports and the participation therein by any person.

TRANSFER OF FUNCTIONS

SEC. 18. (a) **TRANSFERS TO DIRECTOR.**—In addition to authorities and responsibilities elsewhere provided for in this Act, there are transferred to the Office of Strategic Trade the following functions and authorities:

(1) those of the Offices of East-West Trade and Munitions Control of the Department of State with respect to the munitions list pursuant to the Arms Export Control Act; and

(2) such other functions and authorities, not specifically or otherwise vested or delegated by statute, as the Director, in consultation with the Director of the Office of

Management and Budget, determine to be appropriate.

(b) **INCIDENTAL TRANSFERS.**—The Director of the Office of Management and Budget, in consultation with the Director, is authorized and directed to make such determinations as may be necessary with regard to the transfer of functions which relate to or are utilized by an agency, commission or other body, or component thereof affected by this Act, to make such additional incidental dispositions of personnel, assets, liabilities, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds held, used, arising from, available to, or to be made available in connection with the functions transferred by this Act, as he may deem necessary to accomplish the purposes of this Act.

EFFECT ON OTHER ACTS

SEC. 19. (a) **IN GENERAL.**—Nothing contained in this Act shall be construed to modify, repeal, supersede, or otherwise affect the provisions of any other laws authorizing control over exports of any commodity.

(b) **COORDINATION OF CONTROLS.**—The authority granted to the President under this Act shall be exercised in such manner as to achieve effective coordination with the authority exercised under section 38 of the Arms Export Control Act (22 U.S.C. 2778).

(c) **CIVIL AIRCRAFT EQUIPMENT.**—Notwithstanding any other provision of law, any product (1) which is standard equipment, certified by the Federal Aviation Administration, in civil aircraft and is an integral part of such aircraft, and (2) which is to be exported to a country other than a controlled country, shall be subject to export controls exclusively under this Act. Any such product shall not be subject to controls under section 38(b)(2) of the Arms Export Control Act. For purposes of this subsection, the term "controlled country" means any country described in section 620(f) of the Foreign Assistance Act of 1961.

(d) **NONPROLIFERATION CONTROLS.**—(1) Nothing in section 7 or 8 of this Act shall be construed to supersede the procedures published by the President pursuant to section 309(c) of the Nuclear Non-Proliferation Act of 1978.

(2) With respect to any export license application which, under the procedures published by the President pursuant to section 309(c) of the Nuclear Non-Proliferation Act of 1978, is referred to the Subgroup on Nuclear Export Coordination or other interagency group, the provisions of section 12 of this Act shall apply with respect to such license application only to the extent that they are consistent with such published procedures, except that if the processing of any such application under such procedures is not completed within 180 days after the receipt of the application by the Director, the applicant shall have the rights of appeal and court action provided in section 12(j) of this Act.

(e) **TERMINATION OF OTHER AUTHORITY.**—On October 1, 1979, the Mutual Defense Assistance Control Act of 1951 (22 U.S.C. 1611-1613d), is superseded.

AUTHORIZATION OF APPROPRIATIONS

SEC. 20. (a) **REQUIREMENT OF AUTHORIZING LEGISLATION.**—Notwithstanding any other provision of law, no appropriation shall be made under any law to the Department of Commerce for expenses to carry out the purposes of this Act unless previously and specifically authorized by law.

(b) **AUTHORIZATION.**—There are authorized to be appropriated to carry out the purposes of this Act—

(1) \$9,659,000 for each of the fiscal years 1982 and 1983; and

(2) such additional amounts, for each such fiscal year, as may be necessary for increases in salary, pay, retirement, other employee benefits authorized by law, and other nondiscretionary costs.

EFFECTIVE DATE

SEC. 21. This Act shall take effect upon the expiration of the Export Administration Act of 1979.

TERMINATION DATE

SEC. 22. This authority granted by this Act terminates on September 30, 1984, or upon any prior date which the President by proclamation may designate.

SAVINGS PROVISIONS

SEC. 23. (a) **IN GENERAL.**—All delegations, rules, regulations, orders, determinations, licenses, or other forms of administrative action which have been made, issued, conducted, or allowed to become effective under the Export Control Act of 1949, the Export Administration Act of 1969, or the Export Administration Act of 1979 and which are in effect at the time this Act takes effect shall continue in effect according to their terms until modified, superseded, set aside, or revoked under this Act.

(b) **ADMINISTRATIVE PROCEEDINGS.**—This Act shall not apply to any administrative proceedings commenced or any application for a license made, under the Export Administration Act of 1979, which is pending at the time this Act takes effect.

TECHNICAL AMENDMENTS

SEC. 24. (a) Section 38(e) of the Arms Export Control Act (22 U.S.C. 2778(e)) is amended by striking out "section 11 of the Export Administration Act of 1979, and by subsections (a) and (c) of section 12 of such Act" and inserting in lieu thereof "section 13 of the Office of Strategic Trade Act of 1982 and by subsections (a) and (c) of section 14 of such Act".

(b)(1) Section 103(c) of the Energy Policy and Conservation Act (42 U.S.C. 6212(c)) is amended by striking out "Export Administration Act of 1979" and inserting in lieu thereof "Office of Strategic Trade Act of 1982".

(2) Section 254(e)(3) of such Act (42 U.S.C. 6274(e)(3)) is amended by striking out "section 12 of the Export Administration Act of 1979" and inserting in lieu thereof "section 14 of the Office of Strategic Trade Act of 1982".

(c) Section 993(c)(2)(D) of the Internal Revenue Code of 1954 (26 U.S.C. 993(c)(2)(D)) is amended—

(1) by striking out "7(a) of the Export Administration Act of 1979" and inserting in lieu thereof "9(a) of the Office of Strategic Trade Act of 1982"; and

(2) by striking out "(A)" and inserting in lieu thereof "(C)".

(d) Section 5313 of title 5, United States Code, is amended by adding at the end thereof the following item:

"Director of Strategic Trade."

(e) Section 5315 of such title is amended by adding at the end thereof the following:

"Assistant Directors, Office of Strategic Trade (4)."

AMENDMENTS TO THE NATIONAL SECURITY ACT
OF 1947

SEC. 25. The fourth paragraph of section 101(a) of the National Security Act of 1947 (50 U.S.C. 402(a)) is amended—

(1) by redesignating clauses (5), (6), and (7) as clauses (6), (7), and (8), respectively; and

(2) by inserting after clause (4) the following new clause:

"(5) the Director of Strategic Trade;"

Mr. COHEN. Mr. President, I am pleased to join as a cosponsor of the Office of Strategic Trade Act of 1982. Senator GARN and I actively pursued similar legislation in the last Congress, and I congratulate him on his continued commitment to this concept.

I have long been concerned about the degree to which the Soviet Union uses U.S. technology in weapons development. Acquiring U.S. technology is given a very high priority and directed by the highest levels of the Soviet Government. The Soviets employ all means available to them to obtain American know-how, including exploitation of existing scientific exchanges, intelligence services, and industrial espionage.

Our country has an agreement with the Soviet Union regarding the international research and exchange program (IREX) which provides students the opportunity to study abroad. While most U.S. students in the Soviet Union are studying history and fine arts, Soviet students come to this country to study computers and the hard sciences at our leading universities. In the past 2 years, more than a third of the 50 proposals offered under one part of the IREX program had to be rejected or modified in order to minimize the technology loss.

An even more common technology drain is that found through scientific visits to academic conferences and attendance at commercial trade fairs. Soviets need only a visa approved by the State Department to enter the United States for this purpose. A Soviet scientist, for example, was able to study fuel-air explosives in this country and to return to the Soviet Union to work on related weapons development.

The vast majority of militarily significant technology obtained by the Soviet Union is acquired through intelligence agencies of the Soviets and other Eastern European countries. The legal acquisitions are also important, since many times the combination of the knowledge of both sources is critical for developing the complete capability. The Soviets, for example, purchased, illegally and legally, high-technology microelectronics equipment that enabled them to enhance the sophistication of a wide range of military systems.

A recent hearing by the Permanent Subcommittee on Investigations pointed out the extent to which industrial espionage is used as a vehicle for Sovi-

ets to obtain U.S. technology. I heard testimony from William H. Bell, a former executive from Hughes Aircraft, who is now serving time in Federal prison for selling classified material to a Polish spy. The story of Mr. Bell is a classic case of industrial espionage where the Polish agent was able to appeal to Mr. Bell after learning of his vulnerable personal situation. A recent divorce and remarriage had strained Mr. Bell's personal finances, and over a period of time, he disclosed to the Polish agent, and most likely to the Soviets, radar systems for some of our most sophisticated weapons, including the B-1 and Stealth bombers, all-weather radar for tanks, and a NATO air-defense system.

I congratulate this administration for being the first to recognize the seriousness of the technology drain problem. But many practical obstacles remain. How do we balance the need for effective restraint in controlling exports with the basic rights of the citizens of our free society? How can we best utilize and organize the resources to enforce a strong export control policy? And how can we encourage the cooperation of our allies in curbing their own exports of high technology to the Soviet bloc countries?

I feel that the Office of Strategic Trade Act of 1982, by establishing an independent office to oversee export control policy, is an important first step in improving this process. The organizational structure would signal the importance of these functions, both to the Soviets and to our allies. The Commerce Department, which now has the responsibility of determining export policies, has an inherent conflict of interest in being responsible both for export promotion and for controlling exports that have strategic significance.

I expressed my frustration at recent PSI hearings that voluminous hearing records exist documenting the extent of the problem, but no action has been taken. I commend Senator GARN for taking action by introducing this bill, and I am pleased to lend my support to this effort.

● Mr. MOYNIHAN. Mr. President, for several years I have been concerned about serious flaws in our policies on trade with the Soviet Union and other Warsaw Pact nations. During the past decade, we observed a major military buildup by the Soviets, in which they outspent us by \$100 billion for strategic forces alone, while the United States relaxed restrictions on transfer of its high technology and equipment.

The consequences of improvident export licensing practices and inadequate enforcement of controls were brought home in a study by the Director of Central Intelligence, which was conducted at the request of the Select Committee on Intelligence, of which I am vice chairman. I shall submit a

copy of the unclassified version of this report, released in April 1982, for the Record at the end of my remarks.

The DCI's study confirmed what many of us had previously warned was the case. It stated that the technological superiority of the United States and its allies, which is critical to the preservation of a credible counterforce to the quantitative edge of the Warsaw Pact, is "eroding as the Soviet Union and its allies introduce more sophisticated weaponry—weapons that all too often are manufactured with the direct help of Western technology."

The study goes on to point out that the Soviets have been very successful in acquiring both classified and unclassified Western technology obtained through the KGB and other organizations using both clandestine and overt collection methods. Stemming the flow of technology to the Soviets, the DCI concluded, is one of the "most complex and urgent issues facing the free world today."

While the intelligence community can identify and analyze the nature of the problem, it is not its responsibility to formulate and execute strategic trade policies. Since the adoption of the Export Control Act of 1949 these functions have been the primary responsibility of the Department of Commerce in so far as they concern commercial technologies and goods which have military applications. In addition, Commerce has been responsible for promoting foreign trade. Over the years, the Department has vigorously advanced the interests of exporters seeking to expand their markets in the Communist world. Unhappily, and perhaps understandably, it has not given anywhere near comparable emphasis to its export control duties, much to the detriment of national security.

Because of the Commerce Department's failure to carry out the congressional mandate to protect national security, I joined several of my colleagues in 1979 in offering several amendments to the Export Administration Act, which were designed to enhance the authorities of the Secretary of Defense and tighten the criteria for approval of export licenses. These amendments were adopted, but they left the Commerce Department primarily responsible for administering the control machinery.

Evidence has recently come to light indicating that the Congress should take the next logical step, which is to remove the export control function from the Commerce Department and thereby eliminate the institutional conflict of interest. In May, the Senate Permanent Subcommittee on Investigations received extended testimony that indicated significant weaknesses persist in the Department's

compliance program. In June, no less an authority than the Inspector General of the Commerce Department issued a report of investigation which found similar problems including:

No comprehensive approval of an effective overall strategy to address the Nation's technology leakage problem;

Insufficient trained personnel, travel funds, and support services;

Failure to use modern intelligence and investigative techniques;

Inadequate management direction and leadership.

The Inspector General pointed out that many of the problems highlighted in his report had been identified previously and that the Commerce Department had failed to correct them "despite strong public statements by present and past administrations in support of tight controls over the export of high and dual-use technologies."

The report concluded that: "This failure raises serious questions about the Department's commitment to, and ability to enforce the Export Administration Act of 1979."

I am therefore today joining my colleague on the Select Committee on Intelligence, the Senator from Utah, in introducing the Office of Strategic Trade Act of 1982. The bill would establish an Office of Strategic Trade (OST) as a new independent agency, with a Director who would be appointed by the President with the advice and consent of the Senate and would be made a member of the National Security Council. The Office would be given the authorities now carried out by Commerce under the Export Administration Act. In order to assure close coordination, the commercial licensing functions relating to defense articles, now exercised by the State Department under the Arms Export Control Act, would also be transferred to the OST.

Mr. President, this bill should not be viewed as the final edifice, but only as a potential first step in developing a clear, coherent, and consistent strategic trade policy. It is possible that this legislation could be strengthened by appropriate amendments. In addition, it is important to keep in mind that, whatever legislation we may enact, the primary responsibility for formulating export control policy and seeing that it is properly implemented will remain with the President. The West European reaction to the administration's sanctions to prevent the supply of parts for the Trans-Siberian Gas Pipeline is a consequence of the administration's earlier failure to make its opposition to that project clear and unequivocal. My colleagues will recall that the President proposed at Ottawa in July 1981 that the West not provide credits and technology to build the pipeline. A few days later, the credibility of that position was undermined

when the administration approved the sale of pipelaying equipment to Moscow.

Similarly, the administration asserts that its grain sales policy takes advantage of Soviet dependency on imports and serves Western interests by depleting Moscow's hard currency reserves. However, it conveniently overlooks the fact that, when the Carter grain embargo was terminated, controls were also removed on exports of phosphates which will increase Soviet crop yields.

The foregoing are problems that are well within the existing statutory authorities to remedy. What has been lacking has been clear policy direction and implementation. There are limits to what legislation can accomplish, but Congress will and must make the effort if the executive branch fails to do so. We offer this bill in a constructive and bipartisan spirit and in the hope that it will contribute to much needed and long overdue improvements in our export control system.

The report follows:

SOVIET ACQUISITION OF WESTERN TECHNOLOGY INTRODUCTION

The United States and its Allies traditionally have relied on the technological superiority of their weapons to preserve a credible counterforce to the quantitative superiority of the Warsaw Pact. But that technical superiority is eroding as the Soviet Union and its Allies introduce more and more sophisticated weaponry—weapons that all too often are manufactured with the direct help of Western technology.¹ Stopping the Soviets' extensive acquisition of military-related Western technology—in ways that are both effective and appropriate in our open society—is one of the most complex and urgent issues facing the Free World today.

This report describes the Soviet program to acquire US and Western technology, the acquisition mechanisms used, the spectrum of Western acquisitions that have contributed to Soviet military might, the projected Soviet priority needs for Western technology, and the problems of effectively stemming the transfer of Western technology that could someday find application in weapons used to threaten the West.

SOVIET ACQUISITION OF WESTERN TECHNOLOGY: A NATIONAL-LEVEL PROGRAM

Since at least the 1930's the Soviet Union has devoted vast amounts of its financial and manpower resources to the acquisition of Western technology that would enhance its military power and improve the efficiency of its military manufacturing technology. Today this Soviet effort is massive, well planned, and well managed—a national-level program approved at the highest party and governmental levels.

This program accords top priority to the military and military-related industry, and

major attention is also given to the civilian sectors of Soviet industry that support military production.

The Soviets and their Warsaw Pact allies have obtained vast amounts of militarily significant Western technology and equipment through legal and illegal means. They have succeeded in acquiring the most advanced Western technology by using, in part, their scientific and technological agreements with the West to facilitate access to the new technologies that are emerging from the Free World's applied scientific research efforts; by spending their scarce hard currency to illegally purchase controlled equipment, as well as to legally purchase uncontrolled advanced Western technologies having military-industrial applications; and by tasking their intelligence services to acquire illegally those U.S. and Western technologies that are classified and export controlled.

The Soviets have been very successful in acquiring Western technology by blending acquisitions legally and illegally acquired by different government organizations. The Soviet intelligence services—the Soviet Committee for State Security (KGB) and the Chief Intelligence Directorate of the Soviet General Staff (GRU)—have the primary responsibility for collecting Western classified, export-controlled, and proprietary technology, using both clandestine and overt collection methods. They in turn make extensive use of many of the East European Intelligence Services; for their efforts in acquiring Western technology, these countries are paid in part with Soviet military equipment and weapons.

Clandestine acquisition of the West's most advanced military-related equipment and know-how by the KGB and GRU is a major and growing problem.

These intelligence organizations have been so successful at acquiring Western technology that the manpower levels they allocate to this effort have increased significantly since the 1970s to the point where there are now several thousand technology collection officers at work. These personnel, under various covers ranging from diplomats to journalists to trade officials, are assigned throughout the world.

Soviet foreign trade organizations, or enterprises, although quasi-independent entities, are partially subordinated to the Ministry of Foreign Trade, and their activities are closely coordinated by this Ministry.

They have major responsibilities for both legal and illegal acquisitions and purchases; they work closely with the KGB and GRU in arranging trade diversions. East European trade companies assist them in clandestine and illegal acquisition operations.

Official Soviet and East European science and technology (S&T) organizations also play a major role in both open and clandestine acquisition of Western technology. The Soviet State Committee for Science and Technology (GKNT) is the key player in arranging government-to-government science and technology agreements to facilitate access to and the acquisition of established as well as new technologies, including those just emerging from Western universities, laboratories, and high-technology firms. It is the GKNT that oversees the allocation of scarce Soviet hard currency for the legal purchase by various Soviet organizations of selected Western technology for Soviet military purposes. If the GKNT is unable to acquire the necessary technology by open or legal means, it tasks Soviet intelligence to clandestinely acquire the technology.

¹ While there are numerous interpretations of "technology" for weapons, it is defined in this report as the application of scientific knowledge, technical information, know-how, critical materials, keystone manufacturing and test equipment, and end products which are essential to the research and development as well as the series manufacture of modern high-quality weapons and military equipment. Western technology is defined as that technology developed by the Free World.

It is the well-organized and well-coordinated use of all these organizations that has made the Soviet program to acquire Western technology so successful. As a result, the Soviets have acquired militarily significant technologies and critically important industrial Western technologies that have benefited every major Soviet industry engaged in the research, development, and production of weapon systems.

SOVIET MECHANISMS FOR ACQUIRING WESTERN TECHNOLOGY

Soviet acquisition mechanisms include: *legal means* through open literature, through legal trade channels, and through student scientific and technological exchanges and conferences; *illegal means* through trade channels that evade US and Western (i.e. CoCom)² export controls, including acquisitions by their intelligence services through recruited agents and industrial espionage. While a large volume of technology is acquired by nonintelligence personnel, the overwhelming majority of what the United States considers to be militarily significant technology acquired by and for the Soviets was obtained by the Soviet intelligence services and their surrogates among the East European intelligence services. However, legal acquisitions by other Soviet organizations are important since it is often the combination of legally and illegally acquired technologies that gives the Soviets the complete military or industrial capability they need.

Because of the priority accorded to the military over the civilian sectors of the Soviet economy, Western dual-use technology—i.e., technology with both military and civilian applications—almost always finds its way first into military industries, and subsequently into the civilian sectors of industries that support military production. Thus, Soviet assurances that legally purchased dual-use technology will be used solely for civilian applications can seldom be accepted at face value.

Legal acquisitions generally have their greatest impact on the Soviets' broad industrial base, and thus affect military technology on a relatively long-term basis. The Soviet Kama Truck Plant, for example, was built over some seven years with massive imports of more than \$1.5 billion worth of US and West European automotive production equipment and technology. Large numbers of military-specification trucks produced there in 1981 are now being used by Soviet forces in Afghanistan and by Soviet military units in Eastern Europe opposite NATO forces. Similarly, large Soviet purchases of printed circuit board technology and numerically controlled machine tools from the West already have benefited military manufacturing sectors.

The Soviets give priority to those purchases that meet the direct needs of the Soviet military-industrial complex by paying for them in hard currency. Over the past 10 years, the Soviet legally and illegally purchased large quantities of Western high-technology microelectronics equipment that has enabled them to build their own military microelectronics industry in a short time. This acquired capability in microelec-

tronics is the critical basis for the present wide-ranging enhancements of Soviet military systems and for their continuing sophistication.

Acquisitions through illegal trade channels often have both industrial and military applications, and thus are important in the near term. Illegal acquisitions of technology fall into two general categories, both of which are extremely difficult to detect and monitor. One is the diversion of controlled technology from legitimate trade channels to prescribed destinations. This is done through US and foreign firms that are willing to engage in profitable impropriety; through agents-in-place in US or foreign firms or foreign subsidiaries of US firms; through Soviet and East Europe-owned firms locally chartered in the West; and through foreign purchasing agents (including arms dealers). For instance, to evade the US embargo on microelectronic technology exports to the Soviet Union, the Soviets and their surrogates have set up dummy corporations in the West that purchase sophisticated microelectronics manufacturing equipment. This equipment is then shipped and reshipped, sometimes with the knowledge of individuals in the companies, to disguise its ultimate destination—the Soviet Union or Eastern Europe. Both the Soviet and Warsaw Pact intelligence services are in the mainstream of this illegal technology trade flow. The other type of diversion is an in-place diversion, in which legally acquired technology and equipment—in the computer area, for example—are put to military end uses not authorized in export license applications.

The acquisitions that most directly affect Soviet military development have come from intelligence collection and related illegal trade diversions. Soviet Bloc intelligence services have concentrated their effort in the United States, Western Europe, and Japan. These services target defense contractors and high-technology firms working on advanced technology (both classified and unclassified), foreign firms and subsidiaries of US firms abroad, and international organizations with access to advanced and/or proprietary technology, including access to computer data base networks throughout the world.

Both legal and illegal acquisitions of U.S. and Western technology and equipment are coordinated with information obtained through the complex network of international governmental scientific and technical agreements and exchanges that the USSR maintains with the advanced industrial nations. These include know-how, equipment, and computer data base collection activities of Soviet scientists and engineers who participate in academic, commercial, and official S&T exchanges. Visiting Soviet and East European technical and student delegations to the United States generally consist of expert scientists, many of whom are connected with classified work in their home countries. Such was the case with the Soviet scientist who managed to get assigned to fuel-air explosives work. When he finished his U.S. study programs, he almost certainly returned to the USSR to work on related weapons. Other Soviet and East European scientists have come to the United States to work in the aerohydrodynamic, cryogenic, optic, laser, computer, magnetic bubble computer memory, nuclear, microelectronic, and structural and electronic material areas. Given the military importance of these fields to the Soviet Union, it appears likely that a high percentage of these

scientists will work on military-related programs in these areas after they return home.

From the beginning, Soviet candidates in various academic and scientific exchange programs have nearly always proposed research activities involving technologies in areas that have direct military applications and in which the Soviets are technologically deficient. Table 1 provides a list of the key high-technology fields that Soviets and East European visitors come to the United States to study, research, or discuss, many of which are on the U.S. Militarily Critical Technology List today. In each of the past two years, more than a third of the 50 program proposals offered under the Graduate Student/Young Faculty Program of the International Research and Exchanges Board (IREX) has been completely unacceptable in terms of prospective technology loss, and many other programs needed to be modified or have access constrained before the exchanges could be allowed.

TABLE 1.—Major fields of technology of interest to Soviet and East European visitors to the United States

Computers:	
Architecture	Memories.
Automatic control ...	N/C (numerically controlled) units.
CAD (computer-aided design).	Networks.
Cybernetics/artificial intelligence.	Pattern recognition.
Data bases.....	Programming.
Image processing design.	Robots.
Image processing/retrieval.	Software.
Materials:	
Amorphous	Metallurgy.
CAD	N/C machine tools.
Composites.....	Powder metals.
Cryogenics	Superconductors.
Deformation	Testing/NDT (nondestructive).
Semiconductors:	
CAD	Design.
Circuits	Ion implantation.
Defects.....	Production technology.
Devices.....	SAW (surface acoustic wave) devices.
Communications, navigation, and control:	
Antennas	Satellite communications.
Microwave/millimeter waves.	Signal processing.
Radio wave propagation.	Telecommunications.
Vehicular/transportation:	
Marine systems	Shipbuilding.
Laser and optics:	
Fiber optics.....	Optics.
Gas lasers.....	Tunable lasers.
Nuclear physics:	
Cryogenics	Reactors.
Fusion	Structural designs.
Materials	Superconductors.
MHD (magnetohydrodynamics)	
Microbiology:	
Genetic engineering.	

² The Coordinating Committee (CoCom) was established in 1949 to serve as the forum for Western efforts to develop a system of strategic export controls. It is composed of the United States, the United Kingdom, Turkey, Portugal, Norway, the Netherlands, Luxembourg, Japan, Italy, Greece, France, the Federal Republic of Germany, Denmark, Canada, and Belgium.

The Soviets correctly view the United States and several other Western countries as a continuing source of important and openly available scientific and technical information, which they take every opportunity to obtain access to. Some of the unclassified documents so acquired are previously classified materials which had been downgraded to unclassified through U.S. procedures providing for automatic declassification after a stipulated period. When collected on a massive scale and centrally processed by the Soviets, this information becomes significant because it is collectively used by Soviet weapons designers and weapons countermeasure experts.

The Soviets also regularly attend high-technology trade shows, and attempt to visit commercial firms in the West, particularly small and medium-sized firms that are active in developing new technologies. These apparent trade promotion efforts often mask Soviet attempts to acquire emerging Western technological know-how before its military uses have been identified and government security controls have been applied. Emerging technologies are particularly vulnerable to foreign collection efforts of this type.

Soviet intelligence continues to place a high priority on the collection of S&T information on genetic engineering and futuristic weapons such as lasers and particle beam weapons. The Soviets have been stepping up their efforts to acquire new and emerging technologies such as very-high-speed integrated-circuit (VHSIC) and very-large-scale integration (VLSI) technology from Western universities and commercial laboratories for both military and commercial applications.

Over the past few years there has been an increased use of Soviet- and East European-owned firms locally chartered in the United States and abroad to exploit Western-controlled and military-related technology. There are more than twenty Soviet- and East European-owned firms in the United States, and near the end of the 1970s there were more than 300 similar firms in Western Europe. In addition to the United States, heavy concentrations are in the United Kingdom, Sweden, the Netherlands, Italy, the Federal Republic of Germany, France, Canada, Belgium, and Austria. These firms are avenues for Soviet acquisition of advanced Western technologies, as was shown when the US engineer arrested in late 1981 was charged with selling US secret documents to an East European intelligence officer employed by a Polish-owned firm chartered in Illinois. Furthermore, firms chartered in the United States can legally purchase controlled US technology and study it without actually violating US export controls unless they attempt to export the equipment or related technical data from the United States without a license.

SOVIET ACQUISITIONS AND BENEFITS

Today's recognition of the crucial role of Western technology in the development and production of Soviet weapon systems and related military equipment is not unique. Soviet dependence on Western technology was visible and clear-cut in the years immediately after World War II, when the Soviets stole Western nuclear secrets leading to their development of a nuclear weapon capability, and copied a US bomber in its entirety leading to production of their TU-4. To achieve major improvements in their military capability quickly, they exploited captured scientists and industrial plants and

resorted to a combination of espionage, stealing, and copying Western systems.

Since that early period of near-complete reliance in the 1950s, the Soviets' dependence on Western technology to develop their weapons has decreased. Nevertheless, despite several decades of Soviet priorities focused on science, technology, and weapon systems, the Soviets, because of their inability to be innovative and effectively apply new technology to weapons developments, still depend on Western technology and equipment to develop and manufacture some of their advanced weapon systems more quickly.

Today, Soviet military designers carefully choose the Western designs, engineering approaches, and equipment most appropriate to their deficiencies and needs. These needs are still substantial and pervade almost every area of weapons technology and related manufacturing equipment. Table 2 lists classes of Western technology acquired by the Soviets and East Europeans and illustrates the wide range of Soviet military technology needs. In the following paragraphs of this section, Soviet Bloc acquisitions have been grouped according to their likely applications: strategic systems, aircraft systems, naval systems, and tactical systems. Also cited are acquisitions in the microelectronic and computer areas that have broad application to military and industrial programs. In certain of these areas, notably the development of microelectronics, the Soviets would have been incapable of achieving their present technical level without the acquisition of Western technology. In other areas, acquisitions have allowed the Soviets to reduce the indigenous effort they would otherwise have had to expend.

TABLE 2.—SELECTED SOVIET AND EAST EUROPEAN LEGAL AND ILLEGAL ACQUISITIONS FROM THE WEST AFFECTING KEY AREAS OF SOVIET MILITARY TECHNOLOGY

Key technology area	Notable success
Computers.....	Purchases and acquisitions of complete systems designs, concepts, hardware and software, including a wide variety of Western general purpose computers and minicomputers, for military applications.
Microelectronics.....	Complete industrial processes and semiconductor manufacturing equipment capable of meeting all Soviet military requirements, if acquisitions were combined.
Signal processing.....	Acquisitions of processing equipment and know-how.
Manufacturing.....	Acquisitions of automated and precision manufacturing equipment for electronics, materials, and optical and future laser weapons technology; acquisition of information on manufacturing technology related to weapons, ammunition, and aircraft parts including turbine blades, computers, and electronic components; acquisition of machine tools for cutting large gears for ship propulsion systems.
Communications.....	Acquisitions of low-power, low-noise, high-sensitivity receivers.
Lasers.....	Acquisitions of optical, pulsed power source, and other laser-related components, including special optical mirrors and mirror technology suitable for future laser weapons.
Guidance and navigation.....	Acquisitions of marine and other navigation receivers, advanced inertial-guidance components, including miniature and laser gyros; acquisitions of missile guidance subsystems; acquisitions of precision machinery for ball bearing production for missile and other applications; acquisition of missile test range instrumentation systems and documentation and precision cinetheodolites for collecting data critical to postflight ballistic missile analysis.
Structural materials.....	Purchases and acquisitions of Western titanium alloys, welding equipment, and furnaces for producing titanium plate of large size applicable to submarine construction.
Propulsion.....	Missile technology, some ground propulsion technology (diesels, turbines, and rotaries); purchases and acquisitions of advanced jet engine fabrication technology and jet engine design information.
Acoustical sensors.....	Acquisitions of underwater navigation and direction-finding equipment.
Electro-optical sensors.....	Acquisition of information on satellite technology, laser rangefinders, and underwater low-light-level television cameras and systems for remote operation.

TABLE 2.—SELECTED SOVIET AND EAST EUROPEAN LEGAL AND ILLEGAL ACQUISITIONS FROM THE WEST AFFECTING KEY AREAS OF SOVIET MILITARY TECHNOLOGY—Continued

Key technology area	Notable success
Radars.....	Acquisitions and exploitations of air defense radars and antenna designs for missile systems.

The Soviet strategic weapons programs has benefited substantially from the acquisition of Western technology. The striking similarities between the US Minuteman silo and the Soviet SS-13 silo very likely resulted from acquisition of US documents and expedited deployment of this, the first Soviet solid-propellant ICBM. The Soviets' ballistic missile systems in particular have, over the past decade, demonstrated qualitative improvements that probably would not have been achieved without Western acquisitions of ballistic missile guidance and control technology. The most striking example of this is the marked improvement in accuracy of the latest generation of Soviet ICBMs—an improvement which, given the level of relevant Soviet technologies a decade ago, appears almost certainly to have been speeded by the acquisition of Western technology. Their improved accuracy has been achieved through the exploitation and development of good-quality guidance components—such as gyroscopes and accelerometers. The quality of these instruments, in turn, depends to a considerable degree on the quality of the small, precision, high-speed bearings used.

Through the 1950s and into the 1960s, the Soviet precision bearing industry lagged significantly behind that of the West. However, through legal trade purchases in the 1970s, the Soviet Union acquired US precision grinding machines for the production of small, high-precision bearings. Similar grinding machines, having lower production-rate capabilities, were available from several foreign countries. Only a few of these machines, either US or foreign, would have been sufficient to supply Soviet missile designers with all the quality bearings they needed. These purchases provided the Soviets with the capability to manufacture precision bearings in large volume sooner than would have been likely through indigenous development. The Soviets probably could have used indigenous grinding machines and produced the required quality of bearings over a long period by having an abnormally high rejection rate.

While some of the Soviet acquisition in the aircraft area appears directed toward the development of countermeasures against Western systems, the Soviets appear to target data on Western aircraft primarily to acquire the technology. Furthermore, while the Soviets have acquired a large amount of hardware and data from planes downed or captured in Vietnam and elsewhere, they continue to attempt to acquire the most advanced technologies through both legal and illegal transactions with the West. Assimilation of Western technology has been of great benefit to both their military and commercial aircraft development programs—to the extent that aircraft from certain Soviet military design bureaus are to a significant degree copies of aircraft of Western design. Soviet military aircraft designers have "ordered" documents on Western aircraft and gotten them within a few months, including plans and drawings for

the US C-5A giant transport aircraft early in its development cycle; these plans, although dated now, have contributed to current Soviet development of a new strategic military cargo plane. Designers were in particular need of data on US technological advances, but more importantly, they needed information on aerospace manufacturing techniques.

Soviet aircraft designers have been interested in US military transports and wide-body jets and probably have managed to accelerate the development programs for their IL-76 Candid and IL-86 transports. The IL-86 looks much like the Boeing 747 and the IL-76 resembles the C-141. Neither system is an identical copy.

The IL-76 also is used by the Soviets as the platform for their new AWACS (Airborne Warning and Control System), which is expected to be operational in the mid-1980s. This system will provide the Soviets with a major improvement in attacking low-flying missiles and bombers. The Soviet AWACS is strikingly similar in many ways to the US AWACS, and is a major improvement over their old AWACS.

The Soviets' acquisition effort in the naval systems area reflects well the two major factors that motivate their requirements: the acquisition of technology not readily available to them—yet critical to their programs—and the acquisition of equipment which, while producible in the Soviet Union, allows them to divert resources to more pressing naval programs. The Soviets appear to have concentrated their acquisitions in areas related to aircraft carriers, deep sea diving capabilities, sensor systems for antisubmarine warfare and navigation, and ship maintenance facilities. In the maintenance area, two huge floating drydocks purchased from the West for civilian use by the Soviets have been diverted to military use. Drydocks are critical for both routine and fast repair of ships damaged in warfare. In 1978, when the Soviets took possession of one of the drydocks, they diverted it to the Pacific Naval Fleet. The other was sent to the Northern Fleet in 1981.

These drydocks are so large that they can carry several naval ships. More importantly, they are the only drydock facilities in either of the two major Soviet fleet areas—Northern or Pacific—capable of servicing the new Kiev-class V/STOL aircraft carriers. Soviet advanced submarines carrying ballistic missiles, Soviet Kiev aircraft carriers, and Soviet destroyers were among the first ships repaired in these drydocks. It is important to note that the drydocks themselves are so large that no Soviet shipyard would have been capable of accommodating their construction without major facility modifications, associated capital expenditures, and interruptions in present weapons programs. Their importance will be even more pronounced when the Soviets construct the still-larger carriers (for high-performance aircraft) projected for the 1990s. The Soviets even have acquired Western aircraft carrier catapult equipment and documentation for this larger carrier; catapult technology, though relatively common in the West, is outside the Soviet experience.

Within the past few years, the USSR also has contracted for or purchased foreign-built oceanographic survey ships equipped with some of the most modern Western-manufactured equipment. In place of US equipment that was embargoed, other Western equipment has been installed on the ships. This modernization of what is the world's largest oceanographic fleet with

Western technology will help support the development of Soviet weapon system programs and antisubmarine systems against the West.

Although the Soviets have a strong indigenous technology base that could support the development of much of their tactical weapons systems, this does not prevent them from maintaining an ambitious program for acquiring and benefiting from Western technology in this area. In some cases, their acquisitions satisfy deficiencies in Soviet technology; smart weapons technology and electro-optical technology are examples of this. Signal and information-processing technology, particularly for Soviet air defense systems, is another. More often, however, technology is exploited to speed up a developmental program or to improve upon original Western designs in an expeditious manner. The Soviets appear to have concentrated their tactical systems acquisitions on Western tank, antitank, and air defense-related technology and equipment in order to derive concepts and know-how to benefit their weapons programs and to design countermeasures to the Western systems. The Soviet SA-7 heat-seeking, shoulder-fired antiaircraft missile contains many features of the US Redeye missile. Such acquisitions have enabled the Soviets to obtain advanced tactical weapon capabilities sooner than otherwise would have been possible.

Western equipment and technology have played a very important, if not crucial, role in the advancement of Soviet microelectronic production capabilities. This advancement comes as a result of over 10 years of successful acquisitions—through illegal, including clandestine, means—of hundreds of pieces of Western microelectronic equipment worth hundreds of millions of dollars to equip their military-related manufacturing facilities. These acquisitions have permitted the Soviets to systematically build a modern microelectronics industry which will be the critical basis for enhancing the sophistication of future Soviet military systems for decades. The acquired equipment and know-how, if combined, could meet 100 percent of the Soviets' high-quality microelectronic needs for military purposes, or 50 percent of all their microelectronic needs.

Table 3 identifies the microelectronic production-related equipment that has been acquired by the Soviet Bloc. These acquisitions have been grouped into areas related to the four steps required to produce a microchip: wafer preparation, circuit-mask making, device fabrication, and assembly and testing.

TABLE 3.—MICROELECTRONIC EQUIPMENT AND TECHNOLOGY LEGALLY AND ILLEGALLY ACQUIRED BY THE SOVIET BLOC

Equipment or technology	Comments
Process technology for microelectronic wafer preparation.	The Soviets have acquired hundreds of specific pieces of equipment related to wafer preparation, including epitaxial growth furnaces, crystal pullers, rinsers/dryers, slicers, and lapping and polishing units.
Process technology for producing circuit masks.	Many acquisitions in this area include computer-aided design software, pattern generators and compilers, digital plotters, photoreplacers, contact printers, mask comparators, electron-beam generators, and ion milling equipment.
Equipment for device fabrication.	Many hundreds of acquisitions in this area have provided the Soviets with mask aligners, diffusion furnaces, ion implanters, coaters, etchers, and photochemical processing lines.

TABLE 3.—MICROELECTRONIC EQUIPMENT AND TECHNOLOGY LEGALLY AND ILLEGALLY ACQUIRED BY THE SOVIET BLOC—Continued

Equipment or technology	Comments
Assembly and test equipment	Hundreds of items of Western equipment, including scribes, bonders, probe testers, and final test equipment have been acquired by the Soviets.

Soviet computer technology has long been limited by fabrication and production technology problems and by difficulties in software development. Since 1969 the USSR and East European countries have been developing a family of general purpose computers known as the Ryad series. These computers, which make up virtually the total Soviet and East European effort in large general purpose computers, have been and will continue to be used in a wide variety of civil and military applications. Western technology has been important to development of the Ryad series by providing proven design directions both at the system and component levels. The architectural designs of the Ryad computers, for example, are patterned after those of the highly successful mass produced IBM 360 and 370 series, computers that are used in a wide range of applications and are highly serviceable in the field.

With this approach, the Soviets and East Europeans eliminated many of the risks involved in undertaking the development and production of a new series of general purpose computers, and saved considerable amounts of manpower and time. Since the early 1970s the Soviets and East Europeans have legally purchased more than 3,000 minicomputers, some of which are now being used in military-related organizations. Furthermore, they are also developing minicomputers that are direct copies of Western models. Soviet and East European development of computer systems has been aided by all available means—legal and illegal, including clandestine—for acquiring the needed technical know-how.

Thus, the Soviets and their Warsaw Pact allies have derived significant military gains from their acquisitions of Western technology, particularly in the strategic, aircraft, naval, tactical, microelectronics, and computer areas. This multifaceted Soviet acquisitions program has allowed the Soviets to:

Save hundreds of millions of dollars in R&D costs, and years in R&D development lead time.

Modernize critical sectors of their military industry and reduce engineering risks by following or copying proven Western designs, thereby limiting the rise in their military production costs.

Achieve greater weapons performance than if they had to rely solely on their own technology.

Incorporate countermeasures to Western weapons early in the development of their own weapon programs.

These gains are evident in all areas of military weapons systems. While difficult to quantify, it is clear that the Western military expenditures needed to overcome or defend against the military capabilities derived by the acquisition of Western technology far outweigh the West's earnings from the legal sales to the Soviets of its equipment and technology.

OUTLOOK FOR THE 1980's

The Soviet's military R&D and weapon test-and-evaluation efforts are continuing at

a rapid pace. Several hundred development projects for weapons systems and major system elements are now under way, and it is expected that through the 1980s the number of new or modified advanced Soviet weapon systems emerging from these projects into production and deployment will remain at the high levels of the last two decades—some 200 weapon systems per decade.

Soviet military manufacturing capacity increased by a significant 80 percent during the 1960s and 1970s, and new plant expansion now under way at one-fourth of their key weapons manufacturing facilities will add considerably to their capabilities. These new facilities will be ready to produce weapons in the next four to 10 years. Plant expansion is in the following areas: ground warfare vehicles, including new tanks; aviation, including facilities for a new B-1-type bomber and a new long-range military transport aircraft having strategic airlift capabilities; naval shipbuilding, including submarines for ballistic missiles and cruise missiles, as well as full-size aircraft carriers for high-performance aircraft capable of competing with the United States in global operations; and electronic and microelectronic manufacturing facilities throughout the U.S.S.R. The development and production of new Soviet weapons at these facilities is sure to be more complex and costly than during the 1970s.

All of this military development and plant expansion activity, however, is taking place at a time when the Soviet economy has reached its lowest level of growth since World War II. Soviet annual GNP growth may well be limited to an average of 1 to 2 percent by the mid-1980s. Stagnation in industrial sectors that are key to both the civilian and the military sectors will make it increasingly difficult for the Soviets to satisfy the needs of both. Thus, Soviet leaders will have to make tough choices among defense, investment, and consumption; the competition among rival claimants for resources will become intense. Under these conditions, it may be impossible for the Soviets to maintain current growth in military production without hurting the civilian economy.

Despite these economic difficulties, there are no signs that the Soviets are shifting resources away from the military sector or slowing down development of weapon systems that will be entering the production stage by mid-decade. New generations of Warsaw Pact weapons will require selected critical component and modern manufacturing technologies. It is in these areas that Soviet illegal acquisitions of Western technology, complemented by legal acquisitions, are most likely to be concentrated over the next five to 10 years.

Among the more important technologies are microelectronics, computers, and signal processing. Microelectronics will play a very significant role in advances in computers and signal processing, and all of these technologies will be important in developing advanced Soviet missile, aircraft, naval, and tactical weapon systems, and associated detection systems. Additional projected Soviet technological needs related to such systems are presented in the appendix.

As the result of both tactical and strategic force modernizations, Soviet and Warsaw Pact military manufacturers are increasingly pressed by large-scale production requirements and the related need to control manufacturing and materials costs. Thus, particularly critical for the 1980s are Soviet

needs to improve their manufacturing capability. To a large extent, the level of manufacturing technology in Soviet plants determines the Soviets' capability to move new technology from R&D into military applications. Manufacturing technologies play a significant role not only in the development of advanced component technologies, such as microelectronics and computers, but also in the actual production of modern military systems.

Future Soviet and Warsaw Pact acquisition efforts—including acquisitions by their intelligence services—are likely to concentrate on the sources of such component and manufacturing technologies, including:

Defense contractors in the United States, Western Europe, and Japan who are the repositories of military development and manufacturing technologies.

General producers of military-related auxiliary manufacturing equipment in the United States, Western Europe, and Japan.

Small and medium-size firms and research centers that develop advanced component technology and designs, including advanced civil technologies with future military applications.

The combination of past Soviet acquisition practices and projected Soviet military needs indicates that the United States and its Allies are likely to experience serious counterintelligence and related industrial security and export control problems over the next five to 10 years.

The task of stopping Soviet Bloc intelligence operations aimed at Western military and industrial technologies already poses a formidable counterintelligence problem, both in the United States and abroad. But that task is likely to become even more difficult in the future as several trends identified in the 1970s continue into the 1980s:

First, since the early 1970s, the Soviets and their surrogates among the East Europeans have been increasingly using their national intelligence services to acquire Western civilian technologies—for example, automobile, energy, chemicals, and even consumer electronics.

Second, since the mid-1970s, Soviet and East European intelligence services have been emphasizing the collection of manufacturing-related technology, in addition to weapons technology.

Third, since the late 1970s, there has been increased emphasis by these intelligence services on the acquisition of new Western technologies emerging from universities and research centers.

The combined effect of these trends is a heavy focus by Soviet Bloc intelligence on the commercial sectors in the West—sectors that are not normally protected from hostile intelligence services. In addition, the security provided by commercial firms is no match for the human penetration operations of such foreign intelligence services. But the most alarming aspect of this commercial focus by Soviet Bloc intelligence services is that as a result of these operations the Soviets have gained, and continue to gain, access to those advanced technologies that are likely to be used by the West in its own future weapons systems.

The Soviet intelligence effort against Western defense contractor firms poses a serious problem in itself. With more than 11,000 such firms in the United States and hundreds of subsidiaries abroad, US counterintelligence efforts are stretched thin. Protection of US firms abroad from hostile intelligence threats is the responsibility of host governments, but they too are feeling

the burden of well-orchestrated Soviet Bloc efforts. The Soviet intelligence threat and the illegal trade problem appear to be severe in Japan. It appears that Western industrial security—both defense and commercial—will be severely tested by the Soviet intelligence services and their surrogates among the East European intelligence services during the 1980s.

Western industrial nations also can expect increased Soviet Bloc intelligence activities directed at the acquisition of their key industrial technologies. Western export controls are presently being updated and broadened; the CoCom allies have recently agreed to strengthen controls and to enhance their enforcement. Moreover, serious hard currency shortages, along with generally increased restrictions on Soviet S&T visitors to the United States, will make the Soviets even more dependent on intelligence and other illegal efforts to acquire the goods and equipment they will need.

The massive, well-planned, and well-coordinated Soviet program to acquire Western technology through combined legal and illegal means poses a serious and growing threat to the mutual security interests of the United States and its Allies. In response, the West will need to organize more effectively than it has in the past to protect its military, industrial, commercial, and scientific communities.

APPENDIX: PROJECTED SOVIET TECHNOLOGICAL NEEDS AND ACQUISITION TARGETS THROUGH THE 1980'S

Given the dynamic nature of their collection program, it is expected that the Soviets will continue their attempts to acquire a broad range of Western technologies. Certain areas, however, represent priority collection targets for them; these areas are critical to the Soviets' enhancement of their weapons capability.

Over the past decade, the Soviets' most pronounced improvements in strategic weaponry have been in the development of a MIRV ballistic missile capability and a significant improvement in the accuracy of their ICBMs. The former capability was made possible largely through the introduction of onboard digital computers and the latter through the improvement in the quality of the missile guidance systems and the procedures used to calibrate them. Technology acquisitions from the West contributed significantly to these improved capabilities.

The Soviets probably will continue to make their highest priority the acquisition of Western microelectronics and computer technology for in-flight guidance computers. This acquisition effort will be motivated by a desire to overcome reliability problems and also to provide the on-board processing capability required for the development of new guidance options with the potential for extremely high accuracies.

The Soviets will also give top priority to acquiring information on the latest generation of US inertial components upon which the MX ICBM and the Trident SLBM guidance systems are based. Despite the past accuracy improvements of Soviet ICBMs, these two US systems incorporate technologies beyond present Soviet technological capabilities. Moreover, their SLBM accuracies are significantly behind those of US systems. In addition to information on hardware, the Soviets are expected to seek calibration software algorithms which, as the guidance instruments themselves reach their practical performance limit, would

allow for continued improvement in weapon system accuracy.

Western solid rocket propulsion technology also will be a high-priority Soviet acquisition target in the 1980s. While the Soviets have vast experience with the liquid-propellant systems which represent the bulk of their ballistic missile force, they are shifting the emphasis to solid propulsion systems, which have practical advantages over liquid systems in a variety of applications. At the same time, the Soviets have had only limited success with the progress of their solid-propulsion program. They probably will pursue the acquisition of information on solid-propellant production procedures, and propellant grain design, motor case, and rocket nozzle technologies.

The Soviets' ABM R&D effort has continued apace since the 1960s. As a result, they have gained considerable expertise in the development of large fixed-site radars for early warning, tracking, and engagement, and their interceptor technology has also improved substantially over the years. Areas remain, however, in which the Soviets will still seek and would benefit from sophisticated Western ABM technology. These include signal processing for detection, discrimination, target assignment, and sensor technology, particularly in the long-wave infrared portion of the electromagnetic spectrum applicable toward improving their launch detection capability.

Priority Soviet targets in the aircraft area will include Western materials technology, particularly composite materials to allow weight-efficient designs. The Soviets would also benefit from the acquisition of certain engine technologies, in particular those critical to the development of high-bypass turbofans for large strategic airlift type of aircraft. While, in general, Soviet avionics technology appear adequate, the Soviets have yet to demonstrate a capability to deploy reliable, accurate airborne inertial navigation systems for long-range navigation and weapons delivery. Thus, while long used in the West, these systems are still prime candidates for acquisition.

Very high priority probably will be given to the acquisition of computer-aided aircraft design technology, an area in which the Soviets are clearly impressed by US progress. In general, they also will continue to benefit from the acquisition of efficient aircraft production technology from the West to reduce costs.

While the Soviets have a strong indigenous air defense radar and missile technology, their general lag in microelectronics and microprocessing will direct them to attempt wherever possible in the West the acquisition of advanced signal-processing hardware and software.

The Soviets will continue to emphasize the acquisition of naval-related technologies applicable to improving their antisubmarine warfare capabilities, an area in which much Western technology is superior to theirs. Thus, a significant effort to acquire acoustic sensor technology can be expected, in particular that technology applicable to the development of large towed acoustic arrays that would assist the localization of Western submarines in open waters. They probably will also target the acquisition of Western signal-processing hardware and software required to fully exploit the detection capabilities of these sensors.

Another critical problem area to which the Soviets will direct acquisition is that of submarine quieting. Here also the Soviets lag the West significantly. As a result, not

only are their submarines more vulnerable to detection, but the self-generated noise reduces the effectiveness of their own acoustic sensors.

An area in which the Soviets have historically lagged behind the West is precision submarine navigation—in particular, in the development of submarine inertial navigation systems. The need for improvements here will become more pressing as the Soviets develop long-range cruise missiles for land attack which require precise knowledge of launch location.

The Soviets also will continue to target technologies related to the design and construction of large aircraft carriers (for high-performance aircraft) to reduce the likelihood of poor design choices that would arise in what is for them an entirely new type of construction program.

Much of the Soviet acquisition effort in the area of tactical weapons is likely to be targeted against seeker and sensor technology for tactical missiles and precision-guided munitions. The Soviets will apply considerable effort in particular to acquiring advanced Western electro-optical technology including that related to antitank weapons. As in other weapons areas, the signal processing and microelectronics technologies supporting tactical weapon systems will also be priority acquisition targets. Technical documentation on entire weapon systems, if obtained, will be used to develop countermeasures.

In the microelectronics area the USSR is now at the stage of implementing its LSI (large-scale integration) technology to high-volume production. Despite the large acquisitions of Western technology and production equipment over the past 10 years which have brought them to the LSI level, additional acquisitions from the West are needed for the more sophisticated weapons projects of the future. Ever-increasing needs for higher precision Western equipment will extend at least through the 1980s.

In addition, the Soviets will require considerable expansion of their microelectronic material base to support continued expansion of integrated-circuit production. In this regard, the USSR is seeking Western help to build two or three poly-silicon plants that will more than double current Soviet capacity for military applications. Also, with increasing advances in the technology, the USSR already will be seeking additional Western assistance in key complementary technologies such as packaging and printed circuit board production.

The USSR is expected to focus its future acquisitions efforts on the emerging technologies related to very-high-speed integrated circuits (VHSIC) and very-large-scale integration (VLSI). It is important to note that, while VHSIC is thought of as a military development program, and VLSI as a civilian technology, there is little difference between the two as far as Soviet production needs are concerned. The same materials, production, and test equipment will be used to produce both. In both of these technological areas, the USSR has developed effective means for illegally acquiring Western advanced products.

Prime Soviet collection efforts in computer technology through the 1980s are likely to include large-scale scientific computers such as the US-built CRAY-1 Computer. Computers of this class offer significant improvements over Soviet models in weapons systems design and simulation and in the processing of numerical data for many military applications. Other hardware targets

will include: very dense random-access memory chips; high-capacity disk drives and packs; the so-called "superminicomputer" class of machines; and the latest in general purpose computer technology. All of the above targets offer opportunities for significant performance improvements and represent technologies of substantial Soviet lag.

In computer software, the Soviets will continue to attempt to collect IBM programs and programs of other vendors written for these machines because of past Soviet decisions related to copying IBM computers. The large and growing number of IBM-compatible computers in the USSR means that collection activity in this area can be expected to increase. The compelling attraction of computer networks also should spur great Soviet interest in acquiring network-control software and other programs related to networking.●

ADDITIONAL COSPONSORS

S. 1018

At the request of Mr. CHAFEE, the name of the Senator from Maryland (Mr. SARBANES) was added as a cosponsor of S. 1018, a bill to protect and conserve fish and wildlife resources, and for other purposes.

S. 1606

At the request of Mr. HEINZ, the name of the Senator from New Jersey (Mr. BRADLEY) was added as a cosponsor of S. 1606, a bill to establish a supplemental insurance fund administered by the Secretary of Energy to pay the costs of necessary remedial action following damage to nuclear powerplants, including certain remedial action at the Three Mile Island facilities in Pennsylvania, to require participation in such fund by the licensees of nuclear powerplants as a condition for the licensing and continued operation of such powerplants, and for other purposes.

S. 1698

At the request of Mr. DENTON, the names of the Senator from Idaho (Mr. McCURE), and the Senator from Indiana (Mr. QUAYLE) were added as cosponsors of S. 1698, a bill to amend the Immigration and Nationality Act to provide preferential treatment in the admission of certain children of United States Armed Forces personnel.

S. 2127

At the request of Mr. COHEN, the name of the Senator from Florida (Mrs. HAWKINS) was added as a cosponsor of S. 2127, a bill to revise the procedures for soliciting and evaluating bids for Government contracts and awarding such contracts, and for other purposes.

S. 2357

At the request of Mr. LUGAR, the name of the Senator from Pennsylvania (Mr. SPECTER) was added as a cosponsor of S. 2357, a bill to prohibit export restrictions that interfere with existing contracts for the exportation of such commodities.

S. 2411

At the request of Mr. SPECTER, the name of the Senator from Maryland (Mr. MATHIAS) was added as a cosponsor of S. 2411, a bill to amend the Omnibus Crime Control and Safe Streets Act of 1968.

S. 2634

At the request of Mr. NICKLES, the name of the Senator from Florida (Mrs. HAWKINS) was added as a cosponsor of S. 2634, a bill to amend section 14(c)(3) of the Fair Labor Standards Act of 1938, to permit the employment of handicapped and severely handicapped individuals in common areas, to permit the employment of handicapped individuals in demonstration projects, and for other purposes.

S. 2734

At the request of Mr. HUMPHREY, the name of the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 2734, a bill to amend the Federal Food, Drug, and Cosmetic Act to provide the Food and Drug Administration with power to enjoin the distribution of forged or counterfeit drugs.

S. 2735

At the request of Mr. HUMPHREY, the name of the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 2735, a bill to amend title 39 of the United States Code to provide that drug abuse oriented advertisements and shipments of drugs in response to drug abuse oriented advertisements shall be nonmailable matter.

S. 2736

At the request of Mr. HUMPHREY, the name of the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 2736, a bill to make it unlawful to manufacture, distribute, or possess with intent to distribute, a drug which is an imitation of a controlled substance or a drug which purports to act like a controlled substance.

S. 2780

At the request of Mr. COCHRAN, the name of the Senator from Oklahoma (Mr. BOREN) was added as a cosponsor of S. 2780, a bill to limit the insanity defense and to provide a procedure for commitment of defendants found guilty who are mentally ill.

S. 2784

At the request of Mr. DeCONCINI, the name of the Senator from North Dakota (Mr. BURDICK) was added as a cosponsor of S. 2784, a bill to clarify the application of the antitrust laws to professional team sports leagues, to protect the public interest in maintaining the stability of professional team sports leagues, and for other purposes.

SENATE JOINT RESOLUTION 225

At the request of Mr. EAGLETON, the names of the Senator from Ohio (Mr. GLENN), the Senator from Illinois (Mr. PERCY), the Senator from South Dakota (Mr. PRESSLER), the Senator from New Mexico (Mr. SCHMITT), the

Senator from Florida (Mrs. HAWKINS), and the Senator from Nebraska (Mr. ZORINSKY) were added as cosponsors of Senate Joint Resolution 225, a joint resolution to provide for the designation of the week beginning on November 21, 1982, as "National Alzheimer's Disease Week."

SENATE JOINT RESOLUTION 227

At the request of Mr. D'AMATO, the name of the Senator from Alaska (Mr. STEVENS) was added as a cosponsor of Senate Joint Resolution 227, a joint resolution to establish National Firefighters Week.

SENATE JOINT RESOLUTION 228

At the request of Mr. NUNN, the names of the Senator from New York (Mr. MOYNIHAN), and the Senator from Rhode Island (Mr. PELL) were added as cosponsors of Senate Joint Resolution 228, a joint resolution to provide for the designation of the week beginning on October 24, 1982 as "National Tourette Syndrome Awareness Week."

AMENDMENT NO. 2016

At the request of Mr. QUAYLE, the name of the Senator from Rhode Island (Mr. PELL) was added as a cosponsor of amendment No. 2016 intended to be proposed to House Joint Resolution 520, a joint resolution to provide for a temporary increase in the public debt limit.

AMENDMENT NO. 2019

At the request of Mr. HAYAKAWA, the names of the Senator from Nevada (Mr. LAXALT), and the Senator from Alabama (Mr. DENTON) were added as cosponsors of amendment No. 2019 proposed to S. 2222, a bill to revise and reform the Immigration and Nationality Act, and for other purposes.

SENATE RESOLUTION 445—ORIGINAL RESOLUTION RELATING TO CONSULTATIONS WITH ROMANIA ON EMIGRATION AND INCREASED PERSONAL FREEDOMS

Mr. DOLE, from the Committee on Finance, reported the following original resolution; which was placed on the calendar:

S. RES. 445

Whereas by bilateral trade agreement the Socialist Republic of Romania is entitled to most-favored-nation status in its trade and commercial relations with the United States;

Whereas under the Trade Act of 1974 the continued extension of most-favored-nation status is conditioned on the freedom of Romanian citizens to emigrate to the country of their choice, unless this condition is waived by the President;

Whereas the President may waive this condition only if he determines that it will substantially promote the objective of greater freedom of emigration;

Whereas there are numerous reports of continuing serious difficulties concerning freedom of emigration from the Socialist Republic of Romania and of repression of religious and cultural freedom;

Whereas both the United States and the Socialist Republic of Romania are signatories to the Final Act of the Conference on Security and Cooperation in Europe, (commonly known as, and hereinafter in this resolution referred to as, the "Helsinki Final Act");

Whereas the signatories to the Helsinki Final Act pledged to respect human rights and fundamental freedoms, including emigration for the purpose of family reunification and to "deal in a positive and humanitarian spirit" with requests to emigrate for this purpose;

Whereas the signatories under Principle VII of the Helsinki Final Act pledged to "recognize and respect the freedom of the individual to profess and practice, alone or in community with others, religion or belief acting in accordance with the dictates of his own conscience", to respect the right of persons belonging to national minorities to equality before the law, to afford them "the full opportunity for the actual enjoyment of human rights and fundamental freedoms", and to "protect their legitimate interests in this sphere" and confirmed "the right of the individual to know and act upon his rights";

Whereas the Government of the United States will soon enter into consultations with the Socialist Republic of Romania concerning problems of emigration procedures: Now, therefore, be it

Resolved, That it is the sense of the Senate that the United States in such consultations should seek creditable assurances that the Socialist Republic of Romania will review its emigration procedures with a view toward—

- (1) clarifying and simplifying them;
- (2) maintaining a steady consideration of emigration applications;
- (3) eliminating unreasonable preapplication reviews and waiting periods; and
- (4) reducing the emigration application backlog, with special consideration for those awaiting departure for 1 year or more: And be it

Further resolved, That continued harassment and persecution of religious groups and ethnic minorities in Romania contravenes the provisions of the Helsinki Final Act as well as fundamental human rights and freedoms, and that the Government of the United States should pursue these matters with the Romanian Government and in appropriate international fora, including the Conference on Security and Cooperation in Europe.

SENATE RESOLUTION 446—RESOLUTION TO HONOR MICHAEL R. MASONE

Mr. D'AMATO submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 446

Whereas Michael R. Masone is celebrating his 50th anniversary as a member of the Island Park Fire Department; and

Whereas he was one of the earliest members of this Fire Department, and remains the oldest living member of the Department; and

Whereas he also served the people of Island Park for forty years as the Superintendent of Public Works; and

Whereas his distinguished service to the community, both as a public servant and as

a volunteer, have endeared him to the people of Island Park, New York; and

Whereas it is fitting for the Senate of the United States to recognize the unselfish service of such Americans as Michael Masone to their communities: Now therefore be it

Resolved That the Senate hereby honors Mr. Masone at the request of another member of the Island Park Fire Department, Senator Alfonse D'Amato.

SENATE RESOLUTION 447— ORIGINAL RESOLUTION WAIVING CONGRESSIONAL BUDGET ACT

Mr. McCLURE, from the Committee on Energy and Natural Resources, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 447

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 1606. Such waiver is necessary because S. 1606, as reported, authorizes the enactment of new budget authority which would first become available in fiscal year 1983. Such bill was ordered reported by the Committee on Energy and Natural Resources on March 31, 1982, and by the Committee on Environment and Public Works on July 22, 1982, after being jointly referred to such committees pursuant to the order of September 9, 1981. Such waiver is necessary because both committees did not complete action and report on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974 for such fiscal year 1983 authorizations.

The waiver of section 402(a) is necessary to permit Congressional consideration of S. 1606, which is not expected to result in any significant fiscal year 1983 budgetary impact. The bill would provide new direct spending authority not subject to either authorization or appropriations action. The source of budget authority would be a fee paid by certain electric utilities.

Although the bill was ordered reported by the Committee on Energy and Natural Resources on March 31, 1982, the Committee on Environment and Public Works did not complete action until after May 15, 1982, nevertheless the Senate has had adequate notice of this bill and its enactment is not expected to interfere with or delay the legislative process of the Senate.

SENATE RESOLUTION 448— BUDGET WAIVER WITH RE- SPECT TO CONSIDERATION OF H.R. 6409

Mr. PERCY, from the Committee on Foreign Relations, reported the following original resolution, which was referred to the Committee on the Budget:

S. RES. 448

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of H.R. 6409, a bill to authorize appropriations for the participation of the United States in the 1984 Louisiana World Exposition to be held in New Orleans, Louisiana,

and for other purposes. Such waiver is necessary to allow the authorization of an appropriation of \$10 million for the costs of the design and fabrication of exhibits, and the appointment by the President of a Commissioner General for the exposition. The need for the expeditious passage of authorizing legislation is great. There are less than two years remaining to put together a presentation of which the American people can be proud.

Compliance with section 402(a) of the Congressional Budget Act of 1974 was not possible by the May 28, 1982 deadline because the Committee was unaware of the time constraints on the planners of the exposition and the Administration had failed to formally request authorizing legislation prior to the deadline.

The effect of defeating consideration of this authorization will severely impede the preparations for the Louisiana World Exposition.

The desired authorization will not delay the appropriations process and is being accommodated in the supplemental appropriation.

AMENDMENTS SUBMITTED FOR PRINTING

TEMPORARY INCREASE IN PUBLIC DEBT LIMIT

AMENDMENT NO. 2023

(Ordered to be printed and to lie on the table.)

Mr. COHEN (for himself and Mr. LEVIN) submitted an amendment intended to be proposed by them to the joint resolution (H.J. Res. 520) to provide for a temporary increase in the public debt limit.

IMMIGRATION REVISION AND REFORM

AMENDMENT NO. 2024

(Ordered to be printed.)

Mr. HELMS proposed an amendment to the bill (S. 2222) to revise and reform the Immigration and Nationality Act, and for other purposes.

AMENDMENT NO. 2025

(Ordered to be printed.)

Mr. HAYAKAWA proposed an amendment to the bill S. 2222, supra.

AMENDMENT NOS. 2026 AND 2027

(Ordered to be printed.)

Mr. SIMPSON (for Mr. Tower) proposed two amendments to the bill S. 2222, supra.

AMENDMENT NO. 2028

(Ordered to be printed.)

Mr. BOSCHWITZ (for himself and Mr. HUDDLESTON) proposed an amendment to the bill S. 2222, supra.

NOTICES OF HEARINGS

SUBCOMMITTEE ON WATER AND POWER

Mr. MURKOWSKI. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Subcommittee on Water and Power to examine the Bonneville

Power Administration's transmission line siting practices in the State of Montana.

The hearing will be held on Thursday, August 26, beginning at 9 a.m. in the Federal Building conference rooms located at 200 East Broadway, Missoula, Mont.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Subcommittee on Water and Power, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510, attention: Mr. Russ Brown (telephone: 202-224-2366); or office of Senator MELCHER, P.O. Box 8568, Missoula, Mont. 59807, attention: Mr. Earl Hiatt (telephone: 406-329-3528). Witnesses are requested to provide the subcommittee with 25 copies of their written statements 24 hours in advance of the hearing, as required by the rules of the committee.

For further information regarding this hearing you may wish to contact Ms. Susan Littleton at 202-224-2366, or Mr. Brown or Mr. Hiatt at the numbers listed above.

ADDITIONAL STATEMENTS

THE WALL

● Mr. HEINZ. Mr. President, I call the attention of my distinguished colleagues and, indeed, of the whole country to a very important fact. Twenty-one years ago today the Berlin Wall was thrown up to staunch the flow of freedom-loving people from East Germany to the West.

The wall sits gray and defiant astride a city that ought to be free, united, and prosperous. But for the last 21 years it has been only half free.

To Americans, to West Berliners, to free people everywhere, the wall symbolizes utter disregard for the natural rights of men and women to think for themselves, to express themselves openly, to worship as they choose, and to earn a living as they please.

The wall severs families and friends from each other. For over two decades, it has denied Germans who are captives of an oppressive regime the hope of a better life in the West. It is an ugly gash across the soul of humanity—put there by a Communist regime that thinks men are nothing more than what they eat.

The wall was built on August 13, 1961, 12 years after the founding of the German Democratic Republic. In those dozen years, over 3 million people, or about one-sixth of the total population of the GDR, had streamed to the West. With the mass exodus of factory workers, farmers, professionals, intellectuals, housewives, and people from every other walk of life, East Germany was beginning, as Willi

Brandt put it, to "bleed to death economically and intellectually."

To stop the hemorrhaging, the East German police state—prodded by the Soviets—erected the wall without warning—under cover of night. It went up a meter thick and 3 meters high. Since then, brave and desperate men and women have continued to vote with their feet by fleeing the gigantic prison of East Germany. Between 80 and 90 people have been killed attempting to escape over the wall. One such martyr was Peter Fechter, an 18-year-old construction worker who on August 17, 1962 was shot by border guards. He fell at the foot of the wall, where he was left for 50 minutes until he bled to death—as a warning to other would-be escapees.

Mr. President, I call this to the attention of my colleagues and all my countrymen because this blight continues. Just because the wall has stood for 21 years, we must not allow ourselves to become complacent. The wall is still there—a grim and truculent symbol of denial and negativism. It still comes between people who have a natural right to life and liberty, and the life and liberty they seek.

The wall is as relevant as ever because the crimes it stands for continue to be perpetrated. Just 8 months ago, martial law was declared in Poland. Can there be any doubt that the perpetrators of this heinous act were the builders of the wall?

Today in Philadelphia, some of my constituents are laying a wreath on the Liberty Bell to remember the victims of the Berlin Wall and of martial law in Poland. There could be no better symbol of the contrast between democracy and dictatorship. The architects of the Declaration of Independence and the U.S. Constitution believed that the political system they built must guarantee individual freedoms if it was to survive. The architects of the wall and of martial law know their system must deny those freedoms if it is to survive.

I take this opportunity to salute and congratulate the Pastorious Unit of the Steuben Society of America, the German Society of Pennsylvania, the Polish-American Congress, the Archdiocese of Philadelphia, and the consulate of the Federal Republic of Germany for remembering this day and the millions of Poles and Germans who have refused to give up their struggle for freedom.●

A GAMBLE WITH NATURE—NEED FOR COASTAL BARRIER LEGISLATION

● Mr. EAGLETON. Mr. President, I hope the Senate will soon consider S. 1017, the Coastal Barrier Resources Act. I am a cosponsor of this bill which would establish a system of undeveloped coastal barrier structures.

The bill protects and conserves fish and wildlife resources for approximately 13 percent of the 1.4 million acres of coastal barriers along the Atlantic and gulf coasts. Coastal barriers create and maintain wetlands and estuaries vital to our fish stocks. The barriers are a home for more than 20 endangered species, including the bald eagle and peregrine falcon.

It could also be called a Protection Act for our own Federal tax dollars and, more important, human lives. The Department of the Interior has estimated that over the past 6 years, the Federal Government has spent \$800 million in aid for development and redevelopment on barrier islands. Residents of barrier islands are particularly vulnerable to the "storm surge" that accounts for 9 out of 10 hurricane-related deaths.

On May 21, 1982, the St. Louis Post Dispatch published an editorial, entitled, "Ending a Gamble With Nature." It is worthwhile reading.

Mr. President, I ask that the text of this editorial be printed in the RECORD. The editorial follows:

ENDING A GAMBLE WITH NATURE

In a system that has been called "Russian roulette with lives and property," the federal government has for years been subsidizing the development of coastal barrier islands that are subject to periodic, unavoidable destruction by hurricanes. Last year Congress took a step toward ending this foolish and costly form of gambling with nature. In its Budget Reconciliation Act of 1981, Congress rescinded federally financed flood insurance for developers of barrier islands. Now the Senate Environment and Public Works Committee has approved the Coastal Barrier Resources Act (S. 1018), which would end all other federal subsidies for commercial and residential growth on undeveloped, storm-prone islands and beaches.

Secretary of Interior Watt, who on this issue sides with environmentalists but for different reasons than theirs, sees the bill as a way to save the federal government between \$200 million and \$500 million a year. The Interior Department has issued a map showing 159 coastal barrier sites in 16 states, from Maine to Texas, that would be affected by the act. Not only would passage of the act eliminate wasteful federal expenditures but it would also help to preserve places that would still serve as recreation areas for humans, as habitat for a wide range of fish and wildlife species and as storm buffers for the mainland.

The full Senate is expected to act on S. 1018 in late June or July. And a House subcommittee on the environment is due to hold hearings about the same time. Given its administration and bipartisan congressional backing, this legislation should encounter no problems except possibly the calendar. Delay in scheduling should not be allowed to jeopardize final passage this year.●

PROPOSED RESTRICTION OF POWERBOATERS IN HELLS CANYON NATIONAL RECREATION AREA

● Mr. SYMMS. Mr. President, I am pleased to submit to the CONGRESSION-

AL RECORD the correspondence of Shirley Sanchotena of Boise, Idaho, who for the past 6 months has fought the proposed restriction of powerboaters in the Hells Canyon National Recreation Area. The management plan proposed by the U.S. Forest Service is clearly a disservice to the people of Idaho—to the recreationalists, and to those employed in the mining, timber, and grazing industries. Shirley Sanchotena has argued with great tenacity the case of the powerboaters, and I am pleased to make her comments a part of today's RECORD.

The material follows:

BOISE, IDAHO,
December 22, 1981.

Re Hells Canyon National Recreation Area.
Sen. STEVE SYMMS,
Lewis-Clark Hotel,
Lewiston, Idaho.

DEAR SENATOR SYMMS: I am writing on behalf of the Western Whitewater Association to protest and object to the Hells Canyon National Recreation Area Plan which was recently signed into effect by the Forest Service Chief.

The plan is not the original "Alternative C" which was proposed during the public hearings on this matter. The new "Alternative C" was never brought before the public until after it had been signed into effect, therefore its legality is questionable.

We feel that there is no reason for power boat restrictions in Hells Canyon from Lewiston to Hells Canyon Dam. The controversial part of the river, Rush Creek to Wild Sheep, pretty much controls itself. For those of us who do enjoy boating in Hells Canyon, this 10 mile stretch between Rush Creek and Wild Sheep rapids is the most challenging part of the river.3

We feel that we have been totally discriminated against in this particular regulation. The Forest Service is limiting the use of this river to a very few "special" people who have no more right to use the river than the powerboaters do. The Forest Service had proposed this plan as a National Recreation Area, not a wilderness. The floaters have already been granted the sole use of approximately seven rivers in which powerboats are totally restricted—if they want a truly wilderness experience, they should use these rivers and allow the powerboaters to enjoy Hells Canyon. The Forest Service in their proposed management plan on the Salmon River have stated in the environmental impact statement that Hells Canyon is primarily a power-boat river and the Salmon is primarily floaters. If this is true, why are they restricting us in Hells Canyon?

We feel that the Forest Service has no reason to impose these restrictions in Hells Canyon and are being totally arbitrary in even considering these restrictions. They have let the interests of a few environmentalists totally distort their reason on this plan.

The NRA Plan will have a very detrimental effect on the economy of the counties and cities who depend on the money brought in from power boats and tourism in this area to support their schools and businesses. It seems that at a time when the Administration of our country is advocating less federal assistance and more self sufficiency in local government the Forest Service has totally disregarded the efforts of our

President. The boating industry in the effected area is a million dollar industry, not counting the gas, groceries, supplies and other income the people of these communities derive from power boats and their guests in the effected area.

Power boats are a much more feasible way for the people to see this area and enjoy its benefits. We are able to take our small children as well as our elderly parents into an area which they would never be able to see if it were not for being able to boat in. The physically handicapped can also enjoy the beauty of the area from a power boat which is something they could never dream of doing any other way. Why should floaters and environmentalists be so much more privileged than the average citizen?

In our discussions with the floaters of this area, they are not opposed to powerboats in Hells Canyon and in fact enjoy the security of knowing the powerboats are there should they get in trouble and need assistance. From personal experience, I know of two floaters who would not be alive today if we had not been nearby when they flipped their raft running Granite Rapids. I do not know of a power boater who spends any time at all in Hells Canyon who has not rescued floaters, their food and clothing after they have had problems in a rapid. No one objects to us then.

There are many other reasons which I could go into as to why we should not be restricted from Hells Canyon and in particular the stretch from Rush Creek to Wild Sheep, but basically it all goes back to the interests of the Forest Service Chief who has not taken into consideration the interests of anyone except a few of "select" people. He has not taken into consideration the people of the effected areas, the economic impact on the communities, nor the desires of the majority of the people when he took it upon himself to sign this into effect.

As a very concerned citizen, please use all the powers and processes available to you to have this plan rescinded and revised to be made a fair plan and in the best interests of the majority of the people of this area and this State.

Thank you.

Very truly yours,

SHIRLEY SANCHOTENA.

WESTERN WHITEWATER ASSOCIATION,
Boise, Idaho, February 18, 1982.

JOHN CROWELL, JR.,
Assistant Secretary of Agriculture, Department of Agriculture, U.S. Forest Service, Washington, D.C.

DEAR MR. CROWELL: We are writing in regard to the Hells Canyon National Recreation Area Management Plan recently signed into effect by Max Peterson.

On behalf of the power-boaters of the area as well as all those who will be economically affected by this final plan, we urge you to reconsider the plan and implement a plan more favorable, both to the economy of the area and to those who use this area for recreation, preferably Plan A.

The impact of the Final Hells Canyon National Recreation Area Management Plan as signed into effect by the Chief, will be devastating to the economy of the State of Idaho as well as unjust, biased and totally without merit as to prohibiting power boats from using selected portions of Hells Canyon.

The Western Whitewater Association respectfully requests that you revise the final

HCNRA plan to provide equality for power boaters in Hells Canyon.

Very truly yours,

SHIRLEY SANCHOTENA,
Secretary.

BOISE, IDAHO,
May 4, 1982.

RE HELLS CANYON NATIONAL RECREATION AREA.

JOHN B. CROWELL,
Assistant Secretary of Agriculture for Natural Resources and Environment, Department of Agriculture, Washington, D.C.

DEAR MR. CROWELL: I am writing in regard to the Management Plan for the Hells Canyon National Recreation Area signed into effect on April 30, 1982 by Max Peterson.

It is apparent to me that Mr. Peterson has no concern for people other than environmentalists. I am very displeased with Mr. Peterson's revised management plan. The revised plan does not ease any restrictions regarding power boats.

The Hells Canyon National Recreation Area is designated as a recreation area, not a wilderness area. It seems to me that the Forest Service is attempting to make a wilderness for one group at the expense and detriment of another group. The Forest Service itself, in its reports, states that there is no environmental impact on the river by powerboats. The Forest Service can state no concrete reason why powerboats should be restricted other than that there is the possibility of over-crowding of campsites in the future. If this is so, why are powerboats being restricted and floaters are maintained at the present level or a very slight decrease. Lets be fair about this whole thing, if you are going to restrict one group, all others should be restricted at the same level.

I have never seen in any of the Forest Service reports where the present level of powerboats in the portion of the Canyon between Rush Creek and Hells Canyon Dam is creating any problems other than the complaint of floaters that powerboats disturb their "wilderness experience". If they want a wilderness experience they should have gone to one of the approximately 20 rivers in Idaho that are already closed to powerboats. Powerboaters also enjoy having a "wilderness experience" experience and the Forest Service is preventing us from doing that by preventing us from using the most interesting portion of the river.

It seems to me that the Forest Service is making a mockery of President Reagan's administration. The President is advocating cutting back on needless government spending and regulations. What is the Forest Service doing but spending millions of dollars of tax payer's money to implement and regulate a needless, arbitrary and senseless plan.

President Reagan is attempting to stimulate economic growth in a period of very depressed economies. This plan will destroy the economy of several of the surrounding communities by preventing powerboat use at the present level. The President of this country must be very proud of Mr. Peterson and the Forest Service.

The Forest Service is attempting to prevent the people of the Northwest from enjoying the areas in which they live so that outsiders may use this area. This is a typical inequity of government regulation and I urge you on behalf of the powerboaters of the Northwest to have this plan rescinded and have someone who is more equitable

and fair review the plan. Better yet, save everyone a lot of money and just leave Hells Canyon at the present level.

I urge you, please do not allow this unfair, unreasonable, costly and purely arbitrary plan to be put into effect.

Very truly yours,

SHIRLEY SANCHOTENA.

BOISE, IDAHO,
June 2, 1982.

R. MAX PETERSON,
U.S. Department of Agriculture, Forest Service, Washington, D.C.

DEAR MR. PETERSON: Thank you for your letter dated May 28, 1982. I, however, do not feel that you understand the problem of which I am writing.

In your letter, you state that Public Law 94-199 calls for a broad range of recreational uses. With that I do not disagree. What I am disagreeing with is your statement that the "management plan now provides for increased powerboat access and share of the river." How can you say that powerboats have increased access and share of the river when you have arbitrarily and drastically restricted the number of powerboats above Rush Creek rapids to the point of being almost nonexistent. If you think you have increased powerboaters share, maybe you should study more carefully the figures on usage of the river.

I do not see how you can continuously state in the HCNRA Management Plan study that powerboats cause no environmental impact, there is not a problem of overuse and yet you see fit to restrict powerboats to such an unreasonable limitation as stated in the most recent plan finalized on April 30th.

I feel that powerboaters are being unfairly and indiscriminately restricted from using a portion of the river in which we have as much right as the floaters. If you feel it necessary to cut down usage on the river, why only cut back powerboaters? It seems much more equitable to increase the powerboat usage from what it is in the April 30th plan and cut back floaters so that you still have the same amount of usage on the river, but it will be an equal usage basis.

You state in your letter that this is not a Wilderness area but rather a recreational area. If so, why is it necessary to exclude and restrict powerboats but leave the floaters at their present level.

I do feel that the Forest Service is spending an exorbitant amount of money to draft and manage a portion of the plan which is totally unnecessary and arbitrary.

I do not believe Public Law 94-199 was intended to be used to discriminate against certain user groups. The Comprehensive study on the area states that there is not a problem of overuse at this time. If there is not a problem of overuse at this time, why do powerboats have to be so severely restricted? If present use does not create a problem, why can the limitations and restrictions not be set at the present use level, instead of being cut to an almost non-existent number?

You state that you are trying to minimize conflicts between user groups. Do you feel that these restrictions are going to curb any conflicts? Having used the Canyon a number of times, I have never had any conflicts with floaters. In fact, there have been several times that had not a powerboat been present, floaters would have drowned. Apparently powerboats create a conflict unless the floater is drowning—then they appreciate seeing a powerboat on the river. Your

arbitrary restrictions are not going to curb any conflicts between user groups!

I strongly urge you to take a second look at the present management plan and reconsider your decision. The United States is supposed to be the epitome of fairness and equality, please make your plan conform to these standards.

I would appreciate a response to my questions.

Very truly yours,

SHIRLEY SANCHOTENA.

BOISE, IDAHO,
July 6, 1982.

R. MAX PETERSON,
Chief, Forest Service,
Washington, D.C.

DEAR MR. PETERSON: Thank you for your June 29, 1982 letter. Again, I feel that it is necessary that I reply.

Even though you have clarified your statement as to the increased use and share of the river for powerboats in your Comprehensive Plan of April, 1982, I feel that you have not studied the Forest Service reports and plans for the HCNRA. I am aware that there have been no regulations for powerboats in previous years, yet, is that a reason mandating that powerboats be arbitrarily and almost totally eliminated from a certain stretch of the river. Powerboats are not objecting to regulations, only to total elimination. I feel it is totally unreasonable to say that just because one segment has been regulated and the other has not, the unregulated segment should have more stringent and unreasonable restrictions placed on them.

The Forest Service in its study and Final Management Plan for the Salmon River has stated in writing that Hells Canyon has been and always will be a powerboat river and that the Salmon lends itself well as a floatboat river. Please give me a good reason why powerboats should be, for all intents and purposes, excluded from a certain stretch of Hells Canyon so floatboaters can enjoy "the relative solitude of floatboating to see and experience vestiges of primitive America as provided for by the Wild and Scenic Rivers Act." If they desire "relative solitude", they have approximately 26 other whitewater rivers in Idaho that powerboats have already been totally excluded from running, either by regulation or the physical makeup of the river, where they can enjoy this "relative solitude." Powerboaters would also like to enjoy "the relative solitude" of Hells Canyon, but we are not so narrow minded as to request that floaters be arbitrarily excluded strictly because of our preferences. We are aware that they are entitled to equal use and enjoyment of Idaho's rivers.

I would also like to reply to your statement that the 1981 level of powerboat use did not exceed the regulated level of use provided for in your new plan. Using your own Forest Service figures, 227% more powerboaters used Hells Canyon in 1981 than your new plan will allow when implemented.

The following are the Forest Service figures I used in my computation.

Powerboats will have only 6,600 allowable maximum user days above Rush Creek, down from the 1981 figure of 15,014. This is a cutback of nearly 8,500 user days. Thus, the number of user days you eliminate is 128% of the number of days you will allow. Even before the implementation of your new plan, estimated user days for powerboats is 15,014 compared to 23,451 user days

for floaters. With your new plan, 60,000 floatboaters may travel the same stretch of river that only 6,600 jetboaters may use for the same time period. I ask you, how can you justify these figures and call this plan a fair and equal plan. Is this arbitrary or not? These figures are from your own Forest Service publications and unless the Forest Service has implemented a new form of math, are totally outrageous, unfair, arbitrary and discriminatory. Do you call this equal use?

Your reports also state that there is no environmental impact from use at this time. Why then do you feel it necessary to restrict the great numbers of people to accommodate a selected few.

According to Forest Service publications, floaters presently are using only 63% of the launches available to them. Your plan calls for review when 80% usage is reached. Powerboaters on the contrary have no such excess allotments, only a 127% reduction in present use. How can you honestly call this fair and justified?

It appears to me that you have a personal vendetta against the powerboaters. I can see no justifiable reason for the restrictions you have imposed upon powerboaters. The facts compiled by the Forest Service in all of the studies give nothing to support the restrictions you have felt it necessary to impose. There are no facts to support your arbitrary restrictions, let alone to support the amount of taxpayer's money you are planning to use to enforce these restrictions.

Again, I urge you to reconsider your final management plan. I do not see how you can justify your actions in imposing these restrictions nor do I see how you can get away with the total discrimination you are imposing on powerboats and call this a democracy. I wonder if the present administration would approve of your decision if they were aware of the facts.

Again, I await your reply.

Very truly yours,

SHIRLEY SANCHOTENA.

Boise, Idaho, July 7, 1982.

JERRY ALLEN,
Forest Supervisor, Wallowa-Whitman National Forest, Baker, Oreg.

DEAR MR. ALLEN: I am writing in regard to your recent news release regarding the Hells Canyon National Recreation Area Comprehensive Management Plan, in particular the portion regarding power boats.

I feel your statement was misleading and did not state the correct facts regarding power boats, perhaps the confusion regarding the plan is in your office.

To begin with, you state in your news release that the powerboat allocation places a limit "which substantially exceeds the historical level, on powered boats in the Wild section of the river." Using the figures provided by the Forest Service, 227% more powerboaters used the river from Rush Creek to the Dam in 1981 than your new plan will allow when implemented. How can you possibly state that there is a 40% increase in the number from previous levels? Powerboats will have only 6,600 allowable maximum user days above Rush Creek, down from the 1981 figure of 15,014. It is beyond me to figure out how you can honestly say that powerboat use above Rush Creek will double the 1981 level. Also, I have not seen anywhere in the plan where it provides for room for growth.

It appears to me that the Forest Service is arbitrarily imposing restrictions against powerboats that are totally discriminatory.

For the section above Rush Creek, using your figures, powerboats will be allowed 36 people (6 boats, 6 people per boat average) while floaters will be allowed to send 125 people through the same stretch in the same time period. Do you call this fair and equal? Where is your stated 40% increase?

Also, you state in the news release that in the past powerboats have not been allowed above Granite Rapids. This is a restriction that no one but you seems to have been aware of.

If the need for restriction is because of increased use as you state in the news release, why is it that powerboats are being almost totally eliminated while floaters are maintained at approximately the same level? This portion of the river is supposed to be a recreational area for all, not just a select segment.

I feel it was extremely inappropriate for you to release the misleading information. If there are conflicts between floaters and powerboats, perhaps they are instigated by misleading statements from the Forest Service itself. In all of our boat trips in Hells Canyon, there has never been a conflict between our powerboat and floaters. In fact, there have been several times when floaters could possibly have drowned had we not been there in our powerboat to retrieve them from the water after their trade rafts capsized or they were thrown out of the raft.

Contrary to your apparent impression, powerboats do not feel that it is not necessary for any restrictions, we are only requesting that we be allowed a portionately equal amount of use, which is not the imaginary 40% increase you state.

I feel that the integrity of the Forest Service is put into question when statements such as contained in the June 16 news release are made. You should check your facts before making other statements. Rather than clarifying any controversy, you are instigating more. It is becoming more apparent that the plan finalized by Max Peterson is totally arbitrary and unreasonable.

Very truly yours,

SHIRLEY SANCHOTENA.●

FORBES COLUMNIST BACKS MILITARY REFORM

● Mr. HART. Mr. President, the military reform movement continues to attract support from a very broad range of the political spectrum. The August 16 issue of Forbes magazine contains a column by Mr. Ashby Bladen which supports the reform effort. In fact, Mr. Bladen states he has been interested in military reform for nearly 30 years.

As the column says:

'Maintaining a hugely expensive but basically ineffective military establishment is not a smart thing to do.' When the expense is translated into massive deficits, it hurts the Nation two ways: It hurts the economy, and it hurts our security.

Some of Mr. Bladen's criticism of the Army may be a bit dated; General Meyer's initiatives to create a regimental system may do much to improve our soldiers' motivation, and if the Army continues to move toward maneuver warfare, its battlefield capability could rise dramatically.

But the column's central point could not be more true: The basic problems of the American military establishment cannot be solved by throwing money at them. Mr. Bladen offers this as advice to the President; but it is equally good advice for Congress.

Mr. President, I submit for the RECORD the Forbes column, "A Glimmer of Hope."

The column follows:

[From Forbes magazine, Aug. 16, 1982]

A GLIMMER OF HOPE

(By Ashby Bladen)

Ever since President Reagan's election I have been saying that there is no hope. He has embraced California economist Arthur Laffer's painless solution to our financial problems, and I have told you several times in this column why I believe that it cannot work. But now I think I see a glimmer of hope.

The situation is roughly analogous to the summer of 1970, when President Nixon and the Fed had painted themselves into a corner from which there also appeared to be no escape. Nixon was supporting the Fed's anti-inflationary tight money policy, but after the failure of the Penn Central Railroad, it was obvious that that policy was about to drive large companies into bankruptcy by platoons. However, at the beginning of June a knowledgeable friend, Wesley Stanger, picked up a rumor that President Nixon was going to recommend an incomes policy—that is, price and wage controls, "jawboning" or some variant thereof. I said to myself, "That is the only possible escape."

I knew that an incomes policy would fail ultimately, but in the short run it would serve as an excuse for relaxing the Fed's ruinously tight monetary policy. And that is just about the way things actually worked out. Nixon promised to issue a series of "inflation alerts"—a mild form of jawboning against excessive wage and price boosts. That allowed the Fed to relax its policy, and the incipient panic subsided. The stock market staged a powerful rally, and the following year Nixon actually brought in wage and price controls.

Coming back to the present, if the Fed ever did control long-term interest rates, it certainly doesn't any longer. I have said over and over again in the pages of this magazine that as long as we are looking at a federal financing requirement of a couple of hundred billion dollars a year, interest rates will remain so high as to destroy the viability of much of the economy. President Reagan desperately needs a plausible excuse for cutting the projected budget deficits. But he has already committed himself to not going further in cutting transfer payments, so there remains only one possible solution to the deficit problem—cutting future military expenditures.

Just recently another very knowledgeable friend, Dick Francis, told me that President Reagan has recruited a committee of leading businessmen, under the chairmanship of J. Peter Grace, to study and make recommendations about cost effectiveness in the Army. Of course, there is no such thing as cost effectiveness, in the ordinary business sense, in the military. The test of an army is whether it wins or loses; and, in my opinion, the American Army, as presently organized, is a loser. That is why I have been interested in military reform for nearly 30 years.

In 1954 my job was to hang a microphone on the briefing officers at Operation Flash-

burn, the first big maneuver involving nuclear weapons. At the wrap-up briefing the Army Chief of Staff concluded that those weapons dictated more massive formations and closer control from the top. I differed, but, wisely for a private first class, silently. Never again will it be possible to mass a division on a one-mile front because somebody is likely to come along and drop an atom bomb on it. From now on war will be a small unit affair, and that calls both for highly trained units that consider themselves to be elite and for competent noncoms and junior officers who are not afraid to make decisions.

By and large, the American Army has neither of those things. Moreover, the basic system of motivation and discipline is an 18th-century one that was compatible with the technology of the Tower musket, and that depends on being willing to shoot somebody once in a while—something that, mercifully, we are no longer willing to do. The American Army is very good at destroying every other motivation, except fear that might cause people to work effectively together.

Maintaining a hugely expensive but basically ineffective military establishment is not a smart thing to do. Bill Marquard, president of American Standard, is on President Reagan's military cost-effectiveness committee, and Dick Francis, American Standard's treasurer, is head of the task force that reports to it. I know them well, and they are both absolutely first-class businessmen. They take an appropriately broad view of their mandate, and if anybody can do the job, they can. But it is a Herculean task, and at this point I am no more sanguine about the ultimate outcome than I was about Nixon's incomes policy. However, in the short run, President Reagan can escape from the budget impasse by announcing that the committee has convinced him that the basic problems of the American military establishment cannot be solved by throwing money at them. Instead, a rethinking of the principles on which it is organized and motivated is in order. That is the only way I now see for him to retreat gracefully from the projected deficits that are causing the current ruinously high level of interest rates. ●

LOS ANGELES COUNTY SUPPORTS EXIMBANK

● Mr. GARN. Mr. President, for 8 years now, I have advocated in this body strong support and adequate program authority for the Export-Import Bank. The Eximbank is our primary weapon on our efforts to restore market conditions to the area of international trade financing. Our major trade competitors have progressively sought to undermine the international marketplace by underwriting the products of their nationals with highly subsidized official export credit.

Virtually the only defense that we have had for American exporters and for the principles of free trade based on quality, price, and product reliability, has been the Export-Import Bank.

In order to reevaluate current policies regarding the Bank, along with several of my colleagues, I cosponsored S. 2600, a bill to restructure the Bank, giving it increased authority

and funding. Not only in my position as chairman of the Banking Committee, but also through my membership in the Appropriations Committee, I have worked strenuously to achieve adequate funding for the Bank.

It is well known that the Bank is currently undergoing difficult challenges, both at home and from abroad, and so I mention my own efforts in support of the Bank in order to report how gratifying it is to see that this support is shared by individuals and groups from all across the country.

Just recently, Mr. President, I received a letter from Mr. James S. Mize, executive officer of the Board of Supervisors of Los Angeles County, reporting the unanimous adoption by the board of supervisors of a resolution urging action to support the Export-Import Bank. This Bank is vital to our national economic health, for it protects our exporters against unfair credit practices and thereby defends the free market, upon which the strength of our Nation is based. I am pleased to see that there is growing national recognition of the importance of the Export-Import Bank. I urge my colleagues to give thought to the importance of the Bank, as expressed in the letter announcing the action taken by the Los Angeles County Board of Supervisors, and I ask that the text of the letter be included in the RECORD at this point.

The article follows:

BOARD OF SUPERVISORS,
COUNTY OF LOS ANGELES,
Los Angeles, Calif., July 30, 1982.

HON. EDWIN GARN,
Senate Office Building,
Washington, D.C.

DEAR SENATOR GARN: At its meeting held July 27, 1982, on motion of Supervisor Michael D. Antonovich, unanimously carried, the Los Angeles County Board of Supervisors went on record as urging action to develop an Import-Export Bank, that is strong in funding and strong in policy, and whose public posture is one of willingness to match, or better, foreign subsidized financing. Further, the Board urged the Congress of the United States to establish a comprehensive, long-term export policy which will accomplish these goals.

In making his motion, Supervisor Antonovich cited that export items which are manufactured in the greater Los Angeles area represent more than 250,000 local jobs. The Import-Export Bank is the defensive financing tool available to large capital goods exporters and for thousands of suppliers. Import-Export Banks have been a profit making agency which have returned more than one billion dollars to the Federal treasury and retained two billion dollars more in earnings since it was capitalized in 1945. Finance and export is an appropriate investment for this country, in which returns from tax receipts and reduction in unemployment benefits far outweigh the risk of lending money below market rates.

Further, Supervisor Antonovich stressed that it is important for the United States to have an aggressive export policy. Since this country can no longer rely on production quality and productivity to sell their prod-

ucts abroad, it is extremely important that we be able to compete on the world market in terms of finance.

Very truly yours,

JAMES S. MIZE.●

MOST-FAVORED-NATION STATUS

● Mr. DOLE. Mr. President, on August 10, the Subcommittee on International Trade of the Finance Committee, chaired by Senator DANFORTH, engaged in one of the most important tasks of the committee: the annual review of the President's determination regarding extension of most-favored-nation (MFN) status to Hungary, Romania, and the People's Republic of China. Trade with these nations certainly has attained an important share of overall U.S. imports and exports in recent years, reaching a 1981 volume of over \$5.7 billion, with a substantial U.S. surplus. But increasing trade does not obscure the more fundamental issue for review: to determine whether the essential basis for that trade—the emigration policies of these nations—satisfies the congressional purpose of conditioning the granting of MFN on such a basic human right. As cochairman of the Helsinki Commission, which monitors compliance by signatory nations with the broad recognition of human rights set forth in the Helsinki Final Act, I maintain an especially strong interest in these matters.

"IT IS FORBIDDEN"

On page 1 of the August 9 Washington Post, Michael Dobbs commented in an article concerning Moscow and Warsaw about the most ubiquitous expression in the Russian language: "It is forbidden." He mentioned the horror of one British mother upon hearing these words from her 18-month-old child—his first words. Such stories are a useful reminder that oppression remains the standard by which the Soviet bloc countries deal with their citizenry. They have engrained in their language the currency of fear, the cynical denial of liberty.

Until 1975, "It is forbidden" was the first response most citizens of Soviet bloc countries received when they asked for permission to emigrate from their homelands to seek a fresh beginning elsewhere. The next responses often included job loss, arrest, harassment, and denial of schooling for children. There are few tools available to the United States that will persuade another country not to brutalize its citizens when it is intent on doing so. But the privilege of tapping the great U.S. market is one of them.

Led by Senator JACKSON, who testified before the subcommittee yesterday, the Congress constructed in the Trade Act of 1974 a mechanism by which this country could lend a hand to those abroad who share our values and who wish to live their lives free

from fear. Since 1975, 1978, and 1979, when the first MFN agreements were signed with Romania, Hungary, and China, respectively, emigration has improved markedly. There are few issues concerning China. With the notable exception of a few family reunification cases, emigration issues are handled calmly by and large with respect to Hungary these days. And I am pleased that emigration from Romania continued to increase in 1981, and apparently is being allowed at unprecedented levels at the present time. For the thousands of fortunate ones who were allowed to leave these past few years, "It is forbidden" became an injunction of the past.

THE NEED FOR IMPROVEMENT IN ROMANIA

But I am not satisfied about the situation in Romania. In recommending renewal of MFN for that country the President himself acknowledged "grave concern" about the "repressive emigration procedures" that clearly inhibit many people from applying or successfully realizing their desire to emigrate. I share this concern. While emigration is up, as usual it appears that no effort was made to process applications until the Romanian Government became concerned that MFN might not be renewed. Further, suppression of religious rights and continued reports of discrimination directed toward the Hungarian minority, are dismaying evidence that the spirit, if not the letter, of the 1974 Trade Act is not being satisfied.

Mr. Jack Spitzer, president of B'Nai B'rith, testified before the subcommittee on behalf of the presidents of the major Jewish organizations. He strongly urged that MFN should be extended. He, Senator JACKSON, and other witnesses noted that the Romanian Government has agreed to meet this fall both with the Jewish organizations' representatives and U.S. Government representatives to discuss ways of eliminating the current problems in processing emigration applications. Because of recent improvements and this forthcoming attitude on the part of the Romanians, they strongly support the President's decision to renew MFN for Romania. I agree that it would not be beneficial to deny that extension and, in fact, it could be counterproductive.

Nevertheless, because of the wide seasonal fluctuations in the immigration process—approvals seem to be tied to the Romanian Government's estimate of congressional attitudes about MFN—and the evidence presented by several witnesses to the subcommittee of severe repression of the rights of religious groups and ethnic minorities, I believe it is important for the Senate to go on record voicing its concern about these matters. The resolution adopted by the Finance Committee today would express the sense of the Senate that the administration should

undertake to achieve certain improvements in the emigration process, and that it further should pursue the matter of human rights violations. I am happy to say that Senators HELMS and SYMMS have agreed to cosponsor the resolution, along with Senators DANFORTH, MOYNIHAN, DURENBERGER, BENTSEN, HEINZ, CHAFEE, BAUCUS, and WALLOP.

These matters are properly the subject of discussions between our two governments, as we are both parties to various international agreements recognizing basic human rights, and our commercial agreement that extends MFN to Romania is conditioned on their emigration practices. I therefore hope that the Government of Romania will view this resolution as a serious expression of congressional concern directed to a fundamental plank in our bilateral relationship.

Finally, Mr. President, I wish to recognize the continued leadership in this area of Senator DANFORTH, who, as chairman of the Trade Subcommittee, has maintained a particularly strong effort to facilitate the release of hundreds of applicants for emigration from both Romania and Hungary. His efforts throughout the year, together with those of Senators MOYNIHAN, HELMS, HEINZ, and many others of us, are an essential tool to humanize a frustrating process and to obtain relief for many U.S. citizens with ties to persons in those countries. Those individual petitions, together with the annual review conducted by the Trade Subcommittee, provide an unparalleled legislative opportunity to keep these serious human rights issues in the public eye. I can assure the Members that the committee will keep a close eye on the emigration process this year in anticipation of next year's determination.●

S. 2781. EXPORT-IMPORT SMALL BUSINESS ASSISTANCE ACT OF 1982

● Mr. COHEN. Mr. President, I am pleased to cosponsor the Export-Import Small Business Assistance Act of 1982.

Small businesses are at a great disadvantage in our international trading system. Ambiguous antitrust laws, complex and costly trade relief statutes, and a lack of expertise and export capital all contribute to the general inability of small businesses to vigorously participate in world trade.

In contrast, large corporations dominate international business transactions. Only 10 percent of the nearly 250,000 manufacturing entities in the United States are engaged in exporting. Fourteen companies in this country account for 50 percent of our non-military capital goods exports.

Large businesses have further advantages in the accessibility they have to export financing. The Export-Import Bank, which provides financing for U.S. exports, grants one-half of its benefits to three American companies. Two-thirds of the export credits are granted to seven companies producing nuclear plants, aircraft, and high-technology products. The reluctance of Eximbank to grant loans of less than \$5 million has continually frustrated small business concerns who have sought export assistance.

The bill I am cosponsoring would require that the Export-Import Bank set aside 12 percent of its annual direct loan authority for loans of less than \$5 million. This would result in small businesses having more access to export assistance loans.

Mr. President, our present economic problems have been particularly hard on our small businesses. We cannot continue to overlook the importance of exports as a means of strengthening small businesses during this difficult period. There is potential for small businesses as exporters.

Last year, the Senate-passed legislation, the Export Trading Company Act, which would clarify the antitrust laws to encourage the formation of export trading companies by small companies. S. 2781 would provide an important complement to that effort by increasing the availability of export credits to small businesses.

In our increasingly interdependent world, the services of the Eximbank are becoming even more necessary. Since other major trading partners offer more attractive export financing rates through Government programs, we must retain an export promotion program to protect our competitiveness. I believe, however, that there should be more equality in the distribution of benefits from Eximbank financing and that this legislation would introduce more equity into this system.

Our national defense and our economic strength depend on protecting our technological lead through the innovative efforts of private industry. We need to encourage small businesses to contribute more to this effort, and I commend Senator DeConcini for introducing legislation which supports this objective. ●

JUST WHEN NEEDED, EXIMBANK JEOPARDIZED

● Mr. GARN. Mr. President, one of the ironies of the debate over the Export-Import Bank is that pressure has mounted to restrict the Bank's activities just when it is needed most. The past year of negotiations within the Organization for Economic Cooperation and Development to limit official export credits has shown significant and important progress. Our ne-

gotiating team has been aggressive and tireless in its efforts to rein in the profligate credit subsidy programs of the governments of our trading competitors. As I say, the result has been significant and praiseworthy.

Much of that progress has been made possible, however, because the Congress has shown a strong determination to support the Eximbank. I am pleased that our efforts to raise program authorizations for the Bank above the fiscal year 1982 recommendations were successful last year. That sent the important signal to our competitors that the United States was not going to unilaterally disarm itself in the ever-smoldering export credit war. The other countries in the OECD credit talks responded with concessions.

In addition, I am also pleased that the Banking Committee last summer, by a vote of 11 to 1, reported the Competitive Export Financing Act of 1981. That sent another signal to our competitors, who again became more conciliatory in the export credit negotiations. Just a few weeks ago, further significant concessions were obtained, as I have mentioned.

There is still much to be accomplished. Our goal is to eliminate financing as a factor in international competition. The dictates of a free market require products to be bought and sold on the basis of quality, reliability, and price. Financing should be a neutral factor. It currently is not. The progress is in that direction. Credit terms for industrial countries are not far from market rates, but the point is that they are still not at market rates, nor are they automatically tied to the movements of the market. This is our goal, and it is not yet achieved, so it would be foolhardy to undermine what has been our most powerful tool for obtaining concessions in the export credit negotiations, namely the Export-Import Bank, before our goals are fully achieved.

Mr. President, failure to give strong support to the Eximbank at this time will result in the loss of billions of dollars of export sales that we otherwise would have fairly won, and the continuation of a costly export credit war for many years. Granting the Bank sufficient authority now, which need not cost a dollar in appropriations, will save billions in the future. That sounds to me like true fiscal conservatism.

Recently, I received a letter from a manufacturer in Salt Lake City, urging me to support the Export-Import Bank. That manufacturer, which is by no means the size of Boeing, or Westinghouse, or General Electric, was urging me to support what some would call Boeing's bank. My constituent did not seem to think that Boeing was the only beneficiary of the Eximbank's services. I do not

think so either, for thousands of companies have received Eximbank support for their exports directly, and many thousands more have received them indirectly by producing components of other products that find their way into international trade, made possible through Eximbank programs.

Mr. President, I ask that the letter from Mr. Don S. Wiest, director of exports for Beehive International, together with a study that accompanied his letter, be inserted in the RECORD at this point.

The material follows:

BEEHIVE INTERNATIONAL,
Salt Lake City, Utah, August 3, 1982.

HON. JAKE GARN,
U.S. Senator,
Salt Lake City, Utah.

DEAR SENATOR GARN: As Director of Exports for Beehive International, a fourteen year old Salt Lake City manufacturer of video data terminals and desk top computers. I would appreciate your consideration of the message contained in the attached brochure. It is self explanatory.

In summary it urges those of us involved in international trade to champion the cause of the Export-Import Bank. Since our company (\$40 million in sales during FY81) exports approximately 38% of our manufactured goods to 41 countries abroad, we are concerned that all possible be done to maintain a healthy level of U.S. exported products. It appears that the purpose of NET, the sponsoring organization of this brochure, is concerned in this direction; I am too.

Sincerely,

DON S. WIEST,
Director of Exports.

JUST WHEN WE NEED IT MOST, AMERICA'S EXPORT-IMPORT BANK IS IN JEOPARDY—HERE IS HOW YOU CAN HELP

Last year, the Export-Import Bank provided partial financing for the export sale of more than \$2 billion worth of American-built commercial jet airplanes—airplanes that would not have been built or sold without the Bank's participation.

Some members of Congress and the administration are attempting to cut the Bank's effectiveness, giving a false impression that it will reduce the federal budget. However, no tax revenues are involved. We think they are promoting false economy.

The Bank provides partial funding for many other U.S. industries. Export sales by those industries bring needed capital into our nation's economy, help steady our balance of payments, and most importantly create jobs for tens of thousands of American men and women.

Cutting the Bank now, when we need it most, makes no sense.

HOW THE EXPORT-IMPORT BANK WORKS

Simply put, the Export-Import Bank is an agency of the United States Government that helps arrange export financing for the sale of American-made products. The Bank makes direct loans to overseas businesses for a portion of the total purchase price (in the case of airplanes, 42.5%). The Bank also helps overseas companies find loans in the commercial financial market by providing guarantees that those loans will be repaid. In some cases, the Bank does both, providing loans directly to the buyer and making a guarantee for some portion of the balance.

In most ways, the Export-Import Bank behaves like any other bank. It borrows money from commercial sources (through the Federal Finance Bank, a coordinating body for government agencies), then loans the money out. The Bank's income is the interest and principal payments on those loans, along with fees paid by borrowers and the beneficiaries of the guarantees. That income is used to repay the commercial borrowings.

The Bank was established in 1934, and since 1948 it has devoted its efforts exclusively toward promoting exports. During that time it has generated more than \$100 billion in export sales. It has also turned a handsome profit; to date, the Bank has returned more than \$1 billion in dividends to the United States Treasury, and it has a reserve fund of "retained earnings" of more than \$2 billion.

The Bank uses no tax money, and is not a drain on the federal treasury. Each year, Congress grants the Bank authority to borrow money to be used for loans. By raising or lowering its capacity to borrow, Congress determines how active—and how effective—the Bank will be.

THE EXPORT-IMPORT BANK IS NECESSARY TO MANY U.S. SALES

It is argued that America's overseas customers ought to be able to arrange financing of their airplane purchases solely through commercial sources. More than half do. However, such financing is difficult at best, and sometimes impossible for others. Without partial Bank financing and/or guarantees, commercial sources are wary of airlines from lesser developed nations. And during the past three years, lending rates from traditional credit sources have been well beyond the reach of some airlines.

America's chief competitor in airplane manufacturing is Airbus Industrie, a consortium formed by European private capital and the governments of France, Germany, and the United Kingdom. In the past three years, Airbus airplane sales have increased dramatically, while U.S. manufacturers' sales have sagged. In some measure, this is due to financing and other inducements offered by the European governments. Until a one-year agreement reached last September, Airbus financing was available for as little as 7.5%. Such financing simply overshadowed other competitive advantages held by U.S. airplanes, and many sales went to Airbus because the financing deal was just too sweet to pass up.

September's agreement, called the Commonline Agreement, now stipulates that sales of European- and U.S.-manufactured airplanes be financed at approximately the same rates, effectively 12% over a 10-year period. But even 12% is below the world credit market at this time. The governments behind Airbus can finance airplane sales out of their treasuries; private industries simply do not have the resources to respond.

Thus, the Export-Import Bank is virtually the only resource that can put an American firm on an equal footing with its foreign competition. In fact, it was the Export-Import Bank's participation in overseas financing that brought the European governments to the bargaining table and made the Commonline Agreement possible in the first place. And only a strong Export-Import Bank can make other such trade agreements possible in the future.

WHAT THE BANK'S CRITICS WANT, AND WHY

Some members of Congress and some members of the Reagan administration

have proposed that the Bank's authority to borrow be reduced by nearly \$1.8 billion. There are several reasons given. We do not believe any of them are convincing.

"The Export-Import Bank is a federal subsidy for industry."

It is not. No tax dollars are spent, and virtually every loan and guarantee made by the Bank is repaid in full, with interest.

"Bank borrowing pushes up interest rates."

The Bank's pressure on interest rates is negligible. Its use of credit amounts to less than 2% of the federal borrowing.

"Cutting the Bank will trim the federal budget."

Technically that is true, although in reality it is not accurate. The Bank is carried as a line item on the Unified Federal Budget. But since no tax money goes toward the Bank—which is self-sustaining—it does not cause any increase in the federal budget deficit.

"The Bank is losing money. In the long run, it will become a drain on the federal treasury."

That's 1/48th right. In 1982, for the first time in its 48 years, the Bank will probably lose money. This is because it had to borrow money from commercial sources at interest rates higher than the 12% rate at which it was making loans. When interest rates come down—as the administration assures us they will—the Bank will return to profitability. Until then, the Bank's temporary losses will be easily covered by its \$2 billion reserve fund of "retained earnings," exactly the kind of situation for which that reserve fund was created.

CUTS IN THE BANK THREATEN FUTURE OF U.S. MANUFACTURERS

Under pressure from the Reagan administration, and in an effort to keep the 1982 losses as low as possible, the Export-Import Bank has already restricted its activities in making loans to the overseas purchasers of U.S. airplanes. The Bank's actions—and the result on U.S. sales—give some indication of what the administration's proposed cuts might mean to the U.S. economy.

Thus far, the Bank has discouraged loans to airlines from developed countries, turned down loans on established airplanes such as the 747 and the 737, discouraged financing of "follow-on" orders of additional airplanes to a fleet, and established a 2% set-up fee for all loans, effectively adding 0.5% to the interest cost of a 10-year loan. These actions work to the disadvantage of American manufacturers. During the past year alone, restrictions have cost U.S. manufacturers several key sales. For Boeing, as an example, this is a particularly crucial period, since introduction of the 767 and 757 models requires a competitive sales stance if the new models are to gain a solid position for the coming decade's market share.

WHAT THIS MEANS TO YOU

You have a vital interest in America's export policies. Export sales bring money into this country's economy, help stabilize our balance of payments, and bring jobs to hundreds of thousands of American men and women in every state.

WHAT IS NEEDED FROM CONGRESS

Congress and Congress alone can determine the Export-Import Bank's authorization for 1983. Some elected representatives have urged that the Bank's role be severely cut back. Others have asked that the Bank's authority be increased and its role strengthened. One Senator, John Heinz, a Republican from Pennsylvania, has proposed that a

\$1 billion "war chest" be established in the Bank to respond quickly and surely to financing deals offered by foreign governments. Beyond that, we want the U.S. government to recognize the importance of exports and we want the Export-Import Bank to have a policy of not just saving exports, but stimulating American exports now and for the long term.

Last year, Congress was asked by the administration to cut the Bank's authorization. Instead, Congress chose to give the Bank greater loan authority. We believe Congress should act in a similar fashion this year. ●

MEDICARE PROGRAMS: MANAGERIAL PROBLEMS AND OPPORTUNITIES

● Mr. DURENBERGER. Mr. President, we are all familiar with the problem of high health care costs. Nowhere is this more evident than in the Medicare program, where actual costs in 1980 exceeded initial projections by \$30 billion.

Part of the problem is reimbursement policy. Part of it is inflation. And part of it is program management. The management of public programs differs from that of the private sector. The inefficiencies we pin on the bureaucracy are often a result of structural constraints imposed by the politics of public programs.

John C. Anderson, Ph.D., an associate professor of management sciences at the University of Minnesota, has recently published a study with Kathleen Sullivan entitled, "Publicly Financed Health Programs: Managerial Problems and Opportunities." It is part of a series of health issues supported by Hoffman-LaRoche, and it is a much needed examination of the management of public programs.

I encourage my colleagues to read the study's summary and conclusion, which I have included as part of the Record. The complete study is also well worth reading.

The summary and conclusions follow:

SUMMARY AND CONCLUSIONS

The several decades of public debate on a variety of proposals for expanding the role of government in the financing and administration of health care for the American public is evidence of a lack of broad public consensus on such health-related social goals as assurance of access, quality and equity in the distribution of health services, and containment of rising health care costs. We have not yet resolved a basic issue concerning whether health care is a right or a privilege. In addition, there is not yet a U.S. health policy with clearly specified priorities, nor is there consensus on an optimal approach to organizing an administrative and financing structure to attain those goals. Partially as a result of these factors, the job of the public program manager is exceedingly difficult. A fragmented health care system with dissimilar organization, philosophy, structure and mission currently exists with managers trying to contain costs, improve quality and extend access all at the

same time. As health care expenditures absorb an increasing proportion of the Gross National Product and as public resources become scarcer, a formula for the optimum expenditure of health care dollars becomes more essential. In the development of such a formula or policy it is undoubtedly useful to draw upon the lessons learned in the past 15 years experience of the largest public health care programs, Medicare and Medicaid.

It is the objective of this report to examine the areas wherein sound management theory has positively impacted publicly financed health programs. Using a well-defined framework for analysis, this report identifies the types of internal, external, and environmental management opportunities and constraints that have characterized the two largest publicly financed health care programs, Medicare and Medicaid and makes some observations concerning the development of additional programs and/or national policy.

Key to any analysis of the performance of the Medicare and Medicaid programs is the fact that "good" government management is not synonymous with "good" business management. Administrators in the public sector, particularly in Medicaid and Medicare, must frequently accept goals that are set by legislation. They are required to run organizations that are designed by individuals and agencies beyond their domain, work with people whose careers are outside their control, and attempt to accomplish massive objectives with the application of severely limited resources in insufficient time. Business managers limit their objectives to a set of tasks consistent with their resources. These public sector conditions, radically different from the conditions in which private managers operate, must be carefully considered in evaluating management performance in the public sector, not to protect the sensibilities of government managers but to more clearly identify the real sources of constraints in public program management.

The political environment in which Medicare and Medicaid function constrain the process of long-term resource utilization planning. The Congress, or a particular State legislature, is totally isolated from the day-to-day operations of the programs. Moreover, unlike management committees in the private sector, legislative bodies are charged with oversight responsibilities for a myriad of programs, projects and activities which limits their ability to spend too much time on any individual area. Also, some States' legislatures are only in session for several months during a year. This lack of continuity constrains any ongoing development of long-range goals and priorities. Because things are so dynamic and conflicting, management frequently operates in a responsive mode rather than with a predictive, anticipatory problem-solving approach.

In the face of multiple political power centers impinging on the authorities and resources of program management, strategic planning is often given a lower and optional priority. Instead, crisis management frequently substitutes for strategic planning, and services or eligibility are cut in an effort to immediately impact the bottom line. The results of these actions in terms of program effectiveness and capacity can be disastrous and compromising in terms of the intent of both programs.

Evaluations of Medicare and Medicaid Management performance are necessarily imprecise and problematic due to the lack of

data and clear-cut criteria against which to measure the attainment of objectives. Performance standards for many aspects of program operation are hard to come by. Specific characteristics of public program experience that hamper not only management performance but the development of performance standards for purposes of evaluation and planning include the following:

Program objectives and relative priorities are subject to constant reshaping by political forces with the result that substantial program changes occur so frequently there is never sufficient stability to observe and evaluate the impact of management decisions over time, and those decisions are frequently made in a crisis environment as a result of political pressures.

The distribution of decision-making authorities within and among public agencies, legislative bodies, and program constituent organizations seriously compromises the adequacy of management's authority and resources to implement its decisions.

The budget constraints imposed upon funding bodies or their unwillingness to invest adequate resources in the staffing and technology of administering organizations hampers the collection and analysis of data critical to the decision-making process.

In addition, Medicare and Medicaid performance is often hampered by legislation and regulation at the state or federal level which is sometimes contradictory and compromising to optimally efficient and effective program management. It has been recognized that the stability of the program administering agency impacts its relationship with other organizations in the system. Another significant obstacle with respect to managing publicly financed health programs is the apparent organizational flux that so often characterizes these programs. It is not uncommon for there to be frequent change in the designated administering agency and/or fiscal intermediary. These changes make it difficult to maintain beneficial relationships with the legislature and provider communities. Lack of program managers autonomy and authority over external entities such as county agencies or state treasury department staff whose contributions impact the bottom line of both programs is another noteworthy constraint.

Finally, the complexity of the Medicaid eligibility process requires enormous staff time and funds that could otherwise be applied to beneficiary services. The elimination of this kind of burden should be a high priority in future U.S. health policy.

The above mentioned constraints limit management capabilities within Medicare and Medicaid. The obstacles are, however, virtually inherent in the current publicly financed program environment. As a result, future U.S. health policy development must be cognizant of the limitations of public administration in a health system characterized by instability, distance from oversight committees, and lack of managerial autonomy and performance standards.

Viewing existing performance of Medicare and Medicaid in terms of criteria such as efficiency, effectiveness, capacity and flexibility, raise some provoking questions. Enough data exist to strongly speculate that current programs do not provide for the most efficient use of resources. Some effectiveness in the operation of specific programs has been achieved, yet we may be failing to achieve maximum effectiveness toward the broader goals of assurance of access, quality and equity in the distribution of health care services. Serious capacity issues are apparent

in terms of organizational and economic resources. Finally, existing programs have exhibited flexibility to meet evolving needs yet have done so without evidence of a blueprint for the future.

There are, however, some managerial initiatives that can be and in selective instances have been pursued within the current context of publicly financed health programs. These initiatives, described more fully in the body of the report, represent opportunities for management. They include:

The application of advanced claims processing technology to provide managers with key program data and information in a timely manner to facilitate informed decision-making;

The careful use of edits in the claims processing system to protect the fiscal integrity of the program and insure the appropriateness of vendor payments;

Timely claims processing, communication with, and payment of providers to ensure maximum provider participation and consequent beneficiary access to care;

The implementation and operation of program controls and the tracing and analysis of program performance to design and implement corrective action strategies in a timely, cost-effective manner;

The closing of policy loopholes and deletion of unneeded and contradictory program policy; an ongoing effort to evaluate and assess the program from this perspective will enhance overall program operation;

Quality performance in audit functions and settlement of cost reports will lead to tighter control within the program;

Working to amend legislation that is unfavorable to the efficiency and effectiveness of public programs is a continuing and necessary activity as the dynamic health care environment continues to evolve;

The proper allocation of administrative resources including spending one dollar to save two or more where such action is cost justified; in certain cases increases in administrative costs will yield substantial returns leading to greater operational efficiency;

The design of the internal Medicaid agency hierarchy to ensure that units key to better program performance are at a level high enough to carry out their corrective action strategies. Proper authority must be vested in those individuals responsible for performance if successful implementation is to be achieved.

To date these initiatives have often occurred sporadically, with too little consistency across individual state and federal agencies. Recent experience has evidenced management improvement of program operations in both Medicare and Medicaid, yet little effort has been concentrated on longer range planning and analysis.

To alleviate some of the obstacles that are seemingly part and parcel of the public sector, it is important that program managers and committees try to inject as much stability in the process as possible. Furthermore, it is imperative that sufficient information for planning and control is generated so that budgets can be justified and policy changes can be affected. In addition, development of and adherence to performance standards would go a long way in convincing decision makers of the validity of certain management initiatives. Allocating staff to perform third party liability recovery functions and quality control functions contributes to programwide cost effectiveness. Finally, a problem anticipation mechanism must be developed and truly oper-

ational so that harmonious program objectives are pursued and the crisis problem solving mode gives way to a well-reasoned managerial approach.

In turn we need to press hard for the utilization of performance standards in current programs. We need comparable dimensions across programs to map out the future direction of U.S. policy. Information on program operations must flow up to the decision makers, and policy must flow down. The lines of communication are broken in the current system. The solution is not to develop a new arm of government, but rather to recognize the limitations of publicly financed health programs and aggressively seek consistent indicators of performance and program accountability. What seems essential to significantly improve the performance of publicly financed health program management is to reduce the impact of political conflict and instability on program operations, either by reducing the levels of conflict and instability in the environment or by shielding the administrative organizations from them. Until a system can be designed that addresses these deficiencies in the variety of organizational structures that characterize publicly financed programs, the public sector should not be further burdened with additional administrative responsibilities by the extension of coverage to new segments of the population or new areas of service.●

AWARD TO DEPUTY SECRETARY KENNETH DAVIS

● Mr. McCURE. Mr. President, I take this opportunity to congratulate someone whom I have come to know and respect over the past 2 years, Mr. W. Kenneth Davis, the Deputy Secretary of Energy, for an award he received. The American Association of Engineering Societies has announced that it is making its National Engineering Award to Ken Davis for his contributions to mankind as an engineer.

Ken Davis has served his country in public service, first as Director of Reactor Development in the former AEC, and currently as Deputy Secretary of Energy. He has been instrumental in the construction of many projects around the world whose objective is energy production—the production of energy to improve the quality of life for the citizens of many countries.

As an engineer, he has contributed his time to serve as an adviser to his country in many capacities. He has been elected to be vice president of the National Academy of Engineering. As a professor, he has impressed upon students the proud tradition that engineers have had in building this country. As a scholar, he has written many articles and papers on energy applications and engineering challenges.

As the Deputy Secretary of Energy, Mr. Davis has utilized his vast experience and knowledge to help shape energy policies that are designed to make this country less dependent on foreign sources and take advantage of the fact that this country has the capability of using its abundant natural

resources, especially coal and nuclear energy.

Mr. President, I join my many friends in congratulating W. Kenneth Davis for being honored with the AAES' National Engineering Award.●

BROAD SUPPORT FOR EXPORT TRADING COMPANY LEGISLATION

● Mr. HEINZ. Mr. President, an important commentary appeared recently in the August 15 issue of *Business Week*. The article, written by former Secretary of Commerce Peter G. Peterson, makes a compelling case for approval of export trading company legislation because of the favorable impact it will have on exports.

That bill, S. 734, is now moving toward enactment. Thanks to the leadership of Congressman St GERMAIN on the House side, we now have a House-passed version with both bodies having agreed to go to conference. While it is unlikely we can complete all action on the bill prior to the August recess, I hope that I will be able to finish it soon after our return in September.

Mr. President, I ask that Mr. Peterson's thoughtful article be printed at this point in the RECORD.

The article follows:

[From *Business Week*, Aug. 16, 1982]

CURING THE AMERICAN EXPORT MALADY

(By Peter G. Peterson)

Recent declines in U.S. exports have contributed substantially to our current recession. In 1981 our net exports in the crucial manufacturing sector—historically a strong part of U.S. trade—fell a full \$7 billion. In the first half of 1982 they dropped still further, showing an actual deficit of more than \$4 billion. Over the past six quarters such declines translate into the loss of more than a quarter of a million job opportunities. Clearly, our flaccid performance in selling abroad has profound consequences for the quality of our lives at home.

Fortunately, the chances are good that Congress will soon approve a vehicle that could play a useful part in reversing our dolorous export decline. The House of Representatives and the Senate have both passed, in slightly different forms, legislation that would promote the formation of export trading companies. Such companies could increase markedly the exporting capacity of America's businesses. Export trading companies could find buyers for U.S. goods, package and warehouse merchandise, arrange transportation and insurance, prepare documents for customs, distribute the goods, and serve foreign customers on behalf of the sellers after the sales are made. By reducing the costs and risks of international trade and by providing economies of scale in the services they provide, export trading companies could offer our small and medium-sized businesses the opportunity to go after their logical share of the global market.

LACK OF FAMILIARITY

Smaller businesses offer genuine growth potential for American exports. At the moment, our smaller companies—those employing fewer than 250 people—contribute about 6 percent of exports in manufacturing, even though they account for around 17

percent of manufacturing production. Thousands of small and medium-sized businesses produce goods and services that are competitive overseas. This is particularly true of innovative companies that make such salable products as environmental controls and medical equipment.

Yet many of these companies are inhibited from exporting by their lack of familiarity with foreign markets, customs, and laws. Individually they cannot afford the costs and risks necessary to penetrate markets abroad. Collectively they share the attitude that exporting is, figuratively as well as literally, foreign territory.

There is ample evidence that the export trading companies of foreign countries work well. More than half of Japan's exporting is handled by such companies, and Japan's trade surplus in manufacturing reflects their contribution. Japan's surplus has risen from \$12.5 billion in 1970 to an astonishing \$115.6 billion in 1981. This works out to some 2.5 million additional jobs in the Japanese economy. (Another reason for Japan's large surplus, in my view, is a significantly undervalued yen.) West Germany, France, and Hong Kong are also major users of specialized export entities.

Unfortunately, export trading companies based in the U.S. have not been a dominant force in American exports. The entities most resembling trading companies in this country—export management companies and so-called Webb-Pomeroy companies—account for less than 12 percent of total U.S. exports. American export trading companies have been slow to grow primarily because they lack adequate financing and because businessmen who would otherwise start them fear the uncertainties of the antitrust laws.

The legislation now before Congress promotes the formation of export trading companies by dealing with these problems. First, the legislation would enable a number of businesses to join together to form an export trading company whose proposed operations could then be certified, in advance, as not violating the antitrust laws. Second, the legislation would amend current banking regulations to allow banks to participate in the ownership of export trading companies. The House bill would open this opportunity to bank holding companies and bankers' banks—financial organizations that provide services solely to other banks—with the approval of the Federal Reserve Board. The Senate bill would permit all banks to participate in export trading companies, under prescribed limitations. In either case, the participation of banks is crucial because it would give exporters new opportunities to obtain export financing, a form of credit to which smaller companies have only limited access.

Perhaps more important, banks could use their domestic retail branches to reach out to smaller companies, particularly those in smaller metropolitan areas where foreign trade is not emphasized. The same banks could use their international branches to identify potential foreign customers.

DEVELOPING A NETWORK

We would be mistaken to think that this new legislation will cause export trading companies to proliferate in short order. It will take time for trading companies to develop the necessary staff of sales agents and to utilize fully the international network of buyers and sellers that participating banks will provide. It will take even more time than some people expect because newly

formed trading companies will be in competition with foreign companies that have both critical mass and many years of successful experience. The new legislation will promote export trading companies over the next several years, rather than the next several months.

By the same token we would be mistaken to think that the decline in our dollar share of world exports—a long-term disease of complex etiology—can be cured quickly with a single technique. The causes of this decline are manifold: our decreasing productivity, our overvalued dollar, the diminution in the competitive quality of our products, and the slowing of our relative rates of technical progress, as well as a chronic shortage of U.S. enterprises with a truly global view of their markets.

POOR VISION

Still, if I could prescribe but one cure for the American export malady, it would be to trim the seriously overvalued dollar. A major cause of this overvaluing is our high interest rates, and they are due, in my judgment, to our enormous prospective budgetary deficits. Increasing exports linked closely to reducing deficits. (It would also help if the yen were to evolve into a truly international, "senior" currency.)

If I then could propose a second cure for our export disease, it would be to attack our MEGO (My Eyes Glaze Over) attitude toward exports. West German Chancellor Helmut Schmidt clearly does not consider it trivial or demeaning to be aware of the major export orders his country is trying to get. But when did you last hear any U.S. President speak authoritatively on exports? Or consider the vast resources devoted to selling savings bonds compared with those selling American products abroad. It is not even close. Again, by contrast, think of the Japanese Export Trading Organization, a remarkable organization of nearly 1,300 people scanning the world for potential Japanese export orders.

In 1980, Reginald Jones, then head of the President's Export Council, wrote of the need for an "export imperative." Two years later, our actions still make that sound like a contradiction in terms. We are now in an unprecedented situation, not only in our troubled domestic economy but also in our equally troubled global economy, which is in its third year of stagnant world production and its second year of stagnant world trade. Everyone is trying to increase exports while reducing imports, to get a bigger share of a fixed export pie. Moreover, ballooning subsidies—for investment, research, production, marketing, financing—threaten to distort world trade as they encourage imitation or retaliation. That is not likely to make a bigger pie. Indeed, if the U.S. does not negotiate some new rules to deal with these sources of distortion, we will find ourselves in fresh conflicts with our trading partners. We are facing too many such conflicts already. ●

THE NEW FEDERALISM

● Mr. DURENBERGER. Mr. President, the National Governors' Association this week held its annual meeting in Afton, Okla. A major topic on the agenda was the development of a New Federalism plan, and some of the specifics of sorting out governmental responsibilities among the partners in our federal system.

I am a strong supporter of President Reagan's New Federalism initiative. It is a bold, historic step that will restore the necessary balance in American Government.

The NGA has spent several months in sincere negotiations with the White House to develop that initiative into a specific plan that is equitable and effective. At the closing session of the NGA meeting, the Governors voted to continue this cooperative effort, in an attempt to resolve some basic differences that remain.

The major points that continue to be of concern include medicaid eligibility, the link between food stamp payments and welfare benefits, and the question of a special fund to help States that suffer extreme economic hardship.

Two documents from the NGA conference are especially illustrative of the work of the Nation's Governors on the New Federalism initiative. First, an "action plan" proposed by outgoing NGA Chairman Richard Snelling of Vermont, which passed the NGA executive committee on Sunday. And second, the action plan that was finally adopted by the NGA membership, expressing a continued willingness to negotiate with the White House. I ask that these two documents be printed into the RECORD.

The material follows:

THE GOVERNORS' FEDERALISM INITIATIVE

Governors are the elected spokesmen of the states, and the federal system is formed of and from states.

In this light it was to be expected that the first voices to be raised on behalf of a new federalism, of a thoughtful reappraisal of the relationship between federal and state governments, would be those of Governors.

To a considerable degree, moderate constructive discussion concerning decentralization of government, decongestion of federal bureaucratic apparatus and the need to escape the narrow, badly targeted confines of categorical grants, has been led by the National Governors' Association.

Thus, the Governors were quick to respond positively to the initiative of President Ronald Reagan when he told the Congress he would be asking for enactment of legislation to establish an improved assignment of responsibilities between states and the federal government—which included a pledge that the process would not increase the fiscal burdens of the states.

At our winter meeting, the Governors acted to encourage the President's initiative by providing a process for reconciling our own long and carefully established goals of a new federalism with the outline plan offered by the President. NGA adopted a negotiating policy statement and delegated authority to the Chairman to appoint and head a team of six Governors to attempt to define a mutually acceptable plan for "new federalism."

For the past five months, the NGA team has carried on these negotiations with the Administration in an effort to agree on a federalism proposal. Our goal was agreement on specific legislation which would have the full support of the President and of the states, and our belief was that such

mutual support was essential to favorable action by the Congress, in view of the long history of Congressional reluctance to surrender responsibilities it has preempted from state, county and municipal legislative bodies over the years.

Initially the Governors and the White House set late April as a reasonable deadline for reconciliation, and we agreed that federalism legislation should be presented to this session of the Congress if the vital public policy area described as "federalism" were to be recognized as a high priority matter of national debate.

When we were unable to obtain the White House focus necessary to achieve the initial goal, it was agreed we would strive for an agreement—or a determination we could not agree—by July 1st. That date came and past.

In early July, the negotiating representatives for the Governors urged the President and his advisors to recognize the urgency of reaching agreement in time to present any accord to the Governors for their action at this summer meeting.

I must report to the Executive Committee that it no longer seems prudent to pin our hopes for a new federalism on the outcome of any negotiations with the White House which proceed from the assumption that the public policy convictions of the President and the Governors regarding the substance and design of a proper federal-state relationship can or must be reconciled.

Although there is great diversity of opinion among the Governors, there also is a strong central consensus that the federal system must ensure the capacity of government at every level to meet an aggregate responsibility for assuring a standard of decency for every citizen of this nation, while placing authority for program design and management accountability close to the people.

It is fair to say that there may be broader agreement among the Governors concerning the appropriate specifics of a new federalism than there is among a dozen or so key advisors to the President of the United States. In good part, the failure of the negotiations must be laid to confusion and disagreement in the White House on such important areas as how to implement the President's own "offer" to have the federal government fully assume responsibility for Medicaid.

The Governors have repeatedly agreed that the foundation for a revised federalism is recognition of the federal primacy of responsibility for income maintenance and assurance of minimum health standards. The Governors have responsibly coupled that position with an express understanding that the states should assume both increased burdens for funding and full responsibility for service delivery in dozens of areas now subject to federal categorical grant programs.

The states have not sought and do not seek higher federal outlays. The states seek a better use of federal funds as a guarantor of equity and justice for the citizens of all the states.

Our negotiations with the White House seem to have foundered on the question of whether, in the end, the federal government would maintain any responsibility for assuring minimum levels of essential services or for dealing positively with the problems which the disparity of fiscal capacity among the states pose for state and local officials who honestly seek reasonable levels of serv-

ice for the needy in areas which have sub-average fiscal resources.

Parallel to our efforts to reform the federal system, the NGA has been intensely active before the Congress and the nation on budget and tax issues which were essential to the preservation of state capacity.

The President's Budget Proposal for 1983 sought to reduce federal outlays to state and local governments to \$81.4 billion, which would have represented a 26 percent cut in constant dollars from 1981 outlays.

The firmness and the resolve of the Governors to separate their willingness to discuss the shape of "new Federalism" from any acquiescence on Administration fiscal proposals, deserves considerable credit for the fact that first budget resolution for 1983 provide for outlays of \$88 billion which almost preserve state capacity afforded by the \$86.6 billion authorized for 1982.

NGA is stronger and better informed as the result of both its fight to preserve its fiscal capacity and its negotiations on behalf of a sensible federalism. We know now that federal appropriations in assistance to state and local governments will continue to be under heavy pressure from both Congress and the Administration. We do not ask for increases, but we must continue to fight for maintenance. The lesson clearly is that there will almost certainly be continuing erosion of constant dollar purchasing power. State and local governments will be left more and more on their own, with or without any revision of the federal system.

And we know also that the present Administration is the strongest advocate of a revised federal system to occupy the White House in many decades. But we also must face the fact that the Administration's federalism is, in many particulars, not a state's view.

The experience and knowledge gained in 1982 should be directed to promoting the NGA policies across a broad front, with the primary thrust directed toward the Congress.

The association of the spokesmen of the states must assume the principal responsibility for articulating and detailing the elements of a thoughtful new federalism. Our plan should be consistent with historic NGA policies. Our plan should address the issues of fairness among states with varying capacities and the obligation of the federal government to ensure a minimum decent level of assistance to those genuinely in need.

The Governors plan should adopt the premise of President Reagan's proposal that no fiscal advantage shall be sought as between the federal government and the states. Federalism does not deal with how much taxes the federal government extracts from the private or corporate citizens of the states, or how much it spends in those states. Federalism addresses the questions of the purposes of federal intrusion and the responsibilities of governments at every level.

GOVERNORS' FEDERALISM ACTION PLAN

The National Governors' Association accepts the report of Governor Snelling presented to the Executive Committee on August 8, 1982 regarding the status of federalism negotiations. The NGA extends its sincere thanks and appreciation to the members of the negotiating team, Governors Alexander, Babbitt, Busbee, Matheson, Snelling, and Thompson.

The Governors recognize the substantial amount of progress made by the NGA federalism negotiating team, and officials of the Reagan Administration, in establishing an improved assignment of responsibilities between the states and the federal government. We applaud the President for following the Governors' lead and elevating federalism to a position of national priority and for the flexibility he has shown in many of the issues under negotiation. The Governors recognize the overall spirit of compromise shown by both the Governors and the Administration through the past five months.

The Governors recognize that a greater level of participation by members of the NGA Executive Committee and the President is required to move the federalism dialogue ahead. To that end, the National Governors' Association directs its Executive Committee to implement the following federalism action plan:

1. Continue discussions with the President regarding his federalism initiative.
2. Reconstitute the NGA federalism negotiating team.

In line with the direction taken in the Report of the Task Force on the Agenda for the Eighties, the NGA Executive Committee shall serve as the federalism negotiating team, together with the chairmen of appropriate NGA standing committees, a lead governor on federalism, and such other Governors as the Executive Committee deems appropriate.

3. Develop NGA federalism reform proposal.

The National Governors' Association assumes responsibility for developing our own NGA federalism reform proposal as a high priority which shall incorporate the historic principles of the National Governors' Association respecting federalism.

4. Secure Executive Committee approval of the federalism reform proposal.

At its December meeting, the NGA Executive Committee should have, for review, the proposal in draft, for presentation to the Governors at the 1983 winter meeting. When a draft proposal has been approved by the Executive Committee it shall be presented to the President to seek his approval.

5. Present the proposal at the 1983 National Governors' Association winter meeting.

The federalism initiative should be brought before the Governors for debate and action at the 1983 winter meeting. The Executive Committee will ensure that each Governor is fully briefed well in advance of the February meeting and that as many concerns as possible are resolved before the plenary vote.

6. Ensure the early and continuing communication between the Executive Committee and others interested in federalism reform.

The Executive Committee should take such steps as necessary to ensure that the views of the National Governors' Association and those of other interested parties are freely and constructively interchanged. The process must include continuing consultation between the Chairman of NGA, the federalism lead Governor, Standing Committee Chairmen and:

The National Conference of State Legislatures.

Congressional leaders.

Administration officials.

Local officials.●

PUBLIC LANDS CONSERVATION, REHABILITATION, AND IMPROVEMENT

● Mr. HEINZ. Mr. President, today I am pleased to join my colleagues, Senators MOYNIHAN and MATHIAS, as a co-sponsors of S. 2061, the Public Lands Conservation, Rehabilitation, and Improvement Act. This legislation is a cost-effective approach to solving two intractable problems facing this Nation: High youth unemployment and the deterioration of our State and municipal parks as well as our national park and wilderness infrastructure.

My home State of Pennsylvania has 113 State-run parks, most or all of which are in need of rehabilitation and improvement. In addition, the city of Philadelphia has 89 parks maintained by the city's department of recreation, and my hometown of Pittsburgh has 15 major parks and over 200 facilities cared for by the city. These are the areas which would be aided by the formation of a National Conservation Corps. These public lands will be rehabilitated by unemployed, disadvantaged, and minority youth in the cities; we will be saving the facilities, while giving the young people of our inner cities meaningful employment and hope.

Mr. President, the unemployment figures for our country are alarming. An incredible 52.6 percent of black teenagers nationally are out of work. In Philadelphia, the 1981 average unemployment rate for blacks aged 16 to 19 was 48.2 percent. Statewide, the minority unemployment rate is 17½ percent. Over 20 percent of those Pennsylvanians between the ages of 16 and 19 are out of work. Simply put, too many youths are without work, and we have work to be done.

This bill establishes a National Conservation Corps to enhance and rehabilitate our Nation's public lands. The Corps will include unemployed young men and women between the ages of 16 and 25. While addressing the deteriorating condition of our public lands, this conservation work would also provide employment opportunities and training for our young people.

Public lands and resources, including parks, rangelands, wildlife refuges, forests, water resources, fishery facilities, and historic and cultural sites, have become subject to increasing public uses and demands, the condition of many of these lands and resources have deteriorated. Additionally, the Government agencies have been unable to adequately staff and fund the maintenance necessary to arrest this deterioration.

Youth conservation programs have proven to be a highly successful and cost-effective means to assist land management agencies at all levels of government. Both the Youth Conservation Corps (YCC) and the Young

Adult Conservation Corps (YACC) have had excellent past records in the improvement and rehabilitation of public lands. Of course, the grandfather, so to the speak, of the conservation movement, the role model of this proposed conservation corps, the Civilian Conservation Corps (CCC), employed over 3 million young people—performing work valued at over \$1.5 billion during its 9-year life, terminating in 1943.

The returns on investment of both the YCC and the YACC were excellent. For example, YACC returned \$1.25 on appraised conservation work for each \$1 expended in fiscal year 1980. In Pennsylvania, the Young Adult Conservation Corps averaged a return of \$1.33 for each \$1 expended during its 3-year life. Of course, no dollar amount can be placed on the enjoyment of our Nation's natural resources which is furthered by sound conservation. Nor do these figures include the benefits realized by putting previously unemployed young people to work.

This legislation is targeted toward those who are economically, socially, physically, or educationally disadvantaged, and who may not otherwise be productively employed. Preference is to be given to those youths residing in areas which have substantial unemployment both urban and rural.

Mr. President, it is important that we give these young people a chance; this is an opportunity for them to prove themselves to be worthy contributors to our Nation's well-being. In the past they have proved themselves. For example, members of the Pennsylvania Young Adult Conservation Corps had a 61-percent positive termination record. This means that before their 1-year enlistment was due to expire, most had found other work. The YACC only took in kids that were already out of school or out of work. Targeted conservation work is a proven method of providing disadvantaged youth in a meaningful job—and a steppingstone toward other employment.

Let me stress that the work being performed is not contrived and unnecessary. We are faced with a backlog of needed conservation work on our public lands. The work that will be done by this Conservation Corps is work that is necessary and that, in absence of such a Corps, simply would not be accomplished. This is work in the parks, forests, and local communities: Rehabilitation and improvement of facilities, picnic areas, hiking trails, access, and even historical regions. In the cities, there will be a timber management program. Youths in the big cities will assist in the rehabilitation of decaying infrastructures. Preference in work will be given to those projects which provide long-term ben-

efits to the public and are labor intensive.

As you can see, Mr. President, this program is beneficial to all of us. It puts economically disadvantaged teens to work and improves those public lands which are in need of rehabilitation. It is a cost-effective means of performing work that otherwise would not get done. There is a need for conservation work in this country. There is also a need to put our unemployed youth to work—a chance for them to prove themselves as worthy contributions to this country's welfare. Considering these needs, and the excellent past record of conservation groups in this country, I consider the Public Lands Conservation, Rehabilitation, and Improvement Act to be a superb way to solve the problems of high youth unemployment and the deterioration of our Nation's park and wilderness infrastructure.●

DON LOESLIE, VICE PRESIDENT, MINNESOTA WHEAT GROWERS AND VICE PRESIDENT NATIONAL WHEAT GROWERS

● Mr. DURENBERGER. Mr. President, recently, Don Loeslie, vice president of the Minnesota Wheat Growers and vice president of the National Wheat Growers, delivered some remarks that I believe put into clearer perspective the essential role agriculture plays in the economy of the urban areas, as well as the rural areas, of our Nation.

The remarks were delivered to a meeting of county commissioners from Hennepin, Ramsey, Washington, Carver, Scott, Dakota, and Anoka Counties. These commissioners—from the most populous areas of Minnesota—realize the importance of a sound agricultural economy and the positive impact it can have on jobs, industrial development, and a strengthened tax base. We need to improve public understanding of the positive role agriculture can play in a truly national economy. Don Loeslie makes this point factually and openly, and I think that every Member of this body will profit by reviewing his remarks. I ask that they be inserted at this point in the RECORD.

The remarks follow:

"Burn down your cities and leave your farms and your cities will spring up again as if by magic. But destroy our farms, and the grass will grow in the streets of every city in the country." William Jennings Bryan said this back in 1896, and it is just as true today. Agriculture is important not just to farmers, but to each of you in the room today. And the depressed state of the agricultural economy is being felt far beyond the farm gate to the auto dealers, hardware stores, to the schools, to our state government, to America itself? We are farmers and you are the urban businessman and worker, therefore, have a common problem and that is why we are here today. We need your help but we have something to offer in

return and if we work together we can achieve our common goals. We want to express our sincere appreciation to John Derus, the Chairman of the Hennepin County Board of Commissioners, for providing the opportunity for us to meet. When Mr. Derus met with the Wheat Growers some months ago and talked about the vital role that agriculture plays in his county, in the middle of the most metropolitan area of our state, it was both refreshing and encouraging. So many people, even in rural communities, do not consider, or appreciate that food, clothing, and many other goods do not, in fact, come from stores. They are produced in raw form on farms; and the people who process and market these goods and those who manufacture the supplies and equipment necessary in the farming operation are themselves a part of American agriculture and their living is directly dependent on a viable agricultural economy.

Twenty-five years ago, we didn't export agriculture. We ate what we grew and we exported the things that labor and management made, such as cars, radios and refrigerators. Twenty-five years later, we export agricultural products and U.S. labor no longer has the world share of the things that labor makes. Farmers, however, are not the only beneficiary of this transition. For every one dollar in agricultural products exported, the United States received \$2.05 in benefits back to this country, of which 75 percent is a direct asset to non-agricultural America. For every one billion dollar increase in agricultural exports, we create 35,000 new jobs to service agriculture and to fulfill demand for consumer goods as this money multiplies itself through every sector of the U.S. economy.

Minnesota agriculture's problems started in 1979. First, we had a trucker's strike that prohibited us from moving our products to market. Then we had a prolonged strike by the grain millers in the twin ports of Duluth and Superior that prohibited our farmers from again moving their grain into the marketing channel. President Carter invoked the now famous and proven ineffective grain embargo against the Soviet Union in January, 1980 and prices tumbled. We have been facing the same high interest rates that the rest of the country has, except that with farm prices so low, farmers have not had a choice of curtailing expansion or reducing inventories, he has been forced to borrow at these high interest rates in order just to survive. President Reagan lifted the embargo to the Soviets but held out the threat of future embargoes and banned other U.S./Soviet commercial transactions to the point that it served as a defacto embargo, encouraging the Soviets to maximize their grain and oilseed needs as well as industrial requirements from other nations.

Let's focus on the Soviet embargo for a moment. The Russians got all of the grain they needed during the embargo from other supplying countries. It is estimated to have cost them about one billion dollars more than if there had not been an embargo, but it cost our country about \$3.4 billion to keep them from buying from us and that doesn't include the \$7 billion that we lost at the producer level which was not allowed to multiply through the economy. We effectively gave away all but 20 percent of our share of the Soviet market to our competitors and these competitors are gearing up their production to meet this demand and are negotiating long-term agreements to lock in this demand for years to come. The

farmers lost \$7 billion, but the nation lost \$11.5 billion in national output, 310,000 jobs, and \$3.1 billion in personal income earned and up to \$1.9 billion in foreign exchange revenues as marketing and transportation services were stymied, and this money was also not allowed to multiply itself through the economy. And these losses continue to build as importing countries continue shifting and diversifying their sources of supply to other exporting countries so they will not be left high and dry if the U.S. finds some reason to impose export restrictions against them. Is it any wonder our state and our nation are having the economic problems that they are?

Let's put things in perspective. Last year in Minnesota, we produced 140 million bushels of wheat. A simple 25 cent downward swing in the market results in a \$35 million dollar loss to the State's economy. But prices have dropped \$1.00. In my county alone there is a loss of 12 million dollars. This is a 140 million dollar loss in revenue to our state. And this does not include the corn or soybeans or other crops that are produced in the State. Donald Wilkinson, the Governor of the Farm Credit Administration, reports that total debt in agriculture is \$200 billion. The annual interest payment of this debt is \$21 billion, but net farm income is projected to be between \$15 and \$18 billion, substantially less than the 23.3 billion dollars that it costs to run the U.S. Department of Agriculture. If we were like any other business, we would be bankrupt. In Minnesota, close to 50 percent of the gross revenue is generated by agriculture. Seventy percent of the wealth is in agriculture, but this sector is not even paying income tax. It is time to acknowledge that while twenty-five years ago, the national economy led agriculture's recovery, now with the dominant role that agriculture and agricultural exports play in the overall economy, it will be up to agriculture to lead the Nation out of its economic doldrums.

It is easy to see that a healthy non-agriculture needs a healthy agriculture. Agriculture is the Nation's number 1 industry with assets of \$1.1 trillion which is equal to 88 percent of capital assets of all manufacturing corporations in the United States. It is the Nation's number 1 employer, with one job out of every five employed in the food and fiber system. Farming alone has approximately 4.4 million workers—as many as the combined payrolls of transportation, the steel industry, and the automotive industry. The agriculture sector supports the livelihood of 8 to 9 million people involved in storing, transporting, processing and merchandizing the output of the nation's farms and around 3 million in the farm supply sector. It is the Nation's number 1 inflation fighter because American farmers are the most efficient in the world. And it is the number 1 exporter with over \$45 billion in exports in 1981, offsetting, to a large degree, the cost of oil and other imported goods.

Farmers are consumers. We spend \$13.2 billion for farm tractors, motor vehicles and machinery and equipment and it requires 150,000 workers to produce the equipment alone. This is 6.5 million tons of steel, pro-

viding jobs for 40,000 workers in the steel industry and the list goes on and on.

With so much of the U.S. economy dependent in the first instance on a viable agricultural economy, and with so much of our agricultural products exported, bringing hard currency back into the country and reducing inflation, the United States can no longer afford a "cheap food policy" as we once knew it. In a recent study for the National Association of Wheat Growers, Chase Econometrics concludes that even if the U.S. economy does recover from the current recession, a major portion of the work force which is now unemployed in the largest segment of the economy, which is the agricultural-related industries, will remain jobless unless a concerted effort is made to improve farm income and the farm support industries.

All of us . . . farmers, businessmen, factory workers, shop clerks, school teachers. . . have a common goal in seeking a strong agriculture. Farmers may have less than three percent of the population, but if you include agriculturally related business you have 25 percent of the population. If we include everyone that is directly or indirectly affected by agriculture, we should have 100 percent of the population. As the Minnesota Women for Agriculture state, "If you eat, you are involved with agriculture."

It is a myth then, that agricultural exports are harmful to the economy, that they are inflationary and cost the consumers money. It is also a myth that a profit in agriculture at the producer level is a cost or is inflationary, as compared to the benefit received by the entire economy. It is a myth that businesses and agriculture should be adversaries or that they have nothing in common. And it is a myth that we do not have the votes to achieve our goals, but to do so, everyone directly and indirectly involved in agriculture has to pull together.

We are asking your help then, in any way that you can, to educate the urban population that they too have a vested interest in seeing a viable U.S. and Minnesota agricultural economy. We ask your help in explaining to other elected officials that a strong and viable agriculture is one of the best economic recovery programs that this state and nation can ever ask for. That investments in agriculture should be considered as investments that bear returns to all segments of the economy, not just as expenses. That programs and regulations that suppress agriculture and limit its growth and well being suppress and limit the growth of the entire economy, farm and non-farm alike. As agriculture goes, so goes America and so goes each of you in this room. ●

ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, do I understand correctly that if the Senate stands in adjournment this evening there will be no matters come over under the rule on Monday?

The PRESIDING OFFICER. The Senator is correct.

ADJOURNMENT UNTIL MONDAY,
AUGUST 16, 1982

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate stand in adjournment until 12 noon Monday.

There being no objection, at 7:35 p.m., the Senate adjourned until Monday, August 16, 1982, at 12 noon.

NOMINATIONS

Executive nominations received by the Senate August 13, 1982:

DEPARTMENT OF STATE

James L. Buckley, of Connecticut, to be Counselor of the Department of State, vice Robert Carl McFarlane.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

William Arthur Webb, of Pennsylvania, to be Member of the Equal Employment Opportunity Commission for the term expiring July 1, 1987, vice J. Clay Smith, Jr., term expired.

IN THE AIR FORCE

The following-named officer under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Lt. Gen. Philip C. Gast, xxx-xx-xxxx FR, U.S. Air Force.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Alexander M. Weyand, xxx-xx-x... U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Lt. Gen. LaVern E. Weber, xxx-xx-xxxx Army of the United States.

IN THE NAVY

The following-named officer under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be admiral

Vice Adm. Wesley L. McDonald, xxx-xx-x... -1310, U.S. Navy.

EXTENSIONS OF REMARKS

ALFRED M. LENTO, "CITIZEN OF MERIT"

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. GAYDOS. Mr. Speaker, in every society there are those who see where a crowd is going and follow it. There are others who step in front of it.

Those are the leaders. The movers, the shakers, the people who make things happen for other people.

Nationally and internationally, such individuals receive widespread recognition for their efforts and accomplishments. Locally, such contributions often go unnoticed.

That is not the case, however, in Bethel Park, Pa., where on August 9, 1982, borough officials formally commended a man—Alfred M. Lento—for his work in promoting the future industrial development and economic growth of the community. He was duly recognized as a "Citizen of Merit" by Mayor Reno Virgili during a ceremony in the municipal building.

Specifically, Mr. Lento was cited for his record of civic service and for convincing county, State, and Federal authorities of the viability for industrial progress in the borough. His efforts, the borough council noted, opened the door for business expansion and stimulated job opportunities in a variety of fields.

His success in the endeavor can be traced to the interest and activity of the Bethel Park Industrial Association, an organization of 94 firms which Mr. Lento welded together in a common bond and which he now serves as chairman.

Mr. Lento was highly qualified to lead the association. He is a man who believes success comes in "cans," failures in "can'ts." He is a businessman in his own right, heading a steel fabricating company employing 40 people and the spearhead of an effort to develop a multi-million-dollar shopping center project that ultimately will provide another 200 jobs in the borough.

His ability to perceive future possibilities has long been recognized by his peers. Mr. Lento has been a member of the borough's zoning and planning board for 5 years and currently fills the position of chairman. He also is secretary-treasurer of the Allegheny County Redevelopment Authority and twice has been honored by that organization for his achievements. The Bethel Park School District has cited

Mr. Lento for his support of its vocational-educational work-study program for students.

Mr. Lento is more than just a credit to the businessmen of Bethel Park and Allegheny County, Pa. He typifies the dedicated small businessmen of America, who believe that only in the dictionary does success come before work.

Mr. Speaker, on behalf of my colleagues in the Congress of the United States, I congratulate Mr. Lento on his meritorious award and the Bethel Park Borough Council for its recognition of his contribution to the community—and the country.●

AN ALTERNATIVE TO THE CONVENTIONAL CONSTRUCTION OF MILITARY FAMILY HOUSING

HON. FERNAND J. ST GERMAIN

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. ST GERMAIN. Mr. Speaker, I am today introducing legislation aimed at correcting a major deficiency in our current housing policy regarding our military departments. The domestic leasing authority of these departments, for every purpose including family housing, limits the term of any lease to 12 months. Moreover, existing law narrows the leasing of such housing to a small number of situations covered by very selective specific criteria.

The overall effect of these limitations has been to deny the military departments the option of long-term housing leases as an alternative to construction, even if such leasing were the most economic choice, or as it is in a number of cases, the sole practical choice.

In a number of communities, such as Norfolk, Va., and Newport, R.I., adequate suitable housing to satisfy military department needs is lacking, and cannot be overcome either through individual leasing, the various housing allowances permitted, or otherwise. Moreover, Government land for the construction of such housing is either limited or unavailable. These problems are compounded by the fact that acquisition of land for new construction is often opposed locally because such steps would have the effect of removing property from the tax rolls while increasing the local costs of necessary services such as schools, police, and fire protection.

All these problems considered, it is becoming clear that conventional con-

struction of family housing is not a practical answer in a number of cases—for either the departments or the local communities involved.

In light of this growing problem, community leaders and others in these towns and cities have been exploring the idea of legislation authorizing 25-year leases for housing as a means of overcoming the problem. Bankers, builders, the mortgage lending institutions, and others involved are of the general opinion that a 25-year lease could induce private industry to build such housing, and that a 25-year lease would be the minimum necessary for construction financing. From the viewpoint of economic understanding, study of this type of option will show that a 25-year lease can be as cost effective as conventional construction, thus offering a cost savings to both the military departments and the taxpayer.

Mr. Speaker, the legislation I introduce today has the special benefit of providing these impacted communities with a lease-form that would be "bankable" and by which the developer, along with the community could secure financing on the merit of financial commitments the military departments would be able to make.

I insert the bill in the RECORD at this point:

H.R. 6991

A bill to amend title 10, United States Code, to authorize an alternative to the conventional construction of military family housing within the United States, Puerto Rico, and Guam

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Chapter 169 of title 10, United States Code, is amended by adding at the end thereof the following new section: "§ 2833. Leases: alternative to the conventional construction of military family housing within the United States, Puerto Rico, and Guam

(a) Notwithstanding 31 USC 665, 41 USC 11, and 10 USC 2828 family housing projects within the United States, Puerto Rico, and Guam specifically authorized by law in an annual military construction authorization act, or otherwise required, may, if the Secretary of Defense determines it to be in the best interest of the government, be acquired by lease for any period not in excess of 25 years, and the costs of such leasing for any year may be paid out of annual appropriations for operation and maintenance for that year.

(b) No lease shall be made under this section for which the average estimated annual rental during the term of the lease exceeds \$250,000 until after the expiration of thirty days from the date upon which a report of the facts concerning the proposed lease is submitted to the Committees on Armed Ser-

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

vices of the Senate and House of Representatives."

(2) The table of sections at the beginning of Subchapter II of Chapter 169 of title 10, United States Code, is amended by adding at the end thereof the following new item: "2833. Leases: alternative to the conventional construction of military family housing within the United States, Puerto Rico, and Guam."

SEC. 2. The amendment made by the first section of this Act shall apply only with respect to housing units first authorized to be constructed or acquired for a fiscal year beginning after September 30, 1982.

EXPLANATION OF THE NEW PROVISION

Section 2833 adds a new provision to title 10, United States Code, to allow the Secretary of Defense to acquire family housing projects in the United States, Puerto Rico, and Guam, by lease where the cost will be covered by periodic payments over a term not to exceed 25 years. The Committee recognizes that conventional construction will be the choice in most domestic projects for the acquisition of family housing, but that from time to time it will be more economic to buy over a term, or that this will be the only available option. The legislation gives the Secretary of Defense a useful additional acquisition tool for use in those circumstances. To insure its judicious use, reporting requirements like those for overseas leases are included in the new provision. Thus family housing projects at any location within or without the United States may now be acquired through leases up to 25 years, provided the Secretary of Defense determines that it is in the government's interest to do so, and the Committees have the opportunity to review the terms of the transaction and the circumstances under which the alternative is to be applied. The Committee wishes to emphasize that, as noted above, this is an option to conventional construction of projects, and that this new provision is independent of and not intended to bear on or be encumbered by the domestic leasing program for individual or groups of units already in being that may be leased under 10 USC 2828.

THE LAST BEST CHANCE FOR HOUSING

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. WYDEN. Mr. Speaker, less than a month ago, my colleagues DICK GERHARDT, BARBER CONABLE, and I made a joint statement introducing H.R. 6781, the Residential Mortgage Investment Act of 1982.

This bill represents a marketplace solution to the most pressing problem facing the beleaguered housing industry today: a severe shortage of affordable mortgage capital.

It is designed to eliminate the unnecessary regulatory impediments that have discouraged private pension fund managers—who control a vast \$300 billion pool of capital—from investing in housing and mortgage-backed securities.

By removing these regulatory obstacles, which apply exclusively to investments in housing, H.R. 6781 will open up billions of dollars of new capital for the capital-starved housing market. This in turn is bound to create downward pressure on mortgage interest rates.

Our bill has quickly attracted a tremendous amount of support on both sides of the aisle. More than 220 of our colleagues have agreed to cosponsor H.R. 6781.

It is heartening to those who fought a valiant but ultimately unsuccessful battle for emergency housing stimulus legislation to know that a majority of the House agrees with us that there is still time to pass a major housing bill in this Congress.

We have been calling our bill the "no-cost," "no-subsidy housing" bill because it contains no hidden subsidies and will not cost the taxpayers 1 cent.

All our bill does is implement a key recommendation of the President's Commission on Housing by allowing mortgages and mortgage-backed securities to compete for the attention of pension fund managers on an equal footing with other prudent investment options.

We believe that mortgages are not second-class investments and that there is no sound economic reason for treating them as second-class investments. Real estate investments are sound, safe, and fully collateralized.

Because of unprecedented financing costs, less than 5 percent of American families can afford to buy a new home and unemployment in the construction industry is twice the national average.

We must not shrug our shoulders and say that there is nothing we can do to come to the rescue of home buyers and homebuilders.

We cannot turn our backs on the millions of Americans who have been denied the American dream of homeownership.

We cannot turn our backs on the thousands of carpenters and builders who have been thrown out of work in the wake of the worst housing slump in more than 40 years.

More than 220 of our colleagues do not want to go home this year until we have done something for the beleaguered housing industry.

I urge my colleagues who have not yet signed on to H.R. 6781 to join us immediately and I urge all Members to enthusiastically support quick action and passage of this vital piece of legislation. ●

YEAREND SPENDING SPREES

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. COELHO. Mr. Speaker, yesterday I introduced H.R. 6970, legislation designed to prevent yearend spending sprees of Government agencies. The language is identical to that approved as part of H.R. 4717 in the 96th Congress by the Committee on Government Operations. Regrettably, H.R. 4717 did not see action on the House floor despite committee approval.

In its June 28, 1982, issue, U.S. News & World Report reported that key bureaucrats were being warned to stay on the job in August and September to "make sure they spend all their allotted money before the Government's fiscal year ends on September 30."

It appears we in Congress have been so caught up in the budget debate for the past 2 years that this issue just has not received the attention it deserves.

Mr. Speaker, for the convenience of my colleagues who may wish to cosponsor the bill with me, I include at this point in the RECORD the text of H.R. 6970.

H.R. 6970

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) no department or independent agency of the executive branch shall obligate, during the last two calendar months of fiscal year 1983, 1984, or 1985, more than 20 percent of its total controllable budgetary resources (determined in accordance with subsection (e)(2)) for such fiscal year.

(b)(1) The Director may authorize a waiver for any agency from the requirements of subsection (a)—

(A) if and to the extent the Director determines necessary to assure that a serious disruption in the execution of any of the agency's programs or operations would occur in the absence of such waiver, and

(B) if the Director has submitted a written report on such waiver to the Congress as early as practicable and before the agency involved has obligated an amount which exceeds the 20-percent requirement in subsection (a).

(2) Nothing in this subsection shall be construed to authorize the Director to authorize a waiver of any requirement of any provision of law which is similar or comparable to subsection (a).

(c) The head of each department and independent agency of the executive branch shall submit a report to the President and the Congress not later than 90 days after the close of each of the fiscal years 1983, 1984, and 1985 describing such department's or agency's compliance with subsection (a)(2). Each such report shall specify the total controllable budgetary resources for such fiscal year (determined in accordance with subsection (e)(2)) and the amount of such resources obligated in the last two calendar months of such fiscal year. In the event that the resources so obligated in such months exceeds 20 percent of such

total resources, such report shall contain an explanation of the reasons for the failure to comply with the requirements of subsection (a)(2) and identify any authorization for a departure from such requirements obtained from the Director of the Office of Management and Budget.

(d)(1) In exercising the apportionment authority under section 3679 of the Revised Statutes (31 U.S.C. 665) for the fiscal years ending on September 30 of 1983, 1984, and 1985, the Director of the Office and Management and Budget may apportion annual appropriations and set aside reserves in a manner consistent with the purposes and requirements of this section.

(2) Any reserves established or other actions taken in connection with the apportionment process for the purpose of satisfying the requirements of paragraph (1) of this subsection shall be exempt from the last sentence of section 3679(c)(2) of the Revised Statutes (31 U.S.C. 665(c)(2)) and from section 1012(a) and 1013(a) of the Impoundment Control Act of 1974 (31 U.S.C. 1402(a), 1403(a)). Nothing in this section affects the authority of the Comptroller General under section 1015 of such Act (31 U.S.C. 1405) to report a reserve or deferral to the Congress if he concludes that the reserve or deferral is not exempt under this paragraph.

(e) For the purposes of this section—

(1) the term "independent agency of the executive branch" includes any establishment in the executive branch which is not a component of an executive department and includes the Executive Office of the President; and

(2) the total controllable budgetary resources for a fiscal year of a department or independent agency is the sum of the amounts contained in annual appropriations for that department or independent agency for that fiscal year excluding—

(A) any amount contained in an appropriation Act enacted after the end of the third calendar month of that fiscal year;

(B) any amount appropriated for the purpose of making payments to any person or government if, under the provision of law governing such payment, the United States is obligated to make such payment to persons or governments who meet the requirements established by such law;

(C) any amount appropriated for the purpose of any grant, subsidy, or contribution; and

(D) any amount appropriated for emergency expenditures affecting the protection of human safety or property.

SEC. 2. The provisions of the first section shall apply to any fiscal year beginning after the date of the enactment of this Act.●

PERSONAL EXPLANATION

HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. CLINGER. Mr. Speaker, on August 12, 1982, I was absent from the floor of the House for a vote. Had I been present, I would have voted in the following fashion:

Rollcall No. 272: H.R. 5595, Federal Payment to the District of Columbia, the House agreed to an amendment that requires at least \$14.3 million of the funds provided by the bill be used to eliminate any deficits in

EXTENSIONS OF REMARKS

the D.C. Teachers' and Police Officers' and Firefighters' Retirement Funds, "no."●

**BLOOMFIELD HILLS, MICH.,
MARKS 50TH ANNIVERSARY**

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. BROOMFIELD. Mr. Speaker, this Sunday, August 15, marks the 50th anniversary of the beautiful city of Bloomfield Hills, Mich. As the Representative of the people of that city, I am honored to recognize this grand occasion.

In 1927, Bloomfield Hills separated from Bloomfield Township to incorporate into the Village of Bloomfield Hills. At that time there were about 1,100 people living in Bloomfield Hills. Then, in 1932, the village became the city. Gov. Wilber M. Brucker approved the charter of August 15.

The city of Bloomfield Hills is not large, just under 5 square miles. It is a comfortable, charming community of about 4,000 people. There are no industrial properties and only a relatively few commercial establishments and small businesses.

Stately Woodward Avenue runs through the center of Bloomfield Hills. Most of the city, however, is transected by shaded, residential streets and lanes.

Bloomfield is known for its beautiful homes, large, wooded lots, and lovely neighborhoods. The Honorable George Romney, former Governor of the State of Michigan, could capably attest to the city's ideal setting, since he is himself a resident.

Bloomfield Hills is known as the home for the very highly regarded preparatory school of Cranbrook. Cranbrook is a private educational institution made up of six facilities occupying 300 acres of impressively landscaped property that includes a small lake. The site was donated by the late George G. Booth and his wife, Ellen Scripps Booth. Since its founding, Cranbrook had developed a well-earned reputation for academic excellence.

The 50th anniversary of this small but prominent city is truly a great event. I am very proud to represent the city of Bloomfield Hills and its citizens, and it is a great honor to rise in recognition of this important occasion.●

August 13, 1982

**GAO ASKED TO STUDY
FISHERIES QUOTAS**

HON. LES AU COIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. AU COIN. Mr. Speaker, fishermen along the coast of Oregon have been engaged this summer in a controversy centering on the salmon seasons set by the Pacific Fisheries Management Council and the Oregon Fish and Wildlife Commission. As anyone who is familiar with the fishing industry knows, these management agencies have the authority under the Magnuson Fishery Conservation and Management Act to regulate fishing.

The Pacific Fisheries Management Council establishes quotas, the maximum number of fish which can be harvested without depleting the resource. Quotas for salmon are based on the Oregon production index, which is developed by the Oregon Department of Fish and Wildlife to indicate the availability of the resource in the Oregon production area. For years, fishermen have contended that this index is faulty.

This year, the use of the Oregon production index has produced the shortest commercial fishing seasons for coho on record: Fishing between Leadbetter Point, Wash., and Cape Falcon, Oreg., lasted 8 days and fishing between Cape Falcon and Cape Blanco was stopped after 12 days. On top of that, confidence was strained further by three announcements within 1½ weeks that changed various seasons. One of which by the Department of Commerce was a complete flip-flop which closed and reopened the season within a span of 3 hours.

Recent flip-flops in Government decisions in setting Northwest ocean salmon seasons raise questions about the way those decisions are made. Along with my colleague from Iowa Mr. SMITH, the chairman of the Appropriations subcommittee with jurisdiction over the issue, I am asking the General Accounting Office, the watchdog arm of the Congress, to do a program audit to get the answers.

Angry fishermen are saying one thing and Government fish managers another about how many fish can be caught every season. No one knows if the Government is right or if it's wrong. That is why a respected third party needs to come in, sort out the confusion, and produce some answers. This controversy boils up every year; it is getting worse and this latest series of on-again, off-again seasons is the last straw.

I want the General Accounting Office to study the current method of establishing fisheries quotas and de-

termine if these methods are sound scientifically.

Insert my letter to the GAO at this point in the RECORD.

The letter follows:

HOUSE OF REPRESENTATIVES,

Washington, D.C., July 30, 1982.

HON. CHARLES BOWSER,
General Accounting Office,
Washington, D.C.

DEAR MR. BOWSER: Since the Magnuson Fishery Conservation and Management Act became law in 1976, fishing has been under the close scrutiny of the federal government. The MFCMA established the Fishery Conservation Zone and set up Fishery Management Councils which have the responsibility of writing a management plan governing the Fishery Conservation Zone.

The goals of a fishery management plan include preventing overfishing and allowing a certain amount of salmon to survive the ocean season. The Councils not only assess the availability of the resource but they also determine the number of fish which can be harvested without depleting the resource. Almost from the beginning, however, there has been raging controversy over the reliability of government estimates which lead to the management of seasons and fish harvests.

This controversy reached new heights in the Pacific Fisheries Management Council area this year when the National Marine Fisheries Service, at the direction of the Secretary of Commerce, announced the closure of all commercial and sports salmon fishing in federal waters and hours later reversed that decision. Such rapid alternation of policy do nothing to enhance the credibility of the management process.

Meanwhile, the economic stakes for both commercial and recreational fishing are enormous. The commercial and sports fishing seasons have been drastically cut-back on a yearly basis. In the last year, a cut of approximately fifty percent occurred, leading more fishermen to give up the only livelihood they know. Their families' futures are being determined by government estimates which may, or may not be accurate. No one knows for sure.

Such economic stakes put a premium on the accuracy of the data base and estimates which management agencies use to govern the fish harvests. It is necessary, therefore, to get to the bottom of the controversy so that Congress can be confident that management of the Fishery Conservation Zone is scientifically and biologically sound.

In the Pacific Fisheries Management Council region, the component of the management plan which seems to cause the most serious difficulty is the method of determining the quota of fish to be harvested by both commercial and recreational fishermen. The quotas are based on the "Oregon Production Index," an indicator of the number of fish available in the Oregon production area. The quotas have come under great criticism this year for being too low.

There is real doubt among the fishermen as to the accuracy of the OPI. A major factor in the OPI is the rate of fish escape. Placing the greatest importance on the number of immature fish, as the OPI does, disregards many other important impacts upon fish runs. Fishermen strongly believe that many other variables are involved. They often report actual sightings of fish which are larger than the OPI indicates.

A third factor is that not all of the fish are tagged. A tag indicates where the fish comes from, be it Oregon, Washington or Canada. Fishermen simply do not know whose fish they're catching.

Something needs to be done now to determine if there is a more accurate way of determining the Oregon Production Index and the quota. Fishermen just can't survive much longer if their seasons will be cut short every year and the fishermen and the management people need to stop arguing with each other and start working together.

There has absolutely been enough controversy questioning the accuracy of the methods used in determining the OPI. It is time for a solution. I am sure that no one would object to a shortened fishing season, if indeed, the resource would be as seriously depleted as the OPI indicates.

Commercial fishermen are rapidly going out of business. Last year, over 8,400 fishermen held a commercial license in Oregon. This year, 400 of those gave up.

A charterboat businessman in my district is losing over 45% of his total gross income because of the uncertainty in not knowing exactly how long the season will last. This particular business will probably lose 600 bookings in the month of August alone. Last year, he grossed \$65,000 during that month. I'm sure his income won't be as high this year.

Because answers must be found now, we are requesting that the General Accounting Office study the current method of establishing fishing quotas and determine if there are any alternative ways to determine a quota more accurately.

A review by an independent agency is needed to assess the entire problem. Fishermen, management people, and policymakers need to rely on an impartial study to make their decisions.

Thank you for your cooperation. I look forward to hearing from you.

With warm regards.

Sincerely,

LES AU COIN,
Member of Congress.

TRIBUTE TO JACK BINGHAM

HON. PHILLIP BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. PHILLIP BURTON. Mr. Speaker, I was saddened and disheartened when I heard of the retirement of my dear friend and ally, JACK BINGHAM. I have served with JACK for many, many years. He has been an invaluable member of the Interior Committee during our many fights to preserve this Nation's environment. The significance of his leadership role in specific successful efforts to preserve our Nation's heritage are highlighted by his contributions as:

First, a key leader in the successful effort to establish a \$725 million addition to our Nation's urban park and recreation areas.

Second, a key collaborator with our former colleague William Fitz Ryan in the establishment and strengthening of the Gateway National Recreation Area.

Third, a key leader in the establishment of the Women's Rights National Historic Site in Seneca Falls.

These are but a few of his innumerable achievements in preserving our environment for now and the generations to come.

I have often turned to JACK in his capacity as a senior member of the Foreign Affairs Committee for insight on our Nation's foreign policy and most recently he has been in the forefront of the nuclear freeze movement.

But he is no newcomer to the major policy fights in this institution. JACK and I were part of a small group of Members who began the long struggle to end this Nation's involvement in Vietnam. I will always remember JACK's dedication and courage in what was, at first, a lonely fight.

I am dismayed that he leaves because of the vagaries of reapportionment. My wife, Sala, and I will miss JACK and June BINGHAM and we wish them well in the future.●

A TRIBUTE TO MRS. CECILIA DUMKE

HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. RUSSO. Mr. Speaker, today, I would like to pay special tribute to a truly outstanding and beloved woman from my district on the occasion of her 90th birthday. Mrs. Cecilia Dumke, of Oak Lawn, has been a source of inspiration to all those whose lives she has touched through her examples of strength, determination, and accomplishments.

This beautiful lady, weighing less than 90 pounds, possesses the boundless energy of a teenager, the relentless drive of a bulldozer, the indomitable courage and optimism of a missionary. She has lived her life as a prime exponent of "positive mental attitude" long before that phrase became a popular slogan. If a successful life is measured in terms of achievement, love, and respect then Cell Dumke must be acknowledged as a resounding success.

Cell, as she is known to her countless friends, was born in Chicago, August 19, 1892. She married, making her home on the South Side where she gave birth to two children, Fred and Lucille. Though only of modest means, she still managed to open her heart and her home to encompass another daughter, Marie, into her family circle.

When her son was not quite 1 year old, he contacted polio, which resulted in the loss of the use of his legs. With uncompromising pride, guidance, and abundant love, she was determined Fred would not surrender to his handicap. She prodded him, encouraged

him, and imbued in him a spirit that would not accept defeat or give in to a mere physical impairment. Her favorite rallying cry was, "You can do it—of course you can." One day, returning from work, she noticed Fred on his crutches watching on the sidelines as the neighborhood kids played sandlot ball. She scolded him, "Why aren't you playing?" She ordered him up to the plate with the words, "You hit the ball, your sister will run for you"—and hit it, he did.

She never let Fred ever think he could not do everything he wanted to. Fred left his special school as a teen and enrolled as a regular student at Parker High School with Cell adamantly insisting to school officials he could do it. He did. Fred Dumke went on to a successful career in business and then achieved an outstanding record in municipal government as a trustee and, finally, as mayor of Oak Lawn the second largest village in Illinois.

During the devastating tornado that ripped Oak Lawn in 1967, Mayor Dumke's dynamic leadership was acknowledged by the media as being a primary factor in the village's swift recovery. Reporters following the ubiquitous mayor around the stricken village were amazed at his energy and command of the situation. One reporter commented, "He's everywhere—you forget he is on crutches". Cell had done her job well.

Even though she had three children to raise, alone, and held a full-time job as a clerk. She still devoted time and energy to many projects which benefited handicapped children. For many years, Kiwanis, Lions, and the Veterans of Foreign Wars recognized Cell as one of their most dedicated and tireless volunteers.

For the past 25 years, she has been the leading volunteer for the Kiwanis Club's Peanut Day. Dubbed for the "Peanut Queen", she takes her post at 95th and Cicero—the busiest intersection in the village—at 5:30 a.m. and works till dusk and no one dare move into Cell's territory. Needless to say, she has been No. 1 in sales since she began. Her efforts have been instrumental in helping fund the Kiwanis camp in Plymouth, Ind., Garden School, Park Lawn, and Arrow School.

She has adopted Park Lawn School in Oak Lawn as her very special project. Through her efforts, she has succeeded in raising over \$125,000 for the benefit of this school for special children. She has supplied the energy and the driving force behind many endeavors—her annual birthday party, fireman's concert, and raffles all for the benefit of her kids at Park Lawn. She is at present undertaking a new goal to raise funds for Park Lawn's new residence which will open in October.

This valiant lady has had her share of setbacks and sorrows, but she pos-

sesses the resiliency and inner strength of a willow tree bending temporarily to the wind, but always coming back strong and upright again.

This spirited lady has given so much to her family, her friends, and her community. She has set a standard of excellence in every task she has undertaken which will be difficult for anyone to equal. I know my colleagues join me in sending most sincere wishes to Cell Dumke to have the best birthday ever and keep having many more.

You can do it—of course you can.●

A TRIBUTE TO CONGRESSMAN JONATHAN BINGHAM

HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 10, 1982

● Mr. MITCHELL of Maryland. Mr. Speaker, I am proud to join my colleagues in saluting Representative JONATHAN BINGHAM, who will be retiring at the coming election. Congressman BINGHAM has served in this House since 1964 and his dedication to various committee assignments and unending constituent services has resulted in overwhelming endorsement term after term.

Congressman BINGHAM's impressive record of service has prevailed during his tenure as chairman of the House Foreign Affairs Committee's Subcommittee on International Economic Policy and Trade. At the same time Mr. BINGHAM has served on the International Security Subcommittee.

These priorities notwithstanding, JONATHAN BINGHAM continues as a member of the Interior and Insular Affairs Committee, with assignments on the Subcommittees on Energy and the Environment, and National Parks and Insular Affairs. Lastly, this Congressman remains a member of the Commission on Security and Cooperation in Europe, which monitors the Helsinki accords, and serves on the steering committee of the Northeast-Midwest Congressional Coalition.

While we can always review the litany of activities in which such esteemed Representatives as JACK BINGHAM are involved, we must also remember that after so many years of these strenuous pursuits, our colleagues may wish to devote time to other personal or professional projects. I am confident that we will continue to hear from Representative BINGHAM through community involvement, literary pursuits, and lectures. Knowing this helps us all to accept this loss of our dear colleague.

Again, I am proud to join my colleagues in wishing JONATHAN BINGHAM the very best.●

TRIBUTE TO JACK GRIFFIS

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. DYMALLY. Mr. Speaker, with a mixture of pride and sadness, I rise to pay tribute to a fine man and a good friend. Jack Griffis, who passed away last month, was a model citizen whose dedication and spirit we would all do well to emulate.

For 25 years, Jack made his home in Gardena, Calif., and for 25 years, he served his community actively, faithfully, and responsibly. Affiliated with a legion of organizations, many of them charitable, Jack was especially well-known throughout his community for his many benevolent works.

Not a man to sit idly by, content with the status quo, Jack was always willing to speak up for what he felt was right. This determination and this loyalty to cause were readily visible during Jack's tenure as president of the Gardena Valley Democratic Club and through his work on the Gardena Citizens Advisory Committee.

Perhaps the greatest testament to Jack Griffis' unswerving integrity is the fact that he was able to secure the respect and admiration of even his political opponents.

The community that presented Jack Griffis with a "Resolution of Commendation" for "invaluable and devoted service" in January of 1982 will miss this man very much.

I, to, will miss this man who so well embodied the classically American values of leadership, integrity, good will, and perseverance.

Because strong communities ultimately add up to a strong nation, Jack Griffis' achievements serve as a meaningful legacy not only for members of his own community, but for all Americans who desire to actively participate in sustaining and improving upon the greatness of their country.●

BUSINESS—LABOR-BACKED PROGRAM SUCCEEDS IN WAUKESHA

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. ZABLOCKI. Mr. Speaker, in these difficult economic times, our unemployed workers are facing enormous problems in making ends meet. Meeting simple household expenses and food bills are difficulties that must be confronted on a daily basis. I am pleased to say that one project in my own area of Waukesha, soon to become part of the Fourth District of

Wisconsin which I have the honor of representing, is successfully offering discounts to unemployed workers while helping Waukesha merchants attract business.

Mr. Speaker, the Waukesha people for unemployed people-unemployed discount program, is one of a kind. The program allows workers who can show verification of unemployment to shop at discount prices in businesses ranging from food stores to barber shops to auto repair shops. I understand that well over 60 Waukesha merchants are presently participating in this program.

The support this program has received from the Waukesha business community and the local labor unions in commendable and indicative of the fact that business and labor can work together to meet the people's needs.

I am heartened to hear that the Waukesha Chamber of Commerce, under the leadership of President Robert Heckel, and the Waukesha County Labor Council, under the leadership of President George Urban, have both endorsed this program. The help of Mr. Abel Garcia, president of the IAMAW Local 1377, has been invaluable. Without a doubt, the hard work and firm commitment of the president of the people for unemployed people-unemployed discount program, Mr. Doug Stone, has led to success on a daily basis with a firm potential for future expansion.

Mr. Speaker, I hope other communities can learn from the Waukesha experience. I am inserting in the RECORD an excellent article which appeared in the August 4, 1982, issue of the Milwaukee Journal, entitled "Waukesha Initiates Discount Program for Unemployed," by Mr. Sam Martino.

WAUKESHA INITIATES DISCOUNT PROGRAM FOR UNEMPLOYED

WAUKESHA.—Esther Johnson, a laid-off factory worker at the Waukesha Engine Division of Dresser Industries, stood at a grocery store checkout counter and displayed a small, yellow card.

The card identified Johnson to Michael La Rossa of La Rossa's Marketplace, 1800 W. St. Paul Ave., as a participant in Waukesha's unemployed discount program.

La Rossa is one of about 60 Waukesha-area merchants who have joined in offering discounts to unemployed workers like Johnson.

"Every little bit helps," said Johnson as she paid her bill of \$2.69 for a box of corn flakes, some onions and a bag of noodles. She received a 10% discount on her purchase.

"I think the program is a good idea. It gives the unemployed a break at a time when we are out of work."

La Rossa said, "They are struggling. It doesn't seem like any of the major food chains are participating. We are doing our part."

La Rossa spoke of a spirit of community involvement in wanting to help the unemployed.

John Schmitt, president of the Wisconsin AFL-CIO, said he knew of no other similar program in Wisconsin.

"I suppose if it works out in Waukesha, other cities may look at it," Schmitt said. He said the program also would help area merchants attract business.

The unemployed discount program received its start in June after laid-off workers from Waukesha Engine asked the Waukesha County Labor Council to endorse the program. The council did and enlisted support from a number of separate unions.

Laid-off union workers canvassed the city asking merchants to provide discounts to unemployed workers.

Since then the movement has slowly gained momentum.

The Common Council Tuesday night approved giving the unemployed workers a discount of 15 cents off the regular 50-cent bus fare.

The YWCA has provided unemployed workers with opportunities to sign up for recreational or craft programs without charge.

The United Way in Waukesha County has included the discount program in its recent literature on the unemployed.

"For assistance in making your dollar go further while you are unemployed, you should call or stop by the Waukesha Unemployed Discount Program," the United Way said. "You don't have to be a union member, all you need to do is provide verification of your unemployment."

Unemployed workers who provide identification from the Wisconsin Job Service or an employer that they are laid off can obtain an unemployed discount program card from the Waukesha Labor Temple at 1726 S. West Ave.

NOT JUST UNION MEMBERS

Doug Stone, coordinator of the program said about 20% of the 600 people who had registered for the unemployment discount program cards were not union members.

"The non-union people have the same circumstances that the union people do. They are unemployed," Stone said.

Despite a post-World War II record unemployment rate in Waukesha County, there has not been a rush to get into the unemployed discount programs, according to Stone.

Stone said many people were embarrassed to seek help.

However, Stone said, "this is not charity. In good times we will do business at these businesses."

Paul Bower, recording secretary of Local 3740 of the Steelworkers Union at International Harvester, said many laidoff workers from Waukesha industries did not live in Waukesha.

He said many of the workers were from Milwaukee and other suburbs and were unable to take advantage of the discount program unless they drove miles into Waukesha.

Stone said he was hoping that the program would expand to merchants throughout Waukesha County.

SMALL SAVINGS HELP

At an automotive parts store, John Dietz, manager of Automotive Specialists of Wisconsin Inc., 910 W. Sunset Dr., has entered a 20 percent discount account code into his computer.

The computer automatically figures the discount on merchandise sold to people with the unemployed discount program card.

Merchants who participate in the program have placed signs in their store windows. Some of the signs note the amount of discount provided by the merchant.

In an attempt to minimize any potential abuse in the program, laid-off workers must reapply for a discount card every two months.

The new cards will be issued Aug. 9.

Laid-off workers receive a list of merchants and professionals who offer discounts.

The list of participants includes food stores, doctors and pharmacies, hardware and lumber outlets, barber shops and beauty salons, clothing stores, shoe stores, auto repair and part stores, television repair outlets and fast-food restaurants.●

WELCOME TO NEWEST MEMBER OF AGING COMMITTEE

HON. MATTHEW J. RINALDO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. RINALDO. Mr. Speaker, since I entered Congress in 1973, I have worked closely with the gentle lady from Massachusetts, Mrs. HECKLER, whom I admire and respect, both as a colleague and a friend. Therefore, as ranking minority member of the Select Committee on Aging, I take particular pride and pleasure today in welcoming her to the committee.

I am very familiar with Mrs. HECKLER's commitment to the elderly during her 16 years in Congress, and I know that she will continue to serve older Americans with competence and vigor as a committee member.

The Congresswoman's initial activity as a member of the committee occurred this very day, when she testified at a committee hearing in Fall River, Mass. Following is the text of her testimony:

STATEMENT OF HON. MARGARET M. HECKLER BEFORE THE SELECT COMMITTEE ON AGING

As the Representative of this congressional district, I sought the opportunity to testify here today, to bear witness to my commitment to the social security system and to the retired persons who receive its OASI benefits.

Having represented this district since 1967, I have worked on behalf of scores of programs—including social security—that affect the elderly. To express my concern for those retirees subject to the "notch problem," I am a cosponsor of H. Con. Res. 222, directing the Secretary of Health and Human Services to conduct a study immediately on steps needed to correct the "notch problem," and to report such steps to Congress. Moreover, I have written to the National Commission on Social Security Reform, urging that the commission develop solutions to the problem and include them in its report—due in a few months—to Congress.

The "notch problem" is a result of H.R. 9346, the Social Security Amendments of 1977. On December 15, 1977, when this measure received final consideration from the House, the chairman of this committee, the Hon. Claude Pepper, said: "I need not remind my colleagues that this is one of the most important measures which has ever been before this House because it sustains

and insures the hope of millions of Americans, who have no other source of income in their later years except what they derive from social security."¹

Mr. Pepper voted for the final version of H.R. 9436 on December 15, 1977. So did I, because the very structure and solvency of social security was threatened. Speaker of the House "Tip" O'Neill, urging approval of the measure, described the situation in this way: "There are those of us who may happen to talk to a senior citizen. He or she is going to come up to you and say, 'What about my social security? Is it going down the drain? If you voted against this, you are going to say, 'Well, we are going to do something about this along the line.' But what a miserable Christmas that senior citizen is going to have."²

The Speaker also asserted: "I say to the Members on the Democratic side of the aisle that if I have ever seen an issue that is a Democratic issue, it is this issue."³ In my view, in terms of my vote, saving social security was a bipartisan priority.

Almost every member of the Massachusetts congressional delegation agreed that H.R. 9436 should become public law. Rep. Edward Boland agreed. Rep. Joseph Early agreed. Rep. Robert Drinan agreed. Rep. Michael Harrington agreed. Rep. Edward Markey agreed. Rep. Joe Moakley agreed. Rep. James Burke, chairman of the House Ways and Means Committee Social Security Subcommittee that developed the bill, agreed.

We agreed that social security should not go down the drain. The situation was the following, in the words of then Ways and Means Committee Chairman Al Ullman: "Unfortunately, in the last few years this huge system has developed financing problems which require the most serious and careful attention of the Congress. Starting in 1975, the system began to run annual trust fund deficits with outgo exceeding income. In 1977, the cumulative deficit in the three funds financed from the payroll tax is expected to reach \$5.6 billion. These trends have caused a loss of confidence in the system both on the part of current beneficiaries and of workers paying social security taxes who expect to receive benefits in the future. I am sure that Members of the House are aware through communications from their constituents of the fears that have been aroused."⁴

I want to state, however, that we did not all agree on inclusion of the so-called "decoupling" provision, which led to the "notch problem." For instance, in a statement I made on the House floor on October 26, 1977, on the House version of the bill, I said: "There are short-term and long-range financial problems this legislation attempts to address. I agree with some provisions; I disagree with others."⁵

¹ Pepper, Representative Claude. Statement on conference report to H.R. 9436, CONGRESSIONAL RECORD, Dec. 15, 1977, p. 38999.

² O'Neill, Representative Thomas. Statement on conference report to H.R. 9436, CONGRESSIONAL RECORD, Dec. 15, 1977, p. 39035.

³ Ibid.

⁴ Ullman, Representative Al. Statement on H.R. 9436, CONGRESSIONAL RECORD, Oct. 26, 1977, p. 35239.

⁵ Heckler, Representative Margaret. Statement on H.R. 9436, CONGRESSIONAL RECORD, Oct. 26, 1977, p. 35262.

And I want to state that there was no separate vote on the "decoupling" provision. It was included in the original Ways and Means Committee version of the bill, and members had no opportunity to indicate their approval or disapproval, except by floor statements.

Mr. Pepper, whose dedication to the elderly was and is unquestioned, was one of those members who did make a floor statement of approval on the provision. Addressing it during the December 15, 1977, debate, he said: "The 'decoupling issue' is addressed in a way that greatly reduces the projected long-range deficit in the trust funds and at the same time provides a wage-indexed formula which allows retirees to share in productivity increases in the economy over their working years and which protects those scheduled to retire in the near future from being disadvantaged because of the formula change."⁶

Those who voted for the measure—including myself—did so with the belief that the social security system had to be shored up, in order to protect the benefits of the 33 million persons—one of seven Americans—who were receiving benefit checks each month.

This measure, which became Public Law 95-216, provided short-term funding and made some structural changes by—

Raising the wage base for employers and employees in each of the years 1979 to 1982; Increasing payroll tax rates, beginning in 1979;

Shifting revenues from the retiree and survivor fund to the disability insurance fund, beginning in 1978;

Easing restrictions on outside earnings by social security recipients over age 65;

Guaranteeing pre-existing levels of benefits to persons over age 60 who marry or remarry, effective January 1979; and

Permitting persons to qualify for social security benefits based on their spouses' earnings after 10, rather than 20 years of marriage.

On the "decoupling" issue, the problem has been the transition period, under which persons born January 1, 1917, through December 31, 1921, have been discriminated against in benefit payments. This is unfair, unjust, and cruel, and I am pledged—through the Department of Health and Human Services, the National Commission on Social Security Reform, and Congress—to work to correct it.

In bearing witness to my commitment to the stability of the social security system and the continuation of its benefits to those who have worked so hard to earn them, I believe that this hearing should be a forum for the truth. The truth is that those who voted for H.R. 9436 were dedicated to saving the system. As Mr. Pepper said, "If the word goes out at the end of this day that, notwithstanding the Senate passing the bill by an overwhelming majority, the House of Representatives defeated it, a wave of fear will sweep through the hearts of every one of those Americans wondering about the future solvency and soundness of our social security funds which are the sole source of livelihood for very many of those people."⁷

⁶ Pepper, Representative Claude. Statement on conference report to H.R. 9436, CONGRESSIONAL RECORD, Dec. 15, 1977, p. 39026.

⁷ Pepper, Representative Claude. Statement on conference report to H.R. 9436, CONGRESSIONAL RECORD, Dec. 15, 1977, p. 39015.

He also said, and this hearing highlights his words: "The bill does not do everything the elderly would like to have it do. It is not perfect in terms of the taxes that it provides. But we have the future ahead of us, if we keep the funds sound, to improve it from the tax point of view and from the viewpoint of the recipients."⁸

It is unfair to him, to me, and to the other members who voted for the measure, to brand us as anti-social security, as anti-elderly, when in fact we were the champions of older Americans. As champions, we must move forward, to keep the funds sound and to improve them, particularly in terms of equity for those who suffer from the "notch."⁹

PERSONAL EXPLANATION

HON. ROBERT W. DAVIS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. DAVIS. Mr. Speaker, yesterday I voted against H.R. 6846, The Wilderness Protection Act of 1982. This is not a change of heart, but an admission of error.

I inadvertently voted no on the bill to ban oil and gas leasing in our wilderness areas. Although I am opposed to additional wilderness designations, especially in my district in Michigan where over 40 percent of the land area is Government owned, I am not in favor of oil and gas drilling in those wilderness areas already designated.●

COAL SLURRY PIPELINE BREAKS: AN UNADDRESSED PROBLEM

HON. PAT WILLIAMS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. WILLIAMS of Montana. Mr. Speaker, recently, much attention has been given to the hazards and destruction caused by broken pipelines, both offshore and inland. Most of this attention has focused on oil pipeline breaks, because of the cleanup problems and their commonplace occurrence. A major rupture in a Wyoming oil line is the latest in hundreds of such breaks, this one being one of the most serious spills. There were 115 such breaks, reported in 1981 alone. I have included the Washington Post front page article of August 3, 1982, describing the break in Wyoming.

I raise this discussion today only for one reason: In all of the debate about pipeline breaks, no one has raised the question with regard to potential breaks in coal slurry pipelines. This should be a pertinent discussion, because of the recent considerations of

⁸ Ibid.

bills supporting the building of coal slurry pipelines. Any consideration of H.R. 4320, which proposed Federal eminent domain to provide the right-of-way for pipelines to carry coal slurry, must also address this recurring problem with its dangerous impact on the environment and property. Also, the contamination caused by coal slurry presents special difficulties in cleaning up, with severe damage to animal and plant life. The danger of a break, caused by heavy vehicles traversing the pipeline, is only one common source of disruption; there are land slides, earthquakes, construction activity that will necessarily occur along the hundreds of miles of projected slurry lines.

Another problem that is not addressed is responsibility for any possible pipeline breaks. It is often difficult to fix responsibility. Therefore, any legislation must address these specific hazards in advance.

The breaks usually take place in remote areas, such as the recent northern Wyoming spill. Who should investigate, who must respond to the immediate emergency, and who is responsible for the cleanup and repair of the surrounding environment? Also, if there is damage to private and public property, who is financially liable?

It is the duty of any committees drafting legislation to explore the possibility of any problems legislation might create. We must anticipate these problems and be ready in advance. These questions must be addressed well in advance. No legislation for coal slurry that overlooks the problem of a broken pipeline and the dumping of slurry should be considered. Slurry breaks are not discussed because there are not as many slurry lines as there are oil pipelines. If H.R. 4320 is enacted, I can assure you that it will become a commonplace subject, and we might someday read about just such a break on the front page of the Post. Oil in flow is not coarse and does not do damage to the pipe; slurry is just the opposite. Pipe erosion is a problem with current existing slurry lines. Spills of oil are serious, but are they any more damaging and noxious than the impact that would be caused by a spillage of coal slurry? This is a good question. I feel it is still unanswered.

**PIPELINE BREAK DUMPS CRUDE INTO
WATERWAYS**
(By Jay Mathews)

LOS ANGELES, Aug. 3—A ruptured oil pipeline has contaminated part of a reservoir, a river and a creek and threatened fish and other wildlife in northern Wyoming in one of the largest inland oil spills on record, state and federal officials said today.

Environmentalists, fighting what they see as a major threat to wilderness areas, immediately called the spill a sign of what could happen if Interior Secretary James G. Watt allowed more oil drilling in such remote areas.

"If this kind of thing can occur in such relatively flat and open land, we feel it has ominous implications for wilderness areas," said Bill Cunningham, northern Rockies representative of the Wilderness Society.

Wyoming officials said they had not yet determined the cause of the break in the 12-inch crude oil pipeline which spilled what they estimated to be more than 6,000 barrels, or about 250,000 gallons, of oil 10 miles south of Byron, Wyo.

The rupture apparently occurred during the weekend but was not discovered until yesterday morning, a common problem in remote areas. A passerby saw oil on the surface of Yellowtail Reservoir, about 20 miles east of Byron, and valves feeding the pipe were shut off, a Coast Guard official said.

A Coast Guard official sent to investigate the leak said it had not yet been determined what impact the spill had had on local wildlife but said the volume of oil lost approached the state's last major spill in 1980 into the Platte River.

The 1980 spill, apparently caused by underground telephone cable construction, killed 1,752 muskrats, 19 geese, 19 ducks and destroyed 183 goose eggs, according to the state's game and fish department.

Pete Petera of the game and fish department said the area affected by this week's spill served as a home for mink, muskrats and other fur-bearing animals who could be harmed by the oil. He said the lower Shoshone River, which received the oil spill from Whistle Creek and transported it to the reservoir, did not have many game fish.

The reservoir, however, is full of trout and walleyed pike, Petera said. Although the spill is reported to have extended only 200 yards into the flood prevention reservoir, "I don't think it's going to do the fish a danged bit of good," he said.

David Jossi, a private contractor working with the Department of Transportation in Washington, said there were 115 crude oil pipeline breaks in 1981 which spilled 578,169 barrels of the heavy oil onto American soil. Ninety-nine of the breaks were caused by construction equipment such as backhoes.

A spokesman for the state department of environmental quality said an initial report on this week's spill mentioned construction work in the area of the break. But officials from Wyoming state departments, as well as Coast Guard and Environmental Protection Agency officials, had reported no definite cause for the rupture late today as they continued to drive and fly by helicopter over the area.

A Coast Guard official said a containment boom floated across the mouth of the Shoshone River was keeping oil from spreading further into the reservoir. Another containment device was holding oil at the surface where Whistle Creek and the river meet so that the oil could be easily removed.

Officials of the Marathon Pipeline Co., which operated the pipe system, could not be reached for comment. Cunningham said pipelines laid in remote areas were dangerous not only because spills were difficult to detect but because rocky terrain made them susceptible to landslides and, in some areas, earthquakes. Jossi said transportation department figures show damage from pipeline failures in 1981 totaled about \$5.2 million.

A suit brought by Wyoming against the pipeline company involved in the 1980 spill is pending in court. A suit by the pipeline company against the telephone company on whom it blames the rupture has also not been settled. ●

**THE IDEOLOGY OF THE PEACE
MOVEMENT**

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. McDONALD. Mr. Speaker, the peace movement in the West has continuously and persistently attacked the defense policies of the Western world while playing down the imperialist nature of the Soviet system. They take time to condemn U.S. policy in Central America, yet fail to say anything of Afghanistan. Furthermore, they promote their ideas with cliches masquerading as scientific theories of Soviet behavior—theories which can only lead to more Afghanistans. Mr. Burkovsky writes:

One of the most serious mistakes of the Western peace movement and of its ideologists, is the obdurate refusal to understand the nature of the Soviet regime, and the concomitant effort to lift the question of peace out of the context of the broader problem of East-West relations.

Vladimir Bukovsky knows the Soviet system well; he suffered under their definition of peace for 12 years. In the following continuation of his penetrating article, which originally appeared in the May 1982 Commentary magazine, Mr. Bukovsky examines the propaganda versus reality of the ideologists of the peace movement.

Part II of the continuing article follows:

[From Commentary Magazine, May 1982]

**THE IDEOLOGY OF THE PEACE MOVEMENT—
PART II**

One of the most serious mistakes of the Western peace movement and of its ideologists is the obdurate refusal to understand the nature of the Soviet regime, and the concomitant effort to lift the question of peace out of the context of the broader problem of East-West relations. After several decades of listening to what they believe to be "anti-Communist propaganda," they have simply got "fed-up with it." They ascribe everything they hear about the East to a "cold-war-type brainwashing," and make no attempt to distinguish what is true from what is not. This attitude, which I can only describe as a combination of ignorance and arrogance, makes them an easy target for any pseudo-theory (or outright Soviet propaganda) that happens to be fashionable at any given moment. Besides, baffled by endless and contradictory arguments among the "specialists" about the nature of the Soviet system, the leaders of the peace movement believe they have found a "new approach" which makes the entire problem irrelevant.

A few months ago in England, I attended a public debate on the problem of unilateral disarmament. The leader of a big peace group opened his speech by saying that from his standpoint, it is irrelevant who is the aggressor and who the victim. He said: "It is like when two boys have a fight in the churchyard. It is impossible to find out who started the fight, nor is there any need to do so. What we should do is to stop them."

This metaphor reflects very well the prevailing attitude among peace-movement members. They believe they have gotten around a baffling problem, whereas they have in fact inadvertently adopted the concept of the "normal opponent." From the "churchyard" standpoint, the present conflict seems very ordinary: two bullies have become so embittered by their prolonged quarrel—in which anyway the essence of the disagreement has been lost or forgotten—that they are quite prepared to kill each other and everybody else around. They are temporarily insane, mad, but are basically normal human beings. Pride and fury will not permit them to come to their senses, unless we, the sane people around them, are prepared to intervene. Let us make them talk to one another, let us pin down their hands, let us distract them from their quarrel. We cannot, to be sure, pin down the hands of one of them. Then, in the best Christian tradition, let us make the other repent, in all good Christian humility. Let us disarm him to convince his adversary of his peaceful intentions. Let us turn the other cheek. Sooner or later the other will come to feel ashamed.

This view sums up exactly what I mean by a combination of ignorance and arrogance. Indeed, if we look upon the world from the "churchyard" standpoint, there probably is no need to find out who is the aggressor and who the victim. There is no need for police or armed forces. All we can see is a row of graves with the dead lying orderly in them and a couple of children quarreling with each other. Unfortunately, outside the church walls there is a bigger and far more dangerous world with gangsters, murderers, rapists, and other perverse characters.

Needless to say, this churchyard model simply does not merit serious consideration. Unfortunately, it is a widespread belief (and not only within the peace movement) that the Soviet government, like any other government, is preoccupied with the well-being of its people, and will therefore be eager to reduce military expenditures. This notion comes so naturally to our peace-makers that they just do not notice they have taken on a view of the Soviet system which is both very old and unquestionably wrong. If they only took the trouble to study a little Soviet history, they would know immediately how misleading this seemingly natural view is. Not only are the Soviet rulers indifferent to the living condition of their populace, they deliberately keep it low; on the other hand, disarmament (irrespective of the problem of well-being) would lead very rapidly to the collapse of the Soviet empire.

Normally we try to understand an opponent by taking his place, getting into his shoes, so to speak. That is why most people try to explain Soviet behavior in terms of "normal human motives," that is, by motives familiar to them. And that is exactly why they constantly pile one mistake upon another. For it is extremely difficult for a "normal" human being to put himself inside the skin of a mentally ill one. It is almost as in nature itself: when we test natural phenomena under extreme conditions, we suddenly find some unpredictable anomaly that is baffling to us. Logic itself becomes abnormal in certain extreme cases. If we add up two numbers, say, or multiply or divide them, we invariably obtain a new number. But if we use zero or infinity our whole rule suddenly goes wrong.

But let us take an example relevant to the present discussion. Let us take the key question: why is the Soviet Union so aggressive,

so eager to expand? We see how many schools of thought there are among those studying the problem (and we see, too, how all of them are wrong).

There are some people who believe that the present Soviet expansionism is just a continuation of the Russian pre-revolutionary colonial policy. In other words, it is a bad legacy. Indeed, this notion about Soviet expansionism was the dominant one for a very long time—and still is in some quarters. In line with it, there have been repeated attempts to offer the Soviets a division of the world into spheres of influence. We owe to it the Yalta agreement, the Potsdam agreement, and assorted other disasters. Each time the Soviets have accepted the division into spheres of influence, and each time they have violated it. Is this because they need more mineral resources, more territory, a wider market for their goods? No. Their own territory is undeveloped, their own mineral resources are in the earth, they do not have enough goods for their own internal market. There are no useful mineral deposits in Cuba or Afghanistan. There is no Russian national interest in Angola or Vietnam. In fact, these new "colonies" cost the Soviet people many millions of dollars a day apiece. So, Soviet policy is no classical case of colonialism.

Then there is another theory, far more pernicious because much more widely accepted and because to reject it one needs a real knowledge of Soviet life. I mean the theory according to which Soviet aggressiveness is the result of the fear of hostile encirclement. The proponents of this theory argue that Russian history, particularly the history of repeated invasions of Russian territory within the last century, has made the Russian people almost paranoid about an external threat.

This theory sounds very scientific because many facts may be cited to back it up. Still, it is no more than a shrewd combination of obvious lies, wrong interpretations, and very perfunctory knowledge. It is mainly based on an overestimation of the importance of history for any given nation and on an oversimplification of the Soviet system.

To begin with, there is an obvious lie in this theory—that is, a deliberate confusion between the people and the government in the USSR. Those who know the Soviet system only moderately well may still need to be reminded that the people have no privilege of representation in the government—that is, have no free elections. Thus, the government does not reflect the feelings of the population. So if we are to believe that the population is frightened by the long history of invasions, the government has no reason to share these fears. The Soviet government, with its vast and omnipresent intelligence system, is extremely well-informed about every move and every smallest intention of the West (anyway not very difficult to achieve in view of the remarkable openness of Western societies). By 1978-79, when their arms build-up was at a high pitch, whom were they supposed to be so afraid of? Their great friend, the French President Giscard? Or their even better friend in West Germany, Willy Brandt? Britain, with its puny armed forces (and on-going discussion on unilateral disarmament), or perhaps Nixon and Carter, who between them shelved all the major armament programs? Japan, which has no army at all?

Clearly the Soviet government had no reason to be frightened. In fact, the theory of Soviet paranoia does not imply a fright-

ened government, but rather a frightened nation. In a "normal" country this might drive the government to become aggressive. But in the Soviet Union the people mean nothing and have no way of pressuring their government to do anything. They would not be allowed to voice any fears. So, who is so frightened in the Soviet Union? Besides, as far as the rules are concerned, their own experience of war, World War II, could not frighten them for a very simple reason: they won the war. Can you show me any victorious general who is so afraid of war as to become paranoid? The psychology of Soviet rulers is in any case totally different.

One need only look at a map of the world to see how ridiculous this theory is. Can we honestly believe that the poor Communists in the Kremlin are so frightened that they must protect themselves by sending their troops to Cuba and Cuban troops to Angola? By sending military equipment and advisers to Ethiopia and Vietnam and then by sending Vietnamese troops to Kampuchea? Take another look at that map: it is not at all obvious that the U.S.S.R. is encircled by hostile powers. Rather the other way around: it is the Western world that is encircled by the hostile hordes of the Communists. Well, if their paranoia can be satisfied only by surrendering the whole world to their control, what difference can it make to us whether they act out of fear or out of endemic aggressiveness?

Finally, and most importantly for an understanding of this pernicious theory, is the fact that it was invented by the Kremlin propaganda experts. It was very successfully exploited in the years of détente, when Western governments, acting under its influence, deliberately permitted the Soviets to achieve military superiority. They would probably deny it now, but I remember very well the discussions of that period. The argument of the ideologists of détente was that once the Soviets caught up, they would relax; this would in turn lead to the internal as well as external relaxation of the Communist regime, i.e., to liberalization. The results of this brilliant experiment we can see now.

The Soviet population, too, has been subjected, day after day for sixty-five years, to an intense propaganda campaign about this putative "hostile encirclement." The Communist rulers unscrupulously exploit the tragedy of the Soviet people in World War II for the purpose of justifying both their oppressive regime and their monstrous military spending. They try their best to instill into the people a pathological fear of the "capitalist world." Fortunately, the people are sane enough to laugh at the very idea. Thus, contrary to this theory, there is no paranoid population demanding to be protected in the Soviet Union, despite the best efforts of a perfectly sober and cruel government.

No, it is not the fear of invasion or a World War II hangover that has driven the Soviet rulers to wage an undeclared war against the whole world for half a century now. It is their commitment—repeated quite openly every five years at each Party Congress since the beginning of this century—to support the "forces of progress and socialism," to support "liberation movements," everywhere on the globe.●

THE WILDERNESS PROTECTION
ACT OF 1982

HON. MIKE SYNAR

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. SYNAR. Mr. Speaker, yesterday the House of Representatives voted 340 to 58 to pass H.R. 6542, the Wilderness Protection Act of 1982. I opposed several provisions of this legislation, and I wanted to take this opportunity to outline my reasons for voting "no" on final passage of the bill.

DESIGNATED WILDERNESS AREAS

I first want to emphasize that I strongly support the goal of permanently withdrawing designated wilderness areas from resource development and commercial activities. Moreover, the American public clearly supports this action as well.

When Congress enacted the Wilderness Act in 1964, its purpose was to set aside for the enjoyment of our citizens and future generations certain pristine areas of our Nation. While the goal was to maintain areas "untrammeled by man," in fact, the same legislation provided for some mineral leasing in the wilderness areas through 1983. Needless to say, these conflicting goals have given rise to repeated controversy since 1964. Most pointedly, the current administration has acted in a manner which was disturbed many and I am certain that yesterday's overwhelming vote was, in large part, a reaction to those excesses.

Mr. Speaker, I believe that reaction, though understandable, was itself excessive.

If Congress is serious about protecting the pristine nature of these areas, then we should and must close designated wilderness areas to commercial activities and resource development of all kinds. But, our approach should be to study carefully, move cautiously and choose wisely.

Once chosen, designated wilderness areas should be withdrawn from development in perpetuity for the benefit of the American people. To do otherwise is to make a mockery of our stated intention to preserve lands "untrammeled by man."

H.R. 6542 withdraws designated wilderness areas from oil, gas, shale oil, coal, phosphate, potassium, sulphur, gilsonite, and geothermal leasing. However, it permits mining of so-called strategic minerals in those same wilderness areas.

The assumption seems to be that these minerals are somehow more strategic to the United States than is petroleum, and that mining activities related to strategic mineral development is somehow less disruptive in wilderness areas than is the production of oil and gas. In my opinion, neither assumption is valid.

EXTENSIONS OF REMARKS

I believe the Interior Committee has erred in allowing mineral development activities of one sort—but not others—to proceed. If it is the will of the American people and the Congress to close wilderness areas, then they should be closed to development activities of all kinds.

My belief that disruptive activities in designated wilderness areas should be prohibited also compelled me to oppose the amendment offered by Mr. YOUNG of Alaska to allow seismic blasting in designated wilderness areas.

STUDY AND FURTHER PLANNING AREAS

There may be certain areas of the country considered or proposed for wilderness which so clearly belong in that category that Congress may well determine that their pristine nature and environmental qualities warrant immediate—if only temporary—protection from development activities. In such cases, Congress must determine that, even without significant mineral resource evaluation, the wilderness value outweighs whatever mineral resource value the area might possess. In unique cases such as this, it would be appropriate for Congress to provide temporary or permanent protection for the area without further study or exploration.

However, with the exception of this limited number of cases, I cannot support the provisions of the legislation which would withdraw other study areas or further planning areas from any leasing activities in a blanket manner. I believe these areas should have, for the most part, been excluded from coverage under the bill. While the committee report notes that these study and further planning areas are withdrawn only temporarily, in fact, many areas may be withdrawn indefinitely. We should maintain the status quo for most, if not all, of these areas until and unless Congress has determined that their unique natural qualities warrant permanent protection from development and so designates them as wilderness. In line with this view, I supported the amendment offered by Mr. YOUNG of Alaska which would have excluded such study and planning areas from coverage under the bill.

URGENT NATIONAL NEED

I also have questions as to the appropriateness and practicality of the committee's inclusion of a provision to allow the President—with the concurrence of the Congress—to open wilderness areas to development in the event of urgent national need. From a practical standpoint, the provision is of little benefit. An example of an urgent national need would certainly be a serious oil import disruption which threatened the Nation's economic well-being. At such a time, there may well be proposals to open designated wilderness areas to petroleum exploration

and production. Petroleum resources from these lands, however, would take years to develop and produce—by which time, of course, the Nation would long be past its crisis. I also question the appropriateness of the provision from a policy standpoint. As columnist George Will stated in a recent article about wilderness protection:

There are 80 million acres of designated wilderness, 56 million of them in Alaska. Only 1.2 percent of the lower 48 States is wilderness; only 4 percent could ever be so designated. Surely the Nation's vitality and security are not so marginal as to depend on that 4 percent.

Moreover, there are several hundred million acres of publicly owned lands outside our wilderness system which are available for mineral leasing, exploration and development. These lands are in addition to the one billion-plus acres of Outer Continental Shelf lands which ultimately may be available for exploration and production.

If we truly believe in the maintenance of a wilderness system in our Nation, "untrammeled by man," we cannot afford to compromise our commitment. And I submit that it makes even less sense to contemplate compromising that commitment under the illusion that wilderness system development would provide any immediate or significant help in time of a national crisis.

In conclusion, I support the goal of the Interior Committee in providing for the permanent protection of designated wilderness areas. However, my personal view is that the committee has missed the mark on several points, and I felt compelled to oppose the legislation on final passage.

If Congress does not take final action this year on H.R. 6542, I look forward to working with Interior Committee Chairman UDALL and other Members next year. ●

EXPLANATION OF MISSED
VOTES

HON. GERALDINE A. FERRARO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Ms. FERRARO. Mr. Speaker, due to personal family business, I was not present for consideration of legislative business in the House on Thursday, August 12, 1982. Had I been present, I would have voted as follows on the recorded votes taken that day.

Rollcall 269: Motion to approve the Journal of the previous day's proceedings, "yea."

Rollcall 270: Amendment to H.R. 6542 to allow the use of explosives during seismic exploration in wilderness areas, "no."

Rollcall 271: Passage of H.R. 6542, a bill to withdraw certain lands from mineral leasing, "yea."

Rollcall 272: Amendment to H.R. 5595 to require at least \$14.3 million of the funds provided by the bill be used to eliminate any deficits in the District of Columbia Teachers' and Police Officers' and Fire Fighters' Retirement Funds, "nay."

Rollcall 273: Passage of H.R. 5595, a bill to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia, "aye."

Rollcall 274: Amendment to H.R. 6100, the National Development Investment Act, to exempt projects funded with EDA grants from wage requirements of the Davis-Bacon Act if the bid of the contractor awarded the grants is 10 percent less than the next lowest bid, "no."

Rollcall 275: Passage of H.R. 6100, a bill to amend the Public Works and Economic Development Act of 1965 and the Appalachian Regional Development Act of 1965, "yea."●

NURSING HOME RESIDENTS DESERVE RESPECT

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. OTTINGER. Mr. Speaker, I rise today to express further my opposition to proposals made by the Department of Health and Human Services to alter current health and safety requirements for skilled nursing facilities participating in the Medicare and Medicaid programs. As a recent editorial in the New York Times stated, these changes will weaken seriously the protection that 1.3 million nursing home residents enjoy.

I believe the proposed changes will hinder the effectiveness of many States' health care provider surveillance programs without introducing the flexibility which has long been needed in the conduct of survey and certification programs. New York State has a carefully developed and effective surveillance program which could be enhanced if increased flexibility were allowed by the Federal Government. However, the State is opposed to the proposed changes which would reduce the frequency of surveys and allow accreditation by the Joint Commission on Accreditation of Hospitals to replace State surveillance requirements. Such changes could jeopardize New York's ability to assure the delivery of a continuously high quality of care in skilled nursing homes, intermediate care facilities, and certified home health agencies.

For the benefit of my colleagues, I am inserting in the RECORD two editorials from local Westchester County, N.Y. newspapers, the Daily Argus and the Citizen Register, respectively, which express the detriment the proposed nursing home regulations would create. I call them to the attention of all Members because it is important that we convince the administration not to relax the health and safety standards currently governing the Nation's nursing home industry. Eliminating excessive paperwork is one thing, but endangering patients who depend on the Government for protection is another.

The text of the editorials follow:

[From the Daily Argus, May 24, 1982]

NURSING HOME RESIDENTS DESERVE RESPECT (By Vic Rosenthal)

On April 28, 1.3 million people of this country were honored for the contributions they have made and continue to make to society. These people are too easily forgotten and rarely discussed except in the most negative or stereotypic terms.

Institutionalized as they are, they may suffer from neglect, mistreatment or outright abuse. Though they make up a diverse cross-section of American society, they are usually treated as one minority group.

They are nursing home residents.

Nursing homes have been in existence for decades, but it wasn't until the 1960s, after Medicaid and Medicare, that the industry boomed. It was during the late 1960s and early '70s that we learned of the tremendous profits being reaped by nursing home owners. We also learned that many residents of these homes were receiving grossly substandard care and treatment, and were having their life savings and minute incomes expropriated.

It was at this time, when scandals were being publicized, that residents, family members, advocate groups and government officials began to make noise about the inadequate care being provided, and the use of public money. Government hearings were held across the country, books and studies were written, and the government started to look closely at the system. Through the mid and late 1970s the federal and state governments promulgated regulations, passed nursing home reform legislation and a Patients Bill of Rights.

As these laws and regulations were adopted, many of the worst nursing homes were finally forced to close because they could not meet the new standards. Unfortunately, however, because of inadequate surveillance and enforcement, substandard conditions persisted. Many facilities remained in a large middle-ground, providing minimal custodial care.

When Ronald Reagan was elected, his administration declared that the nursing home industry was over-regulated. Secretary of Health and Human Services Richard Schweiker appointed a task force to study the federal regulations, which resulted in a proposal to delete many of the regulations protecting the rights of nursing home residents. This proposal was warmly greeted by many segments of the nursing home industry, and the administration claimed that money would be saved.

However, an unexpected problem confronted the administration. Nursing home residents and advocate groups bombarded the president, Secretary Schweiker and Congress with letters opposing the proposed

changes. Secretary Schweiker then retracted the task force proposals, claiming he always has been an ardent supporter of residents' rights.

What has become clear recently is that the administration and the industry are still looking to cut the regulations governing nursing homes. The latest proposal is to reduce the surveillance and enforcement of the nursing home regulations. The administration is aware that it is too unpopular to cut services and the rights of nursing home residents, but why not reduce surveillance activities that are apparently ineffective? As in other areas of government, the administration has made it clear that business should be left alone to regulate itself.

The proposals to reduce surveillance and enforcement is taking two forms. First, the administration is proposing to significantly cut the matching funds granted to states for inspection teams. States rely heavily on these funds and will be forced to curtail their surveillance activities. In some states, due to last year's cuts, inspection teams have already reduced the frequency of surveys from annual to bi-annual.

Secondly, the administration is considering transferring the responsibility and authority to conduct surveys from state regulatory bodies to the Joint Commission of Accrediting Hospitals. The commission is a private, voluntary body whose charter indicates that its main purpose is to provide consultation to hospitals and long-term facilities. How can the administration realistically expect a private, consultative body to effectively regulate an industry that receives more than \$5 billion annually in public money? Could it be the administration doesn't want enforcement to occur?

Another proposal would change the survey cycle to only one inspection every 36 months. Additionally, the administration would allow the inspection team to check whether corrections of nursing home deficiencies have been made without visiting the facility. Simply a phone call or mail reply might be considered sufficient.

This proposal seems utterly preposterous in view of how many nursing home operators have been unwilling or incapable of correcting problems. Why is it that an administration so concerned with fraud and waste would be so casual and haphazard in its surveillance of a \$5 billion program? It's time for the government to take a firm stand and develop a rational, effective program to assure residents of a dignified, quality life. Secretary Schweiker indicated he was a strong supporter of protecting the rights of residents; yet these protections will be meaningless if the enforcement procedures are relaxed.

At this time of the year when nursing home residents are being recognized and senior citizens are being honored, shouldn't the government respond with support and protection? Enforcement and surveillance activities are already inadequate. Any further cutbacks and reductions will virtually strip the government of its ability to monitor the care in nursing homes.

On April 28, the nation saluted nursing home residents. One now hopes the administration would rethink its proposals and reformulate them so as to pay honor and respect to our citizens who have contributed so much.

If it doesn't, Nursing Home Residents Day will have been an empty gesture. Vic Rosenthal is executive director of the Coalition of Institutionalized Aged and Disabled, Inc., an

organization of nursing home residents' councils.

[From the Citizen Register, July 24, 1982]

CASUAL GAMBLE ON HEALTH CARE

"This is just tearing out federal protection of helpless people."

Those are the words of Sen. Lawton Chiles, D-Fla., and the sentiment of many others in and out of Congress, regarding Reagan administration proposals for changing inspection rules for nursing homes.

Presumably in the name of regulatory relief or economizing, or both, the administration purposes, for instance, that accrediting by a private body, the Joint Commission on accreditation of Hospitals, be accepted as "sufficient evidence" of compliance with federal standards. A California health official said her state has learned by experience that this is an unreliable yardstick.

As for inspections, these would focus on nursing homes with histories of violations, while replacing annual inspections of the rest with inspections every two years. Another proposal would drop the requirement that nursing homes with problems be reinspected within 90 days; administration officials said that purpose can often be served by telephone or letter.

That sounds like a joke, but it's just typical of this whole rationale of trusting to luck that nursing homes that now pass muster will somehow stay that way and that the others will shape up. This seems rather a casual gamble at the expense of patients' welfare and at the risk of corner-cutting that could result in profiteering at government expense.

What this approach overlooks is the preventive disciplinary value of directly imposed federal standards and reasonably frequent inspections in keeping nursing-home operators on their toes. It is ironic that the very success of those procedures should make the administration imagine that they can be eroded. The administration is basing policy not on the record but on a myopic misreading of the record.●

H.R. 6124

HON. THOMAS B. EVANS, JR.

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. EVANS of Delaware. Mr. Speaker, implementation of the credit control legislation (H.R. 6124) reported by the Banking Committee, August 11, would be a pure unmitigated disaster. As we have already seen, the use of credit controls to provide real relief from high interest rates—or, for that matter, any other real economic benefits—is a proven failure.

It is difficult to believe that we could have learned so little from the 1980 experiment as to want to risk another round of economic disaster that is so clearly associated with the imposition of credit controls. This type of legislation does nothing to address the root causes of our economic problems, but simply concentrates on the symptoms. Mr. Speaker, it is said that the proof of the pudding is in the eating. In this instance, the pudding contains a large element of economic cyanide.

I was opposed to the use of credit controls by the Carter administration, and I strongly endorsed the sunset of the unnecessary Credit Control Act of 1969. To reimpose any form of Government-related credit controls now would be spectacularly ill timed, with the chief result being a further dampening of an already slow economy. The 1980 experience with credit controls resulted in a real GNP decline of almost 10 percent, the loss of over 1.5 million jobs, and a precipitous decline in auto sales, farm income, and housing starts—with autos, agriculture, and housing the "favored" sectors under the Carter credit allocation plan. The financial markets were placed in serious difficulty, and the whole process had no lasting effect on either inflation or interest rates.

It is certainly tempting, especially in an election year, to try to avoid the often painful measures of fiscal and monetary restraint needed to restore a prosperous economy. Ignoring the present real problems, and reaching instead for a tool whose efficacy is purely illusory will, however, serve no real purpose, but will be paid for dearly in the years to come.●

SUPPORT FOR NEW DAIRY PRICE SUPPORT SYSTEM

HON. JAMES L. NELLIGAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. NELLIGAN. Mr. Speaker, I rise in support of the dairy provisions of H.R. 6892, the Food and Agriculture Reconciliation Act, which passed the House on Tuesday, August 10.

We all agree that the problem of increasing dairy surpluses in Federal reserves is getting out of hand. Last year, the Government purchased 21 percent of our cheese production, 29 percent of our butter, and 65 percent of our dry milk. These purchases cost the American taxpayers about \$2 billion. Most of the purchases are still being held in the Federal reserves, and much of the surplus is being lost to spoilage.

We all know that farmers are not to blame for this sad state of affairs. Farmers are simply responding to pricing signals which are established by price-support levels. We need to change those signals so they more adequately reflect consumer needs and market conditions.

The dairy provisions of H.R. 6892, which establish the National Dairy Board and the "two-tier" price-support mechanism, are a step in the right direction.

Composed of representatives from the dairy farming community, the Board would determine how much production would be needed each year

to meet consumer needs. That amount would be converted into a percentage of the previous year's production.

A dairy farmer would be eligible to receive the full support price only for that percentage of his production which is certified as needed to meet production goals. Any additional production would receive a lower support price.

Other important features of the legislation would allow dairy farmers to conduct a referendum to create a National Milk Promotion Board, and would allow for wider distribution of surplus dairy products to needy Americans.

During debate on H.R. 6892, opponents pointed out that there are potential pitfalls in the new price support mechanism. They noted that the Dairy Board could become a nonresponsive bureaucracy. They said that there were insufficient disincentives to overproduction.

Mr. Speaker, I have conducted an informal poll among dairy farmers in my district. I have found that these farmers, who operate some of the most efficient dairy farms in the Nation, favor the new price support mechanism of H.R. 6892 by roughly a 3-to-2 margin. I feel that this figure, unscientific though it may be, indicates the strong sense which exists in the dairy community that something must be done to solve overproduction problems. It was in large part because of this sense that I voted in favor of H.R. 6892 on Tuesday.

I think we should all be aware, however, that a significant minority of dairy farmers are concerned about the potential for the Dairy Board to degenerate into yet another nonresponsive Federal bureaucracy. Should reforms in the dairy program along the lines of those contained in H.R. 6892 be enacted, as I sincerely hope they will be, we must be alert to this potential danger.

Simply stated, I believe that the reformed dairy price support system affords us both an opportunity and a challenge. The opportunity is to slow the flow of dairy products into the Federal reserves; to reduce the costs of the program to taxpayers by up to \$1.3 billion next year; and to create a better economic climate for dairy farmers. The challenge is to insure that the new mechanism is used properly, and is responsive to the interests of those it is designed to serve.

I share the view of 60 percent of the dairy farmers in Pennsylvania's 11th Congressional District that the dairy provisions of H.R. 6892 are needed. I urge my colleagues to continue to support their enactment.●

HAPPY 20TH BIRTHDAY TO SEAL BEACH LEISURE WORLD

HON. DAN LUNGREN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. LUNGREN. Mr. Speaker, 2 weeks ago, on July 31, I had the distinct pleasure of celebrating the 20th anniversary of the Seal Beach Leisure World.

This Leisure World is of course the very first senior citizen retirement community in the Nation. It was on June 8, 1962, when residents first began moving into Leisure World. Since then the 6,482 apartments in the community have long been sold out.

Except for commercial stores, the approximately 9,000 residents of the Seal Beach Leisure World live in a virtually self-sufficient community. This includes their own security as well as a medical clinic. A truism which Life magazine picked up in 1963 is that in "Leisure World there is no leisure." This remains true today as residents have many recreational and community facilities to become involved with. These include: A 9-hole, par-3, golf course with putting green; swimming pool; therapy pool; lapidary shop; 2 woodworking shops; 2 art and ceramic studios; 2 sewing rooms; 4 pool and billiard rooms; 2 horseshoe courts; 2 roque courts; 16 shuffleboard courts; 5 lawn bowling lanes; amphitheater, 2,500 seating capacity with complete stage; 4 clubhouses complete with 12 kitchens; and 17 meeting rooms.

It has often been stated that one is always as young as he or she is in their heart. Well, I know that the average age of the residents is 76 years young and every time I visit Seal Beach Leisure World I am reminded that the senior years of one's life really can be among the very best.

Mr. Speaker, in celebration of Seal Beach Leisure World's 20th anniversary, I would like to share with my colleagues in the U.S. House of Representatives an excellent article written by Margaret Newhouse, editor of the Golden Rain Leisure World News. I think my colleagues will find of particular interest many of the successes which that Leisure World has had in its 20 young years. The article follows: [From the Golden Rain News, July 29, 1982]

COMMUNITY CELEBRATES ITS 20TH ANNIVERSARY

(By MARGARET NEWHOUSE)

The community will pause for a fond look backward, residents will take time out from their manifold activities Saturday, July 31 to observe the 20th anniversary of Seal Beach Leisure World.

The Golden Rain Foundation has put together a day-long schedule of commemorative events from 10 a.m. to 3 p.m. in St. Andrews Clubhouse No. 4.

Area dignitaries have been invited.

EXTENSIONS OF REMARKS

A film of the early days will be shown and local musical groups will perform. The celebration will be topped off with the appearance of two popular stars from the Lawrence Welk Show for an evening performance in the Amphitheater.

Everyone is invited, of course, and a large crowd is anticipated by the refreshment committee as well as by the organizers of this historic celebration.

Unless, of course, people are too busy pursuing the fabled life of retirement to attend the event. From the beginning of this cooperative design-for-living the community has worn the tag-line, "In Leisure World there is no leisure."

This was a standard saying among early residents, according to an article about retirement towns including Leisure World, in the Nov. 8, 1963 issue of Life magazine.

The article pointed out the tangible attractions that had drawn 8,000 residents to the area: three clubhouses, a golf course, a swimming pool, 2,500 seat Amphitheater, buses for free transportation and extensive medical facilities. It noted the many clubs and free lessons in bridge, ceramics, and dancing.

GETTING A BARGAIN

The price of an apartment was running between \$11,320 and \$14,000. Life's comment was: "Most residents feel they are getting a bargain, and most can well afford it. The average income is \$6,000..."

Obviously, the financial facts of life have changed since the early days. In other ways the living is not so different today.

Some of the clubs that contribute to community life now were being launched. The Life article pictured the Men's Chorus giving forth with a song advising ladies to "tint your hair and keep it curled, and stalk your prey at Leisure World."

One lady may have taken their advice: Genevieve Daugherty was the first bride to be married on the premises, Sept. 15, 1963 in Northwood Clubhouse No. 3. Conversely, the stalking may have been on the other foot, so to speak. The bridegroom Henry McKinley "made himself so indispensable" the lady acquiesced. "We need each other so much," she said.

In 1963 "retirement towns" were relatively new and were reported to be the biggest private housing projects being built in the United States.

Some mental health experts spoke out against the segregated communities. "Senility is a contagious disease," one said.

But Life interviewed a 77-year-old Leisure Worlder who dismissed the gloomy prognosis with an airy remark, "We have many old people here, who are very young."

Some of the youngsters were kicking up their heels on stage as members of a 58½ year-old average age chorus line of flappers in "The Scandals," a production which packed the Amphitheater for two evenings. Ask Mary Plaskett or Dorrie Walthery about the fun. They were there.

HOMEMADE FUN

A lot of the entertainment was of the homemade variety. Residents doings were reported spottily in the local press that was the forerunner of The News. Some were busy practicing for the second annual Christmas pageant. The Little Theater Group was rehearsing "A Night at the Inn."

The Leisure World Orchestra was playing for dances every first and third Friday and planned to play for a New Year's Eve dance. Gardening was a universal occupation for the new householders. Pictured digging in

August 13, 1982

front of their apartment were Mr. and Mrs. Joseph Sweetnam, 13610 Burning Tree Lane 2-L, who it was reported, received the first key to any Leisure World apartment on June 8, 1962.

More than 100 residents were attending weekly Monday night rehearsals of the Community Singing Club. Officers were Robert Titus, president; Edward Sheehan, vice president; Nita Gilliat, secretary/treasurer and Ruth Wallace, musical director.

The golf course was slated to open Saturday, Nov. 30 and there had been so much interest expressed in playing on opening day that a drawing was set up to establish reservations for starting times.

Only approximately 100 apartments were still for sale as of Nov. 20.

The Leisure World Republican Women's Club had just been chartered, the week of Dec. 18.

Church congregations were forming. The Leisure World Mission Catholic Church announced its first service the last Sunday in November. The Rev. W. J. Mullane made the announcement as the workmen were putting together the last pew.

Thanksgiving services were scheduled that year, 1963, by the (newly named) St. Theodore of Canterbury Episcopal Church and the Lutheran, Community and Catholic churches.

Toward the end of December the dart ball team members helped the Lutheran pastor Dr. Clifford B. Holland and his wife move in.

And if all went as planned the Leisure World Orchestra played for residents to dance out the year and dance in the new, a happy social occasion carried on in later years with a hired band.

In January of 1964 the new Lions Club completed its organization with the election of officers and was to receive its charter from the district governor in March. C. K. Close was named president.

The Christian Church, the Rev. Robert Graham, minister, was drafting its bylaws.

The first organization meeting of the Garden Club took place and the Coin Club was reported as being "one of the most active groups."

Leisure World continued to attract national publicity. Mabel Menke was chosen to appear on the "Queen For A Day" TV show.

Groups forming included Kiwanis and Golden Rain Toastmasters. The president of Leisure World Toastmasters, Sewell Van Wormer, turned out to welcome the Golden Rain group.

An item Feb. 26 was "The Rev. Maury Whipple Bishop has arrived from the Unity School of Christianity, Lee's Summit, Mo. to be full-time minister of the Leisure World Unity Church."

Bertha C. Bruce, president pro tem, announced in March that the California Retired Teachers group was organizing.

Of wide interest was the news that a new addition to the Medical Center would open April 12 housing a physio-therapy clinic, eye-ear-nose and throat clinic and four medical suites for the use of eight doctors.

Delegate Mrs. Naomi Kettler reported April 17 that the LW Richard Baylden chapter, DAR was welcomed as the newest in the state at the recent State Convention in Coronado.

That spring the Sweet and Low chorus of approximately 50 members practiced to present a concert. The ensemble chorus would sing three compositions by Elthea Turner.

In May the LW Church of Religious Science went "over the top in the required number of members to have a full fledged church" reported the Rev. Dorothea Dyrenforth, minister.

The groundbreaking ceremony for the Community Church May 31 was announced by the Rev. Harold E. Baker, minister.

The Larks, a bird watching group was to meet.

And the homemade fun was still brewing. VWWI Barracks 2860 announced it would sponsor a contest "I Love Leisure World Because . . ." The first three lucky writers would win a four-day all expense trip to the New York World's Fair.

KEO planned a similar contest.

The Leisure Worlders, a square dance group celebrated its first anniversary. Al Colcough was president and caller.

The second baking contest for residents, a repeat of a successful event held in February, was announced in May. Rules were strict: "No packaged items will be eligible."

A headline May 29 proclaimed "Sale of New Design Manors Begun In Last Unit—No. 15."

New officers of the Senior Rotarians were chosen. Harry Schaffer was president.

THE SCANDALS

Bigger and better, the "Leisure World Scandals" played the Amphitheater July 18 and 19 with a cast and crew of more than 200. The show presented "an amusing if not truthful, view of the 'Seven Ages of Leisure World' from 'infancy' through 'the gracious years.'"

"The skits, mainly pantomimes, poke fun at those who take themselves and life too seriously, and provide Leisure Worlders the opportunity to a laugh at their own follies and problems."

A comic character Jerry Atrics was portrayed by George Reish; a song and dance routine was performed by Bob Titus and Jessie Jenkins; skits included "This Is the World That Is," based on the popular TV show "That Was the Week That Was," and a "Dear Abby" skit by Dora Walthery and Gordon Hayward.

"It is hoped that the ridiculous antics of our Leisure World 'teenyears' will be somewhat balanced by the harmony of our Barbership Quartet and the Beauty of the square and round dancers," Hap Hazard, stage veteran and producer of the show, commented.

Beautification projects were blossoming. A headline Aug. 21 stated "7 Trees Planted In/Trail Blazer Project" (at the intersection of El Dorado and Oakmont), according to a plan outlined by the Garden Club Tree Planting Committee and the Grounds Committee.

In September a Men's Republican Club was formed with Deane Davis presiding at the first meeting.

A Home Talent night show was planned in the Amphitheater Sept. 19.

ACTING THEIR AGE

More than 100 clubs were listed in Sept. 1984. A member of the Leisure World Square Dancers summed up the spirit of conviviality that encouraged the newly retired to heightened enjoyment of life. She said, "I wouldn't dream of doing this back in Nebraska—but here it's different. There's no youngsters around to watch us whoopee it up, we can act our age."

Not all the creative energy was expended on the Amphitheater stage. That fall the second annual Festival of Arts and Crafts was scheduled. It would present creations of 64 organizations and individuals.

Resident's access to the surrounding area attractions was enhanced in October with the opening of "A nearly 100-mile strip of San Diego Freeway connecting Leisure World with the entire freeway complex of Southern California."

In November plans were shaping up for what was to become a colorful event that would stand out in memory as one of the annual community undertakings.

"A mile long Armistice Day parade with more than 200 gayly decorated vehicles is expected when the 'Leisure World on Wheels' parade of trikes, bikes and electric carts rolls down St. Andrews Drive Nov. 11."

"At latest count, 112 trikes, 40 bikes and 31 electric carts will participate in the parade."

The parade was followed by an Armistice Day program which would include visiting dignitaries, clergymen, bands (the Star Club Kitchen Band plus the Marina High School Band of Huntington Beach). Prizes were offered for the best costumed riders. Clowns and trick rides enlivened the procession.

"Historical themes found pilgrims marching side by side with pioneers and their covered wagons. Indians danced as their squaws waived fresh 'scalps' . . . electric carts, some so minutely decorated they resembled miniature floats in the Rose Bowl parade," took part.

A color guard of veterans of World War I led off in what was termed "the biggest most colorful Armistice Day parade in Orange County."

"It was observed with the dignity of an appropriate program but undeniably, with a touch of festivity during the preceding parade," the writer reported.

Progress was noted on another front: "The business office has recently moved into a mobile trailer in back of the United California Bank."

The religious life of the community, which from the outset had not been neglected, grew in scope.

"The first step toward unification of religious life at Leisure World was taken Tuesday, Nov. 12 when leaders of 14 denominations met and formally organized the first Religious Council of Leisure World," according to the Rev. H. Carl Roessler, Religious Director.

The roster of clubs now numbered 52.

January 14 it was reported, "The Rev. Mr. Frank V. D. Fortune assumed duties last Sunday as minister of the St. Theodore of Canterbury Episcopal Church."

Meantime, residents were avidly seeking new friends to fill the void of friends and family left behind in the move to new surroundings.

HOMETOWN REGISTRATION

"More than 7,000 replies to a recent Hometown Registration Survey have been returned (Feb. 11, 1985) by residents to the LW Resales, Inc."

The Women's Club, celebrating its second anniversary, was said to be the second largest club in the Orange District.

As might have been predicted, "An overflow crowd attended the first World Day of Prayer service to be observed in Leisure World."

Theatricals flourished. "With four members of the Leisure World Little Theater Group in the cast, the Play 'Suds In Your Eye' got off to a flying start last Friday night at the Peppermint Playhouse, 124 Main St., Seal Beach."

The little city by the sea was erecting its own milestones. An item in April 1 read "Leisure World will join with the City of

Seal Beach in the celebration of the city's 50th anniversary which officially got underway with the issuance of a mail cancellation die this week commemorating the Golden Jubilee."

Leisure World was still attracting the attention of a world curious to see this "Eden-like" place sprouting on the California coast.

Which reminds one of the old saying "The more the change the more it is the same thing." Consider this comment quoted in the March 11, 1965 newspaper "Maybe some day we will see a Leisure World in Tokyo."

These were the parting words of Japanese visitor Katsuyoshi Uyama to community relations director, James H. Gormsen, following a tour of Leisure World Friday.

Sound familiar?

They say the first years are the hardest and they are probably right. At any rate, a brief glimpse at some of the highlights of the early years here reveals that the road may have been rocky, but the travelers had a lot of fun along the way.

The new experiment in retirement living was watched by outsiders with many a doubt expressed as to its future.

It is to the credit of the pioneer move-ins and all community-minded people who have followed that Leisure World, contrary to some predictions, established itself as an eminently desirable place to live and remains so.

The community has grown up. Some of the homemade fun has been supplanted by professional entertainment. Lawrence Welk is packing them in in the Amphitheater as once did the "Leisure World Scandals."

The world is still knocking at our door, notebook and camera poised. How many touring groups from how many countries have stopped by lately to have a look at how our community runs?

Within recent memory are a group of doctors, executives and educators from Japan, a Japanese construction company, an Australian television documentary filming crew, an Australian real estate conglomerate and retirement housing builders from Israel.

And, a heartwarming circumstance, other visitors came not primarily to admire the obvious—the fine physical plant and spacious well-tended grounds.

They asked probing questions about the efficient government. A research team came from the University of Florida to study the longevity and quality of life of the residents.

Perhaps the nicest compliment of all, a television station came to interview some of our Leisure World couples who have stayed happily married for 60 years.

That all says a lot for the first 20 years of Leisure World Seal Beach. Residents may be pardoned a glow of pride as they look back over the years Saturday.●

SENDING TAX BILL TO CONFERENCE TRAMPLES CONSTITUTION

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. PORTER. Mr. Speaker, the constitution was badly trampled last week in Washington when the House totally abdicated to the Senate its responsibility to initiate the tax bill. Article 1,

section 7 of the Constitution provides that "All bills for raising revenue shall originate in the House of Representatives..."

Instead, the Senate held hearings, drafted a tax bill in Senator DOLE's Finance Committee, debated and considered amendments to it on the Senate floor, adopted it and sent it over to the House of Representatives.

The House Ways and Means Committee held no hearings and drafted no legislation, and the House itself had no debate on raising revenue and considered no amendments, but merely, by motion, sent the Senate bill—with a House bill number on it—directly to conference committee.

The conferees, a few from the House, a few from the Senate, will determine what this bill will contain, and there will be one vote, up or down, on its adoption. If it comes out anything like what went in, it will be a bill raising taxes over 3 years by \$100 billion—the largest tax increase in U.S. history—affecting Americans across the entire economic spectrum in essential and important ways—their livelihoods, their abilities to produce and consume, and their proclivities to save and invest.

So what that the House did not initiate or even consider this vital matter? So what that there were no hearings or debates or amendments?

Well, the Founding Fathers did not just throw that provision giving the House exclusive power to initiate revenue matters in there to even up with the Senate's exclusive power to advise and consent to treaties. No, they had something far more fundamental in mind. You will recall that England had levied tax after tax on its colonies without consulting them or their people for a moment. The Boston Tea Party dramatized it; the Declaration of Independence articulated it. If there was one grievance more on their minds in 1776 than any other, it was taxation without representation.

So, when they sat down 11 years later to write a constitution, they wanted the taxing power to be most under control of and responsive to the people. And they put it—very intentionally—squarely where the people would have the greatest say-so: in the House of Representatives, whose Members have to face judgment of the people every 2 years, unlike the Senators, who have the long and insulated tenure of 6 years without fear of rejection.

No, I do not want the Senators—God love the wonderful gentlemen—writing tax laws for me. I want someone having that responsibility who has got to come back to me very soon for my approval. That is what the Founding Fathers wanted and exactly what they constructed to protect us.

Two hundred years later there are some—far too many—in the Congress

who do not care, do not think you will notice or care, and who walk upon our basic law with apparent impunity. Perhaps those who trample the genius of our system so readily ought to be the first to receive its recall notice.●

WATER THE COAL SLURRY BILL

HON. PAT WILLIAMS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. WILLIAMS of Montana. Mr. Speaker, in the current debate regarding the granting of eminent domain to coal slurry pipeline companies, there are some misconceptions regarding the question of water. I have assembled this factsheet to dispel any misconceptions on the important aspect of State water rights protection.

First myth: Current language in both the House bill, H.R. 4230, and the Senate bill, S. 1844, adequately protects the State's right to control its water.

Fact: This assumption is simply not true. Traditionally, the only mechanism that States have had for the reservation of water has been so-called water export bans. On July 2, 1982, the Supreme Court struck down the Nebraska water export ban. The case, *Sporhase and Moss against the State of Nebraska*, is a far-reaching and complicated case; but one thing is certain: No State law that bans the export of water on totally arbitrary grounds can withstand a constitutional court test. Some 19 Western States rely on these bans to protect water.

Both bills contain language deferring to State water laws, but there is no language in either bill even purporting to delegate to the States legislative authority over the use of water in interstate coal slurry pipelines. In the Nebraska water case, the State of Nebraska relied on language in 37 Federal statutes and a number of interstate compacts as being congressional authorization for and approval of the Nebraska statute involved in the case. The language, practically the same in each of the 37 Federal statutes, was quoted by the Court in the opinion, as follows:

Nothing in this Act shall be construed as affecting or intended to affect or to in any way interfere with the laws of any State or territory relating to the control, appropriation, use, or distribution of water used in irrigation.

The Supreme Court held that the quoted Federal statutory language only "demonstrate[s] Congress' deference to State water law." That language did not protect the Nebraska law. The Supreme Court held the provision of the Nebraska law invalid.

The State water law in H.R. 4230 is practically identical to the quoted language which the Supreme Court held

to be merely a "deference" to State water law. By no stretch of the imagination could that language in H.R. 4230 be called a "delegation" of legislative authority to the States.

There is no basis in the bill for the assertion that, "If any State doesn't want its water used for a coal slurry pipeline, the pipeline won't be built." No language in the bill can be construed to have that meaning. If coal slurry promoters are sincere, why do their bills not provide specifically that: "If any State doesn't want its water used for a coal slurry pipeline, the pipeline won't be built."?

Second myth: Both H.R. 4230 and S. 1844 meet the Supreme Court decision in the Nebraska water case.

Fact: Neither bill even purports to overturn the Nebraska water case and neither bill even attempts to deal with the issues raised by the case. Neither bill attempts to give State law the protection which the Supreme Court says Congress can give to State law. If this legislation were to become law and the Nebraska law involved in the *Sporhase* case were challenged as a basis for refusing to allow Nebraska water to be transported to Colorado for use in a coal slurry pipeline originating in Colorado, that Nebraska law would be held invalid. This legislation would provide no protection for that Nebraska law in that situation.

Third myth: Amendments have been offered in the Senate to correct the Nebraska water decision.

Fact: The fact simply is those amendments to S. 1844 do not correct the problems produced under *Sporhase*. Nowhere in these amendments is there a delegation of the Federal right to appropriate water. Nowhere in the bill do the words "delegate" or "delegation" appear. Language in the amendments is so vague that it is not at all clear that it would extend to protect State export statutes. The Supreme Court was clear: Congress must speak specifically to delegate its right to adjudicate water. Anyone reading the Senate language can see that it is not specific enough to be an outright delegation of the congressional right.

Fourth myth: Water is no problem because the committees have adequately discussed this issue.

Fact: In spite of urging by myself and others in Congress, there have been no water hearings in any of the three committees that have heard this bill. No experts on the question of water, no Governors, no concerned citizens have testified in the House during this session. The Senate has had 1 day of water hearings, and testimony was limited.

Fifth myth: The coal slurry bill is the vehicle by which to solve problems raised by the *Sporhase* case.

Fact: This is the most shortsighted of all statements. There are funda-

mental problems with attempts to correct the Sporhase in the context of a coal slurry bill. There is no assurance whatsoever in the political process surrounding coal slurry that effective language will eventually emerge after conference protecting the interests of the Western and Midwestern States. The Congress would be better advised, if it intends to protect the States' interests, to proceed with a bill dealing with the Sporhase issue first, rather than placing these fundamental State interests into the political turmoil of a coal slurry bill. Any legislation dealing with State water rights is an issue of vital importance to the people of this Nation. Some say that water will be the most important issue in the 1980's. This type of issue deserves extensive hearings that call upon Governors, water experts, and State attorneys general.

Should the Congress proceed with a coal slurry bill first, without resolving the Sporhase issues, it would jeopardize the ability of the States to control the availability of their water to coal slurry pipelines, since legislation dealing with Sporhase would not be in place at the time of enactment of a coal slurry bill, and therefore could not be construed to be legislation within the contemplation of any coal slurry legislative protections for water.

Sixth myth: The water problems of States that share a water source are addressed in legislation currently under consideration.

Fact: One of the most serious omissions in either bill is the absence of language dealing with the situation where States share water sources. Inevitably, the grant of Federal eminent domain powers will encourage substantial water sales and diversions to slurry pipelines from existing aquifers and river beds. As demonstrated by the recent \$1.4 billion sale of water by South Dakota to the ETSI coal slurry pipeline, there will be strong temptations for States to make major water sales at the expense of their neighbors' shared water rights. Since virtually every State is downstream from some other State, this is likely to be a growing problem. Second, particularly in the West, most of the significant underground water formations are shared with other States. Because groundwater is replenished so slowly, a significant diversion from one State may have a major impact on the availability of groundwater in neighboring States sharing the water formation.

Both bills fail to take cognizance of this emerging problem over the allocation of shared water sources. Because of its silence on this issue, it will encourage unilateral action by States to the serious detriment of their neighbors. The problem is exacerbated by the fact that coal slurry pipelines will tend to set off a water pricing war, particularly in the West and Midwest.

Amendments were offered in the Interior Committee as well as Public Works attempting to deal with this question; neither passed. This interest, however, shows how important this question is.

CONCLUSION

These are only six of the problems I see with the current round of legislation. The problems of private land condemnation, no common carrier obligation, no true consumer protection against construction cost overruns, and the tremendous loss of long-term rail jobs in exchange for some short-term construction jobs are not addressed in this fact sheet, but remain major stumbling blocks in the granting of eminent domain to coal slurry pipeline companies. I attempt only to address the water issue.

One important point should be made, however: H.R. 4230 and S. 1844 are not coal slurry bills—they are eminent domain bills. Coal slurry pipelines are being built without these pieces of legislation, and the only thing being granted is the awesome Federal power to condemn land for corporate gain.

I hope this discussion is helpful.●

THE PLO IS A CANCER

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 13, 1982

● Mr. BINGHAM. Mr. Speaker, I do not always agree with the columnist James J. Kilpatrick, but in today's Washington Post, he has eloquently called a spade a spade in his analysis of the PLO. He correctly places the blame for the destruction and the bloodshed in Lebanon on the PLO and its leader, Yasser Arafat. Mr. Kilpatrick's column follows:

THE PLO IS A CANCER

For the past two months, night after night on the evening TV news, all of us have gazed in dismay upon the suffering in Lebanon, and night after night the same implicit message has flashed subliminally across the

screen: the Israelis are responsible for this. It is high time. It seems to me, to put the lie to this insidious nonsense. Let us place the blame for the destruction and bloodshed squarely where it belongs, on the shoulders of that smirking monster with the maniac grin on his face, Yasser Arafat, leader of the PLO.

From the moment of its creation as a modern state in 1948, Israel has asked but one thing of its Arab neighbors—to live in peace. It is irrelevant to the current situation that in times past Prime Minister Menachem Begin and Defense Minister Ariel Sharon engaged in their own terrorism; we might with equal acuity review the history of Babylonians, Greeks, Persians, Romans, Mamelukes and Ottomans. The issue at hand has to do with Lebanon today. Why are the Israelis there? And who is responsible for the suffering inflicted upon innocent civilians?

The Israelis attacked the PLO for one reason only—because the provocations of the PLO at last had become unbearable. In this regard, we may recall the story of another long-suffering people who resorted to arms when their repeated petitions were answered only by repeated injury. Is that line familiar? It should be familiar. This was the justification advanced by our own forefathers for the American Revolution. Israel has no quarrel with the Palestinian Arabs as a people. Israel's rage is directed at that formless, shapeless nonentity of an entity, the Palestine Liberation Organization. The PLO has none of the trappings of sovereignty or statehood, but it is treated as sovereign state. The PLO's chieftain swaggers to the United Nations to address the nations of the world; the PLO maintains an army supplied and equipped by the Soviet Union; here in the United States we talk constantly of "recognizing" the PLO.

What a fiction! The PLO is not a state. It is a cancer. Like other cancerous lesions, it must be cut out, roots and all, before the malignancy spreads. Left alone, whether through fear of surgery or hope or remission, cancer only gets worse. Who is to blame for the suffering in Beirut? Who prolongs the agony? The PLO moved into that beautiful and inoffensive city like a gangster mob, terrorizing the inhabitants. Aided and abetted by the Soviet Union, the PLO made Beirut a headquarters for international terrorism. With its stunning defeat at the hands of Israeli troops, the PLO reacted in the most cowardly and contemptible fashion: it took the civilians of Lebanon as hostages, and hid behind them while it stalled for time.

It would take a heart of stone not to be moved by the pictures we have seen from Lebanon—the old women weeping, the infant whose arms were blown off. Every humanitarian instinct cries out for cessation. But the smoke from the burning buildings of Beirut should not blind us to this fact—that the PLO could have ended the carnage at any time by laying down its arms and walking out. Arafat chose to fight. The blood is on his hands.●
